OLEUM VINI, *O. æthereum*—*o. Vitrioli*, *Sulphuric acid*—*o. Vitrioli dulce*, *Æther sulphuricus*.
OLFACTIF, *Olfactory*.

OLFACTION, *Olfac'tus*, from *olfacere*, *olfac'tum*, (*olere*, 'to smell,' and *facere*, 'to make,') 'to smell;' *Osphe're'sis*, *Osphe'r'sia*, *Osphe're'sia*, *Osm'e-sis*, *Odora'tus*, *Odora'tus*, *Sensus osnomet'ricus*, *Sense of smell*, *Smelling*, (F.) *Olorat*. The sense by which we perceive the impressions made on the olfactory nerves by the odorous particles suspended in the atmosphere. The olfactory nerve or first pair has usually been considered the great nerve of smell; and it is probably the nerve of special sensibility, general sensibility being communicated by the branches of the fifth pair, distributed on the pituitary membrane of the nose and sinuses.

OLFACTIVE, Olfactory.

OLFACTORY, *Olfactive*, *Olfac'tivus*, *Olfac'torius*, *Osphe'ran'ticus*, *Osphe'rante'rius*, *Osphe're'ticus*, (F.) *Olfactif*. Same etymon. That which belongs or relates to the sense of smell.

OLFACTORY BULB, see Olfactory nerves.

OLFACTORY FORAMINA, (F.) *Trous olfactifs*, are the holes in the cribriform plate of the ethmoid bone, through which the olfactory nerve passes.

OLFACTORY LOBE, see Olfactory nerves.

OLFACTORY NERVES, *Ethmoid'al nerves*, *Par'primum Nervo'rum cer'e'br'i*, *Nervi odorato'rii*, *Processus mamilla'res seu pupilla'rum seu mamillares cer'e'br'i ad naves seu pupilla'res*, *Curruncula' mamilla'res*,—the first pair of *encephalic nerves*. This nerve, which probably arises from the medulla oblongata, is observed to leave the brain, opposite the inner part of the fissure of Sylvius, by three roots; which, by their union, form a triangular knot or expansion. When it reaches the ethmoid fossa it expands and forms a triangular ganglion, or grayish, soft bulb,—*Bulbus olfact'orius*, *Olfactory bulb*, *tubercle*, or *lobe*,—which furnishes, from its inferior surface, the branches that have to be distributed to the nasal fossæ. These filaments are very numerous; they pass through the foramina in the cribriform plate and enter the nasal fossæ. They are distinguished into the *internal*, *external*, and *middle*. The former are distributed over the mucous membrane, covering the outer paries of the nasal fossæ; the second descend upon the septum, and the third are lost, almost immediately, on the portion of the pituitary membrane that lines the vault of the fossæ.

OLFACTORY TUBERCLE, see Olfactory nerves.

OLFACTUS, Olfaction—o. *Acutus*, *Hyperosphresia*—o. *Amissio*, *Angstia*—o. *Deficiens*, *Anosmia*—o. *Depravatus*, *Parosmia*.

OLIBANUM, see *Juniperus lycia*—o. *Sylvestre*, see *Pinus abies*—o. *Vulgare*, see *Pinus abies*.

OLIGEMIA, *Anæmia*, *Hæmaphoria*, *Hypæmia*.

OLIGIDRIA, *Isehidrosis*.

OLIGO, from *oligos*, 'few, little;' in composition has these significations.

OLIGOBLEN'NIA, from *oligo*, and *βλεννα*, 'mucus.' A deficiency of mucus.

OLIGOCHOL'IA, from *oligo*, and *χολη*, 'bile.' Paucity of bile.

OLIGOCHE'YLUS, from *oligo*, and *χυλος*, 'juice,' 'chyle.' An epithet for food which is but little nutritive; which furnishes little chyle.

OLIGOCOP'RIA, from *oligos*, 'few,' and *κοπος*, 'excrement.' Scantiness of alvine evacuations.

OLIGOCYTHE'MIA, from *oligo*, *κυτος*, 'a cell,' and *αιμα*, 'blood.' A condition of the blood in which there is paucity of red corpuscles.

OLIGODAC'RYA, from *oligo*, and *δακρυ*, 'a tear' Paucity of lachrymal secretion.

OLIGOGALACTIA, *Agalactia*.

OLIGOGALIA, *Agalaxis*.

OLIGOHÆMIA, *Anæmia*, *Hæmaphoria*, *Hypæmia*.

OLIGOPO'SIA, from *oligo*, and *ποσις*, 'drink.' Diminution in the quantity of drinks.

OLIGOPSYCHIA, *Imbecility*.

OLIGOSIA'LIA, from *oligo*, and *σαλας*, 'saliva.' Paucity of saliva.

OLIGOSPER'MIA, from *oligo*, and *σπερμα*, 'sperm.' Paucity of spermatic secretion.

OLIGOSPOND'YLUS, from *oligo*, 'small,' and *σπονδυλος*, 'a vertebra.' A monster with defective vertebra.—*Gurt*.

OLIGOTRICH'IA, from *oligo*, and *τριξ*, 'hair.' Want of hair. Paucity of hair.

OLIGOTROPH'IA, *Par'cior nutrit'io*, from *oligo*, and *τροφω*, 'I nourish.' Deficient nourishment.

OLIGURE'SIA, *Oligure'sis*, *Oligoure'sis*, *Oligoure'sia*, from *oligo*, and *ουρω*, 'I pass urine.' Morbidly diminished urinary secretion.

OLISTHEMA, *Luxation*.

OLIVA, *Olea Europæa*.

OLIVE, *Corpora olivaria*.

OLIVAI'RE, *Olive-shaped*.

Cantère Olivaire, of the French surgeons, is a cautery whose extremity is terminated by a button having the shape of an olive.

OLIVARIS, *Olive-shaped*.

OLIVARY, *Olive-shaped*—o. *Bodies*, *Corpora olivaria*.

OLIVARY PROC'ESS, *Processus Olivaris*, is a small ridge, running transversely between, and a little behind, the roots of the anterior clinoid processes of the sphenoid bone, and by some considered as the fourth clinoid process.

OLIVE, see *Olea Europæa*—o. *Tree*, *Olea Europæa*.

OLIVE-SHAPED, *Olivaris*, *Oliviformis*, *Olivary*, (F.) *Olivaire*. Resembling an olive. See *Corpora olivaria*.

OLIVES, PICKLED, *Colymbades*.

OLIVIER, *Olea Europæa*—o. *de Bohême*, *Ledum palustre*.

OLIVIFORMIS, *Olive-shaped*.

OLIVINA, see *Olea Europæa*.

OLLA CAPITIS, *Cranium*.

OLMITELLO, MINERAL WATERS OF. A thermal spring in the isle of Ischia. Temperature, 100° Fahrenheit.

OLOPHLYCTIDE, *Herpes*.

OLOPHON'IA, from *ολω*, *αλλω*, 'I lose,' and *φωνη*, 'voice.' Congenital misconception of the vocal organs.—*Good*.

OLYBONIA LABII LOBATA, *Harelip*—o. *Lingue frænata*, see *Ankyloglossum*.

OLSNITIUM, *Peucedanum palustre*.

OLUS, *Lachanon*.

OLYMPIAN SPRINGS, see *Kentucky*, *mineral waters of*.

OMA, *ωμα*, in the termination of many words, is perhaps derived from *ωμος*, 'crude, wild, imperfect,' as in *sarcoma*, *atheroma*, &c.

OMACEPH'ALUS, (F.) *Omacéphale*, from *ωμος*, 'the shoulder,' and *ακεφαλος*, 'devoid of head.' A genus of paracephalous monsters, without any neck—a slight depression indicating the limits of the head and body.—I. G. St. Hilaire.

OM'AGRA, *Hom'agra*, from *ωμος*, 'the shoulder,' and *αγρα*, 'a seizure.' Gout in the shoulder.

OMAL'GIA, from *ωμος*, 'the shoulder,' and *αλγος*, 'pain.' Pain in the shoulder.

OMARTHRI'TIS, from *ωμος*, 'the shoulder,' *αρθρον*, 'a joint,' and *ιτις*, denoting inflammation. Inflammation of the shoulder-joint.

OMARTHROC'ACE, from *ωμος*, 'shoulder,' *αρθρον*, 'a joint,' and *κακος*, 'bad.' Arthroence of the shoulder-joint. Caries or suppuration of the shoulder-joint.

OMASUM, *Omasus*, *Mannyplies*, (Sc.) *Momipplies*, *Monnyplies*, (F.) *Feuille*, *Millefeuille*,

Livret, Psautier. The third stomach of ruminant animals.

OMBILIC, Umbilicus.

OMBILICAL, Umbilical.

OMBRAGE, Nebula.

OMENTA, Meninges.

OMENTESIS, Epiploitis.

OMENTITIS, Epiploitis.

OMENTULA, Appendiculae pinguedinosae.

OMENTUM, Epiploon—o. Colicum, Epiploon, colic—o. Gastro-colicum, Epiploon, gastro-colic—o. Gastro-splenic, Epiploon, gastro-splenic—o. Great, Epiploon, gastro-colic—o. Hepato-gastricum, Epiploon, gastro-hepatic—o. Lesser, Epiploon, gastro-hepatic—o. Majus, Epiploon, gastro-colic—o. Minus, Epiploon, gastro-hepatic—o. Ossium, Perioestum—o. Sac of the, see Epiploon, gastro-hepatic—o. Third, Epiploon, colic.

OMICHESES, Micturition.

OMICHTA, Urine.

OMITIS, from *ωμος*, 'the shoulder,' and *itis*, denoting inflammation. Inflammation in or about the shoulder-joint.

OMMA, Eye, Vision.

OMNIPHAGUS, Omnivorous.

OMNIVORE, Omnivorous.

OMNIVOROUS, *Omnivorus*, *Omniphagus*, *Pantophagus*, (F.) *Omnivore*, from *omnis*, 'all,' and *voro*, 'I eat.' An epithet for animals—*Pantophagists*—which eat every kind of food, animal or vegetable.

OMO. In the composition of anatomical terms, an abridgment of *omos* or *omus*, the humerus.

OMO-CLAVICULAR, see Coraco-clavicular.

OMOCOTYLE, see Glene.

OMO-HYOÏDEUS, *Cor'aco-hyoïdeus*, *Hyoïdis Quartus Musculus*, (F.) *Scapulo-hyoïdien*, *Omo-hyoïdien*, *Omoplat-hyoïdien*. This muscle is situate obliquely at the sides and front of the neck. It is slender, long, and flat. It arises from the superior costa of the scapula, near the semi-lunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi, united by a common tendon, and is a true digastric muscle. It depresses the os hyoides, carrying it a little backwards, and to one side, except when it acts with its fellow, when the bone is depressed, and drawn obliquely backwards.

OMOPHAG'IA, *Omosit'ia*, from *ωμος*, 'raw,' and *φαγω*, 'I eat.' Fondness for raw food. Eating of raw food.

OMOPATE, Scapula—o. *Col de V*, Collum scapulae.

OMOPLAT-HYOÏDIEN, *Omo-hyoïdeus*.

OMOS, Crude, Humerus.

OMOSITIA, Omophagia.

OMOTAR'ICHOS, from *ωμος*, 'the shoulder,' and *ταριχος*, 'pickled,' *Salsamentum crudum*; *Salted Tunny Fish*, in particular. Properly, the neck or shoulder-piece of a salted animal. Once much recommended against the bites of vipers, and in hydrophobia.

OMOTES, Crudity.

OMOTOCIA, Abortion.

OMOT'RIBES, *Omphac'ium O'leum*, from *ωμος*, 'crude,' and *τριβω*, 'I bruise.' Oil expressed from unripe olives.

OMPIA'CLION, *ομφακιον*, from *ομφακος*, 'an unripe grape';—*Succus νεα acer'bae*, *Omphal'cium*. The juice of unripe grapes. Also, *Verjuice*.

OMPHACI'TES (VINUM). A name given to wine prepared from the unripe grape. *Omphac'itis* is the name of a small gall.—*Dioscorides*.

OMPHACIUM, Verjuice.

OMPHACOM'ELL, from *ομφακος*, 'an unripe

grape,' and *μελι*, 'honey.' A sort of oxymel, made of the juice of unripe grapes and honey.

OMPHALELCO'SIS, from *ομφαλος*, 'the navel,' and *ελκος*, 'an ulcer.' Ulceration of the navel.

OMPHALEXOCHE, Exomphalus.

OMPHALOCARPUS, Galium aparine.

OMPHALOCELE, Exomphalos.

OMPHALO-CRA'NIODID'YMUS, from *ομφαλος*, 'the navel,' *κρανιον*, 'the cranium,' and *διδυμος*, 'a twin.' A double monster, in which the umbilical cord or the rudiment of one foetus is rooted in the cranium of another.

OMPHALOMANT'IA, *Omphalomaney*, from *ομφαλος*, 'the navel,' and *μαντεια*, 'prophecy.' A species of divination, practised by credulous matrons, who pretend to be able to know the number of children a female will have, by the number of knots in the navel-string of the child.

OMPHALO-MESENER'IC, *Omphalo-mesenter'icus*, *Omphalo-mesard'icus*; from *ομφαλος*, 'the navel,' and *mesenterium*, 'the mesentery.'

OMPHALO-MESENERIC VESSELS, *Vitel'lo-mesenter'ic*, *Vit'elline vessels*. Haller gave this name to two very fine vessels, which spread their ramifications on the parietes of the umbilical vesicle. There is an *omphalo-mesenteric artery* and *vein*. The *omphalo-mesenteric artery* is a branch of the superior mesenteric;—the vein empties itself into the trunk, or into one of the branches of the superior mesenteric. Velpeau affirms, that they anastomose with a branch of the second or third order of those great vessels, with those in particular that are distributed to the caecum, and he regards them to be the vessels of nutrition of the umbilical vesicle. They are occasionally met with in the foetus, at the full period, under the form of whitish filaments, which extend from the mesenteric vessels to the umbilicus.

OMPHALO-MESERAIC, *Omphalo-mesenteric*.

OMPHALONCUS, *Omphalophyma*.

OMPHALONEURORRH'EXIS, *Omphalorrhixis*.

OMPHALOPHLEBITIS, from *ομφαλος*, 'the umbilicus,' and *phlebitis*, 'inflammation of a vein.' Inflammation of the umbilical vein.

OMPHALOPHY'MA, *Omphalon'cus*, from *ομφαλος*, 'the navel,' and *φυμα*, 'tumour.' A tumefaction of the navel.

OMPHALOPROPTOSIS, Exomphalus.

OMPHALORRHAG'IA, *Omphalor'rhagē*, from *ομφαλος*, 'the umbilicus,' and *ρρηγμα*, 'I break out.' Hemorrhage from the umbilicus, in the new-born in particular.

OMPHALORRH'EX'IS, from *ομφαλος*, 'navel,' and *ρηξις*, 'rupture.' *Omphaloneuror'rhē'is*. Rupture of the navel string.

OMPHALOS, Umbilicus.

OMPH'ALOSITE, from *ομφαλος*, 'the navel,' and *σιτος*, 'nourishment.' A monster that possesses an imperfect kind of life, which ceases when the umbilical cord is divided.

OMPHALOT'OMY, *Omphalotom'ia*, from *ομφαλος*, 'the umbilicus,' and *τεμνω*, 'I cut.' The division of the navel string.

OMPHALUS, Umbilicus.

OMUS, Crude, Humerus.

ONAGRA, *O'nothera biennis*.

ONANIA, Masturbation.

ONANISM, Masturbation.

ON-COME. A Scotch term, according to Sir Walter Scott, for 'mysterious diseases, which baffle the regular physician.'

ONCOS, Tumour.

ONCO'SES, from *ογκος*, 'a tumour.' Tumours, as diseases.

ONCOSIS, Intumescence.

ONCOT'OMY, *Oncotom'ia*, *Oukotomy*, from *ογκος*, 'a tumour,' and *τομη*, 'incision.' The open-

ing of an abscess with a cutting instrument, or the excision of a tumour.

ONCTION, Inunction.

ONCUS, Swelling, Tumour.

ONDULATION, Fluctuation.

ONEBERRY, Paris.

ONEIROCRITICUS, *Oneirocrites*, from *oneiros*, 'a dream,' and *κρισις*, 'judgment.' One who judges according to dreams.

ONEIRODYN'IA, from *oneiros*, and *οδυνη*, 'pain.' Painful dreams. *Inculus* and *Somnambulism* are oneirodynia.

ONEIRODYNIA ACTIVA, Paroniria, Somnambulism—*o.* Gravans, Inebus.

ONEIRODYNIE GRAVATIVE, Inebus.

ONEIROG'MUS, *Oneirog'ynē*, *Oneiropol'esis*, from *oneiros*, 'a dream.' A lascivious dream; pollution; nocturnal pollution.

ONEIROGONORRHEA, Pollution, nocturnal.

ONEIROGONOS, Pollution.

ONEIROL'OGY, *Oneirolog'ia*, from *oneiros*, 'a dream,' and *λογος*, 'a description.' The doctrine of dreams.

ONEIROMANT'IA, from *oneiros*, 'a dream,' and *μαντεια*, 'divination.' The art of divining by dreams: or of interpreting dreams.

ONEIRO'NOSUS, from *oneiros*, and *νοσος*, 'a disease.' *Somniatio morbo'sa*. Morbid, uneasy dreaming.

ONEIROPOLESIS, Oneirognus.

ONERA ALVI, Excrement.

ONGLADE, Paronychia.

ONGLE, Nail—*o.* *Incaruē*, Onychogryphosis.

ONGLÉE (F.), *Digitorum stupor à gelu*.

Painful numbness at the extremities of the fingers, caused by cold.

ONGLET, Pterygion.

ONGUENT, Unguentum—*o.* *d'Althéa*, Unguentum de Althæa—*o.* *Blanc*, Ceratum etacei—*o.* *de Blanc de baleine*, Unguentum etacei—*o.* *Blanc de Rhazes*, Unguentum plumbi subcarbonatis—*o.* *de Céruse*, Unguentum plumbi subcarbonatis—*o.* *Citriu contre la gale*, Unguentum hydrargyri nitras—*o.* *Digestif simple*, Unguentum digestivum simplex—*o.* *Gris*, Unguentum oxidi hydrargyri einereum—*o.* *de Guimauve*, Unguentum de althæa—*o.* *de Laurier*, Unguentum laurinum—*o.* *Mercuriel*, Unguentum hydrargyri—*o.* *Napolitain*, Unguentum hydrargyri—*o.* *de Nitrate de mercure*, Unguentum hydrargyri nitratis—*o.* *de Poix et de cire*, Basilicon—*o.* *de Soldat*, Martiatum unguentum—*o.* *de Sureau*, Unguentum sambuci—*o.* *de Toramira*, Unguentum plumbi subcarbonatis.

ONION, COMMON, Allium cepa—*o.* Sea, Scilla.

ONIS'CUS, *Ael'lus*, *Cu'tio*, *Porcell'io*, *Porcell'us*, *Por'culus*, diminutive of *ovos*, 'a small ass.'

A genus of insects, *Clavis*, Crustacea, very common in cellars and dark and moist places.

ONISCI ASELLI, *Millep'edæ*, *Anelli*, *Millep'edæ*, *Fabæ*, Wood-lice, Slaters, Hog-lice, (F.) *Cloportes ordinaires*, had, at one time, a place in the pharmacopœias. They were considered stimulant and diuretic, and useful in jaundice.

ONITIS, *Origanum dictamnus*.

ONKOTOMY, Onectomy.

ONOLOSAT, Obolus.

ONOMATOCLESIS, Nomenclature

ONOMATOLOGIA, Nomenclature.

ONONIS ANTIQUORUM, *O. spinosa*.

ONO'NIS ARVEN'SIS, (F.) *Bugrane des champs*, has properties like the next.

ONONIS SPINO'SA, *Ano'nis*, *Resta seu Arreta bovis*, *Rem'ora Avari*, *Ovonis antiquorum*, *Rest harroic*, (F.) *Arrête-bœuf*, *Bugraude épineuse*, *Bugrane*, *Nat. Ord. Leguminosæ*. *Sr.* *Syst. Diadelphia Decandria*. The root of this plant was once used as a diuretic.

ONOPORDON ACANTHIUM, *Onopordum acanthium*, *Carduus tomentosus*, *Acanthium*, *Ac'auos*, *A. spina*, *Spina alba*, *Cotton Thistle*, (F.) *Charbon aux Auec*. *Ord. Compositæ*. *Sr.* *Syst. Syngenesia Polygamia equalis*. The expressed juice has been recommended as a cure for cancer, applied externally.

ONOPORDUM ACANTHIUM, Onopordon acanthium.

ONTHIUS, Fimus.

ONYCHATROPH'IA, *Atroph'ia unguium*, from *ονυξ*, *ονυχος*, 'a nail,' and *atrophia*, 'want of nourishment.' Atrophy of the nails.

ONYCHAUX'E, *Hypertroph'ia unguium*, from *ονυξ*, *ονυχος*, 'a nail,' and *αυξη*, 'increase.' Unusual increase of the size and thickness of the nails.

ONYCHEXALLAN'TS, from *ονυξ*, *ονυχος*, 'a nail,' and *ελλαξις*, 'change.' A morbid condition of the nails.

ONYCHIA, Paronychia.

ONYCHI'TIS, from *ονυξ*, *ονυχος*, 'a nail,' and *itis*, denoting inflammation. Inflammation of a nail. See Paronychia.

ONYCHOC'LASIS, from *ονυξ*, *ονυχος*, 'a nail,' and *κλασις*, 'fracture.' Fracture of a nail.

ONYCHOCRYPTOSIS, Onychogryphosis.

ONYCHOGRYPHO'SIS, *Onychogryphosis*, *Onychogryphosis*, *Onychocryptosis*, *Griphosis*, *Gryphosis*, *Onyx'is*, from *ονυξ*, *ονυχος*, 'a nail,' and *gryphosis*, 'crookedness.' Curvature of the nails: such as occurs in hectic individuals. Also, growing in of the nails; *Incaru'tio seu Adunca'tio seu Actu'ra unguium*, (F.) *ongle incarné*.

ONYCHON'OSI, *Onychou'osi*, from *ονυξ*, *ονυχος*, 'a nail,' and *νοσος*, 'a disease.' Disease of the nails.

ONYCHIOPH'THORA, *Onychophthoria*, *Onychophthora*, *Onychophthoria*, from *ονυξ*, *ονυχος*, 'the nail,' and *φθορα*, 'degeneration.' A degenerate condition or destruction of the nails.

ONYCHOPHY'MA, from *ονυξ*, *ονυχος*, 'the nail,' and *φυμα*, 'a tumour.' A painful degeneration of the nails, which become thick, rough, and crooked. It occurs as a symptom of syphilis and of lepra.

ONYCHOPTO'SIS, *Piptonychia*, *Dia'rexis unguis*, from *ονυξ*, *ονυχος*, 'a nail,' and *πτωσις*, 'falling.' The falling off of the nails.

ONYCOPHTHORA, Onychophthora.

ONYX, Hook (blunt), Nail, Pterygion. Also, a collection of purulent matter between the laminae of the cornea, having the shape of a nail. Unguis Lamula.

ONYXIS, Onychogryphosis.

ONYXITIS, see Paronychia.

OOCYESIS, Pregnancy, ovarian.

OODECELE, see Hernia (foraminis ovalis.)

OODES, Aqueous humour, Oval.

OÏG'ALA, *OÏg'la*, *Ogla*, *Puls ex Ovis et Lactē*. Milk of eggs, from *ov*, 'an egg,' and *γαλα*, 'milk.' A preparation of eggs and milk.

OÏGLA, Oogala.

OÏDES, Aqueous humour, Oval.

OOLEMMA PELLUCIDUM, *Zona pellucida*.

OOLOG'IA, *Ovolog'ia*, *Ovolog'ia*, from *ov*, 'an ovum or egg,' and *λογος*, 'a discourse,' 'a description.' A description of the ovum.

OON, Ovum.

OONNE, Albumen.

OÏPIH'AGOUS, *OÏph'agus*, from *ov*, 'an egg,' and *φαγω*, 'I eat.' Feeding on eggs.

OOPHORAUXE, Oarioparacetama.

OOPHORITIS, Oaritis.

OOPHORON, Ovary.

OORTIS, Oaritis.

OPAC'ITY, *Opac'itas*, *Opacitas*; from *opacite*, 'to obscure.' Quality of that which is

opaque. The property possessed by some bodies of not allowing the light to traverse them. It is opposed to transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma*; — opacity of the crystalline causes cataract.

OPAKE', *Opa'cus, Opa'cous*. Same etymon. An epithet given to bodies, which do not permit the passage of rays of light. The *opake cornea* is the sclerotic, in contradistinction to the *transparent* cornea or true cornea.

OPAKENESS, Opacity.

OP'ALINE. That which resembles the opal. A fluid is said to be opaline, when milky, and when it presents an appearance more or less like that of the opal.

OPECELE, see Hernia.

OPERATIO, Action, Operation — o. Chirurgica, see Operation — o. Chymica seu Pharmaceutica, Operation, chymical, &c. — o. Simplex, Haplotomia.

OPERATION, *Opera'tio*, from *opus, operis*, 'work.' The application of instruments to the human body with the view of curing disease. The object of an operation, *opera'tio chirurgica*, is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operatory methods have been called *Synthesis, Diæresis, Excresis*, and *Prothesis*. Frequently, the most difficult subject connected with an operation is to decide when it is absolutely called for or advisable, and when improper.

OPÉRATION À LAMBEAU, see Flap.

OPERATION, BILATERAL, see Lithotomy — o. *Cé-variante*, Cesarean section.

OPERATION, CHYMICAL OR PHARMACEUTICAL, *Opera'tio chymica* seu *pharmaceutica*, is any process whose object is the preparation of medicines; their combinations with each other, analysis, and decomposition; — such are, *solution, distillation, sublimation, evaporation, digestion, maceration, infusion, decoction, calcination, &c.* Some of these operations are mechanical; others, really chymical.

OPERATION, HIGH, see Lithotomy — o. Lateral, see Lithotomy — o. Sigaultian, Symphyseotomy.

OPERATOR. Same etymon. A surgeon who is in the habit of practising the greater operations. One who performs any operation. To be a good operator, the surgeon must be well acquainted with anatomy, and be possessed of strong nerve. See Surgeon.

OPER'CULUM, *Opero'rium, Operimen'tum*, from *operire*, 'to cover.' A cover or lid. In fishes, the gill cover.

OPERCULUM ASPERE ARTERIE, Larynx — o. Cutis, Epidermis — o. Ileï, Bauhin, valve of — o. Laryngis, Epiglottis — o. Oculi, Palpebra.

OPERCULUM PAPILL'URUM. A shield for the nipple.

OPERIMENTUM, Operculum — o. Intestinum, Epiploon — o. Prætensum abdominis, Peritonæum.

OPERTORIUM, Operculum.

OPHELIA CHRATA, *Gentiana chirayta*.

OPHIASIS, Cavities, Porrigo decalvans.

OPHIOS'GLOS'SUM VULG'A'TUM, *O. ova'tum* seu *echinoglossum*, (*ophis*, 'a serpent,' and *γλωσσα*, 'a tongue,') *Lingua serpentina*, *Adder's Tongue*, (F.) *Longue de Serpent*. Ord. Filices. *Sex. Syst.* Cryptogamia. This plant was formerly considered to be vulnerary.

OPHIOPH'AGOUS, *Ophioph'agus*, from *ophis*, 'a serpent,' and *φαγο*, 'I eat.' An epithet for animals which feed on serpents. Pliny has called certain African tribes by this name.

OPHIORRHIZA, *O. mungos*, from *ophis*, 'a serpent,' and *ρίζα*, 'root.' *Family*, Gentianacæe.

Sex. Syst. Pentandria Digynia. The name of the plant whose root has been called *Radix Serpentum, Mungos Radix*. The bitter root is much esteemed in Java, Sumatra, &c., for preventing the effects that usually follow the bite of the *naja*, a venomous serpent; with which view it is eaten by the natives. It is, also, a reputed anthelmintic.

OPHIOXYLON, *Ophioxylum*.

OPHIOXYLUM, from *ophis*, 'a serpent,' and *ξύλον*, 'wood.' *Ophioxylum* seu *Ophioxylon serpentinum* seu *trifoliatum, Acave'ria, Lignum serpentum*, Ord. Apocynacæe, has been recommended in the bites of serpents, and in intermit-tents. It is said to be very bitter.

OPHIS, Serpent.

OPHITES, from *ophis*, 'a serpent.' *Serpenti-nus, Ser'pentine* or *Black Por'phyry*. This rock was formerly worn as an amulet, to cure diseases of the head.

OPHROSTAPHYLON, *Bryonia alba*.

OPHRY'S, Supercilium.

OPHTHALMAL'GIA, from *οφθαλμος*, 'the eye,' and *αλγος*, 'pain.' Pain in the eye. Neuralgia of the eye.

OPHTHALMEMPASM, *Collyrium siccum*.

OPHTHALMIA, *Ophthalmi'tis*, from *οφθαλμος*, 'the eye.' *Oculo'rum inflamma'tio, Cau'ma ophthalmi'tis, Ophthalmop'o'nia, Inflamma'tion of the Eye, Ophthal'my*, (F.) *Ophthalmie, Ophthalmie, Inflamma'tion de l'œil, Catarrhe oculaire*. Three great varieties of ophthalmia, independently of the acute and chronic (which conditions occur in all inflammations,) may be reckoned: — the *Ophthalmia membranarum, O. purulenta*, and *O. tarsi*.

The first is characterized by the general symptoms of ophthalmia; — pain and redness of the eye or its appendages; with intolerance of light, and unusual flow of tears; the inflammation being seated chiefly in the coats of the eyeball. It is the *Hymenophthalmia, Ophthalmia tarax'is* seu *hu'mida seu vera seu chemo'sis, Conjunctivi'tis, Inflamma'tio conjuncti'væ, Symphymeni'tis, Syndesmi'tis, Catarrhal ophthalmia, Ophthalmo-conjunctivi'tis, Epiph'ora* (Galen), *Conjunctival* or *Laech'rymose Ophthalm'ia, Tarax'is* (Paulus of Ægina), *Chemo'sis* (Aëtius), (F.) *Conjunctivite, Inflamma'tion de la conjonctive*. In the second, — *Ophthalmia purulenta* seu *puriformis, Blephorophthalmia, Bleph'aroblenorrhæ'a, Ophthalmoblenorrhæ'a, Blephorrhœa oculi* — the internal surface of the palpebra associates in the inflammation of the eye-ball; and there is a copious secretion of a purulent fluid. An epidemic and contagious

[?] variety of this is the *Ægyptian Ophthalmia, O. epidem'ica seu purulen'ta epidem'ica seu contagio'sa seu catarrha'lis bell'ica seu bell'ica seu Asia'tica seu purulenta contagio'sa, Blephorrhæ'a Oculi Ægyptiaca, Læmophthal'mia, Conjunctivi'tis puro-muco'sa contagio'sa seu Ægyptiaca, Blepharo'tis glandula'ris contagio'sa, Adeni'tis palpebræ'rum contagiosa, Sup'purative ophthalmia, Epidemic contagious ophthalm'ia* — called *Ægyptian*, from its prevalence in Egypt during the British Expedition under Sir Ralph Abercrombie. The inflammation is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium. In new-born children, a species of purulent ophthalmia, *O. purulen'ta infan'tum seu neonato'rum, Blepharophthalmia seu Lippitu'do seu Blephorrhæ'a Oculi seu Ophthal'mo-blenorrhæ'a seu Blepharo-blenorrhæ'a seu Blepharo-pyorrhæ'a seu Pyoophthalmia, Psor-ophthal'mia neonato'rum, Adenomychitoni'tis*, (F.) *Ophthalmie puriforme des nouveau-nés*, in which the palpebrae are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid discharges from the mother, applied to

the eye of the infant during its exit; or to the stimulus of the light, when the child first opens its eyes. A severe form of purulent ophthalmia — *Hyperconjunctivite* (Piorry) — is produced by the application of gonorrhœal matter to the eye. It is the *Ophthalmia gonorrhœica*, *Blennorrhœa oculi gonorrhœica*, *Gonorrhœoblepharrhœa*, *Conjunctivitis blennorrhœica* seu *gonorrhœica*, *Gonorrhœal Ophthalmia*, (F.) *Ophthalmie blennorrhagique*, *Conjunctivite blennorrhagique*.

Ophthalmia is likewise modified by the condition of the constitution, and hence we have *stru-*

mons, variolous, and other inflammations of the conjunctiva.

The third variety — the *Ophthalmia Tarsi* seu *glati'osa*, *Blepharophthal'mia*, *Blepharocitis*, *Blepharotitis*, *Blepharitis*, *Blepharadenitis*, *Psorophthal'mia*, *Oculi palpebrarum seu bicus pcurigiosa*, *Adenophthalmia* — is seated chiefly in the tarsus; the sebaceous crypts secreting a viscid and acrid fluid, that glues and ulcerates its edges, and irritates the eye.

The different forms of inflammation of the conjunctiva are thus classed by M. Desmarres:

Conjunctivitis.....	1. Pure or phlegmonous. 2. Pustular.	3. Granular or catarrhal.	4. Purulent.....	{ Contagious. Non-contagious. Miasmatic. Exanthematic.....	{ Erysipelatous. Variolous. Morbillous. Scarlatinous.

Conjunctivitis, when slight, requires little treatment: the antiphlogistic regimen — and, particularly, avoiding exposure to light, — being all that is necessary. When more severe, along with this, general and local blood-letting, especially by leeches to the side of the septum narium, must be employed so as to make a decided impression on the system; with nauseating doses of antimony, purgatives, blisters (at some distance from the organ), refrigerants; and astringents, cold or warm, according to circumstances, to the eye. In *Purulent Ophthalmia*, these measures must be still more actively employed, otherwise disorganization will speedily follow: — the granulations, which form on the adnata of the eyelids may be removed with the scissors, and the sore be touched with a solution of alum. *Ophthalmia Tarsi* must be treated on general principles, when severe. It usually, however, requires merely the antiphlogistic regimen, with the occasional use, especially at night, of a slightly stimulating ointment, such as the unguentum hydrargyri nitrico-oxydi, considerably reduced with lard. The ointment prevents the eyelids from being glued together during the night, and thus obviates the irritation caused by attempts at separating them.

OPHTHALMIA, EGYPTIAN, see Ophthalmia — o. Asiatica, see Ophthalmia — o. Bellica, see Ophthalmia — o. Biliosa, Ophthalmocholosis — o. Catarrhal, see Ophthalmia — o. Catarrhalis bellica, see Ophthalmia — o. Chronica, Lippitudo — o. Conjunctival, see Ophthalmia — o. Contagiosa, see Ophthalmia — o. Epidemica, see Ophthalmia — o. Glutinosa, see Ophthalmia — o. OPHTHALMIATER, Oculist.

OPHTHALMIATRICA, *Ophthalmiatrotechnica*, *Ophthalmiotherapi'a*, (F.) *Oculistica*; from

ophthalmos, and *iatros*, 'a physician.' The art of the oculist. Treatment of diseases of the eye.

OPHTHALMIATROTECHNICA, Ophthalmiatria.

OPHTHALMIC, *Ophthalmicus*, from *ophthalmos*. That which relates or belongs to the eye.

OPHTHALMIC ARTERY, *A. orbitaire*, (Ch.) arises from the internal carotid, and issues from the cranium by the foramen opticum. At first, it is situate at the outer and lower side of the optic nerve, but ascends above this nerve, and passes towards the inner angle of the orbit. It furnishes, in its course, the *lacrimal, centralis retinae, infra-orbitaris, ciliaris, anterior ciliaris, inferior and superior muscularis, anterior and posterior ethmoidalis, and superior and inferior palpebralis*. After having given off these, it divides into two branches — the *frontal* and *nasal*, which furnish a number of ramifications, — some superficial, others deep-seated.

OPHTHALMIC GANGLION, *Lenticular* or *Ciliary ganglion*, *Ganglion ophthalmicum* seu *semilunare* seu *ciliare*, *G. orbitaire* (Ch.), is one of the smallest ganglions of the body, and formed by the 5th and 3d pairs of encephalic nerves. It is situate at the outer side of the optic nerve near the bottom of the orbit; is irregularly quadrilateral and flat; its colour of a reddish gray. Behind, it communicates by its posterior angles — by means of nervous filaments — with the nasal nerve of the ophthalmic, the motor oculi, and offsets from the sympathetic. Each of its anterior angles furnishes a fasciculus of small nerves. These are the ciliary nerves.

OPHTHALMIC NERVE, *Ophthalmic Nerve* of Willis, *Orbito-frontal*, (Ch.) is the smallest and first of the three branches given off by the 5th pair. It proceeds along the external paries of the cavernous sinus, and enters the orbit by the sphenoidal fissure. It divides into three branches, one, *external* — the lacrimal nerve; another, *superior* — frontal nerve; and the last, *internal* — the nasal nerve. See *Lacrimal*, *Frontal*, *Nasal*.

OPHTHALMIC OR OPTIC REMEDY, *Ophthalmicum* seu *Opticum*, (F.) *Topique ophthalmique*, is a medicine employed in ophthalmia.

OPHTHALMIC SINUS, see CAVERNOUS SINUS.

OPHTHALMIC VEIN has the same arrangement as the artery, which it accompanies in all its divisions. It issues from the orbit at the inner

part of the sphenoidal fissure, and discharges its blood into the cavernous sinus.

The name *Facial Ophthalmic* has been given to the branch by which the facial vein communicates with the ophthalmic.

OPHTHALMICA, *Euphrasia officinalis*.

OPHTHALMICI EXTERNI, *Motore oculorum*.

OPHTHALMICUM, *Ophthalmic remedy*.

OPHTHALMIDIUM, *Micropthalmus*.

OPHTHALMIE PURIFORME DES NOUVEAU-NÉS, see *Ophthalmia*—*o. Bleunorrhagique*, see *Ophthalmia*.

OPHTHALMITE, *Ophthalmia*.

OPHTHALMITIS, *Ophthalmia*. This term is occasionally restricted to inflammation of the globe of the eye, in which, both the external and internal structures are involved.

OPHTHALMIUM, *Micropthalmus*.

OPHTHALMO-BLENNORRHOEA, *Ophthalmia (purulent)*—*o. Neonatorum*, see *Ophthalmia (purulenta infantum)*.

OPHTHALMO-CARCINOMA, from *ophthalmos*, and *καρκινωμα*, 'cancer.' Cancer of the eye.

OPHTHALMOCELE, *Exophthalmia*.

OPHTHALMOCHOLOSIS, from *ophthalmos*, and *χολη*, 'bile;' *Ophthalmia biliosa*. *Ophthalmia* from biliary excitement.

OPHTHALMOCHROÏTES, see *Choroida tunica*.

OPHTHALMO-CONJUNCTIVITIS, see *Ophthalmia*.

OPHTHALMOCOPIA, *Coryopia*.

OPHTHALMODULIA, from *ophthalmus*, and *δουλεια*, 'servitude.' Eye-service. The title of a book by Bartsch on diseases of the eye.

OPHTHALMODYNIA, from *ophthalmos*, and *δυνη*, 'pain,' especially rheumatic pain of the eye. Plenck has given this name to neuralgia of the frontal nerve, in which the pain radiates particularly towards the bottom of the orbit. See *Neuralgia, frontal*.

OPHTHALMODYNIA PERIODICA, *Neuralgia, facial*.

OPHTHALMŒDEMA, from *ophthalmos*, and *οιδημα*, 'œdema.' Œdema of the conjunctiva.

OPHTHALMOGRAPHY, from *ophthalmos*, and *γραφη*, 'a description.' The part of anatomy which gives a description of the eye. An anatomical description of the eye.

OPHTHALMOLOGY, *Ophthalmolog'ia*, *Ophthalmology*, from *ophthalmos*, and *λογος*, 'a discourse.' The part of anatomy which treats of the eye. An anatomical treatise on the eye. A description of the eye in health and disease.

OPHTHALMOMETER, from *ophthalmos*, and *μετρον*, 'measure.' An instrument of the nature of compasses, invented by F. Petit, for measuring the capacity of the anterior and posterior chambers of the eye in anatomical experiments.

OPHTHALMOMYITIS, *Ophthalmomyositis*, from *ophthalmos*, *μυς*, 'a muscle,' and *ιτις*, denoting inflammation. Inflammation of the muscles of the eye.

OPHTHALMOPARALYSIS, *Ophthalmoplegia*.

OPHTHALMOPHLEBOTOMIA, from *ophthalmos*, *φλεψ*, 'a vein,' and *τομη*, 'incision.' Bleeding from the vessels of the conjunctiva.

OPHTHALMOPHTHARISIS, *Ophthalmophthisis*, from *ophthalmos*, and *φθορασις*, 'corruption.' Destruction of the eyeball.

OPHTHALMOPHTHISIS, *Ophthalmophthisis*.

OPHTHALMOPLEGIA, *Ophthalmoparalysis*, from *ophthalmos*, and *πλησσω*, 'I strike.' Paralysis of one or more of the muscles of the eye.

OPHTHALMOPONIA, *Ophthalmia*.

OPHTHALMOPTOSIS, from *ophthalmos*, and *πτωσις*, 'a prolapse.' A word employed by some authors in the sense of *exophthalmia*; by others, in that of *hydropthalmia*.

OPHTHALMORRHAGIA, from *ophthalmos*, and *ρρρρρρ*, 'I break forth.' Hemorrhage from the tunica conjunctiva. It is rare.

OPHTHALMOS, *Eye*.

OPHTHALMOSCOPE, see *Ophthalmoscopia*.

OPHTHALMOSCOPIA, *Ophthalmoscopy*, from *ophthalmos*, and *σκοπεω*, 'I regard attentively.' The art of judging of the temper, &c., of a person by examining his eyes. The art of judging of health or disease by inspection of the eyes. Exploration of the eyes in order to a diagnosis.

An *Ophthalmoscope*, *ophthalmoscopium*, *ophthalmoscopium*, has been invented, which by reflecting the light on the retina enables the condition of the interior of the eye to be appreciated. To a form of the ophthalmoscope the name *Anagnos'takis* has been given, after a young Greek physician, who, it was thought, invented it.

OPHTHALMOSTATUM, (F.) *Ophthalmostat*, from *ophthalmos*, and *στασις*, 'station;' *Speculum Oculi*. An instrument for fixing the eye.

OPHTHALMOTHERAPIA, *Ophthalmiatria*.

OPHTHALMOTOLOGY, *Ophthalmology*.

OPHTHALMOTOMY, *Ophthalmotomy*, from *ophthalmos* and *τεμνω*, 'I cut.' The part of anatomy which treats of the dissection of the eye. It has, also, been applied to extirpation of the eye.

OPHTHALMOXEROSIS, *Xerophthalmia*.

OPHTHALMOXYSIS, from *ophthalmos*, and *ζωω*, 'I scrape.' A name given to the scarification sometimes practised on the conjunctiva, in cases of *ophthalmia*.

OPHTHALMOXYSTRUM, *Ophthalmoxyster*, *Ophthalmoxysterium*, *Xystrum ophthalmicum*. Same etymon. An instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye, intended to scarify the eyelids in certain cases of *ophthalmia*.

OPHTHALMUS, *Eye*.

OPHTHALMYMENITIS, *Ophthalmomyenitis*, from *ophthalmos*, *μηνη*, 'membrane,' and *ιτις*, denoting inflammation. Inflammation of one or more of the membranes of the eye.

OPIACE, *Opiate*.

OPIACUM, *Opiatum*.

OPIANE, *Narcotine*.

O'PIANINE, *Opiantina*, *Opiania*; from *opium*. An alkaloid discovered in opium, which resembles morphia in its properties, and doses.

OPIANUM, *Narcotine*.

OPIAT, *Opiate*—*o. Dentifrice*, *Dentifrice*.

O'PIATE, *Opiatum*, *Opiacum*, *Papavera'ceum*, *Meco'nicum*, (F.) *Opiat*, *Opiacée*, from *οπιον*, (*οπος*, 'juice,') 'opium.' A medicine containing opium. A medicine that procures sleep. An *electuary*;—formerly, an *electuary* which contained opium.

O'PIATED, *Opiatus*. Impregnated with opium. Affected by opium.

OPIATUM FEBRIFUGUM, *Electuarium de Kinâ Kinâ*; *Electuary of Cincho'na*. (*Pulv. cinch. ʒxviij*, *ammon. muriat. ʒi*, *mellis, syrup. absinth. aa ʒij*. Make into an *electuary*. *Ph. P.*) Given, when *cinchona* is indicated.

OPIATUM MESENTERICUM, *Electuarium de Aloë*, *Muriat'è Hydrargyri*, *et Ferro*. (*Gum. ammon. ʒss*, *sennâ ʒvj*, *hydrargyri submuriat. rad. art. aloës socotrin. aa ʒij*, *pulv. scammon. comp. (vulg. de tribus) rhej. rad. aa ʒij*, *ferri limatur. porphyrisat. ʒss*. Bruise and mix together, add of compound syrup of apples double the weight of the other matters, and make into an *electuary*. *Ph. P.*) Dose, ʒss to ʒij, in obstructions of the liver, mesentery, &c.

OPIATUS, *Opiated*.

OPION, Opium.
 OPISMA, Succin.
 OPIS'THENAR, *Dorsum manûs*, from *οπισθε*, 'backwards,' and *θεναρ*, 'the flat of the hand.' The back of the hand.
 OPISTHOCEPHALON, Occiput.
 OPISTHOCRANIUM, Occiput.
 OPISTHOCYPHOSIS, Cyphoma.
 OPISTHOLOB'IUM, *Opisthot'ium*, from *οπισθε*, 'behind,' and *λοβιον*, 'the lobe of the ear.' Any agent applied behind the ear.
 OPISTHOTIUM, Opisthobium.
 OPISTHOT'ONOS, *Raptus posterga'neus*, *Tetanus dorsalis seu posticus seu posterga'neus*, from *οπισθε*, 'backwards,' and *τενω*, 'I stretch.' A species of tetanus, in which the body is bent backwards.
 OPIUM, see Papaver—o. Colatum, Extractum opii—o. Depuratum, Extractum opii.
 OPIUM EATERS, Theriaki.
 OPIUM, LETTUCE, see Lactuca.
 OPOBALSAMUM, see Amyris opobalsamum.
 OPOCASPON, Carpasium (juice.)
 OPOCEPH'ALUS, (F.) *Opocephale*. A genus of monsters having the two ears approximated or united under the head; the jaws atrophied; and no mouth or nose.—I. G. St. Hilaire.
 OPODELDOC, Opodeldoch.
 OPODEL'DOCH, *Opodel'toch*, *Opodeldoc*. An unmeaning term, frequently used by Paracelsus. Formerly, it signified a plaster for all external injuries; now, it is applied to the Linimentum Saponis Compositum.
 OPODELDOCH, STEER'S. A liniment, called after the inventor. There are many formulæ for its preparation. The following is one. *Sup. alb. thj. camphor. ʒij. ol. rosmarinii fʒiv. spiritus vini rectificati Oij.* See Linimentum Saponis Compositum.
 OPODEOCELE, see Hernia.
 OPODYMUS, Diprosopus.
 OPOIDIA GALBANIFERA, see Bubon Galbanum.
 OPOLE', Succus.
 OPOLIDE, Succus.
 OPOPIOS, Optic.
 OPOPONACUM, Pastinacea opoponax.
 OPOPONAX, see Pastinacea opoponax—o. Chironium, Pastinacea opoponax.
 OPOPONAXWORT, Pastinacea opoponax.
 OPO'RICE, from *οπωρα*, 'autumnal fruits.' A medicine, composed of several autumnal fruits, particularly of quinces, pomegranates, &c., and wine. It was formerly administered in dysentery, diseases of the stomach, &c.
 OPOS, Succus expressus—o. Silphion, Laserpitium.
 OPIDULUM, Vulva.
 OPPILATIO, Emphraxis—o. Telæ Cellulosæ, Induration of the cellular tissue.
 OPPILATIVUS, Obstruens.
 OPO'XENS, (F.) *Opposant*, from *ob*, and *ponere*, 'to place.' That which faces or is put in opposition to something. The name has been given to two muscles of the hand.
 OPPONENS MINIMI DIG'ITI, (F.) *Opposant du petit doigt*, *Carpo-metacarpien du petit doigt* (Ch.), *Métacarpien du petit doigt*. This muscle has the same shape and arrangement as the preceding, but is of less size. It is situate in the hypothenar eminence. Its fibres are inserted into the anterior annular ligament of the carpus, and terminate on the whole length of the inner edge of the 5th metacarpal bone. This muscle carries the 5th metacarpal bone forwards and outwards, and thus augments the concavity of the palm of the hand.

OPPONENS POL'LICIS, *Flexor ossis metacar'pi pollicis*, F. *primi internodii* (Douglass), *Opponens pollicis manûs*, *Anth'henar* sive *semi-interossea pollicis*, (F.) *Carpo-metacarpien du pouce* (Ch.), *Métacarpien du pouce*, *Opposant du Pouce*. A small, flat, triangular muscle, situate in the substance of the thenar eminence. It is attached, on the one hand, to the anterior annular ligament of the carpus and to the trapezium; and, on the other, to the whole of the outer margin of the first metacarpal bone. This muscle impresses on the first bone of the metacarpus a movement of rotation, which opposes the thumb to the other fingers.
 OPPONANT, Opponens—o. *du Petit doigt*, *Opponens minimi digiti*—o. *du Pouce*, *Opponens pollicis*.
 OPRESSIO, Catalepsy, Oppression—o. Nocturna, Incubus.
 OPRESSION, *Oppressio*, *Thlipsis*, *Cata-thlipsis*, from *opprimere* (*ob*, and *primere*, *pressum*), 'to press against.' A state, in which the patient experiences a sensation of weight in the part affected. When employed abstractedly, it means, particularly, *Oppression of the chest*—*Oppressio Pec'toris*, (F.) *O. de Poitrine*.
 OPRESSION, *Oppressio vir'ium*, (F.) *Oppression des forces*, is, also, used for that condition, at the commencement of fevers, &c., in which the system is oppressed rather than debilitated, and where the vascular action rises, as the obstruction to free circulation is relieved by bleeding, purging, &c.
 OPS, Eye.
 OPSEONUSI, Opsionusi.
 OPSIALGIA, Neuralgia, facia.
 OPSIONUSI, *Opseonusi*, from *οψεις*, 'vision,' and *νοσος*, 'a disease;' *Morbi visus*. Diseases of vision.
 OPSIOTOC'IA, from *οψε*, 'too late,' and *τοκος*, 'birth;' *Partus serotinus*. Parturition after the usual period. See Pregnancy.
 OPSIS, Pupil. Vision.
 OPSOMA'NIAC, *Opsom'anes*, (F.) *Opsomane*, from *οψον*, 'aliment,' and *μανια*. One who loves some particular aliment to madness.
 OPTESIS, Assatio.
 OPTIC, *Opticus*, *Opo'pios*, (F.) *Optique*, from *οπτοιαι*, 'I see.' That which relates to vision.
 OPTIC CENTRE, *Centrum opticum*. The optic centre of the crystalline is the point at which the various rays proceeding from an object cross in their way to the retina.
 OPTIC COMMISSURE, see Chiasmus.
 OPTIC FORAMEN, *Fora'men opticum*, (F.) *Trou optique*. A round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes.
 OPTIC GANGLIA, Quadrigemina tubercula.
 OPTIC GROOVE, A transverse groove on the superior surface of the sphenoid bone, on which the commissure of the optic nerve rests, and which is continuous on each side with the optic foramen.
 OPTIC LOBES, Quadrigemina tubercula.
 OPTIC NERVE, *Nervus opticus* seu *visivus* seu *visivus*, *Par secundu'um* seu *opticum* seu *visivum*, *Nerve of the 2d pair*, *Ocular nerve* of Chaussier. The optic nerves are remarkable for their size; for their running a longer course within than without, the cranium; and for their furnishing no branch from their origin to their termination. They do not seem to arise, as was long supposed, from the optic thalami, but from the tubercula quadrigemina. Immediately after their origin, the *optic tract*, *Tractus optici*, proceed forwards; are, at first, broad and flat; but afterwards become narrower and round. In front of the fossa pituitaria, they unite and decussate, each nerve proceeding through the optic foramen

of the sphenoid bone with the ophthalmic artery, and through the *Foramen opticum chorioideæ*, to form the retina. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ at a flattened circular papilla—*Collieulus seu Papilla nervi optici*—to give rise to the nervous expansion called the retina. Between the colliculus and the yellow spot of Sömmering, a small projection or fold of the retina passes—*plica centralis retinæ*. Besides its neurilemma, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye.

The optic nerve is the nerve of special sensibility of the eye. In the centre of the nerve, there is a *punctum cæcum, macula nigra*, where the central artery enters the eye, and the corresponding vein passes out. If a ray of light falls on this spot it is not appreciated.

OPTIC REMEDY, see Ophthalmic remedy—o. Thalami, Thalami nervorum opticorum—o. Tracts, see Optic nerve.

OPTICO-TROCHLÉI-SCLÉROTICIEN, Oblique, superior of the eye.

OPTICUM, Ophthalmic remedy.

OPTILOS, Eye.

OPTOMETER, from *οπτομαι*, 'I see,' and *μετρον*, 'a measure.' An instrument for measuring the distance of distinct vision.

OPUNTIA, Cactus opuntia—o. Vulgaris, Cactus opuntia.

OR, Gold—o. Blanc, Platinum—o. Cyanure d', see Gold—o. Divisé, see Gold—o. Hydrochlorate d', see Gold—o. Iodure d', see Gold—o. Métallique, see Gold—o. Nitromuriate d', see Gold—o. Oxide d', see Gold—o. et de Soude, Hydrochlorate d', see Gold—o. et de Soude, Muriate d', see Gold.

ORA SERRATA, see Ciliary (Body.)

ORACHE. SPREADING, *Atriplex patula*—o. Stinking, *Chenopodium vulvaria*.

ORAL, *Vocal*, (F.) *Oral*, from *os, oris*, 'a mouth.' Relating to the mouth or to speech.

ORANGE, *Citrus aurantium*—o. Bitter, see *Citrus aurantium*—o. Flowers of the, see *Citrus aurantium*.

ORANGE GRASS, *Hypericum sarothra*—o. Root, *Hydrastis Canadensis*—o. Tree, *Citrus aurantium*.

ORANGEADE. A drink, made with orange juice diluted with water. It is antiphlogistic, and often recommended in acute diseases.

ORANGES, see *Citrus aurantium*—o. Curasoa, *Aurantia curassaventia*.

ORBES CARTILAGINOSI TRACHEÆ, see Trachea.

ORBICULAIRE DES LÈVRES, *Orbicularis oris*—o. des *Paupières*, *Orbicularis palpebrarum*.

ORBICULAR, *Orbicularis*, (F.) *Orbitaire*, from *orbis*, 'a circle.' Spherical, circular.

ORBICULAR BONE, *Os orbicularè seu lenticularè seu Sylvii seu orbiculèrè Syl'vii, Globulus stap'edis ossis, Epiph'ysis cruris longioris incudis, Ossiculum orbicularè seu squamosum seu cochlearè seu quartum*, is the smallest of the four bones of the ear. It is scarcely perceptible, round, convex on two surfaces, and situate between the long ramus of the incus and the head of the stapes.

ORBICULAR MUSCLES are muscles with circular fibres surrounding some natural opening of the body. 1. *Orbicularis seu Constrictor Oris, Sphincter Labiorum, Semi seu Demi-orbicularis, Supra-semi-orbicularis, Labialis, Osculato'rius, Basia'tor*, (F.) *Labial, Orbiculaire des lèvres*. A muscle situate in the substance of the lips, and extending from one commissure to the other. It is formed of two very distinct portions, of a semi-oval shape; one belonging to the upper lip,

the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts. The use of this fleshy muscle is to bring the lips together, and to close the aperture of the mouth, by making it represent a sort of *bouffret* with radiated wrinkles. It is an antagonist to every other muscle of the lips. 2. *Orbicularis Palpebrarum seu oculi seu palpebrarum ciliaris, Palpebrarum duo musculi, Palpebralis, Constrictor seu Sphincter Palpebrarum seu Oculi*, (F.) *Naso-palpébral* (Ch.), *Maxillo-palpébral, Palpébral, Orbiculaire des paupières*. A muscle common to both the eyelids, and seated in their substance. It is broad, thin, transversely oval, and cleft in its great diameter. It is attached to the nasal process of the superior maxillary bone; to the internal angular process of the frontal bone, and to the orbital process of the superior maxillary bone. From these origins the muscle passes outwards, under the skin of the eyelids, surrounding the orbit in a circular manner, extending somewhat beyond it, and covering the upper part of the cheek. It is inserted into the skin of the eyelids, its upper and inner edge being intimately connected with the frontal and corrugator muscles. Its use is to close the eye, by bringing the eyelids together. The part of the orbicularis which covers the cartilages of the eyelids, and which is remarkably thin, is the *Musculus Ciliaris* of some authors.

ORBICULARIS OCULI, *Orbicularis palpebrarum*, see *Orbicularis muscles*—o. *Oris*, see *Orbicular muscles*—o. *Palpebrarum*, see *Orbicular muscles*—o. *Palpebrarum ciliaris*, see *Orbicular muscles*—o. *Recti, Sphincter ani externus*.

ORBICULUS CILIARIS, Ciliary ligament, Ciliary zone.

ORBIS GENU, Patella.

ORBIT, *Or'bita, O. oculi, Trach'ia, Conchus seu Caritas seu Fo'vea seu Pelvicula oculi*, (F.) *Orbite*, from *orbis*, 'a circle.' The circular cavities are so called, which lodge the organs of sight. The *orbits* or *orbital fossæ* or *cavities*, *conchi, κογχαι*, are situate at the upper part of the face, and are composed of seven bones, viz.:—the *frontal*, above; the *palate* and *superior maxillary*, below; the *sphenoid* and *malar*, externally; and the *ethmoid* and *lacrimal*, internally. The orbit is filled by the globe of the eye, with its different accessory parts—muscles, nerves, vessels, the *lacrimal gland*, &c. Its margin is termed *margo orbita'lis*.

ORBITA, Orbit—o. *Oculi, Orbit*.

ORBITAL, *Orbitar*—o. Fissure, inferior, Sphenoidal fissure—o. Fissure, superior, Maxillary fissure.

ORBITAR, *Orbita'rius, Orbita'lis, Or'bita'lis*, (F.) *Orbitaire*. Same etymon. Relating or belonging to the orbit.

ORBITAR APOPH'YSES or PROC'ESSES terminate the two extremities of the orbital arch. The *external* is much more prominent, and is articulated with the cheek-bone; the *internal* is thinner, and joins the *os unguis*.

ORBITAR ARCH, (F.) *Arcade orbitaire*, is the projecting, round margin, which separates the *frontal* and *orbital* surfaces of the *os frontis*, and forms a part of the circumference of the orbit.

ORBITAR FISSURES, (F.) *Fentes orbitaires*. These are situate in the orbit. They are two in number: one *superior*, the Sphenoidal; the other *inferior*, the Spheno-maxillary.

ORBITAR FORAM'INA. Of these there are several:—1. The *Foramen orbitarium superius*, (F.) *Trou orbitaire supérieur*, which is situate at the junction of the inner third of the orbital arch with its two outer thirds, and gives passage to the frontal nerve. 2. The *Foramina orbitaria interiora seu inter'na, Foramina Ethmoidea*.

These are situate at the upper part of the internal paries of the orbit, are formed by the union of two notches of the os frontis with two similar ones of the ethmoid; and are distinguished into *anterior* and *posterior*. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery.

ORBITAR NERVE, *Nervus orbita'lis* seu *orbita'rius* seu *subcutaneus male*, is a branch given off from the superior maxillary. It enters the orbit by the spheno-maxillary fissure, and divides into two filaments; the one—*malar*—which passes over the cheek-bone, is distributed to the orbicularis palpebrarum, and anastomoses with the facial nerve; the other—*temporal*—which passes to the temporal fossæ, and anastomoses with the inferior maxillary and facial, to become afterwards subcutaneous.

ORBITAR SURFACE, see Maxillary bone (superior).

ORBITO-EXTUS-SCLÉROTICIEN, *Rectus externus oculi*—*o. Intus-Scléroticien*, *Rectus internus oculi*—*o. Maxillo-labial*, *Levator labii superioris proprius*—*o. Palpebral*, *Levator palpebræ superioris*—*o. Sus-palpebral*, *Levator palpebræ superioris*.

ORCANETTE, *Achusa officinalis*.

ORCHALGIA, *Orchidalgia*.

ORCHAS, *Scrotum*.

ORCHEITIS, *Oschi'tis*, *Oschei'tis*, *Inflammatio scroti*, from *orchis*, 'the scrotum,' and *itis*, denoting inflammation. Inflammation of the scrotum.

ORCHEITIS, *Hernia humoralis*.

ORCHEOCATABASIS, *Orchidocatabasis*.

ORCHEOCELE, *Orchiocele*.

ORCHEOTOMY, *Castration*.

ORCHESTROMANIA, *Chorea*.

ORCHIDAL'GIA, *Orchal'gia*, *Orchidodyn'ia*, from *orchis*, *orchidos*, 'a testicle,' and *algos*, 'pain.' Pain of the testicle. Neuralgia of the testicle. Irritable testicle. A form of neuralgia.

ORCHIDATROPH'IA, *Atroph'ia testiculi*, from *orchis*, *orchidos*, 'a testicle,' and *atrophia*, 'atrophy.' Atrophy or wasting of the testicle.

ORCHIDITIS, *Hernia humoralis*.

ORCHIDOCARPUM ARIETINUM, see *Carica papaya*.

ORCHIDOCATAB'ASIS, *Orcheocatab'asis*, *Descensus testiculorum*, from *orchis*, *orchidos*, 'the testes,' and *καταβασις*, 'descent.' The descent of the testes into the scrotum.

ORCHIDOCELE, *Hernia humoralis*.

ORCHIDODYN'IA, *Orchidalgia*.

ORCHIDONCUS, *Hernia humoralis*.

ORCHIDOTOMY, *Castration*.

ORCHILL, *Lichen roccella*.

ORCHIOCE'LE, *Orcheoce'le*, from *orchis*, *orchidos*, 'the testicle,' and *κηλη*, 'a rupture.' A tumour of the testicle. Scrotal hernia. *Hernia humoralis*. A name given to several diseases of the testicle and its envelopes, essentially differing from each other.

ORCHIOCE'LE SCIRRHOSA, *Scirrhoce'le*. A malignant tumour of the testis.

ORCHIS, *Testicle*—*o. Butterfly*, *Orchis bifolia*.

ORCHIS MAS'CU'LA, *Saty'ion*, *Testiculus caninus*. *Cynonor'chia*, *Dogs' stones*, *Mule orchis*, *Ballock-grass*, *Male Fools' stones*, *Twinroot*. *Orchidaceæ*. This root had a place in some pharmacopœias, on account of the glutinous, slimy juice it contains. The root of the *Orchis bifolia* or *Butterfly orchis*, has likewise been collected. It has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to *orchis*, 'a testicle,' whence its name.

Silap is obtained from this variety of the orchis;—and from the *Orchis morio*, &c. See *Salap*.

ORCHIS, *ROUND-LEAVED*, *LARGE*, *Platanthera orbiculata*.

ORCHITE, *Hernia humoralis*.

ORCHITIS, *Hernia humoralis*.

ORCHOL, see *Tarsus*.

ORCHOTOMIA, *Castration*. Also, removal of the tarsi.

ORDEAL NUT—called *Esère* by the natives of Calabar—of the natural family *Leguminosæ*, and closely resembling a *Dolichos*, is possessed of virulent acro-narcotic properties.

ORDEOLUM, *Hordeolum*.

ORDEUM, *Hordeum*.

ORDINAIRES, *Menses*.

ORDO MEDICINALIS, *Police*, *medical*.

ORDONNANCE, *Formula*, *Prescription*.

OREILLE D'ÂNE, *Symphytum*—*o. d'Homme*, *Asarum*—*o. de Souris*, *Hieracium pilosella*—*o. d'Ons*, *Primula veris*.

OREILLETTE, *Asarum*, *Auricle of the heart*.

OREILLONS, *Parotis*, *Cynanche parotidæa*.

ORELIA GRANDIFLORA, *Allamanda*.

ORELLANA, see *Terra Orleans*.

OREOSELINUM, *Athamanta aureoselinum*—*o. Africanum*, *Bubon galbanum*—*o. Legitimum*, *Athamanta aureoselinum*—*o. Nigrum*, *Athamanta aureoselinum*.

OREXIS, *Appetite*, *Pyrosis*—*o. Cynodes*, *Boulimia*.

ORGAN, *Organum*, *Organon*. From *εργον*, 'work.' 'An instrument.' Part of an organized being, destined to exercise some particular function. Thus—the eyes are organs of sight; the muscles are organs of motion, &c. The collection of organs, which concur in any function, is called *apparatus*.

ORGAN, *Mentha pulegium*.

ORGANA GENERATIONI INSERVIENTIA, *Genital organs*—*o. Genitalia*, *Genital organs*—*Sexualia*, *Genital organs*—*o. Sudoripara*, see *Perspiration*—*o. Urogenitalia*, *Urogenital organs*.

ORGANES GÉNITAUX, *Genital organs*.

ORGANIC, *Organ'icus*, (F.) *Organique*. Relating to an organ or organs, and to beings possessed of organs. Hence, **ORGANIC FUNCTIONS** are those possessed by both animals and vegetables. It is also used synonymously with *vital*, in contradistinction to *physical*.

ORGANIC CHEMISTRY, see *Chymistry*.

ORGANIC DISEASES or LESIONS are such as concern the organ itself, in contradistinction to *functional*, *rational*, or *dynamic*, which merely concern the function. Of course, *organic* diseases of a part are always more serious than *functional*.

ORGANIC NERVOUS SYSTEM, see *Trisplanchnic nerve*.

ORGANICISM, *Organic'ism'ns*, from *organon*, 'an organ.' The doctrine of the localization of disease, or which refers it always to a material lesion of an organ. A modern term, but not much used.

ORGANISATIO, *Organization*.

ORGANISATUS, *Organized*.

ORGANISM. Same etymon as organ. The living economy. Many physiologists have used this word synonymously with organization; but more especially to designate the aggregate of vital actions in organized beings, animals as well as vegetables. The collection of parts composing an organized body, and the laws which govern it.

ORGANIZABIL'ITY, from *organisatio*, and *habilitas*, 'suitable.' Capability of organization or of being formed into living tissue. Substances possessed of such capability—as fibrin—are said to be *organizable*.

ORGANIZABLE, see *Organizability*.

ORGANIZA'TION, *Organisa'tio*, from *opyavov*, 'an organ.' The manner of structure proper to different beings. It is also employed in the sense of the structure of a part; as, the *organization of the heart*, &c.

ORGANIZATION, COMPOUNDS OF, Principles, immediate.

OR'GANIZED, *Or'ganis instructus*, *Organisatus*, (F.) *Organisé*. That which is composed of organs.

ORGANIZED BODIES, (F.) *Corps organisés*, are those endowed with life; i. e. animals and vegetables: in contradistinction to *inorganic* bodies, which comprise the mineral kingdom. See *Corpus*.

ORGANO-CHEMIA, Chyuistry, organic.

ORGANOGEN'ENY, *Organogen'ia*, *Organogen'esis*, from *opyavov*, 'an organ,' and *γενεσις*, 'generation.' The doctrine of the formation of different organs.

ORGANOGNOS'IA, from *opyavov*, and *γνωσις*, 'knowledge.' The knowledge and discrimination of organized bodies.

ORGANOGRAPHY, *Organograph'ia*, from *opyavov*, and *γραφη*, 'a description.' A description of the organs of a living body.

ORGANOLEPTIC, Plastic.

ORGANOLOGY, Anatomy, Craniology.

ORGANON OLFACTÛS, Nasus.

ORGANONOM'IA, from *opyavov*, and *νομος*, 'a law.' The doctrine of the laws of organic life.

ORGANOZOONOMIA, Zoonomia.

ORGANUM, Instrument.

ORGASM, *Organismus*, *Orgo'sis*, from *opyaw*, 'I desire ardently,' 'I am excited.' *Æstua'tion*. A strong impulse or desire for something. State of excitement and turgescence of any organ whatever. Erethism. Applied particularly to the height of venereal excitement in sexual intercourse.

ORGASMUS, Turgescence.

ORGAS'TICA. Same etymon. The second order of the class *Genetica* of Good. Defined: diseases affecting the orgasm; organic or constitutional infirmity disordering the power or the desire of procreating.

ORGE, Rage.

ORGE, Hordeum—o. *Perlé*, see Hordeum.

ORGEAT, Syrupus amygdalæ.

ORGELET, Hordeolum.

ORGEOLET, Hordeolum.

ORGOSIS, Orgasm.

ORICALCUM, Brass.

ORICULAR, Auricular.

ORICULE, Auricle, Pavillon of the ear.

ORIFICIUM, Mouth—o. Dextrum Ventriculi, Pylorus—o. Uteri, Os uteri—o. Uterinum, see Uterus—o. Vaginale, see Uterus—o. Ventriculi Sinistrum, Cardia.

ORIG'ANUM, *O. vulgare* seu *heracleot'icum*, (*Opriavov*, from *opos*, 'a mountain,' and *γavos*, 'delight.') *Cuni'ta bu'bulu*, *Majora'na mancura'na*, *Zazarhen'di herba*, *Wild* or *Common marjoram*, *Mancura'na*, (F.) *Pied de lit*. *Ord. Labiatae*. *Sex. Syst.* Didynamia Gymnospermia. This plant resembles marjoram in smell; and has a pungent taste, much like thyme. It is aromatic and stimulant; and its oil possesses the properties of the essential oils in general. The oil, *Oleum origani* (Ph. U. S.), is very pungent, and is rarely given internally. It is used in toothache.

ORIGANUM AQUATICUM, Eupatorium cannabium—o. Creticum, *O. dictamnus*.

ORIGANUM DICTAM'NUS, *O. Cret'icum*, *Dictam'nus Cret'icus*, *Amar'acus tomento'sus*, *Oni'tis*, *Ditt'an'y of Crete*, (F.) *Dictanne de Crète*. The leaves of this plant were once recommended as emmenagogue and alexipharmic.

ORIGANUM HERACLEOTICUM, Origanum.

ORIGANUM MAJORA'NA, *O. majoranoï'des*, *Majorana*, *M. horten'sis*, *Sweet mar'joram*, *Samp'sucus*, *Agriorig'annum*, *Amar'acus*, (F.) *Marjolaine*. Its odour is strong and fragrant; taste aromatic and bitterish. Its properties are those of a stomachic and errhine. It is chiefly used, however, for culinary purposes, and as a snuff in headache.

ORIGANUM SYRIACUM, *Teucrium marum*.

ORIGINAIRE (F.), from *origo*, *originis*, 'origin.' This term has been used, by French writers, in the same sense as *congenital*. It is particularly applied to affections depending upon faulty conformation, or to faulty conformation itself.

ORIGO, Arche.

ORISMOLOGY, Terminology.

ORLEANA, see Terra Orleana.

ORME, Appetite.

ORME, Ulmus—o. *Champêtre*, Ulmus—o. *Pyramidale*, Ulmus.

ORMEAU, Ulmus.

ORMSKIRK MED'ICINE. A celebrated antilyssic remedy, supposed to consist of *Pulv. Crete*, $\frac{3}{ss}$; *Bol. Armen.* $\frac{3}{ij}$; *Alumin.* gr. x; *Pale. Inulæ.* $\frac{3}{j}$; *Ol. Anisi*, gtt. vj.

This is taken for a dose every morning for six times, in a glass of water, with a small proportion of fresh milk.

ORNAMENTUM FOLIACEUM, see Tube, Fallopian.

ORNITHOG'ALUM ALTIS'SIMUM. (*Orni-thogalon*, a fanciful name, from *ornis*, *ornis*, 'a bird,' and *gala*, 'milk.')

A South African plant, *Nat. Ord.* Asphodelææ, the fleshy bulb of which is diuretic. An oxymel is prepared of it, which is given in catarrh, asthma, phthisis, and hydrothorax. It resembles squill in its medical properties.

ORNITHOGALUM MARITIMUM, Scilla—o. Squilla, Scilla.

ORNITHOGLOSSA, see Fraxinus excelsior.

ORNUS EUROPEÆ, see Fraxinus ornus—o. *Mannifera*, Fraxinus ornus—o. *Rotundifolia*, Fraxinus ornus—o. *Sylvestris*, Fraxinus excelsior.

OROBAN'CHĒ VIRGINIA'NA, (*οροβαχχη*, from *οροβος*, 'the orobus,' and *αγχω*, 'I strangle.')

Epiphe'gus seu *Epifa'gus America'na* seu *Virginia'na*, *Virgia'ia broom-rape*, *Beech-drops*, *Cancer-root*. *Family*, *Orobanchoidææ*. This parasitic plant is astringent, and a peculiar and extremely nauseous bitter. It is most powerful when fresh. It has been used in dysentery; and, externally, to obstinate ulcers.

OROBAN'CHĒ AMERICA'NA, and *O. UNIFLO'RA*, have the same properties, and are, likewise, called *Cancer-root*, *Earth-club*, and *Cloppwort*.

OROBE, Ervum ervilia.

OROBION, see Ervum ervilia.

OROBOI'DES, from *οροβος*, 'the orobus,' and *ειδος*, 'form.' *Orobo'des*. Having the shape of the orobus. A name given to urine, *Urina orobob'des* seu *oroboi'des*, when depositing a substance of a fawn colour, like the meal of the orobus.

OROBUS, Ervum ervilia—o. Faba, Vicia faba.

ORONGE, see Agaric.

OROPHALL'US, from *opos*, or *oppos*, 'the rump,' and *φαλλος*, 'the male organ.' A monster having a second male organ originating from the rump.—Gurlt.

OROS, *Croopion*, Serum.

ORPIMENT, *Auripigmentum*, *Orpin*, *Rissigallum*, *Rissigallum*, *Cloaur*, *Elomē*, *Siva*, *Lempyias*, *Spec'nium citrinum*, *Yrides*, *Yride*. The native yellow sulphuret of arsenic. It is poisonous, but less so than the oxide. It is, also, called *Adarigo*, *Adarnech*, *Ahusal*, *Athnacho*, *Azarnet*.

The Turks prepare a depilatory with it, which they call *Rusma*.

ORPIN, Orpiment — *o. Brûlant*, Sedum — *o. Grand*, Sedum telephium — *o. Reprise*, Sedum telephium.

ORPINE, Sedum telephium.

ORRHOCHEZIA, Diarrhœa, serous.

ORRHOCYST'IS, from *orrhos*, 'serum,' and *κυστις*, 'a bladder.' An encysted tumour containing a serous fluid.

ORRHOHYMENTIS, Hydrohymenitis.

ORRHOPYG'ION. The inferior extremity of the vertebral column; from *oros*, 'extremity,' and *πυγη*, 'the ntes.' The os coccygis. Also, the raphe, extending from the penis to the anus, and separating the scrotum into two parts.

ORRHORRHOË'A, from *orrhos*, 'serum,' and *ρρω*, 'I flow.' A morbidly increased secretion of a serous fluid.

ORRHOS, *Croupion*, Serum.

ORRIS, Iris Florentina — *o. Common*, Iris Germanica.

ORSEILLE, Lichen pedicella.

ORTEIL, *Digitus*, rocea.

ORTHOCOL'UM, from *orthos*, 'straight,' and *κωλον*, 'limb.' Stiffness of the limb, so that it is kept quite straight.

ORTHODON'TIA, from *orthos*, 'straight, right,' and *odontos*, 'a tooth.' The part of dentistry which is concerned in the treatment of irregularity of the teeth.

ORTHODO'RON. A measure with the Greeks, equal to eleven finger-breadths.

ORTHOG'NATHOUS, from *orthos*, 'right, straight,' and *γναθος*, 'jaw.' Having a vertical jaw. A term applied to the form of a head in which the facial angle approaches the right angle.

ORTHIOMORPHIA, Orthopædia.

ORTHIOMORPHOSIS, Orthopædia.

ORTHIONTROPIA, Orthopædia.

ORTHIOP'EDIA, *Orthopæ'di'ce*, *Orthomor'phia*, *Orthomorphi'sis*, *Orthotrop'ia*, *Orthopæ'di'ce*, from *orthos*, 'right,' and *παῖς*, *παῖδος*, 'a child.' The part of medicine whose object is to prevent and correct deformity in the bodies of children. Often used, however, with a more extensive signification, to embrace the correction or prevention of deformities at all ages. *Orthosomat'ice*, *Orthosomat'ice*, from *orthos*, 'right,' and *σωμα*, 'body,' has been proposed as a preferable term.

ORTHOPE'DIC, *Orthopæ'di'cus*; same etymon. Relating to orthopædia, — as *Orthopædic Institution*, *Institut'ion orthopæ'dicum* seu *orthopæ'dium*: an institution for the correction or prevention of deformities in children.

ORTHOPE'DICIS, Orthopædia.

ORTHOPE'DIST, *Ortho'ter*, *Orthopæ'dicus*. Same etymon. One who practises orthopædia.

ORTHOPHO'NIA, from *orthos*, 'right,' and *φωνη*, 'voice.' A good pronunciation.

ORTHOPHREN'IC, *Orthophren'i'cus*, from *orthos*, 'right,' and *φρηνη*, 'mind.' Relating to sound mind, and to the cure of insanity.

ORTHOPE'NG'IA, *Suffoca'tio*, *Strangu'lat'io*, *Præfoca'tio*, *Pnix*, *Pnyxia*, *Euthyp'noë*, *Euthyp'noë'a*, *Angor*, *Apnœ'a*, from *orthos*, 'right,' 'straight,' and *πνέω*, 'I respire.' Impracticability of breathing in the horizontal posture. Necessity of being in the erect posture, in order to respire.

ORTHOPE'NGIA CARDIACA, Angina Pectoris — *o. Convulsiva*, Asthma — *o. Cynanchica*, Cynanche trachealis — *o. Hydrothoracica*, Hydrothorax — *o. Hysterica*, Angone — *o. Pituitosa*, Mycorthopnœa — *o. Tussiculosa*, Pertussis.

ORTHO-SOMATICE, Orthopædia.

ORTHO-SOMATIQUE, Orthopædia.

ORTHOTER, Orthopædist.

ORTHYSTEROPTOMA, Prolapsus uteri.

ORTHYSTEROPTOSIS, Prolapsus uteri.

ORTIE, Urtica — *o. Blanche*, Lamium album — *o. Brûlante*, Urtica urens — *o. Morte*, Lamium album — *o. Morte des Bois*, Galeopsis — *o. Romaine*, Urtica pilulifera.

ORTYX, Tetrao coturnix.

ORUS, *Croupion*, Serum.

ORVALE, Salvia sclarea.

ORVIETA'NUM. From the Italian *Orvietano*. An electuary regarded as an invaluable antidote, and composed of *Old theriac*, *Dried viper*, *Scorzonera*, *Carlina*, *Imperatorium*, *Angelica*, *Bistort*, *Rosemary*, *Juniper*, *Cinnamon*, *Cloves*, *Mace*, *Honey*, and a crowd of other substances. Its medical properties resembled, in some respects, those of the theriac. It was so called, according to some, because invented by Orvietano, a celebrated charlatan; or, according to others, from Orvieto, a town in Italy.

ORY'ZA, *Orp'za*, *Ory'za sativ'a*, Rice, (F.) *Riz*. Family, Gramineæ. *Ser. Syst.* Hexandria Monogynia. A plant, almost aquatic, and indigenous in China, one of the richest productions of Egypt, and which prospers in the warmer regions of the four quarters of the globe. The grain inclosed in the husk is called by the Malays *Paddy*, *Padi*, or *Paddie*; when deprived of the husk, *Bras*, and when boiled, *Nasi*. Its amylaceous seeds, *Ory'za*, *Ory'zum*, *Hordeum galact'icum*, nourish more men than those of wheat and rye together. Besides being alimentary, they are demulcent and emollient. *Gardiner's alimentary preparation* is very finely ground rice-meal.

Mucilage of Rice, *Rice water*, may be formed by taking one ounce of rice, and, having washed it, macerating it for three hours in a quart of tepid soft water, in a pan placed upon a stove; then boiling the whole slowly for another hour, and straining through a sieve.

It may be sweetened and acidulated, or be prepared with milk, like arrow-root, and be used as a demulcent.

Rice Jelly is made by macerating a sufficient quantity of clean rice in as much water as will cover it; boiling slowly, adding water as it evaporates, until the rice is reduced to a pap, sweetening and flavouring with *lemon-juice* or *vanilla*, and passing through a fine sieve into a form or mould. It may be eaten alone or with milk; and is a good dietetic preparation for those of weak digestive powers.

Ground rice. Take a tablespoonful of *ground rice*, a pint and a half of milk, and half an ounce of *candied lemon-peel*. Rub the rice smooth with the milk: then add the lemon-peel cut into small pieces; boil for half an hour, and strain whilst the milk is hot. It is used in the same cases as rice jelly.

OS, Bone, Mouth, see Ossiculum — *o. Aeromii*, Aeromion — *o. Adjutorium*, Humeri os — *o. Alæforme*, Sphenoid — *o. Alagas*, Coecyx, Sacrum — *o. Alatum*, Sphenoid bone — *o. Amphideon*, Os uteri — *o. Anonyme*, Innominatum os — *o. Anonymum*, Innominatum os — *o. Anticum*, *Avant bouche* — *o. Arenale*, Temporal bone — *o. Arnale*, Temporal bone — *o. Turbinatum, Turbinate bone, middle — o. Turbinatum inferius, Turbinate bone, inferior — o. Uncinatum, Os unciniforme — o. Upsiloides, Hyoides os.

OS UTERI, *Os tivæ* seu *inter'num* seu *amphid'eon* seu *amphid'eum*, *Protos'porus*, *Os'cheon*, *Hysteros'toma*, *Os'culum* seu *orific'ium u'teri*, *Hysteros'tom'ium*, *Hysteros'toma*. (F.) *Museum de Tauche*. The mouth of the womb, see Uterus.

OS UTERI EXTERNUM, see Uterus — o. Uteri internum, see Uterus — o. Varium, Cuboid — o. Vesiforme, Sphenoid — o. Vomoris, Vomer — o. *Wormiæ*, Wormiana ossa — o. Xiphoides, Sternum — o. Ypseloides, Hyoides os — o. Zygomaticum, Malæ os.

OSCEDO, Yawning.

OSCHÆMATŒDE'MA, *Oschæmatœde'ma*, *Œde'ma seroti erue'tum*; from *σχερον*, 'serotum,' 'αἷμα,' 'blood,' and *οἰδῆμα*, 'œdema.' Effusion of blood into the serotum.

OSCHŒMŒDEMA, *Oschæmatœdema*.

OSCHE, Serotum.

OSCHEITIS, Orcheitis, Oschitis.

OSCHEOCARCINOMA, Cancer, chimney-sweepers'.

OSCHŒCE'LE, *Oschœce'le*, *Serotoce'le*, from *σχερον*, 'the serotum,' and *κληη*, 'tumour;' *Serotal hernia*, see Bubonocele. Sauvages uses *oschœcele* in the sense of *Dropsy of the serotum*, see Hydrocele.

OSCHŒCELE AQUOSA, *Hydroschœcele* — o. Flattulenta, Physocele — o. Hydatidosa, Hydatidocele — o. Œdematica, Œdematoschœcele — o. Seminalis, Spermatocele — o. Urinalis, Urocele — o. Varicosa, Varicocele.

OSCHŒOCHALASIE, from *σχερον*, 'the serotum,' and *χαλασις*, 'relaxation.' A tumour resulting from hypertrophy of the areolar tissue of the skin of the part,—an affection which has been confounded with sarcocele.—Alibert.

OSCHEON, Serotum, Os uteri.

OSCHEON'CUS, *Oschœon'cus*, *Oschœophy'ma*, *Oschœophy'ma*, from *oscheon*, and *ογκος*, 'a tumour.' A preternatural swelling of the serotum.

OSCHŒOPHYMA, *Oschœoncus*.

OSCHŒOPLAS'TIC, *Oschœoplast'icus*, from *oscheon*, and *πλασσω*, 'I form.' An epithet given to the operation for restoring the serotum when lost. *Os'cheoplasty*.

OSCHŒOPYŒDE'MA, *Oschœopyœde'ma*, *Œde'ma seroti purulen'tum*. Purulent tumefaction of the serotum.

OSCHEUS, Serotum.

OS'CHION. The raised margin of the os uteri. According to some, an excrescence from the os uteri.

OSCHIT'IS, *Orche'itis*, *Osch'e'itis*, *Inflammati'o seroti*, from *oscheon*, and *itis*, 'inflammation.' Inflammation of the serotum.

OSCHOCARCINOMA, Cancer, chimney-sweepers'.

OSCHŒCELE, *Oschœcele*, *Serotocele*.

OSCHONCUS, *Oschœoncus*.

OSCHOPHYMA, Oscheoneus.

OSCHOPYEDEMA, Oscheopyœdema.

OSCHURŒDE'MA: from *oscheon*, *ουρον*, 'urine,' and *œdema*, 'œdema.' Œdema from effusion of urine into the scrotum.

OSCHUS, Scrotum.

OSCHYDRŒDE'MA, from *oscheon*, 'ὕδωρ,' 'water,' and *œdema*, 'œdema.' *Œdema scroti aquœum*. Watery œdema of the scrotum.

OSCILLA'TIO, Irritability, Oscillation.

OSCILLA'TION, *Oscilla'tio*; from *oscillum*, 'an image, perhaps of Bacchus, hung on ropes, and swung up and down in the air.' Vibration, *Vibrat'io*, *Vibrat'io*, *Vibrat'io*. Also, a partial rotatory movement of the eyeball to and from its antero-posterior axis.

OSCITANT (FEVER), *Febris oscitans*, (F.) *Febr̄e oscitante*, from *oscitare*, 'to yawn.' A fever, in which the patient is continually yawning.

OSCITATIO, Yawning.

OSULATORIUS, Orbicularis oris.

OSULUM UTERI, Os uteri.

OSCUS, Scrotum.

OSEILLE, *Rumex acetosus*—*o. Boucher*, *Rumex scutatus*—*o. Petite*, *Rumex scutatus*—*o. Rouge*, *Rumex scutatus*—*o. Rouge*, *Rumex sanguineus*.

OSIER, *Salix alba*—*o. red*, *Cornus sericea*.

OS'MAZOME, *Os'mozome*, *Osmozo'ma*, *Osmozo'ma*, *Os'mozone*, *Zomad'mum*, (F.) *Matière extractive du Bonillon*, *Extrait de viande: Extractive* or *Saponaceous extract of meat*; from *osm̄n*, 'smell,' and *ζωμος*, 'soup.' M. Thénard gave this name to an extractive matter, contained in muscular flesh and in the blood of animals, which he considers of a peculiar nature. It has an agreeable smell and taste, and is found in *Bonillons* of meat, in the proportion of one part to seven of gelatin. Vauquelin discovered in it some fungi. It is the substance which gives the flavour of meat to soups, and hence its name. It is a mixture of different crystallizable and uncrystallizable principles with empyreumatic products.

Osmazome has been prescribed in the dose of ʒss to ʒj, in broth or in powder, with aromatics, as a stimulant to the digestive actions and a restorer of appetite to the digestive actions and a restorer of appetite to the digestive actions. An *Osmazome chocolate*, *Chocolata cum osmazo'ma*, has been introduced as an analeptic article of diet. It consists of *chocolate* lbj to *osmazome* ʒj.

OSME, OLOUR.

OSMESIS, Olfaction.

OSMIDROSIS, from *osm̄n*, 'odour,' and 'ἰδρωσ', 'sweat.' Perspiration of an unusual odour.

OSMITOP'SIS ASTERISCOÏDES, *Bellin*. A plant, of the Cape of Good Hope, which, from its smell and taste, seems to contain camphor; hence its antispasmodic virtues. In infusion, it is often beneficially employed in cough, hoarseness, and diseases of the chest generally, and is said to be serviceable in flatulent colic. Infused in spirit, *spir'itus bell'idis*, it has been used successfully as an external remedy in paralysis.

OSOMETRICUS SENSUS, Olfaction.

OSMONOSI, *Osmo'nai*, *Marhi alfac'tas*, from *osm̄n*, 'odour,' and *nosos*, 'a disease.' Diseases of olfaction.

OSMONOSOLOG'IA, from *osm̄n*, 'odour,' *nosos*, 'disease,' and *logos*, 'description.' The doctrine of, or a treatise on, the diseases of the sense of smell.

OSMORRHIZA LONGIS'TYLIS, (*osm̄n*, 'a scent,' and *ρίζα*, 'a root,') *Secret Cic'ely*. An indigenous plant, *Order*, Umbelliferae, which flowers in May and June. It is an agreeable aromatic, having much of the flavour of anise.

OSMOSE, *Osmo'sis*; from *ωσμος*, 'impulse.' The action by which fluids are impelled through

moist membrane and other porous septa, in endosmotic and exosmotic experiments.

OSMOT'IC, *Osmo'ticus*, same etymon. Relating or belonging to osmose: as "osmotic force," the force which induces osmose.

OSMOZOME, Osmazome.

OSMUND, ROYAL, *Osmunda regalis*.

OSMUN'DA CINNAMOM'EAM, *Cinnamom Fern*. Indigenous; *Order*, Filices; is regarded to be demulcent, subastringent, and tonic. Boiled in milk, it yields a fine mucilage, which is useful in diarrhœa.

OSMUN'DA REGA'LIS, *O. spectabilis*, *Filix Flor'ida*, *Flowering Fern*, *Osmund-royal*. This plant was once thought to possess astringent and eumenagogue virtues.

OSMUNDA SPECTABILIS, *O. regalis*.

OSORON, Opium.

OSPHRANTERICUS, Olfactory.

OSPHRANTICOS, Olfactory.

OSPHRASIA, Olfaction.

OSPHRESIOL'OGY, *Osphresiolog'ia*, from *ὀσφρησις*, 'olfaction,' and *λογος*, 'a discourse.' A treatise on olfaction and odours.

OSPHRESIS, Olfaction.

OSPIRETICUS, Olfactory.

OSPURIS'TICE, from *ὀσφρησις*, 'olfaction.'

The doctrine of the phenomena of odours.

OSPHYALGEMA, Coxalgia.

OSPHYALGIA, Coxalgia.

OSPHYARTHRTIS, Osphyitis.

OSPHYARTHROFACE, *Coxarum morbus*.

OSPHYITIS, *Osphy'itis*, *Osphyarthri'tis*, *Inflammat'io coxæ*, from *ὀσφύς*, 'the hip,' and *itis*, denoting inflammation. Inflammation of the parts about the hip.

OSPHYRRHEUMA, Lumbago.

OSPHYRS, Haunch, Lumbi.

OSPHYRTIS, Osphyitis.

OSSA BREGMATIS, Parietal bones—*o. Convoluta inferiora*, Turbinated bones, inferior—*o. Digitorum manus*, Phalanges of the fingers—*o. Digitorum pedis*, Phalanges of the toes—*o. Epactalia*, *Wormiana ossa*—*o. Maxillæ superioris quarta seu quinta seu secunda*, Nasal bones—*o. Nasalia*, Nasal bones—*o. Nasi*, Nasal bones—*o. Nervalia*, Parietal bones—*o. Pisiformia lingualia*, see *Hyoides*, os—*o. Raphogeminantia*, *Wormiana ossa*—*o. Sesamoidea*, *Sesamoid bones*—*o. Sincipitis*, Parietal bones—*o. Spongiosa*, Turbinated bones—*o. Suprarum*, *Wormiana ossa*—*o. Tertia maxillæ superioris*, Turbinated bones—*o. Tetragona*, Parietal bones—*o. Triangularia*, *Sphenoidal cornua*—*o. Triangularia Blasii*, *Wormiana ossa*—*o. Triquetra*, *Wormiana ossa*—*o. Triticea*, see *Hyoides*, os—*o. Turbinata*, Turbinated bones—*o. Verticallia*, Parietal bones.

OSSEINE, Osteine.

OSSELETS DE BERTIN, *Sphenoidalia cornua*—*o. de l'Oreille*, *Ossicula auditûs*—*o. de l'Œue*, *Ossicula auditûs*—*o. du Tympan*, *Ossicula auditûs*.

OSSEOUS, *Os'seus*, *Osto'des*, *Osto'id'es*, *Ostoid*, (F.) *Ossens*; from *os*, 'a bone.' Bony. Resembling bone.

OSSCILES, Ossicula, see *Ossiculum*.

OSSCICULA, see *Ossiculum*.

OSSCULA AUDITÛS, *O. Avris*, (F.) *Ossicula de l'oreille* or *de l'onie* or *du tympan*. The small bones or *ossicula* situate in the cavity of the tympanum, and forming an uninterrupted chain from the membrane of the tympanum to that of the fenestra ovalis. They are four in number; and their series, from without to within, is as follows: *Mollens*, *Incus*, *Os orbiculare*, *Stapes*.

OSSCULA BERTINI, *Sphenoidalia cornua*—*o. Innominata*, *Innominata minora ossa*—*o. Nasi*, Nasal bones—*o. Sesamoidea*, *Sesamoid bones*—*o. Triticea*, see *Hyoides*, os.

OSSICULUM, (plural *Ossicula*.) *Osta'rium*, *Os'sicle*. Diminutive of *os*, *ossis*, 'a bone.' A small bone. See *Os*.

OSSICULUM COCHLEARE, Orbicular bone—*o*. *Ineudi Comparatum*, *Incus*—*o*. *Malleolo assimilatum*, *Malleus*—*o*. *Molari denti comparatum*, *Incus*—*o*. *Orbiculare*, Orbicular bone—*o*. *Quartum*, Orbicular bone—*o*. *Squamosum*, Orbicular bone.

OSSIFICATION, *Ossifica'tio*, *Ossificac'tio*, from *os*, 'a bone,' and *facere*, 'to make.' *Osteogen'ia*, *Osteogen'esis*, *Osteo'sis*, *Osto'sis*. Formation of bone. Development or increase of the osseous system. Ossification takes place in the same manner as the nutrition of other organs. The bones are, at first, mucous, and afterwards cartilaginous; the cartilage, at length, receives the phosphate of lime, and is, at the same time, replaced by a gelatinous parenchyma, when the bone has acquired the whole of its development.

OSSIFICATION, POINTS OF, *Puncta seu Nuclei ossificatio'nis*, *Nuclei ossei*, are the points where the ossification of a bone commences, whence it extends to other parts. Almost all the bones present a greater or less number of points of ossification. Besides the natural ossification, which we observe in the fœtus and in the first periods of life, there are also *accidental ossifications*, such as those frequently remarked after the inflammation of serous membranes, in the parietes of arteries, and to which the terms *Osthe'ia*, *Incrustation* and *Petrifaction* have, sometimes, been applied.

OSSIFRAGA, *Osteocolla*.

OSSIS SACRI ACUMEN, *Coccyx*.

OSSISANA, *Osteocolla*.

OSSIVOROUS, from *os*, *ossis*, 'a bone,' and *vorare*, 'I devour.' A species of tumour, mentioned by Ruysch, which destroys bone.

O'STAGRA, *Os'teagra*, from *σαστεον*, 'a bone,' and *αψα*, 'seizure.' A forceps to cut or remove portions of bone.

OSTALGIA, *Osteocopus*.

OSTARIUM, *Ossiculum*.

OSTARTHITIS, *Arthrophlogosis*.

OSTARTHROFACE, *Spina ventosa*.

OSTEAGRA, *Ostagra*.

OSTEALGIA, *Osteocopus*.

OSTÉIDE, *Osteoid*.

OSTEINE, *Osséine*, from *σαστεον*, 'a bone.' The animal matter of bone.

OSTEITES, *Osteocolla*.

OSTEITIS, *Osti'tis*, from *σαστεον*, 'a bone,' and *itis*, *Inflamma'tio Ossis*. Inflammation of bone; characterized by violent shooting and lancinating pains in a bone.

OSTEMPY'SIS, *Osteëmpye'sis*, *Ostempyo'sis*, from *σαστεον*, 'a bone,' and *εμπυσις*, (*εν*, and *πυον*), 'effusion of pus.' An abscess in the interior of a bone.

OSTEMPYOSIS, *Ostempyesis*.

OSTEOANABROSIS, *Osteonabrosis*.

OSTEOCELÉ, from *σαστεον*, 'a bone,' and *κηλη*, 'a tumour.' A hernia in which the sac is cartilaginous and bony:—a rare case. Also, osseous induration of one or both testicles.

OSTEOCLASIS, *Fracture*.

OSTEOCOLLA, from *σαστεον*, 'a bone,' and *κόλλα*, 'glue.' *Glue-bone*, *Stone* or *Bone binder*; *Ossifraga*, *Holos'teus*, *Ossisa'na*, *Ostri'tes*, *Ostei'tes*, *Amos'teus*, *Osteol'ithos*, *Steloch'i'tes*. A name given to petrified carbonate of lime, found in some parts of Germany and other portions of the globe; so called, because it has been supposed to possess the power of favouring the formation of *callus* in fractures. It is the *Chaux carbonatée concrétionnée incrustante* of Haüy. Not used.

OSTEOC'OPUS, *Osteal'gia*, *Ostal'gia*, *Osteo-*

dyn'ia, from *σαστεον*, 'a bone,' and *κοπος*, 'fatigue.' *Boneuch*, *Bone-ague*. Pain in the bones,—as in syphilis.

OSTEOCYST'OID, *Osteocystoï'des*, from *σαστεον*, 'a bone,' *κυστις*, 'a sack or cyst,' and *εϊδος*, 'appearance.' A morbid growth in bone, consisting of the formation of cysts filled with puriform or other fluid.

OSTEODENTINE, see *Tooth*.

OSTEODYNIA, *Osteocopus*.

OSTEOGRANÆNA, *Necrosis*.

OSTEOGENIA, *Ossification*.

OSTEOGRAPHY, *Osteogra'phia*, from *σαστεον*, 'a bone,' and *γραφειν*, 'to describe.' Description of the bones. The part of anatomy which describes the bones.

OSTEOHELICOSIS, *Caries*.

OSTEOTID, *Osteoï'des*, (F.) *Ostéide*, from *σαστεον*, 'bone,' and *εϊδος*, 'appearance.' An accidental bony production, or more frequently a morbid production, which is a calcareous incrustation of the normal tissue or of fibrous tumours.

OSTEOLITHIOS, *Osteocolla*.

OSTEOLOGY, *Osteolog'ia*, from *σαστεον*, 'a bone,' and *λογος*, 'a discourse.' The part of anatomy which treats of bones.

OSTEOLY'SIS, from *σαστεον*, 'a bone,' and *λυω*, 'I dissolve.' Necrosis or death of the bone, as in hospital gangrene, in which the dead parts are of soft consistence.

OSTEOMA, *Exostosis*.

OSTEOMALACIA, *Mollities ossium*—*o*. *Infantum*, *Rachitis*.

OSTEOMALACOSIS, *Mollities ossium*.

OSTEOMYELITIS, *Medullitis*.

OSTEON, *Bone*—*o*. *Hieron*, *Særum*.

OSTEONABRO'SIS, *Osteonabro'sis*, from *σαστεον*, 'a bone,' a priv., and *βρωσις*, 'nutriment.' Atrophy of the osseous texture marked by diminution of volume.

OSTEON'CUS, from *σαστεον*, 'a bone,' and *ογκος*, 'a tumour.' A bony tumour.

OSTEONECROSIS, *Necrosis*.

OSTEON'OSI, *Osteonni'si*, from *σαστεον*, 'a bone,' and *ωσις*, 'a disease.' *Mor'bi os'sium*. Diseases of the bones.

OSTEOPÆDION, *Lithopædion*.

OSTEOPALIN'CLASIS, from *σαστεον*, 'a bone,' *παλιν*, 'again,' and *κλασις*, 'fracture.' The breaking again of a bone which has united unfavourably.

OSTEOPHY'MA, *Osteoncus*. Sometimes used in the sense of *Exostosis*. By Lobstein applied to bony productions originating in the deep-seated layers of the periosteum, in the vicinity of a carious bone, and which seem to be intended to obviate the weakness resulting from the destruction of the bone.

OSTEOPHYTE, *Exostosis*.

OSTEOPHYTON, *Osteophyte*, from *σαστεον*, 'a bone,' and *φυω*, 'I grow.' Under this name, Rokitansky describes a deposition of bony matter, found by him on the inner surface of the parietes of the skull of pregnant women.

OSTEOPLASTY, (F.) *Ostéoplastie*, from *σαστεον*, 'a bone,' and *πλασσειν*, 'to form.' An operation by which the total or partial loss of a bone is remedied.

OSTEOPLEU'RA, *Pleurosto'sis*, from *σαστεον*, 'a bone,' and *πλευρον*, 'a rib.' Ossification of the cartilages of the ribs.

OSTEOPORO'SIS, *Osteosclero'sis*, from *σαστεον*, 'a bone,' and *πωρωσις*, 'induration.' Induration of a bone, from the deposition of too much bony matter. Also, a bony degeneration, which consists in too great porosity with hardening. [?]

OSTEOPSATHYROSIS, *Fragilitas ossium*.

OSTEO-SARCO'MA, *Osteo-sarco'sis*, *Sarcosto'sis*, *Hæmatexosto'sis*, from *σαστεον*, 'bone,' and *σαρξ*,

σαρκος, 'flesh.' Disense of the bony tissue, which consists in softening of its laminae, and their transformation into a fleshy substance, analogous to that of cancer; accompanied with general symptoms of cancerous affection. The word has often, also, been used synonymously with *spina ventosa*.

OSTEOSARCOSIS, Osteosarcoma.

OSTEOSCLEROSIS, Osteoporosis.

OSTEOSIS, Ossification.

OSTEO-STEATO'MA, *Exostosis steatomatodes*, from *οστέον*, 'a bone,' and *στέαρ*, *στεατος*, 'suet or fat.' A name given to bony tumours or degenerations, which sometimes belong to osteosarcoma; at others, to *spina ventosa*, *exostosis*, &c.

OSTÉOTOME; same etymon as Osteotomy. A bone saw, which has the form of a chain.—Nysten.

OSTEOTOMIST, *Osteotomis'ta*. Same etymon as the next. An instrument, invented by Dr. D. Davis, for cutting the bones of the foetal cranium, where it becomes necessary to greatly reduce the size of the head in parturition.

OSTEOTOMY, *Osteotom'ia*, from *οστέον*, 'a bone,' and *τέμνειν*, 'to cut,' (*τομή*, 'an incision.')

The part of practical anatomy whose object is the dissection of bones.

OSTEOTOPHUS, Tophus.

OSTEOTYLUS, Callus.

OSTEULCUM, Bone-nippers.

OSTEUM, Bone.

OSTHENIA, see Ossification.

OSTIARIUS, Pylorus.

OSTIOLUM, diminutive of *οστέον*, 'a mouth or opening.' A small door or gate.

OSTIOLA CORDIS, *Valvula cordis, Pellicula cordis*. The valves of the heart.

OSTITIS, Osteitis.

OSTIUM, *οστέον*, *Orific'ium*, a door or gate, — of the heart, for example. The opening—*Ostium atrioventriculare* seu *ventriculi venosum* — between the auricle and ventricle of each side. *Ostium ventriculi arteriosum*, is the opening at the origin of the pulmonary artery and aorta.

OSTIUM ABDOMINALE, see Tube, Fallopiian — o. Arteriosum, see Ostium — o. Atrioventriculare, see Ostium — o. Duodenale ventriculi, Pylorus — o. Internum, see Ostium uteri — o. Esophageum, Cardia.

OSTIUM UTERI. The vulva; the vagina. The term *Ostium internum* has been applied to the inferior opening of the uterus, which establishes a free communication between the cavities of the body and neck, and which is often obliterated in old women.—Cruveilhier. The neck of the uterus; the mouth of the uterus. See Uterus.

OSTIUM UTERINUM, see Tube, Fallopiian — o. Venosum, see Ostium — o. Ventriculi Duodenale seu Pyloricum seu Dextrum seu Inferius, Pylorus.

OSTODES, Osseous.

OSTOIDEA SUBSTANTIA, see Tooth.

OSTOID, Osseous.

OSTOMA, Exostosis.

OSTOSIS, Ossification.

OSTREA, *Οστρέον*, *οστρέον*, *οστρέιον*, *Ostrea edulis*, (F.) *Huître*. *Classe*, *Acéphala*. The oyster. The oyster is a wholesome article of diet, often advised as analeptic and easy of digestion.

The shells, *Testæ Ostreae*, *Testa* (Ph. U. S.), (F.) *Écailles d'huîtres*, have been received into the Pharmacopœias, and used medicinally. Their virtues are similar to those of the carbonate of lime. See Creta.

OSTREUM, Ostrea.

OSTRITES, Osteocolla.

OSTRUTHIUM, Imperatoria.

OSWEGO TEA, *Monarda coccinea*.

OSYRIS, Antirrhinum linaria.

OTACOUS'TIC, *Otacus'ticus*, from *οὖς*, *ωτός*,

'the ear,' and *ακούω*, 'I listen.' Any instrument is so called which improves the sense of hearing, — as the different species of trumpets.

OTAGRA, Otaglia.

OTAL'GIA, *Ot'agra*, *Otod'ynē*, *Otal'gy*, (F.) *Otalgie*, from *οὖς*, *ωτός*, 'the ear,' and *αλγος*, 'pain.' Pain in the ear; *Dolor aurium*, *Spas'mus aurium*, *Ear-ache*. See Otitis.

OTAL'GIC, *Otal'gicus*, (F.) *Otalgique*. An epithet for remedies used in otalgia.

OTECHUS, Tinnitus aurium.

OTEMPLAS'TRUM, *Otoplas'ta*, *Otoplas'trum*, from *οὖς*, *οτός*, and *εμπλαστρον*, 'a plaster. A plaster put behind the ears.

OTEN'CHYTES, *Oten'chyta*, from *οὖς*, *οτός*, *εν*, 'into,' and *χυνω*, 'I pour.' *Siphon auricularis*. A species of syringe, used for injecting the ear.

OTHELCO'SIS, from *οὖς*, *οτός*, and *ἔλκωσις*, 'ulceration.' Ulceration or suppuration of the ear.

OTHONE, Linteam.

OTHONION, Linteam.

OTHYGROTES, Otirrhœa.

OTIATER, Aurist.

OTIATR'IA, *Otiat'rice*, from *οὖς*, *οτός*, and *ιατρεια*, 'medicine.' The business of the aurist. The management of diseases of the ear; *Aural Medicine and Surgery*, *Ear Surgery*.

OTIATRICE, Otiatria.

OTIATRUS, Aurist.

O'TIC, *O'ticus*, (F.) *Otique*, from *οὖς*, *οτός*. Belonging or relating to the ear. A medicine employed in diseases of the ear.

OTIC GANGLION, *Otagan'glinum*, *Ganglion auricularē* seu *o'ticum*, *Auricular ganglion*, *Ganglion of Arnold*, (F.) *Ganglion maxillo-tympanicum*. This is a small ganglion, although more than double the size of the ophthalmic, ash-coloured and pulpy like the ganglions of the sympathetic. It is situate in advance of the ganglion of Gasser, on the lower surface of the inferior maxillary nerve, at the inner margin of the foramen ovale of the sphenoid bone. See Petrous ganglion.

OTIRRHŒA, *Otorrhœa*, *Othy'grotes*, *Blennorrhœa*, (F.) *Catarrhe de l'Oreille*, from *οὖς*, *οτός*, and *ρῶω*, 'I flow.' Discharge of a purulent or puriform liquid, from the meatus auditorius externus, *Pyorrhœa aurium*, *Otopyorrhœa*, *Pygatorrhœa*, *Otorrhœa purulenta*. It is a symptom of chronic otitis. Some authors, have, indeed, used the term synonymously with chronic otitis. When it extends to the brain, it is termed *cerebral otorrhœa*; and when from the middle or internal ear, it is termed *internal otorrhœa*, *Otorrhœa interna*, and *Entotorrhœa*.

OTIRRHŒA CEREBRAL, see Otirrhœa.

OTITES, see Digitus.

OTITIS, *Otophleg'monē*, *Empres'ma otitis*, *Inflammatio auris*, *Inflammation of the ear*, (F.) *Otite*, *Inflammation de l'oreille*, from *οὖς*, *οτός*, and *itis*, denoting inflammation. Inflammation of the mucous membrane of the ear, characterized by excruciating pain; intolerable humming in the ear, with a discharge of mucus generally from the meatus externus or from the Eustachian tube. When the inflammation is restricted to the lining membrane of the meatus, it is termed *otitis catarrhalis*. Otitis is divided into *external* and *internal*, according as it affects the meatus auditorius, or the cavity of the tympanum or internal ear. It may be *acute* or *chronic*. *Acute otitis* commonly terminates in a few days in a favourable manner, with the aid of antiphlogistics. *Chronic otitis*, *otirrhœa*, is almost always accompanied by a purulent discharge from the meatus auditorius. It is often incurable, and may ultimately give occasion to disease of the internal ear, and even of the brain.

OTITIS CATARRHALIS, see Otitis.

OTIUM, *Ota'rium*, from *ous*, *otos*. A small ear. The auricle or pavilion of the ear.

OTOCEPHALUS, *Mono'tia*, from *ous*, *otos*, and *κεφαλη*, 'head.' A monster, whose ears are in contact, or united into one.

OTOCONIES, see *Otolithi*.

OTODYNE, *Otalgia*.

OTOLYPHIS, *Earpick*.

OTOLYPHUM, *Earpick*.

OTORAPHY, *Otographia*, from *ous*, *otos*, and *γραφη*, 'a description.' The part of anatomy which describes the ear.

OTOLITHS, *Otolithi*, *Otolites*, (F.) *Otolithes*, from *ous*, *otos*, and *λιθος*, 'a stone.' White calcareous substances contained in the membranous vestibule, and seeming to be suspended in the fluid of the vestibule by means of a number of nervous filaments proceeding from the auditory nerve. Their universal presence in the ear of the mammalia would seem to show that they are insertive to audition. When of a looser consistence, they are called *Otocolia*, (F.) *Otocolies*, from *ous*, *ωτος*, 'the ear,' and *κοινα*, 'dust.'

OTOL'OGY, *Otologia*, from *ous*, *otos*, and *λογος*, 'a discourse.' The part of anatomy which treats of the ear. An anatomical treatise on the ear.

OTOPATHEMA, *Otopathy*.

OTOPATHY, *Otopathi'a*, *Otopathe'ma*, from *ous*, *ωτος*, and *παθος*, 'a disease.' A diseased condition of the ear.

OTOPHLEGMON, *Otitis*.

OTOPLASTA, *Otemplastrum*.

OTOPLASTICE, *Otoplasty*, from *ous*, *otos*, and *πλαστικός*, 'forming.' The operation for restoring a lost ear.

OTOPLASTRUM, *Otemplastrum*.

OTOPYRRHŒA, *Otitirrhœa*.

TORRHAG'IA, from *ous*, *otos*, and *ρην*, 'rupture.' Bleeding from the ear or ears.

TORRHŒUMATIS'MUS, from *ous*, *otos*, and *ρευματισμος*, 'rheumatism;' *Otal'gia rheumat'ica*. Rheumatic ear-ache.

TORRHŒA, *Otitirrhœa*—o. *Cerebral*, see *Otitirrhœa*—o. *Interna*, see *Otitirrhœa*—o. *Purulenta*, *Otitirrhœa*.

TOSCOPE, *Otoscop'ium*, from *ous*, *otos*, and *σκοπη*, 'examination.' An instrument for examining the condition of the ear. An elastic stethoscope, the ends of which are tipped with ivory—one to be inserted into the meatus of the patient, and the other applied to the ear of the examiner.

TOT'OMY, *Ototon'ia*, from *ous*, *otos*, and *τεμνειν*, 'to cut.' The part of practical anatomy which teaches the mode of dissecting and preparing the ear.

OTTO OF ROSES, see *Rosa centifolia*.

OUACHITA SPRINGS, see *Arkansas*, mineral waters of.

OUIË, *Audition*.

OULA, *Gingivæ*.

OULE, *Cicatrix*.

OULTIS, *Ullitis*.

OULORRHAGIA, *Ulorrhagia*.

OUNCE, *Un'cia*. A weight equal to the 16th part of a pound avoirdupois, the 12th of a pound troy. It is composed of 8 drachms. See *Weights and Measures*.

OURAQUE, *Urachus*.

OURARI, *Curare*.

OUREMA, *Urine*.

OURLES, *Parotis*, *Cynanche parotidæa*.

OURON, *Urine*.

OUS, genitive *otos*, *ωτος*, *Ear*.

OUTHAR, *Mamma*, *Uterus*.

OUTRE-MER, *Lapis lazuli*.

OUVERTURE CADAVERIQUE, *Autopsia cadaverica*.

OVA GRAAFIANA, *Folliculi Graafiani*—o. *Nabothi*, *Nabothi glandulæ*.

OVAIRE, *Ovarium*.

OVAL, *Ova'lis*, *Oö'des*, *Oöi'des*, *Ova'tus*, (F.) *Ovale*, from *ωον*, *ovum*, 'an egg.' Egg-shaped; elliptic. That which is round and oblong like an egg.

OVALÈ FORA'MEN, *Foramen oö'des*, (F.) *Troan ovale*. The foramen obturatorium; also, the foramen in the inner paries of the middle ear, which opens into the vestibule; the foramen in the sphenoid bone, through which the third branch of the fifth pair issues from the cranium; and the aperture, in the fœtus, between the auricles of the heart. See *Botal Foramen*.

OVALIS FOSSA, *Fovea ova'lis*, *Val'vula seu Vestig'ium Foram'nis ovalis*, is a depression observed in the right auricle of the heart, in the septum, which separates it from the left auricle. It has thick and strong edges, at its upper and fore part, called *Colum'næ foram'nis ovalis*, *Isthmus seu An'nulus Vieussè'nii*, *An'nulus seu Lin'bus fossæ ovalis*: in the fœtus called *An'nulus foram'nis seu fossæ ovalis*. The fossa ovalis, in the adult, replaces the inter-auricular aperture in the septum auricularum of the fœtus.

OVALBUMEN, *Albumen ovi*.

OVARIAN, *Ova'rial*, *Ovaria'nus*, (F.) *Ovarien*, *Ovarique*; from *ovarium*, *ωαριον*, 'the ovary.' Relating or belonging to the ovary—as *Ovarian pregnancy*.

OVARIAN ARTERY, *Spermatic artery*—o. *Nerves*, *Spermatic plexus of nerves*—o. *Pregnancy*, see *Pregnancy*, *ovarian*—o. *Veins*, *Spermatic veins*—o. *Vesicles*, *Folliculi Graafiani*.

OVARIOTOMY, *Oariotomy*.

OVARISTS, *Ovists*. Same etymon as *Ovarian*. Those physiologists who think that the phenomena of generation, in the human species and in every species of animal, result from the development of the ova or ovula of the female, merely incited by the male. Not many of the physiologists of the present day can be classed among the ovarists.

OVARITIS, *Oaritis*.

OVARIUM, *Diminutive of ωον, ovum*, 'an egg.' The *O'vary*, (Sc.) *Eggbed*; *Testis mulie'bris seu femine'us*, *Oa'rion*, *Ooph'oron*, *Gynoa'rium*, *Vesica'rium*, (F.) *Ovaire*. The ovaries are the organs in which the ova are formed in oviparous animals. By analogy, the name has been given to the organs which the ancients called the *testicles* of the female. They are two ovoid bodies, almost as large as the testicles in men, placed on each side of the uterus, between the Fallopian tube and round ligament, and in the substance of the broad ligament. Their outer extremity gives attachment to one of the projections of the fimbriated extremity of the Fallopian tube; and the internal is fixed to the uterus by a small ligamentous cord, called *Ligamentum rotundum ova'rii*, *Ligament of the Ovary*. The ovaries are composed of a very close, spongy texture—*stroma*,—and of small vesicles—*Folliculi Graafiani*,—filled with a clear fluid: these vesicles contain ovules, which detach themselves from the ovarium before and after fecundation, and are carried into the cavity of the uterus by the Fallopian tube.

OVARIUM TUMIDUM, *Oarioncus*—o. *Nabothi*, *Nabothi glandulæ*.

OVATUS, *Oval*.

OVER-EATING, **COLIC FROM**, *Colica crapulosa*.

OVERO BUTUA, *Pareira brava*.

OVICAPSULE, see *Folliculi Graafiani*.

OVIDUCT, *Tube*, *Fallopian*.

OVIDUCTUS MULIEBRIS, *Tuba Fallopiana*.

OVIG'ERUS, *O'viger*, *Ovig'erus*; from

ovum, 'an egg,' and *gero*, 'I bear.' Containing or producing ova or eggs.

O VIPARITÉ, see *Oviparous*.

O VIP'AROUS, *Ovip'arum*, (F.) *Ovipare*; from *ovum*, 'an egg,' and *pario*, 'I bring forth.' An epithet applied to animals which are hatched from eggs outside of the body. The condition may be termed *Ovip'arousness*, (F.) *Oviparité*. See *Generation*.

O VIPAROUSNESS, see *Oviparous*.

OVISAC, see *Folliculi Graafiani* — o. Tunic of the see *Folliculi Graafiani*.

O VISTS, *Ovarists*.

O VOLOGY, *Oologia*.

O VO-VIVIP'AROUS, (F.) *Ovo-vivipare*, from *ovum*, 'an egg,' *vivus*, 'living,' and *pario*, 'I bring forth.' *Oviparous* animals, whose ova are hatched within the mother,—vipers, for example. See *Generation*.

O VULA GRAAFIANA, *Folliculi Graafiani* — o. *Nabothi*, *Nabothi glandula*.

O'VULAR, *Ovulo'ria*; from *ovulum*, 'an ovule.' Relating or belonging to the ovule.

O VULA'TION; from *ovulum*, diminutive of *ovum*, 'an egg.' The formation of ova in the ovary, and the discharge of the same. Also, the development of the embryo from the egg.

SPONTANEOUS OVULATION, (F.) *Ovulation spontané*, is the spontaneous formation and discharge of ova which takes place in the female of the mammalia. See *Heat*.

O VULE, *Ovulum*.

O VULINE, *Decidua reflexa*.

O'VULUM, *O'vule*; diminutive of *ovum*, 'an egg.' A small egg. That which has the appearance of a small egg. See *Ovum*.

O VUM, *ov*, *Ovin*, an egg. The eggs of poultry are chiefly used as food. The different parts are, likewise, employed in medicine. The shell, *Aurantium*, *Aurantium*, (F.) *Coque* ou *Coquille d'œuf*, calcined, is esteemed an absorbent. The *Oil of the egg* is emollient, and is used, externally, to burns and chaps. The *Yolk or Yell of the egg* — *Vitel'um* seu *Vitel'us ovi*, *Lee'thous* — renders oils, &c., miscible with water. Eggs, when light boiled, are easy of digestion; but, when very hard-boiled or fried, they are more rebellious.

Egg Brandy is made by taking of *Brandy* f $\frac{3}{4}$ iv; *Cinnamon water*, f $\frac{3}{4}$ iv; the yolks of two eggs; *Sugar*, $\frac{3}{4}$ ss; and *Oil of cinnamon*, gtt. ij. Mix the yolks of the eggs first with the water, the oil and the sugar, stirring constantly. Then add the brandy little and little, until a smooth fluid is formed. It is an agreeable mode of giving brandy in adynamic states.

In *Pharmacy*, *white of egg*, which consists chiefly of albumen, is used for clarifying syrups, &c. *Yolk of egg*, (F.) *Jauve d'œuf*, beaten up with warm water and sugar, and aromatized with orange-flower water, forms an emulsion, which is emollient, and known under the name *Lait de poule* or *chicken's milk*.

Anatomists give the name *Ova*, *O'vula*, *O'vules*, (F.) *œufs*, to round vesicles, containing a humour similar to the yolk of egg, which are situate in the ovaries of the female, and, when fecundated, constitute the rudiments of the fœtus. During gestation, the embryo and its enveloping membranes retain the name *Ovum*, (F.) *œuf*. The changes induced in the mammalia after impregnation greatly resemble those in the bird.

O VUM, *Testicle* — o. *Hystericum*, see *Clavus hystericus*.

O XALAS SUBPOTASSICUS, *Potass*, *oxalate* of.

O XALAT'IC, *Oxalat'icus*. Relating to *oxalates*: hence *Oxalat'ic* or *Oxalic acid Diath'esis*

is the habit of body which favours the formation and deposition of oxalates from the urine.

O XAL'IC ACID, *Acidum oxali'num* seu *sacchari'num* seu *hydro-carboni'um* seu *acetosel'la*, seu *oxal'icem* seu *sac'chari*, *Acid of sugar* or of *sorrel*, *Car'bonous acid*, from *ὄζαλις*, 'sorrel.' An acid found in sorrel. It crystallizes in long, colourless, quadrangular prisms, and is generally found, in nature, united with lime or potassa. It has been proposed, in a diluted state, as a refrigerant, but it is unnecessary: and, besides, in quantity, it is a virulently acrid poison. It is largely employed for cleaning boot-tops; and, as it strongly resembles the sulphate of magnesia, has often been taken for it. Several fatal cases are, indeed, on record. For its antidotes, &c., see *Poison*.

O XALIC ACID DIATHESIS, see *Oxalatic*.

O XALIDE, *Oxalis acetosella*.

O XALIS ACETOSA, *Rumex acetosus*.

O X'ALIS ACETOSEL'LA, *O. America'na*, *Οξυς alba*, called from *ὄζυς*, 'acid,' owing to the sharpness of its juice. The systematic name of the *Woodsorrel*, *Cuckowbread*, *Sour Tref'oil*, *White sorrel*, *Mountain Sorrel*, *Trifo'lium acetosellum*, *Oxitriphy'llum*, *Lujulo*, *Allelu'ja*, *Acetosel'la*, *Oxyphy'llon*, *Oxytriphy'llon*, *Pavia cu'culi*, (F.) *Suelle*, *Oxalide*, *Pain a Cuneon*, *Alleluia*. Ord. *Oxalidacæ*. *Sec. Syst.* Decandria Decagynia. This plant has a gratefully acid taste, and is used in salads. It has been esteemed refrigerant, antiscorbatic, and diuretic.

O XALIS AMERICANA, *O. acetosella*.

O XALIS STRICTA, *Yellow wood sorrel*; indigenons, has similar virtues.

O XALIS TUBEROSA, *Oca*. A tuberous plant, whose oval-shaped root is used as food by the Peruvians. It is watery, has a sweetish taste, and is much liked.

O XALUM, *Potass*, *oxalate* of.

O XAL'MÈ, from *ὄζυς*, 'acid,' and *ἄλις*, 'salt.' A mixture of vinegar and salt.

O XALU'RIA, *Urine*, *oxalic*.

O XEL'E'ON, from *ὄζυς*, 'acid,' and *ἐλαιον*, 'oil.' A mixture of vinegar and oil, used as a condiment.

O X EYE, *Helenium autumnale* — o. *Gall*, *Bile* of the ox.

O XÉOLÉ, *Acétolé*.

O XICÈDRE, *Juniperus oxycedrus*.

O XID, *Oxyd*.

O XIDATION, *Oxydation*.

O XIDE, *Oxyd*.

O XIDUM, *Oxyd*, see *Oxydum*.

O X'INES, *ὄζυς*, (*ovos*.) from *ὄζυς*, 'acid.' Wine already sour, but not yet vinegar.

O XITRIPHYLLUM, *Oxalis acetosella*.

O X'ODE, *Oxyd*.

O XODES, *Acidulous*.

O XOIDES, *Acidulous*.

O XOS, *Aceticum acidum*, *Acetum*.

O XTER, *Axilla*.

O XURE, *Oxyd*.

O XYA, *Fagus sylvatica*.

O XYACANTHA, *Mespilus oxyacantha*.

O XYACANTHA GALEA, *Berberis*, *B. vulgaris*, *Spina œ'ida*, *Crespi'na*, (F.) *Épine vinette*, *Vinettier*. *Family*, *Berberidæ*. *Sec. Syst.* Hexandria Monogynia. The *Barberry*. The fruit of the berries, *Berberis*, is gratefully acid, and moderately astringent. By preparing an alcoholic extract of the root and adding water to it, a pulverulent brown substance is thrown down, which, when dissolved in alcohol and evaporated, yields the bitter principle, *Berberin*, which is an excellent stomachic in the dose of 2, 5, or 10 grains.

The American *Barberry*, *Berberis Canadens'*

sis, Pipperidge Bush, Souberry, differs slightly from the European. It flourishes on mountains and hilly districts from Canada to Virginia.

OXYÆSTHESIA, Hyperæsthesis.

OXYAPHIE, Hyperaphia.

OXYAPHIA, Hyperaphia.

OXYBAPHION, see Acetabulum.

OXYBOLIA, from *oxus*, 'quick,' and *βολη*, 'ejection.' Too rapid emission of sperm.

OXYCEDRE, Juniperus oxycedrus.

OXYCEPHALIA, 'Sugar-loaf head,' from *oxus*, 'sharp,' and *κεφαλη*, 'head.' Monstrosity in which the head is peaked like a sugar-loaf.

OXYCOCCOS, Vaccinium oxycoccus — o. Palustris, Vaccinium oxycoccus.

OXYCRATE, *Oxycratum*, from *oxus*, 'acid,' and *κρω*, 'I mix;' *Posca*, *Phusca*. A mixture of vinegar and water; frequently used in medicine as a refrigerant and antiseptic.

OXYCROCEUM EMPLASTRUM, from *oxus*, 'acid,' and *κροκος*, 'saffron.' A plaster, composed of saffron, pitch, colophony, yellow wax, turpentine, galbanum, gum ammoniac, myrrh, olibanum, and mastic. It was employed as a strengthening plaster.

OXYCUM, Oxygen.

OXYD, *Oxid*, *Oxide*, *Oryde*, *Ox'ydum*, *Ox'idum*, (F.) *Oxyde*, *Oxide*, *Oxure*, from *oxus*, 'acid.' A combination, not acid, of a simple body with oxygen.

OXYD, CALCULOUS, Oxyd, cystic — o. Vesical, Oxyd, cystic.

OXYD, CYSTIC, *Cal'culous* or *Ves'ical oxyd*, *Cystine*, *Nephritic*, *Scor'dosmine*. A species of urinary calculus, having the shape of confused, yellowish, semi-transparent, insipid, very hard crystals. When distilled, it furnishes subcarbonate of ammonia, like all nitrogenized matters. It dissolves in the nitric, sulphuric, phosphoric, and oxalic acids.

OXYDATION, *Oxyda'tio*, *Oxida'tion*, *Oxygenation*. The action of oxidizing a body; that is, of combining it with oxygen; a combination from which results an oxyd.

OXYDE, Oxyd.

OXYDE D'ANTIMOINE SULFURÉ, Oxydum stibii sulphuratum — o. *Gris* ou *noir de Mercure*, see Hydrargyri oxydum cinereum.

OXYDERCIA, *Oxydor'cia*, *Visus a'cies*, from *oxus*, 'quick,' and *δερκω*, 'I see.' Sharpness of vision.

OXYDERCICUS, *Oxyder'ces*. A medicine which sharpens the sight.

OXYDORCIA, Oxydercia.

OXYDUM, Oxid — o. Antimonii cum phosphate calcis, Antimonial powder.

OXYDUM FERRI NIGRUM, *Ferri ox'idum nigrum*, *Black oxyd of iron*. The scales, which fall from iron, when heated, consist of iron, combined with oxygen. They have been used like the chalybeates in general. The Edinburgh Pharmacopœia has a *Ferri ox'idum nigrum*, made by precipitating, by ammonia, a solution of the mixed sulphates of protoxide and sesquioxide of iron. An analogous preparation is in the Dublin Pharmacopœia, under the name *Ferri ox'ydum magneticum*, *Magnetic oxide of iron*, *Mart'ial Ethiops*.

OXYDUM FERRICUM CRYSTALLIZATUM NATIVUM, Hematites — o. Hydrargyri completum, Hydrargyri nitrico-oxydum — o. Hydrargyricum, Hydrargyri nitrico-oxydum — o. Hydrargyricum præparatum, Hydrargyri oxydum cinereum — o. Hydrargyrosium, Hydrargyri oxydum cinereum.

OXYDUM STIBII SULPHURATUM, *Hepar antimoni*, *Crocus metallo'rum* seu *antimoni*, (F.) *Oxyde d'antimoine sulfuré*, *Foie d'Antimoine*. This was formerly exhibited in the cure of fevers, but it is now rarely employed.

OXYDUM URICUM, Uric oxide.

OXYCOIA, Hyperacuisis.

OXYG'ALA, from *oxus*, 'sour,' and *γαλα*, 'milk.' Sour milk. The *Oxygala equi'num*, *Caracos'mos*, is reckoned amongst the delicacies of the Tartars.

OXYG'ARON, from *oxus*, 'acid,' and *γαρον*, 'garum.' A composition of garum and vinegar.

OXYGEN, *Oxygen'ium*, *Empyr'ical*, *Pure*, *Vital* or *Deiphlogis'ticated air*, *Oxyg'enes*, *Oxygenum*, *Princip'ium oxyg'eanus* seu *oxygenet'icum* seu *acidif'icans* seu *ac'idum*, *Elementum acidif'icum*, (F.) *Oxygène*, *Air du feu*; from *oxus*, 'acid,' and *γεννω*, 'I engender,' that is, *generator of acids*; and such it was believed to be, *exclusively*, at the period when the name was given to it. This is now known not to be the case. Oxygen is largely distributed in nature. It exists in the air, in water, in several acids, in all the oxyds, and in vegetable and animal substances, &c. It is obtained by decomposing the peroxyd of manganese or the chlorate of potassa by heat in close vessels. Although oxygen, in the state of admixture in which it is found in the atmosphere, is of vital importance, it cannot be respired in a pure state with impunity. Animals die in it long before the whole of the oxygen is consumed. The properties of oxygen seem to be stimulant. It increases the force and velocity of the pulse, and has, accordingly, been used in cases of chronic debility, chlorosis, asthma, serofula, dropsy, paralysis, &c. It requires to be diluted with from 10 to 20 parts of atmospheric air; one to two quarts being given during the day.

OXYGENATION, Oxydation.

OXYGÈNE, Oxygen.

OXYGÈNESSES. A name given by Baumes to diseases which he attributed to disordered oxygenation.

OXYGEUSIA, Hypergeusia.

OXYGLICUS, *Oxyg'lices*, from *oxus*, 'acid,' and *γλυκός*, 'sweet,' *Mulsa acida*, *Acetum mulsum dulcè*. Prepared by macerating and boiling honey-comb (from which the greater part of the honey has been taken) in water, and adding vinegar. An *Oxygel*.

OXY-HYDRO-CARBURETUM EX OLEO PYROXYLICO PARATUM, Creasote.

OXYLAPATHUM, Rumex acutus.

OXYMEL, *Apom'eli*, *Mel acetatum*, (F.) *Acétomel*, from *oxus*, 'acid,' and *μελι*, 'honey.' Honey and vinegar boiled to a syrupy consistence. (*Mel despinat*. ℥vj, *acid. acetic.* ℥vij, *aq. destillat.* f℥vij. Add the acid to the water and mix them with the honey previously heated.—Ph. L.) It is cooling;—externally detergent.

OXYMEL ÆRUGINIS, Linimentum Æruginis.

OXYMEL COLCHICI, *O. of meadow saffron*, (F.) *Orymel colchiqué*. (*Rad. colch. recent. in laminas tenues sectæ* ℥j, *aceti destillati* ℔j, *gentilis despinat.* pond. ℔ij. Macerate in a gentle heat for 48 hours. Press and boil the liquor with the honey to the thickness of a syrup; stirring with a wooden spoon. Ph. D.) It is expectorant and diuretic. Dose, f℥j, in gruel.

OXYMEL COLCHIQUE, *O. colchici* — o. of Meadow saffron, *O. colchici*.

OXYMEL SCILLÆ, *O. of squills*, *O. Scillicit'icum*, *Mel scillæ*. (*Mellis despinat.* Oiss, *aceti scillæ*, Oij. Boil in a glass vessel over a gentle fire to a proper consistence. Ph. U. S.) It is reputed to be expectorant and diuretic. Dose, f℥j to f℥ij.

OXYMEL OF SQUILL, *O. scillæ*.

OXYMYRRHINE, Ruscus.

OXYMYSINE, Ruscus.

OXYNGIUM, Adeps suillus.

OXYNITRON, from *oxus*, 'acid,' and *νιτρον*, 'nitre.' Name of a plaster, composed chiefly of vinegar and nitre, and recommended by Aëtius.

OXYNOSEMA, Acute disease.

OXYNOSOS, Acute disease.

OXYNUSOS, Acute disease.

OXYOPIA, *Gulero'pia, Hyperop'sia, Suffu'sio exalt'raus, Acies visus*, from *oxys*, 'quick,' and *opi'*, 'sight.' Excessive acuteness of the sense of sight. Instances have occurred where persons could see the stars in the day time. The cause is seated in great sensibility of the retina. The term has been used synonymously with nyctalopia.

OXYSPHRE'SIA, *Oxyosphra'sia*, from *oxys*, 'acute,' and *osphra'sis*, 'smell. Excessive acuteness of the sense of smell.

OXYPHLEGMA'SIA, *oxuphlegmasia*, (*oxys*, 'acute,' and *phlegmasia*.) *Acu'ta et ve'hemens inflammatio*. A violent inflammation.

OXYPHENICON, Tamarindus.

OXYPHONIA, *Vox acu'ta*; from *oxys*, 'sharp,' and *phona*, 'voice'; *Parapho'nia clangens* seu *ulcerosa*, *Clangor, Vox clangens, Leptopho'nia*. A shrill and squalling voice, — frequently, a symptom of morbid affection of the larynx.

OXYPHYLLON, *Oxalis acetosella*.

OXYPODIA, see *Kyllosis*.

OXYPROTEIN, see *Corium phlogisticum*.

OXYREG'MIA, *Ructus ac'idus*, from *oxys*, 'sour,' and *regyua*, 'I belch.' Acid eructation.

OXYRIA RENIFORM'IS, *Rumex dig'yanus, Boreal sourdock, Mountain Sorrel, Welsh sorrel*. A plant, *Ord. Polyganaceæ, Sex. Syst. Diandria Digynia*, which grows in the northern parts of America and Europe; blossoming in the spring. It possesses the same properties as *Oxalis acetosella*.

OXYRRHOD'INON, *Acetum rosa'tum*, from *oxys*, 'acid,' and *rhodon*, 'a rose.' A composition of vinegar and roses. (*Ol. rosat.* $\frac{3}{j}$, *acet. rosat.* $\frac{3}{j}$.) Used as a liniment in herpes and erysipelas.

OXYS, Acid, Acute — o. Alba, *Oxalis acetosella*.

OXYSAC'CHARUM, from *oxys*, 'acid,' and *σικχαρον*, 'sugar.' A mixture of sugar and vinegar. It was called *Oxysac'charum vomiti'vum*, when it held in solution the glass of antimony; and *Oxysac'charum scillit'icum*, when it contained squills.

OXYSAL DIAPHORET'ICUM AN'GELI SALE. A preparation of Angelo Sala. Acetate of potass exposed to the atmosphere; and consequently fallen into a state of deliquium. — Orfila.

OXYTARTARUS, Potassæ acetas.

OXYTES, Acidities.

OXYTO'IA. Same etymon as the next. Rapidity of parturition.

OXYTOC'IC, *Oxyt'ocus*, from *oxys*, 'quick,' and *τακω*, 'I bring forth.' A medicine which promotes delivery.

OXYTRIPHYLLON, *Oxalis acetosella*.

OXYURE VERMICULAIRE, *Ascaris vermicularis*.

OXYURIS VERMICULARIS, *Ascaris vermicularis*.

OYSTER GREEN, *Ulva latissima* — o. Root, *Tragopogon* — o. Shells, *Ostreæ testæ* — o. Prepared. *Testa præparata*.

OZÆNA, *Coryza enton'ica seu purulen'ta seu ozæna seu ulcero'sa seu virulen'ta seu mali'fua, Pyorrhæ'a nas'al'is, Entozæ'na, Rhiu'tis ulcero'sa, Ulcus na'rinni fetens*, from *ozō*, 'I smell of something.' (F.) *Ozène, Puna'isic*. An affection of the pituitary membrane, which gives occasion to a disagreeable odour similar to that of a crushed bed-bug: hence the name *Punais*, by which the French designate one labouring under ozæna. It is, sometimes, owing to caries of the bones; but is, perhaps, most frequently dependent upon syphilitic ulceration of the pituitary membrane, with or without caries of the bones of the nose.

OZÆNA BENIGNA, *Coryza, chronic*.

OZE, Breath, offensive.

OZEMUN, Albumen.

OZÈNE, Ozæna.

OZONE: same etymon as *Ozæna*. The powerfully odorous matter produced when a current of ordinary electricity passes from pointed bodies into the air. — Schönbein. It is presumed to be a peculiar modification of oxygen; and its varying quantity in the atmosphere is supposed to affect the health of man.

Air containing ozone is said to be *ozonized*.

P.

P. A contraction of *Pugillus*.
 P. E. A contraction of *Partes æquales*.
 P. P. A contraction of *Pulvis patrum*.

See Abbreviation.

PAB'ULUM, *Trophæ, Phorbè, Alimentum, Nutrim'entum*. Food, aliment. The animal heat and animal spirits — unmeaning terms — were formerly considered the *Pabulum vite*.

PACAY, *Prosopis dulcis*.

PACCHIO'NI, GLANDS OF, *Pacchio'nian Bodies, Glandulæ Duræ Matris seu duræ Menin'gis, Tubercula parva seu Corpora glandifor'mia duræ matris*, (F.) *Glandule Pacchio'ni, Granulationes cérébrales*. Small, whitish, or yellowish bodies, sometimes separate, at others united like a bunch of grapes, which are observed in several parts of the dura and pia mater. They receive vessels, but apparently no nerves. Their texture and uses are unknown. A considerable number is observed in the longitudinal sinus, covered by the internal membrane.

PACHÆ'MIA, *Pachyæ'mia, Pachæ'ma, Pachyæ'mo*, from *παχυς*, 'thick,' and *αἷμα*, 'blood. Too great thickness of the blood.

PACHEABLEPHAROS'IS, *Pacheableph'ara, Pachybleph'aron, Pachyblepharosis, Pachy'tes*, from *παχυς*, 'thick,' and *βλεφαρον*, 'an eyelid.' A name given, by some authors, to a thickening of the eyelids, produced by tubercles or excrescences formed on their margins. It is the same affection as that which Sauvages designates *Calligo à Pacheablepharosi*.

PACHETOS, see *Laqueus*.

PACHULOSIS, *Pachylosis*.

PACHYÆMIA, *Pachæmia*.

PACHYBLEPHARON, *Pacheablepharosis*.

PACHYCHOL'IA, from *παχυς*, 'thick,' and *χολη*, 'bile.' Morbid thickness of the bile.

PACHYDERMATOCE'LE, from *παχυς*, 'thick,' *δερμα, δερματος*, 'skin,' and *κηλη*, 'a tumour. A disease of the dermoid tissue, apparently congenital, which increases from a small mole or

spot, at times to the size and appearance of a relaxed and very emaciated mamma.—V. Mott.

PACHYLO'SIS. *Pachulosis*, from *παχυσ*, 'thick.' An inordinate production of the epidermis dependent upon hypertrophy of the papillæ of the skin.—E. Wilson.

PACHYNTSIS, Polysarcia adiposa.

PACHYNTICA, Incrassantia.

PACHYSMUS, Polysarcia adiposa.

PACHYTES, Pachebelepharosis.

PACINIAN CORPUSCLES, see Corpuseles.

PACKING, OF THE HYDROPATHISTS;
Émouillage.

PACKWAX, see Nucha.

PAD, (S.) *Pajado*, from *paja*, 'straw' [?]; *Plumaceolus*, *Pulvilus*, *Pulvinulus*, *Parvum pulvinar*—*a cushion, a little cushion; a junk*; (F.) *Coussinet*. A small bag, filled with feathers, wool, hair, bran, chaff, &c. It is used to compress or support parts. In the treatment of certain fractures, soft pads or cushions, called by the French *Remplissages*, are placed between the splints and the fractured limb, in order that the prominent parts may not be chafed by the splints.

PADDIE, see *Oryza*.

PADDY, see *Oryza*.

PADNOON, Bit noben.

PAD'UA, MINERAL WATERS OF. Near Padua, in Italy, there are several thermal sulphureous springs, the hottest of which is 188° Fahr. The chief establishments are Abano, Battaglia, and Montegrotto.

PADUS, *Prunus padus*—*p. Avium*, *Prunus padus*—*p. Lauro-cerasus*, *Prunus lauro-cerasus*.

PÆDAN'CHONĒ, from *παις*, *παῖδος*, 'a child,' and *αγγω*, 'I strangle'; *Angina Sicca*. Name of a fatal species of cynanche, mentioned by M. A. Severinus; probably the *Cynanche Trachealis*, or *Cynanche Maligna*.

PÆDARTHROCACE, *Spina ventosa*.

PÆDATROPH'IA, *Atrophia infantilis*, *Marsasmus lactantium*, from *παις*, *παῖδος*, 'a child,' *a*, privative, and *τροφη*, 'nourishment.' Atrophy of children. *Tabes mesenterica*.

PÆDATHROPHIA GLANDULOSA, *Scrofula*.

PÆDERAST'IA, *Pædogogium*, *Pædica'tio*, *Cinæ'dia*, from *παις*, *παῖδος*, 'a boy,' and *ερος*, 'love.' The love of boys. A disgraceful passion, common in ancient times, but now unknown. These terms are likewise applied to the crime of sodomy.

PÆDEROTA VIRGINICA, *Leptandra virginica*.

PÆDENCÉPHALIE, *Hydrocephalus internus*.

PÆD'IA, *παιδεία*, *Educat'io infantum*. The bringing up or education—physical as well as moral—of children.

PÆDIATR'IA, *Pædiat'rica*, *Pædiat'rics*, from *παις*, *παῖδος*, 'a child,' and *ιατρεία*, 'medical management.' Treatment of the diseases of children.

PÆDICATIO, *Pæderastia*.

PÆDICTERUS, *Icterus infantum*.

PÆDOBAROMACROMETER, *Baromacrometer*.

PÆDOGOGIUM, *Pæderastia*.

PÆDOMETER, *Baromacrometer*.

PÆDON'OSUS, from *παις*, *παῖδος*, 'a child,' and *ωσος*, 'disease.' A disease of childhood.

PÆDOPHLEBOTOM'IA, from *παις*, *παῖδος*, 'a child,' *φλεψ*, 'a vein,' and *τομή*, 'incision.' *Venaesectio puerorum*. Bleeding performed on children.

PÆDOT'RIBES, *Min'ister Gymnas'tæ*, from *παις*, *παῖδος*, 'a child,' and *τρίβω*, 'I train.' In ancient gymnastics, the officer acquainted with all the prescribed exercises, and who carried them into effect, according to the direction of the superior.

PÆDOT'ROPHY, *Pædotroph'ia*, (F.) *Pédotrophie*, from *παις*, *παῖδος*, 'a child,' and *τροφή*, 'nourishment.' The part of hygiene, which concerns the nourishment of children.

PÆON, Physician.

PÆON'IA, *P. officina'lis* seu *mas'cula* seu *nermor'alis* seu *fen'ina* seu *lobata*, *Glycis'idē*, *Hemag'ogum*, *P'ony*, or *P'iony*, *male* and *female*. (F.) *Pivoine*, *Pione*, *Herbe Sainte-Rose*. From *Παων*, 'the god of physic.' The root, flowers, and seeds were long esteemed powerful medicines. They are feebly astringent and have been considered to be narcotic and antispasmodic. They have been given, particularly, in intermittent and epilepsy, but are not now used. The flowers are called *Rosæ benedictæ*, *R. re'giæ*.

PÆONICE, Medicine.

PÆONICUS, Medical.

PÆONIUS, Medical.

PÆOSYNE, Medicine

PAGAPOPLEX'IA, from *παγειν*, 'to nail fast,' and *αποπληξία*, 'apoplexy.' Apoplexy from cold.

PAGOS, *Peritonæum*.

PAIDIA, Infancy.

PAIDION, Infans.

PAIGIL, *Prunula veris*.

PAIN, (old F.) *painere*, 'to torment;' Sax. *pinan*, 'to torture.' *Dolor*, *Algos*, *Alge'ma*, *Alge'da*, *Alge'sis*, *Ol'yunē*, *Ache*, (Sc.) *Hachse*, (Prov.) *Crazy*, *Wark*, (F.) *Douleur*. A disagreeable sensation, which scarcely admits of definition. It is generally symptomatic, and is called *acute*, (F.) *aiguë*, when very violent, as a *tinge*; *pungent*, (F.) *pongitive*, when it resembles that which would be produced by a sharp instrument run into the part: *heavy*, (F.) *gravative*, when attended with a sensation of weight; *tensive*, when the part seems distended: *lancinating*, when occurring in shoots: *lac'crating* or *tearing*, when the part seems to be tearing: *burning*, (F.) *brûlante*, when resembling that produced by a burn, &c.

PAIN, SUN, *Hemicrania*.

PAIN, see *Triticum*—*p. à Coucou*, *Oxalis acetosella*—*p. de Madagascar*, *Jatropha manihot*—*p. de Pourceau*, *Cyclamen*.

PAINS, AFTER, see *P. labour*.

PAINS, GNAWING, *Dolores roden'tes*. Pains resembling what might be produced by the gnawing of an animal.

PAINS, Labour pains, *Throes*, *Throws*, *Parturient'is dolores*, *Odin*, *Odis*, *Dolores ad partum*, *Torm'ina parturient'ium*, (F.) *Mal d'Enfant*, *Douleurs*. The uneasy sensations that accompany labour, and are owing to uterine contraction. The pains that precede actual delivery, and are simply employed in dilating the os uteri, are called *grinding*; those which extrude the child, *forcing*. Those which take place in the first days after delivery, and are employed in forcing away coagula, &c., are termed *After pains*, *Dolores seu Torm'ina post partum*, *D. puerperarum*, (F.) *Tranchées utérines*.

"To take a pain."—"To try a pain."—is to make an examination *per vaginam*, during labour, to discover its progress, character, &c.

The French term the pains which precede and announce labour, *monches*; those which accompany it, *douleurs*; and those which occur immediately afterwards, *tranchées ou coliques*.

PAINT, (from *pingere*, *pingtum*, 'to paint.' (I.) *pinto*, (F.) *peint*;) *Pigmentum*, *Fucus*, (F.) *Fard*. A name given to different substances, employed for embellishing the complexion or rendering the skin softer. The substances most commonly used for this purpose are:—the *Subnitrate of Bismuth*, (F.) *Blanc de fard*. A spirituous solution of benzoin, precipitated by water, and forming *Virgin's milk*, (F.) *Lait virginal*; the red or *rouge*

of the carthamus; *Spanish white*; the oxides of lead, tin, and mercury, vermilion, red saunders, &c. All paints may be said to be noxious. They injure the skin; obstruct perspiration; and, thus, frequently lay the foundation for cutaneous affections. See Cosmetic.

PAINT, INDIAN, *Hydrastis Canadensis*, *Sanguinaria Canadensis*—p. Yellow, *Hydrastis Canadensis*.

PALAD, Vertex.

PALESTRA, Gymnasium.

PALAS, Palate.

PALAME, Palm.

PALATAL, Palatine.

PALATE, *Palatum*, *Hyperö'a*, *Hyperö'um*, *Uranis'cos*, *Roof of the mouth*, *Fossa Palati'ua*, *Palatum stab'ile*, *Hard Palate*, (F.) *Palais*. The upper part of the cavity of the mouth; a kind of parabolic vault, formed by the two superior maxillary bones, and the two palate bones, covered with a thick and dense mucous membrane; bounded, before and at the sides, by the superior dental arch; and, behind, by the velum palati. A whitish line runs along the middle, from before to behind; at the anterior extremity of which is a tubercle corresponding to the inferior orifice of the anterior palatine canal. The arteries of the palate and corresponding gums proceed from the palatine, alveolar, infra-orbital, labial, and buccal branches. The veins follow a similar course. The nerves are given off from the palatine, facial, infra-orbital, superior dental, and from the naso-palatine ganglion.

PALATE, ARTIFIC'IAL, (F.) *Obturateur du Palais*. A plate of tortoise-shell, silver, &c., used to close a deficiency of the palate.

PALATE BONE, *Os Palati' seu basilla'rë*, (F.) *Os Palatin' ou du Palais*, is a small bone, of an irregular shape, situate at the posterior part of the nasal fossæ and palate. It seems formed by the union of two bony plates joined at right angles to each other; so that one is *inferior* and *horizontal*;—the other, *superior* and *vertical*. The *horizontal* or *palatine portion*, *Arch of the palate*, is quadrilateral. Its upper surface forms part of the nasal fossæ; the lower forms part of the palatine arch, and contains the inferior orifice of the *posterior palatine canal*. Its *anterior edge* is articulated with the palatine process of the superior maxillary bone; the *posterior* is free and sharp. It gives attachment to the velum palati, and presents an eminence, which, when joined with one on the opposite side, forms the posterior nasal spine. Its inner edge is articulated with the corresponding bone; its outer is confounded with the vertical portion. The *vertical* or *ascending portion* has the form of a long square. The inner surface forms part of the outer paries of the nasal fossæ. Its outer surface is unequal, and is articulated with the superior maxillary bone; behind, it presents a vertical groove, which forms part of the posterior palatine canal; and, above, a small free surface, which looks into the zygomatic fossa. Its anterior edge is united with the superior maxillary bone; the posterior is unequal, and rests on the internal ala of the pterygoid process. The angle, which it forms by uniting with the posterior edge of the horizontal portion, presents a very prominent pyramidal eminence, called the *tuberosity of the palate bone*. Its upper margin is surmounted by two eminences;—the one, anterior, called the *orbital process*;—the other posterior, the *sphenoid process*. These two processes are separated by an almost circular noteh, which the sphenoid bone forms into a foramen, called the *sphenoid palatine*.

This bone appears to be developed from a single point of ossification. It is articulated with

the sphenoid, ethmoid, the cornua sphenoidalia, superior maxillary bone, the inferior spongy bone, the vomer, and its fellow.

PALATE, CLEFT, see Harelip—p. Falling down of the, *Uvulitis*—p. Fissured, see Harelip—p. Hard, Palate—p. Soft, *Velum pendulum palati*.

PAL'ATINE, *Pal'atal*, *Palati'um*, *Pal'atic*, from *palatum*, 'the palate.' Relating or belonging to the palate.

PALATINE or PALATAL ARTERIES are two in number. They are distinguished into, 1. The *superior palatal* or *palatine*, *Palati'ua descendens* or *Pal'ato-maxillary*, which leaves the internal maxillary behind the top of the orbit; descends into the pterygo-maxillary fissure, and enters the posterior maxillary canal. Its branches are distributed to the velum palati and the nasal fossæ. 2. The *inferior* or *ascending palatine* or *palatal*, which is very small, and separates from the facial near its origin. It passes along the lateral and superior part of the pharynx, between the pillars of the velum palati, and divides into a number of ramusculi, which are distributed to the pharynx, the corresponding tonsil, the Eustachian tube, and the velum palati.

PALATINE CANALS or DUCTS. These are two in number. The *anterior*, *Ductus incisivus* seu *Naso'lo-palati'um*, *Incisive canal*, is situate at the anterior part of the palatine arch, and is formed by the two superior maxillary bones. It is single beneath, but opens above by two apertures, one into each nasal fossa. The foramen is called *Foramen incisivum* seu *Palati'um anterius* seu *Alveola'rë anterius* seu *cæcum osis maxilla'ris superioris*. The *posterior palatine canal* is situate at the posterior part of the palate. It is formed by the palate and superior maxillary bones, ascends between these two bones, and, in its course, gives rise to two or three small accessory palatine canals, which open above the tuberosity of the palate bone. It transmits the nerves and vessels which bear its name. The foramen is called, *F. Palati'um posterius* seu *Palato-maxilla'rë seu alveola'rë posterius*.

PALATINE MEMBRANE is the fibro-mucous membrane that lines the palate or roof of the mouth.

PALATINE or PALATAL NERVES, *Guttur'opalatinus* (Ch.), are three in number; and arise from the inferior part of the sphenopalatine ganglion. 1. The *great palatine*, *Palatin' inferieur* (Ch.), is situate anteriorly to the two others, and descends into the posterior palatine canal; gives a *nasal filament* and a *staphyline filament*, and is distributed on the palate. 2. The *middle palatine*, *Guttur'ale* (Ch.), which arises behind the preceding, enters one of the accessory palatine canals, and is distributed to the tonsils and velum palati. 3. The *little palatine nerve*, situate still more backward than the last, which loses itself by several filaments in the uvula, tonsils, and follicles of the palatine membrane.

PALATITE, Isthmitis.

PALATITIS, Uranisconitis.

PALATO-GLOSSUS, Glossostaphylinus.

PALATO-PHARYNGEUS, *Pharyngo-staphylinus*, *Staphylin'uo-pharyngicus*, *Thyro-pharyngo-staphylinus*, part of the *Hypero-pharyngicus*, (F.) *Palato-pharyngicus*, *Stylo-pharyngicus* (Ch.). A membranous muscle, broader at its middle than at its extremities, and situate vertically in the lateral paries of the pharynx and velum palati. It includes the peristaphylo-pharyngicus, pharyngo-staphylinus, and thyro-staphylinus of Winslow. When the two palato-pharyngei contract together, they depress the velum. They elevate and shorten the pharynx, and act principally in deglutition.

PALATO-PHARYNGIEN, *Palato-pharyn-*

geus — p. Salpingeus, Circumflexus — p. *Salpingien*, Circumflexus.

PALATOSTAPHYLINI, see Azygos muscle.

PALATUM FISSUM, Hyperochoasma, see Harelip — p. Mobile, Velum pendulum palati — p. Molle, Velum pendulum palati — p. Pendulum, Velum pendulum palati.

PALE, Pollen.

PALENESS, *Pallor*, *Och'rotus*, *Ochro'ma*, *Ochr'asis*, *Leuco'sis*, *Dealba'tio*, *Luror*, (F.) *Pâleur*. Whiteness of complexion. It appears to be owing to a diminution or alteration of the blood circulating in the capillary vessels, and is often a sign of disease.

PÂLES COULEURS, Chlorosis.

PALETTE (F.), *Pal'mula*, *Fer'ula*. An instrument of percussion. It has the shape of a spatula with a long handle; is made of very light, white wood, and has been proposed, by Mr. Percy, for what is called the *Massage*, a kind of pressure or kneading, exerted by the hand on the body and limbs, to excite the tone of the skin and subjacent tissues.

Palette also means a cup for bleeding; and the xiphoid cartilage [?].

PALETTE À PANSEMENT. A small splint of thin, scooped wood, having the shape of the hand, and used to support the hand in certain cases—when burnt, for example—in order to prevent the fingers from being deformed by the cicatrices.

PALETTE DE CABANIS. An instrument, invented by Cabanis of Geneva to draw out the extremity of the stylet when passed into the nose, in the operation for fistula lacrymalis. It is composed of two plates of silver, pierced with several holes, and movable on each other. To use it, the instrument must be carried into the nose, so that the holes of the two plates correspond. When the end of the stylet is received into one of these holes, it is pinched, by sliding one of the plates on the other, and is easily withdrawn.

PÂLEUR, Paleness.

PALI PLAGUE, see Plague.

PALICOU'REA CROC'EA, *Psychot'ria croc'ea*, *Order*, Cinchonaceæ, a native of the West Indies, is possessed, according to Von Mar-tius, of emetic properties.

PALICOU'REA MARCGRAA'VII, *Erra do rato*, *Gal-rania Vellozi*, a native of Brazil, is poisonous, and employed there to kill rats and mice.

PALICOU'REA OFFICINA'LIS, a native of Brazil, is reputed to be a powerful diuretic in small doses.

PALICOU'REA SPECIO'SA, *Goldshrub*, a native of New Granada and Brazil. The leaves are considered to be antisyphilitic. The decoction in large doses is poisonous.

PALILLO, *Campomanesia lineatifolia*.

PALIMPISSA, see *Pinus sylvestris*.

PALINCOTESIS, *Recrudescencia*.

PALINDROME, *Palindromia*.

PALINDROM'IA, *Palin'dromē*, from *παλιν*, 'again,' and *δρομος*, 'a course.' This word signifies, with some, a reflux of fluids from the exterior towards the interior; and, according to others, the relapse of an affection—the recurrence—*Recur'sio*, *Repetit'io*—of a paroxysm, or disease,—*Morbis recidi'vus*, *Morbi recur'sus*.

PALINGENESIS, *Regeneration*.

PALLA, *Pila*.

PALLAT, *Vertex*.

PALLA'TION, *Palliat'io*, from *palliare*, *palliatum*, 'to cover, mask;' from *pallium*, 'a mantle.' The act of palliating—that is, of causing the symptoms of a disease to mitigate, without

curing it. The medical art can frequently only moderate the symptoms of a disease, prevent it from making progress, prolong the days of the patient, and diminish his sufferings. This is *palliative treatment*, (F.) *Traitement palliatif*.

PALLIATIVE, *Palliat'ivus*, *Antipath'ic*, *Enantiopath'ic*, (F.) *Palliatif*. A remedy or mode of treatment, which only relieves a disease, without curing it. The *palliative treatment*—*Cura palliat'iva*, is placed in antithesis to the radical, *Cura radical'is*; see *Radical*.

PALLIDULUS, *Blafard*.

PALLIDUS MORBUS, *Chlorosis*.

PALLOR, Paleness — p. *Virginum*, *Chlorosis*.

PALM, *Palma*, *παλαμη*, *Vola*, *V. ma'ius*, *Plate'a*, *Thenar*, *Ages*, *Agos'tus*, *Poc'ulum*, *Pat'era*, *Suppelle'x* seu *Suppelle'ctile* *Diog'ennis*, (F.) *Paume* ou *Creux de la main*. The hollow or inside of the hand. It is limited, *without*, by the thenar eminence, which answers to the thumb; *within*, by the hypothenar eminence, which answers to the little finger; *above*, by the wrist-joint; and, *below*, by the four fingers.

PALM, GOMUTU, see *Toddy*.

PALMA CHRISTI, *Ricinus communis* — p. *Cocos*, *Cocos nucifera* — p. *Dactylifera*, *Date tree* — p. *Humilis*, *Musa paradisiaca* — p. *Indica vinaria secunda*, see *Toddy* — p. *Unguentariorum*, *Myrobalanus*.

PALMÆ U'TERI PLICA'TÆ, *Arbor vitæ uter'ius*, *A. uter'i viv'ificans*. The arborescent striæ in the interior of the cervix uteri.

PALMAIRE, *Palmar* — p. *Cutané*, *Palmaris brevis* — p. *Grand*, *Palmaris magnus* — p. *Grêle*, *Palmaris longus* — p. *Long*, *Palmaris longus*.

PALMAR, *Palma'ris*, (F.) *Palmaire*, from *palm*, 'the palm of the hand.' That which concerns the palm of the hand. The palm has, sometimes, been divided into three regions, called *palmar*. 1. The *external palmar region* corresponds to the thenar eminence. 2. The *internal palmar region* is formed by the hypothenar eminence; and, 3. The *middle palmar region* is the hollow of the hand, (F.) *Creux de la main*.

PALMAR APONEURO'SIS, *Palmar fus'cia*. A strong triangular aponeurosis, which arises from the inferior tendon of the palmaris brevis, and the anterior annular ligament of the carpus. It covers the whole palm of the hand, and adheres, somewhat strongly, to the skin of the part. The *palmar ligaments* are small, very numerous, fibrous fasciæ, which unite the different bones of the carpus and metacarpus.

PALMAR ARCHES, (F.) *Arcades* ou *Crosses palmaires*. The curved extremities of the radial and cubital arteries in the palm of the hand. There are two palmar arches:—the one, *cubital* or *superficial*,—*grande Arcade palmaire* of *Chaussier*, furnishes, at its convexity towards the fingers, the collateral arteries of the fingers, and the internal collateral of the thumb; the other, the *radial*, *profund*, or *deep-seated*,—*petite Arcade palmaire* of *Chaussier*, is deep in the palm of the hand beneath the tendons of the flexor muscles of the fingers. It gives some small branches only to the surrounding parts. The palmar veins accompany the corresponding arteries.

PALMAR ARTERIES, see *Palmar arches* — p. *Fascia*, *P. aponeurosis*.

PALMAR MUSCLES. These are three in number. 1. *Palma'ris Magnus*, *Flexor carpi radia'lis*, *Radia'lis intern'us*, (F.) *Épitrochlo-métacarpien* (Ch.), *Palmaire grand*, *Radial antérieur*. A long fusiform muscle, which passes obliquely from the inner tuberosity of the humerus to the upper extremity of the second metacarpal bone. It bends the hand. 2. *Palmaris longus*, *Latescen'tis chordæ*, *Ulna'ris grac'ilis*, (F.) *Épitrochlo-carpi-pal-*

maire (Ch.), *Palmaire long*, *P. grêle*. This muscle is situate on the inner side of the last. It is very slender, and passes from the inner tuberosity of the humerus to the anterior annular ligament of the carpus, and to the palmar aponeurosis, which it seems to form by the vanishing of its fibres. It stretches the palmar aponeurosis, and bends the hand. 3. *Palmaris Brevis*, *Caro quadrata*, *Carpia'na*, (F.) *Palmaire cutané*. A small, thin, quadrilateral muscle; situate before the thenar eminence. It passes from the annular ligament of the carpus to the integuments of the palm of the hand, which it wrinkles by its contraction.

PALMAR VEINS, see Palmar arches.

PALMARIS BREVIS, see Palmar museles — p. Longus, see Palmar museles — p. Magnus, see Palmar museles.

PALMETTO, SAW, *Chamærops serrata*.

PALMI-PHALANGIENS, Lumbricales manus.

PALMISTRY, Chiromancy.

PALMOSCOP'IA, from *παλμος*, 'palpitation,' and *σκοπεω*, 'I view.' Investigation of the beating of the heart and pulse. Prognosis from the beating of the heart and pulse.

PALMULA, Date, *Palette*.

PALMUS, Palpitation — p. Cordis, Palpitation — p. Plumbarius, Colic, metallic — p. Vomitus, Vomiting.

PALO DE CALENTURAS, Calenturas — p. de Vacea, Galactodendron utile — p. de Velas, Parmetiera cerifera.

PALOMMIER, Ganththeria.

PALOS DE CALENTURA, Cinehona.

PALP'ATION, from *palpare*, *palpatum*, (F.) *palper*, 'to feel.' The sense of touch. It is also used for the mode of exploring diseases by feeling or pressing upon the diseased organ. A delicate and discriminating touch — *tactus eruditus* — is important in the diagnoses of many morbid conditions.

PALPEBRA, supposed to be from *palpitare*, 'to palpitate,' owing to its frequent motion. [?] *Bleph'aron*, *Opev'culum* seu *Cōp'er'culum oculi*, *Eyelid*, (Prov.) *Eye-breek*, (Sc.) *Ee-winker*, (F.) *Paupière*. The eyelids are two movable vela, situate in front of the eye; which by their separation permit the organ to receive the impression of light, or by their greater or less occlusion protect it from the influence of too great light, or from the action of extraneous bodies. They are separated, above, from the forehead, by the eyebrows; and, below, are confounded with the cheeks. They are distinguished into *upper*, *Palpebra major* seu *superior*, *Epicor'lis* — and *lower*, *Palpebra minor* seu *inferior*, *Hypocor'lis*, *Hypocor'ium*, *Hypoc'ylinus*. The former is much broader and more movable than the latter. They are separated by a transverse cleft — *Fissu'ra palpebra'rum* — and their edges are thick, and furnished with the cilia or eyelashes. Supported by the tarsal cartilages, they unite at the extremities of the transverse diameter of the orbit, forming two angles, the innermost being called the *greater angle of the eye*, or *inner* or *greater cauthus*; the other, the *lesser*, or *external angle* or *cauthus*. They are formed, 1. Of a thin dermoid texture: 2. Of a muscular membrane, — a portion of the orbicularis: 3. Of a particular fibrous membrane: 4. Of the tarsi: 5. Of a mucous membrane, — a part of the tunica conjunctiva.

Their vessels and nerves are called Palpebral.

PALPEBRA INFERIOR EXTRORSUM FLEXA, Ectropion — p. Tertia, Valvula semilunaris.

PALPEBRÆ SUPERIORIS PRIMUS, Levator palpebræ superioris.

PALPEBRAL, *Palpebra'lis*, from *palpebra*, 'the eyelid.' That which belongs or relates to the eyelid.

PALPEBRAL ARTERIES are those distributed to the eyelids. They are two in number; an *upper* and a *lower*. The *former* arises from the ophthalmic, a little beyond the cartilaginous pulley of the greater oblique muscle, and descends towards the upper eyelid, over which it is distributed. The *latter* arises at the side of, and a little behind, the preceding, and sends its ramifications to the lower eyelid and the neighbouring parts. The palpebral veins have a similar arrangement; except that some of them open into the temporal and labial veins.

PALPEBRAL FLUX, PURIFORM. A puriform discharge, furnished by the glands of Meibomius, when inflamed; and to which Scarpa attributes fistula lacrymalis, in many cases.

PALPEBRAL LIGAMENTS are distinguished into *superior* and *inferior*. Some anatomists, with Winslow, have described, under this name, the fibrous layer which is attached, — on the one hand, to the outer part of the circumference of the orbit; on the other, to the tarsal cartilages.

PALPEBRAL NERVES, *Nerves of the eyelids*, arise, particularly, from the frontal and lachrymal branches; from the ophthalmic nerve of Willis; and from the facial, nasal, and infra-orbital branch of the superior maxillary nerve.

PALPEBRALIS, Orbicularis palpebrarum.

PALPEBRARUM APERIENS RECTUS, Levator palpebræ superioris — p. Duo musculi, Orbicularis palpebrarum.

PALPEBRATIO, Nictation.

PALPITATIO, Palpitation — p. Arteriarm, see Palpitation — p. Cordis trepidans, Cardiotromus.

PALPITATIO MEMBRORUM. A term used by Gaubius for involuntary shaking of the legs.

PALPITA'TION. *Palpita'tio*, *Palmus*, *P*. seu *Tremor Cordis*, *Palpita'tio* seu *Pulsa'tio Cordis*, *Vibra'tio Caud'i'aca* seu *Cordis*, *Cardiognus*, *Cardiopalmus*, *Subsultio*, *Clonus Pulpita'tio*, (Sc.) *Dunt*, *Dount*, (F.) *Palpitation*, *P. du Cœur*, from *palpitare*, *palpatum*, 'to throb.' A name given to the pulsations of the heart, when they become stronger, more extensive, or more sensible to the individual than ordinarily. Palpitations occur in a number of affections. They are, sometimes, owing to organic diseases of the heart — hypertrophy, inflammation, &c.; at others, to a disease in some other viscus; whilst, frequently, they are merely nervous.

PALPITATION is sometimes felt in the arteries, constituting *Palpita'tio Arterio'sa*.

PALPITATION DU CŒUR, Palpitation.

PALSIED, Paralytic.

PALSY, Paralysis — p. Bell's, Paralysis, Bell's — p. Histrionic, Paralysis, Bell's.

PALSY, LEAD, *Paral'ysis saturni'ua* seu *metal'lica*, *Molybdopa'resis*, (F.) *Paralysie saturniæ*, *Metal'lic Palsy*, *Painters' Palsy*. The paralysis of the upper extremities especially, induced by the poison of lead. Palsy of the intestines, thus induced, is called, by Piorry, *Acuterourvise saturniæ*.

PALSY, METALLIC, see Palsy, lead — p. Painters', P. lead — p. Shaking, Paralysis agitans — p. Trembling, Paralysis agitans.

PALSY WORT, *Primula veris*.

PALTA, *Persea gattissima*.

PALUDAL, Elodes.

PALUDAPIUM, *Apium graveolens*.

PALUDÉEN, Elodes.

PALUDOSUS, Elodes.

PALUS, Marsh, Penis — p. Sanctus, Guaiacum.

PALUSTRE, Elodes.

PAMBIOMA, *Pambiona*.

PAMOIION, *Syncope*.

PAMPINIFORM PLEXUS, *Corpus pampini-forme*.

PAMPINIFORME CORPUS, see Corpus pampiniforme.

PAMPLE'GIA, *Panplegia*, from *παν*, 'all,' and *πληγω*, 'I strike.' General paralysis. Palsy of the whole body.

PANACE'A, *πανακεια*, *Catholicon*, *Catholiconum*, from *παν*, 'all,' and *ακομα*, 'I cure.' *Universal'le remedium*, *Panchres'tos*. A pretended universal remedy. There is no such thing in existence.

PANACEA DUCIS HOLSATIE, Potassæ sulphas — p. Duplicata, Potassæ sulphas — p. Lapsorum, *Arnica montana* — p. Mercurialis, *Hydrargyri submurias* — p. Mercurii rubri, *Hydrargyri nitrico-oxidum* — p. Pectoris, *Glechoma hederacea* — p. Vegetabilis, *Crocus*.

PANACEE ANGLAISE, Magnesiæ carbonas.

PANADA, diminutive of Ital. *pane*, 'bread,' (Lat. *panis*.) *Panada*, *Panatel'la*. Bread, boiled in water to the consistence of pap. Sometimes administered to the sick.

SIMPLE BREAD PANADA may be made by putting any quantity of grated stale bread into enough water to form a moderately thick pulp; covering it up, and leaving it to soak for an hour; then beating it up with two tablespoonfuls of milk, and a small portion of refined sugar, and boiling the whole for ten minutes, stirring all the time.

PANAIS, *Pastinaca sativa*.

PANARIS, Paronychia.

PANARTIUM, Paronychia.

PANARIUM, Paronychia.

PANATA, *Panada*.

PANATELLA, *Panada*.

PANAX, see *Panax quinquefolium* — p. *Costinum*, *Pastinaca opoponax* — p. *Heracleum*, *Pastinaca opoponax* — p. *Pastinaca*, *Pastinaca opoponax*.

PANAX QUINQUEFOLIUM, *Aureliana* seu *Aralia Canadensis*, *Ginseng*, *Ninsing*, *Gensang*, *Red-berry*, *Five fingers*. Same etymon as *Panacea*. Family, *Araliaceæ*. *Sex. Syst.* Polyandria Monocia. This plant grows in North America. The root—*Panax* (Ph. U. S.)—*Radix ginseng*—is about the thickness of the little finger; an inch or two in length, often dividing into two branches; of a whitish-yellow colour; wrinkled on the surface, and of a compact, almost horny, texture. It has no smell, but a very sweet taste, combined with a slight degree of aromatic bitterness. It is much esteemed by the Chinese, who pay a high price for it. It is a gentle and agreeable stimulant.

PANAX SCHINSENG, *Asiat'ic Ginseng*, a native of Asia, has been usually confounded with the last. The root, *radix ninsi*, has like virtues.

PANBIO'MA, *Pambio'ma*, from *παν*, 'all,' and *βιος*, 'life.' The original animating principle. The general principle of life.

PANCHRESTOS, *Panacea*.

PANCHYMAGO'GUM, *Pan'tago'gon*, from *παν*, 'all,' *χυμος*, 'juice,' and *αγω*, 'I drive away.' A medicine which the ancients believed capable of purging away all sorts of humours.

PANCHYMAGOGUM MINERALE, *Hydrargyri submurias*.

PANCENOSUS, *Pandemic*.

PANCENUS (MORBUS), *Pandemic*.

PANCRATIUM, *Pancreas*.

PANCREAS, from *παν*, 'all,' and *κρεας*, 'flesh;' i. e. 'quite fleshy.' *Calli'reas*, *Pancreat'ium*, *Pan'creum*, *Lactes*, *Pulvi'nar ventri'culi*, *Totum carnosum*, *Gland'ula saliva'lis abdom'inis*, *Pancr'enē*, *Sweetbread*. A gland, deeply seated in the abdomen, and lying transversely on the vertebral column, between the three curvatures of the duodenum, behind the stomach, and to the right of the spleen. Its left extremity is called the tail of the pancreas; it is smaller than the

right, which is called the head. At its right portion, it has, almost always, a greater or less prolongation; called, by Winslow, and some others, the lesser pancreas, (F.) *Petit paneréas*, *Pancreas of Aselli*, *Pancreas minus*. The pancreas resembles the salivary glands in structure, and has been called the Abdominal Salivary Gland. It is composed of lobes and granulated lobules, distinct, and united by areolar tissue. From each of the granulations of these lobes arise the radicles of its excretory duct, which are very delicate, and united like veins. The duct itself, *Ductus Pancreat'icus* seu *Wirsung'ius*, *Pancreat'ic duct*, *Canal* or *Duct of Wirsung* or *Wirsungs*, (F.) *Canal pancréatique*, proceeds in a serpentine course through the substance of the organ; and when it has reached behind the second portion of the duodenum, it becomes free, and is of the size of a crow's quill. It opens at an acute angle into the choledoch duct, or proceeds close to it, opening separately into the duodenum. The *Pancreatic arteries* are very numerous and small. They proceed from the cœliac, splenic, superior mesenteric, right gastro-epiploic, coronaria ventriculi, and left capsular. Its veins open into the radicles of the vena porta; and, particularly, into the splenic and lesser mesenteric. Its nerves emanate from the solar plexus, and its lymphatics pass into ganglions, to which it gives its name. The pancreas secretes the *Pancreatic juice*, *Succus* seu *Liquor Pancreat'icus*, *Lympha Pancreat'is*, (F.) *Suc pancréatique*, which resembles the saliva. When this juice is mixed with amylaceous matters, it converts them into dextrin and glucose. Its great use appears, however, to be, to emulsify fatty matters by virtue of a peculiar albuminoid principle—*pancreatin*—coagulable by heat or alcohol, which it contains.

PANCREAS OF ASELLI, see *Pancreas* — p. *Minus*, see *Pancreas* — p. *Petit*, see *Pancreas* — p. *Second*, *Brunner's glands*.

PANCREATAL'GIA, from *pancreas*, and *αλγος*, 'pain.' Pain or disease of the pancreas.

PANCREATEMPHRAX'IS, from *pancreas*, and *εμφρασσω*, 'I obstruct.' Obstruction of the pancreas.

PANCREAT'IC, *Pancreat'icus*, (F.) *Pancréatique*. Same etymon as *Pancreas*. Relating to or affecting the pancreas.

PANCREATIC ARTERIES, see *Pancreas* — p. *Duct*, see *Pancreas* — p. *Juice*, see *Pancreas* — p. *Nerves*, see *Pancreas* — p. *Veins*, see *Pancreas*.

PANCREAT'IC SARCO'MA OF AB'ERNETHY, *Emphy'ma sarco'ma pancreat'icm*. A tumour, in irregular masses, connected by loose fibrous substance, like the irregular masses of the pancreas. Found in the areolar substance: but, more usually, in lymphatic glands, chiefly in the female breast.

PANCREATIN, see *Pancreas*.

PANCREATIT'IS, *Inflammat'io pancreat'is*, (F.) *Inflammation du Paneréas*, from *pancreas*, and *itis*, denoting inflammation. Inflammation of the pancreas;—an affection, the phenomena of which are not well known.

PANCREATOID, from *pancreas*, and *ειδος*, 'appearance.' *Pancreatoides*. A tumour resembling the pancreas in structure.

PANCREATON'CUS, from *pancreas*, and *ογκος*, 'a swelling.' Tumour of the pancreas.

PANCRENE, *Pancreas*.

PANCREUM, *Pancreas*.

PANDA'LEA, *Panda'lenm*. A kind of lozenge used by the Arabian physicians.

PANDALEUM, *Pandalea*.

PANDALITIUM, Paronychia.

PANDEMIC, *Pandemic*.

PANDEM'IC, *Pan'demy*, *Pande'mia*, *Morbus Pandem'ius* seu *Pande'mus* seu *Pance'nus*, *Pan-*

cœno'sus, (F.) *Pandémie*; from *παν*, 'all,' and *δῆμος*, 'people.' An epidemic which attacks the whole, or a great part, of the population.

PANDÉMIE, Pandemic.

PANDEMY, Pandemic.

PANDICULATIO, *Pandicula'tio*, *Scordine'-ma*, *Scordinis'mus*, *Clonus Pandicula'tio*, from *pandiculari*, (*pandere*, 'to stretch out,') 'to stretch as one awaking from sleep.' *Stretching*, *Italicæ*, (pl.) An action, which consists in elevating the upper limbs, and throwing the head and trunk backwards, at the same time that the lower limbs are extended. This series of motions of the extensor muscles is in some measure independent of the will, and is accompanied with yawning, which is equally involuntary. In the state of health, stretching occurs before and after sleep; especially when we are fatigued. It is also observed at the onset of certain paroxysms of fever, hysteria, &c.

PANDOCEUM, *Pandoch'ium*, *Pandoci'um*, from *παν*, 'all,' and *δέχομαι*, 'to receive.' An inn that receives all classes. A general hospital, or one that admits all cases.

PANDOCHIUM, Pandoceum.

PANDOCIUM, Pandoceum.

PANHIDROSIS, from *παν*, 'all,' and *ἵδρωσις*, 'sweating.' *Sudor universalis*. Sweating over the whole body.

PANHYPERÆMIA, Plethora.

PANIC D'ITALIE, Panicum Italicum.

PANICAUT, *Eryngium campestre*—p. *Martime*. *Eryngium maritimum*.

PANIC GRASS, ITALIAN, *Panicum Italicum*.

PANICUM DACTYLON, *Cynodon dactylon*.

PANICUM ITALICUM, from *panis*, 'bread,' *Ital'ian Panic Grass*, *Indiau Millet*, *Guinea Corn*, *Barba'does Millet*, *Mil'ium Ind'icum*, *Sorghum*, *Holcus Sorghum*, (F.) *Millet des oiseaux* ou à *grappes*, *Panic d'Italie*. *Nat. Ord.* Graminæ. The seed—*Mil'ii Sem'ina*—are much esteemed in Italy, being a constant ingredient in soups, and made into a variety of forus for the table.

PANICUM MILIACÆUM, *P. mil'ium*, *Common Millet*, *Milium*, *M. Pan'icum* seu *Esculent'um*, *Cenchrus*, *Cenchrus*, (F.) *Miliet ordinaire*, *Mil.* Millet-seed are esteemed a nutritious article of diet, and are often made into puddings.

PANICUM MILIUM, *P. miliaceum*.

PANIS CANICACEUS, see *Canicæ*—p. *Cibarius* seu *secundarius*, *Syncomistos*—p. *Cuculi*, *Oxalis acetosella*—p. *Porcinus*, *Cyclamen*.

PANIV'OROUS, *Paniv'orus*, from *panis*, 'bread,' and *oro*, 'I devour.' Subsisting on bread.

PANNI, Swathing clothes.

PANNICLE, Membrane.

PANNICULE CHARNU, *Panniculus carnosus*.

PANNICULUS, diminutive of *pannus*, cloth. A piece of fine cloth. *Pterygion*.

PANNICULUS ADIPOSUS, Cellular membrane.

PANNICULUS CARNO'SUS, *Ta'nica carno'sa*, *Muscular Web*, *Mantle*, (F.) *Pannicule charnue*, is a general covering found in the quadruped, and formed by a thin, subcutaneous muscle, which serves to move the skin. It exists only in certain parts of the human body,—as in the forehead, where it is formed by the occipito-frontalis; in the neck, by the platysma myoides; and, in the scrotum, by the cremaster muscle.

PANNICULUS CORDIS, Pericardium—p. *Hymenæus*, *Hymen*—p. *Virginalis*, *Hymen*.

PANNIKELL, Cranium.

PANNUS. A piece of cloth. This word has several other meanings, many of which are equivocal. It means a tent for a wound, and, also, an irregular nævus or mark on the skin.—Castelli. Modern ophthalmologists apply it to an

opaque and vascular condition of the anterior membrane of the cornea, almost invariably produced by the continuance of purulent or strumous ophthalmia, or by chronic inflammation of the cornea. This part becomes nebulous, covered with red vessels, and opaque. At times, the sclerotic conjunctiva undergoes a similar change to that which occurs in the corneal portion.

PANNUS HEPATICUS, *Chloasma*—p. *Lenticularis*, *Ephelides*.

PANOCHIA, Bubo.

PANOPHO'BIA, *Pantopho'bia*, *Paupho'bia*, *Pavopho'bia*, *Athym'ia*, *Pavor*, (F.) *Frayeur nocturne*, *Souci*; from *Παν*, 'the god Pan,' and *φοβος*, 'fear;' a panic or fear inspired by the god Pan, according to the opinion of the ancients. Others derive it, and with more probability, from *παν*, 'all,' and *φοβος*, 'fear.' This universal and groundless fear is morbid, and is a symptom of melancholy.

PANOPHTHALMITIS, from *παν*, 'all,' and *ophthalmitis*, 'inflammation of the eye.' Inflammation of the whole eye.

PANPHOBIA, Panophobia.

PANPLEGIA, Pamplegia.

PANSCLERO'SIS, from *παν*, 'all,' and *σκληρωσις*, 'hardness.' Complete induration of a part.

PANSE, *Ingulvies*.

PANSEMENT, Dressing.

PANSIES, *Viola tricolor*.

PANSPERMIA, from *παν*, 'all,' and *σπερμα*, 'sperm.' The theory of *Dissemination of Germes*, according to which, ova or germs are disseminated over all space, undergoing development under favourable circumstances.

PANSY, *Viola tricolor*.

PANTAGOGEN, *Panchymagogum*.

PANTANANCEPHA'LIA, from *παν*, *παντος*, 'all,' and *anecephalia*, absence of brain. Entire absence of brain—the same as anencephalia.—I. G. St. Hilaire.

PANTATROPH'IA, from *παν*, *παντος*, 'all,' and *ατροφια*, 'atrophy.' Universal atrophy.

PANTHOD'IC, *Panthod'icus*, from *παν*, *παντος*, 'all,' and *ὄδος*, 'a way.' An epithet applied by Dr. Marshall Hall, to a course of nervous action proceeding from one point in all directions to every other.

PANTICES, Intestine.

PANTING, Anhelatio.

PANTOGANGLIITIS, Cholera.

PANTOPHAGISTS, see *Omnivorous*.

PANTOPHAGUS, Omnivorous.

PANTOPHOBIA, Hydrophobia, Panophobia.

PANTOZOOTIA, Panzootia.

PANUS, *Phygethlon*—p. *Faucium*, *Stomatopannus*—p. *Inguinalis*, *Bubo*.

PANZOÔT'IA, *Pantozoôitia*; from *παν*, 'all,' and *ζωον*, 'animal.' An endemic or epidemic disease affecting animals generally.

PAP, *Mamma*, *Nipple*. Also, a soft food made of bread boiled or softened with water, (Sc.) *Breadberry*.

PAP OF THE HOSE, *Uvula*—p. of the *Throat*, *Uvula*.

PAPAS AMERICANUS, *Solanum tuberosum*.

PAPAVER, *P. somniferum*, *Mecon*, *Lethæa*. The *White Poppy*, *Papaver sativum*, (F.) *Pavot des Jardins*. *Ord.* *Papaveracæ*. *Sex. Syst.* *Polyandria Monogynia*. The CAPSULE OF THE

WHITE POPPY, *Cô'dia*, *κωδία* or *κωδία*, *Scaphium*, *Papaveris Caput sen Cap'sula*, *Papaver*, (Ph. U. S.,) *Mecon*, *Popp'head*, is used in fomentation as an anodyne and relaxant, to inflamed or ulcerated parts. The expressed oil of the seeds is called by the French *Huile d'Éillette*. It is from the poppy that *OPIMUM*—called, also, *Opium Theba'icum*, *Meconium*, *Opium*, *Maurus Dei*, *Affium*, *Affium*, *Amphian*, *Afium*, *Osoron*, *Lau'danum*,

Mecon, *Sopio*, (Prov.) *Poppy pill*, (F.) *Opium brnt ou cru*—is procured. It is the milky juice obtained after the flowering of the plant, by making longitudinal incisions in the capsules and stalks. It is commonly obtained from the Levant or India, where the poppy grows abundantly. Opium is a compound of morphia, narcotina, meconic acid, codeia, narcein, meconin, caoutchouc, fecula, resin, oil, and several other substances. *Turkey Opium* is of a heavy and slightly fetid colour. Its taste is nauseous, bitter, acrid, and warm: it is in flat pieces; solid and tenacious; of a dark brown colour, and yellowish when powdered; making a light brown, interrupted streak on paper. In *East India Opium*, the odour is the same, and empyreumatic; the taste is less bitter, but more nauseous, and the colour darker. The varieties of opium known in commerce are the *Smyrna*, the *Constantinople*, the *Egyptian*, the *Persian*, and the *Indian*. Opium is stimulant in small doses; sedative, in large; narcotic and anodyne; operating through the nervous system. It is a most valuable remedy in all painful affections, and inflammations, when given so as to produce its full, sedative effects, especially in peritonitis. In diarrhoea and dysentery, it acts as an astringent; and in intermittents, it will often prevent the paroxysm. In typhus, in small doses, it acts as a cordial; in larger, it allays irritation and produces sleep. When applied externally, its narcotic effects are developed: and, hence, it is a useful application to irritable sores, painful tumours, &c. Dose. gr. $\frac{1}{4}$ to $\frac{1}{2}$ as a stimulant; gr. j to iv as a sedative.

PAPAVER CEREALE, P. rhœas—p. Corniculatum, Chelidonium majus—p. Erraticum, P. rhœas—p. Luteum, Chelidonium majus.

PAPAVER NIGRUM. This is merely a variety of the white poppy, producing black seeds.

PAPAVER RHEAS. The systematic and pharmacopœial name of the *Red corn-poppy*, *Corn rose*, *Papaver errat'ienm* seu *cereal'è* seu *rubrum*, *Copper rose*, *Red-mailkes*, (F.) *Coquelicot*. The heads of this species contain a milky juice of a narcotic quality. A syrup, *Syr'npus Rhœ'ados*, of its flowers—*Rhœas* (Ph. L. and E.)—has been directed, which has been esteemed diaphoretic and slightly soothing; but is more admired for its colour than for any other property.

PAPAVERACEUM, Opiate.

PAPAVERCULUM, Meconium.

PAPAVERINE, *Papaverina*; from *papaver*, 'the poppy.' An alkaloid contained in opium; but not much investigated.

PAPAVERINUM, Codeine.

PAPAW TREE, *Carica papaya*.

PAPAYER, *Carica papaya*.

PAPER, BLISTERING, see *Sparadrapum vesicatorium*.

PAPIER ÊPISPASTIQUE, see *Sparadrapum vesicatorium*.

PAPILLA, (F.) *Papille*—diminutive, perhaps, from *papa*, one of the earliest cries of the infant, ascribed to a craving for food. The end of the breast, the nipple. See Nipple. An eminence similar to a nipple. A name given to small eminences, more or less prominent, at the surface of several parts, particularly of the skin and mucous membranes, in which latter situation they are also called villi. See Villous. They appear formed by the ultimate expansion of the vessels and nerves, and are susceptible, in some cases, of a kind of erection. They are also called *Papillæ nervosæ* seu *Nerveæ*, P. *Pyramida'les*, *Nervous papillæ*, (F.) *Papilles* ou *Papilles nerveuses*, *Houppes nerveuses*.

PAPILLA LACHRYMALIS, see *Lachrymal puncta*—p. Mammae, Nipple—p. Nervi optici, see *Optic nerve*—p. Pili, see *Hair*.

PAPILLÆ, see *Corpuscles*, *Pacinian*—p. *Calyciformes*, see *Papillæ of the tongue*—p. *Capitatae*, see *Papillæ of the tongue*—p. *Circumvallatae*, see *Papillæ of the tongue*—p. *Conical*, see *Papillæ of the tongue*—p. *Conoidal*, see *Papillæ of the tongue*—p. *Filiform*, see *Papillæ of the tongue*—p. *Fungiform*, see *Papillæ of the tongue*—p. *Fungoid*, see *Papillæ of the tongue*.

PAPILLÆ OF THE KIDNEY, (F.) *Mamelons du rein*, are the projections into the pelvis of the kidney of the apices of the cones—*Pyramids of Malpighi*, *Pyramides Malpighi'nae*—of the tubular substance of the organ. They are also called *Processus mamilla'res*, *Carunculæ papilla'res*, and *Papillæ renm*.

PAPILLÆ, LENTICULAR, see *Papillæ of the tongue*—p. *Maximæ*, see *Papillæ of the tongue*—p. *Mediæ*, see *Papillæ of the tongue*—p. *Minimæ*, see *Papillæ of the tongue*—p. *Mucosæ*, see *Papillæ of the tongue*—p. *Nerveæ*, *Corpuscles*, *Pacinian*—p. *Nervous*, see *Papilla*—p. *Pyramidal*, see *Papillæ of the tongue*—p. *Pyramidales*, see *Papilla*—p. *Renm*, see *Papillæ of the kidney*—p. *Semilenticulares*, see *Papillæ of the tongue*.

PAPILLÆ OF THE TONGUE are very numerous and marked. They are observed, particularly, at the upper surface of the organ, and are distinguished into—1. *The Lenticular papillæ*, *Papillæ mucosæ seu max'imæ seu capitatæ seu vallatæ seu circumvallatæ seu truncatæ seu calyciformes*. They are arranged at the base of the tongue in two oblique lines having the shape of the letter V; and united angularly at the foramen cœcum. They have, in general, an ovoid or spherical shape, and have seemed to be mucous follicles similar to those of the palate, lips, &c. 2. *The Fungiform or Fungoid Papillæ*, *Papillæ mediæ seu semilenticular'es*, are of indeterminate number, but always more numerous than the preceding. They are irregularly disseminated near the edges and the point of the tongue; have a rounded and flattened head, supported by a short and narrow footstalk. Their tint is whitish. 3. *The Conical, Conoidal or Pyramidal papillæ*, *P. minimæ seu villosæ*, are the most numerous of all. Their arrangement is more regular in the forepart of the tongue than behind. They resemble small cones; the base being towards the tongue and the apex free. The anterior are very small, and have been called *Filiform papillæ*. They appear to be produced by the terminations of the filaments of the lingual nerve, and are surrounded by an evident vascular network.

PAPILLÆ TRUNCATÆ, see *Papillæ of the tongue*—p. *Vallatæ*, see *Papillæ of the tongue*—p. *Villosæ*, see *Papillæ of the tongue*.

PAPILLARY, *Papilla'ris*, *Papillous*, (F.) *Papillaire*, from *papilla*. Of or belonging to the nipple or to the papillæ.

PAPILLARY BODY, *Corpus papillare*.

PAPILLI-AUT-MAMMILLI-FORMIS, *Mastoid*.

PAPILLIFORM, *Papilliform'is*, from *papilla*, and *forma*, 'form.' Having the shape or appearance of a papilla.

PAPILLO'MA. A tumour, whose specific elements are those of the papillæ of the normal skin; and which consequently is composed of a stem of fibrous or homogenous connective tissue; is club-shaped, cylindrical or acuminated, and covered with a layer of epithelial cells, similar to those of the normal papillæ.—Förster.

PAPILLOUS, *Papillary*.

PAPPOUSE ROOT, *Caulophyllum thalictroides*.

PAPPE, *Mamma*.

PAPPEA CAPENSIS. A small tree of the *Nat. Ord.* Sapindacææ, common in Cafferland. The fruit of which is called *Wild Plum*. It

furnishes a vinous beverage, and excellent vinegar. Its kernel contains an oil, which, although eatable, is somewhat cathartic, and is recommended as an external application in tinea capitis, alopecia, &c.

PAPPUS AMERICANUS, *Solanum tuberosum*.

PAP'ULA. Akin to *papilla*. A *pimple*, *Excortium*, (Prov.) *Pouke*, *Puckle*, (Se.) *Pluke*, *Plouk*, (F.) *Papule*, *Bouton*, *Bourgeon*. A small, acuminated elevation of the cuticle, with an inflamed base; very seldom containing a fluid, or suppurating, and commonly terminating in scurf or desquamation. An eruption of pimples is called, in Devonshire, *Murfles*.

Papulae form the first order of Willan and Bateman's arrangement of cutaneous diseases.

PAPULA AGRICA, Lichen agrarius — p. Fern, Herpes exedens — p. Miliaris, Miliary fever — p. Typhosus, Spots, red.

PAPULE, Lichen — p. Sicca, Lichen — p. Sudoribus, Miliary fever — p. Sudorales, Sudamina.

PAPULAR, Papulose.

PAPULEUX, Papulose.

PAP'ULOSE, *Papulo'sus*, *Pap'ulosus*, *Papula'tus*, *Pimpled*, *Pap'ular*, *Papula'ris*, (F.) *Papuleus*, from *papula*. Of or belonging to, resembling, or covered with, papule or pimples.

PAQUERETTE VIVACE, Bellis.

PAR NERVO'RUM, *Syz'gyi nervo'rum*. A pair of nerves.

PAR NOXUM, Hypoglossus — p. Opticum Nervorum, Optic nerve — p. Primum nervorum cerebri, Olfactory nerve — p. Quartum, Pathetic nerve — p. Quintum nervorum cerebralium, Trigemini — p. Secundum nervorum, Optic nerve — p. Septimum sive faciale, Facial nerve — p. Tertium, Motores oculorum — p. Trigemini, Trigemini — p. Trium funicularum, Trigemini — p. Vagus, Pneumogastic — p. Visorius, Optic nerve.

PARA, *para*, a common prefix, 'by, near, contrary to, through,' (*per*); 'above and beyond,' (*ultra*); 'besides,' (*præter*). In certain terms, as in *Paracusis*, *Parapsis*, *Parabysma*, &c., used by Dr. Good, *para* means a defective or morbid condition.

PARA NUT, see *Pichurim* genus.

PARABAL'ANUS, from *paraβαλλειν*, (*para*, and *βαλλειν*, 'to cast,') 'to expose one-self.' A name given, by the ancients, to a person who devoted himself to the service of the sick in hospitals; and particularly during epidemics and the plague.

PARABYS'MA, from *para*, and *βυσιν*, 'to stuff.' Infarction or engorgement of an organ — as *Parabysma Lienis*, Engorgement of the spleen.

PARABYSMA MESPENTERICUM, *Tabes mesenterica*.

PARABYS'TIA, same etymon. Engorgement or infarction of an organ with blood.

PARACELSIS'TA, *Paracel'sist*, *Paracel'sian*; from *Paracelsus*. A follower of *Paracelsus*.

PARACELSISTICA MEDICINA, see *Spagyristas*.

PARACENTE'RIMUM. Same etymon as the next. Woolhouse has given this appellation to a small trocar, employed by Nuck for puncturing the eye in cases of dropsy of that organ.

PARACENTE'SIS, *Perforatio*, *Punctio*, *Punctura*, *Cenobate'sis*, *Ceute'sis*, *Compunctio*, (F.) *Paracentese*, from *παρακιντω*, (*para*, and *κιντω*, 'I pierce,') 'I pierce through.' Puncture. The operation of *tapping* to evacuate the collected fluid in ascites, ovarian dropsy, &c.

PARACENTESIS, Puncturing — p. Thoracis, Thoracentesis.

PARACENTETERION, Trocar.

PARACENTICION, Trocar.

PARACEPH'ALUS, (F.) *Paracéphale*, from

para, 'defective,' and *κεφαλη*, 'head.' A genus of monsters, with the head badly formed, but voluminous; the face distinct, with a mouth; rudimentary sensorial organs, and thoracic members.

PARACHRE'EA, from *para*, and *χρσα*, 'colour.' Morbid change of colour of the surface, especially of the face.

PARACHROMA, *Achromatopsia*.

PARACHROSIS, *Decoloration*.

PARACINE'SES, (G.) *Parakinesien*, from *para*, and *κινησις*, 'motion.' Diseases of the motor nerves; morbid movements of voluntary muscles.

PARACMASIS, Decline.

PARACMAS'TIC, *Paracmas'ticus*, from *παραμαζω*, (*para*, and *αμω*, 'the highest point,') 'I decrease.' Decreasing. An epithet for a distemper, which gradually decreases. Also, according to Galen, the period of life when a person is said to grow old, which he places at from 35 to 49, after which he is said to be old — a definition that would not suit us at the present day. — Gorræus, and Castelli.

PARACMASTICOS, see *Acmastieos*.

PARACME, Decline.

PARACOE, see *Cophosis*, *Paracusis*.

PARAC'OP'E, *Paraph'ora*, *Paracu'osis*, from *παρακοπω*, (*para*, and *κοπω*, 'I strike,') 'I strike falsely.' Delirium. In Hippocrates, it means the slight delirium which sometimes occurs in febrile diseases.

PARACOUSIA, see *Cophosia*.

PARAC'RISES, (G.) *Parakrisien*: from *para*, and *κρισις*, 'secretion.' Diseases of the secretory function. — Fuchs.

PARACRUSIS, *Paracope*.

PARACUSIS, *Cophosis*. Also, perverted audition.

PARAC'USIS ACRIS, *Auditus acrior*, *Paracu'sis oxyco'ia*, from *para*, and *ακουσις*, 'the act of hearing.' The hearing painfully acute, and intolerant of the lowest sounds; a symptom in otalgia, epilepsy, cephalitis, and febrile affections.

PARACUSIS DUPLICATA, Double hearing — p. *Imaginaria*, *Tinnitus aurium* — p. *Imperfecta*, Double hearing, P. *perversa* — p. *Obtusa*, *Barycoia* — p. *Oxycoia*, P. *acris*.

PARACUSIS PERVER'SA, P. *Willisiana* seu *imperfecta*, *Perverse hearing*. The ear only sensible to articulate sounds, when excited by other and louder sounds intermixed with them. — Good.

PARACUSIS SURDITAS, see *Cophosis* — p. *Willisiana*, *Paracusis perversa*.

PARACYCLE'SES, (G.) *Parakyklesen*, from *para*, and *κυκλσις*, (*κυκλος*, 'a circle,') 'circulation. Diseases of the blood as regards its distribution and motion. — Fuchs.

PARACYESIS, Pregnancy, morbid, Pregnancy, preternatural — p. *Abortus*, *Abortion* — p. *Tubaria*, *Salpingocyesis*.

PARACYNAN'CHÉ, (*para*, and *ευναuche*.) Inflammation of the external muscles of the larynx. According to others, a slight *cynanche*.

PARÆSTHESIA, *Paresthesis* — p. *Olfactoria*, *Purosmia*.

PARÆSTHESIS, *Paresthesis* — p. *Auditus læca*, *Proptota* *auricularum*.

PARÆTHENAR, *Parathenar*.

PARAGEUSIS, *Ageusia*. Also, perversion of taste, *Parageu'sia*, *Parageu'tia*, *Allotriogen'stia*, *Gustus deprava'tus*, from *para*, and *γευσις*, 'taste.'

PARAGEUSTIA, *Parageusis*.

PARAGLOSSA, *Paraglos'sæ*, from *para*, and *γλωσσα*, 'the tongue'; Swelling of the tongue; *Dysph'gia Lingua'sa*, *Giugomegis'tus*, *Macroglos'sa*, *Prolap'sus lingua*. Sauvages, under the term *Paraglossa deglutito'ria*, means a pretended

doubling of the tongue into the pharynx, (F.) *Renversement de la langue*. See Glossocle.

PARAGOGE, Abduction, Coaptation.

PARAGOMPHOSIS, *Paragomphosis cap'itis*, from *para*, and *γομφωσις*, 'a nailing,' Incomplete wedging of the head of the child in the pelvis during labour.

PARAKINESIEN, Paracineses.

PARAKRISIEN, Paracrisis.

PARAKYKLESEN, Paracycleses.

PARALALIA, Mogilalia — p. Nasalis, Rhinophonia.

PARALAMP'SIS, *παλαμψις*, from *παλαμψω*, (*para*, and *λαμψω*, 'I shine,') 'I shine at the side of;' *Mac'ula corneæ margaritacea*, *Perla*. A cicatrix on the transparent part of the eye.—Hippocrates.

PARALEREMA, Delirium.

PARALLAGE, Insanity.

PARALLAGMA, *Chevauchement*.

PARALLAXIS, *Chevauchement*, Insanity.

PARALLE'LA. A kind of scurfy, cutaneous eruption, affecting the palms of the hands, in parallel lines, and symptomatic of the venereal disease.—Forestus.

PARALLELISM OF DISEASES, Isopathia.

PARALOGIA, Delirium.

PARALOPH'IA, from *para*, and *λοφα*, 'the first vertebra of the back.' The lower and lateral part of the neck, near the vertebræ.—Keil.

PARALYSE', Paralytic.

PARALYSIE, Paralysis—p. *Musculaire atrophique*, *Atrophie musculaire*, progressive—p. *Saturnine*, Palsy, lead.

PARALYSIS, *Par'esis*, *Resolutio membro-rum seu nervo-rum*, *Carus paralysis*, *Catal'ysis*, (F.) *Paralytic*, *Résolution des membres*; *Aneur'ria*, *Aneur'ria*, *Anervismic*,—Piorry; *Palsy*; from *παρالىω*, (*para*, and *λυω*, 'I loosen,') 'I relax.' Abolition or great diminution of the voluntary motions, *Myoparal'ysis*, and sometimes of sensation, in one or more parts of the body.

Palsy is said to be *local*, when it affects only a few muscles. When it extends to half the body, vertically or horizontally, it is called *Hemiple'gia* or *Paraple'gia*. It is commonly symptomatic of disease of the brain or of the nerves themselves, and is a frequent accompaniment, precursor, or successor of apoplexy,—*Phrenoparal'ysis*. The immediate cause is, generally, pressure, either by blood effused, or by serum, or by vascular turgescence. At its onset, therefore, blood-letting may be advisable; but, afterwards, the disease becomes one of nervous debility, and requires stimulants to the paralyzed parts, or to the mucous membranes,—frictions, sinapisms, blisters, the moxa, baths, electricity, galvanism, purgatives, and the nux vomica, which last has the property of exciting movements where the will has no longer power. The disease generally admits only of palliation, and is extremely apt to recur.

PARALYSIS, *Primula veris*.

PARALYSIS AG'ITANS, *P. trem'ula*, *Syn'clonus ballis'mus*, *Scelotyr'bē festi'nans*, *Tremor*, *Tromos*, *Shaking Palsy*, *Trembling Palsy*. A variety of tremor, in which the muscles are in a perpetual alternation of contraction and relaxation.

PARALYSIS, BELL'S, *Bell's Palsy*, *Histrion'ic Paralysis* or *Palsy*, *Paral'ysis facia'lis*, *Proso-paral'ysis*, *Trismus dias'trophē Sauvage'sii*, *Dias'trophē Gale'ni*, *Hemiple'gia facia'lis*, *Oris tortu'ra paral'y'tica Liunæ'i*, *Hemiprosople'gia*. The paralysis of the face induced by a lesion of the portio dura, has been called Bell's Palsy, owing to Sir Charles Bell having been one of the first to investigate it minutely.

PARALYSIS BERIBERIA, *Beriberi*—p. *Extremi-tatum*, *Acro-paralysis*—p. *Facialis*, *Paralysis*,

Bell's—p. *Hemiplegia*, *Hemiplegia*—p. *Histrionic*, *Paralysis*, *Bell's*—p. of the Insane, *Dementia paralytica*—p. *Intestini recti*, *Proctoparalysis*—p. *Intestinorum*, *Enteroparalysis*—p. *Lingue*, *Glossolysis*—p. *Medullaris*, *Paraplegia*—p. *Metallica*, *Palsy*, *lead*—p. *Nervi hypoglossi*, *Glossoplegia*—p. *Nervi vagi in parte thoracica*, *Asthma*—p. *Nervorum thoracis*, &c., *Stethoparalysis*—p. from Poisons, *P. Venenata*—p. *Rachialgia*, *Colic*, *metallic*—p. *Saturnine*, *Palsy*, *lead*—p. *Scorbatica*, *Pellagra*—p. *Spinalis*, *Paraplegia*—p. *Tremula*, *Paralysis agitans*.

PARALYSIS VENENATA, *Paralysis e vene'nis*, *Paralysis from poisons*. Paralysis, the result of poisonous substances—as of lead, mercury, arsenic, ergot, &c.

PARALYSIS E VENENIS, *P. Venenata*—p. *Ventriculi*, *Gastroparalysis*.

PARALY'TIC, *Paralyt'icus*, *Par'alyzed*, *Pall'sied*, (F.) *Paralysé*, *Paralytique*. Same etymon as Paralysis. Affected with or causing paralysis.

PARALYTIC STROKE, see *Stroke*, *paralytic*.

PARALYZED, *Paralytic*.

PARAME'NIA, from *para*, and *μην*, 'a month,' *Menstruat'io anom'ala*, *Menses anom'ala*, *Mis-menstruation*. Difficult menstruation. Disordered menstruation.

PARAMENIA DIFFICILIS, *Dysmenorrhœa*—p. *Erroris*, *Menstruation*, *vicarious*—p. *Obstructionis*, see *Amenorrhœa*—p. *Profusa*, *Menorrhagia*—p. *Superflua*, *Menorrhagia*.

PARAME'RIA, *παραμρηια*, from *para*, and *μηρος*, 'the thigh.' The internal parts of the thigh.

PARAMESOS, *Annular finger*, see *Digitus*.

PARAMO DE RUIZ, MINERAL WATERS OF. A remarkable acid spring in New Granada. It contains free sulphuric and chlorohydric acids, and has a temperature of 157° Fahr.

PARANEPHRI'TIS, from *para*, and *nephritis*, 'inflammation of the kidney.' Inflammation of the renal capsules, *Inflamma'tio renum succenturiatorum*.

PARANCEA, *Delirium*, *Dementia*.

PARANYMPH'US, from *para*, and *νυμφη*, 'a young spouse,' 'a bride.' A name given by the ancients to him who led the bride to the house of her husband. The term was adopted into the ancient schools of medicine to designate the usual discourse pronounced at the end of the prescribed period of study for licentiate, in which the qualifications and merits of the candidate were described.

PARAPATHIA, *Pathomania*.

PARAPECHYON, *Radius*.

PARAPHIA, *Parapsis*.

PARAPHIMOSIS, *Periphimo'sis*, *Circum-ligatu'ra*, *Phimo'sis circumligata*, *Penis lipoder'mus*, from *para*, and *φιμου*, 'I bridle.' Strangulation of the glans penis, owing to the opening of the prepuce being too narrow. It frequently happens in persons affected with phimosis, when the prepuce has been pushed violently behind the base of the glans, during copulation, &c. In paraphimosis, the narrow and resisting aperture of the prepuce forms, behind the corona glandis, a kind of ligature, which strangulates the part, causes it to swell and inflame, and even to become gangrenous. Attempts must be made to bring back the prepuce. These excite considerable pain, yet they must be persevered in for some time; and should they not succeed, the rings, formed by the tumefied prepuce, must be cut transversely, and the antiphlogistic treatment be adopted.

PARAPHOBIA, *Hydrophobia*.

PARAPHO'NIA, from *para*, and *φωνη*, 'the voice.' Affection of the voice, when its character or timbre is less agreeable.

PARAPHONIA CLANGENS, Oxyphonia — p. Gut-turalis, Asaphia — p. Nasalis, Rhinophonia — p. Puberum, Hirquitalitas — p. Rauca, Raucedo — p. Ulcerosa, Oxyphonia.

PARAPHORA, Delirium, Paracope.

PARAPHRENSIS, Paraphrenitis — p. Dia-phragmatica, Diaphragmitis.

PARAPHRENIE, Insanity.

PARAPHRENITIS, from *para*, and *φρενες*, 'the diaphragm;' *Paraphrene'sis*, (F.) *Para-phrenésis*. A name given to inflammation of the diaphragm, (see Diaphragmitis,) which was supposed always to produce delirium:—as well as to the delirium itself accompanying that affection. See Phrenitis.

PARAPHROSYNE, Delirium.

PARAPHROTES, Delirium.

PARAPLAS'TIC, *Paraplasticus*, from *para*, and *πλαστικός*, 'formative.' Possessed of depraved formative powers,—as Carcinoma, Encephaloma, Melanosis, &c.

PARAPLE'GIA, *Paraplex'ia*, *Rachioparal'y-sis*, *Rhachioparal'ysis*, *Rhachiople'gia*, *Myelo-paral'ysis*, *Paral'ysis spinalis* seu *Medullaris*, *Uerus paral'ysis paraple'gia*, (F.) *Paraplégie*, from *para*, and *πλησσω*, 'I strike.' Palsy of the lower half of the body, including the bladder and rectum. It is, generally, owing to disease of some part of the cerebro-spinal axis; especially of the spinal portion. The ancients sometimes used the term for incomplete apoplexy. Some authors have, also, made a distinction between *paraplegia* and *paraplexia*,—using the former for *partial apoplexy*,—the latter for *general or complete apoplexy*.

PARAPLEURITIS, Pleurodynia.

PARAPLEXIA, Paraplegia.

PARAPOHYSES, see Vertebra.

PARAP'OPLEXY, *Parapoplex'ia*, from *para*, and *αποπληξια*, 'apoplexy.' False apoplexy; a soporose state, resembling apoplexy; and especially that which occurs in the paroxysms of pernicious intermittents.

PARAP'SIS, *Paraph'ia*, from *para*, and *απτομαί*, 'I touch.' Sense of touch or general feeling vitiated or lost.—Good.

PARAP'SIS ACRI'S TENERITUDO, Soreness — p. Expers, Torpor, Anæsthesia — p. Illusoria, Pseudæsthesia — p. Pruritus, Itching.

PARARMA, Fimbria.

PARARRHYTHMICUS, Pararrhythmus.

PARARRHYTH'MUS, *Pararrhyth'micus*, from *para*, and *ρυθμος*, 'rhythm.' An epithet for the pulse, when it has not the rhythm proper to the age and constitution of the individual.

PARARTHRE'MA, *Pararthro'ma*, *Pararthre-sis*, *Pararthro'sis*, *Paracetasis*, *Parastrep'sis*, from *para*, and *αρθρον*, 'a joint,' Incomplete luxation; subluxation.

PARASEPAS'TRA, from *para*, and *σκεπεζω*, 'I cover.' A cap or bandage, which covers the whole head.—Galen.

PARASEPUE, Apparatus.

PARAS'CHIDES, from *para*, and *σχιζω*, 'I cleave.' Fragments or splinters of a broken bone.

PARASITE, *Parasitus*, from *παρᾶσιτω*, (*para*, and *σιτος*, 'corn,' 'food.') 'I eat by the side of.' Parasites are plants which attach themselves to other plants; and animals which live in or on the bodies of other animals,—so as to subsist at their expense. The mistletoe is a parasitic plant;—the louse a parasitic animal. The chief parasitic animals are the *Pediculus humanus corporis*, *P. capitis*, *P. pubis*, *Pulex irritans*, *P. pen-tetronus*, and the *Acarus Scabiei*.

PARASIT'IC, *Parasiticus*, *Parasitoid*, *Parasitoides*. Same etymon. Having the nature of, or resembling a parasite,—as 'parasitic growths,' tubercles, cancer, monster, (F.) *Parasitaire*, &c.

PARASITICIDE, Antiparasitic.

PARASITISM, *Parasitismus*. Same etymon as Parasite. The condition of a parasite, or of an organized body which lives on another organized body.

PARASITISMUS INTESTINALIS, Helminthiasis — p. Superficii, Malis.

PARASITOG'ENY, *Parasitogen'ia*, *Parasitogen'esis*. The corporeal condition, which favours the development of parasites.

PARASITOID, Parasitic.

PARASPA'DIA, from *para*, and *σπᾶω*, 'I draw.' A preternatural opening of the urethra at the side of the penis. One whose urethra opens in this manner is called *Paraspadia'us* and *Paraspad'ian*.

PARASPADIÆUS, see Paraspadia.

PARASPHAGIS, from *para*, and *σφαγή*, 'the throat.' The part of the neck contiguous to the clavicles.

PARAS'TATA, *Paras'tates*, from *παριστημι*, (*para*, and *στημι*.) 'I stand near.' The prostate. In Hippocrates, it means the epididymis. The epididymes were called by Herophilus and Galen *Varico'sæ parastatæ*, to distinguish them from *glandulo'sæ parastatæ* or *prostate*. Rufus of Ephesus called the Tubæ Fallopiæ *Parastatæ varico'sæ*.

PARASTATA ADENOIDES, Prostate — p. Glandula, Prostate — p. Glandulosa, Prostate.

PARASTATES, Parastata.

PARASTATITIS, *Epididymitis*; from *parastata*, 'epididymis,' and *itis*, denoting inflammation. Inflammation of the epididymis.

PARASTREM'MA, *Paras'trophê*, from *παρᾶστροφω*, (*para*, and *στροφω*, 'I turn,') 'I distort or pervert.' Convulsive distortion, especially of the face, the soft parts being drawn laterally.

PARASTREPSIS, Pararthrema.

PARASTROPIE, Parastremma.

PARASYNANCHE, Cynanche parotidæa.

PARASYSTOLE, Acinesia.

PARATH'ENAR, *Parath'enar*, from *para*, and *εναρ*, 'the sole of the foot.' Winslow called *grand parathënar*, *parathënar major*, a portion of the abductor of the little toe, *musculus scandula'rius*; and *petit parathënar*, *parathënar minor*, the short flexor of that toe.

PARATHENAR MAJOR, Abductor minimi digiti pedis — p. Minor, Flexor brevis minimi digiti pedis.

PARATHROMA, Elongatio.

PARATONIA, see Spasm.

PARATOPIA, Luxation.

PARATOP'IE, from *para*, and *τοπος*, 'place.' Diseases in which organs are removed from their proper position. See Ectopia.

PARATRIMMA, Chafing.

PARATROPE, Apotrope.

PARATROPHY, *Parat'rophê*, *Paratroph'ia*, from *para*, and *τροφή*, 'nourishment. Misnutrition.

PARBREAKING, Vomiting.

PARDALIANCHES, Aconitum.

PARDALIANCHUM, Aconitum.

PARCE'TAMA, *Parce'tasis*, from *para*, *εκ*, 'out of,' and *τενω*, 'I stretch.' Immoderate extension, distension, or dilatation of a part—as of the heart.

PARECTASIS, Pararthrema, Parcetama.

PAREGOR'IC, *Parégor'icus*, *Sol'piens*, (F.) *Parégorique*, from *παρηγορεω* (*para* and *αγορευω*), 'I soothe, I calm.' That which soothes or assuages—as paregoric elixir. An anodyne.

PAREIA, Gena.

PAREIRA, see P. brava.

PAREIRA BRAVA, *Cissampelos Pareira*, *Pa-reyra*, *Butna*, *Alu'ta*, *Alu'ta*, *Boton*, *Caa-pela*, *Overo butna*, *Wild vine*, *Velvet leaf*. Family,

Menispermæ. *Sex. Syst. Diœcia Monadelphia.*
The root of this plant — *Pareira* (Ph. U. S.) — a native of South America and the West Indies, has a sweet taste, with considerable bitterness and slight roughness. It has been recommended in nephritic and calculous affections; but it is not much used. By A. de St. Hilaire, *Pareira* is assigned to *Cissampelos glaber'rima*.

PARELLE, *Rumex hydrolapathum*, R. patientia.

PARENCEPHALIS, Cerebellum.

PARENCEPHALITIS, Cerebellitis.

PARENCEPHALOCE'LE, from *παρεγκεφαλις*, (*para*, and *εγκεφαλος*, 'the brain,') 'the cerebellum,' and *κηλη*, 'a rupture.' *Hernia of the cerebellum*; a very rare disease. It occurs under the form of a soft, indolent, or slightly painful tumour, without change in the colour of the skin, and is situate in the occipital region. It is constituted of the cerebellum, which escapes through an aperture in the occipital bone. Great attention must be paid not to mistake it for an ordinary tumour, as its extirpation would be attended with fatal consequences.

PARENCEPHALUS, Cerebellum.

PARENCHYMA, *Caro parenchymat'ica* seu *viscerum* seu *viscera'lis* seu *viscero'sa*, *Substantia parenchymato'sa*, *Procheu'na*, (F.) *Parenchyme*. The texture of glandular and other organs, composed of agglomerated globules united by areolar tissue, and tearing with more or less facility. Such is the texture of the liver, kidneys, &c. *Παρεγγυμα* signifies, in Greek, effusion, (*para*, *en*, and *χυνω*, 'I pour,') and it was believed, that this tissue consisted of effused blood or other fluid.

PARENCHYMA TESTIS, Pulpa testis.

PARENCHYMAL, *Parenchymatous*, *Parenchymous*, *Parenchymat'is*, *Parenchymat'icus*, (F.) *Parenchymateux*; same etymon. Belonging or relating to the parenchyma of an organ.

PARENCHYMATI'TIS; from *parenchyma*, and *itis*, denoting inflammation. *Inflammatio parenchymat'ica*. Inflammation of the substance of an organ.

PARENCHYMATOUS, Parenchymal.

PAR'ESIS, from *παρημι*, 'I relax.' (F.) *Parésie*. Paralysis. According to some, a slight, incomplete paralysis, affecting motion, not sensation.

PARESTHE'SIS, *Paræsthe'sis*, *Paresthe'sia*, *Sensus imperfectus*, from *para*, and *αισθησις*, 'sensation.' Congenital misconstruction of the external organs of sense. A genus in the nology of Good. Also, perversion of sensibility.

PARET'ICA EXARTHRO'SIS. Luxation from relaxation of the ligaments of a joint.

PARETICUS, Relaxant.

PARERYA, *Pareira brava*.

PARFUM, Suffimentum.

PARIERA, *Pareira brava*.

PARIES, Table.

PARI'ETAL, *Parieta'lis*, *Pariet'inus*, from *paries*, *parietis*, 'a wall.' Appertaining to the parietes or walls of an organ or to the parietal bones.

PARIETAL ARTERY, see P. Bones.

PARIETAL BONES, *Ossa parietal'ia* seu *vertic'alia* seu *vert'icis* seu *sincip'itis* seu *bregmat'is* seu *bregmat'ica* seu *nerv'al'ia* seu *trago'na*, are two fellow-bones, occupying the lateral and upper parts of the cranium, in the formation of which they assist. They have a quadrilateral shape: their external surface is convex, and presents, at its middle part, an eminence called the *Parietal protuberance*, *Tuber parietal'è*, (F.) *Bosse pariétale*. Their inner or cerebral surface, which is concave, has a depression that corresponds with the preceding eminence, and which is called the *Parietal fossa*, *Fossa parietal'is*. Above and be-

hind, near the superior edge of these bones, is a foramen, which does not always exist, called the *Parietal foramen*, *Fora'men parietal'è*, through which passes a vein — *parietal vein* — that opens into the superior longitudinal sinus of the dura mater: and an artery — *parietal artery* — a branch of the occipital, which ramifies on the same sinus. Each parietal bone is articulated *above*, with its fellow; *below*, with the temporal bone: *before*, with the frontal; *behind*, with the occipital, and by the anterior and inferior angle with the great ala of the sphenoid. Each parietal bone is developed from a single point of ossification.

PARIETAL FORAMEN, see P. Bones — p. Fossa, see P. Bones — p. Protuberance, see P. Bones — p. Veins, see P. Bones.

PARIETA'RIA, *P. officinal'is*, *Helz'inè*, *Vittra'ria*, *Wall pel'litory*, (F.) *Pariétaire commune*, *Perce-muraille*, *Annure*, *Herbe aux murailles ou des Nones*. Family, Urticæ. *Sex. Syst. Polygamia Monœcia*. This plant grows on old walls, — hence its name, from *paries*, *parietis*, 'a wall,' — and contains much nitrate of potassa. It is diuretic, but is not much used.

PARIETA'RIA PENNSYLVAN'ICA, *American Pel'litory*, a small weed, flowering from June to August, has been used in juice or decoction as a diuretic, deobstruent [?] and emmenagogue.

PARI'ETES, Plural of *Paries*, 'a wall,' (F.) *Parois*. A name given to parts which form the enclosures or limits of different cavities of the body, as the *Parietes of the cranium*, *chest*, &c.

PARIETINUS, Parietal.

PARIS, *P. quadrifol'ia*, *Soldanum quadrifol'ium*, *Uva inver'sa* seu *lupi'na* seu *vulpi'na*, *Oueberry*, *Trueloce*, (F.) *Parisette*, *Raisin de Renard*, *Herbe à Paris*, *Étrangle-loup*. It possesses narcotic properties, and was formerly considered a powerful love philter. It is emetic, and is sometimes used externally as a resolvent and anodyne.

PARISAGOGE INTESTINORUM, Intussusceptio.

PARISAILLE, Paris.

PARISTH'MIA, *para*, and *ισθμος*, 'the throat.' A word employed to designate the tonsils, and, likewise, inflammation of the tonsils. *Cynanche tonsillar'is*, and *Cynanche* in general.

PARISTHMIOT'OMUS, from *παρισθμια*, 'the tonsils,' and *τεμνω*, 'I cut.' An instrument with which the tonsils were formerly scarified.

PARISTHMITIS, Cynanche, C. tonsillar'is.

PARISTHMIUM, Tonsil.

PARISWORT, Trillium latifolium.

PARMA CITY, Cetaceum — p. Poor Man's, Thlaspi bursa.

PARME'LIA PARIET'INA, *Lichen pariet'inus*, *Yellow wall Lichen*, *Common Yellow Wall Moss*, which grows abundantly on trees and walls, *Order*, Lichenaceæ, is used in intermittent fever on account of its bitterness.

PARMELIA ISLANDICA, *Lichen Islandicus* — p. Plicata, *Lichen plicatus* — p. Pulmonacea, *Lichen pulmonarius* — p. Rocella, *Lichen roccella* — p. Saxatilis, *Lichen saxatilis*.

PARMENTIE'RA CERIF'ERA, *Palo de velas*, *Candle Tree*. A forest tree in the valley of the Chagres, — *Nat. Ord. Crescentiaceæ*, — the long cylindrical fruit of which, resembling candles, serves for food for cattle.

PAROARION, Parovarium.

PAROCHETEUISIS, Derivation.

PARODON'TIDES, from *para*, and *odontus*, 'tooth.' Tumours on the gums; parulis, &c.

PARODYNIA, Dystocia — p. Perversa, Presentation, preternatural.

PAROIS, Parietes.

PAROLE. Voice, articulated.

PAROMPHALOCÉLĒ, from *para*, *ομφαλος*,

'the navel,' and κηλῶν, 'rupture.' Hernia near the navel.

PARONYRIA, from *para*, and *ovcirpon*, 'a dream.' Depraved, disturbed, or morbid dreaming: *Oncirodyn'ia acti'ea*, *Ececthi'mus oncirodyn'ia*. The voluntary organs connected with the passing train of ideas, overpowered by the force of the imagination during dreaming, and involuntarily excited to their natural or accustomed actions, while the other organs remain asleep.—Good.

PAROSIRIA AMBULANS, Somnambulism—p. Salax. Pollution.

PARONYCHIA, *Parony'chia*, *Paronych'i'tis*, *Pan'uris*, *Redn'via*, *Rediv'in*, *Vernis* seu *Pteryg'ium dig'iti*, *Panari'tium*, *Digit'ium*, *Pandalit'ium*, *Paxia*, *Dactyl'i'tis*, *Pand'rimum*, *Onych'ia*, (F.) *Onglude*, from *para*, and *ovξ*, *ovxhos*, 'the nail.' The ancients gave this name to an inflammatory tumour, — *Onych'i'tis*, *Onyxi'tis* (Gross), — seated near the nail, and involving the pulp or matrix. Some of the moderns have extended it to inflammation of the hand, and even of the forearm. It usually means every phlegmonous tumour of the fingers or toes, and especially of the first phalanx. Four kinds of paronychia are commonly pointed out: 1. That seated between the epidermis and skin, called in France *Tour-niole*. 2. That seated in the subcutaneous areolar tissue. 3. That occupying the sheath of a tendon; and 4. That considered to be seated between the periosteum and bone. The last three are only different degrees of the same disease, constituting *Whitlow*, (Prov.) *Teak*, (F.) *Mal d'accenture*: — the worst kinds, in English, are called *Felon*. The inflammation generally commences in the subcutaneous areolar tissue, and spreads to other parts, occasioning excessive, lancinating pain, owing to the parts being put upon the stretch; hence, the necessity of dividing them freely, — even down to the bone, when there is reason to believe that the affection belongs to the fourth division, — making use of emollient applications, the antiphlogistic treatment, and opiates to relieve pain.

PARONYCHIA, *Asplenium ruta muraria*—p. Digi'tium, *Digitium*.

PARONYCHIS, *Paronychia*.

PARONYCHITIS, *Paronychia*.

PAROPHOBIA, *Hydrophobia*.

PAROPIA, *Canthus* (lesser.)

PAROPLEXIA, *Paraplegia*.

PAROPTIS, *Dysaesthesia visualis* — p. Amaurosis, *Amaurosis* — p. *Cataracta*, *Cataract* — p. *Glauco'sis*, *Glaucoma* — p. *Illusoria*, *Pseudoblepsia* — p. *Lateralis*, *Dysopia lateralis* — p. *Longinqua*, *Presbytia* — p. *Lucifuga*, *Nyctalopia* — p. *Noctifuga*, *Hemeralopia* — p. *Propinqua*, *Myopia* — p. *Staphyloma*, *Staphyloma* — p. *Staphyloma purulentum*, *Hypopyon* — p. *Staphyloma simplex*, *Hydrophthalmia* — p. *Strabismus*, *Strabismus* — p. *Synezisis*, *Synezisis*.

PAROPTESIS, from *παρ*, dim., and *οπρω*, 'I roast.' Forcing a sweat by placing a patient before the fire or putting him in a dry bath.

PARORASIS, from *para*, and *ορω*, 'I see.' Perversion of sight, which prevents the person from judging accurately of the colour of objects. *Achromat'opia*, *Hallucination*.—Galen

PARORCHID'UM, from *para*, 'something wrong,' and *ορχις*, *ορχιδος*, 'testicle.' Any position of one or both testicles, different from that which they ought to occupy in the scrotum; — whether they may not have descended through the abdominal ring, or are drawn up to the groins by the cremaster muscle.

PAROR'CHIDO-ENTEROCELE, *Hernia paror'chido-enter'ica*. Internal hernia complicated with displacement of the testicle.—Sauvages.

PAROSMIA, *Anosmia*. Also, perversion of smell; *Parasthe'sia olfacto'ria*, *Olfac'tus depravatus*, *Idiosyncrasia olfacto'ria*, from *para*, and *οσμη*, 'odour.'

PAROSTIA, from *παρα*, 'defectively,' and *οσσειον*, 'a bone.' Bones untempered in their substance, and incapable of affording proper support.—Good.

PAROSTIA FLEXILIS, *Mollities ossium*—p. *Fragilis*, *Fragilitas ossium*.

PAROTIA, *Cynanche parotidæa*.

PAROTID, *Gland'ula parotide'a* seu *Aures*, *Parot'is*, *Animel'la*, *Alimel'la*, *Lacticin'ia*; from *para*, and *ovs*, *ωρος*, 'the ear.' The largest of the salivary glands, seated under the ear, and near the angle of the lower jaw. It is composed of many separate lobes, giving rise to excretory ducts, which unite to form one canal, called the *Parotid duct*, *Steno's canal*, — the *Ductus superior* or *Superior salivary canal*, of some. This duct, after having advanced horizontally into the substance of the cheek, proceeds through an opening in the buccinator muscle, and terminates in the mouth opposite the second upper molaris. About the middle of its course, it sometimes receives the excretory duct of a glandular body, situate in its vicinity, and called the *Accessory Gland of the Parotid*, *So'cia Parot'idis*, *Gland'ula so'cia parot'idis*. In the substance of the parotid are found—a number of branches of the facial nerve, of the transverse arteries of the face, and the posterior auricular. It receives, also, some filaments from the inferior maxillary nerve, and from the ascending branches of the superficial cervical plexus. Its lymphatic vessels are somewhat numerous, and pass into ganglions situate at its surface or behind the angle of the jaw. The parotid secretes saliva, and pours it copiously into the mouth.

PAROTID, *ACCESSORY GLAND OF THE*, see *Parotid*.

PAROTID APONEURO'SIS. A sheath of great thickness, continuous, below, with the cervical fascia. It forms a frame-work to the parotid by means of fibrous prolongations from its deep surface. Its density accounts for the pain of parotitis, and for the difficulty with which pus makes its way to the surface.

PAROTID ARTERIES, see *Parotid* — p. *Duct*, see *Parotid* — p. *Veins*, see *Parotid*.

PAROTIDE, *Parotis*.

PAROTIDE'AN, *Parotidæ'us*, (F.) *Parotidien*. Belonging or relating to the parotid.

PAROTIDITIS, *Cynanche parotidæa*, *Parotis*.

PAROTIDON'CUS, *Tumor parot'idis*, *T. Gland'ula' parotide'æ*, from *parotis*, and *ovκος*, 'a tumour.' Swelling of the parotid.

PAROTIS, *Phleg'monè parotide'a*, *Inflamma'tia parot'idum*, *Cyan'chè parotide'æ*, *Parot'i'tis*, *Parotid'i'tis*, *Diosen'ri*, (F.) *Parotide*, is the name of a tumour seated under the ear; which is reddish, hard, and attended with obtuse pain: the progress to suppuration being slow and difficult. Sometimes it is of a malignant character, sloughing, and long protracted. Some French pathologists restrict the term *parotide* to symptomatic parotitis—as to that which occurs in plague; whilst they apply the terms *Orcillons* or *Oncles*, *Parotoneies*, to *Cynanche parotidæa* or *Mumps*.

PAROTIS CONTAGIOSA, *Cynanche parotidæa* — p. *Epidemica*, *Cynanche parotidæa* — p. *Sero'o*

glutine tumens, Cynanche parotidæa—p. Spuria, Cynanche parotidæa.

PAROTITIS, Cynanche parotidæa, Parotis—p. Epidemica, Cynanche parotidæa—p. Erysipelatosa, Cynanche parotidæa—p. Polymorpha, Cynanche parotidæa—p. Specifica, Cynanche parotidæa.

PAROTONCIES, see Parotis.

PAROVA'RIUM, properly *Paroûrion*; *Corpusculum conicum Rosenmülleri*, from *para*, and *ovov*, 'the ovary.' A body closely analogous in structure to the epididymis, which is seated between the Fallopian tube and the ovary in the broad ligament. The Corpus Wolffianum concurs in its formation.—Kobelt.

PAROXYN'TIC, *Paroxyn'ticus*, (F.) *Paroxyn'tique*, from *παροξννω*, 'I excite.' Relating to a paroxysm.

Jours paroxyn'tiques are days on which paroxysms take place.

PAR'OXYSM, *Paroxys'mus*, from *παροξννω*, (*para*, and *oxννω*, 'to render sharp.') 'I irritate'; *Imp'etus*, *Insul'tus*, *Inva'sio*, *Exacerbatio*, *Accessio*, *Access'us*, (Old Eng.) *Ares*, (F.) *Exacerbation*, *Redoublement*, *Accès*. The augmentation which supervenes at equal or unequal intervals in the symptoms of acute diseases. Also, a periodical exacerbation or fit of a disease.

PAROXYSM'AL, *Paroxysma'lis*; same etymon. (F.) *Paroxystique*. Of or belonging to a paroxysm;—as a *paroxysmal* day, (F.) *Jour paroxystique*; a day on which a paroxysm of disease occurs.

PAROXYSMUS FEBRILIS, Pyrexia.

PAROXYSTIQUE, Paroxysmal.

PARTHENEIA, Virginity.

PARTHENIUM FEBRIFUGUM, Matricaria—p. Mas, Tanacetum.

PARTHEN'IUS (*Morbus*); from *παρθενος*, 'a virgin.' A disease in a young female. Also, chlorosis.

PARTHENOGEN'ESIS, 'virgin birth'; from *παρθενος*, 'a virgin,' and *γενεσις*, 'generation.' The successive production of procreating individuals from a single ovum, without any renewal of fertilization.—Owen.

PARTHENOLOGY, *Parthenolog'ia*, from

παρθενεια, 'virginity,' and *λογος*, 'a description.' A description or consideration of the state of virginity in health or disease.

PARTHENUS, Virgin.

PARTIALIS, Local.

PARTICLES, PRIMITIVE, OF MUSCLES, Sarcose Elements.

PARTICULE SANGUINIS, Globules of the blood.

PARTIES, LES, Genital organs—p. *Génitales*, Genital organs—p. *Honteuses*, Genital organs—p. *Génoitres*, Genital organs—p. *Naturelles*, Genital organs—p. *Nobles*, Genital organs—p. *Sexuelles*, Genital organs.

PARTIO, Parturition.

PARTRIDGE-BERRY, Gaultheria, Mitchella repens.

PARTS, THE, Genital organs.

PARTURA, Parturition.

PARTURIENT, *Parturiens*, from *parturire*, *parturiturum*, itself from *parere*, 'to bring forth.' Bringing forth, or about to bring forth, or having recently brought forth young.

The *Parturient*, *Puerperons*, *Childbed* or *Lying-in* or *Lying-down state*, *Confinement*, *Puerperium*, generally comprises the period from parturition to perfect recovery, which is usually a month. In the north of England this is called the *steg-month*, requires careful management, and is subject to various diseases.

A *Parturient* or *Parturient* is a medicine which induces or promotes labour; as ergot, and, perhaps borate of soda. See Abortive.

PARTURIFACIENT, Parturient.

PARTURIGO, Parturition.

PARTURIT'ION, *Puerperium*, *Partus*, *Partio*, *Parturi'tio*, *Parturi'go*, *Partura*, *Tocos*, *To'ctos*, *Taxis*, *Lochi'a*, *Apocye'sis*, *Mæu'sis*, *Maieu'sis*, *Nego'tium* seu *Actus parturitionis*, *Enix'us* seu *Enix'io* seu *Expul'sio fatûs*, *Apoll'ysis*, *Status parturien'di*, *Deliv'ery*, *Labour*, *Child-bearing*, *Child-birth*, *Birth*, *Trav'ail*, (Sc.) *Child-ill*, *Crying*, *Crying out*, (F.) *Accouchement*, *Couche*, *Travail d'Enfant*, *Enfementement*. Same etymon as Parturient. The act of delivery of the fœtus and its appendages, also the state during and immediately after delivery—*Childbed*, (Sc.) *Gizzenbed*, *Gizzen*, see Parturient. Labour is the necessary consequence of conception, pregnancy, and the completion of gestation. It does not take place, at the full time, until after nine months of utero-gestation,—the causes producing it being the contraction of the uterus and abdominal muscles. By different authors, the stages of labour have been variously divided. We may, perhaps, admit of four. The *first stage* comprises the precursory signs. One, two, or three days before labour, a mucous discharge, streaked with blood, takes place from the vagina, which is called the *Signum*, *Lencorrhœa Nabothi*, *Hæmorrhag'ia Nabothi*, *Labour-show*, or *Show*; and, along with this, trifling grinding pains, called by the French *Mouches*, are felt in the loins and abdomen. *Second stage*:—Peculiar pains, which extend from the lumbar region towards the uterus; tension and dilatation of the neck and orifice of that organ; protrusion into the vagina of the envelopes of the fœtus, forming the *bag of waters*, (F.) *Poche des eaux*; and rupture or breaking of the waters. *Third stage*:—Contractions of the uterus and abdominal muscles; forcing pains; the head of the fœtus becomes engaged in the pelvis: the occiput being commonly situate above the left acetabulum, passes beneath the arch of the pubis. *Fourth stage*:—the head now presents at the vulva, the perineum being

considerably distended; at length it clears the external parts, and the rest of the body is easily disengaged. The child still continues attached to the mother by the umbilical cord, which has to be divided. In the course of fifteen or twenty minutes, trifling pains occur, and the secundines are expelled. This completes delivery—the *birth*, (F.) *Naissance* of the child. In by far the majority of cases, the head is the presenting part, the occiput directed anteriorly, and the face posteriorly. Of 12,633 children, born at the Hospital *La Maternité*, in Paris, from the 10th of December, 1797, to the 31st of July, 1806, the following were the presentations:

The head, with the face posteriorly...	12,120
The head anteriorly.....	63
The breech.....	198
The feet.....	147
The knees.....	3
Other positions.....	102
	12,633

The following table, drawn up from data furnished by Velpeau, gives an approximate view of the comparative number of presentations, according to the experience of the individuals mentioned:

Labour has received different names, according to the period of pregnancy at which it occurs, and the mode in which it takes place. It is called *miscarriage* or *abortion*, prior to the seventh month; *premature labour*, *Omotoc'ia*, *Partus præcox* seu *præmaturus*, between this and eight months and a half; and *labour at the full period*, (F.) *Accouchement à terme*, when it happens at the end of nine months. Labours have likewise been variously divided by different authors. Perhaps the one into *Natural*, *Preternatural*, and *Laborious*, is as common as any;—*natural Labour* meaning that which would occur without manual assistance; *preternatural*, requiring the assistance of art, but by the hand solely; and *laborious* or *instrumental*, requiring instrumental assistance; which M. Capuron calls *Accouchement Mécanique*. *Powerless labour*, the *Inertie par*

épuisement of Madame Lachapelle, is that in which the muscular powers from exhaustion are unable to accomplish such delivery.

Forced labour or *parturition*, (F.) *Accouchement ou Avortement provoqué*, is labour or abortion, induced by art. When labour is accompanied with other phenomena of a deranging character, it is said to be *complicated*. When the child, even when reduced in size, cannot pass, it is termed *impracticable*, &c. See *Dystocia*.

The French use the term *Part*, *Partus*, at times, synonymously with *delivery*; at others, with *fœtus*, *Maieut'ma*, *Mœu'ma*. *Suppression de part* means concealment of delivery; *Part légitime*, a fœtus which comes into the world with the conlition necessary for its enjoying advantages granted by law; and *Part illégitime*, one that does not fall under those conditions.

TABLE OF THE COURSE AND MANAGEMENT OF DIFFERENT KINDS OF LABOURS.

I. NATURAL LABOURS.		
<i>Or those in which Delivery can be effected without Assistance.</i>		
HEAD PRESENTING. (Four Positions.)	1. <i>Occiput towards the Left Acclabulum.</i>	The head with the chin bent upon the breast clears the brim of the pelvis. Motion of rotation produced by the inclined planes of the pelvis; the occipital protuberance is carried behind the symphysis pubis, and the face towards the hollow of the sacrum.
	2. <i>Occiput towards the Right Acclabulum.</i>	The head attains the outlet: clears it; the occiput being first disengaged, and the face afterwards, which passes successively along the whole of the hollow of the sacrum. The shoulders enter the brim diagonally; and execute the movement of rotation. The one behind first clears the outlet. The same thing occurs with the nates.
	3. <i>Occiput towards the Right Sacro-iliac Symphysis.</i>	The same course is here followed: except that after the rotary movement, the face passes behind the symphysis pubis, and the occiput into the hollow of the sacrum. The occiput is first extruded;—the face next.
	4. <i>Occiput towards the Left Sacro-iliac Symphysis.</i>	When the chin presents and is turned forwards, the face is first expelled; the head is thrown backwards. This presentation is uncommon. If the chin present and be thrown backwards, natural delivery cannot be effected.

NATURAL LABOURS.—CONTINUED.

LOWER EXTREMITY PRESENTING.
(Four Positions of the Feet, Knees, and Breech.)

1. *Heel, Tibia, or Sacrum towards the left Acetabulum.*
2. *Heel, Tibia, or Sacrum towards the Right Acetabulum.*
3. *Heel, Tibia, or Sacrum towards the Right Sacro-iliac Symphysis.*
4. *Heel, Tibia, or Sacrum towards the Left Sacro-iliac Symphysis.*

The nates enter the brim diagonally; movement of rotation: the one passes behind the symphysis pubis; the other towards the hollow of the sacrum. The one behind is first extruded.

The same thing happens to the shoulders. The chin is bent upon the chest to clear the brim: movement of rotation: the occiput passes behind the symphysis pubis, and the face towards the hollow of the sacrum. The face clears the outlet first; the occiput last.

The same progress, except that after the movement of rotation, the face is towards the pubis, and the occiput towards the sacrum. The face is here again delivered first.

II. PRETERNATURAL LABOURS,

Or those which require Manual Assistance only.

I. PRESENTATION OF THE HEAD, UPPER EXTREMITIES, BACK, ABDOMEN, &c.

1. When the labour is without any serious complication, and the head is not in a good position at the brim of the pelvis, endeavours are to be made to place it in its natural position: the hand to be introduced with the fingers united, and the long diameter of the head to be placed diagonally in the brim, if possible. Or the lever may be fixed over the occiput, and, by drawing it down, a closer approximation of the chin and chest may be effected; the position of the head to the pelvis being at the same time attended to.
2. If complicated with syncope, convulsions, hemorrhage, want of uterine action, &c., the feet must be laid hold of, and the child *turned*. For this purpose, empty the rectum and bladder; and turn, if possible, prior to the escape of the liquor amnii. The female may be placed on her back or left side, with the breech over the edge of the bed. Use the right or left hand, according as the feet of the child are to the right or left side of the pelvis; always so introducing the hand, that the child shall be in its palm, and the back of the hand opposed to the inner surface of the uterus. The hand and arm to be introduced during an interval of pain; and they must be flattened and tranquil whilst the uterus is contracting forcibly. If both feet cannot be readily brought down, seize one, and tie a fillet around it.
3. If the toes point to the vertebral column, or to the abdomen of the mother, the head, in its descent, will not enter the pelvis: the chin and occiput will be hitched on the pubis and promontory of the sacrum. In such case, grasp the nates as soon as they have passed the os externum; and, during a pain, endeavour to direct the toes towards either sacro-iliac synchondrosis. When the fingers can be passed along the body of the child, and over the shoulders to the bend of the elbows, draw down the arms successively. When the body is expelled, and the head filling up the brim, the termination of labour must be accelerated by passing two fingers over the shoulder of the child; using moderate and steady extracting power, whilst one finger of the other hand, passed into the mouth, depresses the chin on the sternum. In this way, the head may be extracted.

III. INSTRUMENTAL LABOURS,

Or those requiring the Assistance of appropriate Instruments.

GENERAL OBSERVATIONS.

1. *Short Forceps*
2. *Long Forceps*
3. *Lever or Vectis*
4. *Fillet and Blunt Hook*

If the pains become feeble, or inadequate from any cause;—or if the presenting part be firmly wedged in the pelvis; or the woman be becoming exhausted, instrumental assistance may be required. In all such cases, place the female on the back or left side, empty the bladder and rectum; wait till the os uteri is in a fit state; afford assistance during the pains; introduce the instrument during the intervals between the pains; have the patient on her left side (generally); and extract according to the axes of brim and outlet, as the case may be.

Apply these to the sides of the head of the child, so that the ears and parietal protuberances may be within the *fenestrae*. Introduce the left-hand blade first; the index and middle fingers of the right hand guiding it to the ear. With the right hand pass the other in an opposite line, corresponding with the course of the first blade, guided by the fore and middle fingers of the left hand; the third and little fingers being employed to retain the left-hand blade in place; humour the instrument so as to allow the blades to lock. The handles may now be tied gently together. The force used must be from blade to blade, with a gentle, tractile effort.

Applicable where the head does not enter the brim. The long forceps must be applied, in most cases, over the occiput and face of the child, so that the convex edges of the blades may be towards the hollow of the sacrum. When used, the power may be exerted from side to side, with moderate traction.

The lever is applicable to the same cases as the forceps. It must not be used strictly as a lever, but as a hook with which to draw downwards. It may be applied to any part of the head, but is generally hitched on the occiput.

In certain cases of breech and knee presentation, where the hand is insufficient, it may be necessary to pass over the joint a fillet, or the blunt hook, with which to exert some force of traction. The operation is very simple.

INSTRUMENTAL LABOURS.—CONTINUED.

EMBRYULCIA	<p>Disproportionate size of head, or distorted or deformed pelvis, may require the child to be destroyed, and its bulk lessened; or the Cæsarean section or symphysiotomy, or the induction of premature labour may be called for. The instruments required here, are the <i>Perforator</i>, <i>Crotchet</i>, and <i>Craniotomy Forceps</i>. Make a steady pressure on the abdomen; pass two fingers of the left hand up to the head: feel for a suture or fontanelle; introduce the perforator and bore through, until the progress of the instrument is arrested by its <i>shoulders</i>. Open the handles, and turn the instrument in different directions, so that the opening may be large enough to admit the perforator, with which the brain must be broken down.</p> <p>If, after this, delivery cannot be accomplished without further aid, pass up the craniotomy forceps; open the handles slightly, and introduce the blade without teeth within the cranium. On closing the forceps, a hold is obtained; and a tractile force can now be exerted during the pains, and the extrusion of the child be effected.</p> <p>Should great difficulty exist at the brim, the bones at the top of the head may have to be removed, until the base alone remains. The chin must then be brought through first.</p> <p>The crotchet is often used instead of the craniotomy forceps, being passed into the opening made by the perforator, and hooked upon some bony projection in the interior of the skull; but it is not a good instrument. In presentations of the face demanding perforation of the cranium, the perforator should be introduced just above the nose, in the sagittal suture.</p> <p>When it is necessary to open the head after the lower extremities have been expelled, the perforation must be made behind the ear.</p>
SYMPHYSIOTOMY AND CÆSAREAN SECTION.	<p>In cases of great narrowness of the pelvis, the operation of <i>Symphysiotomy</i> has been adopted by French practitioners,—rarely by British or American; and, in extreme cases, recourse has been had to the <i>Cæsarean Section</i>.</p>
SEPARATION OF THE HEAD OF THE FÆTUS FROM THE BODY.	<p>If the body of the fetus has been forcibly separated, and the head left in the uterus, it must be laid hold of with one hand, and the forceps be applied; or the head be opened and delivered, as under embryulcia. Should the head have been brought away, and the body left behind, the feet must be brought down.</p>
INDUCTION OF PREMATURE LABOUR.	<p>In cases of narrowness of the pelvis, where the fetus, at the full term, cannot be born alive, delivery may be brought about at an earlier period, or as soon as the child is capable of carrying on its functions independently of the mother.</p> <p>The most advisable plan for accomplishing this object is merely to pass the finger round and round within the os and cervix uteri, so as to detach the decidua:—the membranes being thus left entire, and the life of the child not so much endangered, as where the membranes are punctured, and the waters evacuated. Parturition usually follows within forty-eight hours.</p>

The laying of eggs by animals is termed, in French, *ponte*. The term has been applied to the periodical discharge—*ponte périodique*—of ova, (F.) *Chute des Œufs*, which is supposed to take place from the ovaries at each menstrual period.

PARTURITION, DRY, Partus siccus.

PARTURIUM VANUM, *Fausse couche*.

PARTUS, Parturition—p. Abactio, Abortion—p. Abactus, Abortion—p. Cæsareus, Cæsarean section—p. Difficilis, Dystocia—p. Laboriosus, Dystocia, Laborious labour—p. Præcox, Parturition (premature)—p. Prænaturus, Parturition (premature)—p. Serotinus, Opsitocia.

PARTUS SICCUS, *Dry labour* or *parturition*. Labour, which is neither preceded nor attended by a discharge of the liquor amnii.

PARULIS, from *para*, and *ουλον*, 'the gum.' *Apote'ma parulis* seu *paroulis*, *Phleg'monè Parulis*, *Gum Boil*, *Alveolar abscess*. Small abscesses are so called which generally form in the alveoli and involve the gums, sometimes without any known cause, but which often depend upon carious teeth.

PARURIA, from *para*, and *ουρεα*, 'I pass urine.' Morbid secretion or discharge of urine.

PARURIA INCONTINENS, Enuresis—p. Incontinentis aquosa, see Diabetes—p. Inops, Ischuria, false—p. Mellita, Diabetes—p. Retentionis, Ischuria—p. Retentionis renalis, Ischuria—p. Retentionis vesicalis, Retention of urine—p. Stillatitia, Strangury—p. Stillatitia mucosa, Cystirrhœa.

PARVITAS MORBOSA PARTIUM ORGANICARUM, Microtesia.

PAR'YGRON, from *para*, and 'υγρος', 'humid.' A liquid or moist preparation for allaying topical inflammation.

PAS D'ÂNE, Tussilago.

PASMA, Catapasma.

PASQUE FLOWER, *Anemone pulsatilla*.

PASSA, Paronychia.

PASSÆ CORINTHIACÆ, see *Vitis Corinthica*.

PASSAGES, DIGESTIVE, Ways, digestive—p. Second, Ways, second.

PASSAMBIO, Rio vinaigro.

PASSE-PIERRE, *Critheum maritimum*.

PASSERAGE, *Iberis amara*—p. *Sauvage*, *Caramine pratensis*.

PASSIBILITY, GREAT, Hyperæsthesis.

PASSIFLO'RA LAURIFOLIA, *Bay-leaved Passion Flower*. *Ord.* *Passifloræ*. A native of Surinam. The fruit has a delicious smell and flavour, and quenches thirst, abates heat of the stomach, increases the appetite, &c.

PASSIFLORA MALIFORMIS, *Apple-shaped Granadilla*. The fruit of this species is esteemed a delicacy in the West Indies, where it is served up at table in desserts.

Some of the genus are said to possess narcotic and emetic properties.

PASSIO, Disease, Passion—p. *Æmoptoica*, *Hæmoptysis*—p. *Cadiva*, *Epilepsy*—p. *Cardiaca*, *Cardialgia*—p. *Cœlicina*, *Cœlic flux*—p. *Chole-rica*, *Cholera*—p. *Felliflva*, *Cholera*—p. *Hæmopto-ica*, *Hæmoptysis*—p. *Hypochondriaca*, *Hypochondriasis*—p. *Hysterica*, *Hysteria*—p. *Iliaca*, *Ileus*—p. *Ischiadica*, *Neuralgia femoro-poplitea*—p. *Pleuritica*, *Pleuritis*—p. *Stomachica*, *Dyspepsia*—p. *Ventriculosa*, *Cœlic flux*—p. *Vomico-fina*, *Phthisis pulmonalis*.

PASSION, *Passio*, *An'imi Pathe'ma*, *Affectus*, *Emotio*, from *patior*, *passus*, 'to suffer.' An active affection or emotion of the mind; as rage, terror, love, hatred, &c.

PASSION FLOWER, BAY-LEAVED, *Passiflora laurifolia*—p. *Hystérique*, *Hysteria*—p. *Iliac*, *Ileus*.

PASSIONES ANIMI, Affections of the mind.

PASSIVE, *Passivus*. Same etymon as *Passion*. An epithet for diseases which seem owing

to a greater or less diminution of the strength, or which are without apparent reaction. Thus, passive hemorrhages are such as supervene in debilitated individuals, or under conditions in which increased action of the arteries can scarcely be presumed. The term *passive* has, also, been given to aneurisms of the heart with extenuation of the parietes; in opposition to *active* aneurisms, with thickness of the parietes — hypertrophy.

PASSULÆ MAJORES. see *Vitis vinifera* — p. *Minores*, see *Vitis Corinthiaca*.

PASSULA'TUM, (*Uvæ passæ*, 'raisins, dried grapes.') A medicine in which the pulp of raisins is a chief ingredient.

PASSY, MINERAL WATERS OF. This village is in the vicinity of Paris. There are several springs, containing sulphates of lime, iron, and magnesia, alum, common salt, carbonate of iron, carbonic acid, &c. They are employed as a tonic and astringent.

PASTA DE ALTHÆĀ, Paste, marshmallow — p. *Amygdalina*, Confection (almond) — p. *Dactylis*, Paste, date — p. *Emulsiva*, Confection (almond) — p. *Jujubis*, Paste of jujubes — p. *Regia*, Confection (almond).

PASTA GLYCYRRHIZÆ GUMMA'TA ET ANISA'TA seu *Massa de extracto glycyrrhizæ*. A compound of extract of liquorice, gum Senegal, sugar, *Florence orris-root*, and volatile oil of aniseed. Demulcent.

PASTA ZINCI CHLORIDI, (F.) *Pâte de Canquoin*, Paste of Chloride of Zinc, *Canquoin's Caustic Paste*. This paste is made of three strengths, consisting, respectively, of chloride of zinc, 1 part; wheaten flour, parts 4, 3 and 2; water sufficient to make a paste. This caustic destroys the part in a direct ratio with the thickness of the layer applied.

PASTE, *Pasta*, (F.) *Pâte*. A viscid, tenacious mixture. Also, a compound medicine, like the *pastil*, but less consistent, flexible, less saccharine, and more mucilaginous.

A convenient paste for attaching labels to glass, or for other services, is made of gum tragacanth and water, to which *alum* is added. This the author always keeps by him. Another form is to make a solution of Gum Arabic, ℥j, boiling water, f℥ij, and glycerin, f℥ij; and another is made by mixing powdered Gum Arabic, and powdered tragacanth, of each ℥ss, water, f℥iiss, acetic acid. ℞xx.

PASTE, CAGLIARI, see *Turundæ Italice*.

PASTE OF CHLORIDE OF ZINC, *Pasta Zinci chloridi*.

PASTE, DATE, *Massa* seu *Pasta de dactylis*. Composed of dates, sugar, gum Arabic, water, and orange flower water. — Ph. P. Demulcent.

PASTE OF ICELAND MOSS, *Pasta Liche'nis*, (F.) *Pâte de lichen*. A paste made by boiling lichen *Islandicus* to a proper consistence, and adding gum Arabic and sugar.

The *Pâte de Lichen opiacée* contains opium in addition; about $\frac{1}{3}$ of a grain to an ounce.

PASTE, ITALIAN, see *Turundæ Italice*.

PASTE OF JU'JUBES, *Pasta de ju'jubis*, *Massa de zizyphorum fructu*, (F.) *Pâte de Jujube*. Composed of jujubes, gum Senegal, sugar, water, and tincture of lemon-peel. Demulcent.

PASTE, MARSHMALLOW, *Massa de gummi Arabico*, *Pasta de althæâ*, (F.) *Pâte de Guimauve*. A compound of gum Arabic, sugar, white of egg, and orange-flower water. — Ph. P. It is demulcent.

PASTE, TOOTH, *Dentifricium* — p. *Vienna*, see Powder, *Vienna* — p. *Ward's*, *Confectio piperis nigri*.

PASTEL, *Isatis tinctoria*.

PASTÈQUE, *Cucurbita citrullus*.

PASTIL, *Pastillus*, *Diocres*, *Avic'ula Cip'ria*,

Caude'la fma'lis, *Phthois*, *Phthois'cus*. A compound of aromatic substances in various shapes; used as a fumigating material when set fire to. See *Fumigation*.

The French use the term *Pastille*, (L.) *Pastillus*, for a solid, dry, round, oblong, square, or triangular compound, whose base is essential oil, and sugar the excipient. These pastilles are in fact small lozenges, and only differ from the *tablette* in their smaller size. They are termed, also, *Saccharolés solidés*.

PASTILLE, see *Pastel*.

PASTILLES DIGESTIVES D'HAUTE-RIVE-VICHY, see *Trochisci Sodæ bicarbonatis* — p. *Fumigating*, see *Fumigation* — p. *de Vichy*, see *Trochisci Sodæ bicarbonatis*.

PASTILLI DIGESTIVI DARCETII, see *Trochisci Sodæ bicarbonatis* — p. *Emetinæ Pectorales*, *Trochisci emetinæ pectorales*.

PASTIL'LI DE MENTHĀ PIPERITĀ, *Peppermint drops*. (*Saecl. alb.*, *aquæ menthæ pip.*, *aq. destillat.* aā ℥ij. Boil to the consistence of an electuary. Take of fine white sugar in powder, ℥iv; volatile oil of peppermint, ℥ss. Mix, and add the electuary whilst warm. Drop it then on marble, and dry the drops. — Ph. P.)

PASTILLUS, *Pastil*.

PASTINACA ALTISSIMA, P. *oponax* — p. *Anethum*, *Anethum graveolens* — p. *Graveolens*, *Anethum graveolens* — p. *Opaca*, P. *sativa*.

PASTINACA OPOP'ANAX. *Ord. Umbelliferae*. The name of the plant which furnishes the *Opopanax*. The plant, whence the gum resin is obtained, has, also, been called *Fer'ula opoponax* seu *apoponax*, *Pastinaca altiss'ima*, *Laserpit'ium* seu *Seli'num chiro'nium*, *Opopana'cum*. *Pa-uaz heracle'um* seu *costi'num*, *Pastinac'cea*, *Kyna*, *Hercules-all-heat*, *Opop'anaxwort*.

Opopanax, *Opopana'eis gummi-res'ina*, *Gezir*, *Pop'anax*, *Gummi Pana'eis*, exudes from the roots when wounded. Its odour is strong and peculiar; taste, bitter and acrid. It is met with in the shops, in lumps of a reddish-yellow colour, without; white within. It has been recommended as an antispasmodic and emmenagogue; but is seldom used. Dose, gr. x. to ℥j, in powder.

PASTINACA PRATENSIS, P. *sativa*.

PASTINACA SATI'VA, *Elaphobos'cum*, *Pastinaca sylvest'ris* seu *opa'ca* seu *pratens'is*, *Aser'thum* seu *Seli'num pastinac'ca*, *Ban'ica*, *Garden pars-nep*, (F.) *Pana'is*. The root is sweet and nutritious, and is in esteem as an article of food. It has been used as a diuretic and demulcent in calculous affections, &c.

PASTINACA SYLVESTRIS, P. *sativa* — p. *Sylvestris tenuifolia officinarum*, *Daucus carota*.

PATATE, *Convolvulus batatas*.

PATCHOULI, *Pogostemon patchouli*.

PÂTE, Paste — p. *Arsenicale*, *Arsenical paste* — p. *de Canquoin*, *Pasta Zinci chloridi* — p. *Caustique de Vienne*, *Powder*, *Vienna* — p. *de Guimauve*, *Paste*, *marshmallow* — p. *de Jujube*, *Paste of Jujubes*.

PATEL'LA, *Rot'nla*, *R. genu*, *Epigon'atis*, *Epigon'tis*, *Acromy'lè*, *Epigon'uis* seu *Epigu'nis* seu *Epigo'nis*, *Mola* seu *Concha* seu *Ocul'us* seu *Orbis* seu *Scutum genu*, *Os scutiformè* seu *disciformè* seu *thyreoï'des*, *Supergena'lis*, *Caucaloi'des*, *My'lacris*, *Mylè*, *Gamba*, *Olec'ranon mob'ilè*, (Prov.) *Cop bone*, (F.) *Rotule*. Diminutive of *patera*, 'a bowl,' so called from its shape. A sort of sesamoid, flat, short, thick, rounded bone, situate in front of the knee, and enveloped in the substance of the tendon common to the extensor muscles of the leg. The posterior surface of the patella is divided into two *facettes*, united angularly, which are encrusted with cartilage, and each of which is articulated with one of the condyles of

the femur. The patella is developed by a single point of ossification. When the patella is fractured, it is difficult to produce bony union. This can only be accomplished by keeping the fractured extremities closely in apposition.

PATELLA, Cup — p. Fixa, Olecranon.

PATENCY OF THE FORAMEN OVALE, see Cyanopathy.

PATENT MEDICINE, *Médecine brevetée* ou *patenté*, *Remède breveté* ou *patenté*. A medicinal compound, for the sale of which the proposer obtains from government an exclusive privilege. A specification of his *invention* must be registered in the Patent Office, and, hence, it differs from a secret medicine.

PATER OMNIUM VIVENTIUM, Penis.

PATERA DIOGENIS, Palm.

PÂTEUX, Clammy.

PATHEMA, Affection, Disease.

PATHEMATOLOGY, Pathology.

PATHETIC, *Pathet'icus*, from *παθηω*, 'I feel.' That which moves the passions. A name given to the superior oblique muscle of the eye, and, also, to a nerve.

PATHETIC MUSCLE, Oblique superior of the eye.

PATHETIC NERVE, *Nervus Pathet'icus* seu *trochlearis* seu *trochleolato'rius* seu *trochleator*, the 4th pair of nerves, *Par quartum*, (F.) *Oculo-muscularis internæ* (Ch.), *Nerf pathétique*, is the smallest encephalic nerve. It arises behind the inferior part of the tubercula quadrigemina (*testes*) at the lateral parts of the valvula Vieussenii. Its roots unite into one thin round cord, which makes a turn upon the peduncles of the brain, and passes into a canal of the dura mater, near the posterior clinoid process. It enters the orbit by the broadest parts of the sphenoidal fissure, and terminates in the superior oblique muscle of the eye, by dividing into several filaments,

PATHETISM, Magnetism, animal.

PATHIC, Morbid.

PATHICAL, Morbid.

PATHICUS, Morbid.

PATHINE, Alveolus.

PATHOGENET'IC, *Pathogenet'icus*, *Pathogenet'icus*. Same etymon as Pathogeny. Relating to pathogeny.

PATHOGENETIC PHYSIOLOGY, *Physiolog'ia pathogenet'ica*. That part of physiology which relates to the origin of disease.

PATHOGENICUS, Pathogenetic.

PATHOG'ENY, *Pathogen'ia*, *Nosogen'esis*, *Nosogen'ia*, from *παθος*, 'a disease,' and *γενεσις*, 'generation.' The branch of pathology which relates to the generation, production and development of disease.

PATHOGNOMON'IC, *Pathognomon'icus*, *Signum conjunctivum* seu *characteristicum* seu *morbi essentia'le*; from *παθος*, 'an affection,' and *γνωσκω*, 'I know.' A characteristic symptom of a disease.

PATHOGRAPHY, *Pathograph'ia*, from *παθος*, 'disease,' and *γραφω*, 'I describe.' A description of disease.

PATHOLOGIA, Pathology — p. Humoralis, Humorism — p. Solidaris, Solidism.

PATHOLOG'ICAL, *Patholog'icus*, *Patholog'icus*, (F.) *Pathologique*. Same etymon as pathology. Relating to pathology. Often used in the sense of pathological.

PATHOLOGICAL ANATOMY, see Anatomy.

PATHOLOGIST, *Patholog'us*. Same etymon. One versed in pathology.

PATHOL'OGY, *Pathematology*, *Patholog'ia*, *Pathematolog'ia*, *Patholog'icé*, from *παθος*, 'a disease,' and *λογος*, 'a discourse.' The branch of medicine whose object is the knowledge of disease. It has been defined *diseased physiology*,

and *physiology of disease*. It is divided into *general* and *special*. The *first* considers diseases in common; — the *second*, the particular history of each. It is subdivided into *internal* and *external*, or *medical* and *surgical*.

PATHOLOGY, HUMORAL, Humorism.

PATHOMANIA, *Parapath'ia*, *Moral Insanity*, from *παθος*, 'a disease,' and *μανια*, *Mania sine Delirio*. A morbid perversion of the natural feelings, affections, inclinations, temper, habits, moral disposition, and natural impulses, without any remarkable disorder or defect of the intellect, or knowing and reasoning faculties, and particularly without any insanity or hallucination.

PATHOMYOTOM'IA; from *παθος*, 'affection,' *μυς* or *μυων*, 'muscle,' and *τομη*, 'incision.' The title of a work by Dr. John Bulwer (1649), being "a dissection of the significative muscles of the affections of the mind."

PATHOPATRIDA LGIA, Nostalgia.

PATHOS, Affection, Discuse.

PATIENCE, Rumex patientia — p. *d'Eau*, Rumex hydrolopathum — p. Garden, Rumex patientia — p. *Rouge*, Rumex sanguineus — p. *Sauvage*, Rumex acutus.

PATIENT, see Sick.

PATIENT OF DEATH, Agony.

PATIENTIA, Rumex patientia.

PATIENTIE MUSCULUS, Levator scapulae.

PATNE, Alveolus.

PATOPATRIDA LGIA, Nostalgia.

PATOR NA'RRIUM. The cavity or the opening of the nostrils.

PATRATIO, Ejaculation, (of sperm.)

PATRINIA JATAMANSI, Nardus Indica.

PATTE D'OIE (F.), 'Goose's foot.' An aponeurotic expansion, which covers the internal surface of the tibia at its upper part, and consists of the expansion formed by the tendons of the sartorius, gracilis, and semi-tendinosus muscles.

PATURSA, Syphilis.

PAU, (CLIMATE OF.) Pau is the capital of the department of the Lower Pyrenées, and is about 150 miles from Bordeaux, and 50 from Bayonne. The climate corresponds with that of the south-west of France generally: its great quality is the comparative mildness of its spring, and exemption from cold winds. It is regarded as a favourable winter residence for invalids labouring under chronic affections of the mucous membranes. It is too changeable for the consumptive; and to be avoided by the rheumatic.

PAULLIN'IA. This is an extract from a plant of the same name in Brazil. It is prepared by the Indians, and appears to possess excitant powers. In Brazil, and the neighbouring countries, it is given in the form of tisane — the powder being mixed with cocoa — in diarrhoea and dysentery. It has been employed also as a tonic. An extract is prepared in Brazil from *Paullinia sor'bilia*, Ord. Sapindaceæ, known there under the name of *Guarana*, which is administered in similar pathological cases.

PAUME DE LA MAIN, Palm.

PAUNCH, Inguivies.

PAUNTA, Sedatives.

PAUPIÈRE, Palpebra.

PAUSIME'NIA, from *παυσις*, 'cessation,' and *μηνες*, 'menses.' Cessation of the menses.

PAVANA WOOD, Croton tiglium.

PAVANNE, Laurus sassafras.

PAVIL'ION. The French give the name *pavillon*, to the expanded extremity of a canal or cavity,—for example, of a catheter, sound, &c.

PAVILION OF THE EAR, *Auricula*, *Pinna*, *O'tium*, Ala, (F.) *Auricule* ou *Oricule*, *Parillon de l'oreille*, is seated behind the cheeks, beneath

the temple, and anterior to the mastoid process. Its size varies in individuals. It is free above, behind, and below. Anteriorly and within, it is continuous with the neighbouring parts. Its outer surface has several prominences, the *Helix*, *Auricula*, *Tragus*, *Antitragus*, and *Lobe*; and several cavities—the *groove of the Helix*, the *fossa navicularis* seu *scaphoïdes*, and the *Concha*. The skin which covers the pavilion is very fine, and studded with a number of sebaceous follicles. The auricle is fixed to the head by three fibro-articular ligaments;—a *superior*, *anterior*, and *posterior*.

PAVILLON DE L'OREILLE, Pavilion of the ear—*p. de la Trompe*, see Tuba Fallopiana.

PAVIMENTUM CEREBRI, Base of the brain.

PAVINA, *Æsculus hippocastanum*.

PAVITA'TIO, *Tremor*; from *pavitare*, *pavitatum*, 'to tremble from fear.' Trembling from fright.

PAVOPHOBIA, Panophobia.

PAVOR (L.), Dread. Great fright. Panophobia.

PAVO'RES NOCTUR'NI seu **DORMIEN'TIUM**. Fear during sleep.

PÁVOT, Papaver.

PAW, Manus.

PAWPAW, see *Carica papaya*.

PAXWAX, see *Nucha*.

PAXYWAXY, see *Nucha*.

PAZAHAR, Bezoar.

PEA, Pisum—*p. Garden*, Pisum—*p. Ground Squirrel*, *Jeffersoniana Bartoni*—*p. Hoary*, *Galega Virginiana*—*p. Love*, *Abrus precatorius*—*p. Nut*, *Arachis hypogea*—*p. Partridge*, *Cassia chamæcrista*—*p. Turkey*, *Galega Virginiana*.

PEACH BRANDY, *Amygdalus Persica*—*p. Tree*, *Amygdalus Persica*—*p. Wood*, see *Cæsali-pinia*.

PEAGLE, *Primula veris*.

PEAR, see *Pyrus malus*—*p. Avocado*, *Persea gratissima*.

PEARL, *Perla*, *Mar'garon*, *Margari'ta*, *Margel'lum*, *Marge'lis*, *U'nio*, (F.) *Perle*. A roundish concretion of a silvery white colour, and brilliant polish, found in several shells, and especially in the *Avic'ula margaritif'era*, which has, hence, been called *Mater perlarum*, *Margari'ta*, and *Mother of pearl*, and is much used in the fabrication of handles for surgical instruments, &c. Pearls were formerly given in powder as astringents and antacids. They consist of lime and an animal matter.

PEARL ASH, Potash of commerce.

PEARL, MOTHER OF, see *Pearl*—*p. White*, Bismuth, subnitrate of.

PEAU, Cutis—*p. Divine*, Condom.

PEAUCIER, *Platysma myoides*.

PECAN or **PECCAN NUT**, see *Hickory*.

PECCANT, *Peccans*, from *peccare*, 'to sin.' Morbid, not healthy. An epithet given by the humourists to the humours when erring in quality or quantity. See *Materia Morbosa*.

PECHAN, Stomach.

PECHEDEON, *Perinæum*.

PECHEGUERA. A pulmonary affection affecting children three or four months old in South America, which is promptly fatal.

PÊCHER, *Amygdalus Persica*.

PECHIAGRA, *Pechyagra*.

PECHING, Anhelatio.

PECHU'RIM seu **PICHU'RIM CORTEX**. A highly aromatic bark, the produce of a species of *laurus*. It is extremely fragrant, like cinnamon, which it greatly resembles in its properties. In Portugal it is used in the cure of dysentery, &c. See *Pichurim* beans.

PECH'YAGRA, *Pech'i'agra*, *Ancon'agra*, *Pec-*

thagra, from *πηχus*, 'the elbow,' and *αγα*, 'a seizure.' Gout affecting the elbow.

PECHYS, Elbow.

PECHYTYRBE, *Porphyræ nautica*.

PECKISH, Hungry.

PECTE, Cheese.

PECTEN, Pubes. Also, a comb.

PECTEN DENTIUM, see *Sepes*—*p. Veneris*, *Scandix cerefolium*.

PECTIHAGRA, *Pechyagra*.

PECTIN, from *πηκτος*, 'coagulated, curdled.'

A name given by Braconnot to a principle which forms the basis of vegetable jelly. It is extensively diffused in the juices of pulpy fruits and roots, especially when they are mature; and occasions these juices to coagulate when they are mixed with alcohol or boiled with sugar.

It is the basis of one of the classes of elementary principles of Dr. Pereira—the *pectinaceous*.

PECTINACEOUS, *Pectinosus*.

PECTINALIS, from *pecten*, *pectinis*, 'the pines'; *Pectinæ'us*, *Mus'culus liv'idus*, *Pectinæ'tus*, (F.) *Pubio-femoral*, *Suspubio-femoral* (Ch.), *Pectiné*. This muscle is situate at the inner and upper part of the thigh. It is long, flat, and triangular; is attached, above, to the space which separates the ileo-pectineal eminence from the spine of the os pubis; and, below, by a flat tendon, to the oblique line which descends from the lesser trochanter to the linea aspera. The pectinalis bends the thigh on the pelvis, and carries it outwards in adduction and rotation. It may also bend the pelvis on the thigh.

PECTINATED, *Pectinæ'tus*, *Pectin'iform*, *Pectinate*, (F.) *Pectiné*, from *pecten*, *pectinis*, 'a comb.' Having the shape of the teeth of a comb.

PECTINATED MUSCLES, *Pectinæ'ti mus'culi*. The fascicular texture observed in the right auricle of the heart:—*Mus'culi Auric'ulæ Pectinæ'ti*. Their main use probably is—to prevent the over dilatation of the auricles.

PECTINATUS, *Pectinalis*.

PECTINÉ, *Pectinalis*, *Pectinated*.

PECTINEUS, *Pectinalis*.

PECTINIFORM, *Pectinated*.

PECTINOUS, *Pectinæ'ceus*, *Pectinô'sus*, *Pectinæ'ceus*, from *pectin*. Of or belonging to pectin or vegetable jelly,—as a *pectinous* or *pectinaceous* vegetable principle.

PECTORAL, from *pectus*, *pectoris*, 'the breast.' Relating to the breast. See *Pectoralis*.

PECTORAL, GRAND, *Pectoralis major*.

PECTORALE, Corset.

PECTORALIS INTERNUS, *Triangularis sterni*.

PECTORALIS MAJOR, from *pectus*, *pectoris*, 'the breast.' *Pectora'lis*, *Sterno-cleido-brachia'lis*, (F.) *Sterno-costo-clavio-humér'al*, *Sterno-humér'al* (Ch.), *Grand Pectoral*. A large, flat, triangular muscle, situate at the anterior part of the chest, before the axilla. It is attached, on the one hand, by means of aponeurotic fibres, to the inner half of the anterior edge of the clavicle; to the anterior surface of the sternum, and to the cartilages of the first six true ribs;—on the other, by a strong tendon, which is inserted at the anterior edge of the bicipital groove of the humerus. The use of this muscle is to move the arm in various directions. If it be hanging by the side of the body, it carries it inwards and a little forwards. When the arm is raised, it depresses it and carries it inwards. It can, also, move it in rotation inwards. If the humerus be raised and fixed, the pectoralis major draws the trunk towards the upper extremity.

PECTORALIS MINOR, *Serra'tus anti'cus minor*, (F.) *Costo-coracoïdien* (Ch.), *Petit Pectoral*, *Petit*

dentelé antérieur. This muscle is situate beneath the preceding, at the anterior and upper part of the chest. It is flat and triangular; is attached by its base, which appears digitated, to the upper edge and outer surface of the 3d, 4th, and 5th true ribs, and is inserted at the anterior part of the coracoid process. The pectoralis minor draws the scapula forwards and downwards, and makes it execute a rotatory motion, by virtue of which its inferior angle is carried backwards, and the anterior depressed. When the shoulder is fixed, it elevates the ribs to which it is attached, and aids in the dilatation of the chest.

PECTORALS, Pectora'lia, Thorac'ica. Medicines considered proper for relieving or removing affections of the chest.

PECTORAL DROPS, BATEMAN'S, consist chiefly of *tincture of castor*, with some *camphor* and *opium*, flavoured by *miscel.* Gray gives the following formula: *Castor*, ℥j; *ol. anisi*, ℥j; *camph.* ℥v; *cocci*, ℥ss; *opii*, ℥vj; *proof spirit*, a gallon. A form, advised by a committee of the Philadelphia College of Pharmacy, is the following:—*Alcohol. dil. cong. iv*; *Santal. rubr. ras.* ℥j; *digere per horas xxiv*; *cola, et adde Pulv. opii, Pulv. catechu, Camphoræ,* āā ℥ij; *Ol. anisi*, ℥iv. Digest for ten days.

PECTORILOQUE, from *pectus, pectoris*, 'the chest,' and *loqui*, 'to speak.' One, according to Laënnec, who presents the phenomenon of *Pectoriloquism*. Also, a stethoscope.

PECTORILOQUIE, Pectoriloquy — *p. Chérotante, Egophony.*

PECTORILOQUOUS BRONCHOPHONY, see Pectoriloquy.

PECTORILOQUY, Pectoril'oquism, Car'ernous voice, Pectorilo'quia, (F.) *Pectoriloquie, Voir cavernieuse, V. articulée.* Same etymon. Speech or voice coming from the chest. Laënnec has designated, by this name, the phenomenon often presented by consumptive individuals, when their chests are examined with the stethoscope. The voice seems to issue *directly* from the chest, and to pass through the central canal of the cylinder, — a phenomenon owing to the voice resounding in the anfractuous cavities, produced in the lungs by the supuration or breaking down of tubercles, which constitute *abscesses* or *ulcers of the lungs*. By some, it is not separated from bronchophony, having been termed, at times, *strong bronchophony*, and *pectoril'oquous bronchophony*. See Laryngophony. *Whispering pectoriloquy* is that produced by the whispering of the patient.

PECTOROSUS, from *pectus, pectoris*, 'the chest.' One who has a broad chest.

PECTUS, Sternum, Thorax — *p. Carinatum*, see Carina and Lordosis.

PECULIUM, Penis.

PEDAGRA, Potissæ supertartras impurus.

PEDAL, Peda'lia, from *pes, pedis*, 'the foot.' Relating to the foot: — as

PEDAL APONEURO'SIS, (F.) *Aponévrose pédiéuse.* A thin, aponeurotic layer, which invests the extensor brevis digitorum pedis, and separates the tendons of the foot from each other.

PEDBELLY, Physeonia.

PEDES, Genital organs.

PEDESIS, Pulsation.

PEDETHMOS, Pulsation.

PEDIAL'GIA, Pedional'gia, Pedioneural'gia, from *πέδιον*, 'the sole of the foot,' and *άλγος*, 'pain.' Pain in the sole of the foot. Neuralgia of the foot in general. An affection of this kind, under the name *Pédionalgie*, prevailed in 1762 at Savigliano in Piedmont, and in 1806 amongst the military at Padua.

PEDICLE, VITELLINE, see Vesicula umbilicalis.

PEDICULARIA, Delphinium staphisagria.

PEDICULATIO, Phtheiriasis.

PEDICULUS, Phtheir, Louse, (Prov.) *Biddy,* (F.) *Pou.* Diminutive of *pes, pedis*, 'a foot,' from its having many feet. A genus of parasitic insects. The human body is infested with three kinds: the *Body-louse*, or *Clothes-louse, Pediculus vestiment'i,* (F.) *Pou de corps*; the *Head-louse, Pediculus cap'itis,* (F.) *Pou de la tête*, which lives in the hair; the *Crab-louse, Morp'io, Fera'lis pediculus, Plut'ula, Phthi'rius inguin'alis, Pediculus Pubis,* (F.) *Morpion*, which infests the hair of the pubes. Infusion of tobacco, or mercurial ointment, or ointment of white precipitate of mercury, or the white or red precipitate of mercury, readily destroys them. The louse occurring in phtheiriasis, *pediculus tabescen'tium*, differs from the common louse.—Vogel.

PEDICULUS CAPITIS, see Pediculus — *p. Pubis, Crab-louse—p. Tabescensium, see Pediculus—p. Vestimenti, see Pediculus.*

PÉDICURE, Chiropodist.

PEDICUS, Extensor brevis digitorum pedis.

PÉDIEUX (muscle), Extensor brevis digitorum pedis.

PEDIGAMBRA, Ysambra.

PEDILANTHUS TITHYMALOÏDES, Euphor'bia tithymaloïdes seu myrtifolin, Jew bush, Order, Euphorbiacæ, grows in various parts of the West Indies. The practitioners of Curacoa give a decoction in venereal cases. It is also used in domestic practice, in amenorrhœa. It is, moreover, known and used as *Ippocacantha.*—Lindley.

PEDILUVIUM, from *pedes, 'the feet,' and lavo, 'I wash.'* *Lavipe'dium,* (F.) *Pédiluve, Bain de pied.* A bath for the feet. See Bath.

PEDION, Sole.

PEDIONALGIA, Pedialgia.

PEDIONEURALGIA, Pedialgia.

PEDIUM, Tarsus.

PÉDONCULE, Peduncle.

PÉDONCULES DU CERVEAU, Peduncles of the brain—*p. du Cervelet, Corpora restiformia—p. du Conarium, Peduncles of the pineal gland—p. de la Glande pinéale, Peduncles of the pineal gland.*

PEDORA. The sordes of the eyes, ears, and feet.

PED'UNCLE, Pedun'culus, (F.) *Péduncle,* from *pes, pedis*, 'a foot.' This term has been applied to different prolongations or appendices of the encephalon.

PEDUNCLES OF THE BRAIN, Pedun'culi seu Crura seu Caudæ cer'ebr'i, called, also, *Crura anteriora medullæ oblongat'æ,* (F.) *Péduncles du Cerveau,* are two white cords, about $\frac{3}{4}$ ths of an inch in diameter, on the outside of the corpora albicantia. They arise from the medullary substance of the brain, and gradually approach, till they join the tuber annulare. They are formed, internally, of a mixture of cineritious and medullary matter; the former of which, being of a darker colour at one part than in any other part of the brain, has been called *Loeus niger crurum cerebri, Substantia nigra pedun'culi.*

PEDUNCLES OF THE CEREBELLUM, Pedun'culi seu Crura cerebell'i, called, also, *Crura posteriora, a middle, and an inferior.* The superior peduncles are generally known as the *Processus cerebell'i ad testes, Crura cerebell'i ad corpora quadrigen'ina, Bra'chia copulati'ra:* the inferior are the *Processus cerebell'i ad medullam oblongatam;* and the middle are called, also, *Cerebellar peduncles—Processus seu Crura cerebell'i ad pontem, Bra'chia pontis.*

PEDUNCLES, INFERIOR, OF THE CEREBELLUM,

Corpora restiformia—p. of the Medulla oblongata, Corpora restiformia.

PEDUNCLES OF THE PINEAL GLAND, *Pedunculi conarii*, (F.) *Pédoncules de la glande pinéale*, *P. du Conarium*, are two medullary bands or strips, which seem to issue from the pineal gland, and proceed on each side upon the upper and inner region of the optic thalami. See Pineal Gland.

PEDUNCULI CEREBELLI, Peduncles of the Cerebellum—p. Cerebri. Peduncles of the brain—p. Conarii, Peduncles of the pineal gland, see Pineal gland—p. Medullæ oblongatæ, Corpora restiformia.

PEDUNCULUS, Peduncle.

PEGA, Canthus (lesser).

PEGANEL'E'ON, *Oleum ruta'ceum*, *O'leum rutæ*, from *πυγανον*, 'rue,' and *ελαιον*, 'oil.' Oil of Rue.

PEGANUM, Ruta.

PEGMIN, Corium phlogisticum.

PEINE, Hunger.

PEINOTHERAPIA, Limotherapeia.

PEIRA, Effort, Experience, Nisus.

PELA'DA, (F.) *Pelade*. A word of uncertain origin, applied to alopecia, especially to that resulting from syphilis. See Alopecia.

PELA'GIA. A kind of scaly erysipelas of the hands—sometimes of the legs, at others, of the face. Pellagra [?].

PELLAGRA, Pellagra.

PELARGONIUM ANCEPS, *Peris'tera anceps*. A South African plant, *Nat. Ord.* Geraniaceæ, the decoction of which is used by the Malays in amenorrhœa, and to promote parturition and abortion.

PELARGONIUM ANTIDYSENTER'ICUM, *Jenkinsonia antidysenter'ica*. This South African plant is used by the natives in dysentery. It is boiled in milk.

PELARGONIUM CUCULLA'TUM. Common along the side of the Table Mountain. It has been recommended in decoction as an enema in colic, nephritis, and suppression of urine. It is an excellent emollient, and was formerly exported to Holland under the name *Herba Athæ'æ*.

PELARGONIUM TRISTE, *Polync'tium triste*. The root of this plant, which grows at the Cape of Good Hope, is somewhat astringent, and is used there in diarrhœa and dysentery, and as an anthelmintic.

PEL'ICAN, *Pelica'nus*, *Peleca'nus*, *Pel'ecan*, *Pel'ecus*, *πελεκαν*, from *πελεκαιω*, 'I cleave.' An instrument, curved at the end like the beak of a pelican. Its use is to extract teeth.

PELI'CIDĒ, *Pelu'dē*, *Mel coc'tum*. Boiled honey.—Ruland and Johnson.

PELICOMETER, Pelvimeter.

PELIDNOMA, Echymoma, Pelioma.

PELIO'MA, *Pelidno'ma* from *πελος*, 'black.' A livid ecchymosis.—Forestus. See Echymoma. *PĒLIOSE*, Purpura.

PELIOSIS, Purpura hæmorrhagica—p. Rheumatica, see Purpura simplex.

PELLA, Cutis, Prepuce.

PELLAGRA, *Pel'agra*, *Ichthyo'sis* seu *Tuber* seu *Impeti'go Pellagra*, *Elephanti'asis Ital'ica*, *Lepra Mediolanen'sis* seu *Lombard'ica*, *Scorbutus alpi'nus*, *Ma'nia pella'grica*, *Erythe'ma endem'icum* seu *pellagrum*, *Insolazione de Primavera*, *Male del Sole*, *Dermat'agra*, *Erysip'elasperiod'ica nervo'sa chron'ica*, *Paral'ysis scorbut'ica*, *Scurvy of the Alps*, (F.) *Mal de misère*, *Scorbut des Alpes*; from *πελλα*, [?] 'skin,' and *αγρα*, 'seizure.' A disease, particularly noticed among the Milanese, which consists in the skin becoming covered with wrinkles, and assuming a scaly appearance, especially in the parts exposed to the air. The strength diminishes, the intellectual faculties and

sensations become obscure, and cramps, convulsions, and other lesions of muscular contractility supervene. It is a singular endemic affection, and has been supposed to follow everywhere the introduction of Indian corn: hence the name *Rapha'nia maiz'tica*, given to it by some of the Italian physicians.

An affection endemic in the Asturias is said to be a variety of pellagra. It is the *Rosa* seu *Lepra Astu'rica*, *Mal de la Rosa*.

PELLENS, from *pellere*, 'to drive.' Driving; impelling.

PELLEN'TIA MEDICAMEN'TA are medicines that promote the occurrence of the menstrual or hæmorrhoidal flux.

PELLICULA OVI, Membrana putaminis—p. Summa, Epidermis—p. Superior, Epidermis.

PELLICULÆ CORDIS, Ostiola cordis.

PELLIS, Cutis—p. Summa, Epidermis.

PELLITORY, *Xanthoxylum fraxineum*—p. American, *Parietaria Pennsylvanica*—p. Bastard, *Achillea ptarmica*—p. of Spain, *Anthemis pyrethrum*—p. Wall, *Parietaria*.

PELMA, Sole.

PELOHE'MIA, (F.) *Pélohémie*, from *πηλος*, 'dirt,' and *αίμα*, 'blood.' A condition of the blood in which it is thick, syrupy, and of a very dark colour—as in diseases of the blood, gangrene, &c.

PELOR, Monster.

PELORIA, Monster.

PELORIUM, Monster.

PELORUM, Monster.

PELOTE DE MONSTER, Pila marina.

PELTALIS seu PELTATUS CARTILAGO, Thyroid cartilage, Xiphoid cartilage.

PELTAN'DRA VIRGIN'ICA, from *πελητη*, 'a target,' and *ανθη*, 'for anther,' from the shield-shaped stamens. *Arum Virgin'icum*, *Calla seu Lecou'tia seu Russelaëria Virgin'ica*, *Arrovo Arum*, *Taraho*, *Wampee*; indigenous; of the Order Araceæ. The fresh roots and seeds are acrid stimulants, like Arum.

PELTIDEA AMPLISSIMA, *Lichen caninus*—p. Aphthosa, *Lichen aphthosus*—p. Canina, *Lichen caninus*—p. Leucorrhiza, *Lichen caninus*—p. Malacea, *Lichen caninus*—p. Spuria, *Lichen caninus*.

PELTIGERA CANINA, *Lichen caninus*.

PELUDE, Pellicide.

PELVIC, *Pel'vicus*, *Pelvi'nus*, (F.) *Pelvien*, from *pelvis*. Belonging or relating to the pelvis.

PELVIC APONEURO'SIS, (F.) *Aponévrose pelvienne*. A tendinous lamina, given off from the sides of the pelvis, and from the entire circumference of the brim, which passes into and lines the pelvis, and is soon divided into two distinct layers;—one external, the lateral pelvic or obturator fascia, which continues to line the sides of the pelvis, and covers the obturator internus muscle; the other, internal or superior, which passes inwards upon the side of the prostate, bladder, and rectum in the male, and of the bladder, vagina, and rectum in the female, in order to form the floor of the pelvis.

PELVIC CAVITY, (F.) *Cavité pelvienne*. The cavity of the pelvis.

PELVIC MEMBERS. The lower extremities.

PELVIC SURFACE OF THE IL'IUM. That which faces the pelvic cavity.

PELVICULA OCULI, Orbit.

PELVID'YMUS, (F.) *Pelvidyme*, from *pelvis*, and *δίδυμος*, 'a twin.' A monster united at the pelvis, and double above.

PELVI-TROCHANTERIAN, *Pelvi-trochanterianus*. That which relates to the pelvis and great trochanter. The *Pelvi-trochanterian region* is formed by the muscles—*pyramidalis*, *two obturators*, *gemini*, and *quadratus femoris*—which

pass from the pelvis to the digital cavity of the great trochanter.

PELVIEEN, Pelvic.

PELVIMETER, *Pelycom'eter, Pelyom'eter, Pelvicom'eter, Pyelom'eter*, (F.) *Pelvimètre*, from *pelvis*, and *μετρον*, 'a measure.' A barbarous hybrid. This name has been given to different instruments, invented for measuring the diameters of the pelvis, and particularly the antero-posterior or fore-and-aft diameter of the brim:—*Pelvim'etry*, (F.) *Pelvimétrie*. Two have been chiefly employed, especially by French practitioners:—the *Compas d'épaisseur*, and the *Pelvimeter of Coutouly*. 1. The *Compas d'épaisseur* or *Callipers* of Baudeloque, is formed like a pair of compasses—with blunt extremities—the branches of which can be moved at will. One of these is applied to the symphysis pubis, and the other on the sacrum. About three inches must be deducted from this measurement for the thickness of the mons veneris, pubis, and the base of the sacrum. 2. The *Pelvimeter of Coutouly* resembles the instruments used by shoemakers for measuring the length of the foot. The two branches are introduced, in a state of approximation, into the vagina, and then separated, so that one touches the promontory of the sacrum, the other comes behind the os pubis. It is a barbarous contrivance, and its introduction ought never to be attempted on the living subject. It does not, indeed, seem possible to introduce it without mischief.

The finger is, decidedly, the best pelvimeter, and by it we can judge whether the base of the sacrum be unusually prominent. Measurement of the pelvis by the hand has been called *Pelycochirometre'sis*; from *πελῦξ*, 'the pelvis,' *χειρ*, 'the hand,' and *μετρον*, 'measure.'

PELVIMETRY, see Pelvimeter.

PELVIS, *Chō'ana, Py'elos, Lec'ane*, (F.) *Bassin*; so called from *πέλος*, and *πέλλης*, 'a basin,' because fancied to be shaped like an ancient basin. The part of the trunk which bounds the abdomen below. It is a large, bony, irregular, conoidal cavity,—open above and below,—which supports and contains a part of the intestines, and the urinary and genital organs; and serves, at the same time, as a fixed point for the articulation of the lower limbs, the attachment of their muscles, and the execution of their movements. The pelvis supports, behind, the vertebral column, and is sustained, before, by the ossa femorum. It is situate, in the adult, near the middle part of the body, and is composed of four broad, flat, unqually thick bones, differing much in their shape, size, and arrangement, which touch, are articulated at some part of their surface, and intimately united by means of a number of ligamentous fasciæ. Of these bones, two are behind, on the median line,—the sacrum and the coccyx; the two others are before and at the sides,—the ilia. They are fellows, and unite, before, with each other. The most important parts of the pelvis, in an obstetrical point of view, are the *brim* and the *outlet*. The *BRIM*, *Angustia abdominalis, Intro'itus, Apertu'ra pelvis superior, Upper Opening or Strait of the Cavity of the Pelvis*, (F.) *Détroit supérieur, D. abdominalis*, is the narrow part which separates the greater pelvis from the less—the *false* from the *true, Pelvis vera* seu *minor*. In the well-formed woman it is elliptical, and slightly inclined forwards. Its *antero-posterior, sacro-pubic or conjugate diameter*, in a *standard pelvis*, measures 4½ inches, but with the soft parts, 3½ inches; its *transverse or iliac or lateral*, 5½ inches, but with the soft parts 4 inches; and its *oblique, Diameter of Deventer*, with the soft parts, 4½ inches. The *OUTLET, Ez'itus, Inferior opening or Strait, Angustia perinœ'alis*, (F.) *Détroit inférieur, D. périnéal*,

forms the lower aperture of the pelvis. The antero-posterior diameter is here, on account of the mobility of the coccyx, 3 inches: the lateral, 4 inches. The *AXIS OF THE PELVIS* is important to be known in obstetrics. The *Axis of the Brim* is indicated by a straight line drawn from the umbilicus to the apex of the coccyx;—the *Axis of the Outlet* by a line drawn from the first bone of the sacrum to the entrance of the vagina. An imaginary curved line which indicates the direction of the canal of the pelvis, has occasionally been termed the *curve of Curus*, in consequence of its having been pointedly described by the German obstetrician.

PELVIS AURIUM, Cochlea—p. Cerebri, Infundibulum of the brain.

PELVIS OF THE KIDNEY, *Pelvis renalis* seu *renum, Sinus, Venter* seu *Alvus Renum*, (F.) *Bassinet*. This is a small, membranous pouch, occupying the posterior part of the fissure of the kidney. It is placed behind the renal artery and vein; is elongated from above to below; flattened from before to behind; irregularly oval in figure; and, below, contracts considerably, to be continuous with the ureter. It receives the orifices of the infundibula, which pour the urine secreted in the kidney into its cavity.

PELVIS MINOR, Pelvis—p. Ocularis, Scaphium oculare—p. Renalis, Pelvis of the kidney—p. Renum, Pelvis of the kidney—p. Vera, Pelvis.

PELYCOCHIROMETRESIS, see Pelvimeter.

PELYCOMETER, Pelvimeter.

PELYOMETER, Pelvimeter.

PEM'ICAN or PEM'CAN. Meat cured, pounded, and mixed with fat. It has been much used as nutriment on long overland journeys.

PEMPHIGO'DES, *Pemphigoid*, (F.) *Pemphigode*, from *πεμφίξ*, 'a blister,' and *εδος*, 'form.' An epithet given by the ancients to the fever that accompanies pemphigus.

PEMPHIGUS, *Emphly'sis Pemphigus, Pom'pholyx*, from *πεμφίξ, πεμφίγος*, 'a blister;' *Febria bullo'sa* seu *vesicul'aris* seu *ampullo'sa* seu *pemphigo'des* seu *pemphingo'des, Exanth'ema serosum, Morta, Pemphigus morta* seu *Helveticus* seu *major* seu *minor, Morbus bullo'sus* seu *vesicul'aris* seu *ampulla'ceus, Pemphiaz, Pemphix, Pemphyx, Typhus vesicul'aris, Vesicular Fever, Bladdery Fever, Water-blebs*, (F.) *Fièvre bulleuse ou vésiculaire, Maladie bulleuse*. A disease, defined to consist of vesicles, scattered over the body; transparent, filbert-sized, with a red, inflamed edge, but without surrounding blush or tumefaction; on breaking, disposed to ulcerate; fluid, pellucid or slightly coloured; fever, typhous. It is doubtful whether any such idiopathic fever have ever existed: the probability is, that the fever and vesications have been an accidental complication. Cullen thinks the *Pemphigus Helveticus* must have been malignant sore throat. If, however, such a distinct disease did exist, it was probably only as an endemic-epidemic.

PEMPHIGUS GANGRÆNOSA, *Rupia escharotica*—p. Hungaricus, see Anthrax—p. Infantilis, *Rupia escharotica*—p. Major, Pemphigus—p. Minor, Pemphigus—p. Morta, Pemphigus—p. Variolodes, see Variella.

PEMPHIX, Pemphigus.

PEMPHIX, Pemphigus.

PEMPHYX, Pemphigus.

PEMPTÆA FEBRIS, Quintan.

PENÆA MUCRONATA, see Sarcocolla—p. Sarcocolla, Surocolla.

PENCHE, Abdomen.

PENCIL-LIKE PROCESSES, Styloid processes.

PENDULOUS ABDOMEN, Physconia.

PENDULUM PALATI, Velum pendulum palati.

PEN'ETRATING, *Pen'etrans*, from *penetrare*, *penetratum*, (*penitus intrare*), 'to go into.' A wound is so called which penetrates one of the great splanchnic cavities—*Vulnus penetrans*.

A medicine is, also, so called, which is supposed to pass through the pores, and stimulate.

PENICILLUM, Compress, Penicillus.

PENICIL'US, *Penicillum*, *Penic'ulus*, 'a painter's brush;' diminutive of *penis*, 'a tail.' A tent or plectet. A pessary. The secreting glandiform extremities of the venæ portæ, (*Ac''ini bilio'si*) have been so termed, as well as the villous textures.

PENICILLUS, Tent.

PENICULUM, Compress.

PENICULUS, Penicillus, Tent.

PÉNIDE, Penidium.

PENIDES, Saccharum hordeatum.

PENID'IUM, *Penidium saccharatum*, from *penis*, 'a tail,' from the shape [?], (F.) *Pénide*, *Sucre tors*. A kind of clarified sugar, made up into rolls. *Barley sugar*. It is demulcent; see *Saccharum hordeatum*.

PENIL, Mons veneris.

PENIS, 'a tail.' *Caulis*, *Coles*, *Caulis*, *Caulos*. *Men'tula*, *Menta*, *Phall'us*, *Farcif'era*, *Posthē*, *Prosth'im*, *Crithē*, *Cor'yūē*, *Yomer*, *Pater om'nium virentium*, *Prid'apus*, *Virga*, *V. viri'lis*, *V. genit'alis*, *Veretrum*, *Sathē*. *Membrum viri'lē seu seminālē seu genitālē vir'rum*, *Morion*, *Cyon*, *Sic'ula*, *Tentum*, *Hasta*, *H. nuptia'lis*, *H. viri'lis*, *Vas*, *Vas'culum*, *Pecul'ium*, *Vir'gula*, *Vir*, *Thyr'sus*, *Tensus*, *Clavus*, *Cauda salax*, *Canda*, *Fas'cinum*, *F. viri'lē*, *Muto*, *Nervus*, *N. fistulo'sus seu fistularis seu juveni'lis*, *Per'tica per se*, *Scapus*, *Leco*, *Cureu'lio*, *Vena*, *Contus*, *Telum*, *Gurgu'lio*, *Sceptrum*, *Arma*, *Gla'dius*, *Lubricum*, *Caput*, *Muti'nus*, *Palus*, *Pes'sulus*, *Radix*, *Ramus*, *Ruta'bulum*, *Arma Ventris*, *Columna adstans inguin'ibus*, *Columna*, *Pyr'amis*, *Trabs*, *Spina*, *Catapulta viri'lis*, *Verpa*, *Macha'ra*, *Taurus*; the *Yard*, *Mule organ*, &c. (F.) *Verge*, *Membre viril*. This organ, the use of which is to carry the seminal fluid into the female organs of generation, is cylindroid, long, and erectile, and situate before and beneath the symphysis pubis. In the ordinary state, it is soft and pendent in front of the scrotum. During erection, it becomes elongated, upright, and assumes a triangular shape. Its upper surface is called the *Dorsum penis*, (F.) *Dos de la verge*; and, at its anterior surface, there is a longitudinal projection formed by the canal of the urethra. The two sides of the penis are round, and its posterior extremity or root is attached to the pelvis. Its anterior extremity is free, and presents the glans, prepuce, and orifice of the urethra. The penis is formed of the corpora cavernosa, the principal seat of erection; the corpus spongiosum of the urethra, for the conveyance of the urine and sperm; and of the glans, which terminates the canal. The *Arteries* of the penis are branches of the internal pudic. The *Veins* correspond with the arteries. The *Nerves* are from the internal pudic.

PENIS CEREBRI, Pineal gland—p. *Femineus*, *Clitoris*—p. *Lipodermus*, *Paraphimosis*—p. *Muliebris*, *Clitoris*.

PENNATUS, Penniform.

PEN'NIFORM, *Pennifor'mis*, *Penna'tus*, from *penna*, 'a pen,' and *forma*, 'form.' An epithet for muscles whose fleshy fibres are inserted on each side of a middle tendon, like the feathers of a pen on their common stalk.

PENNSYLVANIA, MINERAL WATERS OF. The most celebrated are those of Bedford. The Carlisle, Ephrata, and Yellow Springs are also frequented.

PENNYCRESS, *Thlaspi*.

PENNYROYAL, *Mentha pulegium*, *Hedeoma pulegioides*—p. *Hart's*, *Mentha cervina*.

PENNYWORT, ASIATIC, *Hydrocotyle Asiatica*.

PENSACOLA, see *Saint Augustine*.

PENSÉE, *Viola tricolor*—p. *Sauvage*, *Viola tricolor*.

PENSILIA, *Pudibilia*.

PENSY, *Viola tricolor*.

PENTAM'YRON, from *πεντε*, 'five,' and *μυρον*, 'ointment.' An ancient ointment, consisting of five ingredients. These are said to have been—storax, mastich, wax, opobalsam, and unguentum nardinum.—*Paulus*, and *Aëtius*.

PENTAPHAR'MACON, from *πεντε*, 'five,' and *φαρμακον*, 'remedy.' Any medicine consisting of five ingredients.

PENTAPIYLLUM, *Potentilla reptans*.

PENTATEUCH, (SURGICAL,) *Pentateuchus*, from *πεντε*, 'five,' and *τευχος*, 'a book,' which signifies the five books of Moses—*Genesis*, *Exodus*, *Leviticus*, *Numbers*, and *Deuteronomy*. By analogy, some surgeons have given the name *Surgical Pentateuch* to the division of external diseases into five classes:—wounds, ulcers, tumours, luxations, and fractures.

PENTATH'ETUM, from *πεντε*, 'five,' and *τεθνας*, 'to place.' An ancient plaster consisting of five ingredients.

PENULA, *Ingluvies*.

PENZANCE, CLIMATE OF. This is the chief residence of invalids in Cornwall, England, during the winter. It is situated on Mount's Bay, about ten miles from the Land's End. It is 5½° warmer in winter than London, 2° colder in summer; scarcely 1° warmer in the spring, and only about 2½° warmer in the autumn. It is a very favourable winter residence for the phisical invalid.

PEONY, *Pæonia*.

PEPANSIS, Coction, Maturation.

PEPANTICOS, Maturative.

PEPASMOS, Coction, Maturation.

PEPAS'TIC, *Pepas'ticus*, from *πεισσω*, 'I concoct.' A medicine supposed to have the power of favouring the concoction of diseases. Maturative.

PEPEIRUS, Concocted.

PEPERI, *Piper*.

PEPINO (S.). A *Cucurbitacea*, which is cultivated in great abundance in the fields of Peru. The pulp or edible part is solid, juicy, and well flavoured; but is apt to disagree.

PEPO, *Cucurbita pepo*—p. *Lagenarius*, *Cucurbita lagenaria*—p. *Vulgaris*, *Cucurbita pepo*.

PEPPER, BLACK, *Piper nigrum*—p. *Cayenne*, *Capsicum annuum*—p. *Chilly*, *Capsicum annuum*—p. *Cubeb*, *Piper cubeba*—p. *Decorticated*, *Fulton's*, see *Piper nigrum*—p. *Guinea*, *Capsicum annuum*—p. *Jamaica*, *Myrtus Pimento*—p. *Long*, *Piper longum*.

PEPPER BUSH, SWEET, *Clethra alnifolia*.

PEPPER, MALAGUET'A. This term has been applied to the fruit or seeds of several zingiberaceous plants, as well as to the pimento. It is usually considered to be synonymous with *Grana Paradisi*, *Grains of Par'dise*, and *Grana Guineensis*, *Guinea grains*.—*Pereira*.

PEPPER, POOR-MAN'S. *Polygonum hydropiper*—p. *Tailed*, *Piper cubeba*—p. *Turnip*, *Arum triphyllum*—p. *Water*, *Polygonum hydropiper*—p. *Water*, of America, *Polygonum punctatum*—p. *Wall*, *Sedum*—p. *White*, *Piper album*.

PEPPERWORT, *Lepidium*.

PEPSIN, *Pepsine*, *Pepsinum*, *Chy'mosin*, *Gastérose*, *Digestive Prin'ciple*, from *πέψω*, 'coction,' 'digestion.' A peculiar organic matter, which, in combination with the gastric acids, is considered to form the proper digestive solvent. Its chemi-

cal constitution is unknown. It would appear that its presence is necessary to induce changes in the elements of the food, which may enable the gastric acids to act upon them so as to form chyme.

PEPSINUM, Pepsin.

PEPSIS, Coction, Digestion.

PEPTIC, *Pep'ticus*, from *πεπρω*, 'I ripen,' 'I digest.' An agent that promotes digestion, or is digestive. Also, applied adjectively to an article of food that is easy of digestion.

PEPTIC PERSUADER, see *Pitula aloes et Kinæ Kinæ*.

PEPTONE. A presumed definite combination between the solvent fluid in the stomach, and albuminous matters received into the organ as aliments. The same as Albuminose.

PER, 'by or through,' in composition often gives intensity to the signification: as *pertussis*, a violent cough.

PERACUTUS, Catoxys.

PERARTICULATIO, Diarthrosis.

PERATODYNIA, Cardialgia.

PERCE-CRANE, Perforator.

PERCE-FEUILLE, Bupleurum rotundifolium.

PERCE-MOUSSE, Polytrichum.

PERCE-MURAILLE, Parietaria.

PERCE-PIERRE, Crithmum maritimum.

PERCEPTA, from *percipere*, *perceptum*, (*per*, and *capio*), 'to perceive,' 'receive.' A word used by some writers on hygiene to indicate, in a general manner, the effects of the nervous action on the animal economy: in other words, the sensations, the functions of the mind, and their deterioration or privation.

PERCEPTIBILITY, see Sensibility.

PERCEPTION, *Percept'io*. Same etymon. The appreciation which the brain has of an impression made upon an organ of sense.

PERCEPTIVITY. Same etymon. The power of perception.

PERCOLATIO, Filtration, Percolation.

PERCOLATION, *Percolat'io*, from *percolare*, *percolatum*, (*per*, and *colare*), 'to strain through.'

The terms percolation and displacement are applied in pharmacy to an operation which consists in placing any substance, the virtues of which have to be extracted by a funnel-shaped instrument, having a septum perforated with holes, or its tube stuffed with cotton or tow, and pouring fresh portions of the menstruum upon it until all its virtues have been extracted. The operation is used in the formation of certain infusions, extracts, tinctures, &c.

An instrument used for this purpose is called a displacer or percolator.

PERCOLATOR, see Percolation.

PERCUSS. *Percu'terē*, *Percussio*, (*per*, and *quere*, 'to strike,') (F.) *Percuter*, *Frappier*. Same etymon as the next. To strike upon with the view of appreciating the resulting sound. To practise percussion.

PERCUSION, *Epicrou'sis*, *Percus'sio*. When immediate or direct percussion is made on the chest or abdomen, the more or less perfect resonance is an index of the state of the contained

organs; and the physician is thus aided in his diagnosis. For this purpose the chest may be struck with the fingers, gathered into a bundle, and their tips placed upon a level. It is better, however, to employ *mediate percussion*, which consists in interposing, between the point of the fingers and the chest, the finger of the other hand, or a *Plexim'eter*, and striking this instead of the naked chest.

PERCUSSION, AUSCULTATORY, see *Acuophonia*.

PERCUTEUR, Percuss.

PERCUTEUR COURBE À MARTEAU, (F.) An instrument used by Baron Heurteloup in the operation of lithotomy, in which a hammer is employed instead of a screw, to force together the blades of the instrument on the foreign body.

PERDO'NIUM. A medicated wine of herbs. —Paracelsus.

PERETERIUM, Trepan.

PERETORIUM, Trepan.

PERFORANS, from *perforare*, (*per*, and *forare*), 'to bore through.' A name given to different muscles, whose tendons pass through intervals between the fibres or tendons of other muscles; thence called *perforated*. See *Flexor Longus Digitorum*, &c. Under the name *Perforating Ar'teries*, are included, 1. *In the hand*—arterial branches, given off by the profound palmar arch, which traverse the muscles and interosseous spaces. 2. *In the thigh*—three or four arteries, furnished by the profunda, which pass through the openings of the abductor magnus. 3. *In the foot*—the anterior and superior branches of the plantar arch.

PERFORANS CASSERI, see *Cutaneous* — p. *Mantis*, *Flexor profundus perforans* — p. *Profundus*, *Flexor longus digitorum pedis profundus perforans*.

PERFORATED SPOT, *Locus perforatus*.

PERFORATING ARTERIES, see *Perforans*.

PERFORATIO, Perforation — p. *Cranii*, see *Perforator* — p. *Intestinorum*, *Enterobrosis* — p. *Ventriculi*, *Gastrobrosis*.

PERFORATION, *Perforat'io*, *Anatre'sis*, *Diatre'sis*. Same etymon as *Perforans*. An accidental opening in the continuity of organs, either from an external or internal cause.

PERFORATION, *Paracentesis* — p. *de l'Estomac*, *Gastrobrosis* — p. *des Intestins*, *Enterobrosis* — p. *Uteri*, *Uterus*, rupture of the.

PERFORATOR, *Perforat'orium*, (F.) *Perce-crane*. An instrument for opening the head of the fœtus in utero, when it is necessary to diminish its size. The operation is called *Cephalotomia*, *Perforat'io cranii*.

PERFORATORIUM, Perforator.

PERFORATUS. That which is pierced. Anatomists have given this name to muscles whose fibres or tendons separate to suffer other parts to pass through them. Such are the *Flexor brevis digitorum pedis*, *F. sublimis perforatus*, and *Coraco-brachialis*. Also, to parts that are perforated for any purpose — as the *substantia perforata* of the brain.

PERFORATUS CASSERI, *Coraco-brachialis*.

PERFRIC'TIO, *Perfrige'rium*, *Catapax'is*, *Peripsyx'is*. From *perfrigere*, *perfrictum*, (*per*, and *frigere*), 'to shiver with cold.' Considerable refrigeration. Great sense of cold: — shivering.

PERFRIGERATIO, see *Rigor*.

PERFRIGERIUM, *Perfrictio*.

PERFUSIO, Fomentation — p. *Frigida*, see *Affusio*.

PERI, *περι*, 'about, on all sides, round about.' An augmentative prefix. Hence:

PERIÆRESIS, from *peri*, and *απειν*, 'I take away.' A sort of circular incision, which the ancients made in the neighbourhood of large ab-

Displacer or Percolator.

cesses. The periaeresis is now only practised in some cases of tumours.

PERIAL'GIA, from *peri*, and *αλγος*, 'pain.' A very violent pain.

PERIAMMA, Amuletum.

PERIAPTON, Amuletum.

PERIBLAST, *Periplast*, (F.) *Périblaste*, from *περι*, 'around,' and *βλαστος*, 'a germ.' The amorphous matter, which surrounds the *endoblast*, *endoplast*, (F.) *Endoblaste* or cell nucleus, and undergoes segmentation.

PERIBLEMA, Catablema.

PERIBLEP'SIS, from *peri*, and *βλεπω*, 'I look.' The wild look that accompanies delirium. —*Φοῦσις*.

PERIB'OLĒ, from *περιβαλλω*, (*περι*, and *βαλλω*), 'I surround.' The dress of a person. The pericardium. Also, the translation of morbid matters towards the surface of the body.

PERIBRO'SIS, *Pericard'sis*, from *περιβρωσσω*, (*περι*, and *βρωσσω*, 'I eat,' 'I eat around.' Ulceration or erosion at the corners of the eyelids.

PERICAR'DIAC, *Pericard'ial*, *Pericard'i'acus*; same etymon as *Pericardium*. Relating to the pericardium,—as '*pericardial murmur*,' '*pericardial effusion*,' '*pericardial arteries*, veins,' &c., &c.

PERICARDIAL, *Pericardiac*.

PERICARDITIS, from *pericardium*, and *itis*, denoting inflammation; *Inflam'matio* seu *Pleurit'is pericard'ii*, *Cardit'is exter'na* seu *ser'osa* seu *membrano'sa*, *Exocardit'is*, *Inflam'mation of the pericardium*, (F.) *Péricardite*, *Inflam'mation du Péricarde*. This is probably the proper appellation for most of those cases which have received the names of *Carditis*, *Cardipericardit'is*, *Cardo-pericardit'is*, and *Cardiopericardit'is*. Along with signs of pyrexia, the local symptoms resemble those of pneumonia. Those which point out that the pericardium is the seat of disease, are the following:—pain, referred to the region of the heart, or the scrobiculus cordis,—sometimes pungent, at others, dull and heavy; palpitation, accompanied with spasmodic twitchings in the neighbourhood of the heart, shooting up to the left shoulder; pulsation, and sometimes soreness of the carotids, with tinnitus aurium and vertigo; the breathing is by catches; dyspnoea considerable; pulse jarring, jerking, peculiar; the tongue white, covered with a mucous coat, and the skin often bathed in sweat, as in acute rheumatism. The *physical signs* during the first period are as follows. The action of the heart is generally evident to the eye, and may be felt by the hand. There is soreness to the touch over the intercostal spaces, and over a small surface in the epigastric region, when the pressure is directed upwards towards the pericardium. Percussion is usually natural, but at times there is dulness. On auscultation, the cardiac movements are found to be frequent, abrupt, jerking, and tumultuous; often irregular and intermittent. The pulse presents corresponding characters. When effusion of lymph has occurred, percussion may be negative, or be but slightly affected. On auscultation, in addition to the preceding signs, there may be one or more of the rubbing or friction *bruits* resembling the rustling of parchment, or of a sawing or rasping character. In some cases, the sound is like the creaking of new leather. This has been supposed to be pathognomonic of effused lymph. The most important point in the pathology of pericarditis is its connexion with acute rheumatism; and it forms one of the most dangerous occurrences in the latter disease. It may be *acute* or *chronic*: in either case, it is, of course, formidable. The most active depletion must be used; with large doses of opium, counter-irritants, and all the means re-

quired in the most violent internal inflammations.

PERICARDITIS EXUDATORIA SANGUIOLENTA, Hæmopericardium.

PERICAR'DIUM, *Pericar'dion*, *Perib'olē*, *Membrana Cor circumplexa*, *Involucrum seu Ar'cula* seu *Cap'sa* seu *Cop'sala* seu *Cam'era* seu *Indumentum* seu *Pannic'ulus* seu *Membro'na* seu *Theca* seu *Sacculus* seu *Soc'culus* seu *Scrotum* seu *Vagi'na* seu *Vesi'ca* seu *Arca* seu *Thal'amus reg'alis* seu *Amphib'ema* seu *Bursa Cordis*, *Soc* or *Capsule of the Heart*, (F.) *Péricarde*; from *peri*, and *καρδία*, 'the heart.' The pericardium is a membranous sac, which envelops the heart, and the arterial and venous trunks that pass from or into it. It is seated in the separation of the mediastinum, above the central aponeurosis of the diaphragm, to which it strongly adheres. Its shape is triangular, like that of the heart, to which it is fitted. The pericardium is composed of two membranes:—the one—*external*—*fibrous*; the other—*internal*—*serous*. The latter, having lined the inner surface of the external layer, is reflected over the heart, and covers it entirely; without, however, having the heart within it: in which arrangement it resembles other serous membranes. The pericardium envelops the heart; retains it in position, and facilitates its movements by means of the serous fluid contained in its cavity—*Cavum pericardii*—and secreted by the membrane—*Liquor* seu *Aqua* seu *Humor* seu *Lympha* seu *Uri'na Pericard'ii*, *Hydrocar'dia*, which it contains in greater or less quantity.

The *arteries* of the pericardium are small, and derived from the superior phrenic, anterior mediastinal and bronchial. The *veins* accompany them, and open into the brachio-cephalic. No nerves have been traced to it. The *lymphatics* enter the lymphatic glands that surround the vena cava superior.

PERICARPIUM, *Epicarpium*.

PERICHOLIA, *Polycholia*.

PERICHONDRI'TIS, *Inflam'matio perichond'rii*, from *perichondrium*, and *itis*, denoting inflammation. Inflammation of the perichondrium; hence *Perichondrit'is larynge'a*;—Inflammation of the perichondrium covering the larynx.

PERICHONDRIUM, (F.) *Périchondre*, from *peri*, and *χονδρος*, 'a cartilage.' A membrane of a fibrous nature, which covers cartilages that are non-articular, and bears considerable analogy to the periosteum in organization and uses.

PERICHRISIS, *Circumlitio*, *Liniment*.

PERICHRISTON, *Circumlitio*, *Liniment*.

PERICLA'US, from *peri*, and *κλαω*, 'I break.' A comminuted fracture, with denudation of the bone. — Galen. *Φοῦσις*.

PERICLYMENUM, *Lonicera periclymenum* — p. *Vulgare*, *Lonicera periclymenum*.

PERICNE'MIA, from *peri*, and *κνημη*, 'the leg.' The parts surrounding the tibia;—the tibia itself.

PERICOLONITIS, *Pericolit'is*, from *peri*, and *colonitis*. Inflammation of the areolar tissue surrounding the colon.

PERICOLPI'TIS, from *peri*, *κολπος*, 'vagina,' and *itis*, denoting inflammation. Inflammation of the areolar tissue surrounding the vagina.

PERICRANIEDE'MA, from *pericranium*, and *οἶδημα*, 'a swelling.' Edema of the head, owing to fluid effused under the pericranium.

PERICRANIUM, *Pericra'nion*, *Pericra'nia*, (F.) *Péricrane*, from *peri*, and *κρανιον*, 'the cranium.' The periosteum, which covers the cranium externally.

PERICRASIS, *Peribrosis*.

PERICYSTITIS, from *peri*, *κυστις*, 'the bladder,' and *itis*, denoting inflammation. Inflam-

mation of the areolar tissue separating the bladder from the neighbouring parts.

PERIDERIA, from *peri*, and *δερν*, 'the neck.' Twisting of the cord round the neck of the child.

PERIDESMIC, *Peridesmicus*; from *peri*, and *δεσμος*, 'a ligament.' Some nosologists have given this name to ischuria caused by a ligature round the penis or by stricture of the urethra.

PERIDESMIUM, from *peri*, and *δεσμος*, 'ligament.' The delicate areolar tissue covering a ligament.

PERIDIASTOLE, see Diastole.

PÉRIDIDYME, see Testicle.

PERIDROMUS, from *peri*, and *δρομος*, 'a course.' The extreme circumference of the hairs of the head.—Gorræus.

PERILETTICUS, Salutory.

PERIGLOTTIS, Epiglottic gland: see Tongue.

PERIGRAPHË, from *περιγραφω*, (*περι*, and *γραφο*, 'I write,') 'I circumscribe.' The aponeurotic intersections of the rectus abdominis are so called.—Vesalius.

PERIHEPATITIS, see Hepatitis.

PERILARYNGITIS, from *peri*, *larynx*, and *itis*, denoting inflammation. Inflammation of the areolar tissue surrounding the larynx, which not infrequently ends in *perilaryngeal abscess*.

PERILYMPH, Cotunnian liquor of.

PERIMYELITIS, Meningitis, spinal.

PERIMYSIUM, *Fascia*, from *peri*, and *μυς*, 'a muscle.' The areolar membrane or sheath—*vagina muscularis*—that surrounds a muscle, or its fasciculi. The sheath of the whole muscle is termed *Perimysium externum*; of the fasciculi, *Perimysium internum*.

PERIN, *Peria*, from *περα*, 'a see or pouch.' With some, this means the scrotum; with others, the testicle; with others, the vagina; with others, the peritonæum; and with others, the anus.

PERINÆOCÈLE, Hernia, perineal.

PERINÆORRHAPHY, *Perinæorrhaphia*, from *περιναϊον*, 'perinæum,' and *ραφη*, 'suture.' Suture of the perinæum, (F.) *Suture du Périnée*, in cases of laceration of the same.

PERINÆUM, *Interfœminæum*, *Interfœminæum*, *Interfœminium*, *Interfœmina*, *Iter fœminæum*, *Peris*, *Perin*, *Perineum*, *Gressu'ra*, *Plechas*, *Am'phiptex*, *Peche'deon*, *Mesos'celon*, *Mesos'celus*, *Perine'ou*, *Perine'os*, *Perine'os*, *Tromis*, *Taurus*, *Interfœminæum*, *Cocho'nè*, *Plichos*, *Mesom'ion*, *Fœmen*, *Re'gio Perinæ'i*, (F.) *Périnée*, (*πριεν*, *πριενος*, 'the serotum' [?]). The space at the inferior region of the trunk, between the ischiatic tuberosities, anus, and genital organs. It is smaller in the female than in the male; has a triangular shape, and is divided into two equal parts by a median line, called *Raphè*. It is occasionally ruptured in labour. At times, it has been made to extend posteriorly as far as the os coccygis. The part between the pudendum and anus is sometimes called *anterior perinæum*, to distinguish it from that which extends from the anus to the coccyx, called *posterior perinæum*.

PERINÆUS, Perineal.

PERINÆAL, *Perinæus*, *Perinæalis*, *Perinæalis*. That which relates or belongs to the perinæum; as *Perineal artery*, *P. hernia*, &c.

PERINÆAL APONEUROSIS, P. Fascia.

PERINÆAL ARTERY, *Art'ria perinæalis*, *Superficial artery of the Perinæum*. A branch of the internal pudic distributed to the perinæum.

PERINÆAL CUTANEOUS NERVE, see Sciatic nerve, lesser.

PERINÆAL FASCIA, *Fascia Perinæ'i*, *Perineal aponeurosis*. The fasciæ,—*superficial* and *deep-seated*—*Perinæal ligament*—*Cumpræ'ia ligament*, *Triangular ligament*,—which belong to the perinæum.

PERINÆAL FOSSA, *Fossa perinæ'i*, *Ischio-rectal fossa*. A conical fossa, the base of which corresponds with the skin; is formed anteriorly by the transversus perinæi muscle; behind, by the inferior border of the glutæus maximus; internally, by the levator ani; and externally, by the tuber ischii. It is filled up with fat and fibrous stræ.

PERINÆAL ISCHURIA, *Ischn'ria Perinæ'lis*. A name given by Sauvages to retention of urine, caused by a tumour seated in the perinæum.

PERINÆAL LIGAMENT, see P. fascia.

PERINÆAL NERVE. A branch of the internal pudic; which is mainly distributed to the perinæum and scrotum of the male; and to the vulva and perinæum of the female.

PERINÆAL REGION, *Perinæum*.

PERINÆAL SECTION, *Sec'tio perinæ'alis*. An incision into the perinæum for the cure of stricture of the urethra.

PÉRINÉE, *Perinæum*.

PERINEPHRITIS, (F.) *Phlegmon périnéphrétique*, from *peri*, *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the external areolar and fibrous membranes of the kidney, or of their investing adipose areolar tissue.

PERINEPHRUS, see Kidney.

PERINEURION, *Neurilemma*.

PÉRINÈVRE, *Neurilemma*.

PERINYCTIDES, *περι*, and *νοξ*, *νυκτος*, 'night.' An eruption appearing at night and disappearing by day.—Erotian.

PERIOD, *Pe'riodus*, *Periodei'a*, *Periodou'sis*, *Stad'ium*, *Circu'itus*, (F.) *Période*, from *peri*, and 'odos,' 'way'; *Circuit*. *Periods* are the different phases or revolutions of a disease,—the epochs which are distinguishable in the course of a disease. Three periods are commonly enumerated. 1. The *augmentation, increase, or progress*, (*Incrementum*); 2. The *acme or height*, (F.) *État (Status)*; and 3. The *decline* (*Decrementum*.) Some authors reckon only the *invasion and termination*.

Period is sometimes used in describing an intermittent, for the time between the commencement of a paroxysm and that of the next, including the fit as well as interval.

PERIODS, MONTHLY, *Menses*.

PERIODEIA, *Period*.

PERIODEUSIS, *Period*.

PERIODEUTES, *Charlatan*.

PERIODICITY, *Periodic'itas*, *Rhythm*, (F.) *Périodicité*. Same etymon. The aptitude of certain physiological and pathological phenomena, in health or disease, to recur at particular periods, after longer or shorter intervals, during which they cease completely. Diseases, thus recurring, are called *periodical* or *rhythmical*—*Τυπο'ses*.

PERIODOL'OGY, *Periodolog'ia*; from *περι-odos*, 'a course or circuit,' and *λογος*, 'a discourse.' The doctrine of periodicity in health and disease.

PERIODONTITIS, (F.) *Périodontite*, *Inflammation de la Membrane alvéolo-dentaire*, from *peri*, and *όδοντος*, 'a tooth.' Inflammation of the membrane that lines the socket of a tooth.

PERIODONTITIS GINGIVARUM, *Ulitis*.

PERIODOSCOPE, from *περιόδος*, 'a period,' and *σκοπεω*, 'I view.' An instrument, proposed by Dr. Tyler Smith, for the ready calculation of the periodical functions of the sex. It consists of a movable circular dial, upon which the months and days are engraved, fixed on a pivot in the centre of a large plate on which are numbered the different conditions of the reproductive system, as conception, abortion, premature labour, hemorrhage, labour, &c. By a knowledge of the date of conception, say November 14th, and fixing

the movable plate opposite the point on the fixed plate which indicates conception, the observer is enabled, at once, to see, that, allowing 280 days for gestation, labour may be expected about the 20th of August. The dial is made of card-board, and is affixed to a small volume, in which its uses and applications are explained.

PERIODUS LUNARIS, see *Menses* — p. *Morbi*, Type — p. *Sanguinis*, Circulation.

PERIODYNTIA, from *peri*, and *ὄδυν*, 'pain.' A violent and extensive pain.

PÉRIONE, Decidua.

PERIORBITA, *Periosteum orbite*, (F.) *Périorbite*, from *peri*, and *orbita*, 'the orbit.' An appellation used, by some, for the periosteum lining the orbit, which is a continuation of the dura mater. The inflammation of this periosteum is termed *Periorbitis* or *Periorbititis*, and *Inflammatio periosteï orbite*.

PERIORBITIS, see *Periorbita*.

PERIORBITITIS, see *Periorbita*.

PERIOSTEITIS, see *Periostitis*.

PERIOSTEOPHYTE, from *periosteum*, and *φυα*, 'I grow.' An osseous formation, commencing in the periosteum.

PERIOSTEUM, *Periosteum*, *Periosteos*, *Periostium*, *Circumossale*, *Membra'na ossis*, *Omentum ossium*, *Circumossalis Membrana*, (F.) *Périorste*, from *peri*, and *στέον*, 'a bone.' The periosteum is a fibrous, white, resisting medium, which surrounds the bones every where, except the teeth at their coronæ, and the parts of other bones that are covered with cartilage. The external surface is united, in a more or less intimate manner, to the neighbouring parts by areolar tissue. Its inner surface covers the bone, whose depressions it accurately follows. It is united to the bone by small, fibrous prolongations; and, especially, by a prodigious quantity of vessels, which penetrate their substance. The periosteum unites the bones to the neighbouring parts. It assists in their growth, either by furnishing, at its inner surface, as M. Béclard demonstrated, an albuminous exudation, which becomes cartilaginous, and at length ossifies;—or by supporting the vessels, which penetrate them to carry the materials of their nutrition. See *Medullary membrane*.

PERIOSTEUM INTERNUM, *Medullary membrane* — p. *Orbitæ*, *Periorbita*.

PERIOSTITIS, *Periosteitis*, *Inflammatio periosteï*, from *periosteum*, and *itis*, denoting inflammation. Inflammation of the periosteum.

PERIOSTO-MEDULLITIS, (F.) *Périostomédullite*, from *periosteum*, *medulla*, 'marrow,' and *itis*, a suffix denoting inflammation. Simultaneous inflammation of the periosteum and medulla spinalis. — Gerdy.

PERIOSTOSIS, (F.) *Périostose*. Tumour of the periosteum. Tumours are so called which are developed on bones, and formed by their outer membrane. These tumours are more rapidly developed, have a less degree of consistence, and sooner disperse than exostoses, which they resemble greatly.

PERIOSTOSTEITIS, (F.) *Périostostéite*, from *periosteum*, *στέον*, 'a bone,' and *itis*, denoting inflammation. Simultaneous inflammation of the periosteum and bone. — Gerdy.

PERIPHERAD, see *Peripheral aspect*.

PERIPHERAL, *Periph'eric*, *Peripheral*; from *peri*, and *φέρω*, 'I bear.' Relating or appertaining to the periphery or circumference.

PERIPHERAL ASPECT. An aspect towards the circumference of an organ. — Barclay. *Periph'erad* is used by the same writer adverbially to signify 'towards the peripheral aspect.'

PERIPHERAL VASCULAR SYSTEM, *Capillary system*.

PERIPHIMOSIS, *Paraphimosis*.

PERIPLAST, *Periblast*.

PERIPLEUMONIA, *Peripleumonia*.

PERIPELOCA INDICA, *Hemidesmus Indicus* — p. *Mauritiana*, see *Scammony*.

PERIPLYSIS, from *peri*, and *πλύσις*, 'the act of washing;' *Proflu'vium*. A copious discharge from any part, especially from the bowels.

PERIPNEUMONIA, *Peripleumonia*, *Peripneumonitis*, *True peripneumony*, from *peri*, and *πνευμων*, 'the lung.' Inflammation of the substance of the lungs. See *Pneumonia*.

PERIPNEUMONIA BILIOSA. Inflammation of the lungs, accompanied with bilious fever.

PERIPNEUMONIA CATARRHALIS. Bronchitis or pulmonary catarrh, with pain in some part of the chest. *Peripleumonia notha*.

PERIPNEUMONIA NOTHA, *P. spuria* seu *pituitosa* seu *catarrhalis*, *Pneumonia notha*, *Pseudo-peripleumonia*, *Pseudo-pneumonia*, *Pseudo-pneumonitis*, *Bronchoc'ace*, *Blenorrh'acæ*, *Obstruction pulmonum pituitosa febrilis*, *Bronchitis asthenica*, *False* or *Bastard Peripneumony*, (F.) *Péripneumonie bâtarde* ou *fausse*, *Fausse pneumonie*. An inexact name, under which some affections are comprised that resemble pneumonia; and, especially chronic bronchitis with pleurodynia. See *Bronchitis (chronic)*.

PERIPNEUMONIA PITUITOSA, *P. notha*.

PERIPNEUMONITIS, *Peripleumonia*.

PERIPNEUMONY, *Pneumonia* — p. *Bastard*, *Peripleumonia notha*.

PERIPNEUMONY, LATENT. *Peripleumony* whose symptoms are so obscure as to be recognised with difficulty.

PERIPROCTITIS, from *peri*, 'around,' and *πρωκτος*, 'the anus.' Inflammation of the areolar tissue surrounding the rectum.

PERIPSYXIS, *Catapsyxis*, *Perfrictio*.

PERIPYEMA, from *peri*, and *πυον*, 'pus,' Suppuration around an organ; — a tooth for example.

PERIRRHOËA, *Peri'rrhoë*, from *peri*, and *ρῶα*, 'I flow.' Afflux of fluids from every point of the body towards an organ which has to remove them from the economy. Also, *enuresis*.

PERIS, *Perin*.

PERISCELIS, *Jarretière*.

PERISCYPHISMUS, *Periscythismus*.

PERISCYTHISMUS, *Periscythisis*, *Periscythismus*, *Periscy'tisis*, *Periscy'phismus*, *Scalping*, from *peri*, and *σκυθης*, 'a Scythian,' that is, 'scalping after the manner of the Scythians.' An operation described by Paulus of Ægina. It consisted of an incision made around the cranium, and was employed in habitual weakness of the eyes, pains of the head, &c.

PERISPHALSIS, *Circumductio*, from *peri*, and *σφαλλω*, 'I move.' A circular motion impressed on a luxated bone, for the purpose of reducing it.

PERISSODACTYLUS, *Polydactylus*.

PERISPLENITIS, see *Splenitis*.

PERISTALTIC, *Systaltic* — p. *Action*, *Peristole*.

PERISTAPHYLINUS EXTERNUS, *Circumflexus musculus* — p. *Inferior*, *Circumflexus musculus* — p. *Internus*, *Llevator palati*.

PERISTERA ANCEPS, *Pelargonium anceps*.

PERISTERIUM, *Verbena officinalis*.

PERISTERNA, from *peri*, and *στερνον*, 'the sternum.' The lateral parts of the chest.

PERISTOLE, *Motus Peristalticus* seu *compressorius* seu *vermicularis* seu *testudin'ens*, from *peri*, and *στέλω*, 'I contract,' 'I close.' The peristaltic action of the intestines, *Motus peristalticus*, (F.) *Mouvement péristaltique*. It consists of a kind of undulation or vermicular movement,

in appearance irregular, but in which the circular fibres of the muscular membrane of the intestine contract successively, from above downwards, in proportion as the chyme advances in the alimentary canal; so that, being compressed above, it is pushed into the next portion of the intestine, whose fibres are in a state of relaxation. When the fibres contract inversely, they occasion an *antiperistaltic action*. The peristaltic action is involuntary, and is not under the immediate influence of either brain or spinal marrow. It continues for some time after death.

PERISTOMA, Peristoma.

PERISTOMIUM, Mouth.

PERISTROMA, *Peristoma*, *Musculus villus*, *Cruata membranae seu vermicularis*, from *peri*, and *σπασμυ*, 'to spread.' The villous or mucous coat of the intestines.—Castelli.

PERISYSTOLE, from *peri*, and *συστολη*, 'contraction.' The interval that exists between the systole and diastole of the heart, which is only perceptible in the dying.—Bartholine.

PERITERION, *Trépan perforatif*.

PERITESTIS, Albuginea.

PÉRITONE, Peritonæum.

PERITOME, Circumcision.

PERITONÆREX'IS, from *peritonæum*, and *σπασμυ*, 'to break.' Hernia formed by the rupture of the peritonæum.

PERITONÆUM, *Peritonæum*, *Peritonæon*, *Peritonæum*, *Peritonæos*, *Peritonæon*, *Peritonæos*, *Velumētum abdominale*, *Tunica prætenſa seu Operimentum prætenſum seu Membra'na abdominalis*, *Pugio*, *Siphax*, *Syphax*, *Zepach*, *Ziphac*, (F.) *Péritoine*, from *peri*, and *τενω*, 'I stretch.' A serous membrane, which lines the abdominal cavity, *Peritonæum parietale*, extends over the greater part of the organs contained there, *Peritonæum intestinale seu viscera'le*, envelops them wholly or in part, and maintains their respective relations by means of different prolongations and ligamentous folds:—the *mesentery*, *epiploon*, *mesocolon*, &c. Like all the serous membranes, the peritonæum, except in the female, is a sort of sac without aperture, which covers the abdominal organs, without containing them within it, and the internal surface of which is smooth, and lubricated by a serous fluid. In the male fetus, the peritonæum furnishes a prolongation, which accompanies the testicle at the time of its descent, and, in the female fetus, forms the *Canal of Nuck*. Below the neck of the gall-bladder, the peritonæum has a triangular opening, called the *Foramen or Hintus of Winslow*, through which it proceeds behind the stomach, to form a sort of secondary cavity, called the *posterior cavity of the peritonæum*, (F.) *Arrière cavité péritonéale ou Cavité des Épiploons*.

PERITONÆUM DUPLICATUM, Epiploon, gastrocolic.

PERITONÆAL, *Peritonæus*. That which appertains or relates to the peritonæum.

PÉRITONITE, Peritonitis—*p. Puerérale*, see Peritonitis.

PERITONITIS, *Empres'ma seu Cumma Peritonitis*, *Peritonæitis*, *Inflammati'o seu Phlegmonæ Peritonæi*, *Phlegmasia* or *Inflammation of the Peritonæum*, from *peritonæum*, and *itis*, denoting 'inflammation.' (F.) *Péritoine*, *Inflammation du Péritoine*. The characteristic signs of acute inflammation of the peritonæum are,—violent pain in the abdomen, increased by the slightest pressure, often by the simple weight of the bed-clothes. It generally occurs in the parturient state; *Lochoperitonitis*, and begins on the second or third day after delivery. At times, a malignant epidemic, and perhaps contagious, variety has made its appearance, and destroyed

numbers of females. This has been described under the name *Puer'peral Fever*, *Metroperitonitis*, *Encécin Sp'nochus Puerperarum*, (F.) *Périmonie puerérale*, *Métropéritonite puerérale*, *Fidère puerérale*, *Typhus pueréral*, *Erythemat'ic* or *Nonplast'ic Puerperal Peritonitis*, *Typhohæmic Peritonitis*, *Adynam'ic* or *Malignant Puer'peral Fever*, *Low Fever of Childbed*. It is, according to some, a malignant inflammation of the peritonæum and uterus; according to others, a *Uterine Phlebitis*. In any form it requires active treatment, early employed. The appearances on dissection are such as occur whenever a serous membrane has been inflamed, and such inflammation has produced death:—effusion of fluid with flakes of coagulable lymph in it; appearances of vascularity, &c., in the membrane. The treatment—in *active peritonitis*—must consist of the same course as recommended under Enteritis. In the *chronic* kind, symptoms must be combated as they arise, and it may be advisable to excite a new action in the system by means of mercury. In the epidemic and malignant variety, unless bleeding be freely employed at the very outset, it does harm. If used early, it is of decided advantage. Everything depends upon arresting the morbid process at the outset.

PERITONITIS, ERYTHEMATIC, see Peritonitis—*p. Hepatica*, see Hepatitis—*p. Nonplast'ic*, see Peritonitis—*p. Puerperal*, see Peritonitis—*p. Typhohæmic*, see Peritonitis.

PERITOMA, Excrement.

PERITYPHLYTIS; from *peri*, and *typhlitis*, inflammation of the cæcum. Inflammation of the areolar substance surrounding the cæcum. See Typhlo-enteritis.

PERI-UTERINE, *Peri-uterinus*, badly compounded from *peri*, and *uterus*. That which is situated around the uterus; hence "*periterine inflammation*" or "*periterine phlegmon*,"—inflammation of the areolar tissue around the uterus.

PERIWINKLE, LESSER, *Vinea minor*.

PERIZOMA, from *περιζωννυμι*, (*περι*, and *ζωννυμι*, 'to gird'), 'to gird around.' A bandage; a girdle. In Fabricius Hildanus, a truss. Herpes zoster. The diaphragm.

PER'KINISM. A therapeutical means, first employed by Dr. Elisha Perkins, of Norwich, Connecticut, towards the termination of the last century, and named after him. It consisted in drawing over affected or other parts the pointed extremities of two metallic rods, called *Metallic Tractors*, each made of a different metal. The success obtained, was through the influence of the imagination; and, consequently, as a remedial agent, it ranks as high as animal magnetism, but no higher. The operation was, also, called *Tractor'ation*.

PER'KINIST. A believer in and practiser of Perkinism.

PERKINIS'TIC. Relating or belonging to Perkinism.

PERLA, Pearl, Paralampsis.

PERLE, Pearl.

PERMISTIO, Coition.

PERMISTIO, Coition.

PERMOTIO, Motion.

PERNICIE'UX, Deleterious.

PERNICIOSUS, Deleterious.

PERNIO, Chilblain.

PERNOCTATIO, Insomnia.

PEROCEPH'ALUS, from *πηρος*, 'deficient,' and *κεφαλη*, 'head.' A monster with a defective head.

PEROCOR'MUS, from *πηρος*, 'deficient,' and *κορμος*, 'trunk.' A malformation in which the trunk is defective, and too short, from the ab-

sence of one or more vertebræ,—the head and limbs being normal.

PERODACTYLEUS, Flexor longus digitorum pedis profundus perforans.

PERODYNIA, see Cardialgia.

PEROMELIA, from *πηρος*, 'deficient,' and *μελος*, 'a limb.' Congenital misconstruction, or mutilation of the limbs. A genus in the nosology of Good.

PEROM'ELUS. A monster possessed of the deformity mentioned above.

PÉRONÉ, Fibula—*p. Col du*, Collum fibulæ.

PERONE'AL, *Peronæ'us*, *Fibula'ris*, *Fib'ular*, (F.) *Péronier*, from *περονν*, 'the fibula.' Belonging or relating to the fibula.

PERONEAL ARTERY, *Fib'ular*, *A.*, arises from the popliteal, and is situate deeply in the posterior and outer part of the leg. It gives off branches of little importance. Near the outer ankle, it divides into two branches. 1. The *posterior peroneal*, which descends behind the lower joint of the fibula, on the outer surface of the calcaneum. 2. The *anterior peroneal*, which crosses the inferior extremity of the interosseous ligament, to be distributed on the dorsal surface of the foot.

PERONEAL MUSCLES are three in number. 1. *Peronæus Brevis seu Secundus seu Anticus seu Medius*, *Semi-fibulæ'ns*, (F.) *Grand-péronéo-sus-métatarsien*, *Court péronéo-latéral*, *Moyen Péronier*. A muscle, situate beneath the peronæus longus. It is attached above, to the outer surface of the fibula, and terminates, below, at the posterior extremity of the 5th metatarsal bone, after having been reflected beneath the malleolus externus. It extends the foot upon the leg, at the same time raising a little the outer edge. It may, also, act upon the leg, and extend it upon the foot. 2. *Peronæus Longus seu primus seu posticus seu maximus seu posterior*, (F.) *Tibi-péronéo-tarsien*, *Long péronier latéral*, *Péronéo-sus-tarsien*, (Ch.) *Muscle grand péronier*. This muscle is situate at the outer part of the leg. It is long, thick, and triangular above; thin, narrow, and flat below. It is attached above to the outer edge of the upper extremity of the fibula, and to the upper third of the outer surface of that bone. Below, it terminates at the outer part of the posterior extremity of the first metatarsal bone. This muscle extends the foot on the leg, turning its point outward, and raising its outer edge. It acts, also, upon the leg, which it extends on the foot. 3. *Peronæus Tertius*, *Nonus Vesalii*, (F.) *Péronier antérieur*, *Petit péronéo-sus-métatarsien* (Ch.) *Petit Péronier*. A muscle, situate at the anterior, outer, and inferior part of the leg. It is long and flat, and is attached, above, to the inferior third of the anterior margin and inner surface of the fibula; terminating, below, at the posterior extremity of the 5th metatarsal bone. This muscle bends the foot on the leg, by raising its outer edge. It can, also, bend the leg on the foot.

PERONEAL NERVE, see Popliteal nerves.

PERONEAL VEIN follows the same course as the artery.

PERONEDACTYLIUS, Flexor longus digitorum pedis profundus perforans.

PÉRONÉO-LATÉRAL COURT, *Peronæus brevis*—*p. Phalanginien du gros orteil*, Flexor longus pollicis pedis—*p. Sous-phalangettien du ponce*, Flexor longus pollicis pedis—*p. Sous-tarsien*, *Peronæus longus*—*p. Sus-métatarsien*, *Peronæus tertius*—*p. Sns-métatarsien*, *grand*, *Peronæus brevis*—*p. Sns-phalangettien du ponce*, Extensor proprius pollicis pedis—*p. Tibi-sns-phalangettien commun*, Extensor communis digi-

torum pedis—*p. Sns-phalangien du ponce*, Extensor proprius pollicis pedis.

PERONEUM, Fibula.

PÉRONIER, Peroneal.

PÉRONIER, **GRAND**, *Peronæus longus*—*p. Latéral*, *long*, *Peronæus longus*—*p. Moyen*, *Peronæus brevis*—*p. Petit*, *Peronæus tertius*.

PERONODACTYLÆUS, Flexor longus digitorum pedis profundus perforans.

PERONODACTYLIUS, Flexor longus digitorum pedis profundus perforans.

PEROS'OMUS, from *πηρος*, 'deficient,' and *σωμα*, 'body.' A monster, whose whole body is imperfectly developed.—Gurlt.

PEROSPLANCH'NICA, from *πηρος*, 'deficient,' and *σπλaxxov*, 'a viscus.' Congenital misconstruction of the viscera. A genus in the nosology of Good.

PERPENDICULUM HEPATIS, Suspensory ligament of the liver.

PERPERACU'TUS. 'Extremely acute.' An epithet applied to very violent and rapid diseases.

PERPLEXI MORBI, see Complication.

PERPLICATION, *Perplicatio*; from *per*, 'through,' and *plico*, *plicatum*, 'to fold.' A method of tying arteries, which consists in making a small incision in the side of the artery, near its bleeding orifice, introducing a small pair of forceps, seizing the open extremity, and drawing it backward, through the aperture made in the side of the vessel, so as to form a kind of knot.

PERROSIN, see Pinus abies.

PERRY COUNTY WARM SPRINGS. These are in Pennsylvania, eleven miles from Carlisle, and fourteen from Harrisburg. Temperature 67°; impregnation not much. They are used for bathing.

PERSEA CAMFORA, see Camphor—*p. Cassia*, *Laurus cassia*—*p. Cinnamomum*, *Laurus cinnamomum*—*p. Cubeba*, *Piper cubeba*.

PER'SEA GRATIS'SIMA, *Laurus Persea*, *Palta tree*, *Avocado Pear*. A slender, very high tree of Peru, with a small dome-like top, which grows on the eastern declivity of the Andes, and rises, at times, to the height of more than 60 feet. Its fruit—(S.) *Palta*—which is pear-shaped, is generally much liked. It dissolves, like butter, on the tongue, and hence is called, in some of the French colonies, *beurre végétale*. The leaves are reckoned balsamic, pectoral and vulnerary. The seeds are very astringent.

PERSEA PICHURUM, see Pichurium beans—*p. Sassafras*, *Laurus sassafras*.

PERSIAN FIRE, Anthracion.

PERSICA VULGARIS, *Amygdalus Persica*.

PERSICAIRE ÂCRE, *Polygonum hydropiper*—*p. Brulante*, *Polygonum hydropiper*—*p. Douce*, *Persicaria*—*p. Poirée*, *Polygonum hydropiper*.

PERSICARIA, *Polygonum Persicaria*—*p. Minor*, *Polygonum Persicaria*—*p. Mitis*, *Polygonum Persicaria*—*p. Urens*, *Polygonum hydropiper*—*p. Wandspiked*, *Polygonum Virginianum*—*p. Water*, *Polygonum amphibium*.

PERSIL, *Apium petroselinum*—*p. d'Âne*, *Chærophyllum sylvestre*—*p. Faux*, *Æthusa cynapium*—*p. de Macédoin*, *Bubon Macedonicum*—*p. de Montagne*, *Athamanta aureoselinum*.

PERSIMMON, *Diospyros Virginiana*.

PERSOLATA, *Arctium lappa*.

PERSOLLATA, *Arctium lappa*.

PERSOLUTA, *Arctium lappa*.

PERSPICILLUM, see Spectacles.

PERSPIRABLE SANCTORIANUM, Perspiration.

PERSPIRA'TION, *Perspiratio*, *Transpiratio*, *Diffusio*, *Diaph'noë*, *Diapna'ca*, *Diapne'is*, *Perspirab'ilè* *Sanctoria'num*, from *per*, 'through,

and *spirare, spiratum*, 'to breathe, exbale.' The *insensible transpiration* or exhalation continually going on at the surface of the skin and membranes. Sensible perspiration is called *sweat*. The perspiratory fluid is secreted by an appropriate glandular apparatus, termed by Breschet, *diapnoy'euus*, (F.) *Appareil diapnoy'eu*; the *sudorip'arous glands*, *Gland'ulæ sudorip'aræ*, *Or'gana sudorip'ara*, *sweat glands*, consisting of a convoluted tube, situate beneath the true skin, and of spiral ducts, which open obliquely under the scales of the epidermis. A certain portion of the perspired fluid is thrown off by ordinary physical evaporation.

The *Pulmonary exhalation* or *transpiration* is that which takes place into the bronchia, and is sent out with the expired air.

PERSPIRATORY, *Perspirato'rius*, *Transpi'ratory*, *Transpirato'rius*, (F.) *Perspiratoire*, *Transpi'ratoire*. Same etymon as the last. Relating or belonging to, or the product of, perspiration.

PERSUDATIO, Diapedesis.

PERSULTATIO, Diapedesis.

PERTE, Metrorrhagia—*p. d'Appetit*, Anorexia—*p. de la Mémoire*, Amnesia—*p. de l'Odorat*, Anosmia—*p. de Sang*, Hæmorrhagia—*p. de la Voix*, Aponia—*p. de la Vue*, Cæcitas.

PERTÉBRANT, *Perte'brans*, from *per*, 'through,' and *terebare*, 'to bore.' The French give this epithet to a neutre pain—*Douleur pertébrante*—which occasions a sensation like that which would be produced by an instrument penetrating and lacerating a part;—the pain from whitlow, for example.

PERTES BLANCHES, Leucorrhœa—*p. de Sang*, Metrorrhagia—*p. Séminales*, Spermatorrhœa—*p. Utérides*, Metrorrhagia—*p. Utérides blanches*, Leucorrhœa—*p. Utérides rouges*, Metrorrhagia.

PERICA PER SE, Penis.

PERTURBATIONES ANIMI, Affections of the mind.

PERTURBA'TRIX, (*Medici'na*) from *perturbare*, *perturbatum* (*per* and *turbare*) 'to disturb greatly.' *Per'turbating treatment*, (F.) *Méthode ou Médecine perturbatrice*; a mode of treatment in which very active means are employed, and such as impress upon diseases a different course from that natural to them. It is the antithesis to the *Medicina expectans*. Much evil has resulted from such treatment, especially in febrile diseases.

PERTUS'SIS, from *per*, and *tussis*, 'a cough,' 'a violent cough.' *Tussis feri'na* seu *convulsi'va* seu *pul'eron* *strang'ulans* seu *quinta seu stomacha'lis* seu *an'hela clamo'sa* seu *stran'gulans* seu *delu'ssans* seu *suff'ocans* seu *amphemer'ina* seu *tussicido'sa* seu *spasmod'ica* seu *osini'na* seu *cani'na*, *Brouchi'tis convulsi'va*, *Bronchocephali'tis*, *Pneusis pectus'sis*, *Amphemer'ina*, *Orthopne'a tussiculo'sa* seu *clango'sa* seu *suffocati'va* seu *clamo'sa* seu *spasmod'ica*, *Morbus Cœcul'us* seu *cuculla'ris*, *Cœcul'us*, *Bechorthopne'a*, *Bez convulsi'va* seu *therio'des*, *Whooping-cough*, *Whooping-cough*, *Chin-cough*, *Kind-cough*, *Kind-cough*, (Germ. *Kind*, 'a child,') (Sc. *Kink-host*, (Prov.) *Kinkhaust*, (F.) *Couqueche*, *Catarrhe ou Bronchite convulsive*, *Toux convulsive* ou *quintante* ou *bleue*, *Maladie cucullaire*. A violent convulsive cough, returning by fits, (F.) *Quintes*, at longer or shorter intervals; and consisting of several expirations, followed by a sonorous inspiration or *whoop*. The fits of coughing generally recur more frequently during the night, morning, and evening, than in the day. It is esteemed to be contagious, and attacks the young more particularly. It is rare for it to affect an individual for the second time. The duration is various,—six or eight weeks or more. Although the paroxysms are very violent, it is not a dangerous disease. It may, however,

give rise to other affections, as convulsions, pneumonia, &c., when the complication is very dangerous, as the cause cannot be removed. Those children suffer the least, who evacuate the contents of the stomach during the fit. In the treatment, all that can be done is to palliate. It must be borne in mind, that the disease will, in time, wear itself out. If there be such tensive pain of the head, or fever, bleeding may be required, but it is seldom necessary. Narcotics occasionally afford relief, but it is temporary. Gentle emetics, given occasionally, when the paroxysms are long and dry, give decided relief, and aid in the expectoration of the morbid secretions. After the disease has continued for some weeks, and persists in part from habit, change of air is essential, and this even should the change be to an atmosphere that is less pure.

PERU, see Lima.

PERUNCTIO, Inunction.

PERVENCHE, *Vinea minor*.

PERVER'SION, *Perver'sio*, from *per* and *vertere*, *versum*, 'to turn.' *Dias'trophê*, *Diastrem'ma*. One of the four modifications of function in disease: the three others being augmentation, diminution, and abolition. The humourists used this term also to designate disorder or morbid change in the fluids.

PERVERSION DE LA TÊTE DES OS ET DES MUSCLES, *Loxarthrus*.

PERVIGILIUM, *Insomnia*, *Coma vigil*.

PES, genitive *Pedis*, *πους*, *πόδος*, *Ichnus*, (Sc.) *Fit*, (F.) *Pied*, 'the foot.' The inferior extremity of the abdominal member, representing a bony arch, an elastic vault, which transmits the weight of the body to the ground. It is divided into three parts;—the *tarsus*, *metatarsus*, and *toes*.

PES ALEXANDRINUS, *Anthemis pyrethrum*—*p. Anserinus*, *Chenopodium bonus Henricus*, *Facial nerve*—*p. Cati*, *Antennaria Dioica*—*p. Equinus*, *Pes equinus*, see *Kyllosis*—*p. Hippocampi major*, *Cornu ammonis*—*p. Hippocampi minor*, *Hippocampus minor*—*p. Hippopotami major*, *Cornu ammonis*—*p. Hippopotami minor*, *Cornu ammonis*—*p. Leonis*, *Alchemilla*.

PESANTEUR, *Weight*—*p. Spécifique*, *Gravity*, *specific*.

PÈSE-ACIDE, *Acidometer*—*p. Liqueur*, *Areometer*—*p. Sirop*, *Saccharometer*.

PESETTE, *Cicer arietinum*.

PESSAIRE, *Pessary*—*p. Intra-utérin*, *Pessary*, *intra-uterine*.

PES'SARY, *Pess'arium*, from *πέσος*, 'a small stone; a pessary,' *Pessus*, *Pessum*, *Pes'sulus*, *Penicill'us*, *Talus*, *Nod'ulus uteri'nus*, *Supposito'rium uteri'nus*, *Glans*, *Lemnis'cus*, (F.) *Pessaire*. A solid instrument, composed of cork, ivory, or elastic gum, which is introduced into the vagina to support the uterus, in cases of prolapsus or relaxation of that organ; to keep vaginal hernia reduced, &c. The ancients made use of medicated pessaries, which they distinguished into emollient, astringent, aperient, &c., and they are still used. The form of pessaries is very variable;—round, oval, &c., according to circumstances.

PESSARY, *EGYPTIAN*, *Ægyptius pessus*.

PESSARY, *INTRA-UTERINE*, *Stem pessary*, (F.) *Pessaire intra-utérin*, *Redresseur utérin*. An instrument for rectifying uterine displacements—*as anteversion and retroversion*, consisting of a stem which is introduced into the uterus; this stem is attached to a flattened ovoid bulb or ball, on which the cervix uteri rests.—Connected with this is an external part or wire frame, which is attached, at one extremity, to a flat tubular portion, passing into the vagina, to be fixed to the intra-uterine portion. The wire frame is made to

press upon the pubis, so that the pessary can be kept in position *in utero*. This is essentially the intra-uterine pessary of Professor Simpson of Edinburgh.

PESSARY, STEM, Pessary, intra-uterine.

PESSULUS, Pessary, Penis.

PESSUM, Pessary.

PESSUS, Pessary.

PEST, Plague.

PESTE, Plague — *p. Antoinine*, Plague of Antoninus — *p. d'Athènes*, Plague of Athens — *p. Noice*, Death, black.

PESTICHIÆ, Petchiæ.

PESTICLÆ, Petchiæ.

PESTILENCE, *Pestilentia*, *Pestil'itas*, from *pestis*, 'a pest.' A malignant spreading disease; — applied especially to plague.

PESTILENCE, CHOLERIC, Cholera spasmodica — *p. Glandular*, Plague — *p. Hæmagastric*, Fever, yellow — *p. Septic*, Plague.

PESTILENT-WORT, Tussilago petasites.

PESTILENTIA, Plague — *p. Hæmagastrica*, Fever, yellow.

PESTILENTIAL, *Pestilentia'lis*, *Pestilentia'rius*, *Pestilentio'sus*, *Pestilent'us*, (F.) *Pestilentiël*. Relating or appertaining to a pest or plague. *Pestilential diseases* are those that bear some resemblance to the plague in respect to mode of propagation, symptoms, danger, &c.

PESTILITAS, Plague.

PESTIS, Plague — *p. Acutissima*, Plague — *p. Adeno-septica*, Plague — *p. Americana*, Fever, yellow — *p. Antoniniana*, Plague of Antoninus — *p. Bellica*, Typhus — *p. Britannica*, Sudor Anglicus — *p. Bubonaria orientalis*, Plague — *p. Contagiosa*, Plague — *p. Glandulosa*, Plague — *p. Glossanthrax*, Glossanthrax — *p. Inguinaria*, Plague — *p. Inter-tropica*, Fever, yellow — *p. Nigra*, Death, black — *p. Occidentalis*, Fever, yellow — *p. Orientalis*, Plague — *p. Septica*, Plague — *p. Variolosa*, Variola.

PESTLE, Pilum — *p. Spring*, see Pilum.

PET. Fart.

PETALE, Phtheiriæsis.

PETASITES, Tussilago petasites — *p. Hybrida*, Tussilago petasites — *p. Major*, Tussilago petasites — *p. Officialis*, Tussilago petasites — *p. Rubens*, Tussilago petasites — *p. Vulgaris*, Tussilago petasites.

PETAURUM. A seat suspended by ropes, in which a person taking the exercise sat, and was tossed about by assistants.—Juvenal and Martial.

PETE'CHLÆ, *Petic'ulæ*, *Pestich'iæ*, *Pestic'iæ*, *Punctic'ula*, *Pur'pura nalg'ua*, *Por'phyra Græco-rum*, (F.) *Pétéchiæ*. Small spots, similar in shape and colour to flea-bites, which occur spontaneously upon the skin, in the course of severe fevers, &c. They are, under such circumstances, signs of great prostration.

PETECHLÆ SINE FEBRE, Purpura simplex.

PETE'CHIAL, *Petchia'lis*; same etymon. Resembling or accompanied by petechiæ.

PETECHIAL SCURVY, Purpura simplex.

PETECHIANOSIS, Purpura hæmorrhagica.

PETER'S PILLS, Pilulæ Aloes et Cambogise — *p. Worm lozenges*, see Worm lozenges, Sherman's.

PETICULÆ, Petchiæ.

PETIGO, Impetigo.

PETINA, Sole.

PETIOLUS, *Pediolus*, diminutive of *pes*, 'a foot. A footstalk or leafstalk of a plant. A petiole.

PETIOLUS EPIGLOTTIDIS. The root of the Epiglottis.

PETIOLUS MALLEI, Manubrium mallei.

PETT ARGENT, Platinum — *p. Courier*, Influenza — *p. Lait*, Serum lactis — *p. Lait d'Hoffmann*, Serum lactis Hoffmanni — *p. Mal*, see

Epilepsy — *p. Sas-maxillo-labial*, Levator anguli oris.

PETITE-POSTE, Influenza.

PETITS-LAITS, see Serum lactis.

PETRÆLEUM, Petroleum.

PETRÆUM, Solidago virgaurea.

PETRAPTIUM, Bubon Macedonicum.

PÉTRÉOLE, Petroleum.

PÉTRÉUX, Petrous — *p. Os*, see Temporal bone.

PETRO DEL PORCO, Bezoar of the Indian porcupine.

PÉTROLE, Petroleum.

PETROLEUM, *Petrolæ'um*, *Petræ'leum*, *Petræ'oleum*, *Bitu'meu Petroleum*, *Pisselæ'um In'dieum*, *Rock Oil*, *Petroleum Barbaden'se*, *Barbadoes Tar*, (F.) *Pétrole* ou *Pétréole*, from *πετρος*, 'rock,' and *ελαιον*, 'oil.' A bituminous substance flowing spontaneously from the earth, in various parts of the world; of a fetid odour, and bitter, acrid taste. It is semi-liquid, tenacious, semi-transparent; of a reddish-brown colour; insoluble in water and alcohol; combines with fixed and essential oils and sulphur: and is partially soluble in ether. The petroleum found at Gabian, near Béziers, in France, has been called *Oleum Gabianum*. (F.) *Huile de Gabian*, *Petroleum rubrum*. It has been given as an excitant expectorant; and, mixed with tincture of assafoetida, in tapeworm. It is, also, used externally in chilblains, chronic rheumatism, affections of the joints and skin, and paralysis.

New York Petroleum, called *Seu'eca Oil*, is used externally in similar cases.

PETROLEUM BARBADENSE, Petroleum.

PETROLEUM SULPHURATUM, *Bal'samum Sulphuris Barbaden'se*,—(Composed of *petrol*, *Barbad.* ʒiʒj, *flor. Sulph.* ʒiv) has been used as a pectoral; and as a detergent to ulcers. It has been accounted antispasmodic and sudorific. Dose, gtt. x. to xxx. Externally, it is used as a stimulant and discutient.

PETRO-OCCHIPITAL, *Petro-occipitalis*. Belonging to the petrous portion of the temporal bone and to the occipital bone.

PETRO-OCIPITAL SUTURE is formed by the junction of the petrous portion of the temporal with the occipital bone. It is a deep groove separating the bones, which have between them a thin layer of cartilage.

PETRO-SALPINGO-PHARYNGEUS. A fleshy fasciculus, which extends from the sphenoid bone, from the petrous portion of the temporal bone, and from the Eustachian tube to the upper part of the pharynx. See Constrictor.

PETRO-SALPINGO-STAPHYLINUS, *Circumflexus*—*p. Salpingo-staphylinus*, Levator palati — *p. Staphylini*, Levator palati.

PETRO-SPHENOID'AL, *Petro-sphenoida'lis*. Belonging to the petrous portion of the temporal bone and to the sphenoid bone.

PETRO-SPHENOIDAL SUTURE;—a name given to the small suture which is formed by the anterior edge of the petrous portion of the temporal bone and the posterior edge of the sphenoid.

PETROSAL, Petrous.

PETROSELINUM, Apium petroselinum — *p. Macedonicum*, Bubon Macedonicum.

PETROSUM, OS, see Temporal.

PETROUS, *Petro'sus*, *Petro'sal*, (F.) *Pétréux*, *Pierreux*, from *πετρα*, and *πετρος*, 'a stone.' Resembling stone; having the hardness of stone. Relating or belonging to the petrous portion of the temporal bone.

PETROUS GAN'GLION, *Petro'sal Ganglion*, *Ganglion of Audecseh*, is formed by the glosso-pharyngeal nerve, shortly after it emerges from the

jugular fossa. From this ganglion, M. Jacobson of Copenhagen traced an anastomosing loop through the cavity of the tympanum, which left branches there, and was thence reflected downwards to join the Vidian nerve.—See Otic Ganglion. This has been called the *Nerve of Jacobson*. *Tympanic branch of the glossopharyngeal*, and the innosulation, *Jacobson's Anastomosis*.

PETROUS PORTION OF TEMPORAL BONE. see Temporal Bone—p. Process, see Temporal Bone.

PETROUS SINUSES, *Petro'sal Sinuses*, are two venous sinuses of the dura mater, connected with the petrous portion of the temporal bone, and distinguished on each side, into:—1. The *superior petrosal sinus*. It arises from the cavernous sinus; follows the upper edge of the petrous portion which affords it a gutter; passes into the great circumference of the tentorium cerebelli, and opens into the lateral sinus where the latter experiences a bend near the base of the pars petrosa. Its form is triangular. 2. The *inferior petrosal sinus* arises from the cavernous sinus at the same point as the last, with which it communicates at the moment of its origin. It descends between the inferior edge of the pars petrosa and the basilar process; and terminates in the lateral sinus, at the sinus or gulf of the internal jugular vein. It is triangular, and broader at its extremities than at the middle,

PETUM, *Nicotiana tabacum*.

PETUN, *Nicotiana tabacum*.

PEUCE, *Pinus sylvestris*.

PEUCEA BALSAMEA, see *Pinus abies*.

PEUCED'ANUM, from *πευκη*, 'the pine tree,' its leaves resembling those of the pine; *P. officinalis* lē seu *alsat'icum* seu *altis'simum* seu *paniculatum* seu *terratum*, *Seli'uum* *peucedanum*, *Mar'athrum sylvest're*, *Marathrophyllum*, *Pinastellum*, *Fœniculum porci'uum*, *Bonius Ge'nius*, *Hog's Fenel*, *Sulphurwort*, (F.) *Peucedan*, *Queue de Pourceau*, *Fœnoul de Porc*. Ord. Umbelliferae. *Sex. Syst.* Pentandria Digynia. The root has a strong, fetid smell—somewhat resembling that of sulphureous solutions—and an acrid, unctuous, bitterish taste. It has been recommended as antihysterical and nervine.

PEUCEDANUM ALSATICUM, *Peucedanum*—p. Altissimum, *Peucedanum*—p. Officinale, *Peucedanum*—p. Oreoselinum, *Athamanta aureoselinum*.

PEUCEDANUM PALUS'TRĒ, *Thysselium* seu *Selinum palust're*, *Selinum sylvest're* seu *thyssellium* seu *lactescens*, *Thysselium*, *Olsnit'ium*, *Marsh selinum*, a European plant, has been recommended as an anti-epileptic. In Courland, it has been a famous remedy in epilepsy.

PEUCEDANUM PANICULATUM, *Peucedanum*—p. Pratense, *P. silaus*.

PEUCEDANUM SILAUS, *P. pratense*. *Ses'eli pratense*. *Sium* seu *Liquisticum* seu *Cnidium sila'is*, *Saxifraga vulgaris* seu *Anglica*, *Hippomar'athrum*, *Fœniculum er'roticum*, *English or Meadow Saxifrage*, (F.) *Séelli des prés*. The roots, leaves, and seeds have been recommended as aperients, diuretics, and carminatives. Rarely used.

PEUCEDANUM TERNATUM, *Peucedanum*.

PEUPLIER, *Populus*—p. *Baumier*, *Fagara octandra*—p. de la *Caroline*, *Fagara octandra*—p. *Franc*, *Populus*—p. *Noir*, *Peucedanum*.

PEXIS, Concretion.

PEYERI GLAN'DULÆ, *Peyeri Plexus glandulari*, *Glandulæ Peyeria'æ* seu *mucosæ coagminatæ* seu *aguiatæ* seu *muciparæ racemata'tim conges'tæ intestino'rini* seu *intestinal'es plexi'formis* seu *ap'uricæ*, *Corpuscula glandulari'um similia*, *Glandulæ in agmen congregatæ intestino'rini*. *Enterad'æ*, *Peyeri's Glands*, *Agminated or aggregate glands*. Small glands or follicles,

situate beneath the villous coat of the intestines, called after Peyer, who well described them. They are clustered together, (F.) *Plaques de Peyer*, having a honey-comb appearance—*Plaques g'angr'ées*—and are extremely numerous. They occur most numerous in the lower portion of the ileum, and resemble, in their morphology and functions, the lymphatic ganglions. They are, evidently, concerned in the great function of lymphosis.

PEZA, *πεζα*, Doric and Arcadian for *πους*, 'a foot.' The foot: according to some, the sole of the foot; and to others, the astragalus. The ankle.

PEZI'ZA seu PEZE'ZA AURIC'ULA, from *πεζα*, 'the sole of the foot,' *Tremella auricula Judæ*, *Auricula Judæ*, *Auricularia sambuci* seu *sambucina*, *Exidia auricula Judæ*, *Merulius auricula*, *Fungus sambucinus*, *Agaricus Auricula' formæ*, *Jev's Eur.* Ord. Fungi. This fungus is said to be astringent; but has chiefly been used as a gargle in relaxed sore throat.

PFEFFERS or PFAFFERS, MINERAL WATERS OF, *Thermæ Piperi'æ*, *Th. fabulariæ*. These springs, which are in the Swiss Alps, are simply thermal: temperature 100° of Fahrenheit.

PHACĒ, *Phacæa*, *Phacna*, *φακη*, 'a grain of the lentil,' *Ervum lens*. Also, chloasma; the crystalline lens; and a flask for the application of stone, so called owing to its flattened lens-like shape.

PHACELLUS, Fasciculus.

PHACELUS, Fasciculus.

PHACHYMENTIS, Phacohymenitis.

PHACI, Ephelides.

PHACICUS, *Phacotus*, *Phacodes*; from *φακη*, 'lens.' Lens-shaped, lenticular.

PHACITIS, *Phacoiditis*, *Lentitis*, *Crystallitis*, *Crystalloiditis*, *Glenitis*, from *φακος*, 'a lens,' and *itis*, a termination denoting inflammation. Inflammation of the crystalline lens [?]. Inflammation of the capsule of the lens is termed *Capsulitis*, *Capsulitis*, and *Crystallino-capsulitis*.

PHACODES, Phacienis.

PHACHYMENTITIS, *Phachomyenitis*, *Phachymenitis*, *Inflammatio capsulæ lentis*; from *φακος*, 'a lens,' *μυνη*, 'a membrane,' and *itis*, denoting inflammation. Inflammation of the capsule of the crystalline.

PHACODEITIS, Phacit.

PHACOMALACIA, Cataract, soft.

PHAC'OPIS, *Phacotus*; from *φακη*, 'lens,' and *οπισ*, 'a knife.' *Scalpellum lenticular'è*. A lenticular-shaped knife.

PHACOPS'IS, from *φακη*, 'lens,' and *οψis*, 'vision.' The state of one who has chloasma or freckles on the face.

PHACOPTIS'ANA, *Phacium*; from *φακη*, 'lens,' and *πιτταν*, 'drink.' A drink of lentils. A poultice of lentils.

PHACOS, *Ervum lens*.

PHACOSCOTOMA, Cataract.

PHACOTUS, Phaciacus, Phacopsis.

PHACUS, Phacæ.

PHÆNIGMUS, Phenigmus.

PHÆNOMENOLOGIA, Semeiology.

PHÆNOMENON, Phenomenon.

PHAGÆNA, Boninia.

PHAGEDÆNA, *Boulimia*, *Phagedenic ulcer*—p. *Sloughing*, of the month, *Cancer aquaticus*—p. *Gangrænosa*, *Hospital gangrene*.

PHAGEDEN'IC, *Phagedænicus*, *Depas'ceus*, (F.) *Phagédénique*, *Rougeant*, from *φαγω*, 'I eat.'

PHAGEDENIC ULCER, *Nomé*, *Phagedæna*, *Ulcus depas'ceus* seu *obambulans* seu *feri'uum*, (F.) *Ulcère phagédénique* ou *rougeant*, is one which rapidly eats and corrodes the neighbouring parts.

Phageden'ic, in *Materia Medica*, is a substance

used for destroying fungous granulations in ulcers, &c.

PHAKOHYMENTIS, Phacohyementis.

PHALACRA, Calvities.

PHALACROMA, Calvities.

PHALACROSIS, Calvities.

PHALACROTIS, Alopecia.

PHALÆNA PINGUINALIS, see Ectozoa.

PHALAI. A barbarous term, employed by Basil Valentine to designate a universal medicine or panacea.

PHALAN'GAL, *Phalan'gian*, *Phalangia'nus*, from *φαλαγξ*, *φαλαγγος*, 'a phalanx.' Having relation to a phalanx.

PHALANGARTHIRITIS, from *φαλαγξ*, *φαλαγγος*, 'a phalanx,' *arthron*, 'a joint,' and *itis*, denoting inflammation. Gout in the fingers. Inflammation of the joints of the fingers.

PHALANGE, Phalanx.

PHALANGES DES DOIGTS, see Phalanx—p. of the Fingers, see Phalanx—p. *des Orteils*, see Phalanx—p. of the Toes, see Phalanx.

PHALANGETTES, see Phalanx.

PHALANGETTIEN. Professor Chaussier uses this term for any thing relating to the third phalanx of the fingers or toes,—*Phalangien*, for what relates to the first,—and *Phalanginiën*, to the second.

PHALANGIAN, Phalanga.

PHALANGIEN, see *Phalangettien*.

PHALANGINES, see Phalanx.

PHALANGINIEN, see *Phalangettien*.

PHALANGIUM ESCULENTUM, Scilla esculenta.

PHALANGO'SIS, *Hispid'itas*, from *φαλαγξ*, *φαλαγγος*, 'a phalanx,' 'a row of soldiers.' An affection of the eyelids in which the lashes are arranged in two or three rows. See *Trichiasis*. Also, dropping of the upper eyelid, from paralysis of the levator palpebræ superioris muscle.

PHALANX, *Phalan'gê*, *Phalango'ma*. Same etymon. A name given to the small bones which form the fingers and toes, because placed alongside each other like a phalanx. They are distinguished into the *Phalanges of the fingers*, *Ossa seu Ag'mina seu A'cies seu Artic'uli seu Scutic'ula seu Scut'ula seu Nodi seu Interno'dia seu Scytal'ides seu Con'dyli Digo'torum Manûs*; and the *Phalanges of the Toes*, *Ossa seu Artic'uli seu Interno'dia Digo'torum Pedis*. I. *Phalanges of the fingers*, (F.) *Phalanges des doigts*. They are, in each hand, fourteen,—three to each finger, and two to the thumb; and are situate one above the other. They are distinguished, numerically, reckoning from the base towards the tip of the finger. 1. The first or metacarpal, *Procon'dyli*, (F.) *Premières phalanges* ou *Phalanges métacarpiennes*, 2. The second or middle phalanges, (F.) *Secondes phalanges* ou *Phalanges moyennes*, *Phalangines*, (Ch.) 3. The third phalanges, *Metacon'dyli*, *Phalangines un'guinis*, (F.) *Troisièmes phalanges* ou *Phalanges unguéales* ou *unguifères* ou *unguinales*, *Phalangettes* (Ch.), which terminate each finger, and support the nail. II. *Phalanges of the toes*, (F.) *Phalanges des Orteils*. They are the same in number as those of the fingers, but much smaller, and of a very different shape.

The phalanges of a finger or toe are united with each other; and the first with the metacarpal or metatarsal bone. They are developed from two points of ossification; one for the superior extremity, and the other for the body and inferior extremity.

PHAL'ARIS CANARIEN'SIS, *P. ova'ta*, (*φαλαρος*—from *φω*, 'I shine,'—'bright, shining,' in application to the seed,) *Cult'ivated Canary Grass*, (F.) *Alpiste*. Ord. Gramineæ. Sex. Syst. Triandria Digynia. The seed of this grass, *Canary seed*, (F.) *Graines d'aspic*, afford a nourishing meal. The ancients recommended them for allaying pains in the kidney and bladder.

PHALARIS ZIZANOIDES, *Andropogon muricatus*.

PHALLAL'GIA, *Phallogyn'ia*, from *φαλλος*, 'the male organ,' and *αλγος*, 'pain.' Pain in the male organ.

PHALLANCYLOSIS, Chordee.

PHALLITIS, *Priapit'is*, from *φαλλος*, 'the male organ,' and *itis*, a suffix denoting inflammation. Inflammation of the male organ.

PHALLOCAMPSIS, Chordee.

PHALLOCARCINO'MA, from *φαλλος*, 'the male organ,' and *καρκινωμα*, 'cancer.' Carcinoma or cancer of the penis.

PHALLODYNIA, Phallalgia.

PHALLO'N'CUS, from *φαλλος*, 'the male organ,' and *ογκος*, 'swelling.' Tumefaction of the male organ.

PHALLOPSOPH'IA, from *φαλλος*, 'the male organ,' and *ψοφος*, 'a noise.' Discharge of wind from the male urethra.

PHALLORRHAG'IA, from *φαλλος*, 'the male organ,' and *ρρηννη*, 'I break out.' Hemorrhage from the male urethra. Stomatosis.

PHALLORRHEA, Gonorrhœa.

PHALLORRHOÏS'CHESIS, from *φαλλος*, 'the male organ,' *ρρη*, 'discharge,' and *σχειν*, 'to withhold.' Sudden arrest of a gonorrhœal discharge.

PHALLUS, Penis—p. Esculentus, Morchella esculenta.

PHANEROG'AMOUS, *Phanerogam'ic*, *Phanerogam'icus*, (F.) *Phanérogame*, from *φανερως*, (*φω*, 'I shine,') 'evident,' and *γαμος*, 'marriage.' An epithet used by botanists for plants whose sexual organs are apparent. It is, consequently, the opposite to *cryptogamous*.

PHANTASIA, Delirium, Imagination.

PHANTASM, *Phantus'ma*, *Phanto'ma*, *Phasma*, from *φανταζω*, (*φαινω*, 'I bring to light,') 'I make appear.' A phantom, false appearance, apparition. Hallucination. Derangement of the sense of sight or of the intellectual faculties, causing objects to be perceived, which are not before the eyes.

PHANTASMA, Pseudoblepsia.

PHANTASMATICUS, Phantasticus.

PHANTASMATOSCOPIA, Metamorphopsia.

PHANTASMOSCOPIA, Metamorphopsia.

PHANTAS'TICUS, Inebriant. Creating phantasms—*phantasmaticus*.

PHANTOM, Fantom—p. Tumour, see Fantom. PHANTOMA, Phantasm—p. Obstetricium, Fantom.

PHARMACEIA, Poisoning.

PHARMACEUM, Apotheca.

PHARMACEUS, Apothecary.

PHARMACEUTA, Apothecary.

PHARMACEU'TIC, *Pharmacenticus*, *Pharmacentic'al*, *Pharmacentic'al'is*, (F.) *Pharmacentique*, from *φαρμακον*, 'a medicine.' An epithet for every thing belonging to pharmacy. Thus, we say, *Pharmaceutical preparations*, &c.

PHARMACEUTIST, Pharmacy.

PHARMACEUTIST, Apothecary.

PHARMACIEN, Apothecary.

PHARMACOCATAGRAPHOLOG'IA, *Catagrapholog'ia*, *Ars for'mulas concipiend'i*, from *φαρμακον*, 'a medicine,' *κατα*, 'beneath,' *γραφη*, 'a writing,' and *λογος*, 'a description.' The art of writing prescriptions.—J. J. Plenck.

PHARMACOCHEMIA, Chymistry, pharmaceutical.

PHARMACODYNAMICS, from *φαρμακον*, 'a medicine,' and *δυναμις*, 'power.' *Pharmacodynami'cê*, *Dynam'ical Materia Medica*, *Pharmacodynam'ica doctr'ina*, *Pharmacodynamiolog'ia*. A division of pharmacology, which considers the effects and uses of medicines.

PHARMACODYNAMIOLOGIA, Pharmacodynamics.

PHARMACOGNOS'IA, *Acognos'ia*, *Acognos'ia*, from *φαρμακον*, 'a medicine,' and *γνωσις*, 'knowledge.' A division of pharmacology, which treats of simples, or unprepared medicines.

PHARMACOLOGIA, Materia medica.

PHARMACOMANIA, from *φαρμακον*, 'a medicine,' and *μανια*, 'mania.' One who has a mania for prescribing or for taking medicine.

PHARMACON, Poison.

PHARMACOPE'IA, *Pharmacopœa*, *Codex medicamentarius*, (F.) *Pharmacopée*, from *φαρμακον*, 'a medicine,' and *ποιω*, 'I make.' A work, containing a collection of formulæ for the preparation, &c., of medicines: generally published by authority. Formerly, a chemical laboratory, *Laboratorium chymicum seu pharmaceuticum*.

PHARMACOPEUS, Apothecary, Druggist.

PHARMACOPOLA, Apothecary, Druggist.

PHARMACOPOLE, Apothecary, Druggist.

PHARMACOPOLIUM, *Apotheca*, *Officina*, *Tuber'na Med'ca*. The shop of the druggist or apothecary, (F.) *Apothecairerie*, from *φαρμακον*, 'a medicine,' and *πωλεω*, 'I sell.'

PHARMACOPOS'IA, from *φαρμακον*, 'a medicine,' and *ποσις*, 'a potion.' A liquid medicine, especially one that is cathartic.

PHARMACO'SA **MEDICAMENTA**, from *φλομακον*, 'a poison.' Medicines that contain poisonous substances. — Fallopius.

PHARMACOTHE'CA, *φαρμακοθηκη*, from *φαρμακον*, 'a medicine,' and *τιθημι*, 'I place.' A case for medicines. A medicine chest.

PHARMACOTHERAP'IA, from *φαρμακον*, and *θεραπεια*, 'treatment.' Cure of diseases by remedies.

PHARMACTER, Apothecary.

PHARMACUM, Medicament, Poison — *p. Ægyptiacum*, *Ægyptiacum* — *p. Amatorium*, *Phil'ter*.

PHARMACUM AD AURES, *Ægyptium Medicamentum ad Aures*. A name given to a medicine, composed of bitter almonds, white pepper, saffron, myrrh, opium, frankincense, castor, verjuice, sulphate of iron, vinegar, pomegranate-bark, unguentum nardinum, &c. It was believed to be useful for cleansing fetid ulcers in the ears.

PHARMACURGICUS, Apothecary.

PHARMACURGUS, Apothecary.

PHARMACY, *Pharmac'ia*, *Pharmaceuticē*, *Pharmac'is*, from *φαρμακον*, 'a medicine.' The art which teaches the knowledge, choice, preservation, preparation, and combination of medicines. It was formerly divided into *Galenical* and *Chymical*. The former, called after Galen, embraced the operations undertaken on medicines without chymistry; — the latter, *Chymical Pharmacy* or *Pharmaceutic Chymistry*, *Pharmachymia*, comprised the preparation of medicines, founded on the chymical action of their principles.

PHARMA'XIS, Pharmacy.

PHARNA'CEUM LINEA'RE, called after Pharmaces, King of Pontus. A South African plant, *Nat. Ord.* Paronychiaceæ, employed at the Cape in pulmonary affections. It is generally given in infusion.

PHARUS, Pharynx.

PHARYGATHRON, Pharynx.

PHARYGETHRUM, Pharynx.

PHARYGEUM (SAL.), from *pharynx*, *pharyngis*. A compound of cream of tartar, nitrate of potassa, burnt alum, and distilled vinegar. It was formerly employed, united with honey and plantain-water, to make gargles, which were advised in quinsy.

PHARYGÈ, Pharyngeal.

PHARYNGE'AL, *Pharyngæ'us*, (F.) *Pharyngé*,

Pharyngien. Same etymon. That which relates to the pharynx. A name given to the muscles, vessels, and nerves of the pharynx.

PHARYNGEAL ARTERIES. These are two in number. The one—*superior* or *pterygo-palatine*, *Ramus Pharyngæ'us superior* of Haller — arises from the internal maxillary at the base of the zygomatic fossa, passes through the pterygo-palatine canal, and proceeds to be distributed to the pharynx and the corresponding part of the Eustachian tube. The other — the *inferior* — *Pharyngæ'a ascenden's* of Haller — arises from the external carotid, on a level with the facial. It ascends along the lateral and posterior part of the pharynx, and divides into two branches; the one — the *pharyngeal*, properly so called — is distributed to the pharynx; the other — the *meningeal* — gives its branches particularly to the dura mater.

PHARYNGEAL NERVE. A branch sent by the pneumogastric to the pharynx. It descends behind the internal carotid; communicates with the glosso-pharyngeal; and divides, opposite the middle constrictor of the pharynx, into a great number of filaments, which anastomose, in a multitude of different directions, with filaments of the glosso-pharyngeal nerve, of the superior laryngeal branch, and of the first cervical ganglion. These different nervous filaments united constitute the *pharyngeal plexus*, the irregular meshes of which send numerous ramifications to the pharynx.

PHARYNGEAL VOICE, see Voice.

PHARYNGEMPHRAX'IS, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *εμφραξις*, 'obstruction.' Obstruction of the pharynx.

PHARYNGETHRON, Pharynx.

PHARYNGEURYSMA, Pharyngocele.

PHARYNGIENUS, Pharyngeal.

PHARYNGITE, Pharyngeal.

PHARYNGITE, *Cynanche pharyngea* — *p. Tonsillaire*, *Cynanche tonsillar'is*.

PHARYNGITIS, *Cynanche pharyngea*.

PHARYNGITIS APOSTEMATO'SA. Abscess of the pharynx.

PHARYNGI'TIS, **DIPHTHERIT'IC**, *Angi'na pseudo-membranacea seu membrana'cea seu pellicular'is seu plastic'a seu diphtherit'ica seu malign'a seu pseudo-membranosa seu pestilential'is*, *Pharyngoc'acē*, *Pseudo-membranous Inflammation of the Throat*, (F.) *Angine conennense ou gutturale conennense ou pseudo-membranense ou plastique ou diphtheritique*. From *pharynx*, and *itis*, denoting inflammation. Diphtheritic inflammation of the pharynx. See *Cynanche maligna*.

PHARYNGI'TIS, **FOLLIC'ULAR**, *Follicular Inflammation of the Pharynx*, *Angi'na folliculo'sa of the Pharynx*, *Aene of the Throat*. Inflammation and enlargement of the follicles of the pharynx, occasionally extending to the larynx. Sometimes termed *Clergyman's Sorethroat*, *Tubercles of the Larynx* and *Fances*, and *Tubercular Sorethroat*.

PHARYNGI'TIS, **GANGRENOUS**, *Cynanche maligna*.

PHARYNGOCECE, Pharyngitis, diphtheritic.

PHARYNGOCE'LÈ, *Pharyngœny's'ma*, *Divertic'ulum seu Hernia seu Prolap'sus* (*Εκροη'αγί* seu *pharyng'is*, *Εκροη'αγυς succenturiatus*, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *κληη*, 'a tumour.' An enlargement at the upper part of the gullet, in which the food sometimes rests in considerable quantity.

PHARYNGODYN'IA, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *οδυνη*, 'pain.' Pain in the pharynx.

PHARYNGOGLOSS'AL, *Glossopharyngæ'al*, *Pharyngoglossia'ana*. That which belongs to the pharynx and tongue.

PHARYNGOGLOSSAL NERVE, *Glossopharyngeal*

Nerve, Lingualis lateralis, (F.) Ners Glossopharyngiæ, Pharyngoglossiæ — a portion of the eighth pair — arises from the superior and lateral parts of the spinal marrow, between the facial and pneumogastric nerves, by several filaments, which soon unite into a single cord, that passes out of the cranium by the foramen lacerum anterior; goes downwards and forwards, and gains the posterior and inferior part of the tongue. Immediately after its exit from the cranium, it gives a branch to the meatus auditorius externus, and receives a filament from the facial, and another from the pneumogastric nerve. It then furnishes two other filaments, which descend upon the carotid artery, and unite at the bottom of the neck with branches from the cervical ganglions and cardiac nerves, and give two filaments to the stylo-pharyngeus muscle. The glossopharyngeus, after sending a twig or two to the tonsil, to the upper part of the pharynx and membrane of the epiglottis, divides into many branches which run partly to the margin, and partly to the middle of the root of the tongue; supplying, especially, the papillæ majores, and the parts in their neighbourhood.

By some, this nerve is regarded as the controller of the associated motions of the tongue and pharynx. By others, it is esteemed to be the special nerve of gustation.

PHARYNGOGRAPHY, Pharyngographia, from φάρυξ, φάρυγος, 'the pharynx,' and γραφή, 'a description.' An anatomical description of the pharynx.

PHARYNGOLOGY, Pharyngologia, from φάρυξ, φάρυγος, 'the pharynx,' and λόγος, 'a discourse.' The part of anatomy which treats of the pharynx.

PHARYNGOLYSIS, Pharyngoplegia.

PHARYNGOPARALYSIS, Pharyngoplegia.

PHARYNGOPLEGIA, from φάρυξ, φάρυγος, 'the pharynx,' and πλῆσσω, 'I strike.' *Dysphagia paralytica* seu *torpida* seu *atonica*, *Angina paralytica*, *Asthenia Deglutitiouis*, *Pharyngopleyia*, *Pharyngoparalyis*, *Paralyis Oesophagi*, *Gula Imbecillitas*. Paralysis of the pharynx or œsophagus: commonly a symptom of general paralysis, or of approaching dissolution.

PHARYNGORRHAGIA; from φάρυξ, φάρυγος, 'the pharynx,' and ραγή, 'rupture.' Hæmorrhage from the vessels of the pharynx.

PHARYNGOSPASMUS, from φάρυξ, φάρυγος, 'the pharynx,' and σπασμος, 'spasm.' Spasm or cramp of the pharynx.

PHARYNGOSTAPHYLINUS, Palato-pharyngæus.

PHARYNGOTOME, Pharyngotomus, from φάρυξ, φάρυγος, 'the pharynx,' and τέμνω, 'I cut.' An instrument, invented by J. L. Petit, used to scarify inflamed tonsils, and to open abscesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, enclosed in a sheath or canula of silver slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

PHARYNGOTOMY, Pharyngotomia; same etymon. Some authors have used this word synonymously with œsophagotomy. It means, also, scarification of the tonsils, or an incision made for opening abscesses there, &c.

PHARYNX, φάρυξ, Pharynx, φάρυξ, *Pharynx*, *Gula*, *Lænx*, *Fuices*, *Pharygæticum*, *Pharyngæthron*, *Pharyngæthros*, *Pharyngæthron*, *Isthmos*, *Isthmion*, *Inglueries*, *Principium Gulae*, *Os postterum*, *Gurges*, (F.) *Arrière-bouche*, *Gosier*, *Gorge*. A species of musculo-membranous, symmetrical

canal, on the median line, irregularly funnel-shaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior paries of the pharynx open, successively, from above to below, — the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx. The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous, above, with the Schneiderian membrane; and in the middle, with that of the mouth; below, with that of the œsophagus; and, at the sides, with that of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles. The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngostaphylini. The vessels and nerves are called *pharyngeal*. The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

PHARYNX, FOLLICULAR INFLAMMATION OF THE, Pharyngitis, follicular.

PHARYNX, Pharynx.

PHASELUS, Phaseolus

PHASEOLUS, φασίλος, φασηλος, φασιολος, P. Vulgaris, Phasiolus, Phaseolus, Faseolus, Faseolus, Bona, Buona, Faba; Kidney Bean; French Bean; (F.) Feséole, Haricot. Ord. Leguminosæ. Ser. Syst. Diadelphia Decandria. When young and well boiled, this is easy of digestion, and delicately flavoured. It is less flatulent than the pea.

PHASEOLUS CRETICUS, Cajan, Cayan. A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux when excessive.

PHASEOLUS VULGARIS, Phaseolus.

PHASIANUS GALLUS, so called from the river, *Phasis*, in Colchis, near the Black Sea: (F.) *Cog*. The parts of generation of the cock, dried and pulverized, were formerly regarded as proper for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

PHASIOLUS, Phaseolus.

PHASMA, Phantasm.

PHATNE, Alveolus.

PHATNION, Alveolus.

PHATNORRHAGIA, Stomatorrhagia alveolarum, from φάτιον, 'an alveolus,' and ρηγνμι, 'I break forth.' Hemorrhage from the alveoli.

PHAUSIN'GES, φανσιγγες, plural of φανσιγγ, from φανζω, 'I roast.' Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a pustule. — *Foësius*.

PELLANDRE, Phellandrium aquaticum.

PELLANDRIUM AQUATICUM, Phellandrium, Oenanthe phellandrium seu aquatica, Ligusticum phellandrium, Fœniculum aquaticum, Cicutaria aquatica, Water Fenel, Five-leaved Water Hemlock, (F.) Phellandre, Fenouil d'eau, Cigüe d'eau, Millefeuille aquatique. Ord. Umbelliferae. Ser. Syst. Pentandria Digynia. This plant is stimulant and narcotic. It has been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of scrofulous atonic ulcers.

PHENE, Benzole.

PHENIGMUS, Phœnig'mus, Phœnig'mus, from φαινζ, 'red.' *Red Jaundice*. A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his

order *Icteritia*. Also, the act of irritating a part by a stimulating application.

PHÉNOMÈNE, Phenomenon.

PHENOM'ENON, *Phænomenon*, (F.) *Phénomène*, from *φαίνομαι*, 'I appear.' An extraordinary and unexpected event. In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function:—as the *phenomena*, of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

PHENYLE, HYDRURET OF, Benzole.

PHEUGOPHOBIA, Hydrophobia.

PHEUGYDRON, Hydrophobia.

PHIALA, *A Phial or Vial*. (F.) *Fiole*, *φιάλη*, *φιάλη*, 'a vessel with a broad bottom.' A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Medicine Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

PHILADYNAMICA, Debilitans.

PHILANTHROPUS, Galium aparine.

PHILETRON, Philter.

PHILETRUM, *Lacuna labii superioris*.

PHILIA'TER, *Philia'tros*, *φιλιατρος*, from *φιλεω*, 'I love,' and *ιατρικη*, 'medicine.' An amateur of medicine. One who studies medicine; *Studio'sna medicinæ*.

PHILOBIO'SIS, (F.) *Philobiosie*: from *φιλεω*, 'I love,' and *βίωσις*, 'life.' The love of life.

PHILE'NIA, from *φιλεω*, 'I love,' and *οινος*, 'wine.' Love of wine. Addiction to wine.

PHILOGYNIA, Muliebrositas.

PHILONIUM LONDINENSE, Confectio opii.

PHILOPATRIDALGIA, Nostalgia.

PHILOPATRIDOMANIA, Nostalgia.

PHILOSOPHER'S STONE, see Alchymy.

PHILOSOPHIA CORPORIS VIVI, Physiology — p. *Hermetica*, Alchymy — p. per *Ignem*, Chymistry.

PHILTER, from *φιλεω*, 'I love.' *Philtrum*, *Phil'tron*, *Phile'tron*, *Phar'macum* seu *Poculum amatorium*, *Anatorium veneficium*, (F.) *Philtre*. A medicine or drink considered capable of causing love.

PHILTRUM, *Lacuna labii superioris*.

PHILYRA, Tilia.

PHIMA, Phyma.

PHIMOS, Capistrum.

PHIMO'SICUS, Relating to Phimosis.

Sauvages calls *Ischuria phimosica* seu *urethralis à phimosi*, the retention of urine which depends upon phimosis.

PHIMO'SIS, *Phymosis*, *Cirrhosa'tio*, *Eragogium*, *Ligatura glandis*, *Strictura præputii*, *Reductio præputii impedita*, from *φιμωω*, 'I bind tight.' A disease which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

PHIMOSIS ADNATA seu **CONGENITA** seu **PUERILIS**, Congenital phimosis — p. Circumligata, Paraphimosi — p. Congenita, P. adnata.

PHIMO'SIS ŒDEMATO'DES, *Hydrophimosi'sis*. Phimosis with œdematous swelling of the prepuce.

PHIMOSIS PUERILIS, Ph. adnata.

PHILASMA, Contusio.

PHLEBARTERIODIALYSIS, see Ancurism.

PHLEBECTA'SIA, *Phlebec'tasia*, from *φλεψ*, *φλεβος*, 'a vein,' and *εκτασις*, 'dilatation.' Dila-

tation of a vein, or of a portion of a vein. — Alibert.

PHLÉBECTIARCTIE. A mongrel term, from *φλεψ*, *φλεβος*, 'a vein,' and *arcteo*, 'I contract.' Contraction of a vein.

PHLEBES, (Arteries.) See Artery.

PHLEBEURYSMA, Varix.

PHLEB'ION, diminutive of *φλεψ*, *φλεβος*, 'a vein.' A vein. — Hippocrates. A small vein, — *Ve'nula*.

PHLEBIS'MUS, from *φλεψ*, *φλεβος*, 'a vein.' A term employed by Dr. Marshall Hall for the turgescence of veins, produced by impeded return of the blood. See Trachelismus.

PHLEBITIS, *Inflammat'io venarum*, (F.) *Phlébite*, *Inflammat'io des veines*, from *φλεψ*, *φλεβος*, 'a vein,' and *itis*, the termination for inflammation. Inflammation of the inner membrane of a vein, *Endo-phlebitis*, which sometimes follows blood-letting, and extends from the small wound made in that operation to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c. Phlebitis, also, sometimes supervenes on the ligation or excision of varices; after amputation, gun-shot wounds, delivery (*Uterine Phlebitis*, *Locho-metro-phlebitis*, *Metro-phlebitis puerperalis*, *Phlebitis umbilicalis*, *Metritis venosa*), the ligation of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

PHLEBITIS, CRURAL, Phlegmatia dolens — p. Uterina, see Peritonitis, and Phlebitis.

PHLEBOGRAPHY, *Phlebogra'phia*, from *φλεψ*, *φλεβος*, 'a vein,' and *γραφη*, 'a description.' A description of the veins.

PHLEB'OLITE, *Phlebolithus*, *Vein stone*, from *φλεψ*, *φλεβος*, 'a vein,' and *λιθος*, 'a stone.' A loose concretion, varying in size from that of a currant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

PHLEBOLITHUS, Phlebolite.

PHLEBOL'OGY, *Phlebolog'ia*, from *φλεψ*, *φλεβος*, 'a vein,' and *λογος*, 'a discourse.' The part of anatomy which treats of the veins.

PHLEBOPA'LIA, from *φλεψ*, *φλεβος*, 'a vein,' and *παλλω*, 'I palpitate.' With the ancients, *pulsation*, which they conceived to be produced by the veins. See Pulsus venarum.

PHLEBOPHTHALMOTOM'IA, *Ophthalmophlebotom'ia*, from *φλεψ*, *φλεβος*, 'a vein,' *οφθαλμος*, 'the eye,' and *τεμνω*, 'I cut.' Blood-letting in the eye.

PHLEBOPLEROSIS ECPHRACTICA, Inflammation.

PHLEBORRHAG'IA, from *φλεψ*, *φλεβος*, 'a vein,' and *ρρηγνυμι*, 'I break out.' Rupture of the veins; and, in a more extensive sense, venous hemorrhage.

PHLEBORRHEX'IS, from *φλεψ*, *φλεβος*, 'a vein,' and *ρηξις*, 'rupture.' Rupture of a vein. Also, hemorrhage from a vein, *Phleborrhag'ia*.

PHLEBOSTENO'SIS, from *φλεψ*, *φλεβος*, 'a vein,' and *στενωσις*, 'contraction.' Constriction or contraction of a vein.

PHLEBOT'OMIST, from *φλεψ*, *φλεβος*, 'a vein,' and *τεμνω*, 'I cut.' A bleeder. One who practises particularly the art of phlebotomy. See Blood-letting.

PHLEBOTOMUM, Fleam.

PHLEBOTOMY, see Blood-letting.

PHLEBS, Vein.

PHLEDONTA, Delirium.

PHLEGM, *Phlegma*, *φλεγμα*, *Pituita*, *Pituite*,

Mucus, Mother, (F.) Phlegme, Pituite. One of the four natural humours of the ancients, which, according to them, was cold and moist, as atrabilis was cold and dry. It predominated, especially, in winter.

Pituita was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in physiology, — the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated, or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matters to the action of heat.

PHLEGMA NARIUM CRASSUM, Nasal mucus — p. Vitrioli, Sulphuric acid (very dilute.)

PHLEGMAGOGUE, *Phlegmagogus*; from *φλεγμα*, 'phlegm,' and *αγω*, 'I expel.' A medicine, formerly believed capable of "cutting" or removing phlegm.

PHLEGMAPYRA, Fever, adeno-meningeal.

PHLEGMASIA, Inflammation, Phlegmon — p. Adenosa, Adenitis — p. Alba dolens puerperarum, Ph. dolens — p. Cellularis, Induration of the cellular tissue — p. Glandulosa, Adenitis — p. Myoica, Myositis — p. of the Peritoneum, Peritonitis.

PHLEGMA'TIA, from *φλεγμα*, *φλεγματος*, 'phlegm.' Œdema, Anasarca, Hydrops.

PHLEGMA'TIA DOLENS, *P. lac'tea seu dolens seu alba dolens seu Leucophlegmasia dolens seu Spargano'sis seu Scelal'gia seu Ede'ma puerperarum, Scelon'cus, Anasar'ca sero'sa, Ephy'na ademat'icium, Eechyno'ma lymphat'icium, Is'chias a spargano'si, Ede'ma lacteum, Infarc'tus lac'tei extremitat'um, Metas'tasis lactis, Hyster'al'gia galactica, Hydrophlegma'sia textus cellulo'si, Crural Phlebit'is, White leg, Swelled leg, Milk leg, White swelling of lying in women, (F.)* Œdème des nouvelles accouchées, Œdème douloureux des femmes en couche, Dépot lacteux sur la cuisse, Œdème actif des nouvelles accouchées, Enflure ou Engorgement des jambes et des cuisses de la femme accouchée, E. lacteux des membres abdominaux. It occurs, for the most part, in the second or third week after delivery: — is limited to the lower extremity, and chiefly to one side: exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days, the heat, hardness, and sensibility diminish, and the limb remains œdematous for a longer or shorter period. The disease frequently, if not generally, consists in the obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus — the flow of blood being obstructed — the serous part of it is thrown out into the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of antiphlogistics: — the application of leeches or cupping-glasses near the groin, fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

PHLEGMATIA LACTEA, P. dolens.

PHLEGMATIÆ, see *Empresma* — p. Membranosa et parenchymatosa, *Empresma*.

PHLEGMAT'IC, *Phlegmat'icus*, from *φλεγμα*, 'phlegm.' Abounding in phlegm, — as the 'phlegmatic or lymphatic temperament.'

PHLEGMATOCHEMY, see *Chemistry*.

PHLEGMATOPYRA, Fever, adeno-meningeal.

PHLEGMATORRHAG'IA, *Phlegmatorrhœ'a, Catarrh*, from *φλεγμα*, *φλεγματος*, 'phlegm,' and

ρρω, 'I flow.' Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Coryza Phlegmatorrhag'ia* of Sauvages. See *Coryza*.

PHLEGMHYMENTIS, *Phlegmymenitis*.

PHLEGMON, from *φλεγω*, 'I burn.' *Phlogosis phleg'monē, Phleg'monē, Phlegma'sia, Incedidum, Inflammatio*, (Prov.) *Beal*. Inflammation of the areolar texture accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensile and lancinating; afterwards, pulsatory and heavy. It is apt to terminate in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged as the next favourable termination to resolution.

PHLEGMON PÉRINÉPHRÉTIQUE, *Periphrenitis* — p. Peri-uterine, see *Peri-uterine*.

PHLEGMONE, Inflammation — p. Mammaria, Mastodynia apostematosa — p. Mastodynia, Mastodynia apostematosa — p. Parotidæa, Parotis — p. Peritonæi, Peritonitis — p. Parulis, Parulis — p. Musculorum, Myositis — p. Ventriculi, Gastritis.

PHLEGMONÉUX, *Phlegmonous*.

PHLEGMONODES, *Phlegmonous*.

PHLEGMONOID, *Phlegmonous*.

PHLEGMONOUS, *Phlegmonous*, from *φλεγω*, 'I burn,' and *ειδος*, 'resemblance.' That which relates or belongs to or resembles phlegmon.

PHLEGMONOUS INFLAMMATION is the active inflammation of the areolar membrane; in contradistinction to erysipelatous inflammation, or that of the skin.

PHLEGMOPYRA, Fever, adeno-meningeal.

PHLEGMORRHAGIA, *Blennorrhœa*.

PHLEGMORRHAGIE (PULMONAIRE, Bronchorrhœa.

PHLEGMORRHŒA, *Blennorrhœa*.

PHLEGMYMENT'IS, *Phlegmymen'itis*, from *φλεγμα*, 'phlegm,' *μνη*, 'a membrane,' and *itis*, the termination for inflammation. Inflammation of a mucous membrane.

PHLEGMYMENTIS ENTERICA, see *Enteritis*.

PHLEPS, Vein.

PHLOGIA, Inflammation.

PHLOGICUS, Inflammatory.

PHLOGISTIC, Inflammatory.

PHLOGISTICI, *Empresma*.

PHLOGISTON, Hydrogen.

PHLOGMUS, *Verbasum thapsus*.

PHLOGO'DES, from *φλοξ*, *φλογος*, (*φλεγω*, 'I burn,') 'flame,' and *ειδος*, 'resemblance.' *Inflamed, Inflammatus, Inflammatorius*, Inflammatory. An epithet employed particularly to express the red colour of the face.

PHLOGOGYRUS, Antiphlogistic.

PHLOGOPYRUS, *Synocha*.

PHLOGOSED, Inflamed.

PHLOGO'SIS, *Incedidum, Inflammation*, from *φλοξ*, *φλογος*, 'flame.' Some writers use this word exclusively for external inflammation — phlegmon; others, for that which is superficial or erysipelatous.

PHLOGOT'ICA, *Inflammations*. The second order in the class *Hæmatica* of Good.

PHLOIOS, Cortex.

PHLOMUS, *Verbasum thapsus*.

PHLOOS, Cortex.

PHLOR'IDZINE, *Phloridzi'na, Phloridzin*, from *φλοος*, 'inner bark,' and *ριζα*, 'root.' The bitter or active principle of the root and trunk of the apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour when in masses, or in long slender prisms or tables,

when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°, only dissolve about one part; but at from 70° to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429. It has been administered successfully in intermittents,—10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, Cortex.

PHLOX, *Verbasicum thapsus*.

PHLYCTÆNA, *Phlyctæ'nis*, *Phlyctis*, *Phlyctæ'cion*, *Ampull'æ*, *Holophlyctides*, *Phlyctides*, *Phlysis*, from φλυζω, 'I boil.' Tumours formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNULA, see Hydatid.

PHLYCTENOID, *Phlyctenoi'des*, from *phlyctæna*, and *oides*, 'resemblance.' Resembling phlyctænæ. An epithet for a variety of herpes.

PHLYCTENULAR, same etymon as Phlyctæna. Of or belonging to phlyctænula,—as *phlyctenular ophthalmia*; inflammation of the eye, accompanied with phlyctænulæ on the cornea.

PHLYCTIDES, Phlyctæna.

PHLYCTIDIUM, same etymon. A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small-pox pustule, and that produced by the application of tartar emetic ointment, are examples of it.

PHLYCTIS, Phlyctæna.

PHLYSIS, φλυσις, same etymon. A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tense, glabrous: diffused, hot, throbbing; at length fluctuating, with an acrid ichor.—Good.

PHLYSIS, Phlyctæna—p. Ecthyma, Ecthyma—p. Impetigo, Impetigo—p. Porrigo, Porrigo—p. Scabies, Psora.

PHLYZACIA, Ecthyma.

PHLYZACION, Phlyctæna.

PHOBODIPSON, Hydrophobia.

PHOCOMELUS, from φωνη, 'a seal,' and μελος, 'a limb.' A monster, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seals and the herbivorous cetacea.—I. G. St. Hilaire.

PHIENICINE, Hæmatin.

PHIENICISMUS, Rubecula.

PHIENIGMUS, Phenigmus—p. Petechialis, Purpura simplex.

PHIENIX DACTYLIFERA, Date tree—p. Exceelsa, Date tree.

PHIENODINE, Hæmatin.

PHONA'TION, *Phona'tio*, from φωνη, 'voice.' The physiology of the voice.

PHONE, Voice.

PHO'NICA, φωνικα, from φωνη, 'voice.' The first order of the class *Pneumatica*, in Good's Nosology. Defined; diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONON'OSI, *Phononni'si*, from φωνη, 'the voice,' and νοσος, 'a disease.' *Phonopathi'æ*, *Morbi vocis*. Diseases of the voice.

PHONAPATHIÆ, Phononosi.

PHORA, Gestation.

PHORBE, Pabulum.

PHORONOMIA, from φητω, 'I move,' and νόμος, 'law.' The doctrine of muscular motion.

PHOROUS, from φητω, 'I carry.' A suffix denoting conveyance. Hence, *Galactophorous*, &c.

PHOS, Light.

PHOSPHAS, *Phosphate*. A salt formed by the union of phosphoric acid with a salifiable base.

PHOSPHAS CALCIUM STIBIATEM, Antimonial powder—p. Calcis stibiatus, Antimonial powder—p. Natricum, Soda, phosphate of.

PHOSPHATE, Phosphas.

PHOSPHAT'IC, *Phosphat'icus*, from *Phosphorus*. Relating to the phosphates; hence the *Phosphat'ic Diathesis* is the habit of body which favours the deposition of the phosphates from the urine.

PHOSPHÈNE, see Photopsia.

PHOSPHORE, Phosphorus.

PHOSPHORÈNÈSES, M. Baumes unites, under this generic name, diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphates or its decomposition. Amongst these affections he ranks rachitis, osteo-malacia, and gout.

PHOSPHORES'CENTE, *Phosphorescentia*, *Luminosity*; from *phosphorus*. The properties possessed by certain bodies of being luminous in obscurity, or under particular circumstances. This phosphorescence has been occasionally witnessed in man, when suffering from some wasting disease, and near death.

PHOSPHORIC ACID, *Ac'idum phosphoricum*, (F.) *Acide phosphorique*. Same etymon. A solid, colourless compound; highly sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acids. An *Acidum phosphoricum dilutum* is officinal in the London pharmacopœia.

PHOSPHORNECROSIS, see Phosphorus.

PHOSPHORURIA, Urine, phosphorescent.

PHOS'PHORUS, *Phosphorum*, *Antophos'phorus*, *Ignis philosophicus*, *Lumen constans*, from φως, 'light,' and φητω, 'I carry.' (F.) *Phosphore*. 'A light carrier.' An elementary or undecomposed substance; not metallic; solid; transparent or semitransparent; colourless; brilliant; flexible; of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. It does not exist pure in nature, but is found frequently united to other bodies. Its fumes in the manufacture of lucifer and Congreve matches have caused, it is said, necrosis of the lower jaw—*Phosphoronecrosis*, *phosphorus jaw disease*, *Lucifer-match-makers' Disease*.

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration: hence it is rarely employed.

PHOSPHORUS JAW DISEASE, see Phosphorus.

PHOSPHURIA, Urine, phosphorescent. See Urine.

PHOTOCAMPSIS, Refraction.

PHOTOMA'NIA, from φως, φητος, 'light,' and *mania*. Insane delirium induced by light.

PHOTOPHO'BIA, from φως, φητος, 'light,' and φοβος, 'fear.' Aversion to light:—intolerance of light. Nyctalopia.

PHIOTOPHOBICUS, Lucifugus.

PHIOTOPHOBOPHTHALMIA, Nyctalopia.

PHIOTOPHOBUS, Lucifugus.

PHIOTOP'SIA, *Vision lucidua*, from φως, φητος, 'light,' and ψη, 'the eye.' A false perception of light, as of sparks, flashes of fire, &c., occasioned by certain conditions of the retina and brain, and by pressure on the eyeball. When pressure does not induce the luminous appearance, (F.) *Phosphène*, the existence of amaurosis may be inferred. See Metamorphopsia.

PHOTURIA, from φως, φωτος, 'light,' and ουρον, 'urine.' A luminous condition of the urine.

PHRAGMOS, φραγμος, 'a fence,' from φρασσαω, 'I enclose.' A row of teeth.

PHRASIS, Voice, articulated.

PHRASUM, Marrubium.

PHREN, φρην, 'the mind.' Also, the diaphragm and scrobiculus cordis.

PHRENAUX'E, *Hypertroph'ia cer'ebri*, from φρην, 'the mind, the organ of mind,' and αυξη, 'increase.' Hypertrophy of the brain.

PHRENATROPH'IA, *Atroph'ia cer'ebri*, from φρην, 'the mind, the organ of mind,' a, priv., and τροφη, 'nourishment.' Wasting or atrophy of the brain.

PHRENES, Diaphragm.

PHRENESIA, Phrenitis.

PHRENÉSIE, Phrenitis.

PHRENESIS, Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENISMUS, Phrenitis.

PHRENIC, Diaphragmatic.

PHRENICA, from φρην, 'the mind.' Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties, (*Phrenopath'ia*.) The first order of the class *Neurotica* of Good. Also, remedies that affect the mental faculties—*Phren'ics*.—Pereira.

PHRENICS, see Phrenica.

PHRENICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRENISMUS, Phrenitis.

PHRENITIS, *Phren'esis*, *Phrene'sia*, *Phreneti'asis*, *Phrenis'mus*, *Phrenetis'mus*, *Cephal'itis*, *Encephal'itis*, *Cerebri'tis*, *Cephalal'gia inflammato'ria*, *Karabitus* (Arab.), *Sibæ*, *Sphacelis'mus cer'ebri*, *Empres'ma cephal'itis*, *Siri'asis*, *Seiri'asis*, *Siderat'io*, *Inflammat'io seu Canma phreni'tis*, *Phrensy*, *Delirium*, *Brain Fever*, (F.) *Phréné-sie*, *Cérébrite*, *Inflammation du cerveau et du cervelet*, from φρην, 'the mind,' and itis, denoting inflammation. A disease characterized by violent pyrexia, pain in the head, redness of the face and eyes, intolerance of light and sound, watchfulness, and delirium, either furious or muttering. Its causes are the same as those of other inflammations; sometimes, however, it is induced by a *Comp de soleil*; by inebriation; violent mental emotions, &c. Some authors have given the name *Phrenitis* and *Meningitis* to inflammation of the membranes of the brain; and that of *Cephalitis*, *Encephalitis*, or *Cerebritis* to inflammation of the substance of the brain; but there are no pathognomic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively. Phrenitis is, of course, a very dangerous affection, from the importance of the organ concerned. The most active treatment must necessarily be pursued. Repeated bleeding; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counter-irritants to the nape of the neck or to other parts of the body will be useful adjuvants. When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphrenitis*.

Hydrocephalus acutus is a variety of phrenitis.

PHRENIS CALENTURA, *Comp-de-soleil*—p. Latrans, Hydrophobia—p. Potatorum, Delirium tremens—p. Verminosa, Vercoquin.

PHRENO-GLOTTISM, Asthma thymicum.

PHRENOLOGY, Craniology.

PHRENO-MAG'NETISM, *Phreno-mes'merism*, *Mes'mero-phrenol'ogy*. A term applied to the condition of a mesmerized person, in which, when any cerebral or phrenological organ—so called—

is touched, the functions of the organ are manifested. It has been established, that no such phenomena can be elicited in children, or in those who have never seen a phrenological cast or picture.

PHRENOPARALYSIS, see Paralysis.

PHRENOPATHIA, see Phrenica.

PHRENOPATH'IA ÆTH'E'REA. The aggregate of encephalic phenomena induced by the inhalation of ether.

PHRENSY, Phrenitis.

PHRICASMUS, Horripilation.

PHRICE, Horripilation.

PHRICIA, Horripilation.

PHRICIASIS, Horripilation.

PHRICO'DES (FEBRIS), from φρικη, 'a shivering;' *Horri'fica*. A fever in which the chill is very intense and prolonged.

PHRYAGMA, Shuddering.

PHRYCTE, Colophonias.

PHRYG'TUS (LAPIS). An earthy matter, found in Phrygia and Cappadocia, and formerly employed as an astrigent.—Gorræus.

PHTHARMA CALIGO, Caligo—p. Cataracta, Cataract—p. Glaucoma, Glaucoma.

PHTHEIR, Pediculus.

PHTHEIREM'IA, from φθειρω, 'I corrupt,' and 'αιμα, 'blood.' A state in which the plastic powers of the blood are deteriorated.

PHTHEIR'ASIS, *Phthiri'asis*, *φθειρασις*, from φθειρ, 'a louse;' *Morbus pediculo'sus seu pedicula'ris*, *Pruri'go pedicula'ris*, *Pedicula'tio*, *Malis pediculi*, *Peta'le*, *Lousiness*, *Lousy disease*, (F.) *Maladie pédiculaire*, *Phthiriasæ*. A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted that the affection has often caused death. Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PHTHEIRIUM, Delphinium staphisagria.

PHTHEIROCTONUM, Delphinium staphisagria.

PHTHINAS, Phthisis.

PHTHINODES, Phthisicus.

PHTHIRIASE, Phthiriasis.

PHTHIRIASIS, Malis, Phthiriasis.

PHTHIRIUM SCABIEL, see Psora.

PHTHIRIUS, Antiparasitic—p. Inguinalis, see Pediculus.

PHTHIROCTONUS, Abortive.

PHTHIROPORON, Autumn.

PHTHISES: same etymon as Phthisis. In the classification of Fuchs, diseases attended with ulceration, hectic fever, and emaciation.

PHTHISIC, Phthisis. Also, a slight tickling cough, (Prov.) *Tissick*.

PHTHISICAL, Phthisicus.

PHTHIS'ICUS, *Phthino'des*, *Phthis'ical*, *Tis'ical*, (F.) *Phthisique*, *Poitrinaire*; same etymon as phthisis. Belonging to phthisis. Also, one labouring under phthisis, or who is *consumptive*.

PHTHISIE, Phthisis pulmonalis—p. *Aiguë*, Consumption, galloping—p. *Calculeuse*, Calculi, pulmonary, see Lithiasis pulmonum—p. *Carcinomatæuse*, Phthisis, cancerous—p. *Galopante*, Consumption, galloping—p. *avec Mélanose*, Anthracosis pulmonum—p. *Mésentérique*, Tabes mesenterica—p. *Trachéale*, see Phthisis laryngea—p. *Tuberculeuse*, Phthisis pulmonalis.

PHTHISIOLOG'Y, *Phthisiolog'ia*, from φθειρ, and λογος. A treatise on phthisis.

PHTHISIOSIS, Tubercular consumption.

PHTHISI-PNEUMONIA, Phthisis pulmonalis.

PHTHISIQUE, Phthisicus.

PHTHISIS, *Phthoë*, *Phthinas*, *Tabes*, *Te'ce-*

don, Consumption, Decline, Phthisic, Tisic, from *phtho*, 'I waste away, I decay.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to phthisis pulmonalis.

PHTHISIS ACTA, Consumption, galloping — p. Black, see Anthracosis.

PHTHISIS BRONCHIAL, *Phthisis bronchia'lis*. Phthisis occasioned by the pressure of enlarged tuberculous bronchial glands, which, not unfrequently, communicate with caverns in the lungs, or with the bronchia.

PHTHISIS CALCULOSA, Lithiasis pulmonum.

PHTHISIS CANCEROUS, *Scirrhus, Carcinoma et Fungus Pulmonum, Mel'nllary or Enecephaloid Tumeur of the Lung, (F.) Cancer du Pommou*. Cancer of the lung, which gives rise to carcinomatous phthisis, (F.) *Phthisie carcinomatuse*, of Bayle.

PHTHISIS CONSUMMATA, see Ph. pulmonalis — p. Dorsalis, Tabes Dorsalis — p. Dyspeptic, see Phthisis — p. Exulcerata, Ph. pulmonalis — p. Hepatica, Hepato-phthisis — p. Ischiadica, Ischio-phthisis.

PHTHISIS LARYNGEA, *Chronic Laryngit'is, Laryngit'is et Tracheit'is chronica, Tuberculo'sis laryng'is et trache'æ, Laryngo-et-Tracheophthisis, Laryngophthisis, Ulcera seu Helco'sis Laryngis, (F.) Phthisie laryngée, Ulcère du larynx, Laryngite avec sécrétion de Pus*, is a species of consumption analogous to phthisis pulmonalis, produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis tracheo'lis, Tracheophthisis, (F.) Phthisie trachéale*, is a similar affection, seated in the trachea. Chronic inflammation of the larynx and trachea may exist, however, without tubercles or phthisis.

PHTHISIS MESERICA, Tabes mesenterica — p. Nodosa, Ph. pulmonalis — p. Mucosa, see Bronchorrhœa — p. Notias, Tabes dorsalis — p. Pituitosa, see Bronchorrhœa.

PHTHISIS PULMONA' LIS, *Ph. pulmonum seu pulmona'ris seu nodosa pulmona'lis vera seu tuberculo'sa seu serophulo'sa seu tuberculo-ulcerata seu purulen'ta exulcerata seu exulcerata, Marasmus seu Helctico seu Hæmopt'ysis phthisis, Passio vomitoc'flua, Phthisi-pneumonia, Tabes pulmona'lis seu pulmo'num, Ulcus pulmonum, Helco'sis pulmona'lis, Pneumophthisis, Pneumophthoë, Pneumophthoë, Pulmo'nia, Tuberculo'sis Pulmonum, Gongrophthisis, Morbus Anglicus, Tuberculous disease of the lungs, Pulmonary consumption, Consumption, Decline, Phthisic, Tisic, (Se.) Teasick, (F.) Phthisie, P. pulmonaire seu tuberculeuse, Crachement de pus*. Occasionally, this formidable disease occurs accidentally: but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause may be required to rouse the predisposition into action. It is less a disease of the torrid zone; and in the temperate regions of the globe, its pathology is often intimately allied with that of serofula. It consists in the formation of tubercles in the lungs, which sooner or later inflame and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever — the universal attendant upon irritability and debility — is established. This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritable fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough with dyspnœa. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; and dyspnœa is increased on the

slightest exertion. The expectoration is evidently purulent, with fever in the evening, and circumscribed redness of the cheeks; wasting and colliquative sweats early in the morning. This must be considered the confirmed stage, — *Phthisis consummata, Pneumophthisis*. In the third, or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhœa. The weakness becomes extreme, and the patient exhausted. *Physical Signs*. — 1. In the first stage, whilst there are yet scattered miliary tubercles, — the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung. In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous râles are occasionally heard in the same region. 2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be perile. 3. When the tubercles are undergoing softening, — in addition to the preceding signs, auscultation exhibits a suberepitant râle around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately *gargouillement* is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the incipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter, and spring months is the best. See Climate. If this be impracticable, the patient must be kept in a regulated temperature, taking care that the chamber is duly ventilated; and gestation in the open air be used, whenever the atmosphere, although cold, is dry. The other indications will be: 1. To moderate inflammatory action: 2. To support the strength; and, 3. To palliate urgent symptoms. The whole treatment indeed is palliative. Counter-irritants relieve pain: demulcents and mild opiates alleviate the cough: the mineral acids, united with opium, relieve the colliquative sweats: and chalk and opium the diarrhœa.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs; flatulent, irregular bowels; furred tongue; impaired appetite; unnatural fœces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *Dyspeptic phthisis*.

PHTHISIS PULMONALIS PURULENTA EXULCERATA, *Phthisis pulmonalis* — p. *Pulmonalis serofulosa, Phthisis pulmonalis* — p. *Pulmonalis tuberculosa, Phthisis pulmonalis* — p. *Pulmonalis tuberculosa-ulcerata, Phthisis pulmonalis* — p. *Pulmonalis vera, Phthisis pulmonalis* — p. *Pupillæ, Synezisis* — p. *Pupillaris, Myosis* — p. *Serophu-*

losa, Phthisis pulmonalis — p. Sicca, Tabes dorsalis — p. Tuberculosa, Phthisis pulmonalis — p. Uterina, Metrophthisis — p. Vesicalis, Cysto-phthisis.

PHTHISURIA, Diabetes.

PHTHISURIE, Diabetes — p. *Sucrée*, Diabetes mellitus.

PHTHOË, Phthisis.

PHTHOÏS, Pastil, Trochiscus.

PHTHOÏSCOS, Pastil, Trochiscus.

PHTHONGODYSPHORIA, Hyperacusis.

PHTHORA, Abortion, Corruption, Plague.

PHTHORIUS, Abortive.

PHTHOROTONUS, Abortive.

PHUCAGROSTIS MINOR, *Pila marina*.

PHUSCA, Oxycerate.

PHYGANTHROPIA, Misanthropy.

PHYGETH'LOŃ, *Panus*, *Phyphella*, from φῦω, 'I grow,' [?]. Inflammation of the superficial lymphatic glands, not ending in suppuration.

PHYLACTERIUM, Amuletum.

PHYLACTERIUM, φυλακτήριον, from φυλάσσω, 'I preserve.' A *Phylactery*, (F.) *Phylactère*. An amulet: — a prophylactic.

PHYLAXIS, Conservation.

PHYLLAN'THUS URINARIA, *Binkohumba*. Ord. Euphorbiaceæ. A plant employed in Ceylon, in decoction, as a diuretic.

PHYLLITIS, *Asplenium scolopendrium* — p. *Muraria*, *Asplenium ruta muraria* — p. *Rotundifolia*, *Asplenium trichomanoides*.

PHYMA, *Phima*, from φῦω, 'I grow.' With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the nosology of Sauvages, *Phymata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, syçosis, and anthrax.

PHYMA ANTHRAX, Anthrax — p. Anthrax terminthos, *Terminthos* — p. Syçosis, Syçosis.

PHYMATOID, *Phymatoides*, (F.) *Phymatoides*, from φῦμα, 'a tubercle,' and εἶδος, 'resemblance.' A state of cancerous tissue, in which the dull yellow hue and the consistence resemble those of tubercle. — Lebert.

PHYMATO'SES, from φῦμα, 'a hard tumour.' Tuberculous diseases. — Fuchs.

PHYMATOSIS, Exerescence — p. *Cerebri*, *Encephalophymata* — p. *Elephantiasis*, *Elephantiasis* — p. *Lupus*, *Lupus* — p. *Verrucosa*, *Verruca*.

PHYMOSIS, Phimosiis.

PHYPELLA, *Phygethlon*.

PHYSA, Crepitation.

PHYSAGOGA, Carminatives.

PHYSALIS, from ψυσα, 'a bladder,' referring to the inflated calyx, *P. Alkekengi* seu *halicacabum*, *Solanum vesicarium*, *Alchachen'gê*, *Alkekengi*, *Halicacabum*, *Winter Cherry*, (F.) *Alkekenge*, *Coqueret*. Ord. Solanaceæ. *Sex. Syst.* Pentandria Monogynia. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropsical and calculous cases. It has been affirmed, that the whole plant—twigs, leaves, capsules and berries—possesses the antiperiodic virtues of *Cinchona*.

PHYSALIS ALKEKengi, *Physalis* — p. *Halicacabum*, *Physalis* — p. Obscura, *Ph. viscosa* — p. *Pennsylvanica*, *Ph. viscosa* — p. *Pubescens*, *Ph. viscosa* — p. *Stramonium*, *Anisodum luridum*.

PHYSALIS VISCO'SA, *P. obscura* seu *Pennsylvanica* seu *pubescens*, *Ground cherry*; indigenous. The berries are said to be diuretic and sedative.

PHYSCE, Abdomen, Colon.

PHYSCIA ISLANDICA, *Lichen Islandica* — p. *Nivalis*, *Lichen caninus*.

PHYSCO'NIA, from φυσκων, 'the paunch.'

Ventros'itas, *Eceph'yma physco'nia*, *Hyposar'ca*, *Emphrac'tica*, *Visco'nia*, *Hypersarchid'ios*, *Pot-belly*, *Pendulous abdomen*, *Swagbelly*, *Gorbelly*, (Prov.) *Gotchbelly*, *Pedbelly*. A generic term, under which Sauvages has comprised every large tumour developed in the abdomen. that is neither fluctuating nor sonorous. Linnæus calls it *Hyposar'ca*.

PHYSCO'NIA ADIPO'SA, *Obes'itas* seu *Polysar'cia vis'cerum*. Accumulation of fat in the intestines.

PHYSCONIA BILOSIA, *Turgescens vesicula felleæ*.

PHYSCONIA EMPHYSEMAT'ICA. Accumulation of air in the areolar tissue, or between the coats of particular viscera.

PHYSCONIA LIENIS, *Splenoncus* — p. *Mesenterica*, *Tabes mesenterica* — p. *Splenica*, *Ague cake*.

PHYSCONIA STRUMO'SA, *Scroph'ula abdomina'lis inter'na*. Tumid abdomen from scrophulous enlargement of the glands.

PHYSCONIE MÉSENTÉRIQUE, *Tabes mesenterica*.

PHYSEMA, *Tympanites*, *Physisis*.

PHYSE'SIS, *Physe'ma*, from φυσω, 'I inflate.' An emphysematous tumour. *Tympanites*.

PHYSETER MACROCEPHALUS, see *Cetaceum*.

PHYSIATRICE, *Vis medicatrix naturee*.

PHYSIAUTOCRATIA, *Vis medicatrix naturee*.

PHYSIC, *Medicament*, *Medicina* — p. *Indian*, *Euphorbia corollata*, *Gillenia trifoliata* — p. *Root*, *Leptandra purpurea*.

PHYSICAL, *Medical*.

PHYSIC'IAN, *Med'icus*, *Iatros*, *Aces'tor*, *Aces'ter*, *Altheus*, Παῖων, *Pæon*, (Old Eng.) *Fesiv'ian*, *Ficivion*, *Leche*, *Leech*, from φυσis, 'nature.' (F.) *Médecin*, *Docteur*. One who has received his degree from an incorporated Institution, as Doctor of Medicine. The French formerly used the word *physicien* in the same sense. It is now appropriated by them to the natural philosopher. *Physicist* has the same signification.

PHYSICIAN, FAMILY. One regarded as the regular attendant on a family.

PHYSICIAN, LEARNED, *Iatrosophista* — p. *Practical*, *Iatrotechna* — p. *Priest*, see *Asclepiadæ*.

PHYSICIEN, *Physician*.

PHYSICIST, see *Physician*.

PHYSICS, MED'ICAL, *Iatrophys'ics*. *Physics* directly applied to medicine, — either to the explanation of the vital phenomena, the preservation of individuals, or the treatment of disease.

PHYSIOAUTOCRATIA, *Vis medicatrix naturee*.

PHYSIOG'NOMIST, *Physiognom'on*, one who busies himself especially with, or pretends to be versed in, *physiognomy*.

PHYSIOG'NOMY, (Old Eng.) *Vis'nomy*, *Physiognom'ia*, *Physiognom'ica*, *Physiognom'icê*, *Physionom'ia*, *Physiognomon'ia*, *Physiognom'oiê*, *Physiognomos'yne*, *Physiognosia*, *Anthroposcopy'ia*, *Prosopomanti'ia*, *Prosopolog'ia*, *Semiol'icê fa'ciê*, *Physiognomou'ica*, *Physiognomoi'ouy*, *Metopos'copy*, *Prosopos'is*, from φυσis, 'nature,' and γνωμη, 'knowledge.' The art of knowing the dispositions of men from their external appearance; especially from the features. Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others. In infantile diseases, numerous shades of expression are evident, which experience teaches how to appreciate; and which afford useful guides in understanding the pathology of that period of existence.

PHYSIOLOGIA PATHOGENETICA, see *Pathogenetic*.

PHYSIOLOG'ICAL, *Physiolog'icus*, (F.) *Physiologique*. Relating or belonging to *physiology*.

PHYSIOLOGICAL ANATOMY, see Anatomy—p. Doctrine, Broussaism.

PHYSIOLOGICÆ, Physiology.

PHYSIOLOGIST, *Physiologus*. Same etymon as the next. One who occupies himself specially, or is well acquainted, with physiology.

PHYSIOLOGY, *Physiologia*, *Biologia*, *Bionomy*, *Biotica*, *Biophænomenologia*, *Physiologia*, *Ecconomia animalis*, *Anatomia viva*, *Anatomie animalis*, *Anthropologia*, *Microcosmogaphia*, *Microcosmica scientia*, *Cognitio physiologica*, *Partu naturalis medicinarum*, *Philosophia corporis vivi*; from φυσικ, 'nature,' and λογος, 'a description.' Formerly, Physiology meant the same as Physics, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which constitute life. It is the science of life. It is divided into animal—*Zoophysiology*, or *Zoobiologia*; and vegetable—*Phytophysiology*, or *Phytobiologia*, according as it considers the life of animals or of vegetables singly. *Comparative physiology* comprises both. Physiology is, also, general or special, according as it treats of life in the abstract or in some particular species. To the latter belongs the *Physiology of Man*,—called also, *Hygienic Physiology* to distinguish it from *Pathological Physiology* or *Pathology*.

PHYSIOLOGY, PATHOGENETIC, see Pathogenetic.

PHYSIONOMIA, Physiognomy.

PHYSIONOMIE ÉGARÉE, see Wild.

PHYSIS. Natura, Sex.

PHYSOCELE, *Pneumatocèle*, *Hernia ventosa*; from φυσικ, 'I inflate,' and κηλη, 'a tumour.' An emphysematous tumour of the serotum; probably a case of intestinal hernia, containing much flatus.

PHYSOCEPHALUS, from φυσικ, 'I inflate,' and κεφαλη, 'the head.' (F.) *Physocéphale*. Emphysematous tumefaction of the head.

PHYSOCELIA, Tympanites.

PHYSO'DES; from φυσικ, 'I inflate,' and εidos, 'resemblance.' Full of air; apparently full of air—applied to tumours, &c.

PHYSOMETRA, *Erythryma Uteri* seu *Uteri tum*, *Hysterophyse*, *Hysteremphysema*, *Hystremphysema*, *Metremphysema*, *Inflatio Uteri*, *Tympany of the Womb*, *Uterine tympanites*, from φυσικ, 'I inflate,' and μετρα, 'the womb.' A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous, with wind occasionally discharged through the os uteri with noise, *Hysterophyse*, *Ædæmophyse uteri*.

PHYSON, Flatulence.

PHYSONCUS, Emphysema.

PHYSOSOPHIA; from φυσικ, 'I inflate,' and σφους, 'a noise.' A discharge of air with noise.

PHYSOSPASMUS, Colica flatulenta.

PHYSOTHORAX, Pneumothorax.

PHYTELPHAS MACROCARPA, from φυτον, 'a plant,' and ελεφας, 'an elephant.' A tree of South America, called, by Willdenow, *Elephantia*, the dense albumen of whose unt, is the vegetable ivory, which is as durable and nearly as hard as the ivory of the elephant.

PHYTIVOROUS, Phytophagous.

PHYTOALOPECIA, Porrigo decalvans.

PHYTOBIOLOGIA, see Physiology.

PHYTO-CHEMISTRY, see Chemistry.

PHYTOLACCA DECAN'DRA, *P. vulgaris*, *Poke Weed*, *American night shade*, *Cancer root*, *Poke*, *Skoke*, *Jacato* *Callæoe* [?], *Jalap*, *Pigeon Berry*, *Jalap cancer root*, *Salsolum racemosum Americanum* seu *magnum Virginianum rubrum*, *Blitum Americanum*, *Garyet*, (F.) *Raisin d'Amé-*

rique, *Phytolacque à dix étamines*, *Morelle en grappes*, *Méchoacan du Canada*, *Ord. Chenopodiaceæ*; *Sec. Syst. Decandria Deægynia*; from φυτον, 'a plant,' and λακα; because the colour of the juice of the berries resembles that of lacca. The leaves, berries, and roots are employed. The young stems, when boiled, are sometimes eaten at table; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism: and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions; tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

PHYTOLOGUE À DIX ÉTAMINES, *Phytolacca decandra*.

PHYTOLOGIA MEDICA, Botany, medical.

PHYTO-PARASITE, Epiphyte.

PHYTOPIAGOUS, *Phytophagus*; *Phytivorous*, *Phytivorus*; from φυτον, 'a plant,' and φαγω, 'I eat.' Feeding or subsisting on vegetables.

PHYTOPHYSIOLOGIA, see Physiology.

PHYTOSPERMATA, (F.) *Phytospermes*; from φυτον, 'a plant,' and σπερμα, 'sperm.' Particles similar to the spermatozooids of animals, observed in vegetables, and presumed to possess a similar agency in reproduction.

PHYTOTOMY, see Anatomy, (vegetable.)

PHYTOZOON, Zoophyte.

PIA MATER, *Pia seu mollis seu ten'nis Mater*, *Pia mening*, *Mening interior seu vasculosa seu choroides*, *Inner lamina of the Meningeæ*, (Ch.), *Membra'na vasculosa Cer'ebrî*, *M. Cer'ebrî ten'nis seu mollis seu pro'pria*, (F.) *Pie m'ère*, *Méningette*. The pia mater is a very delicate membrane, which covers the brain immediately, penetrates into its anfractuosités, and envelops, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a network of blood-vessels, united by a lax areolar tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fossæ, into which it penetrates by a cleft situate between the posterior part of the corpus callosum and the fornix; and by two other fissures, situate between the corpora fimbriata and thalami nervorum optiorum. The pia mater contains a great number of granulations similar to the *Glandula Pacchioni*.

PIA MATER TESTIS, *Tunica vasculosa*—p. *Mening*, *P. Mater*.

PIAN, *Fraumbœsia*.

PIANS, MOTHER OF, *Mama-pian*.

PIAR, Fat.

PIARHÉMIA, *Piarrhêmia*, from πιαρ, 'fat,' and 'αίμα, 'blood.' Fat in the blood.—Simon.

PICA, Malacia—p. *Africaorum*, *Chthonophagia*.

PICAC, *Euphorbia corollata*.

PICACISM'US, *Pica'tio*, from πικ, *picis*, 'pitch.' Depilation by means of a pitch plaster. Also, Malacia.

PICATIO, Malacia, *Picacismus*.

PICEA, *Pinus abies*.

PICERON, Butter.

PICHURIM BEANS. The seed, *Faba Pichurim*, *F. Pechu'ri*, *Para nut*, *Sassafras nut*, *Puzici*, *Brazil'ian nutmeg*, of a tree, supposed to be *Persea pichurim*, *Ocote'a pichurim* seu *Puchury*, *Tetranth'ra pichurim*, *Nectan'dra puchury*, *Puchury* or *Puchury* of the Brazilians, *Ord. Lauracææ*, which grows in Brazil, Guiana, Venezuela, and other parts of South America. They are of an elliptical shape; flat on one side, convex on the other; of an aromatic odour between that of

nutmegs and saffras, and of a spicy, pungent taste. The medical properties are the same as those of other aromatics. For the bark, see *Pechurim cortex*.

PICK, Emetic.

PICKERELWEED, SHOVEL, *Unisema difolia*.

PICOTE, Variola.

PICOTEMENT, Pricking.

PICOTIN, *Arum maculatum*.

PICRA, Pulvis aloës et canellæ.

PICRÆNA EXCELSA, Quassia.

PICRIA, Bitterness.

PICRUM SPICATUM, *Coutoubea alba*.

PICROCHOLUS, Bilius.

PICROMEL, *Bilin*; from *πικρος*, 'bitter,' and *μέλι*, 'honey.' A name given by Thénard to a colourless, soft substance, of an acrid, bitter, saccharine taste, nauseous smell, and very soluble in water, which is considered to be a *bilote of soda*. It is not an immediate principle, but a mixture of different substances. It forms part of the bile, and is generally classed amongst the animal immediate principles.

PICROPE'GÆ, *Pikropé'gæ*, from *πικρος*, 'bitter,' and *πηγή*, 'a spring.' Mineral waters; bitter from the presence of chloride of magnesium.

PICROS, Amarus.

PICROTOX'INE, *Picrotox'ina*, *Picrotox'in*, from *πικρος*, 'bitter,' and *toxicum*, 'poison.' A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The *Cocculus Indicus* owes its poisonous properties to this principle.

PIE MÈRE, Pia mater.

PIE-MÉRTE, *Inflammatiō piæ matris*. A miserably compounded term, employed by M. Grisolle, to express inflammation of the pia mater:—from (F.) *pie mère*, 'the pia mater,' and *ite, itis*; a termination denoting inflammation.

PIÈCE, Hepatitis.

PIÈCES D'ANATOMIE ARTIFICIELLES, see Artificial.

PIED, Pes — *p. d'Alexandre*, *Anthemis pyrethrum* — *p. d'Alonette des champs*, *Delphinium consolida* — *p. Bot*, see *Kyllosis* — *p. de Chat*, *Antennaria dioica* — *p. de Cheval marin*, *Cornu ammonis* — *p. de Griffon*, *Gryphus pes*, *Helleborus foetidus* — *p. de Lièvre*, *Arum maculatum* — *p. de Lion*, *Alchemilla* — *p. de Lit*, *Origanum* — *p. d'Onrs*, *Acanthus mollis* — *p. Plat*, see *Kyllosis* — *p. de Veau*, *Arum maculatum* — *p. de Veau triphyllle*, *Arum triphyllum*.

PIÉIRON, Fat.

PIERRE, Calculus — *p. d'Aigle*, *Ætites* — *p. d'Aimant*, *Magnet* — *p. d'Azur*, *Lapis lazuli* — *p. Calaminaire*, *Calamine* — *p. à Cantère*, *Potassa cum calce* — *p. Divine*, *Lapis divinus* — *p. d'Écervisse*, *Cancerorum chelæ* — *p. Infernale*, *Argentum nitras* — *p. Judaique*, *Judæus (lapis)* — *p. au Lait*, *Morochthus* — *p. Médicamentous*, *Medicamentous lapis* — *p. Néphrétique*, *Nephreticus lapis* — *p. Ponce*, *Pumex*.

PIERRES CRAYEUSES, Calculi, arthritic — *p. au Fiel*, *Calculi, biliary* — *p. Stercorales*, *Calculus of the Stomach and Intestines* — *p. Urinaires*, *Calculi, urinary*.

PIERREUX, Petrous.

PIESTER, Press.

PIESTERION, Press.

PIESTRON, from *πιέζω*, 'I press.' An instrument recommended by Hippocrates for breaking the bones of the foetal head when too large to be extracted otherwise.

PIGAMON JAUNÂTRE, *Thalictrum*.

PIGEON BERRY, *Phytolacca decandra* — *p. Breasted*, see *Lordosis* — *p. Tree*, *Aralia spinosa*.

PIGMENT CELLS, see *Cell, pigment*.

PIGMENT'AL, *Pigment'ary*, *Pigment'arius*, (F.) *Pigmentaire*, from *pigmentum*, (*pingere, pictum*, 'to paint,') 'paint.' Having relation to pigment or colouring matter.

PIGMENTAL APPARA'TUS, (F.) *Appareil pigmental*. The apparatus concerned in the coloration of the skin of the coloured varieties of man. — *Flourens*.

PIGMENTARIUS, Apothecary, Unguentarius.

PIGMENTARY, Pigmental — *p. Nævi*, see *Nævus*.

PIGMENTUM, Paint — *p. Indicum*, *Indigo* — *p. Nigrum*, see *Choroidea tunica* — *p. Uracu*, *Terra Orleana*.

PIGMY, *Pygmy*.

PIGNEROLE, *Cantaurea calcitrapa*.

PIGNON DE BARBARIE, *Jatropha curcas* — *p. d'Inde*, *Jatropha curcas* — *p. d'Inde, petit*, *Croton tiglium*.

PIGNUT, *Earthnut*, *Groundnut*. The bulbous root of *Bu'nium Bulbocastanum*. *Ord. Umbelliferae*. Called *pignuts*, from the fondness of the pig for them. They have been considered to possess a styptic quality; and are deemed serviceable in atonic affections of the kidney. — *Hooper*.

PIGNUT, *Bunium bulbocastanum*.

PIG'S FLARE, *Adeps suillus*.

PIKROPEGÆ, *Picropegæ*.

PIKRY, Pulvis aloës et canellæ.

PILA, *Sphæra, Palla, παλλα, Ball*. A gymnastic exercise, much used by the ancients as well as moderns. — *Galen*. Also, a mortar and a pestle — *Ac'onê*.

PILA, Mortar, Pillar — *p. Damarum*, *Ægagropila* — *p. Rupticapurum*, *Ægagropila*.

PILA MARI'NA, *Sphæra Marina* seu *Thalassia*, *Halcyonium rotundum*, (F.) *Pelote de Mer*, *Zostère*, *Algue marine*, *A. commune ou des Verriers*. Certain light, round, depressed, or oblong masses — inodorous and insipid — in which rushes, hairs, and the débris of shells are met with. These are found on the sea-shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zostera Mari'na* seu *Marit'ima*, *Alga Mari'na*, (*Big tangles, Ware, Wair, Sea-ware*,) *Phueagrostis minor*. Iodine is detected in the ashes, which accounts for their success in goitre. They have, also, been given as a vermifuge.

PILAIRE, Pileous.

PILAR, Pileons.

PILARE MALUM, *Trichosis*.

PILA'TIO, from *pilus*, 'a hair.' Fracture of the cranium in which the fissure is narrow, and has the appearance of a hair — a *capillary fissure*, (F.) *Fente capillaire*.

PILE, Hair.

PILEA PU'MILA, from *pilus*, 'a hair,' *pilosus*, 'hairy.' *Richweed*, *Clearweed*, *Coolweed*; indigenous; *Order*, *Urticacæ*; flowering from July to September; has been used as a wash in poisoning by *Rhus*. It has a strong, grateful smell.

PILEOLUM, *Calotte*.

PILEOLUS, *Caul, Pileus*.

PI'LEOUS, *Pilo'sus, Pilose, Pilons, Pilar*, (F.) *Pileux, Pilaire*, from *pilus*, 'a hair.' That which relates to the hair. *Hairy*.

PILEOUS SYSTEM of Bichat is that formed by the hair. It comprises the different species of hair of the human body.

PILES, BLIND, *Cæcæ hæmorrhoides*, see *Hæmorrhoids*.

PILEUS, 'a hat, cap, or bonnet for the head.' *Pile'olus*. A shield. A nipple-like instrument, formed of various materials, and used by females

for protecting the nipple during the child's sucking, when the part is painful. Also, a caul.

PILEUS, Cucupha — p. Hippocraticus, *Bonnet d'Hippocrate*.

PILEUX, Pileous.

PILEWORT, *Ranunculus aeris*, and *R. ficaria*.

PILI CAPITIS, see *Capillus* — p. *Cutis*, *Lanugo* — p. *Palpebrarum*, *Cilia* — p. *Pudendorum*, *Pubes*.

PILIER, Pillar.

PILIFEROUS, *Pilifer*, from *pilus*, 'a hair,' and *fero*, 'I bear.' Pile or hair bearing, — as a 'piliferous cyst,' — one containing hair.

PILIMICTIO, see *Trichiasis*.

PILL, *Pilula* — p. *Abernethy's*, see *Pilula hydrargyri* — p. of *Aloes* and *Camboge*, *Pilula aloes et cambogiae* — p. of *Aloes* and *cinchona*, *Pilula aloes et kinæ kinæ* — p. of *Aloes* and *colocynt*, *Pilula aloes et colocyntidis* — p. of *Aloes* and *fetid gums*, *Pilula de aloes et fetididis* — p. of *Aloes* and *ginger*, *Pilula aloes et zingiberis* — p. of *Aloes* and *iron*, *Pilula aloes et ferri* — p. *Aloes* and *myrrh*, *Pilula aloes et myrrhæ* — p. *Aloetic*, *Pilula aloeticæ* — p. *Aloetic* and *assafoetida*, *Pilula aloes et assafoetida* — p. *Aloetic*, compound, *Pilula aloes compositæ* — p. of *Ammonuret* of *copper*, *Pilula ammoniuretæ cupri* — p. *Analeptic*, *James's*, see *Analeptica* — p. *Anderson's*, see *Pilula aloes et jalapæ* — p. *Anodyne*, *Pilula opiatæ* — p. *Antibilious*, *Barelay's*, *Pilula antibiliosæ* — p. *Antibilious*, *Dixon's*, *Pilula antibiliosæ* — p. *Asiatic*, *Pilula Asiaticæ* — p. *Assafoetida*, *Pilula Assafoetidæ* — p. *Bacher's*, *Pilula ex helleboro et myrrhæ* — p. *Barbarossa's*, *Barbarossæ pilulæ* — p. *Barthez's*, see *Pilula aloes et myrrhæ*.

PILL, **BLAIR'S**. An empirical preparation of *colchicum*, much used in England in cases of *gout*.

PILL, **BLAUD'S**. These pills, proposed by *M. Bland* as *antichlorotic*, are formed as follows: — Take of *gum tragacanth*, in powder, six grains; water, one drachm. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pill similar to those of *Vallet*, substitute a drachm of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potassa*, half an ounce. Beat until the mass becomes of a deep-green colour, and of a soft consistence. Divide into 48 [?] pills. Dose, one a day; gradually increasing to two, and afterwards to three.

PILL, **BLUE**, *Pilula hydrargyri* — p. *Brandreth's*, *Pilula aloes et cambogiae* — p. *Calomel*, *Pilula hydrargyri chloridi mitis* — p. *Calomel*, compound, *Pilula hydrargyri submuriatis compositæ* — p. *Calomel* and *opium*, *Pilula calomelanos et opii* — p. *Camboge*, *Pilula cambogiae compos.* — p. *Camboge*, compound, *Pilula cambogiae compositæ* — p. of *Carbonate of iron*, *Pilula ferri carbonatis* — p. *Cathartic*, compound, *Pilula cathartica compositæ* — p. of *Colocynt* and *henbane*, *Pilula colocyntidis et hyoscyami* — p. of *Colocynt*, compound, *Pilula colocyntidis compositæ* — p. *Common*, *Pilula aloes et myrrhæ* — p. of *ammoniated Copper*, *Pilula cupri ammoniati* — p. of *Digitalis* and *squill*, *Pilula digitalis et scillæ* — p. *Dinner*, see *Pilula aloes et kinæ kinæ*, and *Pilula rhej*.

PILL, **DINNER**, of *MR. MAYO*. This is composed of *P. Rhej*, gr. iv. : *Sodæ Carb.* gr. j.

PILL, **EVERLAST'ING**. A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed. A lady having swallowed one of these pills, became seriously alarmed at its not passing. "Madam," said her physician, "fear not; it has already passed

through a hundred patients without any difficulty." — *Paris*.

PILL, **FEMALE**, *Pilula de aloes et fetididis* — p. *Ferruginous*, of *Vallet*, see *Ferri protocarbonas* — p. *Fothergill's*, see *Pilula aloes et colocyntidis* — p. *Frank's*, see *Pilula aloes et kinæ kinæ* — p. *Fuller's*, see *Pilula de aloes et fetididis* — p. *Gulbanum*, compound, *Pilula galbani compositæ* — p. *Griffith's*, *Pilula ferri compositæ* — p. *Griffith's*, see *Pilula rhej compositæ* — p. *Gum*, *Pilula galbani compositæ* — p. *Harvey's*, *Pilula aloes et colocyntidis* — p. of *Hellebore* and *myrrh*, *Pilula ex helleboro et myrrhæ* — p. of *Hemlock*, compound, *Pilula conii compositæ* — p. *Hooper's*, see *Pilula aloes et myrrhæ* — p. of *Iodide of iron*, *Pilula ferri iodidi* — p. of *Ipeacuanha* and *opium*, *Pilula ipeacuanhæ et opii* — p. of *Ipeacuanha* and *squill*, *Pilula ipeacuanhæ cum scillâ* — p. of *sulphate of Iron*, *Pilula ferri sulphatis* — p. *James's* *Analeptic*, see *Analeptica* — p. *Keyser's*, see *Hydrargyrus acetatus* — p. *Lady Crespigny's*, *Pilula aloes et kinæ kinæ* — p. *Lady Hesketh's*, see *Pilula aloes et kinæ kinæ* — p. *Lady Webster's*, *Pilula aloes et kinæ kinæ*.

PILL, **LARTIGUE'S**, *Pilula Colchici et Digitalis*, (F.) *Pilules de Lartigue*. (*Ext. Coloc. c. 3ss*; *Ext. Sem. Colchic. alcoholic.*, *Extract. Digital. alcoholic.* ℞ gr. iss; f. massa in pilul. x dividend.) Dose, two, three, or more, in the 24 hours, in *gout*, until purging is induced.

This is a form that has been employed as a substitute for the *Pilules de Lartigue*, the composition of which is not known. *M. Bouchardat* recommends for the same purpose a combination of *Extractum colocyntidis compositum*, *Extractum colchici* and *Extractum opii*, which is almost identical with pills prescribed by *Sir Henry Holland* for the *gout*; the only difference being, that the latter substitutes *Dover's powder* for the *Extractum opii*.

PILL, **OPiate**, of **LEAD**, *Pilula plumbi opiatæ*.

PILL, **LEE'S NEW LONDON**, is composed of *saccharinum*, *gamboge*, *calomel*, *jalap*, *aloes*, *soap* and *syrup of buckthorn*.

PILL, **LEE'S WINDHAM**, consists of *gamboge*, *aloes*, *soap* and *nitrate of potassa*.

PILL, **MACHINE**, *Pilulier* — p. *Matthews's*, see *Pilula ex helleboro et myrrhæ* — p. *Mercurial*, *Pilula hydrargyri* — p. of *mild chloride of Mercury*, *Pilula hydrargyri chloridi mitis* — p. *Moffat's*, *Pilula aloes et cambogiae* — p. *Morrison's*, *Pilula aloes et cambogiae*, see *Pilula cambogiae compositæ* — p. *Moseley's*, *Pilula rhej compositæ* — p. *Night*, common, *Pilula opiatæ* — p. *Opiate*, *Pilula opiatæ* — p. *Peter's*, see *Pilula aloes et cambogiae* — p. *Plummer's*, *Pilula hydrargyri submuriatis compositæ* — p. of *sulphate of Quina*, *Pilula quiniæ sulphatis* — p. *Red*, *Pilula hydrargyri submuriatis compositæ* — p. *Red*, *Boerhaave's*, see *Hydrargyri sulphuretum rubrum* — p. of *Rhubarb*, *Pilula rhej* — p. of *Rhubarb*, compound, *Pilula rhei compositæ* — p. *Rudius's*, *Pilula aloes et colocyntidis* — p. *Rufus's*, *Pilula aloes et myrrhæ* — p. *Rush's*, see *Pilula aloes et cambogiae* — p. *Seotch*, *Pilula de aloes et fetididis* — p. of *Soap* and *opium*, *Pilula saponis cum opio* — p. *Speediman's*, see *Pilula aloes et myrrhæ* — p. *Squatting*, *Pilula opiatæ* — p. *Squill*, compound, *Pilula scillæ compositæ* — p. *Stuhl's*, see *Pilula de aloes et fetididis* — p. *Starkey's*, see *Pilula ex helleboro et myrrhæ* — p. *Stomachic*, see *Pilula aloes et kinæ kinæ*, and *Pilula rhej* — p. *Storax*, *Pilula e styrace* — p. of *Strychnia*, *Pilula strychniæ* — p. of *Submuriate of mercury*, compound, *Pilula hydrargyri submuriatis compositæ* — p. *Tanjore*, *Pilula Asiaticæ* — p. *Turpentine*, *Pilula de terebinthinâ* — p. *Vallet's*, see *Ferri protocarbonas*, and *Pilula ferri carbonatis* — p. *Webster's*,

Pilulæ aloes et kinæ kinæ — p. Whytt's, see Pilulæ de aloes et foetidis.

PILLAR, *Pi'la*, *Columna*, *Columella*, (F.) *Pilier*. A name given to several parts; as the *pillars of the velum palati*, *diaphragm*, &c.

PILLULA, *Pilula*.

PILNA, MINERAL WATERS OF, see Püllna.

PILON, *Pilum*.

PILOSELLA, *Hieracium pilosella*—v. *Alpina*, *Hieracium pilosella*.

PILOSUS, *Pileosus*.

PILOUS, *Pileosus*.

PIL'ULA, *Pill'ula*, plural *Pill'ulæ*. Diminutive of *pila*, 'a ball.' *Sphærid'ion*, *Catop'ion*, *Catop'otum*, *Catop'otia*, *Sphæ'rion*, *Gongyl'ion*, *Gon'gyllis*, *Gongylid'ium*, *Sphæ'rula Gale'ni*. A pill. (F.) *Pilule*. A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus*, the latter being softer and larger.

Medicines are often given in the form of pill, on account of their disagreeable taste and odour. *Pilula*, also, means a *Pilular mass*.

PILULÆ EX ALOE, *P. aloes compositæ*—p. de *Aloe* et *cambo'giâ*. *P. aloes* et *cambo'giæ*.

PILULÆ ALOËS, *P. Aloë'ticæ* seu *ex Aloë* et *Sapo'næ*, *Aloë'tic Pill*. (F.) *Pilules d'aloës ou aloë'tiques*. (*Aloës* in *pulv.*; *saponis*, sing. \mathfrak{J} ; *syrr.* q. s. to form 240 pills.—Ph. U. S.) Dose, gr. x. to xx, in habitual costiveness.

PILULÆ ALOES ET ASSAFÆTIDÆ, *Aloëtic* and *Assafætidæ Pills*. (*Aloës*, *assafætidæ*, *saponis*, sing. \mathfrak{J} ss; *aqvæ*, q. s. to form 180 pills.—Ph. U. S.) Purgative and stomachic. Dose, gr. x.

PILULÆ ALOES ET CAMBO'GIÆ, *P. de Aloë* et *Cambo'giâ* seu *Hydrago'gæ Bon'tii*, *Pill of Aloes* and *Cambo'ge*. (*Aloës*, *cambo'g.*, *gum. ammoniac.*, \mathfrak{a} p. æ. Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water-bath, to a pilular consistence.—Ph. P.) Purgative; used in dropsy. Dose, gr. xij to xxx.

Peter's Pills,—a nostrum—are formed of *aloës*, *jalap*, *scammony*, and *cambo'ge*, of each equal parts.

The basis of *Morrison's Pills*, often called *Hygienè Pills*, of *Brandreth's Pills*, and *Moffat's Pills*, is said to be *aloës*, with *cambo'ge*, *scammony*, &c.

Rush's Pills were formed of *calomel*, *aloës*, and *cambo'ge*, with oil of mint.

PILULÆ ALOES ET COLOCYNT'HRIDIS, *P. ex Colocynth'idæ* cum *aloë* seu *Aloës cum Colocynthidæ* seu *coë'cinæ* seu *coë'chiï* seu *colocyn'thidis compos'itæ* seu *coë'ciæ mino'ris*, *Pill of Aloës* and *Colocynth.*, (F.) *Pilules panchymagones* ou *universelles*, *Pilules cochées*. (*Pulp. coloc.* \mathfrak{J} ss; *aloës hepat.*, *scammon.* \mathfrak{a} \mathfrak{J} ; *sapon.* \mathfrak{J} ; *ol. caryoph.* \mathfrak{J} ; *syrrup.* q. s.—Ph. D.) Cathartic. Dose, gr. v to x or more.

Folk'ergill's Pills consist of *aloës*, *scammony*, *colocynth*, and *oxide of antimony*; and *Harvey's Antibilions Pills*, and *Rudius's Pills* do not differ much from them.

PILULÆ ALOES COMPOS'ITE, *P. ex Aloë*, *Compound Aloëtic Pills*. (*Aloës spic. extract.* cont. \mathfrak{J} ; *ext. gentianæ*, \mathfrak{J} ss; *olei carui*, gtt. xl; *syrr.* q. s.—Ph. L.) These are sometimes, also, called *Family pills*, *Antibilions pills*, &c.

PILULÆ ALOES ET FERRI, *Pills of aloës* and *Iron*. (*Ferri sulphat.* p. ij; *Aloës Barbād.* p. ij; *Pulv. arom.* p. vj; *Conserv. Rosæ*, p. viij.—Ph. Ed.) In atonic constipation. Dose, one to three pills.

PILULÆ DE ALOË ET Fœ'TIDIS, *P. Benedic'tæ*

Fulleri seu *Ecp'hrac'ticæ* seu *Aloës martia'les*, *Pills of aloës* and *fetid gums*, *Female pills*, (F.) *Pilules hénites* de *Fuller*. (*Aloës socotr.*, *seuæ*, *assafætidæ*, *galban.* \mathfrak{a} \mathfrak{J} ; *myrrh.* \mathfrak{J} iv; *croci*, *macis*, \mathfrak{a} \mathfrak{J} ; *ferri sulphat.* \mathfrak{J} ss. Reduce to powder separately, and add *ol. succin.* gtt. viij; *syrr. artemisiæ*, q. s.—Ph. P.) Purgative, and given in hysteria. Dose, gr. xv to xx.

Whytt's Pills, given in similar cases, consisted of *chloride of iron*, *aloës*, *extract of horehound*, and *assafætidæ*.

Stahl's Pills, much used as a tonic aperient in Germany, are made as follows:—*Ferri pulv.*, \mathfrak{J} ss; *Aloës pulv.*, \mathfrak{J} ij; *Ext. colocynth.*, \mathfrak{J} ; *mucilag. acaciæ* q. s. ut fiant pil xl.

PILULÆ ALOES ET JALAP'Æ, commonly called *Anderson's pills*, *Anderson's Scots' pills*, *Scotch pills*. (*Aloës Barbād.* \mathfrak{b} ij; *rad. helleb. nigr.*, *rad. jalapæ*, *potassæ subcarb.* \mathfrak{a} \mathfrak{J} ; *ol. anisi*, \mathfrak{J} iv; *syrrup. simpl.* q. s.—Gray.) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloës Barbādens.* \mathfrak{J} xxiv; *saponis.* \mathfrak{J} iv; *colocynthid.* \mathfrak{J} ij; *cambo'giæ*, \mathfrak{J} ij; *ol. anis.* f \mathfrak{J} ss.

PILULÆ ALOES ET KINÆ KINÆ, *P. stomachicæ* seu *ante cibum*, *Pill of aloës* and *cinchona*, (F.) *Pilules gourmandes*. (*Aloës socotr.* \mathfrak{J} vj; *ext. cinchon.* \mathfrak{J} ij; *cinnam.* \mathfrak{J} ij; *syrrup. absinth.* q. s.—Ph. P.) Stomachic and laxative. Dose, gr. x. to xx.

Lady Crespigny's pills, *Lady Webster's pills*, *Lady Hesketh's pills*; the *Pilules de Duchesne*, (*Quercetanus*), the *Grains de Vie* ou *Pilules de Clérampourg*; the *Pilules Indiennes stomachiques de De la Croix*, the *Pilules de Barbier*, and the *Pilulæ stomachicæ Mesuës* (Ph. L. 1635), resemble these.

Frank's pills, much employed, also, as 'dinner pills,' or,—to use the language of the eccentric Kitchener—as 'peptic persuaders,' are said to be much used, under the name *Graines de santé*, in various parts of Europe. They consist of *aloës*, *jalap*, and *rhubarb*, with *syrrup of wormwood* as an excipient.

PILULÆ ALOES MARTIALES, *P. de aloë* et *foetidis*.

PILULÆ ALOES ET MYRRHÆ, *P. aloës cum myrrhâ* seu *de aloë* et *myrrhâ*, *P. Rufi* seu *Ruffi* seu *commun'es*, *Rufus's* or *Ruffus's pills*, *Common pills*, *Pills of Aloës* and *myrrh.* (*Aloës*, \mathfrak{J} ij; *croci*, in *pulv.* \mathfrak{J} ss; *myrrh.* \mathfrak{J} ij; *syrr.* q. s. to form 480 pills.—Ph. U. S.) Cathartic and emmenagogue. Dose, gr. x to xx.

Hooper's pills—possessed of similar properties—according to one of Gray's formulæ are made as follows: *Ferri sulph.*, *aqvæ*, \mathfrak{a} \mathfrak{J} vij. Dissolve. Add *aloës Barbād.* \mathfrak{b} ij and \mathfrak{J} vij; *cancelle albæ*, \mathfrak{J} vj; *gum. myrrh.* \mathfrak{J} ij; *opoponacis*, \mathfrak{J} iv. The committee of the Philadelphia College of Pharmacy recommend the following form: *Aloës Barbādensis*, \mathfrak{J} vij; *ferri sulphatæ exsicc.* \mathfrak{J} ij, and \mathfrak{J} ss, vel *ferri sulph. crystall.* \mathfrak{J} iv; *ext. helleb. nigr.* \mathfrak{J} ij; *myrrh.* \mathfrak{J} ij; *saponis*, \mathfrak{J} ij; *canellæ*, in *pulv. tritæ*, \mathfrak{J} ; *zingib.* in *pulv. trit.* \mathfrak{J} ij.

Speediman's pills consist of *aloës*, *myrrh.*, *rhubarb.*, *extract of chamomile*, and *essential oil of chamomile*; and the *Pills of Barthez.* of *aloës*, *myrrh.*, *musk*, *camphor*, and *balsam of Pern.*

PILULÆ DE ALOE ET SAPONÆ, *P. aloëticæ*.

PILULÆ ALOES CUM ZINGIB'ERÆ, *Pills of aloës* and *ginger*. (*Aloës hepat.* \mathfrak{J} ij; *rad. zingib.* in *pulv.* \mathfrak{J} ij; *sapon.* *Hispan.* \mathfrak{J} ss; *ol. ess. menthæ pip.* \mathfrak{J} ss.—Ph. D.) In habitual costiveness. Dose, gr. x to xx.

PILULÆ AMMONIURE'TI CUPRI, *P. Cupri*, *Pills of Ammo'niuret of copper*, (F.) *Pilules d'ammo'niure de cuivre*. (*Ammoniu'r. cupri*, in *pulv. ten.* trit., gr. xvj; *micæ panis*, \mathfrak{J} iv; *aqvæ carbonatæ*

ammonia, q. s. Beat into a mass, and divide into xxxij pills.—Ph. E.) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

PILULÆ ANTE CIBUM, P. aloes et kinæ kinæ.

PILULÆ ANTIBILIO'SÆ, *Barclay's Antibilious pills.* (Extract of colocynth, ℥ij; resin of julap. ℥j; almond soap, ℥iiss; gnaia, ℥ij; emetic tart. gr. viij; oils of juniper, caraway, and rosemary. āā iv drops; syrup of buckthorn, q. s. to form 64 pills.) Dose, two or three.

Dixon's Antibilious pills are formed of aloes, scammony, rhubarb, and tartarized antimony.

PILULÆ ANTIHERPETICÆ, Pilulæ hydrargyri submuriatis comp.—P. Antihysterica, P. galbani compositæ.

PILULÆ ANTISCYPHULO'SÆ, *P. ex o.c. ido stib'ii et hydrargyri sulphure'lo nigro compositæ.* (P. scammony, hydrarg. sulphur. nigr. āā ℥ij; antimoniæ oxidæ albi, milleped., sapon. amygdalin. āā ℥ij; extract. glycyrrh. ℥v. Make into a mass.—Ph. P.) Dose, gr. iv to xx.

PILULÆ ANTISPASTICÆ, P. galbani compositæ — P. Assafœtidæ compositæ, P. galbani compositæ.

PILULÆ ASIAT'ICÆ, *Asiat'ic or Tanjore pills.* (Acid. arsenios. gr. lv; piper. nigr. pulv., ℥ix; acaia, q. s. ut fiat pil. 800. Each pill contains about one-fiftenth of a grain of arsenious acid. These pills are employed in India for the cure of syphilis and elephantiasis.

PILULÆ ASSAFŒTIDÆ, *Assafœtida pills.* (Assafœtid. ℥iiss; saponis, ℥ss. Beat with water so as to form a mass to be divided into 240 pills.—Ph. U. S.)

PILULÆ BALSAM'ICÆ, *P. Doct'ris Morton.* (Milleped. pulverisat. ℥xviiij; gum ammon. ℥xj; acid. benzoicæ, ℥vj; croci, balsami Perur. āā ℥j; balsam. sulph. anisat. ℥vj. Mix.—Ph. P.) Tonic, expectorant, and balsamic.

PILULÆ BENEDICTÆ FULLERI, P. de aloes et fœtidis.

PILULÆ CALOMELANOS COMPOSITÆ, P. Hydrargyri submuriatis compositæ.

PILULÆ CALOMEL'ANOS ET OPII, *P. Hydrargyri chlorid' et o'pii, Pills of Calomel and Opium.* (Hydrarg. chlorid. mit. p. iij; Opii p. j; Confect. Ros. q. s. To be divided into pills each containing two grains of calomel.—Ph. Ed.)

PILULÆ CAMBOGIE COMPOSITÆ, *P. de guttâ gaman'drâ seu hydrag'gæ seu gummi guttæ aloet'icæ, Gomboge pills, Compound gomboge pills, (F.) Pilules de gomme gutte composées. (Cambogia contrita, aloes spicat. extract. contriti., pulv. cinnam. comp. sing. ℥j; saponis, ℥ij.—Ph. L.) Cathartic.* Dose, gr. x to xx.

Morrison's Pills are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of cream of tartar.

PILULÆ CATHAR'TICÆ COMPOSITÆ, *Compound cathartic pills.* (Ext. colocynth. comp. in pulv. ℥ss; ext. julapæ in pulv. hydrarg. chlorid. mit. āā ℥ij; gambog. in pulv. ℥ij. M. Form into a mass with water, and make into 180 pills.—Ph. U. S.) Three for a dose.

PILULÆ COCCII, P. aloes et colocynthidis—p. Coccinæ minores, P. aloes et colocynthidis—p. Coccinæ, P. aloes et colocynthidis—p. Colebici et digitalis, P. Lartigue's—p. Colocynthidis compositæ, P. aloes et colocynthidis—p. ex Colocynthide cum aloes, P. aloes et colocynthidis.

PILULÆ COLOCYNT'IDIS ET HYOSCY'AMI, *Pills of Colocynth and Henbane.* (Pil. Colocynth. comp. p. ij; Ext. Hyoscyam. p. i.—Ph. E.) Dose, gr. v to gr. xx.

PILULÆ COMMUNES, P. aloes et myrrhæ.

PILULÆ CONI COMPOSITÆ, *Compound Pill of Henlock.* (Ext. Conii ℥v; Ipecac. pulv. ℥j; Theriac. q. s.—Ph. L.) Dose, gr. v three times a day.

PILULÆ CUPRI, P. ammoniuret' cupri.

PILULÆ COPA'IBÆ, *Pills of Copaiba.* (Copaib. ℥ij; magnesiæ, recentè præpar. ℥j. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills.—Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

PILULÆ CUPRI AMMONIA'TI, *Pills of ammoniated Copper.* (Cupri ammon. in pulv. p. j; micæ panis, p. vj; Liq. ammon. carbonat. q. s.—Ph. E.) Dose, one to six pills.

PILULÆ DE CYNOSLOS'SO, *P. de extracto o'pii.* (Pulv. rad. cynoglossæ., semin. hyoscyam. alb. extract. opii vinos. āā ℥iv; pulv. myrrh. ℥vj; oliban. ℥v; croci, castor., āā ℥iiss; syrup opii, q. s.—Ph. P.) Anodyne. In cough, &c. Dose, gr. iv to gr. viij.

PILULÆ DEPURANTES, P. hydrargyri submuriatis compos.

PILULÆ DIGITA'LIS ET SCILLA, *Pills of Digitalis and Squill.* (Digital., Scilla, āā p. j; Elect. aromat. p. ij.—Ph. E.) One or two pills for a dose.

PILULÆ ECPHRACTICÆ, P. de aloes et fœtidis.

PILULÆ FERRI CARBONAT'IS, *Pills of carbonate of iron, Vattel's pills, Vattel's ferruginous pills.* (Ferri sulph. ℥viiij; sodæ carbonat. ℥x; Mel. desumat. ℥iij; sacchar. ℥ij; aquæ bullientis, Oij; syrup. q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of f℥j of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey and sugar. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence.—Ph. U. S.)

PILULÆ FERRI COMPOSITÆ, *P. ferri cum myrrhâ, Compound pills of iron, Griffith's Pills, (F.) Pilules de fer composées. (Myrrh. in pulv. ℥ij; sodæ subcarb., ferri sulph. āā ℥j; syrup, q. s. Mix, to form 80 pills.—Ph. U. S.) Tonic. Dose, gr. x to xx.*

PILULÆ FERRI IOD'IDI, *Pills of Iodide of iron.* (Ferri sulphat. ℥j; Potass. ioidid. ℥iv; tragacanth. pulv. gr. x; sacchar. pulv. ℥ss. Beat with syrup into a mass, to form 40 pills.—Ph. U. S.) Dose, one to three where a tonic and eutrophic is indicated.

PILULÆ FERRI CUM MYRRHÂ, P. Ferri compositæ.

PILULÆ FERRI SULPHAT'IS, *Pills of Sulphate of Iron.* (Ferri sulph. exsicc. p. ij; Ext. Taraxac. p. v; Conserv. Rosæ p. ij; Glycyrrhiz. pulv. p. ij.—Ph. E.) Dose, gr. v to gr. xx.

PILULÆ FŒTIDÆ, P. galbani compositæ.

PILULÆ GAL'BANI COMPOSITÆ, *P. assafœtidæ compositæ seu fœtidæ seu gummosæ seu e gummi seu antispas'ticæ seu antihystericæ seu myrrhæ compositæ, Compound gal'banum pill, Gum pill.* (Galban., myrrhæ, āā ℥vj; assafœtidæ, ℥ij; syrup. q. s. to form 240 pills.—Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

PILULÆ GUMMI, P. galbani compositæ—p. Gummi guttæ aloet'icæ, P. camboginæ compositæ—p. Gummosæ, P. galbani compositæ—p. de Guttâ gamandrâ, P. camboginæ compositæ.

PILULÆ EX HELLEB'ORO ET MYRRHÂ, *P. ton'icæ, Bacher's pills, Tonic pills of Bacher, Pills of hellebore and myrrh.* (Ext. helleb. nig., myrrh. āā ℥j; fol. cardui benedict. in pulv. ℥ij. M.—Ph. P.) Tonic and emmenagogue.

In dropsical, cutaneous, and verminous affections. Dose, gr. iv to gr. viij.

Matthews's pills, — *Starkey's pills*, are formed of *rad. helleb. nigr.*, *rad. glycyrrh.*, *sapon. Castell.*, *rad. curenmæ*, *opii purif.*, *synrp. croci*, ãã ʒij ; *ol. tereb. q. s.* ut fiat massa. — Gray.

PILULÆ HYDRAGOGÆ, P. cambogiæ et cambogiæ — p. Hydragogæ Bontii, Pilulæ aloes et cambogiæ.

PILULÆ HYDRARGYRI, P. mercuriales, *Mercurial* or *Blue pill*, (F.) *Pilules de Mercure*. (*Hydrag. purif.* ʒj ; *conf. rosæ*, ʒjss ; *glycyrrh. pulv.* ʒss . Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills. — Ph. U. S.) Antisyphilitic; mercurial; — in large doses, purgative.

A purgative pill, much prescribed by Mr. Abernethy, and called *Abernethy's pill*, consisted of *pil. hydrarg. gr. x*; *jalap. pulv. gr. xx*; *symp. rhamnii, q. s.* ut fiat pil. vj. Two were given at night, and the next morning a wineglassful of *infusum sennæ*.

PILULÆ HYDRARGYRI CHLORIDI ET OPII, P. Calomelanos et Opii.

PILULÆ HYDRARGYRI CHLORIDI MITIS, *Pills of mild chloride of mercury, Calomel pills*. (*Hydrag. chlorid. mit.* ʒss ; *acaciæ*, in pulv. ʒj ; *symp. q. s.* ut fiat pil. 240. — Ph. U. S.) Each pill contains one grain.

PILULÆ DE HYDRARGYRO, SCAMMO'NIO ET ALOE, vulgo MERCURIALES, (F.) *Pilules Mercurielles ou de Mercure, Scammonée et Aloes*. (*Hydrag. purif.* ʒj ; *mellis*, ʒxj . Rub until the globules disappear; then add *aloes Socot.*, *scammon. ãã* ʒij ; *mæcis*, *cinuam. ãã* ʒij . Make into a mass. — Ph. P.) Uses, same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot*.

PILULÆ EX HYDRARGYRO MURIATICO MITI CUM SULPHURE STIBIATO AURANTIACO, Pilulæ hydrargyri submuriatis compositæ.

PILULÆ HYDRARGYRI SUBMURIATIS COMPOSITÆ, P. ex stib'io et hydrarg'gyro seu antihæpet'icæ seu ex hydrargyro muriat'ico miti cum sulphure stibiat'io aurantiaco seu resolut'es cum mercurio seu depurantes seu hydrargyri submuriatis, *Pilulæ Hydrargyri chlor'idi compos'itæ*, *Pilulæ calomel'anos compos'itæ*, *Compound Calomel pill*, *Compound pills of submuriate of mercury, Calomel pills, Plummer's pills, Red pill*. (*Hydrag. submur.*, *antimon. sulphur. precipitat.* sing. ʒij ; *guaiac. gum resin. contrit.* ʒiv ; *spirit rect.* ʒss . Beat together. — Ph. L.) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

Leake's pilula salutar'ia resembles these. It is used in syphilis.

PILULÆ HYDRARGYRI SUBMURIATIS ET OPII, P. Calomelanos et Opii.

PILULÆ IPECACUAN'HÆ ET OPII, *Pills of Ipecacuanha and Opium*. (*Pulv. Ipecac. et Opii*, p. iij; *Conserv. Rosæ*, p. j. — Ph. E.) One grain of opium in about thirteen grains.

PILULÆ IPECACUAN'HÆ CUM SCILLÂ, *Pills of Ipecacuanha with Squill*. (*Pulv. Ipecac. comp.* ʒij ; *Scillæ pulv.*, *Ammoniac.* in pulv. ãã ʒj ; *Theriac. q. s.* — Ph. L.) Dose, gr. v to x.

PILULÆ MERCURIALES, P. hydrargyri. P. de hydrargyro, scammonio et aloë — p. Doctoris Morton, P. balsamicæ — p. Myrrhæ compositæ, P. Galbani compositæ.

PILULÆ OPIA'TÆ, *Pilulæ Opii* (Ph. U. S.), P. *Thebaicæ*, *Opiate pills*, *Common night pills*, *Anodyne pills*, (Prov.) *Squatting pills*, *Nepenthes opiatum*, (F.) *Pilules opiacées*. (*Opii pnv.* ʒj ; *sapon.* gr. xij; to be made into 60 pills. — Ph. U. S.) Each pill contains a grain of opium.

PILULÆ DE EXTRACTO OPII, P. de cynoglossio

— p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, *Pilulæ antiscrophulosæ*.

PILULÆ PLUMBI OPIA'TÆ, *Opiate Pills of Lead*. (*Plumb. acetat.*, p. vj; *Opii*, p. j; *Conserv. Rosæ*, p. j. To be made into four grain pills. — Ph. E.) Each pill contains three grains of acetate of lead.

PILULÆ RESOLVENTES CUM MERCURIO, P. hydrargyri submuriatis compos. — p. de Rhabarbaro, *Pilulæ rhei compos'itæ*.

The stomachic nostrum, sold under the name of *Moseley's pills*, consists merely of *rhubarb* and *ginger*.

PILULÆ QUIN'Æ SULPHA'TIS, *Pills of sulphate of quinia*. (*Quin. sulph.* ʒj ; *acaciæ*, in pulv. ʒij ; *mel. q. s.* ut fiat pilulæ 480. — Ph. U. S.) Each pill contains a grain of the sulphate of quinia.

PILULÆ RHEJ, *Pills of Rhubarb*. (*Rhej pulv.* ʒvj ; *saponis*, ʒij . M. et fiat pil. 120. — Ph. U. S.) Each pill contains three grains of rhubarb.

A good dinner or stomachic pill is made of *Rhej pulv.* ʒij ; *Capsic. pulv.* ʒj ; make into a mass with molasses, and divide into 60 pills. Dose, two or three before dinner.

PILULÆ RHEI COMPOS'ITÆ, P. de Rhabar'baro, *Compound rhubarb pills*. (*Rhei, pulv.* ʒj ; *aloes, pulv.* ʒvj ; *myrrh. pulv.* ʒiv ; *ol. menthæ pip.* ʒss . Beat into a mass. with *symp. of orange-peel*, to form 240 pills. — Ph. U. S.) Laxative and stomachic. Dose, gr. x to xx.

PILULÆ RHEJ ET FERRI, *Pills of Rhubarb and Iron*. (*Ferri sulph. exsiccet. p. iv*; *Ext. Rhej, p. x*; *Conserv. Rosæ*, p. v. Make into five grain pills.) Dose, as a tonic and laxative, two or three pills.

Griffitt's pills, so called after Dr. S. P. Griffitts, of Philadelphia, who prescribed them as a tonic aperient, were formed as follows: — *Rhej*, *pulv.* ʒiss ; *ferri sulph.* ʒss ; *saponis*, ʒij ; *aqnæ, q. s.* ut fiat massa in pil. xl dividenda. Dose, three or four at bedtime.

PILULÆ RUFÆ, P. aloes et myrrhæ — p. Salaria, *Leake's*, see *Pilulæ hydrargyri submuriatis compositæ* — p. Saponacæ, P. saponis cum opio — p. Saponis compositæ, P. saponis cum opio.

PILULÆ SAPONIS COMPOS'ITÆ, P. *Saponacæ* seu *saponis compos'itæ*, *Pills of soap and opium*, (F.) *Pilules de savon et d'opium*. (*Opii*, ʒss ; *sapon.* ʒij . M. — Ph. U. S.) Five grains contain one of opium.

The Pharmacopœia of the United States has a form for the *Pilulæ opii*, *Opium pills*, as well as for the *Pilulæ saponis compositæ*; the only difference between them being in the proportion of the ingredients. See *Pilulæ opiatæ*.

PILULÆ E SCILLÂ, P. scillæ compositæ.

PILULÆ SCILLÆ COMPOS'ITÆ, P. *scillit'icæ* seu *scillæ cum zingib'ere* seu *e scillâ*, *Compound squill pill*. (*Scillæ, pulv.* ʒj ; *zingib. pulv.*, *ammoniac. pulv.* ãã ʒij ; *saponis*, ʒij ; *symp. q. s.* ut fiat pil. 120. — Ph. U. S.) Dose, two pills. Expecto- rant and diuretic. Dose, gr. x to xx.

PILULÆ SCILLÆ CUM ZINGIBERE, P. scillæ compositæ — p. Scilliticæ, P. scillæ compositæ — p. ex Stibio et hydrargyro, P. hydrargyri submur. compos. — p. Stomachicæ, P. aloes et kinæ kinæ.

PILULÆ STRYCH'NÆ, *Pills of Strychnia*. (Very pure *strychnine*, 2 gr.; *conserv. of roses*, ʒss . Make into 24 pills.) One or two for a dose.

PILULÆ STY'RACIS, P. S. *Compos'itæ*, *Storax Pills*. (*Styracis pur.* ʒvi ; *opii, croci*, sing. ʒij . — Ph. E.) Five grains contain one of opium.

PILULÆ SUBLINGUALES, Hypoglotides.

PILULÆ DE TEREBIN'THINÂ, *Turpentine Pills*. Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

PILULE THEBAICÆ. P. opiata — p. Toxicæ, P. ex Helleboro et myrrha.

PILULAR, *Pilularis*, (F.) *Pilulaire*, from *pilula*, 'a pill.' Relating to pills,—as 'a *pilular mass*,' 'a *pilular form*,' &c.

PILULES, *Pilulæ*—p. *Agrégatives*, see Aggregate—p. *d'Aloes* ou *alotiques*, *Pilulæ aloeticæ*—p. *d'Ammoniac* de cuire, *Pilulæ ammoniaci cupri*—p. *de Barbier*, see *Pilulæ Aloës* et *kinæ kinæ*—p. *Bénites* de Fuller, *Pilulæ de aloë* et *fetidis*—p. *Cochlées*, *Pilulæ aloës* et *colocythidis*—p. *de Duchesne*, see *Pilulæ Aloës* et *kinæ kinæ*—p. *de Fer composées*, *Pilulæ ferri composites*—p. *Ferrugineuses* de Vallet, see *Ferri protocarbomas*—p. *Gourmaudes*, *Pilulæ aloës* et *kinæ kinæ*—p. *Indiennes stomachiques* de Delacroix, see *Pilulæ aloës* et *kinæ kinæ*—p. *de Lartigue*, *Pill*, *Lartigue's*—p. *de Mercure*, *Pilulæ hydrargyri*—p. *de Mercure*, &c., *Pilulæ de hydrargyro*, et *scammonio* et *aloe*—p. *Mercurielles*, *Pilulæ de hydrargyro*, *scammonio* et *aloe*—p. *Opiacées*, *Pilulæ opiata*—p. *Panchymagogues*, *Pilulæ aloës* et *colocythidis*—p. *de Savon* et *d'Opium*, *Pilulæ saponis cum opio*—p. *Universelles*, *Pilulæ aloës* et *colocythidis*.

PILULLIER (F.), *Pill Machine*. An instrument for rolling and dividing pills. Also the earthen pot in which pills are preserved.

PILUM, *Pistillus*, *Pistillum*, *Hyp'eros*, *Cer'cis*, (F.) *Pilon*. A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

A *spring pestle* is one attached above to a spring, so as to take off the weight, and thus lessen the labour of pounding.

PILUS, *Capillus*, *Caul*, *Hair*.

PIMELE, *Fat*.

PIMELECCHYSIS, *Pinelorrhœa*.

PIMELICUS, *Fatty*.

PIMELITIS, from *πιμελή*, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

PIMELODES, *Fatty*.

PIMELO'MA, from *πιμελή*, 'fat.' A fatty swelling.

PIMELORRHŒA, *Pimelec'chysis*, from *πιμελή*, 'fat,' and *ρρω*, 'I flow.' A morbid discharge or disappearance of fat.

PIMELORTHOPNŒA, *Piorthopnœa*; from *πιμελή*, 'fat,' *ορθός*, 'upright,' and *πνεύω*, 'to breathe.' *Dyspnœa*, practicable only in the erect attitude, owing to fat.

PIMELO'SIS, *Obes'itas nim'ia*, from *πιμελή*, 'fat.' Conversion into, or formation of, fat,—as *Pimelô'sis hepatic'a*, 'fatty degeneration of the liver.'

PIMELOSIS HEPATICA, *Adiposis hepatica*—p. *Nimia*, see *Polysarcia*.

PIMENT, *Capasicum annuum*—p. *d'Ean*, *Polygonum hydropiper*—p. *Royal*, *Myrica gale*.

PIMENTA, see *Myrtus pimenta*.

PIMENTÆ BACCÆ, see *Myrtus pimenta*.

PIMENTO, see *Myrtus pimenta*.

PIMPERNEL, BLUE, *Scutellaria lateriflora*—p. *Red*, *Anagallis*—p. *Scarlet*, *Anagallis arvensis*—p. *Water*, *Veronica beccabunga*.

PIMPILIM, *Piper longum*.

PIMPINEL, (*bipinnella* or *bipennata*, from the double pennate order of its leaves,) see *Pimpinella*.

PIMPINEL ITALIAN, *Sanguisorba officinalis*.

PIMPINELLA ALBA, P. saxifraga—p. *Angelicæfolia*, *Ligusticum podagraria*.

PIMPINELLA ANISUM, *Anise plant*, *Anisum* (Ph. U. S.). *A. officina'le seu vulgari'è Sison anisum*, *A'pium anisum*, *Sola' meu intestina'rum*, *An'isum*, (F.) *Anis*, *Boucage anis*. *Ord.* Umbelliferae. *Ser. Syst.* Pentandria Digynia. A native of Egypt. The seeds, *Anisum*, (Ph. U. S.) *Sem'ina*

An'isi, *An'iseed*, (Old Eng.) *Aneys*, have an aromatic odour; and a sweetish, warm, grateful taste. They are carminative, and used in dyspepsia and in tormina of infants. Dose, gr. xv to ʒj, bruised. The oil.—OLEUM ANISI, (F.) *Hui'e d'auis*—is official. Dose, gtt. v to xv. Most of the oil used in this country under the name of *Oil of Anise* is said to be obtained from *Illicium Anisatum*.

Aqua an'isi, *Anise water*, (Ph. D.) is made by mixing a fluidounce of *essence of anise*, with half a gallon (Imp. meas.) of *distilled water*, and filtering through paper.

PIMPINELLA, GREATER, P. magna—p. *Hircina*, P. Saxifraga—p. *Laterifolia*, *Sion anni*.

PIMPINELLA MAGNA seu *nigra* seu *major* seu *rubra*; *Greater Pimpinella*; *Tragoselinum magnum* seu *majus*, *Daucus*, *Cyan'opus*, (F.) *Boucage majeur*. The root has been extolled as diuretic and resolvent, as well as in erysipelatous ulcerations, tinea capitis, rheumatism, &c.

PIMPINELLA MAJOR, P. magna—p. *Nigra*, P. magna—p. *Nostras*, P. saxifraga—p. *Officinalis*, *Sanguisorba officinalis*—p. *Rubra*, P. magna.

PIMPINELLA SAXIFRAGA, *Sax'ifrage*, *Burnet sax'ifrage*, *Poterium sanguisor'ba*, *Sorbastrel'la*, *Tragoselinum*, *T. saxif'raga*, *Pimpinella hirci'na* seu *umbellif'era* seu *alba* seu *nostras*, (F.) *Boucage mineur*, *Petit B.*, *Pimprenelle*, *Romp't-pierre*. The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, P. saxifraga.

PIMPLE, *Papula*.

PIMPLED, *Papulose*.

PIMPRENELLE, *Pimpinella saxifraga*—p. *Noire*, *Sanguisorba officinalis*.

PIN. Perhaps from *pennum*, low Latin; or from *spina* [?], *Spina fer'rea*, *Spi'nula*, *Acus capita'ta*, (F.) *E'pingle*. An iron or brass instrument, generally of a small size, pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and occasionally in sutures.

PIN AND WEB, *Caligo*.

PIN À PIGNON, see *Pinus picea*.

PINASTELLUM, *Pucedanum*.

PINASTER, *Pinus sylvestris*.

PINBONE, *Ischion*.

PINCE, Forceps—p. *à Anneaux*, see *Forceps*—p. *à Dissection*, see *Forceps*—p. *à Ligature*, see *Forceps*—p. *Lithodrasique*, see *Lithodrasic*—p. *Pansemment*, see *Forceps*.

PINCÉ, *Pinched*.

PINCÉE, *Pugillus*.

PINCERS, *Forceps*.

PINCETTE, *Forceps*.

PINCHED, *Contractus*, *Retractus*, (F.) *Pinch*, *Grippé*. An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections or during intense pain.

PINCKNEY'S PUBENS, P. *Pubes'cens*, *Georgia Bark*, *Bitter Bark*, *Florida Bark*, *Fever tree*. This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder, ʒj.

PINDARS, *Arachis Hypogea*.

PINE APPLE, *Bromelia ananas*—p. *Aphernousli*, *Pinus cembra*—p. *Ground*, *Lycopodium complanatum*—p. *Ground*, stinking, *Camphorosma Monspeliaca*—p. *Loblolly*, *Pinus taeda*—p. *Mountain*, see *Pinus mughos*—p. *Mughlo*, see *Pinus mughos*—p. *Prince's*, *Pyrola umbellata*—p. *Sap*, *American*, *Hypopitys lanuginosa*—p. *Stone*, *Pinus pinea*—p. *Sugar*, see *Arrow Root*—p. *Yellow*, *Pinus palustris*.

PINEA, *Pinus pinca*.

PINE'AL, *Pineal'is*, from *pinus*, 'a pine.' That which resembles a pine-apple.

PINEAL GLAND, *Glandula pineal'is*, *Cerebral epiph'ysis*, *Cona'rrium*, *Cono'ides corpus*, *Corpus turbina'tum*, *Penis seu Virga seu Turbo cer'ebri*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sabulum cona'rrii*, *Brain Sand*, *Pine'al Sand*. When these are grouped together over the base of the gland, they form the *Acer'vulus Cer'ebr'i* of Sömmerring, *Acer'vuli seu Lapi'li glandulæ pineal'is*. From its anterior parts arise two medullary striæ, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix,—the *Habe'næ*, *Haben'ulæ* or reins of the pineal gland—*Peduncul'i cona'rrii*, see Peduncles of the Pineal Gland.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEAL SAND, see Pineal gland.

PINEL, see *Pinus pinea*.

PINEOLI, see *Pinus pinea*.

PINEUS PURGANS, *Jatropha curcas*.

PINEWEED, *Hypericum sathra*.

PINGUEC'ULA, *Pterygium pingue* seu *lar'dæum*, from *pinguis*, 'fat,' 'fatty.' A small, whitish-yellow tumour in the sclerotic conjunctiva and subjacent areolar tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

PINGUEDO, Fat—p. *Renalis*, *Nephridion*.

PINGUIC'ULA VULGAR'IS, (*pinguis*, 'fat,') *P. alpi'na*, *Sanic'ula mont'a'na* seu *Eboracens'is*, *Vi'ola palus'tris*, *Dodeath'eou Plin'ii*, *Butterwort*, *Yorkshire San'icle*. Ord. *Lentibulaceæ*. *Sex. Syst.* *Diandria Monogynia*. The unctosity of this plant has caused it to be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUID, Fatty.

PINGUIDINOÛS, Fatty.

PINGUIN, *Bromelia pinguin*.

PINGUITUDO, *Polysarcia adiposa*.

PINHOLE PUPIL, see *Pupil*, *pinhole*.

PINHONES INDICI, *Jatropha curcas*.

PINK, *CAROLINA*, *Spigelia Marilandica*.

PINK DYE. *Stripped safflower*, ʒj, *subcarb. of potass.* gr. xvij, *spirit of wine*, ʒvij; digest for two hours; add *distilled water*, ʒij; digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

PINK, *GROUND*, *Silene Virginica*—p. *Indian*, *Spigelia Marilandica*—p. *Wild*, *Silene Virginica*.

PINKROOT, *Spigelia marilandica*—p. *Demerara*, *Spigelia anthelmia*.

PINNA, *Ala*, *Pavilion of the ear*—p. *Marina*, see *Bissus*.

PINNACULUM FORNICIS GUTTURALIS, *Uvula*.

PINNÆ HEPATIS, *Lobes of the liver*—p. *Naris*. see *Nasus*.

PINNULA, *Aileron*.

PINNULÆ HEPATIS, *Lobes of the liver*.

PINO'LI (S.). A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the *cold flour* of the Indians, and early Western pioneers.

PINONCILLO TREE, *Castiognia lobata*.

PINSWEAL, *Furunculus*.

PINT, *Octarius*.

PINTA, from (S.) *pinta*, 'to paint.' *Blue stain*: a disease, which is said to prevail in Mexico, and to be a variety of *Pityriasis versicolor*.

PINUS A'BIES. *P. excel'sa* seu *pic'e'a*, *A'bies*, *A. n'bra* seu *excel'sa* seu *pic'ea*, *Ell'at' theli'a*, *Pic'e'a*, *Norway Spruce Fir*, *Yew-leaved Fir*. *Nat. Ord.* *Coniferæ*. *Sex. Syst.* *Monœcia Monadelphica*. The tops are used in making *Spruce Beer*.

Essence of Spruce, *Essen'tia Abie'tis*, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer*.

This fir affords the Burgundy pitch and common frankincense. 1. *Bur'gundy* or *White pitch*, *Pix Burgun'dica* seu *alba* seu *ar'ida* seu *abiet'i'na* seu *abie'tis* (Ph. U. S.), *Resi'na abie'tis h'umida*, *R. alba humida*, *Pini abie'tis resina spontē concre'ta*, (F.) *Poix blanche* ou *grasse* ou *jaune* ou *de Bourgogne*. This prepared concrete juice is of a close consistence, rather soft, of a reddish-brown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time;—as in cases of affections of the chest. 2. *Abie'tis Resi'na* (Ph. L. since 1809), *Common Frankincense*, *Perrosin*, *Thus*, *Th. scæmini'um* seu *vulgar'è*, *Olib'anum vulgar'è* seu *sylves'trè*, *Resina abietis sica*, *Resin of the Spruce Fir*. It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

PINUS ABIES, see *P. picea*—p. *Alba*, *P. picea*.

PINUS BALSAME'A, *A'bies balsame'a* seu *balsamif'era*, *Peu'cea balsame'a*, *Balsam fir*. The tree which affords the *Canada Balsam*, *Balsamum Canaden'sè* seu *de Can'ada*, *Resina strobil'i'na*, *Terebinth'ina Canaden'sis* seu *Pini balsame'æ*, *Canada Turpentine* or *Balsam*, *Balsam of Fir*, (F.) *Baume de Canada*, is one of the purest turpentine. It has the common properties of those substances.

PINUS CANADEN'SIS, *Abies Canaden'sis*, *Hemlock*, *Hemlock Spruce*. A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch—*Pix Canaden'sis*, *Canada Pitch*, *Hemlock Pitch*—obtained from it is commonly known under the name *Hemlock Gum*.

PINUS CANDICANS, *P. Picea*.

PINUS CEMBRA, *P. Mont'a'na*, *Aphernous'li Pine*. It yields an agreeably scented turpentine;—the *Corpa'thian Balsam*, *Bal'samum Carpath'icum* seu *Lib'ani*, *Carpath'icum*, *Brancon Turpentine*. The nuts, *Cembro nuts*, *Nu'clei Cembra*, have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS DAMAR'RA, *Ag'athis Dumarra*, grows in the East India Islands. The juice speedily concretes into a very hard resin,—the *Dumarra turpentine*.

PINUS EXCELSA, *P. abies*—p. *Gallia*, *P. picea*.

PINUS LARIX, *A'bies larix*, *Larix*, *L. communis* seu *decid'na* seu *Europ'æa* seu *pyramida'lis*. The *Larch*, (F.) *Mélèze*. From this tree exudes *Or'emberg gum*, *Bri'ançon manna*, *Gummi lar'icis* seu *Oremburgen'sè* seu *Uralen'sè*, *Manna Brigant'i'na* seu *larice'a*. It also yields, by boring, *Common Venice Turpentine*, *Resina Lar'icis*, *Terebinth'ina Ven'eta* seu *larici'na*, *Pini Lar'icis resi'na liq'uida*, (F.) *Térbenthine de Vénise* ou *de Mélèze*. It is usually thinner than the other sorts of turpentine.

PINUS MUGHOS. The *Mountain* or *Mugho Pine*, *Pinus Pumi'io*. From the extremities of the branches exudes the *Resi'na Strobil'i'na*, of the Germans, or *Hungarian Balsam*. It is also obtained, by expression, from the cones. By dis-

tillation, the Hungarian balsam affords the *Krumholz oil*, *Oleum Templinum*.

PINUS PALUSTRIS, see *Pinus sylvestris*.

PINUS PICEA, *P. Abies*, *A'bies*, *A. picea* seu *pectinata* seu *Gol'lica* seu *alba* seu *can'dicans* seu *vulgaris* seu *taxifolia*, *European Silver Fir Tree*, *El'atē*, (F.) *Sapin commun*. By piercing the tubercles of the bark of this fir, the *Strasburg Turpentine* is obtained:—the *Resi'na Abie'tis* (Ph. L. before 1809), *Oleum Abie'tis*, *Terebinth'ina Argentoratensis*.

PINUS PINASTER, see *P. sylvestris*.

PINUS PINEA, *Stone Pine*, *Pinea*, *Pinus*, *P. uber'rima* seu *sati'ua*. The nuts, *Zirbel nuts*, *Pine nuts*, *Nu'clei Pinæ*, *Pinei*, *Pine'oli*, (F.) *Pin à pignons*, are eaten raw, or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO, see *Pinus Mughos*—*p. Sativa*, *P. pinea*.

PINUS SYLVESTRIS, *Pinas'ter*, *Pencē*, *Scotch Fir*. This pine, as well as *P. marit'ima* (*P. Pinaster*), and other species of *Pinus*, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine of Europe*, *Terebinth'ina*, *T. vulgaris* seu *communis*, *Resina pini*, *Bijon*, *Horse Turpentine*, *Bordeaux Turpentine*, (F.) *Térébinthine de Bordeaux*, *Térébinthine commune*, is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see *Oleum Terebinthinæ*.) The white Turpentine, or common Turpentine of America—*Terebinth'ina*, Ph. U. S.—is produced chiefly from *Pinus palustris*, *Yellow pine*, and *P. taeda*, *Loblolly pine*, and perhaps from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Rosin*, (*Resi'na*, Ph. U. S.)—*Resina flava*—is left, which is only used in the formation of ointments and plasters. If without the addition of water, the residuum is common resin or *Colophony*. 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot*, *Barras*; and *White Rosin*, *Resina alba*, when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained—*Hygropicosos*, *Pissa*, *Piz cedria* seu *liq'uida*, *Resi'na pini empyrenmatica liq'uida*, *Terebinth'ina empyrenmatica*, *Alchitram*, *Alchit'ra*, *Cedria*, (F.) *Goudron*, *G. végétale*, *Poiz liquide*, *Brai liquide*. *Tar water*, *Aqua Picea* seu *Picis*, *Infusum Picis liq'uida* seu *Picis empyrenmaticæ liquidæ*, *Pol'tio picea*, (F.) *Eau de Goudron*, which is made by mixing two pints of tar with a gallon of water, stirring with a wooden rod for fifteen minutes, and, when the tar has subsided, straining and keeping in well stopped bottles, was, at one time, a fashionable remedy in numerous complaints, and its use has been revived, since its virtues have been presumed to be owing to creasote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. A *wine* or *beer* of tar, *Tarbeer*, *Jein'beer*, has been employed in Philadelphia in similar cases. It may be made by adding to tar enough beer to saturate it, mixing, and allowing them to macerate for three days, with occasional agitation. The dose is a table-spoonful. 4. *Common Pitch*, *Piz nigra*, *Black Pitch*, *Burcea*, *Burnia*, *Stone Pitch*, *Piz sicca*, *P. atra*, *P. nava'lia*, *Zopissa*, *Palimpis'sa*, *P. ar'ida* (Ph. L. before 1809), (F.) *Poiz navale*, *P. noire*, is obtained by inspissating tar. It is used only as a resolvent in plasters.

PINUS TAEDA, see *P. sylvestris*—*p. Taxifolia*,

P. picea—*p. Uberrima*, *Pinus pinea*—*p. Vulgaris*, *P. p. cea*.

PIONE, *Pæonia*.

PIONY, *Pæonia*.

PIORTHOPNŒA, *Pimelorthopnœa*.

PIOULQUES (F.). A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIP, Syphilis.

PIPE-PLANT, *Monotropa uniflora*.

PIPER, *perpi*, see *Piper nigrum*.

PIPER ALBUM, *Leucop'iper*, *White Pepper*, is black pepper freed from its cuticle.

PIPER ANGIUSTIFOLIUM, *Matico*—*p. Aromaticum*, *P. nigrum*—*p. Betel*, *Betel*—*p. Brazilianum*, *Capsicum annuum*—*p. Calcuticum*, *Capsicum annuum*.

PIPER CAPENSE, a South African species, has all the properties of the peppers, and, in appearance and taste, greatly resembles cubebs. It possesses, too, similar virtues.

PIPER CARYOPHYLLATUM, see *Myrtus pimenta*—*p. Caudatum*, *P. eubeba*—*p. Chiapæ*, see *Myrtus pimenta*.

PIPER CUBEB'A, *Persæa* seu *Laurus eubeba*, *Litsæa eubeba* seu *piper'ita*. *Ord. Piperaceæ*. A native of Java and Guinea. The odour of these berries—*Cubeba* (Ph. U. S.), *Com'peper*, *Compca*, *Cubal sivi*, *Piper caudatum*, *Bucæ Piperis glabri*, *Cubeb* or *Tailed Pepper*, *Cuma'mus*, (F.) *Poivre-à-queue*, *Quabebe*—is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*Oleum Cubebæ*, oil of cubebs—which is official in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ℥j to ʒj, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

'*Turkey yellow berries*,'—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubebs.

PIPER ELONGATUM, *Matico*.

PIPER GUINEENSE, *Capsicum annuum*—*p. Hispanicum*, *Capsicum*—*p. Indicum*, *Capsicum annuum*—*p. Jamaicense*, see *Myrtus pimenta*.

PIPER LONGUM, *Macrop'iper*, *Acap'ali*, *Catutrip'ali*, *Pin'pili*, *Chav'ica Roxburghii*, *Long Pepper*, (F.) *Poivre long*. As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative, and tonic, like the other peppers. Dose, gr. v to ℥j.

PIPER LUSITANICUM, *Capsicum annuum*—*p. Murale*, *Sedum*.

PIPER METHISTICUM, see *Ava*.

PIPER NIGRUM, *Melanop'iper*, *Molagoco'di*, *Ladu*, *Piper aromaticum*, *Black Pepper*, (F.) *Poivre noir*. Black pepper, *Piper* (Ph. U. S.), is the unripe fruit dried in the sun. *Virtues*, same as those of the other peppers. When freed from its husk by mechanical trituration it constitutes *Fulton's decorticated pepper*.

PIPER ODORATUM JAMAICENSE, see *Myrtus pimenta*—*p. Tabascum*, see *Myrtus pimenta*—*p. Turcicum*, *Capsicum annuum*.

PIPERINA, *Piperinam*, *Piper'ine*, *Piperin*, from *piper*, 'pepper.' A resinoid substance, obtained from the *piper nigrum* by M. Erstädt, in which a part of the virtues of the pepper resides. It has been employed, like the quinia, in intermittents, and successfully.

PIPEROID, *Pipero'idum*, *Zingib'erin*, from *piper*, 'pepper,' and *idos*, 'resenblance.' A yellow syrupy mass obtained by exhausting ginger root by ether. It is soluble in ether, alcohol, and oils, and may be given in tincture, sugar, lozenge, or syrup, in cases where ginger is indicated.

PIPEROPAS'TUS, from *πικρα*, 'pepper,' and *πασσιν*, 'to strew.' Strewed with pepper,—socks. For example, where it is desirable to excite the surface of the feet.

PIPETTE. 'A small pipe.' In Pharmacy, a small tube terminating in a perforated point, which is passed into a liquid to be removed— from the surface of a precipitate, for example. The liquid is drawn into the tube by applying the mouth to the free extremity.

PIPIN'NA, *Men'tula parva*. A small penis.

PIPPERIDGE BUSH, see *Oxycantha Galeni*.

PIPSISSEWA, *Pyrola umbellata*—p. Spotted, *Pyrola maculata*—p. White, *Pyrola maculata*.

PIPTONYCHIA, *Onychoptosis*.

PIPTOSTEGIA OPERCULATA, see *Batata de purga*—p. *Pisonis*, *Convolvulus mechoacan*.

PIQUETÉ, see *Sablé*.

PIQURE, Puncture, Wound, punctured.

PIRTLING, Slavering.

PIRUS, see *Pyrus malus*.

PISA, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. It is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.), sulphureous, and carbonated; and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCID'IA ERYTHRINA, *Jamaica Dog-wood*. *Ord.* Leguminosæ. A small branching tree, common in most of the West India Islands; *Diadelphia Decandria* of Linnæus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothache.

PISCINA, *Baignoire*.

PISCIV'OROUS, *Pisciv'orus*, *Ichthyoph'agus*. *Ichthyoph'agus*, from *piscis*, 'a fish,' and *voro*, 'I eat.' Feeding or subsisting on fish.

PISIFORM, *Pisiform'is*, from *pisum*, 'a pea,' and *forma*, 'shape.' Pealike, pea-shaped.

PISIFORM'E, *Os*, *Os leuticular'e* seu *orbicular'e* seu *extra ordinem carpi*, (F.) *Os hors du rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the *os cuneiforme*.

PISO, Mortar.

PISSA, see *Pinus sylvestris*.

PISSASPHAL'TUS, *Pissasphaltum*, *Mineral Pitch*, from *πισσα*, 'pitch,' and *ασφαλτος*, 'bitumen.' (F.) *Pois minérale*. A thicker kind of *Petroleum* or *Rock oil*; formerly employed as a vulnerary. It is synonymous with *Glu'tinous bitu'men*, *Malta bitu'men*, and *Mineral tar*.

PISELLE'UM, *Oleum Pic'inum*, from *πισσα*, 'pitch,' and *ελαον*, 'oil.' An oily matter obtained from boiling pitch, and used for the same purposes as tar.

PISELLEUM INDICUM, *Petroleum*.

PISSEMENT DE PUS, *Pyuria*—p. *de Sang*, *Hæmaturia*.

PISSENLIT, *Leontodon taraxacum*.

PISSE-SANG, *Fumaric*.

PISSEROS, from *πισσα*, 'pitch.' Ancient name of a cerate, prepared of *olive oil*, *oil of roses*, and *dried pitch*. It was, also, called *Cera'tum picat'um*, and *C. tetraphar'macum*.—*Hippocrates*.

PISSITES, *Vinum picat'um*. Same etymon.

A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, *Malacia*.

PISSWEED, *Anthemis cotula*.

PISTACHIO NUTS, see *Arachis hypogea*, *Pistacia vera*.

PISTACIA CHIA, *P. lentiscus*.

PISTA'CIA LENTIS'CUS, *P. Chia*, *Terebin'thus lentiscus*, *Lentiscus vulg'aris*; the *Mastich Tree*. *Ord.* *Terebinthaceæ*. The wood of this tree abounds with the resinous principles of mastich; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastich*, *Resi'na Lentis'cina*, *Men'frigē*, *Mas'tichē*, *Mastix*, *Pistacia Lentis'ci Resi'na*. This resin has an agreeable smell when heated: is almost insipid; in globular, irregular, yellowish, semi-transparent masses; soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed to stop holes in carious teeth.

Oil of Mastich, *Mastichel'æon*, *Oleum Mastich'inum*, is mentioned by *Dioscorides*.

PISTACIA NARBONENSIS, *P. lentiscus*—p. *Reticulata*, *P. lentiscus*.

PISTACIA TEREBIN'THUS, *P. Narbonen'sis* seu *reticulata* seu *vera*, *Turpentine Tree*, *Hab-el-Kalimbat*, *Terebinthus vulg'aris*, *Terminthos*. The tree which affords the *Cyprus Turpentine*, *Resi'na Terebin'thi*, *Terebin'thina vera* seu *Chia* seu *Cyp'ria*, (F.) *Térébinthine de Chio*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpentine.

PISTACIA VERA, *πιστακία*. Name of the tree which affords the *Nux Pistacia*. *Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTILLUM, *Pilum*.

PISTOLOCHIA, *Aristolochia pistolochia*.

PISTORIENSIS GLADIUS, *Bistonri*.

PISUM, *πιον*, *P. sativum*, *Pea*, *Garden pea*, (F.) *Pois*, *P. cultivé*. The seeds of the pea. *Ord.* *Leguminosæ*, *Sex. Syst.* *Diadelphia Decandria*, are much employed as an aliment, both in the fresh and dried state. They are farinaceous, and, when dried, not easy of digestion.

PIT, Pock mark—p. of the Stomach, *Fossette du cœur*.

PITAY'A BARK. This bark of *Cincho'na pitay'a*, *Ord.* *Cinchonaceæ*, is preferred in Colombia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

PITAYINE, see *Pitaya bark*.

PITCAITHLEY, MINERAL WATERS OF. These saline springs, at *Pitcaithley*, about four miles from *Perth*, Scotland, contain chlorides of sodium and calcium.

PITCH, *Colophonia*—p. Black, see *Pinus sylvestris*—p. Burgundy, see *Pinus abies*—p. Canada, see *Pinus Canadensis*.

PITCH CAP, see *Depilatory*.

PITCH, COMMON, *Pinus sylvestris*—p. Hemlock, see *Pinus Canadensis*—p. Jew's, *Asphaltum*—p. Mineral, *Pissasphaltum*.

PITCH PLASTER, see *Depilatory*, *Emplastrum picis*.

PITCH, STONE, see *Pinus sylvestris*—p. White, see *Pinus abies*.

PITYRIASIS, Pityriasis.

PITHYRINUS, Acerosus, Furfuraceus.

PITTA'CIUM. A pitch plaster, from *πιττα*, 'pitch.'

PITTING, Pock mark.

PITTIOSIS, Malacia.

PITTO'TA. Medicines in which pitch is the chief ingredient.

PITTSBURG, MINERAL WATERS OF. A chalybeate mineral spring, situate about four miles south-west of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

PITUITA, Mucus, Phlegm—p. Narium, Nasal mucus.

PITU'ITARY, *Pituitarius*, (F.) *Pituitaire*, from *pituita*, 'phlegm.' Concerned in the secretion of mucus or phlegm. A name given to several parts.

PITUITARY BODY, P. Gland—p. Fossa, Sella turcica.

PITUITARY GLAND, *Glandula Pituitosa* seu *pituitaria* seu *basilaris*, *Lacuna* seu *Appendicula cerebri*, *Sentiua*, *Hypophysis* seu *Appendix cerebri*, *Corpus pituitare*, *Pituitary body*;—*Appendice sus-sphénoïdale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

PITUITARY MEMBRANE, *Schneiderian Membrane*, *Membraua pituitaria* seu *olfactoria*. The mucous membrane which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united;—the one in contact with the bone is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of odours, by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

PITUIVE, Mucus.

PITU'ITOUS, *Pituitosus*; from *pituita*, 'mucus or phlegm.' Consisting of, or resembling, or full of mucus or phlegm.

PITYRIASIS, from *πιτυρον*, 'bran'; *Lepidosis Pityriasis*, *Pityrisma*, *Pithyriasis*, *Herpes furfuraceus* seu *farinosus*, *Porri'go* (of some), *Tinea furfuracea* seu *porriginosa*, *Furfuratio*, *Furfurica*, *Dandriff*, *Daudruff*, (Sc.) *Lusa*, (Prov.) *Room*, *Rummet*, (F.) *Teigue*, *Dartre*, *D. furfuracea volante*;—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

PITYRIASIS, Porrigo—p. Nigra, Melasma—p. Versicolor, Chloasma.

PITYRISMA, Pityriasis.

PITYROIDES, Furfuraceus.

PITYRON, Furfur.

PIVOINE, Pæonia.

PIV'OTING. In dentistry, an operation, which consists in fastening in a new crown upon the root of a tooth by means of a piece of gold wire, called 'a pivot.'

PIX, Sperm—p. Abietina, see *Pinus abies*—p. Abietis, see *Pinus abies*—p. Alba, see *Pinus abies*—p. Arida, see *Pinus abies*, and *Pinus syl-*

vestris—p. Atra, see *Pinus sylvestris*—p. Bruttia, *Bruttia*—p. Burgundica, see *Pinus abies*—p. Canadensis, see *Pinus Canadensis*—p. Cedria, see *Pinus sylvestris*—p. Græca, *Colophonia*—p. Li- quida, see *Pinus sylvestris*—p. Navalis, see *Pinus sylvestris*—p. Nigra, see *Pinus sylvestris*—p. Sicea, see *Pinus sylvestris*.

PLACE'BO, 'I will please,' from *placeo*. A medicine, prescribed rather to satisfy the patient than with any expectation of its effecting a cure.

PLACEN'TA, *πλακος*, *πλακουρος*. A Latin word, signifying a *Cake*. *P. uteri* seu *uteriua* seu *uteri car'nea*, *Hepar* seu *Jecur uteri'num*, *Caro* seu *Affa'sio orbicularis*, *Maza*. A soft, spongy, vascular body, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. It is generally considered to have two portions, one *fœtal*, and the other *maternal*. The fetal consists of highly vascular villi and tufts, which contain the inosculating loops of the umbilical arteries and umbilical vein of the fœtus. The maternal portion is considered by Dr. Reid to consist, essentially, of a large sac formed by the inner coat of the vascular system of the mother, into which the maternal blood is poured by the curling arteries of the uterus, and from which it is returned by the utero-placental veins. The tufts and villi of the fetal placenta are ensheathed by this inner coat of the maternal vascular system; and, according to Prof. Goodsir, two distinct sets of nucleated cells—one maternal and the other fetal—separate the maternal and fetal portions where they come in contact, one set of which are probably, he thinks, concerned in the separation of nutritive matter from the maternal blood, and the other destined to convey it into the vessels of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the foetal surface are confounded into one mass. It is composed of the umbilical vessels, areolar tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus.

The main function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being *shewn* to that of the mother, and undergoing requisite changes. It may, also, be an organ for nutritive absorption, as observed above.

Animals, which have no placenta—as the Marsupialia—are called *implacental* and *nonplacental*.

PLACEN'TA CRUORIS, see *Blood*—p. Febrilis, *Ague cake*—p. Oblata, P. prævia—p. Obvia, P. prævia.

PLACEN'TA PRÆ'VIA, (from *præ*, 'before,' and *via*, 'way,') *P. ob'via* seu *obla'ta*. Presentation of the placenta; a condition which gives rise to *unavoidable hemorrhage* from the uterus. The safety of the female depends upon speedy delivery.

PLACEN'TA SANGUINIS, see *Blood*—p. Uteri Succenturiata. *Decidua*.

PLACEN'TAL, *Placentalis*, (F.) *Placentaire*. Relating, or appertaining to, the placenta. Possessed of a placenta,—as 'a *placental mammal*.'

PLACEN'TITIS, *Placoutitis*, *Placitis*, *Inflammatio placen'tæ*. A hybrid word—from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

PLACEN'TULA, 'a little cake,' diminutive of *placenta*, 'a cake.' A rudimental placenta. The placenta of an abortion.

PLACOITIS, Placentitis.

PLACOUNTITIS, Placentitis.

PLADAROMA, Pladarosis.

PLADAROSIS, *Pladar'oma, Pladar'otes*, from *πλαδαρος*, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain. Trachoma.

PLADAROTES, Pladarosis.

PLAFOND DES VENTRICULES DU CERVEAU, Corpus callosum.

PLAGA, Ictus, Wound.

PLAGIOBOLIA, *Πλασιολία*, from *πλαγιος*, 'to one side,' and *βαλλειν*, 'to throw.' Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

PLAGUE, from *πληγη*, *plaga*, 'a stroke.' *Pestis*. *P. orientalis* seu *bubou'ria orientalis* seu *inguina'ria* seu *contagio'sa* seu *acutiss'ima* seu *sept'ica* seu *glandulo'sa* seu *ade'no-septica* seu *inguina'ria*, *Pestil'itus*, *Ephem'era pestilentia'lis*, *E. mortif'era*, *Lues inguina'ria*, *Clades glandulo'ria*, *Phthora*, *Pestilent'ia*, *Lues*, *Loimos*, *Febris ade'no-nervo'sa*, *Læmos*, *Læmè*, *Læ'mia*, *Læmop'gra*, *Chnosda*, *Anthra'cia Pestis*, *Anthracotyphus*, *Febris pestilens*, *Syn'ochus pestilentia'lis*, *Typhus pestis* seu *pestilentia'lis* seu *gravis'simus* seu *anthra'cius* seu *bubon'icus*, *Ezanth'e'ma pestis*, the *Pest*, *Levant plague*, *Septic* or *glandular pestilence*, *The sickness*, (F.) *Peste*, *Typhus d'Orient*, *Fievre du Levant*, *F. adéno-nervense*. An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groins or axillæ, and carbuncles. Its miasmata—it has been conceived—adhere to different organic textures, to woollen goods, clothing and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quar'antine Laws* have been instituted; and when the disease has actually appeared, a *cordou saulaire* has been drawn round the infected district, so as to prevent all communication.

PLAGUE OF ANTONINUS, *Pestis Antonina'na*, (F.) *Peste Antonine*. A severe febrile disease, which prevailed in the Roman empire, during the reign of Antoninus. It began in Asia, and passed westward. It resembled the Plague of Athens.

PLAGUE OF ATHENS, (F.) *Peste d'Athènes*. A febrile disease, which raged at Athens during the Peloponnesian war, in the 5th century before the Christian era; and a description of which is given in Thucydides. It was characterized by a cutaneous eruption, accompanied by small ulcerations, vomiting, affection of the respiratory organs, and diarrhœa. It began in the far East, and, before reaching Athens, ravaged Egypt, and the greater part of the Persian Empire.

PLAGUE, BLACK, Death, black.

PLAGUE, COLD. A severe form of congestive fever, seen in the Southern States. Bilious pneumonia, in which there is no reaction, has been, also, so called.

PLAGUE MARK, Plague token.

PLAGUE, PALI. A malignant fever, greatly

resembling Plague, which prevailed in Rajpootana after July, 1836.

PLAGUE SPOT, Plague token.

PLAGUE TOKEN, *Plague mark*, *Plague spot*. A mark by which one struck with the plague was known. Perhaps the early stage of carbuncle in unfavourable cases. It is described as a small tubercle—*Bossa*—somewhat resembling a wart, callous and more or less deficient in sensibility, varying in size from that of a millet-seed to that of a bean.

PLAGULA, Compress, Pledget, Splint.

PLAIE, Wound—*p. d'Arme à feu*, Wound, gunshot—*p. d'Arquebusade*, Wound, gunshot—*p. Contuse*, Wound, contused—*p. Envenimée*, Wound, poisoned—*p. par Arrachement*, Wound, lacerated—*p. à Lambeau*, see Flap.

PLAINTIVE, *Luctueus*.

PLANANTHUS FASTIGATUS, Lycopodium selago—*p. Selago*, Lycopodium selago.

PLANARIA LATIUSCULA, Distoma hepaticum.

PLANCHER (F.), 'floor.' In anatomy, the inferior wall or boundary of a cavity.

PLANCHER DU CERVEAU, Tentorium.

PLANCUS, Leiopus.

PLANE, Plexus.

PLANE, MESIAL, see Mesial.

PLANET-STRUCK, see Sideratio.

PLANE'TES, *Planetiens*, *Plan'icus*, *Errabundus*, *Errat'ic*, from *πλανη*, 'a wandering about.' An epithet given to diseases, whose returns are irregular—especially to intermittent fever; *Planetes Febris*, *F. Errat'ica*, *F. Ervo'nea*, *F. Vaga*.

PLANETICA ARTHRITIS, Gout, wandering.

PLANICUS, Planetes.

PLANIPEDES, Steganopodes.

PLANITIES PEDIS, Sole.

PLANOBOLIA, Plagiobolia.

PLANTA NOCTIS, Hydroa, Sudamina—*p. Pedis*, Sole—*p. Prima pedis*, Tarsus.

PLANTA'GO, *P. Major*, *Centiner'via*, *Arnoglossum*, *Septiner'via*, *Polyneuron*, *Heptapleuron*, *Planta'go latifolia* seu *major* seu *enlg'ris*, *Great plantain*, *Waybread*, (Sc.) *Wabran leaves*, (F.) *Plantain commun*. *Ord. Plantaginacæ*. *Sex. Syst. Tetrandria Monogynia*. The leaves have been said to be refrigerant, attenuant, substyptic, and diuretic.

PLANTAGO AQUATICA, *Alisma plantago*.

PLANTAGO CORDATA, *Heart leaved plantain*, *P. lanceolata*, *Ribgrass*, and *P. VIRGINICA*, *White plantain*, or *Ribwort*, indigenous; have properties like *Plantago major*.

PLANTAGO CORXOPUS, *Coronopodium*, *Cornu cervinum*, *Stella terræ*, *Plantago*, *Buckshorn Plantain*. Properties like the last.

PLANTAGO NITIDA, *P. psyllium*.

PLANTAGO PSYLLIUM, *P. nitida*, *Psyllium*, *P. erectum*, *Publicaris herba*, *Crystal'ion*, *Cynomola*, *Branching Plantain*, *Fleawort*, (F.) *Herbe aux puces commune*. The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

PLANTAGO VULGARIS, *Plantago*.

PLANTAIN DES ALPES, *Arnica montana*—*p. Branching*, *Plantago psyllium*—*p. Buckshorn*, *Plantago coronopus*—*p. Commun*, *Plantago*—*p. d'Eau*, *Alisma plantago*—*p. Great*, *Plantago major*—*p. Heart leaved*, *Plantago cordata*.

PLANTAIN MEAL, see *Musa paradisiaca*.

PLANTAIN, RATTLESNAKE, *Goodyera pubescens*—*p. Robin's*, *Erigeron bellidifolium*.

PLANTAIN TREE, *Musa paradisiaca*.

PLANTAIN, WATER, *Alisma plantago*, *Unisema deltifolia*—*p. White*, *Plantago Virginica*.

PLANTAIRE, *Plantar muscle* — *p. Grêle*, *Plantar muscle*.

PLANTAR, *Planta'ris*, (F.) *Plantaire*, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

PLANTAR APONEURO'SIS, *P. fasciæ*. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

PLANTAR ARCH, see *Plantar arteries*.

PLANTAR ARTERIES. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe.—The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior—three in number—are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *collaterals* of the last four toes.

PLANTAR CROSS, see *Plantar arteries*—*p. Fasciæ*, *P. aponeurosis*.

PLANTAR LIGAMENTS. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

PLANTAR MUSCLE, *Planta'ris*, *P. grac'ilis*, *Tibialis grac'ilis*, *Extensor tarsi minor*, (F.) *Plantaire*, *P. Grêle*, *Jambier grêle*, *Petit fémoro-calcaneien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and conversely. It can, also, assist in the flexion of the leg on the thigh.

PLANTAR NERVES. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into—1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches:—the one—*profunda*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other—*superficialis*—sends filaments to the short flexor of the little toe, the

two sides of that toe, the outer side of the 4th, and the last lumbricales.

PLANTAR REGIONS or SURFACES are different regions or surfaces of the sole of the foot. Three are generally reckoned,—the *internal*, *middle*, and *external*.

PLANTAR VEINS follow an arrangement similar to that of the arteries.

PLANTARIA, *Dengue*.

PLANTARIS, *Plantar*, *P. muscle*—*p. Superficies pedis*, *Sole*—*p. Verus*, see *Flexor longus digitorum pedis profundus perforans* (accessorius.)

PLANTARIUM, *Pubes*.

PLANTE DU PIED, *Sole*.

PLANTI-SOUS-PHALANGIENS, *Lumbricales pedis*—*p. Tendino-phalangiens*, *Lumbricales pedis*.

PLANUM APONEUROTICUM DIAPHRAGMATICIS. The tendinous expansion of the diaphragm.

PLANUM ORBITALE, see *Maxillary bone* (superior.)

PLANUM OS, from *planus*, 'soft, smooth.' The papyraceous or orbital plate of the ethmoid bone—*Lamina papyracea*, *Lumella plana*—was formerly so called.

PLANUM PEDIIS, *Sole*.

PLANUM SUPERIS LINGUÆ. The upper surface of the tongue.

PLANURIA, from *πλανος*, 'wandering, false,' and *ουρον*, 'urine.' Discharge of urine through unwonted ways.

PLAQUEMINIER D'EUROPE, *Diospyros lotus*.

PLAQUES GAUFRÉES, *Peyeri glandulæ*—*p. Laituses*, see *Taches laituses*—*p. de Peyer*, *Peyeri glandulæ*.

PLASMA, *Liquor sanguinis*.

PLASMEXIDROSIS, from *plasma*, the *liquor sanguinis*; *εξ*, 'out of,' and *ιδρωσις*, 'perspiration.' Exudation of the plasma of the blood from the vessels.

PLASTER, *Emplastrum*—*p. Adhesive*, *Emplastrum resinæ*, *Sparadrapum adhesivum*—*p. Adhesive*, *Baynton's*, see *Emplastrum resinæ*—*p. Adhesive*, of pitch and resins, *Emplastrum de piec et resinis glutinans*—*p. Ammoniacum*, *Emplastrum ammoniaci*—*p. Ammoniacum* with mercury, *Emplastrum ammoniaci cum hydrargyro*—*p. Aromatic*, *Emplastrum aromaticum*—*p. Asafœtida*, *Emplastrum asafœtidæ*—*p. of Belladonna*, *Emplastrum belladonnæ*—*p. Blister*, *Blister*—*p. Blistering*, *Emplastrum lyttæ*—*p. of Blistering fly*, *Emplastrum lyttæ*—*p. Calefacient*, *Emplastrum calefaciens*—*p. of Cantharides*, compound, *Emplastrum lyttæ compositum*—*p. Cephalic*, *Emplastrum picis comp.*—*p. Corn*, *Sparadrapum viride*—*p. Corn*, *Kennedy's*, *Sparadrapum viride*—*p. Court*, *English*, see *Ichthyocolla*, *Sparadrapum adhesivum*—*p. Cummin*, *Emplastrum cumini*—*p. Defensive*, *Sparadrapum Galteri*—*p. Diachylon*, *Emplastrum plumbi*—*p. Fly*, *Emplastrum lyttæ*—*p. Frankincense*, *Emplastrum thuris*—*p. Galbanum*, *Emplastrum galbani*—*p. Galbanum*, compound, *Emplastrum galbani compositum*—*p. Gum*, *Emplastrum gummosum*—*p. of Gum-resins*, *Emplastrum cum gummi-resinis*—*p. Hemlock*, *Emplastrum cicutæ*—*p. Iron*, *Emplastrum ferri*—*p. Isinglass*, see *Sparadrapum adhesivum*—*p. Issue*, *Sparadrapum pro fonticulis*—*p. Lead*, *Emplastrum plumbi*—*p. Machine*, *Sparadrapier*—*p. Mercurial*, *Emplastrum hydrargyri*—*p. of Mercury*, compound, *Emplastrum hydrargyri compositum*—*p. Mustard*, *Cataplasma sinapis*—*p. Nuremberg*, *Emplastrum Norimbergense*—*p. Opium*, *Emplastrum opii*—*p. Pitch*, see *Depilatory*—*p. Pitch*, comp., *Emplastrum picis compositum*—*p. Resin*, *Emplastrum resinæ*—*p. of Red oxide of iron*, *Em-*

plastrum oxidii ferri rubri—p. Soap, Emplastrum saponis—p. of Spanish flies, compound, Emplastrum lyttæ compositum—p. Sticking, Emplastrum resinæ—p. Strengthening, Emplastrum ferri, Emplastrum oxidii ferri rubri—p. Warm, Emplastrum calefaciens—p. Wax, Emplastrum ceræ.

PLASTIC, *Plas'ticus, Formati'vus, Form'ative*, (F.) *Plastique*, from πλασσω, 'I form.' That which forms, or serves to form.

PLASTIC ELEMENT. One which bears within it the germs of a higher form.—Gerber. *Plastic* or *histogenetic* or *organoleptic* elements of nutrition are those elements of food which go to the formation of organized tissue.—See Aliment.

PLASTIC FORCE. The generative or formative power in organized bodies. It is also called *Nisus formativus*, *Vis seu Virtus plastica* seu *formativa* seu *essentia* seu *reproductiva*, *Facultas formatrix* seu *nutrix* seu *anctrix* seu *vegetativa*; *Blas alterativum*, *Motus assimilationis*, *Anima vegetativa*, *Plasticismus*, *Virtus formatrix*, *Plasticitas*, *Plasticity*, *Force of Nutrition*, *F. of assimilation*, *F. of Form'ation*, *F. of vegeta'tion*, *Puissance du moule intérieur* (Buffon), *Bildungstrieb*, *Germ-force* of the Germans.

PLASTIC LYMPH, *Liquor Sanguinis*—p. Surgery, *Morioplastice*.

PLASTICISMUS, *Plastic Force*.

PLASTICITAS, *Plastic Force*.

PLASTICITY, *Plastic Force*.

PLASTILYTIC, *Antiplastic*.

PLASTILYTICUM (**HÆMATOLYTICUM**), *Spanæmic*.

PLATA, *Scapula*.

PLATANO, *Musa Sapientum*.

PLATANTHE'RA ORBICULA'TA, *Large round-leaved Orchis*; indigenous. *Order*, *Orchidaceæ*; flowering in July. From πλατος, 'wide,' and ανθη, for 'anther.' The leaves are large, soft and fleshy, and are used, in certain places, for dressing blisters.

PLATANUS, *Musa paradisiaca*.

PLATEA, *Bothrioccephalus latus*.

PLATE-BONE, *Scapula*.

PLATEIASMA, *Platiasmus*.

PLATES, *MANSFORD'S*, see *Galvanism*.

PLATIAS'MUS, *Plateias'ma*, from πλατος, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

PLATINA, *Platinum*.

PLATINUM, *Platina*, from (S.) *plata*, 'silver.' (F.) *Platine*, *Or blanc*, *Petit argent*. The preparations of platinum resemble in their therapeutical properties those of gold. The **BICHLORIDE**, *Plat'ini Bichloridum*, made by dissolving platinum in *aqua regia*, and the **DOUBLE CHLORIDE** of PLATINUM and SODIUM, *Sodii chloroplat'inas*, *Chloroplat'inate of Sodium*, prepared by dissolving bichloride of platinum and pure chloride of sodium, in proper proportions, in water, evaporating and crystallizing,—are the preparations used. They are not much prescribed.

PLATULA, see *Pediculus*.

PLATYBREGMATE, see *Cranium*.

PLATYCORIA, *Mydriasis*.

PLATYCORIASIS, *Mydriasis*.

PLATYNO'SIS, from πλατος, 'broad.' *Amplificatio*. Morbid extension of parts.

PLATYOPHTHALMON, *Antimonium*.

PLATYPOLIA, see *Kyllosis*.

PLATYPUS, see *Kyllosis*.

PLATYS'MA, from πλατος, 'broad.' Anything broadly extended. A spread plaster.

PLATYS'MA MYOIDE'S, *P. Myo'des*, *Musculus cutaneus* seu *subcutaneus* (Winslow), *Quadratus genæ* seu *latissimus colli*, *Expansio musculo'sa*, *Tetragonus*, *Stomom'an'icou*, (F.) *Thoraco-maxillofacial*, *Thoraco-facial* (Ch.), *Peaucier*. A mus-

cle situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely downwards, and from without inwards. They arise from the areolar tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Musculus Risorius Santorini*. The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTER'NOS, from πλατος, 'broad,' and στερον, 'the sternum.' One who has a broad, well developed chest.—D. Pechlin.

PLATYS'TOMUS; from πλατος, 'broad,' and στομα, 'mouth.' One who has a broad mouth.

PLAUTUS, *Leipus*.

PLECHAS, *Perinæum*.

PLECTANÆ, *Corvua uteri*.

PLEC'TANÆ, *Plica*, *Plegma*, *Plexus*. From πλεκω, 'I twine.' A fold; a plexus. Also, a cornu of the uterus.

PLEC'TRUM. The styloid process of the temporal bone. Also, the uvula, and the tongue.—Castelli.

PLEGGET, (D.) *Plagghe*, *Plumace'olus*, *Linteamen*, *Plag'ula*, (F.) *Plumaceau*, *Plumaseau*. A small compress or gâteau of lint—(the filaments arranged parallel to each other)—flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, and to absorb the discharges.

PLEGE, *Blow*, *Ictus*.

PLEGMA, *Plectane*, *Plexus*.

PLEGOMETER, *Pleximeter*.

PLEIN, (F.) 'Full.' The middle part of a roller.

PLEIOMASTHUS, *Polymasthus*.

PLEIOMAZIA. See *Plymasthus*.

PLENA MULIER, *Pregnant*.

PLENITUDE, *Fulness*.

PLENITUDO, *Plethora*.

PLENCK'S DEPILATORY, see *Depilatory*, *Colley's*.

PLEOMAZIA, see *Polymasthus*.

PLEONEC'TICUS, from πλεον, 'more,' and χευ, 'to have.' Covetous. Desirous to acquire: hence *mania pleonectica*.

PLEONEC'TICA ATHYM'IA seu **MELANCHOL'IA**. A form of insanity characterized by a desire for gain or by covetousness.

PLERO'SIS, from πληρης, 'full;' also *Repletio*, *Refectio*, *Repletio*. Restoration of flesh after sickness. *Plethora*.

PLEROTICUS, *Incarnans*.

PLES'MONÈ, *πλησμονη*, *Plenitu'do*, *Sati'etas*, *Sati'ety*. Intemperance. A condition the opposite to that of hunger.

PLESSER, *Plexor*.

PLESSIMETER, *Pleximeter*.

PLESSIMÈTRE, *Pleximeter*.

PLETHOMER'IA, from πληθος, 'many,' and μερος, 'a part.' Superabundance of parts, as in the case of six fingers to one hand.

PLETHO'RA, from πληρω, 'I fill.' *Polyæ'mia*, *Polyhyperhæ'mia*, *Panhyperæ'mia*, *Polychymia sanguinea*, *Angiopleuro'sis*, *Angiopleuro'sis*, *Erythroæ'mia*, *Erythro'sis*, *Hæmatopletho'ra*, *Hæmopletho'ra*, *Plenitu'do*, *Multitu'do*, *Redundantia*, *Repletio*, *En'chyma*, *Comple'tio*, *Pleth'ory*, *Repletio*, *Sanguin'eness*, *Fulness*, (F.) *Abundance*, *Rédondance*. The word *plethora*, which means

repletion, *Pleurosis*, expresses a superabundance of blood in the system, or in some part of it:—hence the division of plethora into *general* and *local*; the latter being called, according to its seat, *cerebral*, *pulmonary*, *uterine*, &c. The principal symptoms of plethora exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the smaller ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to plethora, or its actual existence, must be obviated by purgatives, proper diet, exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general plethora, as it increases hæmaturia.

PLETHORA ARTERIOSA is the form in which the blood is rich in fibrin and red corpuscles—the *arterial constitution*.

PLETHORA, LOCAL, Hyperæmia — p. Partialis, Hyperæmia.

PLETHORIC, *Plethoricus*, *Polyæmic*, *Polyæmicus*, *Sanguine*, *Sanguineus*, (F.) *Pléthorique*. Same etymon. Full of blood. Relating to or affected with plethora.

PLETHORICUS, Plethoric.

PLETHORY, Plethora.

PLETHOS, Satiety.

PLEUMON, Pulmo.

PLEUMONIA, Pneumonia.

PLEURA, *Pleurum*, *Pleuro'ma*, 'the side, a rib.' *Membr'na pleurit'ica succin'gens* seu *costæ succin'gens*, *M.* seu *Tu'nica costalis* seu *sub-costalis*, *Hypopleur'ios*, *Hypoco'cus*, (F.) *Plèvre* ou *Pleure*. The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costalis*; the portion that covers the lungs, *Pleura Pulmonalis*. The arteries of the pleuræ are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

Pleura is also used for *Cavity of the Pleura*, *Saccus Pleuræ*.

PLEURÆ. The sides of the chest.

PLEURAL, *Pleuralis*, *Ple'ricus*, *Pleu'rites*. That which concerns the pleura:—as a *pleural fistula*:—*pleural cavity*, *pleural hemorrhage*, &c.

PLEURALGIA, Pleurodyny.

PLEURAPOPHYSES, *Costæ veræ*, see *Costa*.

PLEURAPOSTEMA, Empyema.

PLEURARTHRO'ACE, from *πλευρα*, 'a rib,' *αρθρον*, 'a joint,' and *κακος*, 'bad.' Caries of the ribs.

PLEURE, Pleura.

PLEURESIA, Pleuritis.

PLEURÉSIE, Pleurisy — p. *Fausse*, Pleurodynia.

PLEURESIS, Pleuritis.

PLEURÉTIQUE, Pleuritic.

PLEURICUS, Pleural.

PLEURIS, Pleuritis.

PLEURISY, Pleuritis

PLEURISY, BILIOUS, *Pleuritis biliosa*. Pleurisy accompanied with bilious symptoms;—the effect of duodenitis or duodeno-hepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the Southern States especially, for bilious pneumonia before the pneumonitic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmatothorax — p. Rheumatic, Pleurodynia — p. Root, *Asclepias tuberosa*.

PLEURISY, TYPHOID, *Pleuritis typhoides* seu *typhoides* seu *typho'a*. Pleurisy accompanied by adynamic symptoms.

PLEURITES, Pleural.

PLEURITIC, *Pleuriticus*, *Pleurit'ical*, (F.) *Pleurétique*; same etymon as *pleuritis*. Relating or appertaining to pleuritis — as '*pleuritic pain*.'

PLEURITIS, from *πλευρα*, 'the pleura;' *Morb'us lateralis* seu *pleurit'icus* seu *Costalis*, *Empres'ma* seu *Conna Pleuritis*, *Pleuris*, *Pleure'sis*, *Pleure'sia*, *Pleuritis costalis* seu *vera*, *Pleurit'ica Febris*, *Passio pleurit'ica*, *Inflammati'o Pleuræ*, *Pleurisy*, *Inflammati'o of the Pleura*, (F.) *Pleurésie*, *Fèvre pleurétique*, *Inflammation de la Plèvre*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnœa, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms, attending the phlegmasia in general, strongly marked.

Physical Signs. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dullness of sound on percussion, the dullness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Ego-phony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy*, one situated in the anterior mediastinum; and *false pleurisy* or *rheumatismal pleurisy*, that which occupies the intercostal muscles. The last has received the name *Pleurodynia*; that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has also been distinguished into *dry* and *humid*, according as it is or is not accompanied by expectoration. *Humid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

CHRONIC PLEURISY, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It

may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

Physical Signs. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes oedematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recommended by Dr. Thomas Davies, would of course settle the question.

On dissection of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or sero-purulent effusions.

The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name PLEURITIS VENTOSA, and Pringle that of PLEURODYNIA VENTOSA, to a pain behind the false ribs, attributed to the presence of air in the intestines.

PLEURITIS BILIOSA, Pleurisy, bilious—p. Bronchialis, Bronchitis—p. Costalis, Pleuritis—p. Diaphragmatica, Diaphragmitis—p. Humida, Bronchitis—p. Muscularis, Pleurodynia—p. Notha, Pleurodynia—p. Pericardii, Pericarditis—p. Pulmonis, Pleuropneumonia—p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleurodynia—p. Typhoides, Pleurisy, typhoid—p. Vera, Pleuritis.

PLEUROCELE, from *πλευρα*, 'the pleura,' and *κηλη*, 'a tumour.' *Hernia of the pleura*, *Hernia plen'rica* et *pulmonalis*. This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

PLEUROCOLLE'SIS, from *πλευρα*, 'the pleura,' and *κολληω*, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

PLEURODYNE, Pleurodynia.

PLEURODYNIA, *Plen'al'gia*, *Pseudo-pleuritis*, *Pseudo-pleurisy*, *Plenrod'ynē*, *Autal'gia dolorosa*, *Parapleuritis*, *Stethorhen'na*, *Rhenmatism's pec'toris*, *Pleuritis rhenmatica seu miscal'ris* seu *notha* seu *spuria* seu *spuria simulata*, *Pneumonia exter'na*, *Lagonop'onos*, *Thoracod'ynē*, *Dolor Pec'toris exter'nus*, *Pain in the side*, *Stitch in the side*, *False, rhenmatic or rheumatism'al pleurisy*, (Old Eng.) *Shott*, (Sc.) *Caik*, (F.) *Point de côté*, *Douleur de côté*, *Pleu-*

vésie fausse; from *πλευρα*, 'the side or pleura,' and *όδυνη*, 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnoea, excepting under the form of a *stitch*, when dyspnoea exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resists, a blister will, almost always, remove it.

PLEURODYNIA VENTOSA, Pleuritis ventosa.

PLEUROMA, Costa, Pleura.

PLEUROPATHIA, from *πλευρα*, 'the pleura,' and *παθος*, 'a disease.' A disease of the pleura.

PLEUROPERIPNEUMONY, *Pleuroperi-pneumonia*, *Pleuropneumonia*, *Pneumono-pleuritis*, *Pneumono-pleuritis*, *Pleuritis pulmo'nis*, *Pneumonia plen'ritis*. Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs.* A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

PLEUROPNUEMA, Pneumothorax.

PLEUROPNUEMONIA, Pleuroperipneumony.

PLEUROPNUEMONITIS, Pleuroperipneumony.

PLEUROPYRHESSIS, Empyema.

PLEURORRHAGIA, Hæmatothorax.

PLEURORRHEA, from *πλευρα*, 'the side,' and *ρρω*, 'I flow.' Accumulation of fluid in the pleura.

PLEURORRHEA CHYLOSA, Chylothorax—p. Lymphatica, Hydrothorax—p. Purulenta, Empyema—p. Sanguinea, Hæmatothorax—p. Serosa, Hydrothorax.

PLEURORTHOPNŒA, from *πλευρα*, 'the side,' *ορθος*, 'erect,' and *πνέω*, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

PLEUROSO'MUS, from *πλευρα*, 'side,' and *σωμα*, 'body.' A malformation in which the fissure is somewhat lateral, with eventration extending chiefly upon the upper part of the abdomen and upon the chest; the upper extremity of the fissured side being more or less atrophied.—Vogel.

PLEUROSTO'SIS, from *πλευρα*, 'the pleura,' and *οσσειον*, 'a bone.' Ossification of the pleura, or in the cavity of the pleura. *Osteoplen'ria*.

PLEUROTETANUS, Plenrothotonos.

PLEUROTHOTONOS, *Pleurothotonos*, *Plenrotet'anus*, *Tetanus latera'lis*, from *πλευροθεν*, 'laterally,' and *τονος*, 'tension.' A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

PLEUROTONOS, Pleurothotonos.

PLEUROMA, Costa, Pleura.

PLÈVRE, Pleura.

PLEXIM'ETER, *Plexom'eter*, *Plegom'eter*,

Plessim'eter, Auticoposcop'ium, Auticop'oscop'e. (F.) *Plessimètre*, from *πλησσω*, 'I strike,' and *μετρον*, 'measure,' 'a measure of percussion.' An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage. — See Percussion, mediate.

PLEXOMETER, Plessimeter.

PLEXOR, from *πλησσω*, 'I strike.' *Plessor*. Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *pleximeter*.

PLEXUS, *Plegma, Plect'anē, Planē, Retē*, from *πλεκω*, *plecto*, 'I interlace,' 'I entwine.' (F.) *Lacis*. A network of blood-vessels or of nerves. The nervous plexuses, *Implicatio'nes reticula'ree* seu *Textus nervorum* belong—some to the system of encephalic nerves—others to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments: from which proceed other branches, that are distributed to organs, or to other plexuses.

PLEXUS, CARDIAC, Cardiac plexus—p. Carotid, see Carotid nerve—p. Cavernosus, *Bulbus vestibuli*—p. Choroides, see Choroid—p. Choroideus Medius, Choroidea tela—p. Ciliaris, Ciliary ligament—p. *Cœliacque*, Cœliac plexus—p. Coronarius ventriculi, Gastric plexus—p. Coronary, see Cardiac plexus, and Coronary plexus—p. Gangliiformis semilunaris, Cœliac plexus—p. Gangliiformis, Ganglions, nervosus—p. Glandiformis, Ganglions, nervosus—p. Glandulosi Peyerii, Peyerii glandulæ—p. Hederaceus, Corpus pampiniforme—p. Hepaticus, Hepatic plexus—p. Infra-thyroideus, see Thyroideus veins—p. *Lombo-abdominal*, Lumbar plexus—p. Median, Cœliac plexus—p. Mesenterii proprius et maximus, Cœliac plexus—p. Nervorum anserinus, Facial nerve—p. *Opistogastricque*, Cœliac plexus—p. Pampiniformis, Corpus pampiniforme—p. Pharyngeal, see Pharyngeal nerve—p. Pneumogastricus, see Pneumogastric nerve—p. Retiformis, Corpus cavernosum vaginæ—p. Reticularis, *Bulbus vestibuli*, Choroideus plexus—p. Solar, Cœliac plexus—p. *Sous-mésentérique*, Hypogastric plexus—p. *Testiculaire*, Spermatic plexus—p. *Trachélo-sous-cutané*, Cervical plexus—p. Vasculosus funiculi spermatici pampiniformis, Corpus pampiniforme.

PLICA, from *plicō*, *πλεκω*, 'to fold,' *Tricho'sis plica*, *Tricho'ma*, *Trichou'sis plica*, *Tricæ*, *T. Incub'rum* seu *Scrafo'rum*, *Plica Polonica* seu *Polonica Juda'ica* seu *Cachect'ica* seu *Saxon'ica* seu *caput Medu'sæ* seu *longicauda lateralis*, *Affectio Sarmat'ica*, *Lues Sarmat'ica* seu *Polon'ica* seu *Trichomat'ica*, *Helo'sis*, *Helo'tis*, *Cir'ragra*, *Cir'rhagra*, *C. Polono'rum*, *Eephy'ma trichōma*, *Morbus Cirrho'rum*, *Cana Cæsu'rea*, *Kolto*, *Rhopalo'sis*, *Plicatio*, *Plicatu'ra*, *Matted hair*, *Plaited hair*, *Trichomat'ose hair*, (F.) *Plique*, *P. Polonaise*. A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a real disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes in that of other parts, as the beard, the

hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. *Plica multiform'is* or *Plica caput Medu'sæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. laciniata*, (F.) *Plique en lanières*) or much twisted, (F.) *P. en vrilles*.) 2. *Plica longicauda*, (F.) *Plique solitaire ou à queue*; when the hair is united into a single long mass, and 3. *Plica cœspitosa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ*; but it is far from demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection—*sui generis*—of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable. It has been supposed to be produced by a fungous growth—a *mycodermis* or *trichomaphyte*.

PLICA, Plectane—p. Cachectica, Plica—p. Caput Medusæ, Plica—p. Centralis retinae, see Optic nerve—p. Longicauda lateralis, Plica—p. Lunata, Valvula semilunaris—p. Polonica, Plica—p. Polonica Judaica, Plica—p. Saxonica, Plica—p. Semilunaris, Valvula semilunaris.

PLICE CONVIVENTES, Valvulae conviventes—p. Semilunares, see Urinary bladder, and Uterus.

PLICATIO, Plica.

PLICATURA, Plica.

PLICATURÆ CEREBRI, Gyri cerebri.

PLICHIOS, Perinæum.

PLINTHIUM, *πλινθιον*. A machine invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum*.

PLIQUE, Plica—p. *Polonaise*, Plica.

PLOCARIA CANDIDA, *Fucus amylaceus*—p. Helminthochorton, *Corallina Corsicana*.

PLOMB, Plumbum.

PLOMB (F.). The sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidangeurs*, engaged in emptying them.

PLOMB, ACÉTATE ACIDE DE, Plumbi superacetates—p. *Blanc*, Plumbi subcarbonas—p. *Blanc de*, Plumbi subcarbonas—p. *Carbonate de*, Plumbi subcarbonas—p. *Chlorure de*, Plumbi chloridum—p. *Iodure de*, Plumbi iodidum—p. *Nitrate de*, Plumbi nitras—p. *Oxide de, fondu*, Plumbi oxydum semivitreum—p. *Oxide rouge de*, Plumbi oxydum rubrum—p. *Oxide semi-vitreux de*, Plumbi oxydum semivitreum.

PLOMBAGE DES DENTS, Plugging.

PLOMBAGINE, Graphites.

PLOMBIÈRES, MINERAL WATERS OF. *Fontes medicati Plumb'arii, Thermae Plumbariae*. Plombières is a town in the department of the Vosges, 17 leagues from Nancy, and two from Remiremont. Here are several sources of thermal water. That which is called *Saponaceus* (F.) *Savonneuse*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegetable matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of Plombières are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLORATIO, Lacrymatio.

PLORATUS, Lacrymatio.

PLOTUS, Leiopus.

PLOUK, Papula.

PLUGGING, (Sw.) *Plugg.* (F.) *Tamponnement.* The act of stopping a hole. The introduction of a plug or dossil of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache, (F.) *Plombage des dents.* See Filling.

PLUKE, Papula.

PLUM, Prunum, *Prunus domestica*—p. Assyrian, *Sebestina.*

PLUMA, Lanugo.

PLUMACEAU, Pledget.

PLUMACEOLUS, Pad, Pledget.

PLUMASSEAU, Pledget.

PLUMBAGO, Graphites, Persicaria.

PLUMBA'GO EUROPE'A, *P. lapathifolia* seu *undulata*, from *plumbum*, 'lead,' because covered with lead-coloured spots, *Dentaria*, *Crepanella*, *Squamaria*, *Dentelaria*, *Leadwort*, (F.) *Dentelivre*, *Herbe au Cancer*, *Malherbe.* Ord. *Plumbaginaceæ.* *Sex. Syst.* Pentandria Monogynia. The root was formerly much esteemed as a cure for toothache, like the *Pellitory of Spain*, which is also called *Dentaria.*

PLUMBI ACETAS, *P. superacetatis*—p. *Acetas dilutum alcoholicum*, *Liquor plumbi subacetatis dilutus*—p. *Acidulus siccus*, *Plumbi superacetatis*—p. *Carbonas*, *P. subcarbonas.*

PLUMBI CHLORIDUM, *Chloride of Lead*, (F.) *Chlorure de Plomb.* This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

PLUMBI DEUTOXYDUM RUBRUM, *P. Oxydum rubrum*—p. *Hydriodas*, *P. Iodidum*—p. *Iodhydras*, *P. Iodidum.*

PLUMBI IODIDUM, *P. Ioduretum* seu *Hydriodas* seu *Hydroiodus* seu *Iodhydras*, *Plumbum iodatum* seu *Hydroiodicum*, *Iodide* or *Ioduret of Lead*, (F.) *Iodure de Plomb*, *I. plumbique.* This salt is formed by the double decomposition of *iodide of potassium* and *nitrate of lead.* It is used in scrofulous affections internally and externally; and is official in the *Pharmacopœia U. S.* 1851. Dose, gr. ss to gr. iij or iv.

PLUMBI IODURETUM, *P. Iodidum.*

PLUMBI NITRAS, *Plumbum nitricum*, *Nitras plumbicus*, *Nitrum saturninum*, *Nitrate of lead*, (F.) *Nitrate* ou *Azotate de Plomb.* A salt formed by the action of *diluted nitric acid* on *litharge.* Nitrate of lead has the same medical action as the other soluble salts of lead, and is a valuable antiseptic. It has been used, also, as an excitant antiseptic to wounds, ulcers, &c., and is the basis of *Ledoyen's disinfecting liquid.*

PLUMBI NITROSACCHARAS, *Nitrosaccharate of lead.* (*Sacchar.* p. j; *Acid. nitric.* p. ij; *Aquæ* p. x.) Beat together in a porcelain dish as long as chemical action continues: dilute the liquor with water, neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water,) filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms.

Advised as a solvent of phosphatic calculi.

PLUMBI OXYDUM ALBUM, *Plumbi subcarbonas*—p. *Oxydum carbonatum per acidum acetosum*, *Plumbi subcarbonas*—p. *Oxydum fusum*, *Pl. oxydum semivitreum.*

PLUMBI OXYDUM RUBRUM, *Min'ium*, *Miltus*,

Dentox'ydum plumbi rubrum, *Superox'ydum Plumbosum*, *Plumbum oxydatum rubrum* seu *superoxydatum*, *Sandix*, *Sandzr*, *Red lead*, (F.) *Oxide de plomb rouge.* It is sometimes used to kill vermin.

PLUMBI OXYDUM SEMIVITREUM, *Plumbum oxydatum*, *Lithargyrus*, *Lithargyrum*, *Lithargyrium*, *Oxydum plumbi fusum*, *Spuma argenti*, *Semi-vitrified oxyd of lead* or *litharge*, *Calciteosia*, *Cath'nia*, (F.) *Oxide de plomb fondu*, *Oxide de plomb semivitreux*, (a yellow protoxyd of lead, prepared by heat, combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis*, *Emplastrum plumbi*, &c. Formerly, the *Litharge of gold*, *Chrysitis*, *Mus'sicot*, and *Litharge of silver*, *Almariab*, were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCARBONAS, *Carbonas plumbi* seu *plumbicus*, *Plumbi Carbonas* (Ph. U. S.), *Plumbum carbonicum*, *Pl. oxydatum carbonicum* *Magisterium plumbi*, *Oxydum plumbialbum*, *Cerussa*, *Æru'go plumbi*, *Psimmyth'ion*, *Psym'mythion*, *Simitium*, *Flake white*, *Blanca*, *Gersa*, *Îf'ides*, *Subcarbonate of lead*, *Cerussa*, *White lead*, (F.) *Carbonate de plomb*, *Blanc de plomb*, *Plomb blanc*, *Céruse*, *Blanc d'Argent*, *Blanc de Céruse*, *Blanc de Krems*, *B. de Crems*, *B. de Kremnitz*, *Craie de plomb*, (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPERACETAS, *Cerussa acetata*, *Plumbi acidulus siccus*, *P. acetatis* (Ph. U. S.), *Sal seu saccharum Saturni*, *Plumbum acetatum*, *Dulcedo Saturni*, *Acetas plumbicum crystallisatum*, *Sal plumbi*, *Sugar of lead*, *Supracetate of lead*, *Protoacetate of lead*, (F.) *Acétate acide de plomb*, *Sel ou sucre de Saturne.* (*Plumb. carb.* lbj, *Acid acetic.* cong. 1½. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on blotting-paper. Ph. L.) The acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in weak solution, cooling and sedative; in strong, stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBICUM ACETAS CRYSTALLISATUM, *Plumbi superacetatis.*

PLUMBOSUM SUPEROXYDUM, *Plumbi oxydum rubrum.*

PLUMBUM, *Molybdos*, *Molibdus*, *Saturnus*, *Capricornus*, (F.) *Plomb.* Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. S. g. 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, *Plumbi superacetatis*—p. *Album*, *Tin*—p. *Candidum*, *Tin*—p. *Carbonicum*,

Plumbi subcarbonas—p. Cinereum, Bismuthi subnitrate of—p. Hydroiodicum, Plumbi Iodidum—p. Iodatum, Plumbi Iodidum—p. Nigrum, Graphites—p. Nitricum, Plumbi nitras—p. Oxydatum, Plumbi oxydum semivitreum—p. Oxydatum carbonicum, Plumbi subcarbonas—p. Oxydatum rubrum, Plumbi oxydum rubrum—p. Superoxydatum, Plumbi oxydum semivitreum.

PLUMIERA ALBA; *Order*, Apocynaceae; a native of tropical America, has a milky juice which is cathartic.

PLUMIERA DRAS'TICA, is given in Brazil in jaundice, and chronic obstructions, [?] mixed with milk of almonds.

PLUMIERA PHAGEDENICA, is in repute in Brazil as an anthelmintic.

PLUMS, SEEDED, see Diospyros Virginiana—p. Winter, see Diospyros Virginiana—p. Yellow, see Diospyros Virginiana.

PLUNGE BATH, see Bath.

PLUNGING SIPHON, see Siphon.

PLUNKETT'S CAUSTIC FOR CANCERS, Plunkett's Ointment.

PLUNKETT'S OINTMENT, *Plunkett's Caustic for Cancers*. This empirical cancer remedy consists of *Arsenious acid*, *Sulphur*, and the powdered flowers of the *Ranunculus flammula* and *Cotula fetida*:—levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLURAL BIRTH, see Multiparous.

PLU'TEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Falz cerebri*.

PLUTONIUM, Barium.

PNEOBIOMANTIA, Docimasia pulmonum.

PNEOBIOMANTICA, Docimasia pulmonum.

PNEUMA, Air, Life. See Pneumatic Physicians.

PNEUMAPOSTEMA, *Pneumonaposte'ma*, *Abcessus pulmonum*; from *πνευμων*, 'the lung;' and *αποστημα*, 'abscess.' Abscess of the lung.

PNEUMARTHROSIS, from *πνευμα*, 'air,' and *αρθρον*, 'articulation.' Secretion of air into an articular cavity. Seen at times after acute rheumatism, but soon disappearing [?].

PNEUMATELECTASIS, Atelectasis pulmonum.

PNEUMATHEMIA, *Pneumatē'mia*, from *πνευμα*, *πνευματος*, 'air,' and *αιμα*, 'blood.' A morbid condition in which air is developed in the bloodvessels.—Cless.

PNEUMATHORAX, Pneumothorax.

PNEUMATIC, *Pneumaticus*, *Pneumatical*, (F.) *Pneumatique*, from *πνευμα*, *πνευματος*, 'life, air.' Relating to *pneuma*, air or health.

PNEUMATIC PHYSICIANS, *Pneumatici*. Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element—which they called *Pneuma*, *πνευμα*—to those of the other elementary principles. This *πνευμα* was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted.

PNEUMATICA, from *πνευμα*, *πνευματος*, 'air.' Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's system of nosology. Agents that act on the respiratory organs.—Pereira.

PNEUMATICAL, Pneumatic.

PNEUMATOCELE, Physocèle.

PNEUMATODES, from *πνευμα*, 'wind,' and

ιδος, 'resemblance.' One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMETER, Spirometer.

PNEUMATOMPHALOCELE, Pneumatomphalus.

PNEUMATOMPHALUS, *Pneumatomphalus*, from *πνευμα*, *πνευματος*, 'air,' and *ομφαλος*, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATORRHACHIS, from *πνευμα*, *πνευματος*, 'air,' and *ραχης*, 'the spine.' Accumulation of air in the vertebral canal.

PNEUMATOSE, Pneumatosis—p. *Péritonéale*, Tympaanites.

PNEUMATOSIS, *Αερωσις*, from *πνευμα*, *πνευματος*, 'air.' Flatus, (F.) *Maladie ventose*, *Pneumatose*. Flatulence. Flatulent distension of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormal collection of gaseous matters in any part of the body.

PNEUMATOSIS, Emphysema—p. Abdominis, Tympanites—p. Enterica, Colica flatulenta—p. Pericardii, Pneumo-pericardium—p. Pulmonum, Emphysema of the lungs—p. Ventriculi, et Pneumatosis enterica, Flatulence.

PNEUMATOTHORAX, Pneumothorax.

PNEUMECTASIS, Emphysema of the Lungs.

PNEUMOCACE, Necropneumonia.

PNEUMOCELE, *Hernia pulmonis*, (F.) *Hernie du pommou*. Hernia of the lung through one of the intercostal spaces.

PNEUMOCHOLOSIS, Pneumonia (bilious).

PNEUMOCHYSIS, Oedema of the lungs.

PNEUMOËCTASIE, Emphysema of the lungs.

PNEUMOGASTRIC, *Pneumogastricus*, (F.) *Pneumogastrique*, from *πνευμα*, 'the lung,' and *γαστρικ*, 'the stomach.' Belonging to the lungs and stomach.

PNEUMOGASTRIC NERVES, *Eighth pair of nerves* (Tenth pair, of some). *Par vagum*, *Pars vago*, *Nervus vago* seu *ambulatorius* seu *pneumogastricus seu decimus* seu *sympathicus medius*, *Middle sympathetic*, (F.) *Nerfs pneumogastriques ou vagues*; so called because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentia olivaria and near the corpora restiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacrum posterius: behind the glosso-pharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus—*Plexus gangliiformis*, *Ganglion of the superior laryngeal branch*, of Sir Astley Cooper. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck, it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypo-glossal, and great sympathetic nerves; and furnishes, 1, a *pharyngeal branch*, 2, a *superior laryngeal*, 3, *cardiac branches*. In the chest, it

gives off, 1, the *inferior laryngeal*, or *recurrent*, 2, the *pulmonary plexus*, and, 3, the *œsophageal branches*. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, cœliac, gastro-epiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOGRAPHY, *Pneumographia*, from *πνευμων*, 'the lung,' and *γραφη*, 'a description.' The part of anatomy that describes the lungs.

PNEUMOLITHIASIS, from *πνευμων*, 'lung,' and *λιθιασις*, 'formation of stone.' A morbid state in which calculi form in the lungs.

PNEUMOL'OGY, *Pneumologia*, from *πνευμων*, 'the lung,' and *λογος*, 'a discourse.' An anatomical treatise on the lungs. An anatomical description of the lungs.

PNEUMOMETER, Spirometer.

PNEUMOMETRY, *Pneumometria*, from *πνευμων*, 'the lung,' and *μετρον*, 'measure.' Measurement of the capacity of the lungs for air. See Spirometer.

PNEUMON, Pulmo.

PNEUMONALGIA, Angina pectoris.

PNEUMONATELECTASIS, Atelectasis pulmonum.

PNEUMONĒCROSIE, Necro-pneumonia.

PNEUMONECTASIS, Emphysema pulmonum.

PNEUMONEMPHRAXIS, from *πνευμων*, 'the lung,' and *εμφραξις*, 'obstruction.' Congestion and infarction of the lungs.

PNEUMONIA, *Peripneumonia*, *Empresma pneumoniitis*, *Pleumonia*, *Peripneumonia*, *Pneumoniitis*, *Pulmonia*, *Pulmonaria*, *Inflammatio pneumonica*, 1. *pectoris acuta* seu *pulmonum*, *Pneumostasis*, *Febris pneumonica*, *Pneumony*, *Peripneumony*, *Inflammation of the Lungs*, *Lung-fever* (vulgarly), (F.) *Inflammation des poulmons*, *Fièvre pneumonique ou péripneumonique*, *Fluxion de poitrine*, *Inflammation du parenchyme pulmonaire*. From *πνευμων*, 'the lung.' The chief symptoms of pneumonia are:—pyrexia, accompanied by pain, sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain, aggravated by the cough, which, with dyspnoea, exists throughout the disease. At first, the expectoration is difficult and painful; but, in the course of a few days, it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt in one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens,—by induration and by hepatization.

Physical Signs. **FIRST STAGE**, (F.) *Engouement*. Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. **SECOND STAGE**, (F.) *Hépatisation rouge*. When *hepatization* has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected

part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. **THIRD STAGE**, (F.) *Hépatisation grise*. When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse, mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnoea, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under,—counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

PNEUMONIA BILIOSA, P. bilious.

PNEUMONIA BILIOUS, P. biliosa, *Pneumocholosis*. Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms;—*Pneumotyphus*, *Pneumonia typhoides* seu *typhoides* seu *typhosa*, *Putrid*, *typhoid*, *adynamic*, or *erysipelatous pneumonia*.

PNEUMONIA ERSIPELATOUS, P. bilious—p. Gangrenosa, *Necropneumonia*—p. Hypostatica, *Pneumonypositas*—p. Intermittens, *Pneumonyposis*—p. Lobular, see Lobular—p. Notha, *Peripneumonia notha*—p. Pleuritis, *Pleurpneumonia*—p. Putrid, P. bilious—p. Typhoid, P. bilious—p. Typhoid, P. bilious—p. Typhosa, P. bilious, *Necropneumonia*—p. Vesicular, *Bronchitis vesicular*.

PNEUMONIC, Pulmonic.

PNEUMONICA. From *πνευμων*, 'the lung.' Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class *Pneumatica* of Good.

PNEUMONIC'ULA, diminutive of pneumonia. A slight inflammation of the lung.

PNEUMONICUS, Pulmonic.

PNEUMONIE, Pneumonia—p. *Disséminée*, see Lobular—p. *Lobulaire*, see Lobular—p. *Mamelonnée*, see Lobular.

PNEUMONIE DES AGONISANTS, *Pneumonie hypostatique*. The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

PNEUMONITIC, *Pneumoniticus*. Of, or belonging to pneumonitis, or inflammation of the lungs.

PNEUMONITIS. Pneumonia.

PNEUMONOCARCINOMA, from *πνευμων*, 'the lung,' and *καρκινωμα*, 'cancer.' Cancer of the lungs.

PNEUMONOCE'LE, from *πνευμων*, 'the lung,' and *κηλη*, 'rupture.' Hernia of the lung.

PNEUMONOCE'LE DIAPHRAGMATICA INTER'NA. Hernia of the lung through the diaphragm.

PNEUMONOCELE EXTER'NA seu **THORAC'ICA**. Hernia through the parietes of the chest.

PNEUMONOCELE THORACICA, Pn. externa.
 PNEUMONŒDEMA, Œdema of the lungs.
 PNEUMONOMELANOSIS, see Melanosis.
 PNEUMONOMETER, Spirometer.
 PNEUMONOPHTHISIS, Phthisis pulmonalis.
 PNEUMONOPHTHOE, Phthisis pulmonalis.
 PNEUMONOPLEURESIS, Pleuroperipneumony.
 PNEUMONOPLEURITIS, Pleuroperipneumony.
 PNEUMONORRHAGIA, Hæmoptysis.
 PNEUMONORRHEA, Hæmoptysis.
 PNEUMONOSCIRRHUS, from πνευμων, 'the lung,' and σκίρρος, 'induration.' Induration of the lungs.
 PNEUMONOSSES, *Pneumoses*.
 PNEUMONY, Pneumonia.
 PNEUMONYPOSTASIS, *Pneumonia hypostatica*. Pneumonia in a depending portion of the lung, caused by lying on the back.
 PNEUMOPÉRICARDE, Pneumo-pericardium.
 PNEUMO-PERICARDIUM, *Pneumo-pericarditis*, *Pneumato'sis pericard'ii*, (F.) *Pneumopéricarde*, from πνευμα, 'air,' and περικαρδιον, 'pericardium.' Lænnec designates, under this name, the effusion of air into the cavity of the pericardium.
 PNEUMOPHTHISIS, Phthisis pulmonalis.
 PNEUMOPHYMATA, Tubercles of the lungs.
 PNEUMOPLEURESIS, Pleuroperipneumony.
 PNEUMOPHTHOE, Phthisis pulmonalis.
 PNEUMORRHAGIA, Hæmoptysis — p. Interna, Hæmatothorax.
 PNEUMOSEPSIS, Neeropneumonia.
 PNEUMOSSES, from πνευμων, 'the lung.' A term under which Alibert comprises every morbid affection of the lungs.
 PNEUMOTHORAX, *Pneumathorax*, *Pneumatothorax*, *Emphysema pectoris*, *Asthma ærii* seu *emphysematicum*, *Dyspnoea pneumatica* seu *physiothorac'ica*, *Physiothorax*, *Ærothorax*, *Æropleurie* (Piorry), from πνευμα, 'air,' and θωραξ, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air, a liquid is effused, — *Hydropneumothorax*. The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no rale of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonances are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *tintement métallique*. The presence of liquid can always be ascertained by auscultation. See Emphysema of the lungs.
 PNEUMOTOMY, *Pneumotomia*, from πνευμων,

'the lung,' and τεμνω, 'I cut.' Dissection of the lungs.

PNEUMOTYPHUS, Pneumonia, typhoid.
 PNEUMOTYPO'SIS, *Pneumonia intermit-tens*, from πνευμων, 'the lung,' and τυπος, 'a stamp, a type.' Pneumonia characterized by periodicity.
 PNEUOBIBIOMANTIA, Docimasia pulmonum.
 PNEUSIOBIOGNOSIS, Docimasia pulmonum.
 PNEUSIOBIOSCOPE, Docimasia pulmonum.
 PNEUSIS, Respiration — p. Pertussis, Pertussis — p. Singultus, Singultus — p. Tussis, Tussis.
 PNEUSOMETER, Spirometer.
 PNIGALION, Incubus.
 PNIGMOS, Orthopnoea, Strangulation.
 PNIGOPHOBIA, Angina pectoris, Suffocation.
 PNLX, Orthopnoea, Strangulation.
 PNOE, Aura.
 PNEUM. A nostrum of Dr. Samuel Hahnemann, the founder of the 'Homœopathic System,' which consisted — it is said — of borax only!
 PNOCOLYTICUS, Asthmatic.
 POAD-MILK, Colostrum.
 POCHÉ DES EAUX, see Liquor Amnii, and Parturition.
 POCK, from Teut. pocka, 'pock or little pouch.' A pustule of smallpox.
 POCK-ARR, Pock-mark, see Cicatrix — p. Kine, Vacina.
 POCKFRETTE, see Pockmark.
 POCKHOLE, Pockmark.
 POCKMARK, *Pockhole*, (Prov.) *Pock-arr*, *Scrobiculus* seu *Cicatrix Variolæ*. The mark or *pit* or *pitting* left from a smallpox pustule. One pitted with smallpox is said to be *pockfretten* or *pockfreden*.
 POCKY. Infected with, or appertaining to, or resembling, smallpox or syphilis.
 POCULUM ABSINTHIA'TUM. This was regarded, in remote ages, as a wholesome beverage: the *absinthium*, or 'wormwood,' being supposed to act as an antidote to drunkenness.
 POCULUM AMATORIIUM, Philter — p. Diogenis, Palm — p. Emeticum, Goblet, emetic.
 POD'AGRA, *Podarthrit'is*, *Podorrhenu'ma*, *Podalgia*, from πους, ποδος, 'the foot,' and αγρα, 'seizure.' Pain which attacks the feet. Gout, situate in the articulations of the foot. It has, also, been used in a more extensive signification synonymously with *gout*.
 PODAGRA ABERRANS, Gout, (wandering) — p. Arthritis, Gout — p. Retrograda, Gout, (retrograde.)
 PODAGRARIA, Ligusticum podagraria — p. Ægopodium, Ligusticum podagraria.
 PODAG'RIC, *Podag'ric*, *Podag'ricus*, *Arthriticus*, *Arthrit'ic*, *Gouty*, (F.) *Goutteur*. Relating or belonging to gout. Affected with, or liable to gout.
 PODALGIA, Gout, Podagra.
 PODALYRIA TINCTORIA, Sophora tinctoria.
 PODANENCEPHALIA, see Podencephalus.
 PODARTHTRITIS, Podagra.
 PODARTHROC'ACĒ, from πους, ποδος, 'the foot,' αρθρον, 'an articulation,' and κακος, 'bad.' Caries of the articulation of the foot.
 PODENCEPHALIA, see Podencephalus.
 PODENCEPH'ALUS, *Podanenceph'alus*, from πους, ποδος, 'the foot,' and κεφαλη, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of

monstrosity is termed *Podanencephalia*, or more properly, *Podencephalia*.—I. G. St. Hilaire.

PODEX, Anus, Nates.

PODŒDE'MA, from *πους*, *ποδος*, 'foot,' and *οίδημα*, 'a swelling.' Edema of the foot.

PODOL'OGY, *Podolog'ia*, from *πους*, *ποδος*, 'the foot,' and *λογος*, 'a discourse.' A description of the foot. A treatise on the foot.

PODOPHYLLUM PELTA'TUM, *Podophyllum*, *Anapodophyllum Canadense*, *May-apple*, *Mandrake*. Ord. Berberidaceæ. Sex. Syst. Polyandria Monogynia; from *πους*, *ποδος*, 'a foot,' and *φυλλον*, 'a leaf,' in reference to the shape of the leaf. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has also been used as an anthelmintic.

PODOPHYLLUM MONTANUM, *Mountain May-apple*, *Mandrake*, *Wild Lemon*, *Ducksfoot*, *Raccoon Berry*, *Yellow Berry*, *Ground Lemon*, has the same properties.

PODORRHEUMA, Podagra.

PODOTHE'CA, from *πους*, *ποδος*, 'a foot,' and *θηκη*, 'a receptacle, a sheath.' The cuticle of the foot. An anatomical preparation. *Chirotheca*, has been used for the cuticle of the hand.

POËLETTE, Cup, Palette.

POË'PHAGUS, from *ποιον*, or *ποια*, 'a plant, an herb,' and *φαγω*, 'I eat.' One who subsists on herbs or vegetables. The act of subsisting on feeding on herbs or vegetables is called *Pœphag'ia*. Hence Strabo calls the Irish *ποηφαγοι*.

POGON, Beard.

POGONI'ASIS, *Pogo'nia*, from *πωγων*, 'the beard.' A female beard. Also, great strength or quantity of beard. A female having a beard—*Vira'go*.

POGO'NIUM, *πωγωνιον*, diminutive of *πωγων*, 'beard.' A weak or small beard.

POGONOL'OGY, *Pogonolog'ia*, from *πωγων*, 'a beard,' and *λογος*, 'a description.' A description of, or treatise on, the beard.

POGOSTEMON INTERMEDIUS, P. Patchouli.

POGOSTEMON PATCHOULI, P. *Suavis* seu *intermedius*, *Pucha-Pat*, *Patchouli*. Nat. Ord. Labiate. Native of Penang and the Malayan peninsula. The oil is used as a perfume. The distilled oil is used for the same purpose.

POGOSTEMON SUAVIS, P. Patchouli.

POHON ANTIAR, Upas—p. Upas, Upas.

POI. A favourite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo—*Arum esculentum*.

POIDS ET MÉSURES, Weights and measures.

POIGNÉE, Manipulus.

POIGNET, Carpus.

POIL, Galactocœle, Hair.

POILETTE, Cup.

POILS, see *Typha latifolia*.

POING, Fist.

POINT, Stitch.

POINT, BLISTERING. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between the stages of high excitement and collapse, in which blisters will—he thought—usually produce unequivocally good effects.

POINT DE COTÉ, Pleurodynia.

POINTS LACRYMAUX, Lachrymalia puncta.

POIRE, see *Pyrus communis*.

POIREAU, Allium porrum, Verruca.

POIRER, *Pyrus communis*.

POIS, Pisum—p. à *Cautère*, see *Fonticulus*—p. *Chiche*, *Cicer arietinum*—p. *Cultivé*, Pisum—p. à *Gratter*, *Dolichos pruriens*—p. *Patate*, *Dolichos tuberosus*.

POISON, *Phar'macon*, *Phar'macum*, *Tox'icum*, *Vene'num*, *Virus*, *Delete'rium*, *Venena'tion*, (F.) *Poison*. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of organs. Hence we speak of *fever poison*, *cholera poison*, &c. Poisons exist in the three kingdoms of nature; but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c.; whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'RITATING, CORRO'SIVE, or ESCHAROT'IC, such as the concentrated acids and alkalis; mercurial, arseniacal, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOT'IC; those that act particularly upon the brain; as hyoseyamus, opium, &c., but without inflaming the organ with which they come in contact. 3. NARCOT'ICO-ACRID or ACRO-NARCOT'IC;—those that act on the brain, but, at the same time, irritate the parts to which they are applied; as aconite, belladonna, &c. 4. SEPTIC or PUTRES'CENT;—those furnished by the animal kingdom. See *Venom* and *Virus*. Various classifications, of a similar character, have been recommended by different toxicologists; but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following table, which exhibits a *coup d'œil* of the chief poisons, with most of the circumstances of importance connected with them, is not free from these objections

TABLE, EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

N. B. In all cases the Stomach-Pump should be used as soon as possible.

I. INORGANIC POISONS.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
ACIDS. — <i>Acetic Acid.</i> — <i>Citric Acid.</i> — <i>Muriatic Acid.</i> — <i>Nitric Acid.</i> — <i>Sulphuric Acid.</i> — <i>Tartaric Acid.</i> — <i>Oxalic Acid.</i>	The acids, generally, are strong corrosive poisons. Sour, acid taste, burning in the throat, which is increased by pressure; swallowing, or coughing; eructation, and excruciating pain in the stomach; more or less congestion of the lining membranes of the mouth and <i>primæ viæ</i> ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.	The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions: for the acetic, citric, muriatic, sulphuric, and tartaric acids they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk, on account of the great heat which is produced by their mixture. Subsequent inflammation to be treated by ordinary means.	<i>Sulphuric acid</i> is known by a white precipitate with any salt of baryta, insoluble in nitric acid. <i>Muriatic acid</i> is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light. <i>Nitric acid</i> gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid. <i>Acetic acid</i> exhales the odour of vinegar. <i>Citric acid</i> blackens when heated. <i>Tartaric acid</i> precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water. <i>Oxalic acid</i> gives a white precipitate with lime-water, which, when heated, is converted into carbonate of lime.
<i>Prussic Acid.</i> — <i>Oil of Bitter Almonds.</i> — <i>Laurel Water.</i>	Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death.	The carbonates of the alkalies and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach. Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold <i>douche</i> to the head has been recommended.	<i>Prussic acid</i> exhales the odour of peach kernels; forms a white precipitate with nitrate of silver neutralized with an alkali, gives a blue precipitate with the persalts of iron.
ALKALIES and their SALTS. — AMMONIA, <i>Strong Liquor of Water of.</i> — <i>Muriate of Ammonia or Sal Ammoniac.</i> — POTASSA. <i>Caustic Potassa, and Liquor Potassa.</i> — <i>Carbonate of Potassa, or Pearl Ash, and Salt of Tartar.</i> — <i>Nitrate of Potassa or Salpêtre.</i> — <i>Sulphuret of Potassium or Liver of Sulphur.</i> — SODA.	Violent, caustic, acid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hicough; violent colic pains, with purging of bloody stools and membranous flakes; death.	The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalies and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalies, and therefore destroy their caustic effects.	The alkalies are known by their action on turmeric paper; restoring the colour of litmus, which has been reddened by an acid. Carbonates are known by their effervescence with an acid: some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime.
EARTHS and COMPOUNDS. — BARYTA. <i>Carbonate of Baryta.</i> — <i>Chloride of Baryum.</i> — <i>Nitrate of Baryta.</i> — LIME.	Analogous to those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhœa; excessive muscular debility, headache, convulsions death. Lime differs from baryta in being a pure irritant.	Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks. Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.	Nitrate of potassa decomposes and deflagrates when thrown on hot coals. Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.
		The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid in soda-water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.	Baryta and its salts invariably give a white precipitate, insoluble in acid, with a soluble sulphate, Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid or a soluble carbonate. The same of baryta.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p>ALCOHOL. — <i>Brandy, Wines, and all Spirituous Liquors.</i></p>	<p>Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.</p>	<p>A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active glysters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.</p>	
<p>VOLATILE OILS. — <i>Creosote.</i> <i>Dippel's Animal Oil.</i> — <i>Oil of Tar.</i> — <i>Oil of Tobacco.</i> — <i>Oil of Turpentine.</i> — <i>Fusel Oil.</i></p>	<p>General action, that of irritant poisons. Burning pain, vomiting, pungent taste, purging &c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.</p>	<p>Creosote is immediately coagulated by albumen. Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.</p>	<p>No better mode of recognizing these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creosote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour.</p>
<p>GASES. — <i>Carbonic Acid, or Fixed Air.</i> — <i>Carbonic Oxide.</i> — <i>Fumes of Burning Charcoal.</i> — <i>Chlorine.</i> — <i>Sulphuretted Hydrogen.</i></p>	<p>Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons, in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy, or narcotic poisoning.</p>	<p>The antidotes to chlorine are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration.</p>	<p>Chlorine is recognized by its peculiar odour and bleaching properties. Sulphuretted hydrogen, by its fetid smell, and the rapid blackening of lead. Carbonic acid, by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.</p>
<p>IODINE. — <i>Iodide of Potassium.</i></p>	<p>Irritant symptoms; burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.</p>	<p>Iodine combines with starch, and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.</p>	<p>Iodine is known by its odour, and the formation of a blue precipitate, when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.</p>
<p>METALS. — ANTIMONY. — <i>Tartar Emetic.</i> — <i>Chloride, or Butter of Antimony.</i> — <i>Oxide of Antimony.</i></p>	<p>Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.</p>	<p>If vomiting have not been produced, it should be brought about by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly; powdered yellow bark may be used, until the infusion is prepared.</p>	<p>Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalis produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid form, it may be known by the formation of white fumes, when heated, which reddens litmus. It may also be converted into chloride, and then precipitated by adding water.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p>ARSENIC. <i>Arsenious Acid, or White Arsenic.</i> <i>Orpiment or Yellow Sulphuret of Arsenic.</i> <i>King's Yellow.</i> <i>Realgar, or Red Sulphuret of Arsenic.</i> <i>Fly Powder.</i> <i>Fowler's Solution.</i> <i>Arsenical Paste.</i> <i>Arsenical Soap.</i> <i>Arsenite of Copper.</i> <i>Scheele's Green.</i></p>	<p>Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching; vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited, greenish or yellowish, sometimes streaked with blood; diarrhœa; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.</p>	<p>The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the <i>white arsenic</i> has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water, in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.</p>	<p>If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammoniacsulphate of copper. 2d. Ammoniac-nitrate of silver. (<i>Hume's Test</i>) 3d. Sulphuretted hydrogen gas. The first will produce a <i>green</i> precipitate; second, a <i>pale yellow</i> precipitate; third, a <i>bright yellow</i> precipitate, if arsenic be present. A portion of the powder, or one of these precipitates, carefully and thoroughly dried, is then to be mixed with charcoal and excised carbonate of soda, to be placed in a small glass tube, closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube, forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.</p> <p>If organic matter be present, it must be entirely destroyed, by heating the substance with nitromuriatic acid. After this has been done, and a clear, transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (<i>Marsh's Test</i>.)</p> <p>Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an iron-gray coating, from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube, when arsenious acid will be sublimed in nitrate octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates, and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead-shot. <i>Reinsch's Test</i>.</p>
<p>BISMUTH. <i>Nitrate of Bismuth.</i> <i>Pearl Powder.</i> <i>Oxide of Bismuth.</i></p> <p>COPPER. <i>Sulphate of Copper</i> <i>Blue Vitriol.</i> <i>Acetate of Copper,</i> <i>Verdigris.</i> <i>Carbonate of Copper.</i> <i>Blue Verditer.</i> <i>Arsenite of Copper</i> <i>Scheele's Green.</i> <i>Food cooked in dirty copper vessels, or pickles made green by copper.</i></p>	<p>Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hicough, disagreeable metallic taste; vomiting; cramps; delirium; death.</p> <p>Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.</p>	<p>Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding; glysters; fomentations to be employed on the general principles of treatment for inflammatory symptoms.</p> <p>Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should not be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.</p>	<p>Bismuth is known by the formation of a white precipitate, when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.</p> <p>The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p>GOLD. — <i>Chloride of Gold.</i> — <i>Fulminating Gold.</i></p>	<p>Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.</p>	<p>The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.</p>	<p>Chloride of gold is very readily decomposed, and the gold separated in a metallic state. Proto-sulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble, except in nitro-muriatic acid.</p>
<p>IRON. — <i>Sulphate of Iron,</i> <i>Copperas.</i> <i>Green Vitriol.</i> — <i>Chloride of Iron.</i></p>	<p>Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin, and feebleness of the pulse.</p>	<p>Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.</p>	<p>Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalis or their carbonates.</p>
<p>LEAD. <i>Acetate of Lead.</i> <i>Sugar of Lead.</i> <i>Carbonate of Lead.</i> <i>White Lead.</i> <i>Red Oxide, or Red Lead.</i> <i>Litharge.</i> — <i>Wines sweetened by Lead.</i> <i>Water which has been kept in Lead vessels.</i> <i>Acid food, cooked or left standing in vessels glazed with Lead.</i></p>	<p>Irritation of the alimentary canal; spasm; nervous symptoms; paralysis, either partial or complete. When taken for some time, in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.</p>	<p>Sulphate of magnesia and phosphate of soda are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form, or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis.</p>	<p>Soluble salts of lead yield a white precipitate with sulphate and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.</p>
<p>MERCURY. <i>Corrosive Sublimate.</i> — <i>Cyanide of Mercury.</i> — <i>Nitrate of Mercury.</i> — <i>White Precipitate.</i> — <i>Red Oxide, or Red Precipitate.</i> — <i>Sulphate, or Turbith Mineral.</i> — <i>Vermilion, or Red Sulphuret.</i></p>	<p>Violent symptoms of irritant poisoning; harsh metallic-astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs, and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze; stupor, convulsions and death.</p>	<p>Albumen, in some form, must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold, finely mixed in dust, with fine iron filings. (?)</p>	<p>The free alkalis differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish ore; ammonia, a white, lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced, which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalis. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda, when the metallic mercury will sublime, and may be collected in a globule.</p>
<p>SILVER. <i>Nitrate of Silver, or Lunar Caustic.</i></p>	<p>Those of other irritant poisons.</p>	<p>Chloride of sodium, or common salt, immediately decomposes this substance, and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.</p>	<p>Nitrate of silver is distinguished by the formation of a white precipitate, insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.</p>
<p>TIN. <i>Chloride of Tin</i> <i>Solution of Tin,</i> <i>used by Dyers.</i> <i>Oxide of Tin, or Putty Powder.</i></p>	<p>The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.</p>	<p>Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.</p>	<p>The chloride precipitates vegetable coloring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalis; with sulphuretted hydrogen gas a brown precipitate.</p>
<p>ZINC. — <i>Sulphate of Zinc.</i> <i>White Vitriol.</i> — <i>Acetate of Zinc.</i></p>	<p>Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.</p>	<p>The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.</p>	<p>A white precipitate is thrown down by the free alkalis from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
PHOSPHORUS.	Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhoea, tenderness and tension of the abdomen.	An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.	Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.
GLASS or ENAMEL.	If taken in very coarse powder, it produces irritation and inflammation of the bowels.	Large quantities of crumb of bread should be eaten, to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.	

II. ORGANIC POISONS.

Tree in Java. <i>Veratrum album</i>. White Hellebore. <i>Veratrum viride</i>. American Hellebore. <i>Woorara</i>. War Poison of Guiana. <i>Zea mays</i>. Maize (diseased).</p>	<p>The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.</p>	<p>The stomach to be effectually evacuated, by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given before the poison is expelled, and it is desirable that but little fluid of any kind should be administered.</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloïds generally</p>
<p style="text-align: center;">NARCOTIC.</p> <p><i>Actæa spicata</i>. Baneberry. <i>Amygdalus communis</i>. Bitter Almond. <i>Amygdalus Persica</i>. Peach. <i>Gelsemium nitidum</i>. Mountain Ivy. <i>Lactuca virosa</i>. Strong-scented Lettuce. <i>Opium</i>, and its proximate principles. <i>Papaver somniferum</i>. Poppy. <i>Paris quadrifolia</i>. Herb Paris. <i>Prunus Caroliniana</i>. Wild Orange. <i>Prunus lauro-cerasus</i>. Cherry Laurel. <i>Prunus nigra</i>. Black Cherry. <i>Prunus padus</i>. Cluster Cherry. <i>Prunus Virginiana</i>. Wild Cherry. <i>Solanum dulcamara</i>. Bitter-sweet. <i>Sorbus acuparia</i>. Mountain Ash. <i>Taxus baccata</i>. Yew.</p>		
<p style="text-align: center;">POISONOUS MUSHROOMS.</p> <p><i>Agaricus muscarius</i>. Fly Agaric. <i>Agaricus piperatus</i>. Pepper Agaric. <i>Agaricus necator</i>. Deadly Agaric. <i>Agaricus bulbosus</i>. Bulbous Agaric. <i>Agaricus chantarellus</i>. Champignon.</p>	<p>Nausea, heat, and pain in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated</p>	<p>The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with small</p>

POISONS.	SYMPTOMS.	TREATMENT.
	pupil, and stupor; cold sweats, and death. Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.	quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.

2. ANIMAL POISONS.

	SYMPTOMS.	TREATMENT.
POISONOUS FISH. <i>Balistes monoceros.</i> Old wife. <i>Cancer astacus.</i> Crawfish. <i>Cancer rucicolus.</i> Land Crab. <i>Chipea thryssa.</i> Yellow-billed Sprat. <i>Coracinus fuscus major.</i> Gray Snapper. <i>Coracinus minor.</i> Hyne. <i>Coryphæna splendens.</i> Dolphin. <i>Mormyra.</i> Blue Parrot Fish. <i>Muræna major.</i> Conger Eel. <i>Mytilus edulis.</i> Mussel. <i>Ostracion globellum.</i> Smooth Bottle Fish. <i>Perca major.</i> Barracuda. <i>Perca venenosa.</i> Grooper. <i>Perca venenata.</i> Rock Fish. <i>Physalia.</i> Portuguese Man of War. <i>Scomber caruleus.</i> Spanish Mackerel. <i>Scomber maximus.</i> King Fish. <i>Scomber thynnus.</i> Bonetta. <i>Sparus chrysops.</i> Porgée. <i>Tetrodon scleratus.</i> Tunny. <i>Tetrodon ocellatus.</i> Blower.	In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria), and in many cases death.	An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.
POISONOUS SERPENTS. <i>Boa croataloides.</i> Copperhead. <i>Ceuchris mockeson.</i> Mockeson. <i>Cerastes nasicornis.</i> Horned Viper of Western Africa. <i>Coluber berus.</i> Viper. <i>Coluber prester.</i> Black Viper. <i>Crotalus</i> , (5 species) Rattle Snake <i>Scytale piscicorus.</i> Water Viper.	A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintness, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.	A cupping-glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn, to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended.
CANTHARIS VESICATORIA. Spanish, or Blistering Fly. <i>Lytta vittata.</i> Potato Fly.	Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.	Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment. Camphor dissolved in oil may be rubbed over the belly and the thighs.
VENOMOUS INSECTS <i>Tarantula.</i> Scorpion. <i>Vespa crabro.</i> Hornet. <i>Vespa vulgaris.</i> Wasp. <i>Apis mellifica.</i> Bee. <i>Culex pipiens.</i> Gnat. <i>Cæstrus bovis.</i> Gad-fly.	In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.	Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.

	SYMPTOMS.	TREATMENT.
SALIVA OF THE RABID DOG.	At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, bileously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.	Hydrophobia is more easily prevented than cured; indeed, it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success. The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and, after the most persevering abluition, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation. No milder discipline can ensure safety.

The most energetic poisons are used therapeutically, and often with considerable advantage. They have, of course, to be administered in extremely small doses, to avoid producing poisoning.

POISON, ARROW, see Arrow poison — p. Berry tree, *Melia azedarach* — p. Hemlock, *Conium*.

POISON, ITALIAN, *Liquor arsenicalis* — p. Morbid, *Virus*.

POISON OAK, *Rhus toxicodendron* — p. Root, *Cicuta maculata*.

POISON, SAUSAGE, *Allantotoxium* — p. Vegetable, *Upas*.

POISON VINE, *Rhus radicans*.

POISONING, *Venefic'ium, Toxicatio, Intoxicatio, Entoxismus, Entoxicismus, Pharmaceutia, Malefic'ium, Venenatio, (F.) Empoisonnement, Intoxication*. The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

Poisoning has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innoxious. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

Secret poisoning was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POISONOUS, *Toxical, Noxius, (F.) Toxique, Vénéneux*. Having the qualities of a poison.

POISONS, ACRO-NARCOTIC, P. narcotico-acrid — p. Corrosive, P. acrid — p. Escharotic, P. acrid — p. Irritating, P. acrid — p. Putrescent, P. septic. See Poison.

POITRINAIRE, *Phthisicus*.

POITRINE, *Thorax*.

POIVRE D'EAU, *Polygonum hydropiper* —

p. de Guinée, Capsicum annuum — *p. d'Inde, Capsicum annuum* — *p. de Jamaïque, see Myrtus pimenta* — *p. Long, Piper longum* — *p. de Moine, Vitex* — *p. Noir, Piper nigrum* — *p. Petit, Vitex* — *p. à Quene, Piper cubeba* — *p. Sauvage, Vitex*.

POIX BLANCHE, see *Pinus abies* — *p. de Bourgogne, see Pinus abies* — *p. Grasse, see Pinus abies* — *p. Janne, see Pinus abies* — *p. Liquide, see Pinus sylvestris* — *p. Minérale, Pissasphaltum* — *p. Minérale scoriacée, Asphaltum* — *p. Navale, see Pinus sylvestris* — *p. Noire, see Pinus sylvestris*.

POKE, *Phytolacca decandra* — p. Indian, *Veratrum viride* — p. Stink, *Dracontium foetidum* — p. Weed, *Phytolacca decandra, Veratrum viride*.

POLANIS'IA GRA'VEOLENS, *Clammy weed, Stinkweed, Wormweed, Clammy Mustard, False mustard*, from *πολις*, 'many,' and *ανισος*, 'unequal,' in reference to its stamens. An indigenous plant, *Ord. Capparidaceæ, Sex. Syst. Dodecandria Monogynia*, which blossoms in summer, and is found in every part of North America. To the whole plant have been ascribed anthelmintic properties.

POLAR PLANT, *Silphium laciniatum*.

POLECAT WEED, *Dracontium foetidum*.

POLEMONIUM REPTANS, *False Jacob's Ladder, Greek Vale'rian, Sweet-root. Order, Polemoniaceæ*; indigenous, flowering in May; has been used as a diaphoretic and expectorant.

POLENTA, *Alphiton*.

POLES, *Chalazæ*.

POLEY MOUNTAIN, OF CANDY, *Teucrium Creticum* — p. Mountain of Montpellier, *Teucrium capitatum*.

POLIA'TER, from *πολις*, 'a town,' and *ιατρος*, 'a physician.' A physician exercising his profession in a town, by the appointment of the government. — *Castelli*.

POLICE, MED'ICAL, *Politi'a medic'a, Polito-biotherapi'a, Medici'na polit'ica, Ordo medic'inalis, Polit'ical medic'ine, (F.) Police médicale ou sanitaire*. Hygienic rules established, or which ought to be established, for the prevention of disease, and to contribute to the progress of medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

POLICLIN'ICA, from *πολις*, 'a town,' and *κλινη*, 'a bed.' Treatment of diseases in a town.

POLIO'SIS, *Tricho'sis polio'sis, Spilo'sis poli-*

o'sis, Pol'iotes, Cunit'ies, from *πολιος*, 'hoary, gray.' Hair prematurely gray or hoary. The state of becoming gray, *gray-haired, Poliot'richia*.

POLIOTES, Poliosis.

POLIOTRICHOS, see Poliosis.

POLITIA MEDICA, Police, medical.

POLITOBIOThERAPIA, Police, medical.

POLIUM CAPITATUM, Teucrium capitatum — p. Creticum, Teucrium Creticum — p. Montanum, Teucrium capitatum.

POLL, Head.

POLLEN, (L.) *Pollen, Pollis, παλη*, 'dust.' The fecundating dust contained in the anthers of flowers, which is dispersed on the stigma. It is conveyed to the ovary through the stigma by the *Pollen tube, Tubus pollin'icus*, (F.) *Boyan pollinique*.

POLLEX, genitive *Poll'icis, Au'ticheir, Prom'tanas, Dig'itum primum seu magnum, Allus pollex, Thumb*, (Prov.) *Thame, Tom-toe*, from *pollere*, 'to have much strength.' (F.) *Ponce*. The first of the fingers in size and strength. It is asserted that the term *poltroon* is derived from *poll'icē tranco'to*; — the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

POLLEX, see *Digitus*.

POLLEX PEDIS, *Hollus, Halluz*. The great toe.

POLLINCTOR, *Pollin'cter*, (L.) In antiquity, an anointer, dresser, or embalmner of the dead.

POLLINCTURA, Embalmng.

POLLIS, Pollen.

POLLOCK, see *Oleum jeceoris aselli*.

POLLOD'IC, *Pollod'icus*; from *πολυς*, 'many,' and *ὁδος*, 'a way.' An epithet proposed by Dr. Marshall Hall for a course of nervous action proceeding from one point, in many directions, to every other.

POLLOM, LITTLE, *Polygala paucifolia*.

POLLUTION, *Pollu'tio*, from *polluo, pollutum*, 'to profane.' The excretion of the seminal liquor or sperm, or the production or orgasm in male or female, at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturbation*, (F.) *Sonillure*; when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution, Erection'o'sis, Onco'rog'us, Onco'rog'us, Onco'rog'us, Erection'o'sis, Erection'o'sis, Spermato'cle'm'ia, Spermato'cle'p'sis, Spermato'cle'p'sis, Spermato'lip'sis, Gonorrhoea dim'ictum seu onco'rog'us seu vera seu libidin'o'sis, Proflu'vium sem'inis, Spermatorr'hoe'a, Par'vinit'ia kalax, Night pollution*, (F.) *Pollution involontaire*.

POLLUTION INVOLONTAIRE, Pollution — p. Nocturnal, Pollution — p. Self, Masturbation — p. Voluntary, Masturbation.

POLONYCH'IA, *Polyonych'ia*, from *πολυς*, 'many,' and *ονυξ, onyxos*, 'a nail.' The condition of having supernumerary nails, — a rare congenital monstrosity.

POLT-FOOT, see *Kyllosis*.

POLY, *Πολυς, πολυς*, 'many, much, full.' Hence: POLYACTIUM TRISTE, *Pelargonium triste*.

POLYÆMIA, Plethora.

POLYÆMIC, Plethoric.

POLYÆMICUS, Plethoric.

POLYANHÆMIA, Anæmia.

POLYANHÆMIE, Anæmia.

POLYANTHES TUBEROSA, *Amaricachu*, *Ord. Liliacæ*. The root is cut into slips and laid upon the bites of serpents by the Peruvian Indians.

POLYBLENNIA, from *poly*, and *βλεννα*, 'mucus.' Excessive secretion of mucus.

POLYBREPPIA, Pregnancy, complex.

POLYCARP'Æ, from *poly*, and *καρπος*, 'fruit.'

A division of cutaneous diseases of the family *Eczematosen*, of Fuchs, including *Psoriasis, Lichen, Herpes*, and *Impetigo*.

POLY'CERAS, from *poly*, and *κερας*, 'horn.'

A monstrous animal having many horns. — Gurlt.

POLYCHOL'IA, *Perichol'ia, Hyperchol'ia*, from *poly*, and *χολη*, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

POLYCHREST'US, from *poly*, and *χρηστος*, 'useful.' Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

POLYCHRONIUS, Chronic.

POLYCHY'LIA, from *poly*, and *χυλος*, 'juice.' *Polychy'mia*. Fulness of juices.

POLYCHYMIA, Polychylia — p. Sanguinea, Plethora.

POLYCLIN'ICA, from *poly*, and *κλινη*, 'bed.' Provided with many beds; — as an hospital.

POLYCOR'IA, from *poly*, and *κορη*, 'the pupil.' The state in which there is more than one pupil. — Von Ammon.

POLYCRINOSES, see *Profluvium*.

POLYCYE'SIA, *Polycy'e'sis*, from *poly*, and *κρησις*, 'pregnancy.' Frequent or quickly recurring pregnancies: also, compound pregnancy.

POLYCYTHÆMIA, from *poly*, *κυτος*, 'a cell,' and *αιμα*, 'blood.' A condition of the blood in which there is an increase of the red corpuscles.

POLYDAC'TYLUS, *Perissodac'tylus*, from *poly*, and *δακτυλος*, 'a finger.' One who has a supernumerary finger or fingers, or toes.

POLYDIP'SIA, from *poly*, and *διψη*, 'thirst;' *Sitis morbo'sa seu inten'sa, Polydip'sis, Dipso'sis avens, Excessive thirst*, (F.) *Soif excessive*. A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called *Polydipsia*.

POLYDIP'SIA, from *poly*, and *γαλα*, 'milk;' *P. vulg'aris, Common Milkweat. Ord. Polygalacæe. Sez. Syst. Diadelphia Octandria*. The leaves are bitter, and are used in the same cases as the *Polygala amara*.

POLYDIP'SIA, *P. amarel'la seu vulg'aris, Bitter Milkweat*. A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubel'la*, or *Bitter Polygala* of the United States, has the same virtues.

POLYDIP'SIA, *P. amarella, P. amara* — p. Bitter, see *P. amara* — p. *Grandiflora, P. senega*.

POLYDIP'SIA, *P. paucifolia, Triclisper'ma grandiflora, Dwarf Milkweat, Little Pollom, Evergreen Snake-root*, (F.) *Polygala naine*, possesses the same properties as *P. Senega*.

POLYDIP'SIA, *P. virginica seu grandiflora, Sen'eka, Rattlesnake Milkweat, Senega or Rattlesnake root*, (F.) *Polygale de Virginie ou de Seneka*. The bark is the active part of the root, *Senega* (Ph. U. S.). Its taste is at first acid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got nuder. It has been given also in humoral asthma, chronic rheumatism, dropsy, erump, amenorrhœa, &c. According to Pechier, it contains three particular principles, *Polyg'altine* or *Sen'e-gine, Isoll'usine*, and *Polyg'altic Acid*. Dose, gr. 30 to 40 of the powder.

POLYDIP'SIA, *Serpentaria*. A shrub of Caffra-ria, the root of which is considered by the natives as a sure antidote against the bites of venomous serpents.

POLYGALA VIRGINIANA, P. senega — p. Vulgaris P. amara.

POLYGALACTIA, *Polyg'alia*, from *poly*, and *γαλα*, *γαλακτος*, 'milk.' Superabundant secretion of milk; galactia.

POLYGALE NAINÉ, *Polygala paucifolia* — p. de *Virginie*, *Polygala Virginiana*.

POLYGALIA, *Polygalactia*.

POLYGALINE, see *Polygala senega*.

POLYGONATUM, *Convallaria polygonatum* — p. *Anceps*, *Convallaria polygonatum* — p. *Canaliculatum*, *Convallaria canaliculata* — p. *Latifolium*, *Convallaria canaliculata* — p. *Multiflorum*, *Convallaria multiflora* — p. *Pubescens*, *Convallaria pubescens* — p. *Uniflorum*, *Convallaria polygonatum* — p. *Vulgare*, *Convallaria polygonatum*.

POLY'GONUM, P. *avicula'rè*, from *poly*, and *γων*, 'a knee or joint.' P. *centio'dium* seu *erec'tum*, *Centio'dia*, *Centumio'dia*, *Sanguina'tis Corrig'iola*, *Sanguina'ria*, *Knotgrass*, *Knotweed*, *Bindweed*, *Doornweed*, (F.) *Renouée*, *Trainasse*, *Centinode*. Ord. *Polygonaceæ*. Sex. *Tristis*. Octandria *Trigynia*. This grass is said to be a feeble astringent.

POLYGONUM ACRE, P. *hydropiper*.

POLYGONUM AMPHIBIUM, P. *coccineum*, *Water Persic'aria*, of Europe and this country. The roots have been used like sarsaparilla, especially in diseases of the skin.

POLYGONUM BISTORTA, P. *bistortoi'des*, *Bistorta*, *Colubri'na*, *Offic'inal Bistort*, *Great Bistort* or *Snakeweed*, (F.) *Bistorte*, *Couleuvreine*, *Serpenteaire rouge*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhoea, ague, &c. Dose, gr. xv to ʒj.

POLYGONUM BISTORTOIDES, P. *bistorta* — p. *Centinodium*. P. *aviculare*.

POLYGONUM COCCINEUM, P. *amphibium*.

POLYGONUM DIVARICATUM; *Eastern Buckwheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

POLYGONUM ERECTUM, P. *aviculare*.

POLYGONUM FAGOPYRUM, *Fagopy'rum*, F. *esculentum*, *Trit'icum Fagi'num*, *Buckcheat*, (F.) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

POLYGONUM HYDROPIPER, P. *acrè* seu *hydropiperoides* (Pursh) seu *punctatum*, *Hydropiper*, *Persic'aria urens*, *Mercur'ius terres'tris*, *Poor Man's Pepper*, *Biting Ase-smart*, *Smartweed*, *Lakeweed*, *Water-pepper*, (F.) *Poivre d'eau*, *Persicaire poivrée* ou *brûlante* ou *âcre*, *Piment d'eau*, *Civage*, *Renouée âcre*. The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

POLYGONUM HYDROPIPEROIDES, P. *Hydropiper*, P. *punctatum*. *Polygonum hydropiperoides* of Michaux, *mild waterpiper*; indigenous; has no acrid properties.

POLYGONUM PERSICARIA, *Persicaria*, P. *minor* seu *mitis*, *Plumba'go*, *Lady's Thumb*, *Heart's ease*, (Prov.) *Redshank*, (F.) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

POLYGONUM PUNCTATUM, P. *hydropiperoides*, *Water pepper* of America, *Smartweed*, possesses similar properties to *Polygonum hydropiper*, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidrachm of the saturated tincture has been extolled in amenorrhœa. See *Polygonum hydropiper*.

POLY'GONUM VIRGINIA'NUM, *Waud-spiked Persic'aria*, *Virgin'ia Bistort*; indigenous; is astringent, diuretic, and tonic.

POLYGROMA, *Staphyloma*.

POLYHI'DRIA, *Polyhi'dria*, *Polyhi'dro'sis*, from *poly*, and *ἵδρωσ*, 'sweat.' Excessive sweating.

POLYHYDRIA, *Hydrops*.

POLYHYPERHÆMIA, *Plethora*.

POLYIDRIA, *Polyhidria*.

POLYIDROSIS, *Polyhidria*.

POLYLYMPHIA, *Anasarca*.

POLYMASTH'US, *Pleiomasthus*, from *poly*, and *μαστος*, 'breast.' A monster having several breasts. — Gurlt. The condition has been called *Polymazia*, *Pleiomazia*, and *Pleomazia*.

POLYMAZIA, see *Polymasthus*.

POLYME'L'IAN, (F.) *Polymélien*, from *poly*, and *μελος*, 'a limb.' An epithet given to monsters characterized by the insertion, in a well formed subject, of one or more accessory limbs, accompanied, at times, by the rudiments of certain other parts. — I. G. St. Hilaire.

POLYMERIA, *Polymerismus* — p. *Promiscua translativa*, *Transposition of the viscera*.

POLYMERIS'MUS, *Polymer'ia*, from *poly*, and *μερος*, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, *Plantago*.

POLYONYCHIA, *Polonychia*.

POLYOP'SIA, *Poly'op'ia*, from *poly*, and *οψις*, 'sight.' Vision is so called, when multiple or manifold.

POLYOPY, *Polyopsia*.

POLYOREX'IA, from *poly*, and *ορεξις*, 'appetite.' Excessive appetite or hunger. A genus in the *Gastrose* of M. Alibert.

POLYPE'RIA, from *poly*, and *προς*, 'mutilated.' Congenital misconstruction of various parts or organs. — Good.

POLYPHAG'IA, *Multivoran'tia*, from *poly*, and *φαγω*, 'I eat.' Voracity. Faculty of eating or subsisting on many kinds of food. See *Boulimia*.

POLYPHAGOUS, *Polyph'agus*, *Multiv'orous*, (F.) *Polyphage*. Relating or appertaining to polyphagia.

POLYPHARMAC'IA, *Polypharm'acy*; from *poly*, and *φάρμακον*, 'a medicine.' The prescribing of too many medicines. A prescription, consisting of a number of medicines: hence the name *Polypharm'acius*, (F.) *Polypharmaque*, given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHARMAQUE, see *Polypharmacia*.

POLYPHYSIA, *Flatulence*.

POLYPIFORM CONCRETIONS, see *Polypus*.

POLYPIONIA, see *Polysarcia* — p. *Infantum*, see *Polysarcia*.

POLYPIOSIS, see *Polysarcia*.

POLYPLAS'TIC, *Polyplas'ticus*, from *poly*, and *πλασσω*, 'I form.' That which has many shapes.

POLYPLASTIC ELEMENT, in histology, is one which does not retain its primary shape: but undergoes transformation into others. — Gerber.

POLYPODI'TES. Wine impregnated with polypody.

POLYPO'DIUM, P. *Vulgarè* seu *Virgin'ia-num* seu *pinnatif'idum*, *Filic'ula dulcis*, *Common Pol'ypody*, *Fern root*, *Rock Brake*, *Brake root*, (F.) *Fongère douce*. Ord. *Filices*. From *poly*, and *πους*, *ποδος*, 'a foot,' owing to its many roots. This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as

a cholagogue, and was given in head diseases. It is not used now.

POLYPODIUM ADIANTIFORME, see Calagualæ radix — p. Ammifolium, see Calagualæ radix — p. Argentum, see Calagualæ radix — p. Cetaræcinum, P. incanum — p. Calagualæ, Calagualæ radix — p. Coriaceum, see Calagualæ radix — p. Dentatum, Asplenium filix fœmina — p. Filix fœmina, Asplenium filix fœmina.

POLYPODIUM FILIX MAS, *Aspid'ium* seu *Athyrium* seu *Nephrodium* seu *Polystichum Filix Mas*, *A. depas'tum* seu *cro'sum*. *Filix pinna'ta*, *Pteris*, *Blechnon*, *Polyrrhi'zon*, *Blanchon Oriban'sii*, *Lou-chi'tis*, *Filic'ula*, *Filix Mas*, *F. uon ramo'sa deuta'ta*, *Nephrodium crenatum*, *Polystichum callip'teris*, *Male Polyody* or *Fern*, (F.) *Fougère mâle*. The rhizoma of this plant, *Filix Mas*, Ph. U. S., has been much extolled as an anthelmintic, and in cases of tœnia. It was the basis of a once celebrated remedy — *Madame Nouffer's* — but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ℥ij to ℥iij of the powdered solid part of the root; followed in the morning by a strong cathartic of camboe or jalap. An ethereal extract has been proposed by Dr. Peschier, of Geneva.

POLYPODIUM INCA'NUM, *P. cetaræ'cinum*, *Acror'tichum polypodioïdes*, *Pol'yody*, *Rock Brake*; indigenous; has been considered demulcent, cathartic and anthelmintic.

POLYPODIUM INCISUM, Asplenium filix fœmina — p. Molle, Asplenium filix fœmina — p. Pennatifidum, P. vulgare — p. Politum, see Calagualæ radix — p. Trifidum, Asplenium filix fœmina — p. Virginianum, P. vulgare — p. Vulgare, Polypodium.

POLYPODY, Polypodium incanum — p. Common, Polypodium vulgare — p. Male, Polypodium filix mas.

POLYPOID, *Polyppoides*; from *polypus*, and *eidos*, 'form.' Having the shape of, or resembling, a polypus.

POLYPORUS IGNIARIUS, Boletus igniarius — p. Officialis, Boletus loricis.

POLYPO'SIA, *πολυποσια*, from *poly*, and *ποσις*, 'drink.' Great thirst — desire for drink. Polydipsia.

POLYPO'TOME, *Polypot'omus*, *Polyppus kuife*, from *polyppus*, and *τεμνειν*, 'to cut.' An instrument for the removal of polypus by excision.

POLYPOUS, *Polyppous*: same etymon as the next. Relating, or belonging to, or resembling polypus.

POLYPUS, *Pseudometamorpho'is polypp'osa*, from *πολυς*, 'many,' and *πους*, *ποδος*, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fosse, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesic'ular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhous* or *cancerous*. *Fibrous* polypi, *Pol'yp'i fibro'si*, *Inopol'yp'i*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous* or *carcinom'atous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Canterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term POLYPI, *Pseudopol'yp'i*, *Cardi'tis polypp'osa*, *Pol'ypiform Concretions*, (F.) *Concretions polypp'ores* or *polypp'iformes* on *sanguines du Cœur*, *Hémocardioplasties*, (Piorry), has likewise been applied to collections of blood — fibrinous concretions — found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general — especially those of the lungs — the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

POLYPUS BRONCHIA' LIS, *Bronchlenim'itis*, *Bronchi'tis membrana'cea* seu *exsudati'va* seu *crumpli'sa*, *B. plastic*, *Bronchial Croup*, *Chronic Croup* [?], *Pseudo-membranous Bronchitis*, (F.) *Bronchite pseudo-membraneuse*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when unexpected, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

POLYPUS CARINOSUS, Sarcoma — p. Fibrosus, see Polypus — p. Uteri, Metropolypus.

POLYRRHIZON, Polypodium filix mas.

POLYRRHIZEA, Profluvium.

POLYSAR' CIA, *Polysarco'sis*, from *poly*, and *σαρξ*, *sarkos*, 'flesh.' *Caruosis*, *Polysomati'a*, *Adelip'aria*, *Corpulent'ia*, *Stenti'tes*. Excessive corpulency. Authors have distinguished two varieties of this: — POLYSARCIA CARNO'SA, *Corpulency*, and P. ADIPO'SA, *Polyppio'ia*, *Polyppio'sis*, *Pimelo'sis nim'ia*, *Pachys'mus*, *Puchys'sis*, *Obes'itas*, *Hyperpim'elè*, *Lip'aria*, *Adip'osis*, *Polysar'cia Jugo'ina*, *Emryme'linu polysar'cia*, *Barysom'ia*, *Barysomati'ca*, *Lip'osis*, *Lip'ar'otes*, *Lip'as'ua*, *Pinguitu'do*, *Pinguitude*, *Obesity*, (F.) *Obésité*, *Embonpoint excessif*.

A severe regimen and exercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every cure. This morbid disposition has been termed *Polyppio'nia infan'tum*, and *Chloro'sis gigante'a*.

POLYSARCIA VISCERUM, *Physconia adiposa*.

POLYSARCOSIS, Polysarcia.

POLYSCEL'IA, from *poly*, and *σκελος*, 'a leg.' A monstrosity, characterized by the presence of one or more supernumerary legs.

POLYSIA'LIA, from *poly*, and *σialον*, 'saliva.' Excessive discharge of saliva.

POLYSOMATIA, Polysarcia.

POLYSO'MIA, from *poly*, and *σωμα*, 'body.' A monstrosity characterized by the existence of more bodies than one.

POLYSPAS'TON, from *poly*, and *σπασω*, 'I draw.' A powerful instrument for reducing luxations. — Gorrieus.

POLYSPER'MIA, from *poly*, and *σπερμα*, 'sperm.' Richness or fulness of sperm.

POLYSTICUM CALLIPTERIS, Polypodium filix mas — p. Filix Mas, Polypodium filix mas.

POLYSTOMA PINGUICOLA, see Worms — p. Venarum, see Worms.

POLYTRIC, *Asplenium trichomanoides*.

POLYTRICHIA, see *Polytrichus*.

POLYTRICHUM, from *poly*, and *τριχός*, 'hair,' *P. vulgare*, *Polytrichon*, *Adiantum auriculatum*, *Golden Maiden-hair*, (F.) *Perce-mousse*. *Ord. Musci*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICHUM COMMUNE, *Asplenium trichomanoides*.

POLYTRICHUM JUNIPERINUM, *Hairecap moss*, *Robbin's Rye*, common in New England, is said to possess powerful diuretic properties.

POLYTRICHUS; same etymon as *Polytrichum*. Very hairy. One that has much hair. The condition is termed *Polytrichia*; although this term is, at times, employed for the growth of hair on parts not usually having it.

POLYTROPHIA, from *poly*, and *τροφή*, 'I nourish.' Abundant or excessive nutrition.

POLYURESIS, Diabetes.

POLYURIA, Diabetes.

POLYURICUS, from *poly*, and *ουρον*, 'urine.' Sauvages calls—*Ischuria polyurica*—a kind of ischuria, caused by accumulation of urine in the bladder.

POMA, Drink—*p. Chinensia*, see *Citrus aurantium*.

POMACEUM, Cider.

POMATUM, *Pomma'tum*, from *poma*, 'apples,' which formerly entered into its composition. (F.) *Pommade*, *Liparolé*, *Stéarolé*. A pharmaceutical preparation, employed only externally, which differs but little from an ointment, except in having generally less consistence. It is usually scented and coloured to render it more agreeable. Apples formerly entered into the composition of the *pomatum*; hence its name.

Common *Pomatum* is made of *lard*, 12lbs; *suet*, 4lbs; *essence*, ℥viii.

POMATUM AD LABIA DEMULCENDA. Cerate for the lips—*p. Epispasticum flavum*, *Unguentum lyttæ medicatum aliud*—*p. Epispasticum viride*, &c., *Unguentum lyttæ medicatum*—*p. for the Lips*, Cerate for the lips—*p. Nitricum seu oxygenatum*, *Unguentum acidii nitrosi*—*p. Saturni*, *Unguentum plumbi superacetatis*.

POMBALEA IPECACUANHA, see *Ipecacuanha*.

POMEGRANATE, *Punica granatum*.

POMILIUS, see *Nanus*.

POMMADE, *Pomatum*—*p. d'Alion*, *Unguentum acidii nitrosi*—*p. Antispasmodique de Jasser*, *Unguentum sulphuris compositum*—*p. d'Autenrieth*, *Unguentum antimonii tartarizati*—*p. de Cyrillo*, *Unguentum muriatis hydrargyri oxygenato medicatum*—*p. Épispassique jaune*, *Unguentum lyttæ medicatum aliud*—*p. Epispasmodique verte*, *Unguentum lyttæ medicatum*—*p. de Garou*, *Unguentum epispasticum de daphne gnidio*.

POMMADE DE GONDRET, *P. ammoniacale de Gondret* (F.), *Gondret's Counterirritant*, *Gondret's ammoniacal Canstic*. (*Liq. ammon. p. ij*; *Sevi, p. j*; *Ol. amygdal. p. j*; *M.*) Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula, is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm. He proposes two formulæ, one for summer, the other for winter. In the former he directs three parts of *lard*, one of *suet*, and four of *liquor ammoniac*; in the latter, equal parts of *lard* and *liquor ammoniac*.

POMMADE POUR LES LÈVRES, Cerate for the lips—*p. Ophthalmique* (Regent's.) *Unguentum ophthalmicum*—*p. Oxygené*, *Unguentum*

acidii nitrosi—*p. Stibiée*, *Unguentum antimonii tartarizati*.

POMME, see *Pyrus malus*—*p. d'Adam*, *Pomum Adami*—*p. d'Amour*, *Solanum lycopersicum*—*p. Épineuse*, *Datura stramonium*—*p. de Merveille*, *Momordica balsamica*—*p. Monnesuse*, *Belegar*—*p. de Terre*, *Solanum tuberosum*.

POMMES HÉMORRHOÏDALES, see *Viscum album*.

POMMETTE, see *Malæ os*.

POMMIER, *Pyrus malus*.

POMPE POUR L'ESTOMAC, *Stomach pump*.

POMPHOLYGE'RON, *πομφολυγρον*, from *πομφολυγο*, 'to raise blisters.' The name of a plaster employed by the ancients.—Castelli.

POMPH'OLYX, from *πομφος*, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Ecchymolysis Pompholyx* of Good. See *Pemphigus*.

POMPHOLYX, *Tutia*, *Zinci oxydum*.

POMPHUS, *Wheat*.

POMPION, *Cucurbita pepo*.

POMUM ADA'MI, *Eminentia thyreoidea*, (F.) *Pomme d'Adam*, *Adam's Apple*. The projection formed by the thyroid cartilage in the neck—of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

POMUM AMORIS. *Testicle*—*p. Hierosolymitanum*, *Momordica balsamina*—*p. Melongena*, see *Solanum melongena*—*p. Mirabile*, *Momordica Balsamina*—*p. Spinosum*, *Datura stramonium*.

PONCTION, *Puncturing*.

POND SHOVEL, *Unisema deltofolia*.

PONDERA ET MENSURÆ, *Weights and measures*.

PONDUS, *Pudibilia*—*p. Pharmaceuticum*, see *Weights and measures*.

PONGITIF, *Pungent*.

PONS CEREBELLI, *Pons Varolii*—*p. Hepatis*, see *Lobulus anonymus*—*p. Sylvii*, *Quadrigenina Tubercula*—*p. Tarini*, *Tarini pons*.

PONS VAROLII, *P. Cerebelli*, *Corpus annulære*, *Processus annularis*, *Prominentia annularis cerebri*, *Eminentia annularis*, *Nodus encephali seu Cerebri*, *Protuberantia basilaris*, *Protuberantia annularis Willisii*, *Varolii's bridge*, *Cerebral protuberance*, (F.) *Protuberance cérébrale ou annulaire*, *Mésencéphale*, *Mésocéphale*, *Pont de Varole*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by *Varolius*. It is formed by the union of the crura cerebri and crura cerebelli.

PONS ZYGOMATICUS, *Zygomatich arch*.

PONT DE TARIN, *Tarini pons*—*p. de Varole*, *Pons Varolii*.

PONTE, see *Parturition*—*p. Périodique*, see *Parturition*.

PONTEDERIA CORDATA, *Unisema deltofolia*. **PONTICUM ABSINTHIUM**, *Artemisia Pontica*.

POOK, *Abdomen*.

POPLAR, **AMERICAN**, *Liriodendron*—*p. Balm of Gilead*, *Populus Candicans*—*p. Black*, *Populus*—*p. Tree*, *Liriodendron*—*p. Tulip-bearing*, *Liriodendron*.

POPLES, *Gare'tum*, *Garretum*, *Ignys*, *Ig'nyè*, *Suffrago*, *Fossa genu*, *Fossa poplitæa*, the *Ham*, *Hough*, *Hoff*, *Hock*, (F.) *Jurret*, from *post*, and *plico*, 'I fold.' The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space*.

POPLESY, *Apoplexy*.

POPLITEUS, *Popliteal muscle*.

POPLITÉ, *Poplitæus muscle*.

POPLITEAD, see *Popliteal aspect*.

POPLITE'AL, *Poplitæ'us*, *Poplit'ic*, (F.) *Poplité*, from *poples*, 'the ham.' That which relates to the ham. A name given to various parts.

POPLITEAL ARTERY — *Popliteal portion of the crural*, — (Ch.), is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries*; and, at the top of the leg, the arteries of the gemini muscles or *gemini branches*, (F.) *branches jumelles*, the *two inferior articular arteries*, and the *tibialis antica*.

POPLITEAL ASPECT. An aspect towards the side on which the *poples* or ham is situated. (Barclay.) *Poplitæ'ad* is used by the same writer adverbially, and signifies 'towards the popliteal aspect.'

POPLITEAL FOSSA, *Poples*.

POPLITE'AL GLANDS, *Glan'dulæ poplitæ'æ*. Lymphatic glands, four in number, seated in the popliteal region or space.

POPLITEAL MUSCLE, *Poplitæ'us Muscle*, *Subpoplitæus*, (F.) *Muscle poplité*, *Muscle Jarretier*, *Fémoro-poplitæo-tibial*, (Ch.), is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

POPLITEAL NERVES. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal*, *Peroneal nerve*, *Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch*, *nerf pré-tibio-digital*, (Ch.) and the *anterior tibial*, *nerf pré-tibio-sphalangeaire*, (Ch.) 2. The *internal popliteal nerve*, *Branche tibiale* (Ch.), which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name *tibial nerve*. It furnishes the *external saphena nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

POPLITEAL REGION, *Poples* — p. Space, *Poples*.

POPLITEAL VEIN has the same arrangement as the artery behind which it is situate.

POPLOTIC, *Poplital*.

POPONAX, see *Pastinaca opoponax*.

POPPY, **CELANDINE**, *Stylophorum diphyllum* — p. Corn, red, *Papaver rhœas*.

POPPY HEADS, see *Papaver*.

POPPY HORN, *Stylophorum diphyllum*.

POPPY JUICE, *Meconium* — p. Pill, *Opium*.

POPPY, **PRICKLY**, *Argemone Mexicana* — p. Spotted, *Cucurbalus Behen* — p. Thorn, *Argemone Mexicana* — p. White, *Papaver* — p. White, capsule, see *Papaver*.

POPULUS, *P. nigra*, *Ἐγχεῖ'ρον*, *Achero'in*, *Black poplar*, (F.) *Peuplier*, *P. noir* ou *franc*. The young buds, *oculi* or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an official ointment — the *unguentum populæ'um*. It was, also, recommended in chronic affections of the lungs.

The bark of *Populus Tremuloï'des*, *American*

aspen, of *P. TREMULA* sen *pen'dula*, *European aspen*, and of *POPULUS CANADICANS*, *Balm of Gilead Poplar*, is antiperiodic, and furnishes *salicin* and *populin*, in which the properties probably reside.

POPULUS BALSAMIFERA, see *Figura octandra* — p. *Candicans*, see *Populus* — p. *Pendula*. *P. tremula* — p. *Tacamahaca*, see *Figura octandra* — p. *Tremula*, see *Populus* — p. *Tremuloides*, see *Populus*.

PORCELAINE, *Essera*, *Urticaria*.

PORCELET, *Hyoseyamus*.

PORCELLA TRILOBA, see *Carica papaya*.

PORCELLIO, *Oniseus*.

PORCELLUS, *Oniseus*.

PORCULUS, *Oniseus*.

PORCUPINE DISEASE, *Ichthyosis*.

PORCUPINE MEX, *Echinoder'ui*. Persons have been so called in whom the cuticle is prodneed in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, *Vulva*.

PORDE, *Crepitation*.

PORE, *Porus*, *In'tersticæ*, *παρος*, 'a passage.' Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. **EXHALANT PORES** have been supposed to exist in the exhalants, to transmit the fluids exhaled. — **ABSORBENT PORES** are employed in taking up parts that have to enter the circulation. Pores exist in the cuticle: yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spira'cula*.

POREBLIND, *Myopia*.

PORED MILK, *Colostrum*.

PORI BILIA'RII, *Ductus biliar'rii* seu *bilif'eri*, *Canaliculi bilif'eri*, *Sur'culi fell'ei*. Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

PORI CUTA'NEI, *P. Exhalan'tes* seu *Sudorif'eri* seu *Resorben'tes*, *Med'tus cuticulæ'res*. The pores of the skin.

PORI EXHALANTES, *P. eutanei* — p. *Pulmonum*, *Cellulæ*, *bronchiæ* — p. *Resorbentes*, *P. eutanei* — p. *Sudoriferi*, *P. eutanei*.

PORNOGRAPHY, *Pornograph'ia*; from *πορνη*, 'a prostitute,' and *γραφω*, 'I describe.' A description of prostitutes or of prostitution, as a matter of public hygiene.

POROCE'LE, from *πωρος*, 'callus,' and *κηλη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

POROMA, *Induration*.

POROMPHALOCELE, *Poromphalon*.

POROMPHALON, *Πορομφ'άλιον*, *Poromphaloc'elè*, from *πωρος*, 'hard,' and *ομφαλος*, 'the navel.' Umbilical hernia with hard and thickened parietes.

POROS, *Canal*.

POROSIS, *Chalaza*, *Induration*.

POROTIC, *Porot'icus*, (F.) *Porotique*, from *πωρος*, 'callus.' A remedy believed to be enable of assisting the formation of callus.

PORPHYRA, *Purpura* — p. *Græcorum*, *Pectechiæ* — p. *Hæmorrhagicæ*, *Purpura hæmorrhagicæ* — p. *Laciniata*, *Ulva umbilicalis* — p. *Umbilicalis*, *Ulva umbilicalis*.

PORPHYRISMA, *Scarlatina*.

PORPHYRISMUS, *Scarlatina*.

PORPHYRIZATION, *Levigation*.

PORPHYROTYPHUS, see *Typhus*.

PORPHYRU'RIA, *Porphyru'ria*; from *πορφυρα*, 'purple,' and *ουρον*, 'urine.' A state of the urina — *pur'puric urine* — in which it deposits the remarkable colouring matter — *Pur'puricæ*, *Uro'sucine*, *Rosac'ic acid*, *Uroë'ythrin*, *Uro'choline*, *Uro'rhodine* — in association with urate of ammonia.

POR'PHYRY, *Porphyri'tes*, from *πορφυρα*,

'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

PORPHYRY, BLACK, Ophites.

PORPHYRIA, Porphyria.

PORRACÉ, Porraceus.

PORRACÉOUS, *Porracæus*, *Pra'sinus*, from *porrum*, 'a leek.' (F.) *Porracé*. Having the green colour of the leek. An epithet given to certain excreted matters, — the sputa, bile and faeces particularly.

PORREAU, *Allium porrum*.

PORRECTUM, Lever.

PORRET, *Allium porrum*.

PORRIDGE, ATHOL, see Mahogany.

PORRIGINE, *Porrigio favosa*.

PORRIGINEUX, *Porriginosis*.

PORRIGINOSUS, *Porriginosis*.

PORRIGINOUS, *Porriginosis*, (F.) *Porrigineux*. Appertaining to porrigio.

PORRIGO (L.), 'scurf or scall in the head,' *Tinea*, *Favus*, *Furfuratio*, *Furfures*, *Ecpye'sis* seu *Phlysis porrigio*, *Trichonosis*, 'Scal'd head in general, Scallard; from *porrigere*, 'to spread.' (F.) *Teigne*, *Rache*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules, called favi and achesores, unaccompanied by fever.

PORRIGO CONFERTA, *P. scutulata*.

PORRIGO DECAL'VANS, *Trichonosis areata*, *Area*, *Alope'cia areata* seu *partialis* seu *circumscrip'ta*, *Phytoalope'cia*, *Trichonosis furfuracea*, *Tyria*, *Tyro'ma*, *Ophi'asis*, *Tinea tonsdens*, *Herpens tonsu'rans*, *Squarra tonsdens*, *Limited* or *partial Baldness*, consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth, found at the roots of the hair in *Tinea tonsdens*, Gruby gives the name *Microporon Audon'ni*. It is, also, called *Tricophyton* seu *Trichomyces tonsu'rans*. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

PORRIGO FAVO'SA, *Cerion*, *Favus*, *Ecpye'sis porrigio favosa*, *Tinea favosa*, *Scabies cap'itis favosa*, *Melice'ra*, *Melice'rum*, *Melice'ria*, *Melissa'vium*. *Porrigoph'ya*, *Honey-comb Scall* or *Tetter*, (F.) *Teigne favieuse*, *Porrigine*. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied some observers, that the crusts of favus are of vegetable nature, and formed of a parasitic plant, belonging, according to Gruby, to the obsolete genus *mycoderm'a*. MM. J. Müller and Lebert refer it to the genus *Oidium*, and call it *Oidium Schönle'ni*, whilst Remak assigns it to a new genus under the name *Achorion Schönle'ni*. The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci*, *Ung. hydrargyri præcipitat. alb.*, &c. Eczema of the hairy scalp is often confounded with Porrigio.

PORRIGO FURFURANS, *Ecpye'sis porrigio furfuracea*, *Tinea* seu *Trichonosis furfuracea* seu *porriginosa*, *Pityri'asis*, *Teigne furfuracée* (Alibert), commences with an eruption of small achesores, the fluid of which soon concretes and separates in innumerable thin, laminated scabs, or scale-like exfoliations. It is attended with a good

deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*; — one made with the *Cocculus indicus*; — the *Sulphur ointment*; — *Citrine ointment*; *Ung. hydrargyri nitrico-oxidi*; *Tar ointment*, and *Nitric acid ointment* have all been found useful. Most inflammation or discharge arise, these applications must of course be intermitted.

PORRIGO LARVALIS, *P. lupinosa*.

PORRIGO LARVA' LIS, *Crusta lac'tea*, *Ecpye'sis Porrigio crustacea*, *Ment'igo*, *Achor*, *Tinea lac'tea* seu *Faciei*, *Lactum'en*, *Lacti'go*, *Milky scall* or *Tetter*, *Milkblo'ch*, (F.) *Crôte de lait ou laiteuse*, *Faux volages*, *La Graine*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish achesores on a red surface. These break and discharge a viscid fluid, which becomes incrustated in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis*. The disease is rather a variety of Eczema. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablation, and the application of gently stimulating ointments, as the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

PORRIGO LUPINO'SA, *Tinea lupini*, *Favus disper'sus*, *Scabies cap'itis*, *Ecpye'sis porrigio lupinosa*, *Porrig'go larvalis*, *Impeti'go figurata*, *Tinea granulata* seu *mucosa*, *Crusta lactea* (of some), *Ment'agra infantum*, (F.) *Teigne*, *Dartre crustacée flavescence*, *Favus disse'miné*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminate in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

PORRIGO SCUTULA'TA, *P. conferta*, *Tinea granulata* seu *fico'sa*, *Ecpye'sis porrigio galeata*, *Acho'res* seu *Scabies cap'itis*, *Favus confertus*, *Ringworm of the Scalp*, *Scal'd head*, (F.) *Teigne annulaire*, *T. en anneau*, *T. nummulaire*, *Favus en groupes*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children three or four years of age, and is very unmanageable. The rules laid down under *Porrigio furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem* of Banyer sometimes cures, when others fail.

PORRIGOPHYTA, *Porrigio favosa*. *Porrigophyte* means the plant of favus or of porrigio favosa.

PORRILLON, *Narcissus pseudonarcissus*.

PORRUM, *Allium porrum*, Thymion.

PORRUS, *Sarcoina*, Thymion.

PORTA, *πύλη*, *Pylē*, (F.) *Porte*, 'a gate.' The

part of the liver or other organ—*hilus*—where its vessels enter as by a gate. See Liver. Also, the Vulva.

PORTA HEPATIS, see Liver — p. Jecoris, see Liver — p. Lienis, see Spleen.

PORTA VENA, *Vena portæ*, *V. porta'rum* seu *ad portam* seu *porta'lis* seu *magna* seu *quæ ad portam est* seu *stelechig'a* seu *lac'tea* seu *ostio'ria* seu *arterio'sa* seu *arterio'lis*, *Rann'lis* seu *Jen'livis*, *Mimus Jec'oris* seu *he'patis*, *Vena ad portas*. The System of the vena porta or the Abdominal venous system or Portal system, (F.) *Veine porte*, *Porte veine*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdominal'is*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and, in the female, the uterus. The *Abdominal vena porta* has two principal roots, the *splenic vein* and the *superior mesenteric*, which have their ramifications in all the digestive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepatic vena porta*. It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*, or of the *portal vein*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ, — the capsule of Glisson. The different branches of the vena porta are devoid of valves. See Liver.

PORTAL, from *porta*, 'a gate.' Relating to the porta of the liver, — as the *portal* system, or system of the vena porta. By extension, the term has been applied to an analogous system of vessels in the kidney. See Kidney.

PORTAL FISSURE, see Liver — p. Fossa, see Liver — p. System, see Porta Vena — p. System of the Kidney, see Kidney — p. Vein, Porta Vena — p. Veins of the Kidney, see Kidney.

PORTE-AIGUILLE, *Acuteuac'ulum*, *Needle-carrier*, *Needle-bearer*, from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE (F.). A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

PORTE-CAUSTIQUE, *Porte-pierre* — p. *Fenille*, *Subscapularis*.

PORTE-LAQ. An instrument for carrying the laq or fillet over the limb of the foetus whilst in utero, when turning is necessary.

PORTE-LIGATURE, from *porter*, 'to carry,'

and *ligature*. An instrument for conveying a ligature to deep-seated parts.

PORTE-MÊCHE (F.), from *porter*, 'to carry,' and *mêche*, 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

PORTE-MOXA (F.). A small instrument for keeping the moxa applied to a part to be cauterized. It consists of a metallic ring—separated from the skin by three supports of ebony—to which a handle is adapted.

PORTE-NŒUD (F.), from *porter*, 'to carry,' and *nœud*, 'a knot.' An instrument for carrying a ligature round the base or pedicle of a tumour.

PORTE-PIERRE (F.), *Porte-caustique*, *Caustic bearer*. An instrument similar to a *portecrayon* for carrying lunar caustic.

PORTE-SONDE (F.). An instrument resembling a *portecrayon*, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lacrymalis.

PORTE VEINE, *Porta vena*.

PORTENTUM, *Monster*.

PORTER, *Cerevisia*.

PORTIO DURA, *Facial nerve* — p. *Interdram et mollem*, *Portio Wrisbergii* — p. *Intermedia Wrisbergii*, *Portio Wrisbergii* — p. *Media inter portionem durum et portionem mollem*, *Portio Wrisbergii*.

PORTIO MOLLIS, *Auditory nerve*.

PORTIO WRISBERGII, *P. intermedia Wrisbergii* seu *media inter portionem durum et portionem mollem* seu *inter durum et mollem*, (F.) *Faisceau intermédiaire de Wrisberg*, *Intermédiaire de Wrisberg*. A small, white fasciculus, intermediate between the portio mollis and portio dura of the seventh pair of nerves, which was first described by Wrisberg. The Chorda Tympani is supposed by some to emanate from this nerve.

PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL, *Longissimus dorsi* — p. *Écuilleux* ou *squameux du temporal*, *Squamous portion of the temporal* — p. *Lombaire du plexus cervical*, *Lumbar plexus*.

PORTION GODRONNÉ DE LA CORNE D'AMMON. A name given by Vieq d'Azyr to a small, denticulated cord, of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTONARIUM, *Pylorus*, *Duodenum*.

PORTULACA, *P. olera'cea*, *Andrach'né*, *Allium Gal'licum*, *Purslane*, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

PORUS, *Callus*, *Meatus* — p. *Aeusticus*, *Auditory canal*, *internal*.

PORTS OPTICUS. An opening in the centre of the eribriform lamella of the sclerotic, through which the central artery of the retina enters the eyeball.

POSCA, *Oxyerate*.

POSE, *Coryza*.

POSIMOS, *Potable*.

POSITION, FALSE, *False position*.

POSOL'OGY, *Posology'ia*, *Dosiology'ia*, from *ποσος*, 'quantity,' and *λογος*, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited. (F.) *Dosage*.

POSOQUERIA DUMETORUM, *Randia Dumetorum*.

POSSÉDÉ, *Possessed*.

POSSESS'ED, *Dæmoni'acus*, (F.) *Possédé*. One

affected with epilepsy, or other strange neurotic affection, was formerly supposed to be 'possessed' by a demon. Hence, exorcism and various religious ceremonies, at one time employed to drive off the intruder.

POSSET, *Possetum*, from (L.) *posca*, 'sour wine and water' [?]. Milk curdled with wine, or any acid, or treacle. A preparation of beer and milk: *Zythog'ala*.

POSSET, SACK, see Sack—p. Sago, see Sago.

POSSETTING, Regurgitation (of Infants).

POSTBRACHIALE, Metacarpus.

POSTCARPIUM, Metacarpus.

POSTERIOR ANNULARIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring-finger and little finger, and is inserted into the inside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger inwards.

POSTERIOR AURIS, Retrahens auris.

POSTERIOR INDICIS MANÛS. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore-finger, and is inserted into the inside of the tendon on the back of the fore-finger. Its use is to draw the fore-finger inwards.

POSTERIOR INDICIS PEDIS, Abductor Indicis Pedis. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore-toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the fore-toe. Its use is to pull the fore-toe outwards.

POSTERIOR MEDII DIG'ITI MANÛS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring-fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its use is to draw the middle finger inwards.

POSTERIOR MEDII DIG'ITI PEDIS, Abductor medii digiti pedis. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its use is to pull the toe outwards.

POSTERIOR TERTII DIG'ITI, Abductor tertii digiti. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the third and fourth of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its use is to pull the toe outwards.

POSTHE, Penis, Prepuce.

POSTHETOMIST, Posthetomus, from $\pi\omicron\sigma\theta\eta$, 'prepuce,' and $\tau\omicron\mu\eta$, 'incision.' One who performs the operation of circumcision.

POSTHETOMY, Circumcision.

POSTHIA, Hordeolum.

POSTHIOPLAS'TIC, Posthioplas'ticus, from $\pi\omicron\sigma\theta\eta$, 'the prepuce,' and $\pi\lambda\alpha\sigma\sigma\omega$, 'I form.' An epithet applied to the operation for restoring the prepuce.

POSTHITIS, Acrobystitis, Acroposthitis, from $\pi\omicron\sigma\theta\eta$, 'the prepuce, the penis,' and *itis*, the termination for inflammation. Inflammation of the prepuce.

POSTHIUM, Prepuce.

POSTHON'CUS, from $\pi\omicron\sigma\theta\eta$, 'the prepuce or penis,' and $\omicron\gamma\kappa\omicron\varsigma$, 'a tumour.' Swelling of the prepuce or penis.

POSTHOPLAS'TICA, from $\pi\omicron\sigma\theta\eta$, 'prepuce,' and $\pi\lambda\alpha\sigma\tau\iota\kappa\omicron\varsigma$, 'formative.' The art of making a new prepuce.

POST'UMOUS, from *post*, 'after,' and *humus*, 'the ground.' Occurring after death.

POSTHUMOUS CHILD. One born after the death of its father, or taken from the dead body of its mother, as by the Cæsarean section.

POSTIME, Abscess.

POST-MORTEM. 'After death;' as 'a post mortem or necroscopic examination.'

POST-NATUS. 'Born after.' In the old law writers, the second son.

POST-PARTUM. 'After delivery.' As 'post partum hemorrhage.'

POSTPOSIT'IO, (*post*, 'after,' and *ponere*, *positum*, 'to place,') 'a postponement.' Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense, we speak of an *anticipating*, and a *postponing* (*Febris hysteret'ica*) intermittent.

POSTREMA, Uterus.

POTABLE, Potabilis, from *potare*, 'to drink.' *Pot'imos, Potos, Pos'imos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air: is not brackish; and has no mineral impregnation of consequence.

POTASH. So called from the pots or vessels in which it was made;—*Vegetable alkali, Gasterium*. Also, *Potass*.

POTASH OF COMMERCE, Potassa impura, Impure potassa, Alu'men cat'innu, Cin'eres Rus'sicæ, Subcar'bonas potas'sæ impurus, Potas'sæ car'bonas impurus, Lix'ivens cinis, the *Pearlash* of commerce, is prepared from the ashes of land-plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potassa, sulphate of potassa, chloride of potassium, silice, oxide of iron, &c.

From the ashes of lees of wine, and from vine-twigs, a much purer alkali is obtained. It is called *Cinis infect'orius seu fæcum, Cin'eres clavella'ti seu gravella'ti, Alu'men fæcum*, (F.) *Cendres gravelées ou de sarment*.

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of Tartar, Sal Tor'tari, Kali præparatum e tartaro, K. e tartaro, Subcar'bonas potas'sæ puris'simus, Potas'sæ subcar'bonas e tartaro*. Lastly, when wormwood is burnt to ashes, dissolved in water, filtered, and evaporated to dryness, it affords another variety of vegetable alkali, the *Sal absin'thii* or *Salt of wormwood*.

Impure potash is used for preparing the subcarbonate for medical use.

POTASS, Potassa fusa, Potash. The protoxide of potassium.

POTASSA, ACETATE OF, Potassæ acetas—p. Bichromate of, *Potassæ bichromas*—p. Bisulphate of, *Potassæ supersulphas*—p. Bitartrate of, *Potassæ supertartas*—p. Carbonate of, *Potassæ carbonas*—p. Carbonate of, pure, see *Potassæ subcarbonas*—p. *Caustica cum calce, Potassa cum calce*—p. Chlorate of, *Potassæ murias hyperoxygenatus*—p. Chromate of, *Potassæ chromas*—p. Chromate of, neutral, *Potassæ chromas*—p. Chromate of, yellow, *Potassæ chromas*.

POTASSA CUM CALCÈ, P. opè calcis para'ta et ignè fusa, Potassa caust'ica cum calcè, Potass with lime, Calx cum kali puro, Caust'icum commu'ne fort'ius, Lapis infernal'is sive sept'ivus, Kali caust'icum cum calcè, Lapis caust'icus, (F.) *Potassæ préparée avec la chaux, P. à la Chaux, Pierre a caudère*. (*Potassæ, Calcis* añ ʒj. Rub together, and keep in a well-stopped bottle.—Ph. U. S.) Used for the same purposes as the next, but more manageable; being less deliquescent.

POTASSA, EUCHLORATE OF, Potassæ murias hyperoxygenatus—p. Ferrocyanate of, *Potassii ferrocyanuretum*—p. Ferropotassiate of, *Potassæ cyanuretum*.

POTASSA FUSA, *Potassa, Kali causticum* seu purum, *Fused potass, Alkali vegetabile fixum causticum, Causticum communē acerimum, C. alkalinum* seu communē seu potentialē seu *Sulfinum, Hydras kalicum, H. potassæ puræ fusæ, Potassa hydras, Lapis causticus seu causticus chiburgorum* seu *infernalis alcalinus* seu *septiens, Ruptorium communē, Fixed reg'etable alkali, Hydrate of Potassa, (F.) Potassæ caustique.* (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well-corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

POTASSA, FUSED, *Potassa fusa*—p. Hydriodate of, *Potassæ hydriodas*—p. Hydrobromate of, see Bromine—p. Hydrocyanate of, *Potassi cyanuretum*—p. Hypermanganate of, *Potassæ hypermanganas*—p. Hyperoxalas, *Potass, oxalate of*—p. Hypertartars, *P. supertartars*—p. Impura, *Potash of commerce*—p. and Iron, *tartrate of, Ferrum tartarizatum*—p. with Lime, *Potassa eum calce*—p. Liquida, *Liquor potassæ*—p. Mephite of, *Potassæ subcarbonas*—p. Monochromeate of, *Potassæ chromas*—p. Muriate of, *Potassæ murias*—p. Nitrate of, *Potassæ nitras*—p. Op. calcis parata et igne fusa, *Potassa eum calce*—p. Oxymuriate of, *Potassæ murias hyperoxygenatus*—p. Permanganate of, *Potassæ permanganas*—p. Prussiate of, *Potassi ferrocyanuretum*—p. and Soda, *tartrate of, Soda, tartrate of*—p. Subcarbonate of, *Potassæ subcarbonas*—p. Sulphate of, *Potassæ sulphas*—p. Sulphate of, acid, *Potassæ supersulphas*—p. Sulphuret of, *Potassæ sulphuretum*—p. Supercarbonate of, *Potassæ carbonas*—p. Supersulphate of, *Potassæ supersulphas*—p. Supertartrate of, *Potassæ supertartars*—p. Tartrate of, *Potassæ tartars*.

POTASSÆ ACETAS, *Oxytartarus, Acetas kali* seu *lixiviæ* seu *kalicum, Alkali tartari aceto saturatum, A. vegetabile cum aceto, Magisterium tartari purgans, Terra foliata Tartari, Kali acetatum, Sal diureticum seu Sennerii, Arcanum tartari, Ac'etate of potass, (F.) Acetate de potassæ. (Acid, acetic, Oj, Potassæ carbon, q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali; then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water-bath, and, removing the pellicles, dry.—Ph. U. S.)*

It is cathartic and diuretic. Dose, ℥j to ℥ij, or more.

POTASSÆ ET ALUMINÆ SULPHAS, *Alumen*—p. Biantimonias, *Antimonium diaphoreticum*—p. Bicarbonas, *Potassæ carbonas*.

POTASSÆ BICHRÔMAS, *Kali chromicum rubrum* seu *acidum* seu *bichromicum, Bichromate of potassæ.* Procured by adding sulphuric, nitric, or acetic acid to a solution of the neutral chromate, and setting it aside to crystallize. It is a violent irritant poison; and has been used as a caustic in cases of morbid growths, in the proportion of from half a drachm to a drachm of the salt to from an ounce to an ounce and a half of water.

POTASSÆ BISULPHAS, *P. supersulphas*—p. *Bittartars, P. supertartars.*

POTASSÆ CARBONAS, *Kali æratum, Bicar'bonas potassæ, Potassæ bicar'bonas* (Ph. U. S., L., E., & D.), *Dentocarbonas potassii, Carbonate, bicarbonate or supercarbonate of potass.* This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (*Potassæ carbon, Biv, Aquæ destillat. Ox. Pass carbonic acid* through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble

by the addition of dilute sulphuric acid.—Ph. U. S.) Dose, gr. x to ℥ss. It is used in forming the soda powders, as well as for its antacid properties.

Distillers and brewers prepare this salt with great facility by suspending a solution of the purified carbonate of potassa in the fermenting tun. The alkaline salt is thus surrounded by an atmosphere of carbonic acid; and by absorbing it, it crystallizes into bicarbonate. The salt in powder is called *sal æratum*. Its composition is between that of a carbonate and of a bicarbonate.

POTASSÆ CARBONAS, *P. subcarbonas*—p. *Carbonas e Lixivo Cinere, P. subcarbonas*—p. *Carbonas impurus, P. subcarbonas*—p. *Carbonas purus, Pure carbonate of potassa, see P. subcarbonas*—p. Chloras, *P. murias hyperoxygenatus*—p. Chloruretum oxydatum, *P. murias hyperoxygenatus.*

POTASSÆ CHROMAS, *Kali chromicum flavum* seu *neutralē, Neutral yellow Chromate or Monochromeate of potassa.* Prepared by igniting a mixture of four parts of native chromite of iron (chrome iron ore) and one part of nitre; dissolving out the chromate of potassa by water, and crystallizing. It has been used as an emetic, expectorant and diaphoretic. Dose, as an emetic, from two to four grains; as an expectorant, from $\frac{1}{4}$ th to $\frac{1}{2}$ grain. In the proportion of one drachm to 32 ounces of water, it has been used as an antiseptic wash—called by Jacobson, *Liquor conservatrix.*

POTASSÆ CITRAS, *Citrate of potassa. (Acid, citric, ℥x, Potass. bicarb. ℥xiv, Aq. q. s. Dissolve the acid in the water; and after effervescence has ceased, strain and evaporate to dryness. The salt is deliquescent, and must be kept in well-stopped bottles. Ph. U. S.)* It possesses the refrigerant properties of the neutral salts, and may be given in fever, when to do little or nothing is the most advisable course. Dose, gr. x to ℥ss.

POTASSÆ ET FERRI TARTRAS, *Ferri tartarizatum*—p. Hydras, *Potassa fusa.*

POTASSÆ HYDRIDONAS, *Potassæ Protohydriodas, Potassii protox'idi hydriodas, Kali Hydriodilicum* seu *Hydriodicum, Hydriodas Kalicns, Hydriodate of potass, (F.) Hydriodate de potassæ.* If a solution of potass be poured on iodine, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Podide of Potassium, Kellium Iodatium, Potassii Ioduretum* seu *iodidum, (F.) Iodure de potassium,* may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydriodate of Potassa.* The following is the formula in the Ph. U. S. *Potass. ℥vj; Iodine in pulv. ℥xvj; Carbon. ligni in pulv. subtiliss. ℥ij; Aq. bullient. Oij.* Dissolve the potassa in the water: add the iodine gradually, stirring until the solution becomes colourless, and continue the additions until the liquid remains slightly coloured from excess of iodine. Evaporate to dryness, stirring in the charcoal towards the close. Rub to powder, and heat to dull redness in an iron crucible, keeping up the temperature for 15 minutes. When cool, dissolve out the saline matter with pure water, filter the solution, evaporate and set aside to crystallize. By evaporating and crystallizing as before, an additional quantity of crystals may be obtained. Virtues,—those of iodine.

POTASSÆ MURIAS, *Sal Digestivus seu febrifugus Syll'rii, Spiritus salis marini coagulatus, Muriate of Potass.* Bitter and refrigerant.

POTASSÆ MURIAS HYPEROXYGENAT'ES, *Potassæ Chloras seu oxymurias, Oxymuriate, Hyperoxymuriate, Chlorate or Euchlorate of potass,*

Protochlorate of potassium, Alkali vegetabile salit'o-dephlogistica'tum, Chlorure'tum potassæ oxyd'atum, Haloid'um oxygen'atum, Oxyge'no-Chlorure'tum potassii, Kali chloric'um, Chlorus Kallicus depuratus, (F.) Chlorate de potasse. It has been regarded as antineuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

POTASSÆ NITRAS, *Nitrate of Potass, Nitrum, N. prismat'icum, Sal nitrum, Nitre, Salpetre, Sal petræ, Sals'edo mucrum, Sanguin'ea, Berenic'ium, Halini'trum, Protoni'trate of Potass'ium, Nitrate of protox'ide of Potassium, Kali ni'tricum, Nitrus ka'licus seu lixiv'ia, Az'otas potass'icus, (F.) Nitrate ou Azotate de potasse.* Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixiviation; adding, if necessary, wood-ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒj. In large doses it is an acrid poison.

POTASSÆ NITRAS FUSUS SULPHA'TIS PAUCILO MIXTUS, *Sal prunell'æ, Crystal'us minera'lis, Nitras potassæ cum sulphur'æ fusus, Nitrum tabul'atum, Lapis Prunell'æ, Anod'ynum minera'l'e, Sore-throat salt, Min'eral crystal.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

POTASSÆ OX'ALAS, *Ox'alas Acid'ulum Potass'æ seu Potass'æ acid'ulus seu ba'sicus, Superox'alas ka'licum seu Potassæ, Hyperoxal'us Potassæ, Sal Acetosal'æ, Oxal'ium, Kali oxal'ic'um acid'ulum, Ox'alas subpotass'icus, Superox'ate of Protox'ide of Potass'ium, Oxalate of Potass, Salt of Sorrel, (F.) Sel d'oseille, Sel à détacher.* Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

POTASSÆ OXALAS ACIDULUM, Potass, oxalate of—p. OXYMURIAS, P. murias hyperoxygenatus.

POTASSÆ PERMAN'GANAS, *Perman'ganate of potass'ia, Hyperman'ganate of potassa,* has been given in cases of diabetes. Dose, from gr. ij to gr. v, three times a day. It has been prescribed, also, in obstinate dyspepsia.

POTASSÆ PROTOHYDRIDAS, P. hydriodas — p. Puræ fusæ hydras, Potassa fusa — p. et Sodæ tartras, Soda, tartrate of.

POTASSÆ SUBCAR'BOAS, P. Car'bonas (Ph. U. S.), P. carbonas e Lixi'vo Cin'erè, Subcar'bonas Kali, Car'bonas Potassæ, Kali præparat'um, Sal Herbarum seu Plantarum seu Tartari seu Absin'thii, Calca'reous Tartar, Subcarbonate or Mephite of Potass, &c. (See Potash.) A filtered solution of the impure subcarbonate, Potassæ car'bonas impu'rus (Ph. U. S.), Pearl-ash (see Potash), evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a Subcar'bonas Potassæ ex tart'aro combus'to, vulgo Sal Tartari or Salt of Tartar — (it is the Potassæ carbonas purus, Pure Carbonate of Potassa, Ph. U. S.); a Subcarbonas Potassæ ex deflagran'tibus simul tar'tratè acid'ulo et Nitrate Potassæ paratus, vulgo Nitrum ex tart'aro fixum; and a Subcarbonas potassæ ex deflagran'te cum Carbon'ibus Nitra'tè Potassæ paratus, vulgo Nitrum fixum. They are all used like the preceding.

POTASSÆ SUBCARBOAS IMPURUS, Potash of commerce.

POTASSÆ SULPHAS, *Kali vitriola'tum seu sulphu'ricum, Sulphas Kali Lixiv'ia vitriola'ta, Nitrum vitriolatum Schroederi, Sal Sopian'tiæ seu Tart'ari Sulphur'atum seu Polychres'tus, Specif'ic'um Paracel'si, Spi'ritus vitrioli coagula'tus*

Myrsic'iti, Al'kali vegetabilè vitriolatum, Sal de duobus, Arca'num duplica'tum, Tart'arum vitriolatum, Panacea Dncis Holsa'tiæ seu dnlica'ta, Sulphate of Potass, Protosulph'ate of Potass'ium, (F.) Sulfate de potasse. (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose, ʒss to ʒj as a laxative. In a large dose it has proved an irritant poison.

POTASSÆ SULPHAS CUM SULPHURÈ, *Sal Polychres'tus Glaseri, Lixiv'ia Vitriola'ta Sulphu'rea.* (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

POTASSÆ SULPHURETUM, Potassii sulphuretum — p. Superoxal'as, Potassæ oxal'as.

POTASSÆ SUPERSULPHAS, P. Bisulphas, *Sal eni'um seu febrif'ugus of Lem'ery, Supersulphate of Potass, Acid Sulphate or Bisulphate of Potass, Super-protosulphate of Potass'ium, (F.) Bisulfate de Potasse.* (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ʒss to ʒij.

POTASSÆ SUPERTAR'TRAS IMPU'RUS, *Tart'arum crudus, Tart'arum, Lapis vini, Magneti'um, Pedugra, Tartar, (F.) Tarte cru ou brut.* It is called, also, *Tartarum rubrum* and *Red Argol*, when obtained from red wines; *Tartarum album* or *White Argol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumina, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

POTASSÆ SUPERTAR'TRAS, P. hypertar'tras, P. Bitar'tras (Ph. U. S.) seu tartras ac'ida, *Crystal'li Tart'ari, Tartras Acid'ulus Potassæ purus, T. superpotass'icus, T. subpotass'icus, Supertar'trate of Protox'ide of Potass'ium, Bitartrate or Supertartrate of Potass, Crystals of Tartar, Cremor Tart'ari, Cream of Tartar* (when in powder), *Supertartrate of Potass, (F.) Tartrate acide de potasse, Crème de Tarte.* (The tartar of wine purified.) It requires 60 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon-peel, it forms an agreeable beverage in febrile diseases, under the name of *Imperial*. Dose, as a diuretic, ʒj to ʒij; as a purgative, ʒss to ʒj.

POTASSÆ TARTRAS, *Kali tartariza'tum, Al'coli fixum tartarisatum, Tart'arum solu'bile, Tartarus tartariza'tus, Lixiv'ia Tartaria'da, Sal Panches'tilis, Alkali vegetabilè tartarizatum, Tartrate of Potass. Soluble Tartar, (F.) Tartrate de Potasse.* (Potassæ carbon. ʒxvj; Potassæ Bitartrate in pulv. subtiliss. ℥ij, vel q. s., aquæ bullientis, cong. Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely-stopped bottles.—Ph. U. S.) A saline cathartic in the dose of ʒij to ʒj.

POTASSÆ TARTRAS ACIDA, P. supertartras — p. Tartras acidulus purus, P. supertartras — p. Tartras stibialis seu stibiosus, Antimonium tartarizatum.

POTASSE, ACÉTATE DE, Potassæ acetas — p. Bisulphate de, Potassæ supersulphas — p. Caustique, Potassa fusa — p. à la Chaux, Potassæ cum calce — p. Chlorate de, Potassæ murias hyperoxygenatus — p. Hydriodate de, Potassæ hy-

driodas—p. *Liquide*, Liquor potassæ—p. *Nitrate de*, Potassæ nitras—p. *Préparée avec la chaux*, Potassa cum calce—p. *de Soude*, tartrate de, Soda, tartrate of—p. *Sulfate de*, Potassæ sulphas—p. *Sulfure de*, Potassii sulphuretum—p. *Tartrate de*, Potassæ tartras—p. *Tartrate acide de*, Potassæ supertartras.

POTASSII BROMIDUM, *Potassæ hydrobromas*, Bromide of potassium, (F.) Bromure de Potassium. (Bromin, ℥ij; Ferri filii, ℥j; Potassæ carbon. ℥ij and ℥j, vel q. s.; *Aq. destillat.*, Oiv. Add the iron filings and bromine to a pint and a half of the water; stirring for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potassa, dissolved in Oiss of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the precipitate with the remaining water, boiling hot, and filter. Mix the liquors and crystallize by evaporation.—Ph. U. S.) Virtues:—those of iodide of iron.

POTASSII CYANIDUM, P. Cyanuretum.

POTASSII CYANURETUM, P. Cyan'idum, Cyanuret of Potassium, *Hydrocyanate of Potassa*. (Potassii Ferrocyanur., in pulv. ℥vii; Potass. Carbonat. exsiccata, ℥ij. Mix intimately and throw into a deep iron crucible, heated to redness; keep up the heat till effervescence ceases, and the fused mass concretes, of a pure white colour, upon a warm glass rod dipped into it; then pour out the liquid carefully into a shallow dish to solidify, stopping before the salt becomes contaminated with the precipitated iron. Break up the mass whilst warm, and preserve in well-stopped bottles.—Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

POTASSII DEUTO-CARBONAS, Potassæ carbonas.

POTASSII FERROCYANURETUM, P. Ferrocyan'idum, Ferrocyanide of Potassium, *Ferrocyanate of Potassa*, *Ferrocyanate of Potassa*, *Ferrocyanate of Potassa*, *Ferrocyanate of Potassa*, (F.) *Protocyanure jaune de fer et de potassium*, *Cyanure de fer et de potassium*. The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colliquative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

POTASSII HYDRARGYRO-IODIDUM, Potassæ Iodohydrargyras, *Hydrargyrum biiodatum cum kalio iodato*, *Kalium iodatum hydrargyratum*, *Iodohydrargyrate* or *Hydrargyro-iodide of Potassium*. This salt is made by the combination of iodide of potassium with red iodide of mercury. Its properties are similar to those of the iodides of mercury, but in a less degree.

POTASSII IODIDUM, Potassæ hydriodas—p. Ioduretum, Potassæ hydriodas—p. Oxygeno-chloruretum, Potassæ murias hyperoxygenatus—p. Protoxidi hydriodas, Potassæ hydriodas.

POTASSII SULPHO-CYANURETUM, Sulpho-cyanuret of Potassium. This salt has been prepared as a substitute for hydrocyanic acid, and cyanuret of potassium, on the ground of its possessing their advantages without their inconveniences.

POTASSII SULPHURETUM, Potassæ Sulphuretum seu tersulphuretum, Kali sulphuretum, *Hepar Sulphuris*, *H. sulphuris valianum* seu *sulphuris vulgare*, *Sulphuretum lixiviatum* seu *kallicum*, *Liver of Sulphur*, *Sulphuret of Potassa*, (F.) *Sulfure de potasse*, *Sulfure de potassium sulfaté*, *Foie de Soufre*. (Sulphur. ℥j. Potassæ carb. ℥ij. Rub them together, and place the mixture in a covered crucible upon the fire until they unite. It has been employed in affections of the chest, as an expectorant, in the dose of from ℥ss to ℥j,

largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.)

POTASSII TER-SULPHURETUM, Potassii sulphuretum.

POTASSIUM. Same etymon as potash. The metallic base of potassa.

POTASSIUM, BROMURE DE, see Bromino—p. Cyanuret of, Potassii cyanuretum—p. Ferrocyanide of, Potassii ferrocyanuretum—p. Ferrocyanuret of, Potassii ferrocyanuretum—p. Iodide of, Potassæ hydriodas—p. Sulphuret of, Potassii sulphuretum—p. Superprotosulphate of, Potassæ super-sulphas.

POTATO, Solanum tuberosum.

POTATO FLY, Lytta vittata.

POTATO, HOG, Convolvulus panduratus.

POTATO OIL, Oil, fusel. By distilling potato oil with anhydrous phosphoric acid, a volatile colorless oily liquid is procured, which is lighter than water, and boils at 102°. This is *Amylene* or *Amylen*, (F.) *Amylène*. It is best prepared from fusel oil by the action of chloride of zinc. The vapour has been employed as an anæsthetic.

POTATO, SPANISH, Convolvulus batatas—p. Sweet, Convolvulus batatas.

POTATO VINE, WILD, Convolvulus panduratus.

POTATO, WILD, Convolvulus panduratus.

POTBELLY, Physconia.

POTECARY, Apothecary.

POTELÉE, Hyoscyamus.

POTENTIA, Force.

POTENTIA seu POTES'TAS COËUN'DI, Capability of copulation.

POTENTIA GENERAN'DI. The power of procreation.

POTENTIA IRRITANS, Stimulus.

POTENTIAL, *Potentia*, (F.) *Potentiel*; from *potens*, 'able.' An epithet for remedies which, although energetic, do not act till sometime after their application. The caustic alkalies, for instance, are called *Potential cauteries* in contradistinction to the hot iron, which is termed *actual*.

POTENTILLA, P. reptans.

POTENTILLA ANSERINA, P. argentiua seu impolita seu neglecta, *Argentina vulgaria*, *Fragaria anserina*, *Argentine*, *Chenobolcon*, *Argentaria*, *Anserina*, *Silver Weed*, *Wild Tansy*, *Moorgrass*, (F.) *Argentine*, *Potentille*, *Herbe aux oies*. Ord. Rosaceæ. The leaves are mildly astringent and tonic.

POTENTILLA ARGENTINA, P. anserina—p. Impolita, P. anserina—p. Neglecta, P. anserina.

POTENTILLA NORVEG'ICA, *Norway Cinque-foil*, an indigenous plant, is possessed of similar properties.

POTENTILLA PALUSTRIS, *Comarum palustre*.

POTENTILLA REPTANS, *Pentaphyllum*, *Fragaria pentaphyllum*, *Potentilla*, *Quinquefolium*, *Q. majus*, *Common cinquefoil*, (F.) *Potentille rampante*, *Quintefeuille*. The roots are possessed of astringent properties.

POTENTILLA TORMENTILLA, *Tormentilla*.

POTENTILLE, *Potentilla anserina*—p. *Rampante*, *Potentilla reptans*.

POTENTIZING, see Dynamic.

POTERIUM SANGUISORBA, *Pimpinella saxifraga*.

POTESTAS COEUNDI, Potentia coeundi—p. Generandi, Potentia generandi.

POTEX, Anus.

POTHOMOR'PHA PELTA'TA, *Pothomorphæ peltata*, (pothos, and ποθήν, 'shape,') *Caapeba* [?]. A Brazilian plant, Order, Piperaceæ, which is possessed of diuretic properties, and has been given in strangury.

POTHOMORPHA UMBELLA'TA, also called *Caapeba* [?], is used in Brazil to modify nutrition, as in glandular affections, in which it is also given externally in the form of decoction.

POTHOS FETIDA, Dracontium fœtidum—p. Putorii, Dracontium fœtidum.

POTIMOS, Potable.

POTIO, Drink, Haustus, Potion—p. Calcis carbonatis, Mistura cretæ—p. Effervescens antiemetica, Potion of Riverius—p. Leniens, Looch ex ovo—p. Oleosa, Looch ex ovo—p. Picea, see Pinus sylvestris.

POTION (F.), *Potio*; from *poto*, 'I drink.' *Hydrolé*, *Hydrolite*. A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *mixture*. See *Mistura*.

POTION PECTORALE, Looch ex ovo.

POTION OF RIVERIUS. A mixture of *Lemon Juice* and *Subcarbonate of Potass*,—generally given in a state of effervescence. It is the *Potio efferves'cens anti-emetica dicta Riverii*, of the Parisian codex. The name in the codex indicates its use.

POTIIONIS DESIDERIUM, Thirst.

POTIRON, Cucurbita pepo.

POTIUNCULA, Haustus.

POTOPARANÆA, Delirium tremens.

POTOS, Potable.

POTOTROPARANÆA, Delirium tremens.

POTTINGAR, Apothecary.

POTT'S CURVATURE, Vertebral disease.

POTT'S DISEASE, Vertebral disease.

POTUS, Drink—p. Hippocraticus, Claret.

POU, Pediculus.

POUCE, Pollex, see *Digitus*.

POUCHED, Encysted.

POUCHES, LARYNGEAL, see *Laryngeal pouches*.

POUDRE, Powder, Pulvis—p. *Absorbante et anti-acide*, Pulvis de magnesiâ compositus—p. *d'Alun composée*, Pulvis sulphatis aluminæ compositus—p. *Antiarthritique anière*, Pulvis de amarîs compositus—p. *Antiasmatiche*, Pulvis de sulphure et scillâ—p. *Antimoniale composée ou de James*, Antimonial powder—p. *Aromatique*, Pulvis cinnamomi compositus—p. *d'Asarum composée dite stermutatoire*, Pulvis asari compositus—p. *Balsamique*, Pulvis myrrhæ compositus—p. *de Birkmann*, Pulvis de aro compositus—p. *de Blanchement*, Calcis chloridum—p. *de Cannelle composée ou aromatique*, Pulvis cinnamomi compositus—p. *Castillon*, see *Powders*, *Castillon*—p. *Cathartique*, Pulvis scammonæ compositus—p. *Caustique du frère Cosme*. Powder, arsenical, of Côme—p. *de Chypre*, see *Cladonia rangiferina*—p. *du Comte de Palme*, Magnesiæ carbonas—p. *Cornachine*, Pulvis cornachini—p. *de Corne brûlée avec opium*, Pulvis cornu usti cum opio—p. *Coton*, see *Collodion*—p. *de Craie composée*, Pulvis cretæ compositus—p. *de Craie composée avec opium*, see *Pulvis cretæ compositus cum opio*—p. *de Dover*, Pulvis ipecacuanhæ compositus—p. *du Duc de Portland*, Pulvis Ducis Portlandiæ—p. *de Dupuytren*, Powder of Dupuytren—p. *Gazifère laxative*, Powders, Seidlitz—p. *Gazifère simple*, Powders, soda—p. *de Gomme adragant composée*, Pulvis tragacanthæ compositus—p. *de Gomme gutte*, Pulvis e gummi guttâ—p. *Hydragogue*, Pulvis e gummi guttâ—p. *Incisive*, Pulvis

de sulphure et scillâ—p. *d'Ipecacuanha et opium*, Pulvis ipecacuanhæ compositus—p. *de Jalap composée*, Pulvis jalapæ compositus—p. *de Kino composée*, Pulvis kino compositus—p. *de la Mirandole*, Pulvis Ducis Portlandiæ—p. *de Pêrard*, Pulvis de sennâ, scammonæ et lignis—p. *de Quercetanus*, Pulvis e gummi guttâ—p. *de Rousselot*, Powder, arsenical, of Côme—p. *de Saint Ange*, Pulvis asari compositus—p. *de Savon végétale*, Pulvis gummosus alkalinus—p. *de Scammonée composée*, Pulvis scammonæ compositus—p. *de Sedlitz*, Powders, Seidlitz—p. *de Séné composée*, Pulvis sennæ comp.—p. *de Sentinelli*, Magnesiæ carbonas—p. *Styptique*, Pulvis sulphatis aluminæ compositus.

POUDRE SUBTIL DE DELCROIX. A fashionable depilatory "for removing superfluous hair in less than ten minutes." It is said to consist of *Quicklime* and *Sulphuret of Arsenic*, with some vegetable powder.—Paris.

POUDRE TEMPÉRANTE DE STAHL, Pulvis de sulphate potassæ compositus—p. *de Tennant*, Calcis chloridum—p. *de Valentini*, Magnesiæ carbonas—p. *Vermifuge mercurielle*, Pulvis e sulphureto hydrargyro nigro et scammonio—p. *Vermifuge sans mercure*, Pulvis ex helminthocorto compositus.

POUDRE DE ZWINGER, Magnesiæ carbonas.

POUGUES, MINERAL WATERS OF. These alkaline waters are in the department of Nièvre, France. They contain carbonic acid, carbonates of soda, lime, and magnesia; chloride of sodium; alumina, and silica, with protoxide of iron.

POUKE, Papula.

POULAIN, Bubo.

POULET, VIN DE (F.) *Pullet Wine*. A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

POULIOT, Mentha pulegium.

POULS, Pulse—p. *Abdominal*, Pulsus inferior—p. *des Adultes*, Pulse, natural—p. *Agité*, Pulsus fortis—p. *Bas*, Pulse, low—p. *Capital*, Pulse, nasal—p. *Combiné*, Pulse, complex—p. *Compliqué*, Pulse, complex—p. *Composé*, Pulse, complex—p. *Concentré*, Pulse, contracted—p. *Défaillant*, Pulsus deficiens—p. *Déprimé*, Pulse, depressed—p. *Développé*, Pulse, developed—p. *de la Diarrhée*, Pulse, intestinal—p. *Dur*, Pulse, hard—p. *Élevé*, Pulse, ardent—p. *Embarrassé*, Pulsus intricatus—p. *de l'Estomac*, Pulse, stomachal—p. *Étroit*, Pulsus strictus—p. *de l'Expectoration*, Pulse, pectoral—p. *Faible*, Pulse, feeble—p. *du Foie*, Pulse, hepatic—p. *Grand*, Pulse, large—p. *Insensible*, Pulsus deficiens—p. *Intercaedent*, Pulse, intermittent—p. *des Intestins*, Pulse, intestinal—p. *Langouissant*, Pulse, languid—p. *Lent*, Pulse, slow—p. *de la Matrice*, Pulsus uterinus—p. *Modéré*, Pulse, natural—p. *Mou*, Pulse, soft—p. *de Nez*, Pulse, nasal—p. *Ondoyant*, Pulse, undulating—p. *Ondulant*, Pulse, undulating—p. *Pulpitant*, Pulse, tremulous—p. *Parfait*, Pulse, natural—p. *Petit*, Pulse, small—p. *Plein*, Pulse, full—p. *Précipité*, Pulse, frequent—p. *Profond*, Pulse, deep—p. *Prompt*, Pulse, sharp—p. *Rare*, Pulse, slow—p. *Rebondissant*, Pulsus dirotus—p. *Redoublé*, Pulsus dirotus—p. *des Règles*, Pulsus uterinus—p. *Roide*, Pulse, tense—p. *Serratile*, Pulsus serrinus—p. *Serré*, Pulse, contracted—p. *de la Sueur*, Pulsus sudoralis—p. *Tardif*, Pulse, slow—p. *Tendu*, Pulse, tense—p. *Tremblant*, Pulse, tremulous—p. *de l'Urine*, Pulsus urinalis—p. *Véhément*, Pulsus fortis—p. *Ventral*, Pulsus inferior—p. *Vide*, Pulsus vacuus—p. *Vif*, Pulse, sharp—p. *Vite*, Pulse, sharp.

POULTICE, Cataplasm. For different poultices, see Cataplasm and Cataplasma.

POUNCE, Sandarac.

POUND, *Libra*, *Litra*, *λίτρα*, *Pondo*, *Balgedia* (of twelve oz.), *Barda'dia*, (F.) *Livre*, from *pondere*, 'to weigh.' A weight, consisting of twelve ounces Troy,—sixteen ounces avoirdupois. See Weights and Measures.

POURD-MILK, Colostrum.

POURPIER CULTIVÉ, Portulaca.

POURPRE, Purpura—p. *Blanc*, Miliary fever—p. *de Cassius*, Purple of Cassius.

POURRIURE, Putrefaction—p. *d'Hôpital*, Hospital gangrene.

POUS, Pes.

POUNSE, Pursiness.

POUSSÉE, Lichen.

POUSSIÈRE TUBERCULEUSE (F.), 'Tuberculous Dust.' A name given by MM. Riiliet and Barthez to fine white or yellow minute points of tuberculous matter occurring in myriads, so as to be likened to dust.

POUSSIE, see Pursiness.

POW, Head.

POWDER, Pulvis.

POWDER OF ÆTHIOPIA, GUY'S. A once celebrated anthelminthic, which consisted of *purc rased tin*, *mercury*, and *sulphur*, triturated together.

POWDER OF ALOES, COMPOUND, *Pulvis aloes compositus*, *Pulvis sulphatis aluminae compositus*—p. of Aloes with canella, *Pulvis aloes cum canella*—p. Alum, compound, *Pulvis sulphatis aluminae compositus*—p. Antimonial, *Chenevix's*, Antimonial powder—p. Aromatic, *Pulvis cinnamomi compositus*.

POWDER, ARSENICAL, OF CÔME, *Côme's powder*, (F.) *Poudre caustique du frêre Côme ou de Roussetot*—a caustic—is formed of *arsenious acid*, gr. x; *red sulphuret of mercury*, gr. xl; powdered animal charcoal, gr. x. It is made into a paste with mucilage.

POWDER, ARSENICAL, OF JUSTAMOND, is made by melting *sulphuret of antimony* 16 parts; *arsenious acid* 1 part, in a crucible. When the mass is cold it must be reduced to powder, and five parts of *extract of opium* be added.

POWDER OF ARUM, compound, *Pulvis de arcompositus*—p. of Asarabacca, compound, *Pulvis asari compositus*—p. of Bladder-wrack, yellow, *Pulvis quercus marinae*—p. Bleaching, *Calcei chloridum*—p. Camboge, *Pulvis e gummi guttâ*—p. Cardinal del Lugo's, *Cinchona*—p. Castillon, see Powders, Castillon—p. of Catechu, compound, *Pulvis Catechu compositus*—p. of Chalk, compound, *Pulvis cretæ compositus*—p. of Chalk with opium, compound, *Pulvis cretæ compositus cum opio*—p. of Cinnamon, compound, *Pulvis cinnamomi compositus*—p. Côme's, Powder arsenical of Côme—p. of Contrayerva, compound, *Pulvis contrayervæ compositus*—p. Countess's, *Cinchona*—p. Countess of Kent's, *Cantianus pulvis*—p. Cyprus, *Hibiscus abelmoschus*—p. Dover's, *Pulvis ipecacuanha compositus*.

POWDER OF DUPUYTREN (CAUSTIC); (F.) *Poudre de Dupuytren*, formed of 1 part of arsenious acid and 200 parts of mild chloride of mercury. A mild and manageable caustic for causing an eschar on exposed surfaces, and in lupus, &c.

POWDER, EARL OF WARWICK'S, *Pulvis coracchini*—p. of Ethiopia, Powder of Ethiopia.

POWDER OF FAYNARD. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

POWDER, FEVER, SCHWANBERG'S, Antimonial powder.

POWDER-FOLDER, In Pharmacy, an apparatus by which papers containing powders are folded of the desired length.

POWDER, GINGER-BEER, see *Amomum zingiber*—p. Gout, Duke of Portland's, *Pulvis Ducis Portlandiæ*—p. Gray, *Hydrargyrum cum cretâ*—p. of burnt Hartshorn with opium, *Pulvis cornu cervi cum opio*—p. of Ipecacuanha, compound, *Pulvis ipecacuanhæ compositus*—p. of Jalap, compound, *Pulvis jalapæ compositus*—p. James's factitious, Antimonial powder—p. Jesuit's, *Cinchona*—p. of Kino, compound, *Pulvis kino compositus*.

POWDER, KNOX'S. A disinfecting preparation, composed of eight parts of *chloride of sodium*, and three parts of *chlorinated lime*. An ounce, dissolved in a tumblerful of water, forms a solution of proper strength.

POWDER OF LEMONADE, see *Lemonade*—p. of Magnesia, compound, *Pulvis de magnesiâ compositus*—p. of the Marquis, *Marclionis pulvis*—p. Mead's, against the bite of a Mad dog, *Pulvis antilyssus*—p. Myrrh, compound, *Pulvis myrrhæ compositus*—p. Portland, *Pulvis Ducis Portlandiæ*—p. of Rhubarb, compound, *Pulvis rhei compositus*—p. Saline, compound, *Pulvis salinus compositus*—p. of the three Sanders, see *Diatrium*—p. Scammony and aloes, *Pulvis scammonii cum aloë*—p. Scammony, compound, *Pulvis scammonia compositus*—p. of Senna, compound, *Pulvis sennæ compositus*—p. Sneezing, see *Veratrum album*—p. Spruce beer, see *Spruce beer*—p. of Sympathy, *Sympathetic powder*—p. Talbor's, *Cinchona*—p. Tennant's, *Calcei chloridum*—p. Tonquin, *Pulvis cobbii*—p. Tooth, *Dentifrice*—p. Tragacanth, compound, *Pulvis tragacanthæ compositus*.

POWDER, VIEN'NA, is composed of equal parts of quicklime and potassa cum calce. In using it, it is made into a paste—*Vienna paste*, (F.) *Caustique de Vienne*, *Pâte Caustique de Vienne*—with spirits of wine, and is applied on the diseased part, previously circumscribed by a hole cut in a sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as to cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos*, *Causticum Viennen'se fusum Filhos*, from the name of the author of the process.

POWDERS, CASTILLON, OR CASTILHOS, so called from the name of the physician who first proposed them. They are formed of *sago*, in powder; *salep*, in powder; *tragacanth*, in powder, each, four parts; *prepared oyster-shells*, one part, *cochineal*, half a part, divided into powders of one drachm each; one of which is given three or four times a day as a demulcent in diarrhœa and dysentery. Dorvault makes *poudre de Castillon* synonymous with arrow root.

POWDERS, SODA, *Pulveres effervescentes*, (F.) *Poudres gazifères simples*. (*Sodæ carb. ʒss*, in each blue paper; *tartaric acid*, gr. xxv, in each white paper; for half a pint of water.) A pleasant, cooling drink; taken during the effervescence.

Seidlitz Powders, (F.) *Poudres gazifères laxatives* ou *Poudres de Seidlitz*, contain one or two drachms of tartrate of potassa and soda, added to the alkali in blue paper.

POWER, Faculty—p. Inherent, Irritability—p. Sensorial, see Sensorial—p. Tonic, Irritability.

POX, Syphilis, Variola—p. Chicken, *Varicella*.

Pox Doctor, Syphilidiater.

Pox, FRENCH, Syphilis—p. Grease, see Grease—p. Horn, see *Varicella*—p. Nodde, *Syphilitomania*—p. Small, *Variola*—p. Swine, see *Varicella*—p. Water, see *Varicella*.

POZZUOLI, MINERAL WATERS OF. Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Aqua della pietra*, Temp. 91° Fah. 2. *Aequa di Cavalcanti*, Temp. 100°. *A. di subveni homini*, Temp. 102°; *A. del cantarello*, Temp. 86 to 89°; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary—p. Irregular, see Irregular—p. Regular, see Regular—p. Routine, Routinist.

PRÆ. In composition, means 'before.'

PRÆBIUM, Dose.

PRÆCAUTIO, Prophylaxis.

PRÆCIPITANS, Absorbent—p. Magnum, Sepia.

PRÆCIPITATUM ALBUM, Hydrargyrum præcipitatum.

PRÆCIPITATUS RUBER, Hydrargyri nitrico-oxydum.

PRÆCISIO PRÆPUTII, Circumcision.

PRÆCOCIA, Prunus Armeniaca.

PRÆCOCITY, Precocity.

PRÆCOGNITIO, Prognosis.

PRÆCORDIA, from *præ*, and *cor*, *cordis*, 'the heart.' The diaphragm; also, the thoracic viscera, and the epigastrium.

PRÆCORDIAL or PRÆCORDIAL REGION, *Re'gio præcordiaca* seu *præcordialis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right,—and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

PRÆCORDIUM, *Fossette du cœur*—p. Pedis, Metatarsus.

PRÆCOX MATURITAS, Precocity.

PRÆCUSTODIA, Prophylaxis.

PRÆDIASTOLICUS, Prædiastolic.

PRÆDICTIO, Prognosis.

PRÆDISPOSITIO, Predisposition.

PRÆDIVINATIO, Mantia.

PRÆDOMINIUM, from *præ*, and *domo*, *dominium*, 'I subdue.' Predominance of one thing over another.

PRÆDOMINIUM AQUÆ. A predominance of watery fluid,—*Tenuitas aquosa*.

PRÆDOMINIUM SANGUINIS ARTERIOSI. A predominance of arterial blood, *Arteriositas sanguinis*.

PRÆDOMINIUM SANGUINIS VENOSI, *Venositas Sanguinis*. Predominance of venous blood.

PRÆFOCATIO, Orthopnoea, Suffocation—p. Fancium, Angone—p. Matricis, Angone—p. Uterina, Angone.

PRÆFOCATION, Strangulatio uterina.

PRÆFORMATIO, Preformation.

PRÆGNANS, Pregnant.

PRÆGNAS, Pregnant.

PRÆGNATIO, Fecundation, Pregnancy.

PRÆGNATUS, Fecundation, Pregnancy.

PRÆGNAX, Pregnant.

PRÆGUSTATIO, *Avant-gout*.

PRÆHENSIO, Prehensio.

PRÆLINGUA. The anterior part or tip of the tongue.

PRÆLIUM, Coition, Press, Tourniquet—p. Arteriale, Tourniquet.

PRÆLUMBARIS, Prelumbar.

PRÆNOTIO, Prognosis.

PRÆNUNTIATIO, Prognosis.

PRÆPARATIO, Preparation—p. Chyli, Chylification.

PRÆPARATUM, Preparation.

PRÆPOTENTIA, from *præ*, and *potens*, 'powerful,' Great power or strength.

PRÆPOTENTIA VIRILIS. Great, or too great procreative power on the part of the male.

PRÆPOTIO, Propotismus.

PRÆPUTIALIS, Preputial.

PRÆPUTIUM, Prepuce.

PRÆSAGIUM, Mantia.

PRÆSCIENTIA, Prognosis.

PRÆSCITIO, Prognosis.

PRÆSCRIPTIO, Prescription.

PRÆSCRIPTUM, Prescription.

PRÆSEPIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATIO, Prophylaxis.

PRÆSERVATIVUM, Amuletum.

PRÆSERVATORIA INDICATIO. A preservative indication; one proper for preventing the development of disease.

PRÆSERVATORIUS, Prophylactic.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRAIRIE BUSH, STINKING, *Ptelea trifoliata*—p. Pines, *Liatris*.

PRASINUM VIRIDE, Cupri subacetata.

PRASINUS, Porraceous.

PRASITES, from *prasion*, 'horehound.' Wine in which the leaves of horehound have been infused.

PRASIMUM, Marrubium.

PRASUM, Allium prasum.

PRAXIS, Action.

PRAXIS MEDICA. The practical exercise of the healing art.

PRÆSER, Rennet.

PRÆCIPITATE, RED, Hydrargyri nitrico-oxydum—p. White, Hydrargyrum præcipitatum.

PRÆCIPITATION, *Præcipitatio*, (F.) *Præcipité*, from *præcipitare*, *præcipitatum*, (*præ*, and *caput*, 'the head,') 'to throw headlong.' The action by which a body abandons a liquid in which it is dissolved, and becomes deposited at the bottom of the vessel. The matter, so thrown down or precipitated, is called a *precipitate*.

PRÆCIPITATION DE LA MATRICE, Procidencia uteri.

PRÆCIPITE BLANC, Hydrargyrum præcipitatum—p. *Noir*, see Hydrargyri oxydum cinereum—p. *Oxydum per se*, Hydrargyri nitrico-oxydum—p. *Rouge*, Hydrargyri nitrico-oxydum.

PRÆCOCITY, *Præcociousness*, (F.) *Præcôitè*, *Præcox maturitas*, *Maturity præcocious*, from *præ*, 'before,' and *coquere*, 'to cook.' Rapid development before the usual time. See *Præotia*.

PRÆCORDIAL, Præcordial.

PRÆCURSORY, *Præcursorius*, (F.) *Præcurseur*, from *præ*, and *curro*, *cursum*, 'I run.' That which precedes.

PRÆCURSORY or PRÆMONITORY SIGNS or SYMPTOMS, (F.) *Signes præcurseurs* ou *prémonitoires*, *S. avant coureurs*, are those which indicate an approaching disease.

PREDIASTOLIC, *Prædiastolicus*, from *præ*, and *diastole*. That which precedes the diastole of the heart,—as '*prædiastolic friction sound*.'

PREDISPOSANT or PREDISPOSING CAUSES, see Causes, predisponent.

PREDISPOSIT'ION, *Prædisposit'io*, *Semin'ia morbo'rum* (Gaubius); from *præ*, and *disponere*, *dispositum*, 'to dispose,' (F.) *Inimence morbide*. That constitution or condition of the body, which disposes it to the action of disease

under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises solely from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition*.

PREDORSAL, *Prædorsalis*, from *præ*, and *dorsum*, 'the back.' That which is in front of the back.

PREDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÉ-DORSO-ATLOÏDIEN, *Longus colli*.

PRÉ-DORSO-CERVICAL, *Longus colli*.

PRE-EXISTENCE OF GERMS, see *Pre-formation*.

PREFORMATION, *Præformatio*, from *præ*, 'before,' and *formatio*, 'forming.' An ancient theory of generation, which maintained that the germ of every part exists, but not visibly, before fecundation, and that fecundation occasions their development. It was the doctrine of *pre-existence of germs*.

PREGNANCY, *Prægnatio*, *Prægnans*, *Impregnatio*, *Ingravidatio*, from *præ*, and *genere*, 'to beget'; *Hysterocye'sis*, *Graviditas*, *G. uterina*, *En'cyman*, *Cye'sis*, *Eucey'sis*, *En'cy'sis*, *Eucymo'sis*, *Cyopho'ria*, *Gestatio*, *Fœtatio*, *Ingravidatio*, *Utero-gestatio*; (F.) *Grossesse*. The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days—the ordinary *term* or *duration of gestation*, although the period may be protracted to 300 days or upwards,—at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See *Reproduction*. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb: and, 2. *Preternatural* or *extra-uterine*, *Exfœtatio*, *Conceptio vitio'sa*, *Paracye'sis* seu *Eucey'sis*, *Ethysterocye'sis*, *Ethysterocye'sis*, *Dysto'cia*, *Dycye'sis* seu *Graviditas extra-uterina*, (F.) *Grossesse contre-nature*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; kyestein in the urine from an early period; a bluish tint of the vagina after the fourth week; about the fifth month, the evidence by *ballotement*, the placental *sound*, and the sound of the fetal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

PREGNANCY, ABDOMINAL, *Eucey'sis abdominalis*, *Dolencye'sis*, *Graviditas abdominalis*, (F.)

Grossesse abdominale. That in which the ovum has escaped into the cavity of the abdomen.

PREGNANCY, AFÆTAL, *Pregnancy without a fœtus*, (F.) *Grossesse afatale* ou *sans fœtus*. Pregnancy produced by a false or degenerated conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarco-hysteria*, *hydro-hysteria*, *gazo-hysteria*, and *hemato-hysteria pregnancies*.

PREGNANCY, BIGEMINAL, (F.) *Grossesse bigeminale*, *Double pregnancy*. Pregnancy in which there are twins in utero.—Madame Boivin.

PREGNANCY, COMPLEX, (F.) *Grossesse complexe*, *G. inter-extra uterine*, is when the womb, besides a fœtus, contains much water, hydatids, a mole, &c.

PREGNANCY, COMPOUND, *Polybreph'ia*, *Polycye'sis*, *Polycye'sis*, (F.) *Grossesse composée*, is when there are two or three fœtuses in the cavity of the uterus.

PREGNANCY, DOUBLE, *Pregnancy, bigeminal*—p. Duration of, see *Pregnancy*—p. *Extra-uterine*, see *Pregnancy*.

PREGNANCY, FALSE, *Graviditas spuria*, (F.) *Grossesse fausse* ou *apparente*, *Pseudocye'sis*. Authors have thus called different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best-informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be;—a mole, hydatids, water, blood, or polypus distending the parietes of the uterus;—chronic enlargement of the uterus; development of tumours, &c., in its substance;—scirrhus; dropsy of the ovaria; ascites; tympanites, &c.

PREGNANCY, FÆTAL, (F.) *Grossesse fœtale*. Pregnancy in which there is a fœtus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary*, *bigeminal*, *trigeminal*, and *sarco-fœtal* pregnancies, which form the first order; and the *tubal*, *ovarial*, and *abdominal*, which constitute the second.

PREGNANCY, GAZO-HYSTERIC, (F.) *Grossesse Gazo-hystérique*. Afœtal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

PREGNANCY, HÆMATO-HYSTERIC, (F.) *Grossesse hæmato-hystérique*. Afœtal pregnancy, caused by accumulation of blood in the uterus.—Madame Boivin.

PREGNANCY, HYDRO-HYSTERIC, (F.) *Grossesse hydro-hystérique*. Afœtal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

PREGNANCY, INTERSTITIAL, *Graviditas in uteri substantiâ seu interstitiâ*. The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

PREGNANCY, MORBID, *Paracye'sis*, *Dysto'cia*, *Dycye'sis*. The progress of pregnancy disturbed or enlarged by the supervention of general or local disorder.—Good.

PREGNANCY, OVA'RIAN, (F.) *Grossesse ovarienne* ou *de l'ovaire*, *Eucey'sis ovaria*, *Oöicye'sis*, *Oöicye'sis*, *Graviditas uteri seu extra-uterina in ovario*. Pregnancy in which the fœtus is developed in the interior of the ovary.

PREGNANCY, PLEA OF. A plea, which a woman, capitally convicted, may set up in arrest of execution until she is delivered. See *Jury of Matrons*, and *De ventre inspicendo*.

PREGNANCY, PRETEND'ED. The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.)

Supposition de part. (This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.)

PREGNANCY, SARCO-FÆTAL, (F.) *Grossesse sarco-fœtale.* Pregnancy in which there are one or more fœtuses, and one or more moles.—Madame Boivin.

PREGNANCY, SARCO-HYSTERIC, (F.) *Grossesse sarco-hystérique.* A fœtal pregnancy formed by moles, hydatis, or a false conception.—Madame Boivin.

PREGNANCY, SOLITARY, (F.) *Grossesse solitaire ou simple.* Pregnancy in which there is a single fœtus.—Madame Boivin.

PREGNANCY, TRIGEM'INAL, (F.) *Grossesse trigéminalle ou triple.* Pregnancy in which there are three fœtuses in the cavity of the uterus.—Madame Boivin.

PREGNANCY, TUBAL, (F.) *Grossesse tubaire, Eecyë'sis tuba'lis, Gravid'itas tuba'ria.* Pregnancy where the fœtus remains and is developed in the Fallopian tube.

PREGNANCY, UTERINE, see Pregnancy.

PREGNANCY, UTERO-ABDOM'INAL, (F.) *Grossesse utéro-abdominale.* Pregnancy consisting of two fœtuses; one in the uterus—the other in the abdominal cavity.—Madame Boivin.

PREGNANCY, UTERO-OVA'RIAL, (F.) *Grossesse utéro-ovarienne.* Pregnancy with two fœtuses, one in the womb, the other in the ovary.

PREGNANCY, UTERO-TUBAL, (F.) *Grossesse utéro-tubaire.* Pregnancy in which there is at the same time a fœtus in the womb and another in the Fallopian tube.

PREGNANT, *Prægnans, Prægnas, Prægnax, Fetus, Fœtus, Encar'pos, Grav'ida, Plena mul'ier, Incincta, Gravid, Breeding.* (Old Eng.) *Bealing.* Same etymon. (F.) *Enciente.* One in a state of pregnancy;—one with child.

PREHENSIO, Catalepsy, Epilepsy.

PREHENS'ION, *Prehens'io, from prehendere, prehension, 'to lay hold of.'* The act of laying hold of.

PREHENSION OF FOOD is the act of seizing and carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assump'tio, Pro-slep'sis, Pro-sphora.*

PRÊLE, *Hippuris vulgaris.*

PRÉLOMBAIRE, Prelumbar.

PRÉLOMBO-PUBIEN, *Psoas parvus—p. Trochantin, Psoas magnus.*

PRELUM, Press—p. Arteriale, Tourniquet.

PRELUMBAR, *Prælumb'aris, (F.) Prélom-baire, from præ, and lumbi, 'the loins.'* That which is placed before the loins. The prelumbar surface of the spinal column is the anterior surface of the lumbar portion.

PREMIÈRES VOIES, Primæ viæ.

PREMOLAR, see Molar teeth.

PREMONITORY, see Precursory.

PRENAN'THES, *Gall of the Earth, Dewitt Snakeroot, Lion's Foot.* There are many species of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasm to bites of serpents.

PRENANTHES ALBA, *Nabalus albus—p. Serpentaria, Nabalus albus.*

PRENDRE INSCRIPTION, see Matriculate.

PRÉPARATE (VEINE), see Facial vein.

PRÉPARATION, *Præparatio, from præ, and parare, paratum, 'to get ready.'* The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation;—*Præparatum.*

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREP'UCE, *Præputium, Epag'ogium, Posthæ Pella, Pos'thium, Pu'tium, Foreskin.* The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by areolar membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *cul-de-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præputium clitor'idis.*

PREPUTIAL, *Præputia'lis.* Belonging or relating to the prepuce;—as the 'preputial secretion,—or that which takes place from the lining of the prepuce covering the glans.

PRESBYODOCHIUM, Gerocomium.

PRESBYON'OSI; from *πρεσβυς, 'old,' and νοσος, 'disease.'* Diseases of old age.

PRES'BYOPE, *Presby'tes, (F.) Presbyte, from πρεσβυς, 'old,' and ὤψ, 'the eye.'* One who is long-sighted or affected with presbyopia.

PRESBYOPIA, Presbytia.

PRESBYO'PIC, *Presbyo'picus, Presby'tic, Presby'ticus.* Relating or belonging to presbyopia or long-sightedness.

PRESBYS PHACELUS, Gangrene of old people.

PRESBY'TIA, *Presbyo'pia, Amblyo'pia proximorum, Visus seni'lis, Pres'byopy, (F.) Vue laugue;* from *πρεσβυς, 'an old person.'* A very high degree is termed *Hyperpresby'tia.* A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergence of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness, Far-sightedness, Parop'sis longin'qua, Dyso'pia proximorum.*

PRESBYTIC, Presbyopic.

PRESCRIPTION, *Præscriptio, Anag'raphê, from præ, and scribere, scriptum, 'to write;' For'mula, F. medica, Sched'ula, Præscriptum, Præscriptio medica, Receptum, (F.) Formule, Ordinance.* The formula which the physician writes for the composition of medicines adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *ad'juvans*, or that which is designed to promote the action of the former: the *cor'rigens*, or that intended to correct its operation, or obviate any unpleasant symptom which it may be apt to produce; and the *constit'ens, excip'iens* or *vehic'ulum, Constituent, Excip'ient* or *ve'hicle*, the substance which gives to the other ingredients consistence or form. All these are seen in the following formula for cathartic pills:

Aloes.....	ʒj	Basis.
Hyd. Chlorid. Mit.	gr. x.	Ad'juvans.
Olei Carui.....	gtt. v.	Cor'rigens.
Syrupi.....	q. s.	Constit'ens.

M. et fiant pilulæ xx. See Symbol.

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, *Iamato-taxiolog'ia, Iamatoxyntariolog'ia, Ars form'ulus med'ic'as concinnan'di*, which may serve as an instructive guide to the prescriber:—

OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the *same substance*. B. By combining the basis with substances which are of the same nature: i. e., which are individually capable of producing the same effects, with less energy than when in combination with each other. C. By combining the basis with substances of a *different nature*, and which do not exert any chemical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBVIATING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

A. By *chymically* neutralizing or *mechanically* separating the offending ingredient. B. By adding some substance calculated to guard the stomach or system against its deleterious effects.

OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

A. By uniting those medicines which are calculated to produce the *same ultimate* results, but by modes of operation totally different. B. By combining medicines which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

A. By combining medicines which excite different actions in the stomach and system, in consequence of which *new or modified results* are produced. B. By combining substances which have the property of acting *chymically* upon each other; the results of which are:—a. The formation of new compounds; b. The decomposition of the original ingredients, and the development of the more active elements. C. By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside. a. By the intervention of substances that act *chymically*. b. By the addition of ingredients whose operation is entirely *mechanical*.

OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

A. By which the *efficacy* of the remedy is enhanced. B. By which its *aspect* or *flavour* is rendered more agreeable, or its mode of administration more convenient. C. By which it is *preserved* from the spontaneous decomposition to which it is liable.

[The vocabulary in the author's "Medical Student," Philad., 1844, will aid the student not

only in translating, but in writing his prescriptions: *more solito*.]

PRESENTATION, from (Lat.) *præsens*, (*præ*, 'before,' and *ens*, *cutis*, 'being.') The part of a foetus which is felt *presenting*, on examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*; when any other part, *preternatural*; and the labour is styled *perverse* or *preternatural*, *Parodynia* seu *Dysotocia perversa*, *Cross-birth*, (F.) *Accouchement contre nature*. When any part besides the head, feet, knees, or breech presents, the operation of turning becomes necessary. See Parturition.

PRESERVATIVE, Prophylactic.

PRESIS, Swelling.

PRËSLE, *Hippuris vulgaris*.

PRESMA, Swelling.

PRESPINAL, *Præspinalis*, from *præ*, and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Præ'llium*, *Præ'llium*, *Pressorium*, *Piëster*, *Piëster'ion*, (F.) *Pressoir*, *Presse*, from *premere*, *pressum*, 'to squeeze.' An instrument for subjecting matters to considerable pressure, for the purpose of separating the liquid from the solid portion.

PRESS OF HEROPHILUS, Torcular Herophili.

PRESSE-ARTÈRE, *Serre-naud de Deschamps*, *Serre-Artère*. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

PRESSE-URÈTHRE, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, Pressure.

PRESSIO ABDOMINALE, Pressure, abdominal.

PRESSOIR, Press—*p. d'Hérophile*, Torcular Herophili.

PRESSORIUM, Press.

PRESSURE, *Press'io*, from *premere*, *pressum*, 'to press.' The action of pressing.

PRESSURE, ABDOM'INAL, (F.) *Pressio abdominal*. A mode of examination by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Biehat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can of course be derived from it.

PRESYSTOLIC, *Præystolicus*, from *præ*, 'before,' and *systole*. That which precedes the

contraction of the heart—as “*presystolic friction sound.*”

PRETENDED DISEASES, Feigned diseases.

PRETIBIAL, *Prætibialis*, from *præ*, and *tibia*, ‘the tibia.’ That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

PREVENTIVE, Prophylactic.

PREVENTIVE, ROYAL, from *prævenire*, *præventum*, (*præ*, and *venire*,) ‘to come before.’ An empirical preparation, used as a prophylactic against the venereal virus. It is a solution of *acetate of lead*,—the *Liquor Plumbi Subacetatis dilutus*.

PREVERTEBRAL APONEUROSIS. The aponeurosis which covers the muscles of the pre-vertebral region.

PREVERTEBRAL ARTERY, (F.) *Artère prévertébrale ou méningienne postérieure*. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

PREVERTEBRAL MUSCLES, see Cervical region, anterior—p. Region, Cervical region, anterior.

PRIAPEIA, *Nicotiana rustica*.

PRIAPIS’COS. Same etymon as the next. Name of a piece of wood which forms part of the *scamnum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like a penis.

PRIAPISMUS, *Præputium*, *T. Penis*, *Priapism*, *Horn-colic* (vulg.), *Entæsia Priapismus*, *Rhopalis’mus*, *Satyr’asis*, *Styma*, *Styxis*, from *Πριαπτος*, ‘Priapus.’ Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbid causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor, are the means usually had recourse to for its removal.

PRIAPITIS, Phallitis.

PRIAPUS, *Mutun’us*. In ancient mythology the deity who presided over gardens and the parts of generation, so called *propter deformitatem et membri virilis magnitudinem*.

PRIAPUS, Penis—p. Cervi, see Cervus—p. Ceti, Leviathanic penis.

PRICKET, *Sedum acre*.

PRICKING, Sax. *priccian*, (D.) *pricken*, (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

PRIDE OF CHINA, *Melia azedarach*—p. of India, *Melia azedarach*—p. Tree, *Melia azedarach*.

PRIDEWEED, *Erigeron Canadense*.

PRIEST-PHYSICIANS, see *Asclepiadæ*.

PRIEST’S PINTLE, *Arum maculatum*.

PRIM, *Ligustrum vulgare*.

PRIMA CELLA COLI, *Cæcum*.

PRIME VÆ, (F.) *Premières voies*. ‘The first passages.’ The stomach and intestinal canal:—the lacteals being the *secun’dæ viæ* or ‘second passages.’ See Ways, digestive.

PRIMARY CELL, see Cell.

PRIMEVÈRE, *Primula veris*.

PRIMP’ARA, *Primparti’riens*, (F.) *Primpare*, from *primus*, ‘first,’ and *parere*, ‘to bring forth.’ A name given to a female who brings forth for the first time.

PRIMPARTURIENS, *Primpipara*.

PRIM-STERIAL, *Primi-sterial’is*, from *primus*, ‘the first,’ and *sternum*, ‘the sternum.’ M. Béclard has called *os primi-sterial* ou *clavi-sterial*, the bony portion of the sternum.

PRIMIT’VE, from *primus*, ‘first.’ The first waters, or the waters discharged before the extrusion of the foetus.

PRIMITIVE BAND, see Nerve fibres—p. Streak, Groove, primitive.

PRIMORDIAL CELL, see Cell.

PRIMORDIUM, Arche.

PRIMROSE EVENING, *Cenothera biennis*—p. Tree, *Cenothera biennis*.

PRIMULA OFFICINALIS, P. veris—p. Variabilis, P. veris.

PRIM’ULA VERIS, P. *officinal’is* seu *variabil’is*, from *prim’ulus*, ‘first.’ So called, because it flowers in the beginning of the spring. *Verbas’culum*, *Paral’ysis*, *Herba paralys’is* seu *paralyt’ica*, the Cowslip, *Paigil* or *Peugle*, *Herb Peter*, *Palsycort*, (Prov.) *Cow-striplings*, *Cow-stropple*, *Crenel*, (F.) *Primevère*, *Herbe à la paralysie*, *Fleur de coucou*, *Oreille d’ours*, *Brairette*; *Ord. Primulacææ*. *Sex. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

PRIMULA VULGARIS. The leaves and roots of this plant have been used as stercutoratories.

PRINCE ARTHUR’S FARINACEOUS FOOD, see Farinaceous.

PRINCEPS, Rectum.

PRINCEPS CERVI’CIS (*Arteria Cervical Artery*). A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

PRINCEPS POL’LICIS (*Arteria*), *Arteria magna pollicis*. When the two collateral arteries of the thumb take origin from a common trunk—the trunk is the *Princeps pollicis*.

PRINCIPE CRYSTALLIZABLE DE DÉ-ROSNE, Narcotine—p. de la Mélanose, see *Choroidea tunica*.

PRINCIPES IMMÉDIATS, Principles, immediate.

PRINCIPIUM, Arche, Element—p. Acidificans, Oxygen—p. Adstringens, Tannin—p. Byrsodepsicum, Tannin—p. Coriaceum, Tannin—p. Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Salivale, see Saliva—p. Seytodepsicum, Tannin—p. Urinosum, Urea.

PRIN’CIPLE, COL’OURING, OF THE BLOOD. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous-red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour has been ascribed. See *Hæmaphæin*, and *Hæmatin*.

PRINCIPLE, DIGESTIVE, Pepsin—p. Vital, see Vital principle.

PRINCIPLES, IMMEDIATE, (F.) *Principes immédiats*, *Matériaux immédiats*. A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, immediately.

PRINCIPLES, IMMEDIATE, OF ANIMALS, *Proximate principles*, *Organic Elements*, *Compounds of Organization*. These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric*, *rosacic*, *purpuric*, *allantoic*, *caseic*, *butyric*, &c. The fatty principles are:—*stearin*, *elain*, *cholesterin*, &c.; and the last division includes the most important compounds of organization:—*fibrin*, *gelatin*, *albumen*, *casein*, *osmazome*, &c.

PRINCIPLES, PROXIMATE, P. immediate.

PRINOS (of the ancients), *Ilex aquifolium*.

PRINOS, P. *verticillat’us*, *Alcan’na major latifolia denta’ta*, *Aquifo’lium fo’lis decid’nis*, *Prinos Grono’vii* seu *padifo’lius*, *Black Alder*, *Vir-*

ginia or *Whorled Winterberry*, *Feverbush*, (F.) *Apalachine à feuilles de Prunier*. Ord. Aquifoliaceæ. *Sex. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States—*Prinos*, (Ph. U. S.)—is astringent, bitter, and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

PRINOS GLABER, see *P. lævigatus*—p. Gronovii, *Prinos*.

PRINOS LÆVIGATUS, *Smooth Winterberry*, and **PRINOS GLABER**, *Inkberry*. Indigenous; have the same properties as

PRINOS PADIFOLIUS, *Prinos*.

PRION, *Saw*.

PRIONODES, from *πριον*, 'a saw,' and *εἶδος*, 'shape.' *Serra'ated*. Applied to the sutures of the head.

PRIOR, 'first, foremost,' as

PRIOR ANNULARIS, *Interossea quartus* of Winslow. An internal interosseous muscle which arises from the outside of the metacarpal bone of the ring-finger, and is inserted into the outside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger outwards.

PRIOR INDICIS, *Extensor tertii interodii indicis*, (F.) *Sons métacarpo-latéri-phalangiën*. It arises from the outer or radial side of the metacarpal bone of the fore-finger, and is inserted into the outside of the tendon on the back of the fore-finger. *Action*:—to draw the finger outwards, towards the thumb.

PRIOR INDICIS PEDIS, *Adductor Indicis pedis*. An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore-toe. *Action*:—to pull the fore-toe inwards.

PRIOR MEDII, *Prior medii digiti*.

PRIOR MEDII DIGITI, *Prior Medii*, *Second interossea* of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action*:—to draw the middle finger outwards.

PRIOR MEDII DIGITI PEDIS, *Adductor medii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use*:—to pull the middle toe inwards, or towards the inner side of the foot.

PRIOR MINIMI DIGITI, *Adductor minimi digiti*. An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe, and is inserted into the inside of the root of the first bone of the little toe. *Action*:—to pull the little toe inwards.

PRIOR TERTII DIGITI PEDIS, *Adductor tertii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action*:—to pull the third of the small toes inwards.

PRISIS, *Brygmus*, *Trepanning*.

PRISMA, *Scabs*.

PRYSMUS, *Brygmus*, *Trepanning*.

PRIVATE PARTS, *Genital organs*.

PRIVET, *Ligustrum vulgare*.

PRIVITIES, *Genital organs*.

PRIVY, *Ligustrum vulgare*—p. *Members*, *Genital organs*—p. *Parts*, *Genital organs*.

PRO, *πρῶ*, 'before.' A common prefix to words, as in *Procatartetic*, *Prostate*, &c.

PROAGOREUSIS, *Prognosis*.

PROBANG, *Sponge-probang*, *Detrusorium ex bale'na*. Allied to *probe*. A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Reponsoir d'urêtes*.

PROBARBIUM, *Gencias*.

PROBASCANIUM, *Amuletum*.

PROBASCANTIUM, *Amuletum*.

PROBE, *Catheterize*, *Specillum*—p. *Eyed*, see *Specillum*.

PROBING, see *Melosis*.

PROBOLE, *Processus*.

PROCARDIUM, *Serobiculus cordis*.

PROCÉDÉ, *Process*.

PROCEDURE, *Procédé*.

PROCEPHALI, *Capitones*.

PROCERUS NASI, *Pyramidalis nasi*.

PROCÈS, *Process*—p. *Ciliaires*, *Ciliary processes*.

PROCESS, *Apophysis*, *Processus*.

Proc'ess, *Ratio*, (F.) *Procédé*, from *procedere*, *processum*, 'to march forwards.' *Procedure*,—method of performing any operation, chemical, pharmaceutical, or surgical.

PROCESS, *Cuneiform*, *Basilar process*—p. *Modelling*, see *Modelling Process*—p. of *Rau*, see *Malleus*—p. *Vertical superior longitudinal*, *Falx cerebri*.

PROCESSUS. *A process*; same etymon; *Projectura*, *Probole*, (F.) *Proèda*. An apophysis or eminence of a bone; see *Apophysis*. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes*.

PROCESSUS ANCONÆUS, *Olecranon*—p. *Annularis*, *Pons Varolii*—p. *Ascendens*, see *Maxillary bone*, (*superior*)—p. *Belenoides*, see *Belenoid*—p. *Blumenbachii*, *Unciform process*—p. *Caudatus*, *Lobulus caudatus*—p. à *Cerebello ad medullam oblongatam*, *Corpora testiformia*—p. *Cerebelli ad pontem*, *Peduncles of the cerebellum*—p. *Cerebelli ad testes*, *Peduncles of the cerebellum*—p. *Cerebri lateralis*, *Cornu ammonis*—p. *Ciliares*, *Ciliary processes*—p. *Clavatus*, see *Funiculi graciles*—p. *Cochleariformis*, see *Tympanum*—p. *Cuneiformis ossis occipitis*, *Basiliary process*—p. *Ensisiformes*, see *Sphenoid bone*—p. *Enteroidei cerebri*, *Convolutions (cerebral)*—p. *Falciformis cerebelli*, *Falx cerebelli*—p. *Falciformis duræ matris*, *Falx cerebri*—p. *Frontalis*, see *Maxillary bone*, (*superior*)—p. *Gracilis of Rau*, see *Malleus*—p. *Laterales uteri*, *Tubæ Fallopiantæ*—p. *Mamillares*, *Papillæ of the kidney*, *Olfactory nerves*—p. *Mamillares cerebri*, *Mamillary tubercles*—p. *Mastoidæus*, *Mastoid process*—p. *Nasalis*, see *Maxillary bone*, (*superior*)—p. *Olivaris*, *Olivary Process*—p. *Orbicularis cerebri*, *Infundibulum of the brain*—p. *Papillares*, *Olfactory nerves*—p. *Papillarum*, *Olfactory nerves*—p. *Rachidianus*, *Medulla spinalis*—p. *Sterni xiphoides*, *Xiphoid*.

PROCESSUS TER'ETES, *Eminentia seu Fasciculi ter'etes*. Two slightly convex bodies forming the anterior wall or floor of the fourth ventricle of the brain. They are separated by a longitudinal groove, which is continuous, inferiorly, with the sulcus longitudinalis posterior of the spinal cord. They are crossed transversely by several white and gray fasciculi—*lineæ tranversaræ, striæ medullaræ*—the origin of the auditory nerves.

PROCESSUS AD TESTES, see *Valvula Vienssenii*—p. *Transversus duræ matris*, *Tentorium*—p. *Uncinatus*, *Olecranon*, *Unciform process*, see *Coracoid process*—p. *Uvifer*, *Uvula*—p. *Ventriculi*, *Duodenum*—p. *Xiphoides*, *Xiphoid cartilage*—

p. Xipho-sternalis, Xiphoid cartilage—p. Zygomatiæ, Zygomatic process.

PROCHEILA, Antelabia.

PROCHEILIDION, Procheilon.

PROCHEILON, *Procheilidion, Prolabium, Antelabium*, from *pro*, and *cheilos*, 'a lip.' The extreme projecting part or margin of the lips.

PROCHEUMA, Parenchyma.

PROCIDENCE DE L'ŒIL, Exophthalmia.

PROCIDENTIA, Prolapsus—p. Ani, Proctocæle—p. Intestini recti, Proctocæle—p. Iridis, Staphyloma of the Iris—p. Oculi, Exophthalmia—p. Sedis, Proctocæle—p. Uteri, Prolapsus uteri.

PROCNEME, Tibia.

PROCNEMIUM, Tibia.

PROCELIUS, *Procælius*, from *pro*, and *κοιλια*, 'belly.' One who has a large pendulous abdomen.

PROCELUS, Procælius.

PROCONDYLUS, *προκονδύλος*, from *pro*, and *κονδύλος*, 'a knot.' The first joint of the fingers; the second being called *κονδύλος*; the third *μετακονδύλος*.

PROCREATIO, Generation—p. Sanguinis, Hæmatisis.

PROCREATION, Fecundation, Generation.

PROCTAGRA, from *πρωκτος*, 'anus,' and *αγρα*, 'seizure.' Gout in the rectum. Proctalgia.

PROCTALGIA, *Proctica simplex, Proctagra, Dolor ani, Proctodynia*, from *πρωκτος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus; generally symptomatic of disease, as of hæmorrhoids, scirrhus, &c.

PROCTALGIA, Clunesia—p. Hæmorrhoidalis, Hæmorrhoidis—p. Inflammatoria, Rectitis—p. Intertriginosa, Chafing—p. Rheumatica, Proctorrhœma.

PROCTATRE'SIA, *Imperforatio ani*, from *πρωκτος*, 'the anus,' and *ατρασια*, 'imperforation.' Imperforate state of the anus.

PROCTICA, from *πρωκτος*, 'the anus.' Pain or derangement about the anus, without primary inflammation. A genus in the class *Cæliaca*, order *Enterica*, of Good.

PROCTICA EXANIA, Proctocæle—p. Marisca, Hæmorrhoidis—p. Simplex, Proctalgia—p. Tenesmus, Tenesmus.

PROCTISIS, Proctitis.

PROCTITIS, *Proctitis, Architis, Clunesia, Cyssoitis*, from *πρωκτος*, 'the anus,' and *itis*, denoting inflammation. Inflammation of the anus and rectum. Rectitis.

PROCTITIS GANGRÆNOSA, Proctocæle.

PROCTOCÆCĒ, *Proctitis gangrænosa*, from *πρωκτος*, 'the anus,' and *κακος*, 'evil.' A disease of the rectum, so called by Fuchs, which, according to him, is common in Peru, in the neighbourhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, on the Gold coast, &c. It is called by the Portuguese, *Bicho*, and *Bicho di Culo*; by the people of Quito, *Mal del Valle*, from its prevalence in the valleys; and in Africa, *Bitios de Kis*. It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

PROCTOCELĒ, from *πρωκτος*, 'the anus,' and *κηλη*, 'hernia.' *Prolapsus Ani, Proctoptoma, Proctoptosis, Proctosis, Hedrocele, Archeoptomiti, Archeoptoma, Archoptoma, Archeocelē, Archoptosis, Exania, Hæmorrhoidis proce'dens seu ab ead'niā. Procidentia Ani seu intestini recti seu sedis, Ectopia Ani, Sedes procid'ua, Falling down of the Fundament, Coming down of the Body*, (F.) *Chute du rectum, C. du Fondement, Renversement du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter, with more or less swelling. In the treatment, the application of cold water and

astringent lotions must be recommended; and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, see Lithotomy.

PROCTODYNIA, Proctalgia.

PROCTON'CIUS, from *πρωκτος*, 'anus,' and *ογκος*, 'swelling.' Swelling of the anus.

PROCTOPARALYSIS, *Proctoplegia, Paralysis Intestini Recti*, from *πρωκτος*, 'the anus,' and *παρالىσις*, 'paralysis.' Paralysis of the muscles of the rectum.

PROCTOPLEGIA, Proctoparalysis.

PROCTOPTOMA, Proctocæle.

PROCTOPTOSIS, Proctocæle.

PROCTORRHAGIA, Hæmorrhoidal flux.

PROCTORRHEU'MA, from *πρωκτος*, 'anus,' and *ρευμα*, 'defluxion.' Rheumatism of the anus.

PROCTORRHŒA, from *πρωκτος*, 'the anus,' and *ρευ*, 'I flow.' A discharge of blood or slime from the anus. See Hæmorrhoidis.

PROCTOS, Anus.

PROCTOSIS, Proctocæle.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, Stricture of the rectum.

PROCTOTREU'SIS, from *πρωκτος*, 'anus,' and *τρυνειν*, 'to perforate.' Perforation of a closed anus.

PROCTUS, Anus.

PROCURATIO ABORTÛS. The promotion of abortion.

PRODIAGNO'SIS, from *pro*, and *diagnosis*. Prognostication of a disease to come,—a diagnosis by anticipation.

PRODROMIC, *Prodromicus*, (F.) *Prodromique*. Same etymon as the next. Relating, or belonging, to the prodromus of a disease.

PRODROMUS, *Propathia*, from *pro*, and *δρομος*, 'course,' (F.) *Prodrome. Stadium opportunitatis seu prodromorum*; in contagious diseases, *Stadium latentis contagii*. The period immediately preceding an attack of disease; in which the *precursory signs* occur.

PRODUCT, from *producere, productum*, (*pro*, and *ducere*, 'to lead,') 'to bring forth.' (F.) *Produit*. The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, Prolapsus—p. Uvulæ à pituitâ, Staphyloedema.

PRODUCTION, *Productio*; same etymon. This word is used, especially by the French, synonymously with *prolongation*. The mesentery is, in this sense, a production of the peritoneum.

PRODUCTION ACCIDENTELLE. An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

PRODUIT, Product.

PRŒGUMENÆ CAUSÆ, Causes, predisponent.

PRÆLIUM, Press, Tourniquet.

PRŒMINENT, *Prœminens*, from *pro*, and *eminere*, 'to project.' Some anatomists call the 7th cervical vertebra the *prœminent vertebra*, on account of the length of its spinous process, which passes the level of that of the neighbouring vertebrae.

PRŒENCEPH'ALUS, (F.) *Prœencéphale*; from *pro*, and *εγκεφαλος*, 'encephalon.' A monster, whose encephalon is situated, in a great measure, out of, and in advance of, the cranium, which is open in the frontal region.

PRŒOTIA, *Prœotes*, *πρωιότης* or *προιότης*, from *πρωι*, 'early,' 'Præcocity.' *Præcox maturitas, Præcocians maturitas*. Premature development of sexual organization or power.—Good.

PROFLUVII CORTEX, Nerium antidysepticum.

PROFLUVIUM, *Discharge, Fluxus, Polyrrhoea, Flux*; from *profluo*, (*pro*, and *fluo*.) 'I flow forth.' A term under which—in the plural, *Profluvia, Polyrrhoeas*—some nosologists have comprised all morbid discharges or fluxes:—others, increased excretions attended by fever.

PROFLUVIUM ALVI, Diarrhoea—p. Genitale muliebri. Menses—p. Mucosum urethrae, Gonorrhoea—p. Muliebri, Leucorrhoea, Menses—p. Sanguinis, Haemorrhagia—p. Sanguinis à Renibus, Nephorrhagia—p. Sanguinis ex Ore, Stomatorrhagia—p. Sanguinis ex Utero, Metrorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhoea.

PROFOND, Profundus.

PROFUNDUS, (*pro*, and *fundus*, 'bottom.') *Altus*, 'having a deep base.' (F.) *Profond*. A name given to different parts, which are seated profoundly as regards others.

PROFUNDA ARTERIA FEMORIS, *A. vasta posterior seu muscularis femoris, Artère-grande musculaire de la cuisse*. (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex*: 2. The *internal circumflex*: and, 3. The *three perforantes*.

PROFUNDA ARTERIA HUMERI, *P. superior, Arteria spiralis*, (F.) *Artère humérale profonde, A. collatérale externe, Grand musculaire du bras*. (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

PROFUNDA ARTERIA INFERIOR seu MINOR is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar or profundo-ulnar*.

PROFUNDA ARTERIA PENIS. Chaussier has given this name to the *cavernous artery*, which arises from the artery of the penis, furnished by the internal pudic.

PROFUNDA ARTERIA SUPERIOR, Profunda humeri.

Certain muscles are distinguished by the names *profund* or *deep-seated*, and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *Flexor profundus perforans*, &c.

PROFUSIO, Haemorrhagia.

PROFUSIO AQUÆ. The discharge or breaking of the waters at birth.

PROFUSIO SANGUINIS, Haemorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGAS'TOR, from *pro*, and *γαστήρ*, 'belly.' One who has a pendulous belly.

PROGENIES, Epigone.

PROGENY, Epigone.

PROGLOS'SIS, from *pro*, and *γλῶσσα*, 'the tongue.' *Apex linguae*. The extremity or tip of the tongue.

PROGNA'THOUS, from *pro*, and *γναθος*, 'the jaw.' Having a projecting jaw. A term applied to the form of the head in which there is a pro-

longation or forward extension of the jaws, as in the negro.

PROGNO'SIS, *Proëgorensis, Proërhesis, Præcognitio, Prognosticè, Prænotio, Prænuntiatio, Præscientia, Præcognitio, Prona'a, Prophæsis, Prædictio*, (F.) *Prognostic, Pronostic*, from *pro*, and *γνῶσις*, 'knowledge.' A judgment formed by the physician regarding the future progress and termination of any disease.

PROGNOSIS, GENERAL. The opinion formed of a disease in the abstract. Thus, the *general prognosis of Cynanche tonsillaris* is favourable;—of *Phthisis pulmonalis*, unfavourable, &c.

PROGNOSIS, PARTICULAR. The opinion formed of any particular case of disease. The *particular prognosis* of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÀ, Glossomantia.

PROGNOSTIC, Prognosis.

PROGNOSTICE, Prognosis.

PROGRESSIO, Augmentation.

PROGRESSIO, Walking.

PROGRESSUS, Augmentation.

PROIOTES, Præotia.

PROJECTURA, Process.

PROLABIUM, Procheilon.

PROLAP'SUS, from *prolabor, prolapsus*, (*pro*, and *labor, lapsus*, 'to slide,') 'I slip down.' *Procidencia, Delapsio, Delapsus, Hyporrhysis, Proptoma, Propto'sis, Productio, Propendencia, Prominentia, Pto'sis, Casus*, (F.) *Chute; a protrusion; a falling down*. A genus of diseases in the class *Locales* and order *Ectopisæ* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

PROLAPSUS ANI, Proctoele—p. Bulbi oculi, Exophthalmia—p. Corneæ, Staphyloma of the cornea—p. Iridis, Pto'sis iridis—p. Linguae, Glossoele, Paraglossa—p. Oesophagi, Pharyngoele—p. Palpebræ, Blepharoptosis—p. Pharyngis, Pharyngoele—p. Umbilici, Exomphalus.

PROLAPSUS UTERI, *Exometra, Metropto'sis, Metropropto'sis, Orthysteropto'sis, Orthysteroptoma, Falling down of the womb, Adopto'sis seu Procidencia uteri, Hysteropto'sis, Hysterocèle nuda*, (F.) *Abaissement ou Chute on Descente ou Précipitation de la matrice*. Some use the term 'Procidencia Uteri' for a minor degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the utero-vaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episiorraphy* be performed.

PROLAPSUS UVULÆ, Staphylædema.

PROLAPSUS VAGINÆ, *Hysteropto'sis seu Prolapsus Adoptosis Vaginae, Coleopto'sis, Colpopo'to'sis, Elythropto'sis*—Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation, procidencia, prolapsus*, or complete *inversion*.

PROLAPSUS VESICÆ, Exocyste.

PROLECTA'TIO; from *pro*, and *legere, lectum*, 'to gather.' Action of separating the finer parts of a body from the grosser.

PROLEPTICS, *Prolepticè*, from *pro*, and *λαμβάνω*, 'I seize hold of.' A term proposed by Dr. Laycock to signify the art and science of predicting in medicine.

PROLEPTICUS, Anticipating.

PROLES, Epigone.

PROLICIDE, *Prolucidum*, from *proles* (*pro*, and *olescere*, 'to grow,') 'offspring,' and *cædere*, 'to kill.' Destruction of offspring: a term which includes fœticide as well as infanticide.

PROLIFIC, *Prolifus*, (F.) *Prolifus*, from *proles*, 'offspring,' and *facio*, 'I make.' That which has the faculty of engendering. Applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

PROLIGEROUS, *Pro'liger*, *Prolig'erus*, from *proles*, 'offspring,' and *gero*, 'I carry.' That which is connected with carrying the offspring.

PROLIGENOUS DISC OR LAYER, *Discus prolig'erus* seu *tell'innus*, *Stratum prolig'erum*, *Gonostroma*, (F.) *Disque proligère*. A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists.—Von Baer.

PROLONGEMENT RACHIDIEN, *Medulla spinalis* — p. *Sous-occipital*, Basilar process.

PROMALACTEURIUM, from *pro*, and *μαλασσω*, 'I soften.' The room, in the ancient gymnasium, in which the body was softened and anointed. One of the operations in bathing.

PROMANUS, see *Digitus*, *Pollex*.

PROMETOPIDIA, Frontal bandages.

PROMETOPIS, *Prometopid'ion*, from *pro*, and *μετωπον*, 'the forehead.' The skin of the forehead.

PROMINENTIA, *Prolapsus*, *Protuberance* — p. *Annularis Cerebri*, *Pons Varolii* — p. *Corneæ*, *Ceratocele* — p. *Ossis Continui*, *Apophysis*.

PROMINENTIÆ ALBICANTES, Mammillary tubercles — p. *Semiövales Medullæ Oblongatæ*, *Corpora olivaria*.

PROMONTOIRE, *Promontorium*.

PROMONTORIUM, *Promontory* — p. *Faciei*, *Nasus* — p. *Ossis Sacri*, see *Sacrum*.

PROMONTORY, *Promontorium*, (F.) *Promontoire* (from *pro* and *mons*, *montis*, 'a mountain,') seu *Tuber* seu *Tuberositas Tym'pani*. A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

PROMONTORY OF THE SACRUM, see *Sacrum*.

PRONATEUR CARRÉ, *Pronator radii quadratus* — p. *Grand* ou *roud*, *Pronator radii teres* — p. *Petit*, *Pronator radii quadratus*.

PRONATION, *Pronat'io*, from *pronus*, 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONATOR. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

PRONATOR OBLIQUUS, *P. radii teres* — p. *Quadratus*, *P. radii quadratus*.

PRONATOR RADII QUADRATUS, *P. quadratus* seu *transversus* (Winslow) seu *radii brevis* seu *radii quadratus* (Cowper), *Quadratus rad'ii*, (F.) *Cubito-radial* (Ch.), *Petit* ou *carré pronateur*. This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

PRONATOR RADII TERES, *P. teres* sive *obli'quus* (Winslow), (F.) *Épitrachlo-radial* (Ch.), *Grand* ou *roud pronateur*. A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and

to the coronoid process of the ulna. Thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

PRONATOR TERES, *P. radii teres*.

PRONAUS, *Vestibulum*.

PRONERVATIO, *Anepurosis*, *Tendon*.

PRONŒA, *Prognosis*.

PRONONCIATION, *Pronunciation*.

PRONOSTIC, *Prognosis*.

PRONONCIATION, *Pronunciatio*, (F.) *Prononciation*, from *pro* and *nunciare*, 'to tell.' The mode of articulating or giving accent or utterance to words.

PROPATIIA, *Prodromus*.

PROPENDENTIA, *Prolapsus*.

PROPERTIES, PHYSICAL OF THE TISSUES. These are *flexibility*, *extensibility*, *elasticity*, *racornissement* and *imbibition*.

PROPERTIES, VITAL. Those which depend upon the vital force, as *contractility*.

PROPHIASIS, *Prognosis*.

PROPHYLACTIC, *Prophylacticus*, *Diaphylact'ic*, *Diasost'ic*, *Synteret'icus*, *Præservator'ius*, (F.) *Prophylactique*, from *pro*, and *φύλασσω*, 'I defend.' A preservative or preventive.

PROPHYLACTIC MEDICINE, *Hygiene*.

PROPHYLAXIS, *Prophyl'acé*, *Prophylact'icé*, *Synteret'is*. Same etymon. *Præservatio*, *Præcustodia*. Preservative or preventive treatment.

PROPOLIS, from *pro*, and *πολις*, 'city;' literally, 'that which is before the city.' *Ceranthemus*, *Commo'sis*, *Bee-bread*. A red, resinous matter, with which the bees cover the bottom of the hive. Its fume has been esteemed antisthmatic.

PROPOMA, from *pro*, and *πομα*, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

PROPORTIO, *Symmetry*.

PROPOSITUM, *Intention*.

PROPOTISMA, *Mistura*.

PROPOTIS'MUS, *προποτισμος*. Same etymon. *Prapotio*. An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIUS EXTERNÆ, *Retrahens auris*.

PROPTOMA, *Prolapsus*.

PROPTOMA AURICULÆRUM, *Paræsthesis and'itâs flacca*, *Flap Ear*. Lobe of the ear broad, loose, and pendent from birth.—Good.

PROPTOMA SCROTI, *Rachosis*.

PROPTOSIS, *Prolapsus* — p. *Palpebræ*, *Blepharoptosis* — p. *Vulvæ*, *Staphylœdema*.

PROPTYSIS, *Expectoration*.

PRORA, *Occiput*.

PRORRHESIS, *Prognosis*.

PRORRUPTIO SANGUINIS, *Hæmorrhagia*.

PROS, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, *Diarthrosis*.

PROSBOLE, *Impression*.

PROSCHYSIS, *Afusion*.

PROSCOLLESIS, *Adherence*, *Agglutination*.

PROSECTEUR, *Dissector*.

PROSECTIO, *Anatomy*.

PROSECTOR, *Dissector*.

PROSLEPSIS, *Prehension*.

PROSODOS, *Aditus*.

PROSOPALGIA, *Neuralgia*, *facial*.

PROSOPANTRA, *Frontal sinuses*.

PROSOPANTRITIS, from *prosopatra*, the

frontal sinuses, and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

PROSOPARALYSIS, Palsy, Bell's.

PROSOP'IS DULCIS, *Ord. Leguminosæ*. A tree of rather large size, native of Peru. The fruit — *Puca* — is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limenos with pleasure.—Tschudi.

PROSOPODYNIA, Neuralgia, facial.

PROSOPODYSMOR'PHIA, and *προσωπον*, 'the face,' *δυσ*, 'with difficulty,' and *μορφη*, 'shape.' Malformation or atrophy of the face, — as where the process of nutrition suffers from diminished nervous influence.

PROSOPOLOGIA, Physiognomy.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPORHEU'MA, *Rheumatismus faciei*, from *προσωπον*, 'face,' and *ρευμα*, 'defluxion,' 'rheumatism.' Rheumatism affecting the face.

PROSOPOSIS, Physiognomy.

PROSOPOSPASMUS, Canine Laugh.

PROSOPOSTERNODYMIA, see Cephalosomatodymia.

PROSPERITAS VALETUDINIS, Sanitas.

PROSPHORA, Prehension.

PROSPHYSIS, *Adhæscencia, Coalit'io*, 'adhesion, adherence, connexion,' from *pros*, and *φω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye: *Ankyloblepharon*.

PROST'ASIS, *προστασις*, from *προ*, and *στασις*, 'station,' 'superiority, preponderance;' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippocrates.

PROSTATA, Prostate — p. Adenoides, Prostate — p. Bartholini, Cowper's glands in the female — p. Glandula, Prostate — p. Muliebris, Cowper's glands in the female.

PROSTATÆ, Prostate — p. Adenoides, Prostate — p. Glandulose, Prostate.

PROSTATAL, Prostatic.

PROSTATAL'GIA, from *προστατα*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

PROSTATAUXË, Prostatoparæetasis.

PROSTATE, *προστατα*, from *προ*, 'before,' and *στημι*, 'I stand.' — *Prostata*, *P. glandula*, *Prostata*, *P. glandulosa* seu *adenoides*, *Parastata* *adenoides* seu *glandulosa*, *Adstans*, *Parastata*, *P. glandulæ*, *Testis minor*, *Corpus glandulosum* seu *glandulosum* seu *adeniforme* seu *glandiforme* seu *glandulosum* seu *adenoides*, *Assistentes glandulae*, *Adstites glandulosi*; the *Prostate gland*. A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour — *Liquor prostat'icus* — intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATE. ANTERIOR, see Cowper's glands.

PROSTATELCO'SIS, from *προστατα*, 'prostate,' and *ελκος*, 'an ulcer.' Ulceration of the prostate.

PROSTATES INFÉRIEURES, Cowper's glands — p. *Petites*, Cowper's glands.

PROSTATIC, *Prostat'icus, Prostatal*, (F.) *Prostaticque*. That which belongs or relates to the prostate. Winslow has named — *Superior Prostatic Muscles* — ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls — *Inferior prostatic muscles* — the fleshy fibres, which, from the lateral parts of the urethra,

near its membranous portion, pass to be inserted into the pubis.

PROSTATIC BISECT'OR. An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, cutting edges at the sides parallel to its longest axis, and with a straight handle.

PROSTATIC LIQUOR, *Liquor prostat'icus*. The fluid secreted by the prostate, which mixes with sperm during emission.

PROSTATIC PORTION OF THE URETHRA. The part of the canal of the urethra included by the prostate: it is about 15 lines long.

PROSTATIC SINUS, see Sinus, prostatic.

PROSTATICUS SUPERIOR, Compressor prostatae.

PROSTATIQUE, Prostatic.

PROSTATITIS, *Inflammatio Prostatae*, from *προστατα*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate; when accompanying gonorrhœa, it is the *gonorrhoeo-prostatitis*.

PROSTATOCELE, Prostatoncus.

PROSTATONCUS, *Prostatocelë, Tumor prostatae*, from *προστατα*, 'the prostate,' and *ογκος*, 'a tumour.' Swelling of the prostate.

PROSTATOPAREC'TASIS, from *προστατα*, 'prostate,' and *παρεκτειναι*, 'to extend.' Enlargement of the prostate; also, induration of the same, *Prostatoseirrhus, Prostatauxë*.

PROSTATOSCIRRHUS, see Prostatoparæetasis.

PROSTERNID'IUM, from *προ*, 'before,' and *στερνον*, 'the sternum.' Any agent applied to the anterior part of the chest; a plaster to the breast.

PROSTHESIS, Prothesis.

PROSTHETA, Subdita.

PROSTHIUM, Penis.

PROSTOM'IA, *Commissura labiorum*; from *προ*, 'before,' and *στομα*, 'mouth.' The commissure of the lips.

PROSTRATION, *Prostratio virium*, (F.) *Prostration des forces, Abattement*. Great depression of strength. Almost total loss of power over the muscles of locomotion.

PRO'TEA MELIF'ERA. A South African plant, *Nat. Ord. Proteaceæ*, whose involucre and flowers, at the time of inflorescence, are filled with a sweet watery liquid, which contains a great deal of honey. By inspissation it forms a delicious syrup — *Syrupus Proteæ*, which is much used in pulmonary affections.

PROTEA LEPIDOCARPON, and some other Proteæ, supply the same kind of juice.

PRO'TEAN, *Proteiform, Proteiformis*, from *Proteus*, who could assume various shapes. Assuming different shapes.

PROTEIFORMIS, Protean.

PROTEIFORM'IS MORBUS. A disease which assumes various characters.

PRO'TEÏN, *Proteine, Proteïna*, from *πρωτεινω*, 'I take first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is protein. — Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Pereira.

PROTEINACEOUS, Proteinous.

PRO'TEINOUS, *Proteïna'ceous, Proteïnosus*,

(F.) *Protéineux*. Of, or belonging to protein; — as “a proteinous alimentary principle.”

PROTEINEUX, Proteinous.

PROTENSIONES GLANDULARES, Mammary eminences.

PROTHESIS, *Pros'thesis*, *Adjunctio*, *Adjectio*, *Appositi'o*, ‘addition, application;’ from *προς*, ‘in addition to,’ and *τίθημι*, ‘I put.’ That part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

PROTMESIS, Umbilicus, Kidney.

PROTOAZOTATE DE MERCURE, Hydrargyri nitras.

PROTOGALA, Colostrum.

PROTOIATROS, Archiater.

PROTOMEDICUS, Archiater.

PROTOMUS, Dissector.

PROTOPATHIA, Idiopathia.

PROTOPHYTE, *Protophyton*, from *πρωτος*, ‘first,’ and *φυτον*, ‘a plant.’ A vegetable production at the foot of the scale; as a cryptogamous plant. — a fungus.

PRO'TOPLAST, from *πρωτος*, ‘first,’ and *πλασσω*, ‘I form.’ A primary formation. A first formed organized body — the parent of all others.

PROTOSPOROS, Os uteri.

PROTOZO'ON, from *πρωτος*, ‘first,’ and *ζωον*, ‘an animal.’ An animal lowest in the scale; — as a monad.

PROTRAHENS LENTIS, Ciliary muscle.

PROTRUSION, Prolapsus.

PROTUBERANCE, *Protuberantia*, *Extuberantio*, *Prominentia*, *Excrescentia*, *Extuberantia*, from *pro*, ‘before,’ and *tuber*, ‘a projection.’ (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances*, *occipital protuberances*, *annular protuberances*, &c.

PROTUBERANCE, *ANNULAR*, Pons Varolii — p. Cerebral, Medulla oblongata, Pons Varolii — p. *Cylindroides*, Cornu ammonis.

PROTUBERANTIA, Eminence — p. Annularis Willisii, Pons Varolii — p. Basilaris, Pons Varolii — p. Cylindrica, Cornu ammonis.

PROTRUSOR, Detrusor urinæ.

PROULMATESIS. A word employed by Forestus for hernia of the stomach [?].

PROUNE, Prunus domestica.

PROVENTRIC'ULUS, *Bulbus glandulosus*, *Infundibulum*, *Second stomach*; from *προ*, ‘before,’ and *ventriculus*, ‘the stomach.’ A bulbous expansion at the termination of the œsophagus, immediately above the gizzard of birds, the walls of which are thickly studded with a layer of glands or follicles which secrete a digestive fluid.

PROVERBS, *MEDICAL*. A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salerno*, composed in the 11th century, by John of Milan. Yet, although good sense is often culculated, we frequently meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe un coupe d'excellent vin
Tire un écu de la poche du médecin.*
2. *Surge quintâ, prande nonâ, cœna quintâ, dormi
nouâ, nec est morti vita prona.*
3. *Nunquam recte corpus exerceri sine animo,
neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.*
Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*

7. Early to bed and early to rise,
Makes a man healthy, wealthy, and wise.

8. One man's meat's another man's poison.

9. An ounce of prevention is better than a pound of cure.

PROVERSIO, Anteverision.

PROVINS, *MINERAL WATERS OF*. Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

PROVOCATORIUS, Intercalary.

PROXIMAD, see *Proximal aspect*.

PROXIMAL, from *proximus*, ‘next.’ *Proximate*; nearest; next.

PROXIMAL ASPECT. An aspect towards the trunk, in the course of an extremity. — *Barclay*. *Prox'imal* is used by the same writer adverbially to signify ‘towards the trunk.’

PRUNA, Anthrax.

PRUNE, Prunum.

PRUNE JUICE EXPECTORATION or *SPUTA*. The sputa resembling prune juice, which occur in the third or purulent stage of pneumonia.

PRUNEAU, Prunum.

PRUNELLA, Angina pectoris, Aphthæ, Cyananche, Pupil.

PRUNEL'LA, *P. vulgaris* seu *officina'lis*, *Brunel'la*, *Consolida minor*, *Syn'phytum minus*, *Self-heal*, *Heal-all*, *Bugle*, (F.) *Prunelle*, *Brunelle*; *Ord. Labiatæ*. *Sex. Syst.* Didynamia Gymnospermia. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces.

PRUNELLE SAL, Potassæ nitras fusus sulphatis paucillo mixtus.

PRUNELLE, Prunella, Pupil.

PRUNELLIER, Prunus spinosa.

PRUNELLOE, Prunum Brignolense.

PRUNEOLA SYLVESTRIS, Prunus spinosa.

PRUNES, see Prunum — p. Pulp of, Pruni Pulpa.

PRUNI PULPA, *Pulp of prunes*. Take of prunes a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press through a hair-sieve. — Ph. U. S.

PRUNIER, Prunus domestica — p. *Sauvage*, Prunus spinosa.

PRUNUM. A dried Plum, a Prune. (F.) *Pruneau*. Three sorts of Prunes have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolensê*; the *Brignole plum* or *Prunel'loe*; from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gallicum*, Prunum (Ph. U. S.), the *French Prune*; and 3. The *Prunum Damascenum* or *Damson*, *Brab'ylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

PRUNUM STELLATUM, *Averrhoa carambola*.

PRUNUS ACACIA, Prunus padus.

PRUNUS ARMENI'ACA, *Armeni'aca vulgaris* seu *epiro'tica*. The *A'pricot*, *Apricock*, *Bericoc'cê*, *βερικοκκ*, *Præcoc'ia*, (F.) *Abricotier*. *Ord. Rosaceæ*. *Sex. Syst.* Icosandria Monogynia. The apricot, *Melum Armeniacum*, (F.) *Abricot*, when ripe, is easily digested, and considered as a great delicacy.

PRUNUS A'VIUM, *P. cer'asus* seu *sylvest'ris* seu *macrophy'lla*, *Cer'asus A'vium* seu *nigra* seu *dulcis*, *Black Cherry Tree*, (F.) *Merisier*. The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

PRUNUS CAPULIN, (S.) *Capulies*, grows in the

open fields of Peru; and is cultivated in gardens in the towns. The fruit is acid, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores*; or with odoriferous flowers to perfume linen. — Tschudi.

PRUNUS CER'ASUS, *Cer'asus ac'idula seu hortens'is seu vulg'aris seu rubra*. The *Red Cherry Tree*; (F.) *Cerisier*. The fruit *Cer'asum*, *Cer'asion*, has a pleasant, acidulous sweet flavour. It is wholesome. See *Prunus avium*.

PRUNUS DOMES'TICA. The *Plum* or *Damson tree*, *Coccyne'lea*, *Prome*, (F.) *Prunier ordinaire*. The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See *Prunum*.

PRUNUS HORTENS'IS, *P. cerasus*.

PRUNUS INS'I'TIA. The *Bullace Plum Tree*. The fruit of this tree is used like the damson.

PRUNUS LAURO-CER'ASUS, *Cer'asus lauro-cerasus*, *Prunus lauro-cerasus*, *Poison Laurel*, *Cherry Laurel*, *Common Laurel*, *Lauro-cerasus*, (F.) *Laurier-cerise*, *L. amandier*, *L. de Trébiscoude*. The leaves, *Lauro-cer'asus*, (Ph. E. and D.) have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in jarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the prussic acid. The distilled water, called *Laurel-water*, is poisonous. (See *Poisons*, Table of.) An *Aqua LAURO-CER'ASI*, *Cherry Laurel-water*, is official in the Edinburgh and Dublin Pharmacopœias. Dose. ℞ xxx to ℥j.

PRUNUS MACROPHYLLA, *P. avium*.

PRUNUS PADUS, *Padus*, *P. avium*, *Cer'asus Padus seu racemosus sylvest'ris*, *Wild cluster* or *Bird Cherry Tree*, (Sc.) *Hagberry*, *Huck-berry*, (Prov.) *Heckberry*, (F.) *Cerisier à grappes*, *Bois puant*. The bark of the tree has a fragrant smell, and a bitter sub-astringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c., in the form of decoction. The berries have been used in dysentery.

PRUNUS SEBASTINA, *Sebastina*.

PRUNUS SPINO'SA. The *Sloe Tree*, *P. sylvest'ris* seu *Acacia*, *Agriococcine'lea*, *Agru'na*, *Agru-ne'la*, (F.) *Prunellier*, *Prunier sauvage*. The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to the astringent properties. The *Acacia nostras* seu *Germanica* seu *vulg'aris*, *Prunella sylvest'ris*, *Succus acacia nostrat'is*, *S. Acacia Germanica insipissat'us* is obtained from this.

PRUNUS SYLVESTRIS, *P. Avium*, *P. Spinosa*.

PRUNUS VIRGINIA'NA, *Cer'asus serotina* seu *Virginia'na*, *Choke cherry*, *Wild Cherry Tree*, (F.) *Cerisier de Virginie*. The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and likewise a sedative quality. It is stimulant and tonic. The leaves contain prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

PRUNUS VULGARIS, *P. Padus*.

PRURIG'INOUS, *Pruriginosus*, (F.) *Pruriginosus*. Same etymon as the next. Relating, or belonging to, or resembling prurigo.

PRURIG'GO, *Pruritus*, *Christ'ina*; from *prurio*, *pruritus*, 'to itch.' The word is often used synonymously with *itching*. Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are

a severe itching, accompanied by an eruption of papulæ of nearly the same colour as the adjoining cuticle; *Cnesmos*, *Scabies papuliform'is*, *Eos'mia prurigo*. It affects the whole surface of the skin, under three varieties of form;—the *P. mitis*, *P. formicans*, *P. senilis*, &c., as well as some parts of the body, as the *P. pod'icis*, and *P. pudendi mulie'bris*, *Pudenda'gra pruricens*, *Pruritus vulvæ*, (F.) *Prurit de la vulve*.

PRURIGO, Heat — p. *Pedicularis*, *Phthiriasis*.

PRURIT, Itching—p. *de la Vulve*, see *Prurigo*.

PRURITUS, *Gargalus*, *Itching*, *Prurigo* — p. *Vulvæ*, see *Prurigo*.

PRUSSIAN BLUE, *Ferrum Zoö'ticum seu Born'sicum* seu *Cynogen'num* seu *oxydulatum hydrocyanicum*, *Ferri Ferrocyanus* seu *Ferrocyanuretum* seu *Cyanuretum* seu *Percyan'idum*, *Born'sias* seu *Prussias* seu *Hydrocyanus Ferri*, *Cærv'lenum Born'sicum* seu *Berolinens'is*, *Trito-hydro-ferrocyanate* or *Ferrocyanuret* or *Ferrocyanuretate* of iron, (F.) *Bleu de Prusse*, *B. de Berlin*. In the Pharmacopœia of the United States, the pure salt—*Ferri ferrocyanuretum*—is directed to be made as follows: *Ferri Sulph. ℥iv*, *acid sulph. ℥ssiss*, *acid nitric. ℥vj* or *q. s.*, *potassii ferrocyanuret. ℥ivss*, *aquæ*, *Oij*. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocyanuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition; then pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (℥i to ℥j. of cerate.) Dose, four to six grains.

PSALIDIUM, *Fornix*.

PSALIS, *Fornix*, *Scissors*.

PSALTERIUM, *Lyræ*.

PSAMMA, see *Gravel*.

PSAMMIS'MUS, *Ammis'mus*, *Gammis'mus*, from *ψαμμος*, 'sand,' *Arenat'io*. The application of sand to any part of the body for the cure of disease. — Paulus.

PSAMMODES, *Sabulous*.

PSAMMUS, see *Gravel*.

PSAUTIER, *Omasum*.

PSELLIS'MUS, *ψελλισμος*, *Psellotes*, *ψελλοτης*, from *ψελλίζω*, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumaticæ*, order *Phonica*, of *Good*.

PSELISMUS NASITAS, *Rhinophonia* — p. *Rhotacismus*, *Rotacism*.

PSELLOTES, *Balbuties*.

PSEUDACACIA ODORATA, *Robinia pseudacacia*.

PSEUDAC'OE', *Pseudacacia*, *Pseudocœ'a*, from *ψεῦδος*, 'false,' and *ακοη*, 'audition.' *Pseudacn'ois*. False hearing.

PSEUDACORUS, *Iris pseudacorus*.

PSEUDÆSTHES'IA, *Senens perversus*, from *ψεῦδος*, 'false,' and *αισθησθαι*, 'I feel.' *niaθηςις*, 'feeling.' *Parapsis illusoria*, *Pseudophē*. *Pseudaph'ia*, (F.) *Pseudæsthesië*. Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered aputation; and to hypochondriacs and the insane.

PSEUDALEI MORBI, *Feigned diseases*.

PSEUDANGUSTURINUM, *Brucine*.

PSEUDAPHIE, *Pseudæsthesia*.

PSEUDARTHROSIS, *Pseudarticulatio*, *Pseudarticulus*, *Articulatio notha seu artificialis*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\alpha\rho\theta\rho\omega$, 'a joint.' A false joint or articulation; *Articulus novus seu spurrius seu præternaturalis*, (F.) *Articulation surannénaire*.

PSEUDARTICULATIO, Pseudarthrosis.

PSEUDECOIA, Pseudæcoc.

PSEUDENCEPHALUS, *Paracephalus*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\epsilon\gamma\kappa\epsilon\phi\alpha\lambda\omicron\nu$, 'the encephalon.' A monster, whose cranium is open in its whole extent, from before to behind, its base supporting a vascular tumour.—I. G. St. Hilaire.

PSEUDESTHÉSIE, Pseudæsthesia.

PSEUDO, False —p. Asthma, Dyspnœa.

PSEUDOBLEP'SIA, *Pseudoblepsis*, *Pseudorasis*, *Suffusio oculi*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\beta\lambda\epsilon\psi\iota\varsigma$, 'sight.' *Pseudopsia*, *Paropsia illusoria*, *Suffusio*, *Phantasma*, *False sight*. A generic name, used by Cullen for perversion of vision. See Metamorphopsia.

PSEUDOBLEPSIS, Paropsis.

PSEUDOCARCINOMA LABII, Cancer aquaticus.

PSEUDOCHROMIA, Achromatopsia.

PSEUDOCROUP, Asthma thymicum.

PSEUDOCYESIS, Pregnancy, false —p. *Cycsis molaris*, Mole.

PSEUDOENCEPHALITIS, Hydrancephaloid disease.

PSEUDO-FEVER, Irritation, morbid.

PSEUDOGEU'SIA, *Pseudogeusis*, *Pseudogenesis*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\gamma\epsilon\upsilon\sigma\iota\varsigma$, 'taste.' *Hallucinatio gustus*. False taste.

PSEUDOGEUSTIA, Pseudogeusia.

PSEUDOHELMINTHES, Ectozoa.

PSEUDOLI'EN, *Pseudosplen*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\lambda\iota\epsilon\upsilon$, 'spleen.' Glands situate in the neighborhood of the spleen; probably, lymphatic glands.

PSEUDOMECHOACANA, *Convolvulus panduratus*.

PSEUDOMEDICUS, Charlatan.

PSEUDOMELANOTIC FORMATIONS, see Anthracosis.

PSEUDOMELANOTIC MENIX, Membrane, false—p. *Metamorphosis polyposa*, polypos.

PSEUDOMEMBRANA, Membrane, false.

PSEUDOMEMBRANE, Membrane, false.

PSEUDONARCISSUS, *Narcissus pseudonarcissus*.

PSEUDONOMA'NIA, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\mu\alpha\nu\iota\alpha$. A form of insanity, which is characterized by a morbid propensity for lying.

PSEUDO-PARASITES, Ectozoa.

PSEUDOPERIPNEUMONIA, *Peripneumonia notha*.

PSEUDOPHILOGOSIS VENTRICULI RESOLUTIVA ET COLLIGATIVA, *Gastromalacia*.

PSEUDOPHTHISIS. 'False phthisis.' Emaciation occasioned by other cause than organic lesion of the lungs.

PSEUDOPLAS'MATA, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\pi\lambda\alpha\sigma\sigma\omega$, 'I form.' A term applied to malignant heterologous tumours.—Vogel.

PSEUDOPLEURITIS, *Pleurodynia* —p. *Polypi*, see *Polypi*—p. *Pyrethrum*, *Achillea ptarmica* —p. *Spleen*, *Pseudolien*.

PSEUDOPNEUMONIA, *Peripneumonia notha*.

PSEUDOPNEUMONITIS, *Peripneumonia notha*.

PSEUDOPSIS, *Pseudoblepsia*.

PSEUDORASIS, *Pseudoblepsia*.

PSEUDOREX'IA, *Pseudorex'is*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\alpha\rho\epsilon\tau\iota\varsigma$, 'appetite.' False appetite.

PSEUDO-RHONCHUS, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\rho\omicron\chi\chi\omicron\varsigma$, 'rattle.' A sound heard during respiration, which appears to be produced, like the

ordinary rhonchi, in the air-tubes, but is exterior to them—as in the case of *pleural pseudorhonchi*. See *Rattle*, and *Râle*.

PSEUDOSCOP'IC, *Pseudoscop'icus*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\sigma\kappa\omicron\pi\epsilon\omega$, 'I view.' Conveying false impressions to the eye; as where projecting surfaces are seen depressed, and conversely.

PSEUDOS'MIA, *Pseudosphresia*, *Pseudosphresis*, from $\psi\epsilon\delta\eta\varsigma$, 'false,' and $\sigma\omicron\sigma\mu$, 'smell.' False sense of smell.

PSEUDOSPIRESIA, *Pseudosmia*.

PSEUDOSYPHILIS, *Syphilis pseudosyphilis*.

PSEUDOTHANATOS, *Asphyxia*.

PSEUDOVARIOLÆ, *Variella*.

PSEUDYME'NE, *Membrane*, false.

PSID'IUM POMIF'ERUM, *The Apple Gnava*, *Gnava*, *Gnayova*. *Ord.* *Myrtaceæ*. This plant and *P. Pyriferum* bear fruits; those of the former like apples,—of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf-buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch, and most cutaneous eruptions.

PSILOSIS, *Depilation*.

PSILOTHRUM, *Eryonia alba*, *Depilatory*.

PSIMMYTHON, *Plumbi subcarbonas*.

PSOA, *Dysodia*.

PSOÆ, *Ψοᾶ*, *Ψυᾶ*, $\psi\omicron\alpha\tau$, see *Lumbi*, 'the loins.' *The psœa muscles*; *Alop'eces*, *Nephrometra*, *Neurometeres*.

PSOAS-MAGNUS, *Psoas seu lumbaris inter-nus*, *Femur moventium sextus*, *Præ-lombo-trochantin*, *Præ-lombo-trochantin* (Ch.). A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long, fusiform, and attached, above, to the body and transverse processes of the first four lumbar vertebrae, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle, — which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

PSOAS PARVUS, *Præ-lombo-pubien*, (Ch.) A muscle situate anteriorly to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions—one to the *Iliac aponeurosis*, and the other to the *pelvis*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, *Gastrodidymus*.

PSOLÆ, *Psoæ*.

PSOÏTE, *Psoitis*.

PSOÏTIS, *Inflammatio musculi Psoas*, *Lumbago inflammatoria spasmodica*, (F.) *Psoïte*, *Inflammation du muscle Psoas*. From $\psi\omicron\alpha\tau$, 'the loins,' 'the psœa muscles,' and *itis*, denoting inflammation. Inflammation of the psœa muscles and of the parts situate before the lumbar vertebrae: accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psoitis may terminate by suppuration, and form a lumbar abscess.

PSOLĒ, $\psi\omega\lambda\eta$, 'the male organ.' Also, the glans when uncovered.

PSOLON, Membrosus.

PSOLON'CUS, from *psole*, and *σκος*, 'a tumour.' Swelling of the glans, or of the penis generally.

PSOLUS, from *psole*. One who has the glans uncovered. One who has been circumcised.

PSOPHOMETER, Stethoscope.

PSOPHOS, *ψοφος*, 'a noise.' A loud noise; a hollow sound.

PSORA, from *ψωω*, 'I rub gently.' *Scab'ies*, *Phlysis* seu *Epye'nis* *Scabies*, *Scabiola*, *Itch*, *Scratch*, *Scotch fiddle*, (Prov.) *Ichet*, *Scrat*, (Sc.) *the Reif*, *Yonk*, *Yuke*, (F.) *Gale*, *Mal Saint-Main*, *Rogue*. A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect of the genus *Acarus*;—the *Ac'arus* seu *Sarcoptes* seu *Sarcoptes* seu *Phth'rium* seu *Cheyle'tus* *Scabiei*, *Ac'arus* *Ciro*, *Itch-insect*, *Itch-animal'cule*, *Itch mite*, (F.) *Ciron*. The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillae, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore*, *Potass in deliquescence*, *Muriate of Ammonia*, *Sulphuric Acid*, &c. The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

PSORA AGRIA, Psoriasis inveterata.

PSORA EBRIORUM, *Drunkard's Itch*. An eruption, attended by afflicting itching, to which elderly people, who have been much addicted to drinking alcoholic liquors, are liable.—Darwin.

PSORA LEPROSA, Psoriasis—p. Squamosa, Psoriasis.

PSORALEA, Psoralea pentaphylla.

PSORALEA GLANDULOSA, from *Ψωραλεος* 'scurfy or scaly,' in reference to its scurfy glands or dots. *Alcoquilla*. Ord. Leguminosæ. *Scz. Syst.* Diadelphia Decandria. A shrub, used in Chili as a vulnerary. The Paraguay tea is referred to it by M. Lenoble, of Montevideo. See *Ilex Paraguensis*.

PSORALEA PENTAPHYLLA, *Psora'lea*, *Contra'yerva nova*, *Mex'icain* *Contra'yerva*. The root is little, if at all, inferior to the *contrayerva* in its medical properties; which, by the by, are unimportant.

PSORENTERIA, Cholera.

PSORIASIS, (same etymon as Psora,) formerly, the state of being affected with *Ψωρα*. *Lepido'nis psori'asis*, *Serp'edo*, *Serpi'go*, *Impeti'go* (of some), *Scab'ies sic'ca* seu *feri'na*, *Psora lepro'sa* seu *squamo'sa*, *Scaly Tetter*, *Dry Scale*, *Dry Scall*, (F.) *Dartre squameuse* *lichenoid'e*, *D. écailleuse*, *Gratelle*, *Gale miliare*, *G. canine* ou *sèche*. A cutaneous affection, consisting of patches of rough, amorphous scales; continuous, or of indeterminate outline; skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis gutta'ta*, *P. diffu'sa* (one form of which is the *Baker's Itch* and *Grocer's Itch*; and another, the *Washerwoman's Scall*), the *P. gyrate*, and *P. inveterata* seu *Psora a'grica*. The treatment of irritable psoriasis must be antiphlogistic, with the internal use of the fixed alkalis, sulphur, &c. They do better without any local application. The more local and less inflammatory are ameliorated by emollient and

soothing applications; or by slightly stimulating means, sea-bathing, the *Ung. hydrarg. nitric-oxyd.*, *Ung. oxid'i zinci*, &c.

PSORIC, *Psor'icinus*, (F.) *Psorique*, *Galeux*; from *ψωρα*, 'itch.' That which has the nature of itch. A medicine for curing the itch.

PSOROCOMIUM, from *Ψωρα*, 'the itch,' and *κομω*, 'I take care of.' An hospital for those affected with itch.

PSOROPHTHALMIA, Ophthalmia tarsi—p. Neonatorum, see Ophthalmia (purulenta infantum).

PSYÆ, Psœa.

PSYCHAGOGA, Psychagogia.

PSYCHAGOGICA, *Psychago'gia*, from *ψυχη*, 'life,' 'soul,' and *αγω*, 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHE, Anima.

PSYCHIA'TER. Same etymon as the next. One who treats diseases of the mind—a *Mad-doctor*, (F.) *Médecin de fous*, *Aliéniste*.

PSYCHIATRIA, from *ψυχη*, 'mind,' and *ιατρεια*, 'healing.' Treatment of diseases of the mind.

PSYCHICAL, *Psy'chicus*, from *ψυχη*, 'mind.' That which relates to the mind or mental endowments. *Psycholog'ical* is not unfrequently used with the like signification.

PSYCHOLOGICAL, see Psychical.

PSYCHOLOGY, *Psycholo'gia*, from *ψυχη*, 'mind,' and *λογος*, 'discourse.' A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

PSYCHONOSOL'OGY, *Psychonosolo'gia*, from *ψυχη*, 'mind,' *νοσος*, 'disease,' and *λογος*, 'a description.' The doctrine of, or a treatise on, diseases of the mind.

PSYCHOPATHIES, Psychoses.

PSYCHORAGES, *Agoni'zans*, *Moribundus*, *Moribund*, *Fey*, *Fee*, *Fie*, from *ψυχη*, 'mind,' 'life,' and *ραγη*, 'rupture.' Dying; in *Articulo Mortis*, "in the article of death;" in *extremis*. *Moribund* means, also, one who is dying.

PSYCHORAGIA, Agony, Death.

PSYCHORRHAGIA, Agony, Death.

PSYCHOS, Cold.

PSYCHOSES, from *ψυχη*, 'mind.' Neuroses of the intellect. Diseases of the mind. *Psychop'athies*.

PSYCHOTHERAPEIA, from *ψυχη*, 'mind,' and *θεραπεω*, 'I attend upon the sick.' Treatment of disease through the mind.

PSYCHOTICA, Analeptica.

PSYCHOTRIA, Analeptica—p. Crocea, *Pali-courea crocea*—p. Emetica, *Ipecacuanha*.

PSYCHOTROPHUM, *Betonica officinalis*.

PSYCHROLUSIA, *Psychrolu'tion*, from *ψυχος*, 'cold,' and *λουω*, 'I wash.' A cold bath.

PSYCHROPHOBIA, from *ψυχος*, 'cold,' and *φοβος*, 'fear.' Dread of cold, especially of cold water. Impressibility to cold.

PSYCHITICA, Refrigerants.

PSYDRACIA, *quasi*, *ψυκρα* 'υδρακια', 'cold drops,' from *ψυδραξ*, *ψυδρακος*, 'a small blister or pimple.' The ancients sometimes used this term for *pimples*; at others, for *vesicles*. Willan and Bateman define *Psychracium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the *psychracia* usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and is not contagious;—perhaps the lichen. Authors have differed regarding its acceptance.

PSYDRACIA ACNE. Acne.
PSYLLIUM, *Plantago psyllium*—p. Erectum,
Plantago psyllium.

PTARMICA, *Achillea ptarmica*—p. Montana,
Arnica montana.

PTARMICUM, Errhine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTELEA TRIPOLIA'TA, *Shrubby trefoil, Swamp dogwood, Stinking ash, Stinking prairie bush, Wingseed*; indigenous. Order, Xanthoxylaceæ. Flowering in June. Is said to be possessed of antiperiodic virtues, and to be anthelmintic.

PTERIS, *Polypodium filix mas*.

PTERIS AQUILI'NA, (περουζι, 'a wing,' from the shape of its leaves.) *Pteris*, *Thelyp'teris*, *Filix Nymphæa* seu *femineæ*, *Asplenium aquili'num*, *Common Brake* or *Female Fern*; *Eagle Fern*, *Bracken*, (F.) *Fongère femelle, La grande Fongère*. Nat. Ord. Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tapeworm.

PTERIS PALUSTRIS, *Asplenium filix fœmina*.

PTERNA, Calcaneum.

PTERNIUM, Calcaneum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see Kino—p. Marsupium, see Kino—p. Sandalinus, P. Santalinus.

PTEROCARPUS SANTALI'NUS, *P. Santali'nus*, (περον, 'a wing,' and καρπος, 'fruit,') *Santalum* seu *Santalum Rubrum, Red Sanders* or *Samders Tree*, (F.) *Santal rouge*. Ord. Leguminosæ. Sex. Syst. Diadelphia Decandria. Red Saunders wood, *Santalum*, (Ph. U. S.) *Lignum sandali'num* is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of *P. Draco*, affords a species of *Dragon's Blood*.

PTEROCAULON PYCNOSTACH'YUM, *Coryza pycnostach'ya, Black root*; indigenous. Order, Compositæ. The root is used as an alterative in the form of decoction. It is said to be possessed of cathartic properties.

PTEROS'PORA ANDROMEDE'A, (περον, 'a wing,' and σπορα, 'seed,' in allusion to the singular wing borne by the seeds,) *Scaly Dragon claw, Dragon root, Fever root, Albany beechdrop*. An indigenous plant. Nat. Ord. Monotropæ, Sex. Syst. Decandria Monogynia:—found in the State of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but is not used.

PTERYG'ION, *Pteryg'ion*, *Ala*, from περουζι, περυγος, 'a wing.' A small wing. *Web, Onyx, Pyc'sis, Unguis*, (F.) *Drapeau, Onglet*. A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Panniculus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGIUM, *Pterygion, Scapula*—p. *Digiti, Paronychia*—p. *Lardaceum, Pinguicula*—p. *Pinguicula*.

PTERYGO, in the composition of anatomical terms, means relating, or appertaining, to the pterygoid processes.

PTERYGO-ANGULI-MAXILLARE, *Pterygoideus externus*—p. *Collis-maxillare, Pterygoideus externus*—p. *Maxillare, grand, Pterygoideus internus*—p. *Maxillare, petit, Pterygoideus externus*—p. *Palatine canal, Pterygoid canal*—p. *Pharyngeus, Constrictor pharyngis*—p. *Staphylinus, Circumflexus*.

PTERYGO-PALATINE, *Pterygo-Palati'nus*. That which belongs to the pterygoid process and palate.

PTERYGO-PALATINE ARTERY or *Superior pharyngeal* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGO-PALATINE CANAL. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGO-STAPHYLINUS INTERNUS, *Levator palati*—p. *Syndesmo-stophylli-pharyngien, Constrictor pharyngis*.

PTERYGOIDES, *Alatus*.

PTERYGOID, *Pterygoï'des, Pterygoï'des, Aliformis*; from περουζι, περυγος, 'a wing,' and είδος, 'form.' A name given to two processes at the inferior surface of the sphenoid bone; the two laminæ which form them having been compared to wings. These *alæ* or *wings* or *processes*,—*Processus aliformes*,—have been distinguished, according to their position, into *internal (ento-pterygoid)* and *external*.

PTERYGOID ARTERY, *Vid'ian Artery, Ramulus Ductus Pterygoï'de'i, Arteria pharyngea suprèma*, arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningeæ media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, Sphenoid.

PTERYGOID CANAL, *Vid'ian canal, Ductus pterygoï'dens, Canalis Vidia'nis*, (F.) *Conduit ptérygoï'dien* ou *Vidien, Pterygo-palatine canal*, is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, have the same epithets applied to them.

PTERYGOID FOSSA, *Fossa Pterygoï'de'a*, (F.) *Fosse ptérygoï'dienne* ou *ptérygoï'de*, is the depression which separates the two laminæ or alæ of the pterygoid process.

PTERYGOID MUS'LES, *Ala'res mus'culi, Aliformes mus'culi*, are two in number. 1. The *Pterygoideus externus seu minor*, (F.) *Ptérygocollis-maxillaire, Petit Ptérygo-maxillaire* (Ch.), *Petit ptérygoï'dien, Ptérygoï'dien externe*, is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted at the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoï'deus internus seu major, Masse'ter internus, Latens in Ore*, (F.) *Grand Ptérygo-maxillaire, Ptérygo-anguli-maxillaire, Grand Ptérygoï'dien* ou *Ptérygoï'dien interne*. A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle

raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

PTERYGOID NERVES. These are two in number. I. The *Pterygoid* or *Vidian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial, Nervus superficialis sive petrosus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid, Nervus profundus sive major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. II. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoidei*, is given off by the inferior maxillary branch of the 5th pair.

PTERYGOID PROCESSES, see *Pterygoid*.

PTERYGOÏDIEN GRAND OU INTERNE, *Pterygoideus internus*—*p. Externe, Pterygoideus externus*—*p. Petit, Pterygoideus externus*.

PTERYGOÏMA, from *περυζή, πτερύγος*, 'a wing; a projecting or pendulous body.' A swelling of the vulva, which prevents coition.—M. A. Severinus.

PTERYX, Ala.

PTILOSI, Deplumatio, Madarosis.

PTISANA, Tisane—*p. Communis, Decoctum hordei compositum*—*p. Hippocratica, Decoctum hordei*.

PTISSANA, Tisane.

PTOCHIAÏTER, Ptochiaïtrus, from *πωχος*, 'poor,' and *ιατρος*, 'a physician.' A physician to the poor, or to an establishment for the poor.

PTOCHIAÏTRIA, Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

PTOCHOCOMIÏUM, from *πωχος*, 'a poor person,' and *κομωω*, 'I take care of;'
Ptochodochiïum, Ptocheiïum, Ptochotropheïum. An almshouse. An hospital for the poor.

PTOCHODOCHIUM, Ptochocomium.

PTOCHOTROPIHEUM, Ptochocomium.

PTOMA, Cadaver.

PTOSIS, πτωσις, Prolapsus—*p. Bulbi oculi, Exophthalmia*.

PTOSIS IRIDIS, Iridoceïlè, Her'nia seu Prolapsus Iridis, Iridoptosis, from *πτωσις*, 'a falling,' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

PTOSIS PALPEBRE, Blepharoptosis.

PTYALOGOGUE, Sialogogue.

PTYALIN, see *Saliva*.

PTYALISM, Salivation.

PTYALISME, Salivation—*p. Mercuriel, Salivation, mercurial*.

PTYALISMUS, Salivation—*p. Acutus mellitus, see Salivation*—*p. Acutus sympatheticus, see Salivation*—*p. Hydrargyratus, Salivation, mercurial*—*p. Iners, Slavering*—*p. Mercurialis, Salivation, mercurial*—*p. Pyroscopic, Pyrosis*.

PTYALOGOGUE, Sialogogue.

PTYALON, Saliva.

PTYASMAGOGUE, Expectoant, Sialogogue.

PTYELON, Saliva, Sputum.

PTYSIS, Exspuition.

PTYSMA, Saliva, Sputum.

PTYSMAGOGUE, Sialogogue.

PTYSMATIS'CHESIS, Ptysmatos'chesis, from *πτυσμα*, 'sputum,' and *ισχειν*, 'to retain.' Suppression of pulmonary expectoration.

PTYSMATOSCHESIS, Ptysmatischesis.

PUANTEUR, Dysodia.

PUBENS, Ephebus.

PUBER, Ephebus.

PUBERAL; same etymon as Puberty. Re-

lating or appertaining to the age of puberty—as 'a *puberal* disease.'

PUBÈRE, Ephebus.

PUBERTAS, Ephebia.

PUBERTY, Pubertas, Hebè, Pubes, Aphrodisia, Ephebi'a, Ephe'bia, Ephe'botes, Ephebo'synè, Pubes'cence, from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people of both sexes are *pubes'cent* or *nubile*. According to the civil law, puberty occurs at 12 years in females, and 14 in males. The period varies somewhat in different climates, and in different individuals of the same climate.

PUBES, Pubis, Epis'chion, Cteis, Pecten; the Pubic region. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is also called *Pubes, Lunu'go* seu *Pili, Pudendo'rum, Plautu'rium*; and, of old, *Epictenion* and *pubertas* signified the same. See *Tressoria*.

PUBES, Puberty.

PUBESCENCE, Puberty.

PUBESCENT, see Puberty.

PUBIÏUS, Pubic.

PUBIC, Pu'bium, Pu'bicus, Pubiæ'us, (F.) Pubien. That which belongs to or concerns the pubis.

PUBIC ARCH, Arch of the Pubis, (F.) Arcade pubienne. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions which she has to execute.

PUBIC ARTICULA'TION, Sym'physis Pubis, results from the junction of the ossa pubis. The medium of union is cartilage.

PUBIC LIG'AMENTS are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*; the other the *inferior or subpubic*.

PUBIC REGION, Re'gio Pubis. The region of the pubes.

PUBIEN, Pubic.

PUBIO-COCYGIEN-ANNULAIRE, Pubio-coccyge'us annula'ris. Dumas gave this name to the levator ani and ischio-coccygeus, which he considers a single muscle.

PUBIO-COCYGIEN-ANNULAIRE, Levator Ani—*p. Femoral, Pectinalis*—*p. Femoralis, Adductor longus femoris*—*p. Ombilical, Pyramidalis abdominis*—*p. Prostaticus, Compressor prostatae*—*p. Sous-ombilical, Pyramidalis abdominis*—*p. Sternal, Rectus abdominis*—*p. Urethral, see Compressor Urethrae*.

PUBIS, Pubes.

PUBIS OS, Os Pec'tinis, Episci'on, Episi'on, Epis'chion, Shave Bone, Bar-bone, (Sc.) Ark-bein. The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

PUBLICÆ PARTES. 'Public parts.' Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

PUCCOON, Sanguinaria Canadensis—*p. Red, Sanguinaria Canadensis*—*p. Yellow, Hydrastis Canadensis*.

PUCE, Pulex irritans—*p. de Bourgogne, see Anthrax*—*p. Maligne, see Anthrax*—*p. Pénétrante, Chique*.

PUCELAGE, Virginity.

PUCELLE, Virgin.

PUCHA-PAT, Pogostemon patchouli.

PUCHURY, see Pichurim beans.

PUCHYRY, see Pichurim beans.
 PUCKLE, Papula.
 PUDDING-GRASS, *Mentha pulegium*.
 PUDDING-PIPE TREE, *Cassia fistula*.
 PUDENDA, Genital organs—p. Virorum, Pudibilia.

PUDEND'AGRA. A hybrid word; from *pudenda*, (*pudere*, 'to be ashamed,') 'the genital organs,' and the Greek *αγρα*, 'a seizure.' According to some, this term means pain in the genital parts: *Dolor pudendo'rum*, *Men'tulagra*, *Ædœo-dyn'ia*; according to others, it is synonymous with syphilis.

PUDENDAGRA PRURIENS, Prurigo pudendi muliebris.

PUDEND'DAL, *Pudenda'lis*. Relating or appertaining to the pudenda.

PUDEND'DAL HERNIA. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis as far as the os uteri.

PUDENDALIS, Pudendal.

PUDENDALIS LONGUS INFERIOR, see Sciatic nerve, lesser.

PUDENDUM, FEMALE, Vulva—p. Muliebre, Vulva.

PUDENDUS, Pudic.

PUDIBIL'IA; from *pudere*, 'to be ashamed.' The male genital organs; *Genita'lia Viri*, *Viril'ia*, *Pensil'ia*, *Instrument'a*, *Puden'da viro'rum*, *Pon'dus*.

PUDIC, *Pudi'cus*, *Puden'dus*, (F.) *Honteux*. Same etymon. That which causes shame. A name given to the genital organs as well as to different other parts.

PUDIC ARTERIES are distributed to the organs of generation. They are,—1. The internal *Pudic*, *Arteria Pudi'ca*, *A. puden'da commun'is*, (F.) *Artère honteuse interne*, *A. Sous-pubienne* (Ch.), *Genital Artery*. It is furnished by the hypogastric, and divides into two branches; the one—the inferior or perineal—which gives off the inferior hemorrhoidal and the artery of the septum; the other—the superior, (F.) *Ischiopé-nienne*—which furnishes the transverse perineal artery, and divides into two branches; the artery of the corpus cavernosum, and the dorsalis penis. This latter, in the female, has the name *Dorsalis Clitor'ialis*. 2. The external *Pudic Arteries*, (F.) *Artères scrotales ou vulvaires* (Ch.), *A. honteuses externes*, which are two in number. The one is superficial or subcutaneous, and the other deep-seated or subaponeurotic. They are given off from the femoral artery, or some one of its branches; and are distributed to the external parts of generation.

PUDIC NERVE. (F.) *Nerf honteux* ou *ischio-pénien* ou *Ischio-clitorien*, is a branch furnished by the sacral plexus, which is distributed to the genital organs; and, especially, to the penis in man, and the clitoris in the female.

PUERILE, *Pueril'is*, from *puer*, 'a child,' (F.) *Puéril*. Appertaining or relating to childhood.

Respiration puérile ou *exagérée* ou *supplémentaire* ou *hypercœculaire*:—a term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

PUERILITAS, Dementia of the aged.

PUERITIA, see Age.

PUER'PERA, from *puer*, 'a child,' and *parere*, 'to bring forth.' *Tokos*, *Lochos*, *Enic'a*, *Lecho*, a lying-in woman, (F.) *Femme en Couche*, *Accouchée*. A female in child-bed. One recently delivered.

PUER'PERAL, *Puerpera'lis*; from *puerpera*. Relating to parturition and its consequences.

PUERPERAL CONVULSIONS, *Eclampsia gravidarum* et *parturientium*.

PUERPERAL FEVER. Any fever occurring

during the puerperal state—*Febris puerpera'rum*, *Lechop'gra*, *Lochiocali'tis*, *Lochiop'gra*, *Lochop'gra*, *Child-bed fever*. Most commonly restricted to a malignant variety of peritonitis.

PUERPERIUM, Child-bed state.

PUERPEROUS, Parturient.

PUFF, Lycoperdon.

PUFF, VEILED, see Carnivorous respiration.

PUFF-BALL, Lycoperdon, *Leontodon taraxacum*.

PUFFINESS, from (D.) *poffen*, 'to blow;' *Infla'tio*, *Suffla'tio*, *Tumefac'tio mollis*, (F.) *Bouffissure*, *Boursouffure*. A soft intumescence, without redness, which may be partial or general, and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous areolar tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

PUGIL'US, *Drax*, *Drac'hion*, diminutive of *pugnus*, 'the fist.' *Dragma*, *Dragma*, (F.) *Pincée*. The quantity of any substance, which may be taken with the ends of two or three fingers. The eighth part of a handful.

PUGTEETH, Canine teeth.

PUISSANCE DU MOULE INTÉRIEUR, Plastic force.

PUKE, Emetic.

PUKEWEED, *Lobelia inflata*.

PUKING, Vomiting, Regurgitation.

PULEGIUM, *Mentha pulegium*—p. Cervinum, *Mentha cervina*.

PULEX IRRITANS. The common flea, (F.) *Puce*. A parasitic insect found on the bodies of man and animals.

PULEX PENETRANS, *Chique*.

PULICARIA DYSENTERICA, *Inula dysenterica*.

PULICARIS, *Pulicula'ris*, (F.) *Pulicaire*, from *pulex*, *pulicis*, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to diseases in which such eruptions occur.

PULICARIS HERBA, *Plantago psyllium*.

PULNA, PILNA or BILNA, MINERAL WATERS OF. These well known bitter Bohemian springs contain sulphates of soda and magnesia, and chloride of magnesium.

PULMO, (pl.) *Pulmo'nes*; by transposition of the letter *l* from *pleumon*, *πλεμων*; *Pneumon*, *Pleumon*, *Spiramentum animæ*, *Ergasterion spir'itūs*, *Flabell'um et ventila'brum cordis*, *Lights*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi seu Alæ pulmo'rum*. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the root of the lungs, (F.) *Racine des Poumons*. Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa, constituting lozenge-shaped spaces, which are called *lobules*—

lobuli seu in'sulæ pulmonales—and which are separated by interlobular areolar tissue. These lobules do not communicate with each other. The vesicles are called *Air-cells*, *Spiramenta* seu *Spiramina* seu *Cellulæ Pulmonum*. Along the partitions or septa is deposited, in greater or less quantity, *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the *bronchial arteries* and veins. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions* or *glands*. The nerves are furnished by the pulmonary plexus.

PULMOMETER, Spirometer.

PULMOMETRY, see Spirometer.

PULMONAIRE, Pulmonaria—*p. eu Arbre*, Lichen pulmonaria—*p. de Chêne*, Lichen pulmonaria—*p. des Français*, Hieracium murorum.

PULMONARIA, *P. Officinalis* seu *Maculata* seu *Maculosa*, *Lungwort*, *Spotted Lungwort*, *Jerusalem Cowslip*, *Jerusalem Sage*, *Spotted Comfrey*, (F.) *Pulmonaire*, *Sauge de Jerusalem*. Ord. Boraginaceæ. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs—hence the name, from *pulmo*, *pulmonis*, 'the lung'—and partly because they have a slightly mucilaginous taste. The plant is not worthy of notice.

PULMONARIA, Pneumonia—*p. Arborea*, Lichen pulmonarius—*p. Gallica*, Hieracium murorum—*p. Officinalis*, Pulmonaria—*p. Virginica*, Mertensia Virginica.

PULMONARY, *Pulmonaris*, *Pulmonalis*, from *pulmo*, *pulmonis*, 'the lung.' That which relates or belongs to the lungs. A name given to various parts.

PULMONARY ARTERY, *Arteria pulmonaris*, *Vena arteriosa*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

PULMONARY MATTER, BLACK, see Pulmo.

PULMONARY PLEXUS, *Plexus pulmonaris*. A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much areolar tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

PULMONARY VEINS, *Venæ pulmonares*, *Arteriae venosæ*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to

open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in conveying arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

PULMONES TARTARIZATI, Lithiasis pulmonum.

PULMONIA, Phthisis pulmonalis, Pneumonia.

PULMONIC, *Pulmonicus*, *Pneumonicus*, *Pulmonarius*, *Pneumonic*, (F.) *Pulmonique*, *Pneumonique*. Same etymon as Pulmonary. One affected with phthisis—one labouring under diseases of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

PULP, *Pulpa*, *Pulpaemen*, *Sarc*, (F.) *Pulpe*, *Pulpolite*. The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping. Applied, also, to parts of the human body, which have the characters of, or resemble a pulp.

PULP OF THE FINGERS, (F.) *Pulpe des doigts*. The fleshy extremity of the fingers.

PULP OF THE TOOTH, Dental pulp.

PULPA CASSIÆ, see Cassia fistula—*p. Dentis*, Dental pulp—*p. Pili*, see Hair—*p. Pruni*, see Pruni pulpa—*p. Prunorum sylvestrium condita*, Conserva pruni sylvestris—*p. Tamarindi*, see Tamarindi pulpa.

PULPA TESTIS, *Parenchyma testis*. The parenchyma of the testis.

PULPAMEN, Pulp.

PULPATION, Pulping.

PULPE, Pulp—*p. Cérébrale*, see Cerebrum—*p. Dentaire*, Dental pulp—*p. des Doigts*, Pulp of the fingers.

PULPEUX, Pulpy.

PULPEZIA, Apoplexy.

PULPING, *Pulpa'tion*, *Pulpa'tio*. An operation—the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper*, (F.) *Pulpoire*.

PULPOIRE, see Pulping.

PULPOLITE, Pulp.

PULPY, *Pulposus*, (F.) *Pulpeux*. Full of pulp.

PULQUE, see Agave Americana.

PULS EX OVIS et LACTE, Oogala.

PULSATIF, Throbbing.

PULSATILLA NIGRICANS, Anemone pratensis—*p. Patens*, Anemone patens—*p. Praten-sis*, Anemone pratensis—*p. Vulgaris*, Anemone pulsatilla.

PULSATILLE NOIRE, Anemone pratensis—*p. des Prés*, Anemone pratensis.

PULSATIO, Pulsation—*p. Cordis*, Palpitation.

PULSATION, *Pulsa'tio*, *Sphygmus*, *Sphyxis*, *Peda'sis*, *Peda'thos*, (F.) *Battement*. The beating of the heart and arteries. Also, the beating felt in an inflamed part.

PULSATIVUS, Throbbing.

PULSATORY, Throbbing.

PULSE, from *pulso*, 'I beat;' *Pulsus*, *Pulsa'tio*, *Pulsus seu Ictus cordis et arteriarum*, *Incur'sus arteriarum*, *Sphygmus*, *Sphygmus*, *Diasphyxis*, (F.) *Pouls*. Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a

given time; to their degrees of quickness; hardness and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the

artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

Ages.	Number of Beats per minute, according to		
	HEBERDEN.	SÖMMERING.	MÜLLER.
In the embryo.....			150
At birth.....	130 to 140		Do.
One month.....	120		
One year.....	120 to 108	120	115 to 130
Two years.....	108 to 90	110	100 to 115
Three years.....	90 to 80	90	90 to 100
Seven years.....	72		85 to 90
Twelve years.....	70		
Puberty.....		80	80 to 85
Adult age.....		70	70 to 75
Old age.....		60	50 to 65

It does not appear that the pulse of the aged is less frequent, but the contrary. In general it is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In diseases it wanders, more or less, from these physiological conditions. The different characters of the pulse that have been recorded, are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded, and some are ridiculous.

PULSE, ARDENT, *Pulsus ardens*, (F.) *Pouls ardent, Pouls élevé*. One which seems to raise itself to a point in order to strike the finger.

PULSE, CAP'RIZANT, *Pulsus Caprizans* seu *dorcadisans* seu *gazell'aus* seu *fusa'lis*, *Goatleap pulse*, (F.) *Pouls caprisant*. One which seems to leap, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

PULSE, COMPLEX, (F.) *Pouls combiné* ou *composé*, *P. compliqué*. A pulse which has the character of several critical pulses united.

PULSE, CONTRACT'ED, (F.) *Pouls serré* ou *concentré*. One whose pulsations are narrow, deep, and slightly hard.

PULSE, CONVULSIVE, *Pulsus convulsivus*, (F.) *Pouls convulsif*. That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

PULSE, CRIT'ICAL, *Pulsus crit'icus*. A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

PULSE, DECURTATE, *Pulsus myurus*: see, also, *Myurus*.

PULSE, DEEP, *Pulsus profundus*, (F.) *Pouls profond*. One which cannot be felt without difficulty, and without strong pressure by the finger.

PULSE, DEPIC'IENT, *Pulsus depic'iens* seu *an'neus* et *circum'nuens*, *P. Flickering*, (F.) *Pouls dépitillant, P. insensible*. One which seems, every instant about to cease.

PULSE, DEPRESSED, *Pulsus depressus*, (F.) *Pouls déprimé*. That which is deep and weak.

PULSE, DEVEL'OPED, (F.) *Pouls développé*. That which is broad, full, strong, and frequent.

PULSE, DICROT'IC, *Pulsus Di'crotus* seu *bi'erosus* seu *intestina'lis* seu *bife'riens* seu *malle'ris* seu *interci'ens* seu *duplex*, (F.) *Pouls dicrote* ou *reboulissant* ou *redoublé*. That in which the finger

is struck twice at each pulsation; once lightly, the other time more strongly.

PULSE, EQUAL, *Pulsus æqualis*. That in which the pulsations resemble each other, and return at equal intervals.

PULSE, FEBRILE, *Pulsus febrilis*. One very frequent.

PULSE, FEEBLE, *P. Weak, Pulsus debilis*, (F.) *Pouls faible*. One which strikes the finger feebly.

PULSE, FIL'IFORM, *P. thready*. One which resembles a thread slightly vibrating.

PULSE, FLICKERING, *Pulse, defient*.

PULSE, FORM'ICANT, *Pulsus formicans*, (F.) *Pouls formicant*. One which resembles, by being small and scarcely perceptible, the motion of an ant.

PULSE, FREQUENT, (F.) *Pouls agité* ou *précipité*. One which strikes more frequently than usual in a given time.

PULSE, FULL, *Pulsus plenus*, (F.) *Pouls plein*. One which gives the notion of great repletion in the vessel.

PULSE, GOAT-LEAP, *P. Caprizant*.

PULSE, GUT'TURAL, *Pulsus guttura'lis*, (F.) *Pouls guttural*. A pulse which has been supposed to indicate the termination of affections of the throat.

PULSE, HARD, *Pulsus durus*, (F.) *Pouls dur*. That in which the pulp of the finger seems to yield to the pulsation.

PULSE, HECTIC, *Pulsus hecticus*. The weak, frequent pulse observed in hectic fever.

PULSE, HEMORRHOID'AL, (F.) *Pouls des Hémorrhoides*. A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

PULSE, HEPAT'IC, (F.) *Pouls du Foie*. A pulse imagined to indicate affections of the liver. It is not worthy of description.

PULSE, INF'E'RIOR, (F.) *Pouls inférieur* ou *abdominal* ou *ventral*. One supposed to announce evacuations below the diaphragm.

PULSE, INTERCUR'RENT, *Pulsus intercur'rens* seu *interci'dens*. One in which a superfluous pulsation seems to occur from time to time.

PULSE, INTERMITTENT, (F.) *Pouls intercadent*. One in which the pulsations fail from time to time.

PULSE, INTES'TINAL, (F.) *Pouls des intestins*, *P. de la diarrhée*. A critical pulse, presumed to announce an evacuation by the intestines.

PULSE, IN'TRICATE, *Pulsus intricatus*, (F.) *Pouls embarrassée*. That which is but little developed and unequally slow.

PULSE, IRREG'ULAR, *Pulsus anormalis*. One

whose pulsations are unequal, and return at unequal intervals.

PULSE OF IRRITATION, *Pulsus ab irritatio-nē seu nervi-us seu acriticus*. One which is frequent, hard, and contracted.

PULSE, JARRING, *P.* vibrating — *p.* Jerking, *Pulse*, sharp.

PULSE, LANGUID, (*F.*) *Pouls languissant*. A slow and feeble pulse.

PULSE, LARGE, *Pulsus crassus seu magnus*, (*F.*) *Pouls grand*, *P. large*. That which is large and full.

PULSE, LONG. One which strikes the finger to a great extent in length.

PULSE, LOW, *Pulsus humilis*, (*F.*) *Pouls bas*. One in which the pulsations are scarcely perceptible.

PULSE, NASAL, (*F.*) *Pouls nasal ou capital ou du Nez*. One supposed to announce the end of an irritation in the nasal fossæ.

PULSE, NATURAL, (*F.*) *Pouls naturel des adultes ou parfait ou des adultes ou modéré*. One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

PULSE, ORGANIC, (*F.*) *Pouls organique*. One which indicates the affected organ, or the organ by which an evacuation will take place.

PULSE, PECTORAL, (*F.*) *Pouls de l'expectoration*. A critical pulse, announcing the termination of some pulmonary irritation.

PULSE, QUICK. One which strikes sharply, but not forcibly, against the finger.

PULSE, REGULAR, *Pulsus normis seu regularis*. One whose pulsations are equal, and succeed each other at equal intervals.

PULSE, RESISTING, (*F.*) *Pouls résistant*. One a little tense, a little hard.

PULSE, SHARP, (*F.*) *Pouls prompt ou vite ou eif*. One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse*.

PULSE, SHARP-TAILED, *Pulsus myurus*: see *Myurus*.

PULSE, SIMPLE, *Pulsus simplex*. A critical pulse, indicating an evacuation by one organ only.

PULSE, SLOW, *Pulsus tardus seu rarus*, (*F.*) *Pouls lent ou tardif ou rare*. One which strikes the finger slowly.

PULSE, SMALL, *Pulsus parvus*, (*F.*) *Pouls petit*. One whose pulsations are slender and weak.

PULSE, SOFT, *Pulsus mollis*, (*F.*) *Pouls mou*. One which yields under the finger.

PULSE, STOMACHAL, (*F.*) *Pouls stomacal ou de l'estomac*. One supposed to announce an evacuation by the stomach.

PULSE, STRONG, *Pulsus fortis*, (*F.*) *Pouls fort*, *P. véhément*. One which strikes the finger strongly.

PULSE, SUPERIOR, *Pulsus Superior*, (*F.*) *Pouls supérieur*. A critical pulse, supervening on irritation of organs situate above the diaphragm.

PULSE, SUPPLE, *Pulsus elasticus*, (*F.*) *Pouls souple*. One in which the pulsations have strength without hardness.

PULSE OF SWEAT, *Pulsus Sudoralis*, (*F.*) *Pouls Sudoral ou de la sueur*. A critical pulse, indicating an approaching perspiration.

PULSE, TENSE, *P. Cordy*, *Pulsus tensus*, (*F.*) *Pouls tendu*, *P. roide*. One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry*.

PULSE, TREADY, *P. filiform*.

PULSE, TREMULOUS, *Pulsus tremulus*, (*F.*) *Pouls tremblant ou palpitant*. One in which each pulsation oscillates.

PULSE, UN-DULATING, *Pulsus fluctuosus seu Juens* seu *inci-dens Sola'ni*, (*F.*) *Pouls ondulant*

ou *oudoyant*. One which resembles, in its movements, those of the waves.

PULSE, UNEQUAL, *Pulsus inæqualis*, (*F.*) *Pouls inégal*. One whose pulsations are not alike, or return at unequal intervals.

PULSE, URINAL, *Pulsus urinalis*, (*F.*) *Pouls de l'Urine*. A critical pulse, fancied to denote an approaching evacuation of urine.

PULSE, UTERINE, *Pulsus uterinus*, (*F.*) *Pouls Utérine ou de la Matrice ou des Règles*. One which indicates the flow of the menses, or the occurrence of metrorrhagia.

PULSE, VAGINAL, *Pulsus vaginalis*. The pulsation of the arteria vaginalis, which is increased in pregnancy, during abortion, labour, &c.

PULSE, VENOUS, *Pulsus venarus*.

PULSE, VERMICULAR. That which imitates the movement of a worm.

PULSE, VIBRATING, *Jarring Pulse*. One in which the artery seems to vibrate like a musical string.

PULSE, WIRY, see *Pulse*, tense.

PULSELESS, *Asphyctos*, Devoid of pulsation.

PULSELESSNESS, *Asphyxia*.

PULSEY, *Cataplasin*.

PULSIFIC, *Pulsificus*; from *pulsus*, 'pulse.' That which causes or excites pulsation.

PULSILEGIUM, *Pulsilegium*, *Pulsimeter*, from *pulsus*, 'the pulse,' and *lego*, 'I read,' *Sphygmotegium*, *Sphygmometer*, *Sphygmoscopium*. Any instrument for measuring the quickness or force of the pulse.

PULSIMANTIA, from *pulsus*, and *μαντεια*, 'divination.' The art of predicting or prognosticating by the pulse.

PULSIMETER, *Pulsilegium*.

PULSUS, *Pulse* — *p.* *Acriticus*, *Pulse* of irritation — *p.* *Æqualis*, *Pulse*, equal — *p.* *Annuens* et *circumnuens*, *Pulse*, deficient — *p.* *Anormalis*, *Pulse*, irregular — *p.* *Bicrotus*, *Pulse*, dicrotic — *p.* *Biferiens*, *P.* dicrotic — *p.* *Caprizans*, *Pulse*, caprizant — *p.* *Cordis*, see *Heart* — *p.* *Crassus*, *Pulse*, large — *p.* *Debilis*, *Pulse*, feeble — *p.* *Deficiens*, *Pulse*, deficient — *p.* *Dicrotus*, *Pulse*, dicrotic — *p.* *Doreadissans*, *Pulse*, caprizant — *p.* *Duplex*, *Pulse*, dicrotic — *p.* *Durus*, *Pulse*, hard — *p.* *Elasticus*, *Pulse*, supple — *p.* *Fluctuosus*, *Pulse*, undulating — *p.* *Fluens*, *Pulse*, undulating — *p.* *Formicans*, *Formicant*, and *Pulse*, formicant — *p.* *Fortis*, *Pulse*, strong — *p.* *Fusalis*, *Pulse*, caprizant — *p.* *Gazelans*, *Pulse*, caprizant — *p.* *Heterochronicus*, see *Heterochronicus* — *p.* *Humilis*, *Pulse*, low — *p.* *Incidens Solani*, *Pulse*, undulating — *p.* *Intercidens*, *Pulse*, intercurrent — *p.* *Mallearis*, *Pulse*, dicrotic — *p.* *Intercidens*, *Pulse*, dicrotic — *p.* *Intercurrens*, *Pulse*, intercurrent — *p.* *Intestinalis*, *Pulse*, dicrotic — *p.* *Intricatus*, *Pulse*, intricate — *p.* *Magnus*, *Pulse*, large — *p.* *Mollis*, *Pulse*, soft.

PULSUS MYURUS, *Pulse* *decurtata* or *sharp-tailed*, (*F.*) *Pouls myure*. One which goes on diminishing. See *Myurus*.

PULSUS NERVINUS, *Pulse* of irritation — *p.* *Normalis*, *Pulse*, regular — *p.* *Parvus*, *Pulse*, small — *p.* *Plenus*, *Pulse*, full — *p.* *Rarus*, *Pulse*, slow.

PULSUS SERRINUS, (*F.*) *Pouls serrin ou serratile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

PULSUS STRIATUS, (*F.*) *Pouls étroit*. One that strikes the finger to a small extent in breadth.

PULSUS SUDORALIS, *Pulse* of sweat — *p.* *Tardus*, *Pulse*, slow — *p.* *Urinalis*, *Pulse*, urinal — *p.* *Uterinus*, *Pulse*, uterine.

PULSUS VACUUS, (*F.*) *Pouls vide*. One which gives the idea of emptiness of the artery.

PULSUS VAGINALIS, *Pulse*, vaginal.

PULSUS VENA'RUM, *Venous Pulse*, *Phlebopœlia*. A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle,

and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULTACEOUS, *Pultaceus*, (F.) *Pultacé*, from *puls*, *pultis*, 'pap,' or from *pultare*, *pultus*, 'to beat.' Resembling pap. Having a softened, semifluid appearance.

PULTATIO, Atheroma.

PULSISE, Cataplasm.

PULTICULA, *Bonillie*.

PULVERES EFFERVESCENTES, Powders, soda.

PULVERIZABLE, *Pulverable*. From *pulvis*, *pulveris*, 'dust.' Capable of being reduced to powder.

PULVERIZATION, *Pulverisatio*, *Pulveratio*, *Coniostosis*, (F.) *Pulvérisation*. The operation of dividing substances, so as to reduce them to powder.

Most drugs are reduced to powder by persons who make it a special business, and who are called *drug grinders*. This is done on a large scale in *drug mills*; and the implements used are the *grinding mill* and the *stamping mill*. In the shop of the apothecary, pulverization is effected by the pestle and mortar, and the sieve.

Where substances require the addition of other bodies to facilitate their reduction to powder,—as where camphor needs a few drops of alcohol—the process is called *pulverization by mediation*.

PULVÉROLÉS, see *Pulvis*.

PULVERULENT, *Pulverulentus*; from *pulvis*, *pulveris*, 'dust.' Reduced to the state of a fine powder. Covered, as it were, with dust. An epithet applied to the eyes when they appear dirty, and, as it were, sprinkled with dust, by reason of granulations or grayish stræ, resulting from thickening of the mucous fluid of the conjunctiva.—*Nysten*.

PULVILLUS, *Pad*, *Bourdonnet*—p. e *Linaementis confectus*, *Bourdonnet*—p. *Rotundus*, *Bourdonnet*.

PULVINAR, *Pulvinarium*. A pillow.

PULVINAR HUMULI, see *Humulus lupulus*.

PULVINAR MEDICATUM seu **MEDICINALE**, *Sacculus medicinalis*. A medicated pillow; as of hops.

PULVINAR PARVUM, *Pad*—p. *Ventriculi*, *Pancræas*.

PULVIS, *Conis*, *Powder*, (F.) *Poudre*. A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine that it can scarcely be felt under the finger. Compound powders have been called *Species*, (F.) *Espèces*, *E. pulverulentes*, *Pulvérolés*.

PULVIS ABSORBENS, P. de magnesîa compos.—p. *Adspersorius*, *Catapasma*—p. *Alexiterius*, P. *contrayervæ* comp.—p. *Alexiterius*, P. *ipeacuanhæ* compositus—p. *Algarothi*, *Algaroth*.

PULVIS ALOES COMPOSITUS, P. *Aloës cum Guaiaco*, P. *aloëticus cum Guaiaco*, *Compound powder of Aloes*. (*Aloës*, ℥iiss, *guaiac. res.* ℥j, *pule. cinnam. comp.* ℥ss. Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ℥j.

PULVIS ALOES CUM CANELLÂ, P. *aloës et canellæ*, (*Ph. U. S.*), P. *Aloëticus*, *Powder of Aloes with Canella*, *Species Hi'era pieræ*, *Hi'era pieræ*, vulg. *Hi'kry pi'kry*, *Piera*, and *Pi'kry*. (*Aloës* ℥ij, *canell.* ℥iij. Rub separately into a powder, and mix. *Ph. U. S.*) A warm cathartic. Dose, gr. x to ℥j.

PULVIS ALOES CUM GUAIACO, P. A. compositus—p. *Aloeticus*, P. *aloes cum canellâ*—p. *Alo-*

eticus, *Hi'era pieræ*—p. *Aluminosus*, P. *sulphatis aluminæ* compositus—p. *Aluminis* compositus, P. *sulphatis aluminæ* compositus—p. *Aluminis kinosatus*, see P. *sulphatis aluminæ* compositus.

PULVIS DE AMARIS COMPOSITUS, P. *antiarthriticus amarus*, (F.) *Poudre antiarthritique amère*. (*Gentian.*, *aristoloch. rotund.*, āā ʒ ʒ, *flor. centaur. min.* p. 4, *fol. chamædr.*, *chamæpith.* manipul.—f. *pulvis*, *Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

PULVIS ANGELICUS, *Algaroth*—p. *Anodynus*, P. *ipeacuanhæ* comp.—p. *Antiacidus*, P. *cretæ* compositus—p. *Antiacidus*, P. *de magnesîa* compos.—p. *Antiarthriticus amarus*, P. *de amaris* compositus—p. *Antiarthriticus purgans*, P. *de sennâ*, *scammonæ* et *lignis*—p. *Antiasmaticus*, P. *de sulphure* et *scillâ*.

PULVIS ANTILYS'SUS, *Mead's powder against the bite of a mad dog*. It consisted of ash-coloured liverwort in powder, with an equal quantity of black pepper; and a drachm and a half of the two forming a dose for an adult.

PULVIS ANTIMONIALIS, *Antimonial powder*.

PULVIS DE ARO COMPOSITUS, *Compound Powder of Arum*, (F.) *Poudre de Birkmann*, (*Rad. ari.*, *acori* veri, *pimpinell. saxifrag.* āā 40 p., *ocul. cancer.* ppt. 12 p., *cinnam.* ʒ p., *potassæ sulph.* 6 p., *ammonæ muriat.* 2 p.—f. *pulv.* *Ph. P.*) *Sternutatory*.

PULVIS AROMATICUS, P. *cinnamomi* compositus.

PULVIS ASARI COMPOSITUS, P. *sternutatorius* seu *errib'ius* seu *capitallis Sancti Angeli* seu *cephalicus*, *Cephalic snuff*, *Compound powder of Asarabacca*, (F.) *Poudre d'asarum composée dite sternutatoire*, P. *de Saint-Auge*. (*Asar. Europ.* p. 3, *origan. majoranæ*, *lavand.*, sing. p. 1. Rub into powder. *Ph. L.*) *Sternutatory*.

PULVIS AURI, see *Gold*—p. e *Bolo* compositus cum *opio*, P. *cretæ* compositus cum *opio*—p. e *Bolo* compositus sine *opio*, see P. *cretæ* compositus—p. *Cambogiæ* compositus, P. e *gummi guttâ*—p. *Capitalis Sancti Angeli*, *Pulvis asari* compositus—p. *Carbonatis calcis* compositus, P. *cretæ* compositus—p. *Cardiacus*, P. *contrayervæ* comp.—p. *Carthusianorum*, *Antimonii sulphureum rubrum*.

PULVIS CAT'ECHU COMPOSITUS, *Compound Powder of Catechu*. (*Catechu*, *kino*, āā ℥ij; *cinnam.*, *myrist.*, āā ℥ss.) Dose, as an astringent, gr. xv to xxx.

PULVIS CATHARTICUS, P. *scammonæ* comp.—p. *Cephalicus*, P. *asari* compositus.

PULVIS CINNAMOMI COMPOSITUS, *Compound Powder of Cinnamon*, *Pulvis* seu *Species Imperatoris*, *Pulvis aromaticus* (*Ph. U. S.*), P. *vitzæ Imperatoris* seu *Diarodon*, *Species diacinnamomi* seu *latifoliantis Rhazis* seu *Diambræ sine odoratis* seu *aromaticæ*, *Tra'gea aromatica*, *Aromatic powder*, (F.) *Poudre de canelle composée ou aromatique*. (*Cinnam.*, *zingib.* āā ℥ij, *cardam.*, *myrist.* āā ℥j. Rub to a fine powder. *Ph. U. S.*) Stimulant and carminative. Dose, gr. x to ℥j.

PULVIS COBBII seu **TUNQUINENSIS**. The famous *Tonquin powder*, introduced into England by a Mr. Cobb. It was composed of 16 grains of musk, and 48 grains of *cinnabar*; and was mixed in a gill of *arrack*. It was formerly regarded as a specific in hydrophobia.

PULVIS COMITIS WARWICENSIS, P. *Cornachini*—p. *Comitissæ*, *Cinchona*.

PULVIS CONTRAYERVÆ COMPOSITUS, P. *cardiacus* seu *alexiterius* seu *Muntadnus*, *Lapis contrayervæ*, *Contrayerva balls*, *Compound Powder of Contrayerva*. (*Contrayerv. contrit.* ℥v, *test. præp.* lbiss. Mix. *Ph. L.*) Stimulant and sudorific. Dose, gr. xv to ℥ss.

PULVIS CORNACHINI, P. *Or'ydi Stib'ii* com-

pos'itns seu Com'itis Warwicen'sis seu de Tribus seu Scammonii antimoniatis, Diacetylates seu Paracelsi, Earl of Warwick's Powder, Cerberus Triepa, (F.) Poudre Coruaehine. (Scammon., potass. supertart., antim. diaph. aa p. æ. f. pulvis, Ph. P.) Cathartic. Used chiefly in cutaneous diseases. Dose, ʒss to ʒj.

PULVIS CORNU USTI CUM OPIO, P. opiat'ns, Powder of Burnt Hartshorn with opium, (F.) Poudre de corne brûlée avec l'opium. (Opii duri cont. ʒj. corn. ust. præp. ʒi. coccor. cont. ʒi. Mix. Ph. L.) Ten grains contain one of opium. Anodyne.

PULVIS CRETACEUS, P. cretæ compositus.

PULVIS CRETÆ COMPOSITUS, P. Carbonatis Cretæ compositus seu cretæ creta seu antac'idus seu terres'tris, Spec'ies e Scord'io sine opio, S. Diacret'ia, Compound Powder of Chalk, Dioscordium: (with Bole Armeniac in place of chalk—the Pulvis e Bolo compositus sine opio;) (F.) Poudre de cretæ compositæ. (Cretæ ppt. lss, cinnum. ʒiv, tormentill., acaciæ, sing. ʒiij, pip. long. ʒiv. Reduce separately to a fine powder, and mix. Ph. L.) Antacid, stomachic, absorbent. Dose, gr. xx to ʒij.

PULVIS CRETÆ COMPOSITUS CUM OPIO, Compound Powder of Chalk with opium, P. e Cretâ compositus cum opio; (with Bole Armeniac instead of chalk — P. e Bolo compositus cum opio;) Species e Scordio cum opio, (F.) Poudre de cretæ compositæ avec l'opium. (Pulv. cret. c. ʒvjs, opii duri cont. ʒiv. Mix. Ph. L.) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ʒj to ʒij.

PULVIS DIAPHORETICUS, P. ipeacuanhæ comp. — p. Diapnoicus, P. ipeacuanhæ comp. — p. Diaromat, P. cinnamomi compositus — p. Diasenæ, P. sennæ compos. — p. Diaturpethi compositus, P. jalapæ compositus.

PULVIS DUCIS PORTLANDIÆ, Duke of Portland's Gout Powder, (F.) Poudre du Duc de Portland ou de la Mirandole. (Rad. aristoloch., gentianæ, summit. chamædr., centaur. min. aa p. æ.) Dose, ʒss to ʒj.

PULVIS EMMENAGOGUS, P. myrrhæ compositus — p. Epilepticus Marchionum, P. de magnesiâ compositus — p. Errhinus, P. asari compositus — p. Galactopæus, P. de magnesiâ compos.

PULVIS E GUMMI GUTTA, P. Cambogiæ compositus seu hydrugo'gna, Camboge Powder, (F.) Poudre hydragogue ou de gomme gutte ou de Quercetanus. (Rad. jalap. 24 p., rad. mechoacan. 12 p., cinnum., rhei. aa 8 p., gum. cambog. 3 p., fol. soldanellæ sic. 6 p., semin. anisi 12 p., fiat pulvis. Ph. P.) A drastic cathartic. In anasarea and in worms. Dose, gr. xv to xxx.

PULVIS GEMMOSIS ALKALI'US, Sapo vegetabilis, (F.) Poudre de savon végétal. (Guaiac. pulv. 32 p., potass. carb. 4 p. Make into a powder. Ph. P.) Antacid.

PULVIS EX HELMINTHOCORT'O COMPOSITUS, P. vermifugus absque mercurio, (F.) Poudre vermifuge sans mercure. (Fuc. helminthocort., sem. contra., summitat. absinth., tonaceti, fol. scordii, sennæ, rhei. aa p. æ, fiat pulvis. Ph. P.) Dose, ʒj to ʒj.

PULVIS HYDRAGOGES, P. e gummi guttâ — p. Hydrargyri cinereus, see Hydrargyri oxydum cinereum — p. Hypnoticus, Hydrargyri sulphuretum nigrum — p. Imperatoris, P. cinnamomi compositus — p. Incisivus, P. de sulphure et scillâ — p. Pro infantibus, P. de magnesiâ compos — p. Infantum, P. de magnesiâ compos. — p. Infantum antacidus, P. de magnesiâ compositus.

PULVIS IPEACUANHÆ COMPOSITUS, P. alexiterius seu mol'ynus seu diaphoret'icus seu diaphoret'icus seu sudorificus Doveri seu Ipeacuanhæ et Opii (Ph. U. S.) Compound Powder of Ipeacuanha, Dover's Powder, (F.) Poudre de Dover ou

d'ipeacuanha et d'opium ou de Dover. (Ipeacuanh. pulv., opii pulv., sing ʒj, potassæ sulphat. ʒj. Mix. Diaphoretic. Dose, gr. v to gr. xij.

PULVIS IPEACUANHÆ ET OPII, P. ipeacuanhæ compositus.

PULVIS JALAP'Æ COMPOSITUS, P. Diatrupethi compositus seu laxans seu purgans seu laxativus vegetabilis seu laxans cum sale seu Jalap'æ salinus seu Jalap'æ tartar'icus, Species Diujalapæ, Compound Powder of Jalap, (F.) Poudre de jalap compositæ. (Pulv. jalap. ʒj, potassæ bitart. ʒij. Mix.) Cathartic. Dose, ʒj to ʒij.

PULVIS JALAPÆ SALINUS, P. jalapæ compositus — p. Jalapæ tartaricus, P. jalapæ compositus — p. de Jalapâ et scammonio compositus, P. scammonæ comp. — p. Jamesii, Antimonial powder — p. Jesuiticus, Cinchona — p. Joannis de Vigo, Hydrargyri nitrico-oxydum.

PULVIS KINO COMPOSITUS, Compound Powder of kino, (F.) Poudre de kino compositæ, (Kino ʒxx, cinnum. ʒiv, opii duri ʒj. Rub each to powder, and mix. Ph. L.) Astringent. Dose, gr. v to xx.

PULVIS LAXANS, P. jalapæ compositus — p. Laxans eum sale, P. jalapæ compositus — p. Laxativus vegetabilis, P. jalapæ compositus.

PULVIS DE MAGNESIÂ COMPOSITUS, P. Galactopæus seu Nutri'cum seu Infantum seu Infantum antac'idus seu pro Infantibus seu antac'idus seu obsorbens seu epilepticus Marchionum, Compound Powder of Magnes'ia, (F.) Poudre absorbente et anti-acide. (Magnesiæ, sacchar. aa p. æ. Mix. Ph. P.)

PULVIS MANTUANUS, P. conyatrervæ comp. — p. Marchionis, Marchionis Pulvis — p. Mercurialis cinereus, Hydrargyri oxydum cinereum — p. ad Mueum pulmonalem liberius ciendum, P. de sulphure et scillâ.

PULVIS MYRRHÆ COMPOSITUS, P. e Myrrhâ compositus seu ad n'cerra tend'innu seu emmenagogus, Compound Myrrh Powder, (F.) Poudre Balsamique. (Myrrhæ, sabinæ, rutæ, castor. Russ. aa ʒi.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.

PULVIS NUTRICUM, P. de magnesiâ compositus — p. Opiatus, P. cernu uesti eum opio — p. Oxydi stibii compositus, P. cornehini — p. ad Partum, Ergot — p. Parturiens, Ergot — p. de Phosphate calcis et stibii compositus, Antimonial powder — p. Principis, Hydrargyri nitrico-oxydum — p. Purgans, P. jalapæ compositus — p. Quercetanus, Hydrargyri submarias.

PULVIS QUERCUS MARI'NÆ, Powder of Yellow Bladder-Wrack. (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible with a perforated lid, and then reduced to powder. Ph. D.) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl. See Fucus vesiculosus.

PULVIS RHEI COMPOSITUS, Compound Powder of Rhubarb. (Magnes. l'ij, zingib. pulv. ʒij, rhei pulv. ʒiv. M. Ph. E.) An antacid and laxative. Dose, ʒj to ʒij.

PULVIS SALINUS COMPOSITUS, Compound Saline Powder. (Natrii chlorid., magnesiæ sulphat., aa ʒv, potass. sulphat. ʒij. Ph. E.) Dose, as an aperient, two or three drachms dissolved in water.

PULVIS SCAMMONIÆ COMPOSITUS, P. e Scammonio compositus seu Scammonii seu de Jalapâ et Scammonio compositus dictus Catharticus, Compound Powder of Scammony, (F.) Poudre cathartique ou Poudre de Scammonée compositæ. (Scammon., ext. jalap. dur., sing., ʒij, zingib. ʒss. Rub separately to powder, and mix. Ph. L.) Cathartic. Dose, gr. viij to gr. xv.

PULVIS SCAMMONII CUM ALOË, P. e Scammonio cum Aloë, Scammony and Aloes Powder. (Scammon. ʒij, ext. jalap. dur., aloës Socotr. aa ʒiiss, zing. ʒss.) Cathartic. Dose, gr. x to xv.

PULVIS SCAMMONII ANTIMONIALIS, *P. cornachini*.

PULVIS SENNÆ COMPOSITUS, *P. e Sennâ compositus* seu *e Senâ compositus* seu *Diascœnæ*, *Compound Powder of Senna*, (F.) *Poudre de senné composée*. (*Sennæ*, *potass. superpart.*, sing., $\overline{3}$ ij, *scammon.* $\overline{3}$ ss, *zingib.* $\overline{3}$ ij. *Ph. L.*) Cathartic, hydragogue. Dose, $\overline{3}$ j to $\overline{3}$ j.

PULVIS DE SENNÂ, SCAMMONIÆ ET LIGNIS COMPOSITUS *dictus ANTIARTHRITICUS PURGANS*, (F.) *Poudre de Pérard*. (*Gum Arab.*, *potass. superpart.*, *fol. sennæ*, *china*, \overline{a} 4 p., *scammon.*, *rad. sarsapar.*, *china*, *guaiac. lign.* \overline{a} 2 p., *fiat pulvis*. *Ph. P.*) Purgative. Used to obviate gout. Dose, $\overline{3}$ j.

PULVIS STANNI, see Tin—p. Sternutatorius, *P. asari compositus*—p. Stibitatus, Antimonial powder—p. Stypticus, *P. Sulphatis aluminæ compositus*—p. Sudorificus, *P. ipecacuanhæ comp.*—p. Sudorificus Doveri, *P. ipecacuanhæ compositus*.

PULVIS SULPHATIS ALUMINÆ COMPOSITUS, *P. aluminosus* seu *aluminis kinosatus* seu *styp-ticus* seu *aluminis compositus*, *Alu'men kinosatum*, *Compound Alum Powder*, (F.) *Poudre styptique* ou *d'alum composée*. (*Sulphatis aluminæ*, p. iv, *kino*, p. i. *Ph. E.*) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

PULVIS DE SULPHURE ET SCILLÂ, *P. antiasthmaticus* seu *incisivus* seu *ad mœnum pulmonalem liberins cien'dum*, (F.) *Poudre incisive* ou *anti-asthmaticque*. (*Sacchar.*, p. 3, *sulphur.* lot. p. 2, *scillæ.* siccat. p. j. *Ph. P.*) Dose, gr. v to $\overline{3}$ ss.

PULVIS DE SULPHATË POTASSÆ COMPOSITUS, *P. temperans* *Stahl'ii*, (F.) *Poudre tempérante* de *Stahl*. (*Potass. sulph.*, *P. nitrat.* \overline{a} 9 p., *hydrarg. sulph. rubr.* 2 p. *Mix. Ph. P.*) As an antiphlogistic, and in acidity of the first passages. Dose, $\overline{3}$ j to $\overline{3}$ ij.

PULVIS E SULPHURE TO HYDRARGYRI NIGRO ET SCAMMONIO, *dictus VERMIFUGUS MERCURIALIS*, (F.) *Poudre vermifuge mercurielle*. (*Pulv. cornachin.*, *hydrarg. sulphuret. nigr.* recent. præp., \overline{a} 4 p. æ. *Mix. Ph. P.*) Dose, $\overline{3}$ j to $\overline{3}$ ss.

PULVIS SYMPHATICUS, Sympathetic powder—p. *Temperans Stahl'ii*, *P. de sulphate potassæ compositus*—p. *Terrestris*, *P. cretæ compositus*.

PULVIS TRAGACANTHÆ COMPOSITUS, *P. e Tragacanthâ compositus*, *Species Diatragacanthæ frig'idæ*, *Compound Powder of Tragacanth*, (F.) *Poudre de gomme adragant composée*. (*Tragacanth. contus.*, *acaciæ cont.*, *amyli*, sing., $\overline{3}$ iss, *sacch. purif.* $\overline{3}$ ij. *Ph. L.*) Demulcent. In coughs, &c. Dose, $\overline{3}$ ss to $\overline{3}$ ij.

PULVIS DE TRIBUS, *P. cornachini*—p. *Tonquinnensis*, *P. Cobbii*—p. *ad Ulcera tendinum*, *P. myrrhæ compositus*—p. *Vermifugus absque mercurio*, *Pulvis ex helminthocorto comp.*—p. *Vermifugus mercurialis*, *P. e sulphureto hydrargyri nigro et scammonio*—p. *Vitæ Imperatoris*, *P. cinnamomi compositus*.

PUMEX, *Lapis pumicis*, *Pumice*, (F.) *Pierre Ponce*. This was formerly employed as a desiccative and dentifrice.

PUMICE, *Pumex*.

PUMILIO, *Nanus*.

PUMILUS, see *Nanus*.

PUMMEL-FOOT, *Kyllosis*.

PUMP, BREAST, *Antia lactea*—p. *Stomach*, *Stomach pump*.

PUMPKIN, *Cucurbita pepo*.

PUNA, (S.) *Veta*, *Sorocco*, *Soroche*, *Mareo*; *Hypson'osis*, *Mountain Sickness*, (F.) *Mal de Montagne*. A sickness common in the elevated districts of South America and elsewhere, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles sea-

sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration greatly.

PUNATSE, *Cimex*.

PUNATISIE, *Ozæna*.

PUNCH, *Rhi'zagra*, from *pungere*, *punctum*, 'to prick.' *Repulsor'ium*, (F.) *Repoussoir*. A surgical instrument used for extracting the stumps of teeth. See *Lever*.

Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon juice, and water. Milk is sometimes substituted in part for the water: it then forms *Milk Punch*.

PUNCTA OSSIFICATIONIS, Ossification, points of.

PUNCTÆ MUCOSÆ, see *Acne*.

PUNCTICULA, *Petechiæ*.

PUNCTIO, *Paracentesis*, *Puncture*—p. *Nervi*, *Neuronygme*.

PUNCTUM, *Stitch*.

PUNCTUM AUREUM, *Punctu'ra aurea*. Formerly, when an intestinal hernia was reduced by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis. Hence the term.

PUNCTUM CÆCUM, see *Optic nerve*—p. *Lachrymale*, *Lachrymal punctum*.

PUNCTUM SALIENS, *P. sanguin'um saliens*, *Glob'ulus sanguin'eus*, *Punctus ruber saliens*. The first moving point which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, *Paracentesis*—p. *Aurea*, *Punctum aureum*.

PUNCTURE, *Punctu'ra*, *Punctio*, *Cente'sis*, *Paracente'sis*, *Nyxis*, from *pungere*, *punctum*, 'to prick;' *Tresis Punctura*, (F.) *Piqure*. A wound made by a pointed instrument, as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCTURING. Same etymon. *Compunctio*, *Paracente'sis*. (F.) *Ponction*. The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity, with the view of evacuating any fluid, effused or accumulated therein. *Paracentesis* is a sort of puncturing.

PUNCTUS RUBER SALIENS, *Punctum saliens*.

PUNGENT, (F.) *Pongitif*. Same etymon. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PUNICA GRANATUM. The *Pomegranate*, *Rhoa*, *Rhœa*, *Granatum*, *Malogranatum*, (F.) *Grenadier*: *Ord. Myrtacæ*. *Sex. Syst. Icosandria Monogynia*. The rind of the fruit, called *Matico'rium*, *Malacorium*, *Malicorium*, *Granati Fructus Cortex* (Ph. U. S.); and the flowers—called *Balaustine flowers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes*, *κοκκωνες*. The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Granati Radicis Cortex* (Ph. U. S.), which appears to be very efficacious in tænia. It is given in decoction, (*Granat. rad. cort.* $\overline{3}$ ij; *Aquæ Oij.* boiled to Oiss.) Dose, f $\overline{3}$ ij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin*.

PUNK. *Boletus igniarius*.

PUOGENIA, *Pyogenia*.

PUPIL, *Pupilla*, *Pupula*, *Pupill'io*, *Vis'io*,

Opsis, Corē, Cora, Rhox, Fenes'tra seu Nigrum seu For'a'meu Oculi, Prunel'la, Lunnen, Glenē, Sight or Apple or Ball of the eye, (Sc.) Blak of the Eie, (Prov.) Camlle, (F.) P'pille, Prunelle. The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

PUPIL. CLOSURE OF THE, Synechisis.

PUPIL. PINHOLE. A condition of the pupil in typhus, in which it is so contracted as to resemble a pinhole. It indicates a dangerous form of brain affection.

PUPILLE VELUM, Pupillary membrane.

PUPILLARIS HERBA, Lapsana.

PUPILLARY, *Pupilla'ris, (F.) Pupillaire.* That which belongs to the pupil.

PUPILLARY MEMBRANE, *Membra'na Pupillo'ris, Pupill'æ velum, Membra'na Wachendorffiana.* The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, *Veratrum viride.*

PUPPIS OS, Frontal bone.

PUPULA, Pupil.

PUPULÆ, *A'pices digito'rum.* The pulps or extremities of the fingers.

PURBLIND, Myopic.

PURBLINDNESS, Myopia.

PURGAMENT, Purgative.

PURGAMENTA, Excrement — p. Alba, Leucorrhœa — p. Infantis, Meconium — p. Puerperii, Lochia — p. Uteri, Lochia.

PURGANS MEDICAMENTUM, Cathartic.

PURGATIO, Catharsis — p. Alvi, Catharsis — p. Muliebris alba, Leucorrhœa — p. Puerperii, Lochia.

PURGATION, Catharsis.

PURGATIONES, Menses — p. Menstruæ, Menses.

PURGATIONS, Menses.

PURGATIVE, *Purgati'vus, Purgans, Moch'licus, Catore'licus, Catoter'icus, Cathar'tic, Pur'gament, Purgē, (F.) Purgatif, from purgare, purgatum, 'to cleanse.'* A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular, and exciting increased secretion from the mucous coat.

PURGE, Purgative — p. Root, Euphorbia corollata.

PURGING, Diarrhœa.

PURIFICANS, *Purif'icns, from purificare, 'to make pure or clean.'* Purifying; hence:—

PURIFICANTIA, Medicines that cleanse or purify the blood.

PURIFICUS, Purificans.

PURIFORM, *Puriform'is, from pus, puris, and forma.* Having the appearance of pus.

PURL. A medicated malt liquor, in which wormwood and aromatics are infused.

PURO-HEPATITIS, see Hepatitis.

PURO-MUCOUS, *Puro-muco'sus, from pus, puris, and mucus.* Having the character or appearance of pus and mucus.

PURPLE OF CASSIUS, (F.) *Pourpre de Cassius.* A precipitate, obtained by adding the protochloride of tin to a dilute solution of gold; or by dipping rods of tin in a solution of gold in diluted chlorohydric acid. Used in syphilis.

PURPLES, Purpura hæmorrhagica.

PURPURA, *Por'phyra, 'a purple colour.'* This word has been employed in many senses.

It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs. — (F.) *Pourpre.*

In PURPURA SIMPLEX, *Porph'yra simplex, Petechiæ sine febrē, Pelio'sis, Phœni'gmus Petechi'alis, Profusio subcutanea, Petechial Scurvy,* the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance. At times, the affection is accompanied by severe pains in the extremities, constituting *Pelio'sis rheumat'ica.*

In PURPURA HÆMORRHAG'ICA, *Porph'yra hæmorrhag'ica, Stomac'ace universa'lis, Hæmorrhagia universa'lis, Petechiano'sis, Morbus maculo'sus hæmorrhag'icus Werthof'ii, Pelio'sis hæmorrhag'ica, Scorbutus, Schorbutus, Hæmorrhœa petechi'alis, Hæmatosp'ilia, Land Scurvy, Purples, (F.) Scorbut, S. de Terre, Maladie de Werthof, Hæmaclinose, Péliese hæmorrhagique* — the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In PURPURA NAU'TICA, *Porph'yra nautica, Scorbutus, Pechytyrbē, Gingibra'cium, Gingipe'dium, Scelotyrbē, Stomac'acē, Scorbutus nauticus, Sea scurvy, (Sc.) Scrabie, (F.) Scorbut,* there are spots of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura considerably resemble each other. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbutic Cachex'ia, Lues Scorbutica, and Cæochym'ia Scorbutica.* Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with cinchona or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurvy.

PURPURA, Scarlatina — p. Alba benigna et maligna, Miliary fever — p. Maligna, Petechiæ — p. Miliaris, Miliary fever — p. Puerperarum, Miliary fever — p. Urticata, Urticaria.

PURPURIC URINE, see Porphyria.

PURPURINE, see Porphyria.

PURPURISSUM, Hydrargyri sulphuretum rubrum.

PURRING TREMOR, *Frémissement cataire.*

PURSE, Scrotum — p. Shepherd's, Thlaspi bursa.

PUR'SINESS, *Dyspnœ'a pinguedinosa, (F.) Pousse.* Dyspnœa accompanied with oppressive fatness. The word is, also, applied to dyspnœa of every kind. One so affected is said to be *purky,* or *short-winded,* (Prov.) *Short-of-puff, Thick-listed, (F.) Pousseif.*

PURSLAIN, Purslane.

PURSLANE, Portulaca — p. Milk, Euphorbia corollata and E. maculata — p. Speedwell, Ve-

ronica peregrina — p. Water, *Ludwigia palustris*, *Veronica beccabunga*.

PURSY, see Pursiness.

PURULENCE, Pus, Suppuration.

PURULENCY, Pus, Suppuration.

PURULENT, *Purulentus*, *Em'pyos*, *Pyo'des*, *Py'teus*, from *pus*, *puris*. That which has the character of pus or consists of pus; as *purulent matter*, a *purulent collection*, &c.

PURULENT DEPOSIT, Pus.

PURULENTIA, Suppuration.

PURVAIN, *Verbena officinalis*.

PUS, *Hamor purulentus*, *Pyon*, *Pyono'ma*, *Matter*, *Purulent deposit*, *Purulence*, *Purulency*, (Sc.) *Worsum*, *Worsum*. A secretion from inflamed textures, and especially from the areolar membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality, — *laudable pus*, *Pus bonum* seu *laudabile* seu *nutritivum* seu *verum*, (F.) *Pus louable*, — is of a yellowish-white colour, opaque, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus corpuscles* or *pus globules*, *Cyloid corpuscles*, (Heule) — and a colourless, aqueous fluid, *liquor puris*, in which the corpuscles are suspended. A variety of the pus corpuscles is described by M. Lebert under the name *pyoid*. Fully formed pus is aplastic.

PUS BOXUM, see Pus — p. Corpuseles, see Pus — p. Corrosivum, Sanies — p. Globules, see Pus — p. Laudable, see Pus — p. *Louable*, see Pus — p. Malignum, Ichor — p. Malignum, Sanies — p. Nutritivum, see Pus — p. Verum, see Pus.

PUSH, Pustule.

PUSILLA'TUM, *Pusilla'tum*, from *pusillus*, 'small' [?]. A coarse powder.

PUSILLUS, Nanus.

PUSKILE, Pustule.

PUSTULA, Pustule — p. Ardens, Eczema — p. Oris, Aphthæ — p. Gangrænosa, see Anthrax — p. Livida Esthoniae, see Anthrax.

PUSTULE Siccæ, Lichen.

PUSTULAR, *Pustulosus*, *Pustularis*, *Pustulo'sus*, (F.) *Pustulenz*. Of or belonging to pustules. Affected with pustules.

PUSTULA'TION, *Pustula'tio*, from *pustula*, 'a pustule.' The formation of pustules.

PUSTULE, *Puskile*, *Push*, *Pus'tula*, from *pus*, *Ecpye'sis*, *Ecthy'ma*, *Benath*, *Bubô*, *Epanas'tasis*. An elevation of the cuticle, with an inflamed base, containing pus. Willan and Bateman reckon four varieties of pustules, *Phlyza'cinum*, *Psydra'cinum*, *Achor*, and *Favus*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

PUSTULE MALIGNÉ, see Anthrax.

PUSTULOUS, Pustular.

PUSULATUM, Pusillatum,

PUT TO BED, Deliver.

PUTAMEN OVI, see Membrana putaminis.

PUTIUM, Prepuce.

PUTREDO, Hospital Gangrene, Putrefaction.

PUTREFAC'TION, *Putrefac'tio*, *Putrescen'tia*, *Sepsis*, *Sup'rotas*, *Sé'pedon*, *Putrid* or *Putrefac'tive fermentation*, from *putris*, *putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life, and placed under special circumstances. The presence of water is indispensable, the temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are, water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized, and has an

infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typhohæ'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefaction* signifies the state of becoming putrid: whilst *Putridity*, *Putre'do*, *Putrid'itas*, *Put'ridness*, (F.) *Pourriture*, is the state of rottenness.

PUTRESCENT, Hyposaprus — p. Poison, see Poison.

PUTRESCENTIA, Putrefaction — p. Uteri gravidi, Hystero-malacia.

PUTRID, *Putridus*, *Supros*, *Sepedono'des*, (F.) *Putride*, from *putreo*, 'to rot.' An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, see Putrefaction.

PUTRIDITY, see Putrefaction.

PUTRILA'GO, *Putror*, (F.) *Putrilage*. Same etymon. The putrescent matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTROR, Putrilage.

PUTZUCHILL, see Myroxylon Peruiferum.

PUXIRI, see Pichurim beans.

PYÆMIA, Pyohæmia.

PYAR'THRUM, from *πυον*, 'pus,' and *αρθρον*, 'joint.' A suppurated joint.

PYCNAN'THEMUM INCA'NUM, (*πυχνος*, 'dense,' and *ανθεμον*, 'a blossom.') *Clinopodium inca'num*, *Common Mountain Mint*, *Wild Basil*. An indigenous plant of the mint family — *Orid*, *Labiatae* — which flowers in August. It has the aromatic properties of the mints.

PYCNAN'THEMUM LINIFOLIUM, *Virginia Thyme*, has like virtues.

PYCNIMASTICA, Incrassantia.

PYCNOSIS, Inspissatio.

PYCNOTICIA, Incrassantia.

PYEC'CHYSIS, from *πυον*, 'pus,' and *εκχυσις*, 'effusion.' An effusion of pus.

PYELITIS, (F.) *Pyélite*, from *πελος*, 'pelvis,' and *itis*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELOMETER, Pelvimeter.

PYELONEPHRITIS, from *πελος*, 'pelvis,' *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the kidney, and of the pelvis and calices.

PYELOS, Pelvis.

PYEMESIS, Pyoemesis.

PYESIS, Suppuration.

PYETIA, Colostrum, Rennet.

PYGE, Nates.

PYGMÆUS, Pygmy.

PYGMÆ, Fist, Forearm.

PYGMÆE, Pygmy.

PYGMY, *Pigmy*, *Pygmæ'us*, (F.) *Pygmée*, from *πυγμα*, 'the fist; as big as the fist.' A dwarf. The Pygmæi were a fabulous nation of dwarfs in the extreme parts of India; or, according to others, in Ethiopia.

PYGODID'YMIUS, *Did'yimus æmphyoperina'us*, *Pygop'ages*, from *πυγη*, 'the nates,' and *ιδίουμος*, 'a twin.' A monstrosity, in which twins are united by the sacrum and coccyx.

PYGOM'ELES, (F.) *Pygouïde*, from *πυγη*, 'the nates,' and *μελιος*, 'unprofitable.' A monster with excessive growth on the nates or rump.

PYGOPAGES, Pygodidymus.

PYICUS, Purulent.

PYLE, Porta.

PYLEMPHRAX'IS, from *πυλη*, 'porta,' 'a gate,' and *εμφραξις*, 'obstruction.' Obstruction of the vena porta.

PYLEPHLEBITIS, from *πυλη*, 'porta,' *φλεβή*,

φλεβός, 'a vein,' and *itis*, denoting inflammation. Inflammation of the vena porta.

PYLOR'IC, *Pylor'icus*, (F.) *Pylorique*. Same etymon as pylorus. That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY, *Arte'ria Coronaria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploica dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLORIQUE, *Pyloric*.

PYLOR'US, *Jun'itor*, *Portona'rium*, from *πύλη*, 'a gate,' and *ὄπος*, 'a guardian.' *Ostium ventriculi duodena'le seu pylor'icium seu dextrum seu inferius*, *Orific'ium dextrum seu inferius seu Egre'ssus seu Orific'ium seu An'nulus seu Sphincter ventriculi*, *Ostia'rium*, *Hostia'rium*, (F.) *Pyloré*. The lower or right orifice of the stomach—*Orifice intestinal* (Ch.)—is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Vulve of the Pylorus*, *Sphincter Pylori*, *Pylorus propriè sic dictus*, (F.) *Vulve du pyloré*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYO, in composition, means 'pus,' from *πύον*, 'pus.'

PYOBLENNICUS, *Mucopurulent*.

PYOBLENNORRHŒA, from *pyo*, and *βλένω*, 'mucus,' and *ῥεω*, 'I flow.' A discharge of puriform mucus.

PYOCENO'SIS, from *pyo*, and *κένωσις*, 'evacuation.' Evacuation of pus.

PYOCHEZ'IA, *Diarrhœa purulenta*, from *pyo*, and *χέω*, 'I go to stool.' Discharge of pus by stool. *Parulent diarrhœa*.

PYOCŒ'LIA, *Ascites purulentus*, from *pyo*, and *κοιλία*, 'the belly.' Pus in the abdominal cavity.

PYOCYSTIS, *Vomica*.

PYODES, *Purulent*.

PYEDE'MA, from *pyo*, and *οίδημα*, 'swelling.' Tuffeaction of the surface owing to effusion of pus.

PYOE'MESIS, *Pyem'esis*, *Vom'itus purulentus*, from *pyo*, and *εμεΐς*, 'the act of vomiting.' Vomiting of pus.

PYOGENESIS, *Pyogenia*.

PYOGEN'IA, *Pyogen'ia*, *Pyogen'esis*, *Pyopoë'sis*, from *pyo*, and *γενέσις*, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. It seems to be owing to a degeneration of the liquor sanguinis and exudation corpuscles.

PYOGENIA CORROSIVA, *Ulceration*—p. Simplex, *Suppuration*.

PYOGEN'IC, *Pyogen'icus*. Same etymon. Having relation to the formation of pus.

PYOHŒ'MIA, *Pyœ'mia*, (F.) *Pyohémie*, from *pyo*, and *αἷμα*, 'blood.' Alteration of the blood by pus, giving occasion to the *Diath'esis seu Infectio purulenta*.

PYOID CORPUSCLES or **GLOBULES**, see *Pus*.

PYOMETRA, *P. purulenta*, from *pyo*, and *μήτρα*, 'womb.' A collection of pus in the uterus.

PYOMETRA PURULENTA, *Pyometra*.

PYON, *Pus*.

PYONŒPHRITE, see *Nephritis*.

PYONOMA, *Pus*.

PYOÖTORRHŒA, *Otiorrhœa*.

PYOPERICAR'DIA, *Pyopericardium*, from *pyo*, *περί*, 'about,' and *καρδία*, 'the heart.' A collection of pus in the pericardium.

PYOPHTHALMIA, *Hypopyon*—p. Neonatorum, see *Ophthalmia (purulenta infantum)*.

PYOPLEURITE, *Empyema*.

PYOÏSIS, *Pyogenia*.

PYOP'TYSIS, from *pyo*, and *πύω*, 'I spit.' Spitting of pus.

PYORRHAG'IA, from *pyo*, and *ρᾶγη*, 'violent rupture.' A sudden discharge of a large collection of matter.

PYORRHŒA, from *pyo*, and *ῥεω*, 'I flow.' A discharge of pus.

PYORRHŒA ALVINA, *Pyochezia*—p. *Aurium*, *Otiorrhœa*—p. *Nasalis*, *Ὄζαα*—p. *Palpebræ*, *Blepharopyorrhœa*—p. *Urinalis*, *Pyuria*—p. *Vi-arum lacrymalium*, *Daeryopyorrhœa*.

PYOSIS, *Hypopyon*, *Pterygion*, *Suppuration*—p. *Pectoris*, *Empyema*.

PYOTHORAX VERUS, *Empyema*.

PYOTORRHŒE, *Otiorrhœa*.

PYOTURIA, *Pyuria*.

PYR, *Fever*.

PYRA, *Anthrax*—p. *Crustumina*, *Crustuminatum*—p. *Crustumerina*, *Crustuminatum*.

PYR'AMID, *Pyram'is*, *πυραμῖς*, *πυραμίδος*, *Eminentia pyramidalis tympani*, from *πύω*, 'flame,' which has a conical appearance [?]. A small bony projection in the cavity of the tympanum, which is excavated, to lodge the muscles of the stapes. The *Centre-pin* of the trephine. A small, obtusely pointed eminence of the inferior vermiform process of the cerebellum.

PYRAMID, see *Calumba*—p. of *Malacarne*. Vermiform process, inferior.

PYRAMIDAL DE L'ABDOMEN, *Pyramidalis abdominis*—p. de *la Cuisse*, *Pyramidalis*—p. *du Nez*, *Pyramidalis nasi*—p. *Stapédien*, *Stapedius*.

PYRAMIDALE, (OS.) *Cuneiform*, (bone.)

PYRAMIDALIS ABDOMINIS, *Musculus Fallopii seu succenturiatus seu anciliaris*, (F.) *Pubio-ombilical*, *Pubio-sous-umbilical* (Ch.), *Pyramidal de l'abdomen*. A small, fleshy, pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts, it stretches the linea alba.

PYRAMIDALIS P. Femoris, *Il'i'acis exte'rnus*, *Pyrisform'is*, *Piriformis*, *Primus et superior quadrigem'us*, (F.) *Sacro-trochantérien* (Ch.), *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

PYRAMIDALIS FEMORIS, *Pyramidalis*.

PYRAMIDALIS NASI, *Proc'erus nasi*, *Nasum dilatans*, (F.) *Fronto-nasal* (Ch.), *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates, becoming confounded with the *transversalis*. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

PYRAMIDES, *Corpora pyramidalia*.

PYRAMIDES ANTÉRIEURES, *Corpora pyramidalia*—p. *Ferrei*, *Ferrein*, *pyramids of*

—p. Malpighianæ, Papillæ of the kidney—p. *Postérieures du cerveau*, Corpora testiformia.

PYRAMIDS OF MALPIGHI, Papillæ of the kidney—p. of Ferrein, see Ferrein—p. Posterior, Corpora testiformia—p. of Wistar, Sphenoidal cornua.

PYRAMIS, Penis, Pyramid—p. Cochleæ, Modiolus—p. Trigona, sec Temporal bone.

PYRCEA, Incendium.

PYRETCICA, 'febrile'; from πυρετος, 'fever,' and εχω, 'I have.' Fevers: the first order in the class *Hæmatica* of Good.

PYRÉLAINES, Olea empyreumatica.

PYRENOIDES, Odontoid.

PYRÊTHRE, Anthemis pyrethrum.

PYRETHRUM, Anthemis pyrethrum, Urtica—p. Parthenium, Matricaria parthenium—p. Sylvestre, Achillea ptarmica.

PYRETICO'SIS, from πυρ, 'fire,' πυρετος, 'fever,' *Morbus febrilis*. A febrile affection.

PYRETICUS, Febrifuge, Febrile.

PYRETOGENETIC, Stimulant.

PYRETOGRAPH'IA, from πυρετος, 'fever,' and γραφη, 'a description.' A description of fever.

PYRETOL'OGY, *Pyretolog'ia*, from πυρετος, 'fever,' and λογος, 'a discourse.' *Pyrol'ogy*. A treatise on fevers. A title sometimes given to a monograph on fever.

PYRETOS, Fever.

PYRETOTYPOSIS, Intermittent.

PYREX'IA, *Pyrex'is*, πυρεξις, (πυρ, 'fire.') Fever. The febrile condition. Also, a paroxysm of fever—*Paroxysmus febrilis*.

PYREX'IE, *Febrile diseases*. The first class of Cullen's Nosology.

PYRI MARTIALES, Ferrum tartarizatum.

PYRIA, Fomentation, Vaporarium.

PYRIATERIUM, Vaporarium.

PYRICAUSTUM, Burn.

PYRIFORMIS, Pyramidalis.

PYRIPH'LEGES, πυριφλεγος, *Pyriphlectos*, πυριφλεκτος, from πυρ, 'fire,' and φλεγω, 'I burn.' One who has a burning fever.

PYRITES, IRON, Ferri sulphuretum.

PYRMONT, MINERAL WATERS OF. A celebrated mineral spring on the Weser, in Westphalia, four leagues from Hamlet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous [?] principles. It is a highly carbonated chalybeate.

ARTIFIC'IAL PYRMONT WATER may be formed of *Epsom salt*, gr. xv; *common salt*, gr. v; *magnesia*, gr. x; *iron filings*, gr. v; *water*, Oij. Impregnated with the gas from *marble-powder* and *sulphuric acid*, añ ʒvij.

PYRGENUS, Spiritus rectificatus.

PYR'OLA, *P. rotundifolia*, *Round-leaved Pyrola* or *Wintergreen*; *Shin leaf*. Ord. Ericaceæ. Diminutive of *Pyrus*, a pear tree, from a fancied resemblance of the foliage. This plant was once used as a gentle astringent and tonic.

PYR'OLA MACULA'TA, *Chinaph'ila Macula'ta*, *Spotted Pipsis'sewa*, *Spotted Wintergreen*, *Whiteleaf*, *White Pipsis'sewa*, *King cure*, *Ground holly*, *Rheumatism weed*, &c., has similar properties.

PYROLA, ROUNDLEAVED, *Pyrola*.

PYROLA UMBELLA'TA, *Chinaph'ila* seu *Chinoph'ila umbella'ta*, *C. Corymb'osa*, *Ground-holly*, *Pipsis'sewa*, *Wintergreen*, *Rheumatism weed*, *Prince's pine*, *Herbe a pisser* (Canada). This common American plant is allied to the uva ursi, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed by adding sugar,

ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsis'sewa Beer* it has been used in scrofulous affections.

PYROLEUM OSSIIUM RECTIFICATUM, Oleum animale Dippelii.

PYROLIG'NEOUS ACID, *Ac'idum pyroaceticum* seu *pyrolig'neum* seu *pyroliqu'o'sum* seu *pyroxyll'icium* seu *liqui pyro-oleo'sum* seu *aceticum empyreumaticum* seu *lig'neum* seu *liquo'rum empyreumaticum*, *Pyrolig'nic acid*, (F.) *Acide pyroacétique* ou *pyrolignique* ou *pyroligneux*, *Vinaigre de bois*. An acid, obtained by distillation from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum distillatum*, *Acetic acid of commerce*, *Ac'idum aceticum e Ligno venal'e*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed creasote is indicated.—The dose of the impure pyroligneous acid internally is from five to thirty drops, three or four times a day.

PYROMA'NIA, *Incen'diary monoma'nia*, from πυρ, 'fire,' and mania. Insanity, with an irresistible desire to destroy by fire.

PYROPH'AGUS, *Igni'vorus*, from πυρ, 'fire,' and φαγω, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

PYROS, Triticum.

PYROS'IS, from πυρ, 'fire,' 'the act of burning.' *Ptyalis'mus pyros'icus*, *Limo'sis cardial'gia sputato'ria*, *Ardor seu Ebullit'io stom'achi seu ventric'uli*, *Cardial'gia sputato'ria*, *Pyrosis Suce'lica*, *Apo-ceno'sis vom'itus pyrosis*, *Dyspep'sia pyrosis*, *Cnis-moreg'mia*, *Orex'is* (of some), *Soda*, *Waterbrash*, *Waterqualm*, *Waterpang*, *Black-water*, (F.) *Ardeur de l'estomac*, *Fer chaud*, *Cremason*, *Gorgosset*. This affection consists of a hot sensation in the stomach, with eructations of an acrid, burning liquid, that causes a distressing sensation in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

PYROSIS SUECICA, *Pyrosis*.

PYROSOPH'IA, *Chymistry*.

PYROTECHNIA, *Chymistry*.

PYROTECHNY, *Pyrotech'nê*, *Pyrotech'nia*, from πυρ, 'fire,' and τεχνη, 'art.' Art of making fire-works, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHONIDE, from πυρ, 'fire,' and θωνη, 'linen.' *Liquor pyro-oleo'sus e lin'teo para'tus*. A kind of pyrogenous or empyreumatic oil, produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown product is acid. Its medical properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cyananche tonsillar, but is not now employed.

It is said, also, to be a popular remedy for toothach and skin diseases. When prepared from rags, it is called *Rag oil*; when from paper, *Paper oil*, (F.) *Huile de Papier*.

PYROTICUS, *Caustic*.

PYROXYLIN, Gun cotton, see Collodion.

PYRUS AMERICANA, *Sorbus Americana*.

PYRUS CYDO'NIA, *Cydo'nia malifor'mis* seu *vulgar'is*, *Sorbus Cydo'nia*, *Cydo'nia*, *Coto'nia*,

Quince Tree, (F.) *Cognassier*, *Cognassier*. *Ord.* Rosaceæ. *Ser. Syst.* Icosandria Pentagynia. The fruit is termed *Cydo'nium malum*, *Malum canum* seu *coto'neum*, *Melum cydo'nium*, *Quince*, (F.) *Cogn.* Quince-seeds—*Cydo'nium* (Ph. U. S. 1851)—are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

PYRUS DOMESTICA, Sorbus domestica.

PYRUS MALUS, *Malus*, *M. dasycphylla* seu *communis* seu *sylvestris*, *Sorbus malus*, *Melea*, the *Apple Tree*, (F.) *Pommier*. The apple—(F.) *Pomme*—is an agreeable fruit when ripe. When unripe, it disagrees, especially with those of weak digestive powers. The same may be said of the *pear*, (F.) *Poire*; the fruit of *Pyrus communis*, *P. Sorbus* seu *Sativa*, *Pirus*, *A'pion*, (F.) *Poirier*.

Apple Brandy is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYETIA, Rennet.

PYTIA, Colostrum, Rennet.

PYTISMA. Sputum, Sperm.

PYUL'CON, *Pyl'conum*, from πύον, 'pus,' and 'ελαω, 'I extract.' (F.) *Tire-pus*. A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYURIA, *Pyuria*, *Pyorrhœa urinaria*, (F.) *Pyurie*, *Pissement de Pus*, from πύον, 'pus,' and ούρον, 'urine.' Discharge of purulent urine: a symptom which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder. It receives various epithets, according to the part where the pus proceeds:—as *Pyuria urethralis*, *P. renalis*, and *P. vesicalis*.

PYURIA CHYLOSA, Chyluria—p. Laetea, Chyluria—p. Mucosa, Cystirrhœa—p. Serosa, Cystirrhœa—p. Viscida, Cystirrhœa.

PYXIS, πύξις. A box; a pill-box. Also, an emollient ointment.—Aëtius, and Paulus.

PYXIS, Boîte, see Cotyloid.

Q.

Q., see Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUACK-MEDICINE, Arcanum.

QUACKSALVER, Charlatan.

QUADRANS, *Quarta pars libræ*. A quarter of a pound. Three ounces (Troy.)

QUADRA'TUS, (F.) *Carré*, from *quadrus*, 'square.' A name for muscles whose figure approaches a square. Depressor Labii inferioris, Quadratus femoris.

QUADRATUS DORSI, Q. lumborum.

QUADRA'TUS FEM'ORIS, *Quadratus*, *Quartus quadrigen'imus quadratus*, (F.) *Tuber-ischio-trochantérien* (Ch.), *Ischio-sons-trochantérien*, *Carré de la Cuisse*. A muscle situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, *Platysma myoides*—q. Rad. dii, Pronator radii quadratus.

QUADRATUS LUMBO'RUM, *Quadratus* seu *Lumbaris externus*, *Q. dorsi*, *Flectens par lumborum*, (F.) *Ilio-costal*, (Ch.) *Ilio-lombi-costal*, *Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the transverse processes of the last four lumbar vertebræ. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of respiration. It can also raise the hip.

QUADRIGA, Cataphracta.

QUADRIGEM'INA TUBER'CU'LA, *Eminen'tia Quadrigen'ina* seu *Bigem'ina*, *Optic Lobes*, *Optic Ganglia*, *Pons Syl'vii*, *Cor'pora quadrigen'ina* seu *bigem'ina*, *Nates* et *Testes*, (F.) *Tubercles quadrigen'aux* ou *bijumeaux*, *Éminences bigem'ines*, *Lobes optiques* ou *bijumeaux*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded;

connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior called *Nates*, *Natula*, *Tuber'cula anteriora*, *Glu'tia*, are larger and more prominent than the lower, called *Testes*, *Tuber'cula posteriora*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS PRIMUS ET SUPERIOR, *Pyramidalis*—q. *Quartus quadratus*, *Quadratus femoris*—q. *Secundus et tertius*, *Ischio-trochanterianus*.

QUADRIJUMEAUX (TUBERCULES), *Quadrigen'ina Tubercula*.

QUADROON, see Mulatto—q. Black, see Mulatto.

QUAFADIL, *Melanthium Virginicum*.

QUAIHOLL, Cacao.

QUAIL, *Tetrao coturnix*.

QUAMASII, EASTERN, *Scilla esculenta*.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vulture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUAR'ANTINE, *Quar'entine*, *Quarentaine*, from (I.) *Quaranti'na*, itself from *quaranti*, 'forty,' (F.) *Quarantaine*. The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said 'to perform quarantine.' Quarantine is sometimes extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce

legislators to maintain these laws in perhaps an unnecessary degree of rigour.

QUARTAN, from *quartus*, 'the fourth.' *Quarta'na Febris*, *Au'ctus Quarta'nus*, *Tetarta'us*, *Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every fourth day, leaving between them two days' interval. We speak also of the *Quartan Type*. A *Double Quartan*, (F.) *Double quarte*, is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession;—the paroxysms of every fourth day resembling each other. A *Triple Quartan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling* or *repeat'ing quartan*, (F.) *Fièvre quarte doublée*, is one in which there are two paroxysms every fourth day. See Intermittent.

QUARTANUS REMITTENS, Tetartophia.

QUARTA'RIOUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

QUARTE, Quartan.

QUARTERON, see Mulatto — q. Black, see Mulatto.

QUARTIO, Astragalus.

QUARTI-STERNAL, *Quadristerua'lis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space. — BÉCLARD.

QUASSATIO, Conquassation.

QUASSATURA, Conquassation.

QUASS'IA, *Q. ama'ra* see *excel'sa*, *Picra'na excel'sa*, *Febrif'ugum lignum*, *Quassy*, *Lofty Bitterwood Tree*, *Bitter-ash*, (F.) *Quassie*, *Bois amer*. Ord. Simarubaceæ. A West India tree, from which is obtained the *Lignum Quassia*, *Quassia* (Ph. U. S.) It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin*.

QUASSIA SIMAROU'BA, *Simarouba*, *Simaru'ba*, *S. officina'lis*, *Euan'yms*, *Bitter Simaruba*, *Mountain Damson*. The bark of the root, *Simaru'ba*, (Ph. U. S.), is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

QUASSIN. see Quassia.

QUATERNIO, Astragalus.

QUATRE ÉPICES, see Myrtus pimenta.

QUATRIO, Astragalus.

QUEASINESS, Nausea.

QUEEN OF THE MEADOW, *Spiræa lobata* — q. of the Prairie, *Spiræa ulmaria*.

QUEEN'S DELIGHT, *Stillingia* — q. Root, *Stillingia*.

QUELLES, Elixir.

QUENOUILLE D'EAU, *Typha latifolia*.

QUERCERA, Epialos.

QUERCINI HERBA, *Lichen plicatus*.

QUERCULA MINOR, *Teucrium chamædrys*.

QUERCUS ALBA, *White Oak*; **QUERCUS ROBUR**, *Common Oak*; **Q. TINCTORIA**, *Black Oak*; **Q. RUBRA MONTANA**, *Red Oak* or *Spanish Oak*. Ord. Cupuliferæ. Sec. Syst. *Monœcia Polyandria*; (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

Acorus, *Ceces*, *Nuces Quercus*, (F.) *Glands*, were at one time much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary made of them has been advised in immoderate flow of the menses. They are not now used.

QUERCUS INFECTORIA. A tree of Asia Minor, which affords *Turkey or Nut Galls*, *Galla Turcica* seu *Querciv'na* seu *Tinctoria*, *Nux Galla*, *Galla maxima orbiculata*, *Cicis*, *Cassnoles*, *Galla*, *Galls*, *Gall-nut*, (F.) *Noix de Galle*, *Galle de chêne*. The *nut-gall* — *Galla* (Ph. U. S.) — is a morbid protuberance or tubercle, produced by the puncture of the *Diplolepis* seu *Cynips Galla Tinctoria*, *Cynips Quercus folii*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles. The ordinary nutgalls of the shops are procured from the Levant. The large *Mecca* or *Bussorah galls*, at times called *Dead Sea apples*, *Mud apples* and *apples of Sodom*, are produced on *Quercus infectoria*.

There are upwards of thirty species of oak in the United States, all of which are probably more or less astringent and tonic.

QUERCUS COCCIFERA, see *Kermes* — q. *Marina*, *Fucus vesiculosus* — q. *Suber*, see *Suber*.

QUERQUERA, Epialos.

QUEUE DE CHEVAL, *Hippuris vulgaris* *Cauda equina*, see *Medulla spinalis* — q. *de la Moëlle épinière*, *Cauda equina* — q. *de Pourcean*, *Peucedanum* — q. *de Rat*, *Sium lunare*.

QUICK-IN-THE-HAND, *Impatiens*.

QUICKEN TREE, *Sorbus acuparia*.

QUICKENING, from Sax. *epiccan*, 'to make alive.' The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive—*Animatio fœtus*. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes as a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKENS, *Triticum repens*.

QUICKLIME, *Calx viva*.

QUICKSILVER, *Hydrargyrum*.

QUIES, *Anesia*.

QUINA, *Quinine* — q. *de Campo*, *Strychnos pseudo-china* — q. *Quina*, *Cinchona*.

QUINÆ ACETAS, **SULPHAS**, &c., see *Quiniæ Acetas*, &c.

QUINCE, *Scrofula*, see *Pyrus cydonia* — q. *Tree*, *Pyrus cydonia*.

QUINIA, *Quinine* — q. *Acetate* of, *Quiniæ acetat* — q. *Amorphous*, see *Quinia*, extract of, and *Chinioidine* — q. *Arseniate* of, *Quiniæ arseniat* — q. and *Cinchonia*, tannate of, *Quiniæ et Cinchoniatannas* — q. *Arsenite* of, *Quiniæ arsenit* — q. *Citrate* of, *Quiniæ citras*.

QUINIA, EXTRACT OF, *Qui'niæ sulphas impu'rus*. A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistence of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be amorphous quinia or chinioidine. Twenty-four grains will generally arrest ague.

QUINIA, FERROCYANATE, OF, *Quiniæ ferrocyanas* — q. *Hydriodate* of, *Quiniæ hydriodas* — q. *Impure sulphate* of, *Quinia*, extract of — q. *Iodhydrate* of, *Quiniæ hydriodas* — q. *Iodide* of, *Quiniæ hydriodas* — q. *Iodide* of *iodhydrate* of, see *Quiniæ hydriodas* — q. *Ioduret* of, *Quiniæ hydriodas* — q. and *Iron*, *Hydriodate* of, see *Quinia*, *Iodide* of *iodhydrate* of — q. *Lactate* of, *Quiniæ lactas* — q. and *Mercury*, *protochloride* of, *Hydrargyri et Quiniæ Protochloridum* — q. *Muriate* of, *Quiniæ murias* — q. *Nitrate* of, *Quiniæ nitras* — q. *Phosphate* of, *Quiniæ phosphas* — q. *Sulphate* of, *Quinia*, sulphate of.

QUINLE ACETAS, *Chi'num acet'icum*, *Acet'is Chi'ni' seu Chini'ni seu Chi'nicus seu Qu'nia seu Qu'niæ seu Quini'ni seu Kini'ni*, *Quina acet'ica*, *Acetate of Qu'nia* or of *Quinine*. Prepared by saturating *Quinia* with diluted *acetic acid*. Has the properties of the other salts of *Quinia*.

QUINLE ARSENIAS, *Quini'nae seu Qui'nae Arseni'is*, *Chini'num Arsenico'num seu Arsenic'icum*, *Arseniate of Quinia* or of *Quina* or of *Quinine*, (F.) *Arseniate de quinine*. Formed by the union of *arsenic acid* and *quinia*. Employed as an antiperiodic in the dose of from three quarters of a grain to a grain and a half in the twenty-four hours.

QUINLE ARSÊNIS, *Q. Dias'ensis*, *Ar'senite of Qui'nia*. A salt resulting from the double decomposition of *arseniate of potassa* and *sulphate of quinia*. It has been used in chronic cutaneous diseases; and as an antiperiodic in ague, neuralgia, &c. Dose, one-third of a grain, three times a day.

QUINLE CITRAS, *Quinæ seu Chini'ni citras*, *Citras chi'nicus seu qui'nicus*, *Chi'num seu Chini'num Citricum*, *Citrate of Quinia* or of *Quina* or of *Quinine*. Formed from the union of *citric acid* and *quinia*. It has the same properties as the sulphate.

QUINLE ET CINCHO'NLE TANNAS, *Chini'num seu Chini'num tan'nicum*, *Tannate of Quinia* and *Cinchonia*. This salt has the same properties as the salts of *quinia* in general.

QUINLE DIARSENIS, *Quiniæ Arsenis*.

QUINLE FERROCYANAS, *Chini'num ferrocyanogen'um seu ferrohycrocyan'icum*, *Ferrocyanate or hydrocyanoferrate of Quinia* or of *Quinine*. This salt is obtained by the decomposition of *sulphate of quinia* by means of a solution of *ferrocyanuret of potassium*. It has all the properties of *sulphate of quinia*, and, according to some, in a superior degree.

QUINLE HYDRIODAS, *Chini'num hydriod'icum*, *Hydriodate or Iodhydrate of Quinia*; called, also, *Ioduretum seu Iod'idum Qui'niæ*, *Iod'uret* or *I'odide of Qui'nia*, (F.) *Hydriodate ou Iodhydrate ou Iodure de Quinine*. This is formed by precipitating *sulphate of quinia* by means of *iodide of potassium*. Given in scrofulous affections; half a grain to a grain, three times a day, to a child.

An *iodide* and a *biiodide* have been formed; the latter made by mixing double the quantity of the *iodide of potassium* with the *sulphate of quinia*.

An **IODIDE OF IODHY'DRATE OF QUI'NIA**, (F.) *Iodure d'Iodhydrate de Quinine*, is prepared by pouring into an acid solution of *quinia* a solution of *iodide of iron*, containing a slight excess of *iodine*. The precipitate is treated with boiling alcohol: the liquor filtered, and crystals suffered to form. The salt possesses all the properties of the other salts of *quinia*. Under the name, *Hydriodate of iron and Quinia*, a preparation has been introduced by Mr. Battley. It is possessed of tonic and antiperiodic virtues.

QUINLE IODIDUM, *Quiniæ hydriodas*—*q. Ioduretum*, *Quiniæ hydriodas*.

QUINLE LACTAS, *Quinæ lactas*, *Chini'num lac'ticum*, *Lactate of Qui'nia* or of *Quinine*, (F.) *Lactate de quinine*. Made by the action of *lactic acid* on *quinia*. Used in the same cases as the other salts of *quinia*.

QUINLE MURIAS, *Chini'num muriat'icum seu sal'itum seu hydrochlor'icum*, *Murias chi'nicus*, *Muriate of Quinia* or of *Quinine*. May be prepared by dissolving *quinia* in dilute *muriatic acid*. Given as an antiperiodic. Dose, half a grain to a grain.

QUINLE NITRAS, *Chini'num seu Chini'num ni'tricum*, *Nitrate of Quinia* or of *Quinine*, (F.) *Nitrate ou Azotate de quinine*. May be formed

by the addition of *nitric acid* to *quinia*. Its properties are those of the sulphate of *quinia*.

QUINLE PHOSPHAS, *Chini'num seu Chini'num phosphat'icum*, *Phosphate of Quinia* or of *Quinine*; may be prepared by the addition of dilute *phosphoric acid* to *quinia*. It is thought by many to be next to the sulphate of *quinia* in its remedial powers.

QUINLE SULPHAS, *Quinine, sulphate of*.

QUINLE VALERIA'NAS, *Chini'num seu Chini'num valerian'icum*, *Valerianate of Quinia*, of *Quina*, or of *Quinine*; may be formed by the union of *valerianic acid* with *quinia*. It has the properties of the salts of *quinia*.

QUINICINE, *Quinic'ina*, *Quinic'io*. When a salt of *quinia* is exposed to heat with certain precautions, the alkaloid is changed into another isomeric with it, to which this name has been given.

Quinine, and its sulphate, possess the same medical properties as *quinia* and its salts. Dose, gr. v to gr. xv.

QUINID'IA, *Quinid'ina*, *Quinidine*, *Chi'nidine*, *Cin'chetin*. An alkaloid of the cinchonas—of many of the genuine at least—obtained from them by the same process as that by which *quinia* is obtained from the barks that yield it. Its sulphate is more soluble however than the sulphate of *quinia*, and it is left, therefore, in the mother waters.

The salts of *quinidin* are markedly antiperiodic. From gr. x to gr. xxx will usually arrest a paroxysm.

QUININE, *Qui'nia*, *Quina*, *Kini'num*, *K'i'num*, *Sal essential'è corticis Peruvia'ni*, *Chini'num*, *Quinia*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE, ACETATE OF, *Quiniæ acetas*—*q. Arseniate of Quiniæ arsenias*—*q. Arsenite of Quiniæ arsenis*—*q. Azotate of Quiniæ nitras*—*q. Citrate of Quiniæ citras*—*q. Ferrocyanate of Quiniæ ferrocyanas*—*q. Hydriodate de Quiniæ hydriodas*—*q. Iodhydrate de Quiniæ hydriodas*—*q. Iodide of Quiniæ hydriodas*—*q. Iodure de Quiniæ hydriodas*—*q. Iodure d'iodhydrate de Quinia*, *iodide of iodhydrate of*—*q. Lactate of Quiniæ lactas*—*q. Muriate of Quiniæ murias*—*q. Nitrate of Quiniæ nitras*—*q. Phosphate of Quiniæ phosphas*.

QUININE, QINA OR QUINTA, SULPHATE OF, *Quiniæ seu Qui'nae seu Quini'nae Sulphas*, *Quinæ Din'phas*, *Chini'num seu Chini'num Sulphur'icum*, (F.) *Sulfate de Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, as a tonic from 3 to 10 grains in the 24 hours. As an antiperiodic it may be carried much further. Its action, in a large dose, is decidedly sedative. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States.—*Cinchon. flav.* in pulv. crass. ℥iv; *Acid. muriat.* fʒiij; *Calvus.* in pulv. ʒv; *Aqua.* coag. v; *Acid. Sulphur.* Alcohol; *Carbon. animal.* ʒss q. s. Boil the bark in one-third of the water mixed with one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of

water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having heated the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali. Then add an ounce and a half of animal charcoal; boil for two minutes; filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid, add a little animal charcoal, filter and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The mother-waters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.

QUININE, TANNATE OF, Quiniæ et cinchoninæ tannas—q. Valerianate of, Quiniæ valerianas.

QUININISM, *Quininis'mus*, *Quinism*, *Cinchonism*, (F.) *Inebriatio* ou *Ivresse quinique*. The aggregate of encephalic or neuropathic phenomena induced by over-doses of quinia.

QUINOIDINE, Chinioidine.

QUINQUEFOLIUM, *Potentilla reptans*—*Quinquefolium majus*, *Potentilla reptans*.

QUINQUINA, *Cinchona*—q. *Aromatique*, *Croton cascarilla*—q. *Bicolor*, *Cinchonæ Caribææ cortex*—q. *Faux de Virginie*, *Cusparia febrifuga*—q. *Gris de Loxa*, *Cinchonæ lancifoliæ cortex*—

q. *Jaune*, *Cinchonæ cordifoliæ cortex*—q. *Orange*, *Cinchonæ lancifoliæ cortex*—q. *Piton*, *Cinchonæ Caribææ cortex*—q. *Rouge*, *Cinchonæ oblongifoliæ cortex*.

QUINQUINO, *Myroxylon peruiferum*.

QUINSY, *Cynanche*, *C. tonsillaris*—q. *Nervous*, *Angone*—q. *Wolf*, *Lycanche*.

QUINTAN, *Febris quinta'na* seu *pemptæ'a* seu *quinta*; from *quintus*, 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE, (F.) This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Toux*—'a fit of coughing.' (Sc.) *Kink*. Also, the influenza.

QUINTEFEUILLE, *Potentilla reptans*.

QUINTERON, see *Mulatto*—q. *black*, see *Mulatto*.

QUINTES, see *Quinte*, and *Pertussis*.

QUINTES'SENCE, *Quinta Essentia*. A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcoholic tincture*. The most volatile principles of bodies were, also, called *Quintes'sences*.

QUINTISTERN'AL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUINUA, *Chenopodium quinoa*.

QUOTID'IAN, *Quotidia'nus*, *Ephem'erus*, (F.) *Quotidien*—itself from *quotidie*, 'daily.' That which takes place every day.

QUOTID'IAN FEVER, *Q. ague*, *Febris quotidia'na* seu *hemere'sia* seu *heme'rina* seu *ephem'era* seu *metheme'rina* seu *metheme'ria*, *An'etus quotidia'nus*, *Cathe'merus*, *Cathemer'ius*, *Methemer'ius*, *Amphemer'inos*, *Amphimer'ius*, *Amphemer'us*, *Quotidia'nus*, (F.) *Fievre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A *simple*, *double*, or *triple quotidian*, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

R.

R or R̄ is placed at the commencement of a prescription, as a contraction of *Rec'ipē*. (See Abbreviation.) Originally, it was the sign ♃ of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favorably.

RABDOIDES, (SUTURA,) Sagittal suture.

RABID, *Rab'idus*, (F.) *Rabique*, *Rabi'ëque*, from *rabies*, (*rabo*, 'I am mad or furious,') 'canine madness.' That which belongs to hydrophobia: as *rabid virus*, &c. Rabid also means affected with hydrophobia, (F.) *Euragē*.

RABIÉIQUE, Rabid.

RABIES CANINA, Hydrophobia.

RABIQUE, Rabid.

RACAHOUT, *Am'ylum quer'neum*. A name given by the Arabs to the starch prepared from an edible acorn obtained from *Quercus Ilex*, but, according to Plagge, the so called *Racahout* of the Arabs, sold in Paris, is a compound of potatoe starch, chocolate, and aromatics,—as vanilla.

RACCOON BERRY, *Podophyllum montanum*.

RACE, from *radice*, abl. of *radix*, 'root,' breed. The union or aggregate of individuals whose con-

formation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See *Homo*.

RACÉMEUX, *Racemosus*.

RACÉMO'SUS, *Rac'emosus*, *Rac'emoso*, (F.) *Racémeux*. In clusters, like grapes.

RAC'EMUS. A cluster—as of grapes.

RACHAMEL'CA, from Hebr. רחם (*rechem*), 'the womb,' and מלך (*molech*), 'a king.' *Rechamal'ca*. A peculiar formative principle, supposed, by Dolæus, to exist in the uterus.

RACHE, *Porrigo*.

RACHLÆI, *Rhachitæ*.

RACHIALGIA, Colic, metallic, *Rhachiodynia*, *Vertebral disease*—r. *Mesenterica*, *Tabes mesenterica*—r. *Pictoniensium*, *Colic*, metallic—r. *Pictonum*, *Colic*, metallic.

RACHIALGIE MÉSENTÉRIQUE, *Tabes mesenterica*.

RACHIALGITIS, *Rhachialgitis*.

RACHIDIAN, *Spinal*.—r. *Arterics*, *Spinal arteries*—r. *Bulb*, see *Medulla oblongata*—r. *Canal*, *Vertebral canal*.

RACHIDIEN, Spinal.

RACHIOPHYMA, Rachiophyma.

RACHIPHYMA, *Rhachiphy'ma*, *Rachiophy'ma*, *Tumor Dorsi*, from *'pax'is*, 'the spine,' and *φύμα*, 'a tumour.' A tumour on the spine or on the back.

RACHIS, Vertebral column.

RACHIS'AGRA, *Rhuchis'agra*, *Rhach'agra*, *Rhach'agra*, *Rhuchid'agra*, *Rhach'itis spina'lis*, from *'pax'is*, 'the spine,' and *αγρα*, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITE, Rhachite.

RACHITIC, *Rachit'icus*, *Rhachit'icus*, (F.) *Rachitique*. Same etymon as the next. Relating or appertaining to, or affected with rickets. Weak, feeble in the joints; defective in development.

RACHITIS, *Rhach'itis*, from *'pax'is*, 'the spine,' and *itis*, a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrtos'is Ra'chia*, *Cyrtos'osis*, *Morbus Ang'licus*, *Osteomalacia Infantum*, *Tuberc'ector'ea*; *Innutritio ossium*, *Spina nodosa*, *Rachit'ismus*, *English disease*, *Rickets*; from *'pax'is*, 'the spine,' (F.) *Rachitisme*, *Nonure*. A disease characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health; others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly *hygienic*. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

RACHITIS ADULTORUM, Mollities ossium.

RACHITISME, Rachitis.

RACHITOME, from *pax'is*, 'spine,' and *τεμνειν*, 'to cut.' An anatomical instrument for opening the medulla spinalis without injuring the medulla.

RACHOSIS, *Rhachos'is*, *Rachos'is*, from *'pax'ow*, or *'pax'ow*, 'I wrinkle.' A relaxation of the scrotum. *Proptoma seu lux'itas Scroti*, *Scrotum pendulum*. An excoaration of the relaxed scrotum.

RACINE À BECQUET, *Geranium moschatum*—*r. de Bengal*, *Cassununiar*—*r. Brésilienne*, *Ipecaeuha*—*r. de Charcis*, *Dorstenia contrayerva*—*r. de Chine*, *Smilax china*—*r. de Dracke*, *Dorstenia contrayerva*—*r. des Philippines*, *Dorstenia contrayerva*—*r. de Safran*, *Curcuma longa*—*r. de Saint Esprit*, *Angelica*—*r. Salivaire*, *Anthemis pyrethrum*—*r. de Turbeth*, *Convolvulus turpethum*.

RACINES DU CERVELET, *Corpora restiformia*.

RACLURES DES BOYAUX, *Ramenta intestinorum*.

RACORNISSEMENT (F.), from *racornir*, (*corn*, 'horn,') 'to make hard as horn.' *Cor'nification*. A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADCLIFFE'S ELIXIR, see *Tinctura aloes composita*.

RADESYGE, *Radzyge*.

RADEZYGE, *Radzyge*.

RADIAD, see *Radial aspect*.

RA'DIAL, *Radia'lis*, from *radius*, 'a bone of the forearm.' That which relates to the radius.

RADIAL ANTÉRIEUR, *Palmaris magnus*.

RADIAL ARTERY, *A. extern'a Cu'biti*. It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profund* or *radial* palmar arch. The radial artery gives off the *recurrent radial*, several *radio-muscular* branches, the *transverse palmar radio-carpal artery*, the *external superficial artery of the palm of the hand*, the *external dorsal of the thumb*, the *dorsalis carpi*, *dorsal interosseous artery of the index*, &c.

RADIAL ASPECT. An aspect towards the side on which the radius is situated.—*Barelay*. *Radial* is used by the same writer, adverbially, to signify 'towards the radial aspect.'

RADIAL EXTERNE PREMIER, see *Radialis*—*r. Externe second*, see *Radialis*—*r. Grand*, see *Radialis*.

RADIAL NERVE, *Radio-digital* (Ch.), *Spiral Nerve*, *Spiral muscular N.*, *Musculo-spiral nerve*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches;—the one *posterior*, which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior*; it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring finger, and to the first interosseous muscle of the back of the hand.

RADIAL PETIT, see *Radialis*.

RADIAL VEINS, *DEEP-SEATED*, follow the same course as the radial artery.

RADIALIS EXTER'NUS BREVIOR, *Extensor Carpi Radialis Bre'vior*, *Radialis secundus*, (F.) *Second radial externe*, *Petit radial*, *Épicondylo-sus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

RADIALIS EXTER'NUS LONGIOR, *Extensor Carpi Radialis Lon'gior*, *Radialis externus primus*, (F.) *Premier radial externe*, *Grand radial*, *Huméro-sus-métacarpien*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and

to the corresponding tuberosity, of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

RADIALIS EXTERNUS PRIMUS, R. Externus longior—*r. Extensor longior, R. Externus longior*—*r. Internus, Palmaris magnus*—*r. Secundus, R. Externus longior*.

RADIATED, Radia'tus, from *radius*, 'a ray;' (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c.; as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

RADIATED SUBSTANCE OF THE KIDNEY, see *Kidney*.

RADICAL, Radica'lis, from *radix, radiceis*, 'a root.' A *radical cure, cura radica'lis*, is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure*.

RADICAL MOISTURE, Humidum radicale.

RADICAL VESSELS, Vas'cular Rad'icles, (F.) *Radicules vasculaires*, are the small vessels that take their origin in the tissues, and by their union form larger vessels.

RADICES OSSIS HYOIDEI, Cornua ossis hyoidici.

RADICIS'ECA, from *radix, radiceis*, 'a root,' and *secare*, 'to cut.' One employed in collecting and preparing plants was formerly so called.

RADICULA, Raphanus hortensis.

RADICULES VASCULAIRES, Radical vessels.

RADII CILIARES, Ciliary processes.

RADII FRONTS. The folds or wrinkles of the forehead.

RA'DIO, from *radius*. In composition, relating or belonging to the radius, a bone of the forearm.

RADIO-CARPAL, Radio-carpia'nus. That which relates to the radius and carpus.

RADIO-CARPAL ARTICULATION is the *wrist joint*, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

RADIO-CARPAL TRANSVERSE PALMAR ARTERY, (F.) Artère Radio-carpienne-transversale-pal-maire. A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

RADIO CUTANÉ (NERF), see *Cutaneous*—*r. Phalangettien du ponce, Flexor longus pollicis manus*.

RADIOLUS, Sound.

RADIO-MUS'CLAR, Radio-muscula'ris. A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

RADIS, Raphanus hortensis—*r. de Cheval, Cochlearia armoracia*.

RADISH, Raphanus hortensis—*r. Water, Nasturtium amphibium*.

RADIUS, 'a spoke':—so called from its shape. *Cercis, Foc'ile minus seu superius, Canna minor, Os ad cubita'le, Additamentum ulnæ, Manu'brum manus, Parape'chyon, Arna'do bra'chii minor, (F.) Os du Royon*. A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone is the *tubercle* or *bicipital*

tuberosity or *eminence* for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

RADIUS, COL DU, Collum radii.

RA'DIX, genitive, *radiceis, Rhiza*. A root; also, the male organ.

Radix, Root or *fang* of a tooth, is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to prolongations, sent by scirrhus, cancerous, or other tumours into the neighbouring parts.

Five Aperient Roots, Quinque radi'ces aperient'es, were, of old, asparagus, butchers' broom, fennel, parsley, and smallage.

Five Lesser Aperient Roots, Quinque radi'ces aperient'es mino'res, were caper, dandelion, eryngo, madder, and rest-harrow.

RADIX ASCLEPIADIS CRISPA, see *Gomphocarpus crispus*—*r. Braziliensis, Ipecacuanha*.

RADIX CORDIS, Basis Cordis. The base of the heart.

RADIX GINSENG, see *Panax quinquefolium*—*r. Indica Lopeziana, Lopez radix*—*r. Lingux*, see *Tongue*—*r. Lopeziana, Lopez radix*—*r. Ninsi, Panax schinseng, Sium ninsi*—*r. Rubra, Rubia*—*r. Serpentinum*, see *Ophiorrhiza mungos*—*r. Unguis, Nail, root of*—*r. Ventris, Umbilicus*.

RADULA, Raspatorium.

RADZYGE, Radzygin, Radesyge, Radezyge, Thæ'ria, (properly *Theria*, from *θηριον, (ελκος)*, 'a malignant ulcer.') *Lepra borea'lis* seu *Norveg'lica, Norve'gian Lep'rosy*. A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

Another form—the *Spedalske, or Spedalskhed*—of Norway, appears to be a variety of tubercular lepra. Under the epithelial scales, numerous acari have been found; and the affection has been called *Sea'bies crusto'sa*, and *Sea'bies Norveg'ica Boeck'ii*, after Boeck, who well described a case of it.

RAFFLE'SIA ARNOLD'I. A plant of Java. Order, *Rafflesiaceæ*, a decoction of which is employed there as an astringent in relaxed conditions of the genito-urinary apparatus.

RAFRAICHISSANT, Refrigerant.

RAGE, Ira, Furor brevis, Orgē, Thymos, (F.) Colère, Rage. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and, generally, redness and swelling of the face.

RAGE, Rhage.

RAGE, Hydrophobia, Rage.

RAGE DE TÊTE. An epidemic and fatal malady, which prevailed in France in 1451. It was presumed to be epidemic meningitis.

RAGWEED, Ambrosia elatior—*r. Golden, Senecio aureus*—*r. Great, Ambrosia trifida*.

RAGWORT, Senecio Jacobæa.

RATA BATIS, and R. CLAVATA, see *Oleum jecoris aselli*.

RAIDEUR, Rigidity—*r. Cadavérique, Rigor mortis*.

RAIFORT, *Raphanus hortensis*—*r. Sauvage*, *Cochlearia armoracia*.

RAINBOW WORM, *Herpes iris*.

RAINURE, Groove—*r. Digastrique*, Mastoid groove.

RAISIN, see *Vitis vinifera*—*r. d'Amérique*, *Phytolacca decandra*—*r. de Bois*, *Vaccinium myrtillus*—*r. d'Ours*, *Arbutus uva ursi*—*r. de Renard*, Paris.

RAISING, Expectorator.

RAISINIÈRE (F.), from *raisin*, 'a grape.' A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea, in consequence of ulcers or accidental wounds of that membrane.—Nysten.

RAISINS, *Uvæ passæ*, see *Vitis vinifera*—*r. de Corinthe*, see *Vitis Corinthiaca*.

RAISON, Reason.

RAKASIRA. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKE-TEETH. A term, used in the North of England for teeth which are wide apart, and similar to those of a rake.

RAKIA, see Spirit.

RAKOSIS, Rachosis.

RÂLE (F.), *Rattle*, *Rhonchus*, *Rhenchus*, *Rhenxis*, from (D.) *Ratel*; *Rhoncus*, *Cerchus*, *Rhogmos*: (probably an example of onomatopœia.) Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly observed at the approach of death, and is commonly called, "the rattles."

The term *Râle* has been given to different sounds during respiration, caused by the air in connection with fluid contained in the bronchi, or areolæ of the pulmonary tissue; which are perceived by the stethoscope.

RÂLE BRONCHIQUE SEC, *Râle sonore*—*r. Bronchique humide*, *R. muqueux*—*r. Caveux*, *Gurgling*—*r. Cavernuleux*, see *Gurgling*—*r. Crépitant*, *Rhonchus crepitans*, see *Crepitant*—*r. c. Reduz*, see *Crepitant*.

RÂLE MUQUEUX, *R. bronchique humide*, *Rhan'cus mucosus*, *Hydrobronchiorrhanchus*, *Mucous Rattle*. The sound produced by the passage of air through mucus accumulated in the larger bronchi or trachea, or through softened tubercular matter. This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes *gurgling*, (F.) *Gorgouillement*. The *subcrepitant rhonchus*, (F.) *Râle sous-crépitant*, is produced by the hubbling of air through liquid of variable consistence in the minute bronchial tubes. When heard at the base of both lungs, it is a sign of capillary bronchitis. When heard at one base only, it is generally connected with tuberculosis higher up.

RÂLE SIBILANT, *Rhon'chus sibilus* seu *sibilans*, *Sibilant Rattle*. A slight, though prolonged, whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis. The *clicking* and *whistling* varieties differ, in the former being short, the latter prolonged. The former is a quick, sharp sibilus or whistle, which ceases almost in-

stantaneously; the latter a prolonged sibilus, of less sharpness, lasting almost the whole time of the movement which it accompanies. To these may be added the *hissing* variety, the name sufficiently indicating its character.

RÂLE SONORE, *R. bronchique sec* ou *ronflant*, *Rhonchus sonorus*, *Sonorous Rattle*. A sound resembling at times the snoring—(F.) *Roufflement*—of a person asleep; at others the sound of the bass string of an instrument when rubbed with the finger, and not unfrequently the cooing—(F.) *Roucoulement*—of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

RÂLE SOUS-CRÉPITANT, see *Râle muqueux*—*r. Vésiculaire*, see *Crepitation*.

RAMEAU, Ramus.

RAMBERGE, Mercurialis.

RAMEN'TA INTESTINO'RUM, *Scrapings of the Intestines*, (F.) *Ractures des Boyaux*. The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Diachore'ma xymato'des*.

RAMENTUM, Fragment, Scobis.

RAMEX, *Hernia*—*r. Varicosus*, *Varicocele*.

RAMIFICATION, *Ramificatio*, from *ramus*, 'a branch,' and *fi*, 'to become.' A division of arteries, veins, or nerves into branches. Also, a branch itself.

RAMILLE, *Ramuseulus*.

RAMOLLISSEMENT, *Mollities*—*r. du Cerveau*, *Mollities cerebri*—*r. du Cœur*, *Cardiomalacia*—*r. de l'Estomac*, *Gastromalacia*—*r. du Foie*, *Hepatomalacia*—*r. Gris*, see *Hepatisation*—*r. de la Moelle épinière*, *Mollities medullæ spinalis*—*r. Rouge*, see *Hepatisation*—*r. de l'Intestin*, *Enteromalacia*—*r. des Os*, *Mollities ossium*.

RAMPANT (F.), from *ramper*, 'to climb.' *Repus*, *Reptans*. That which creeps or crawls. The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

RAMPES DU LIMAÇON, *Scala* of the cochlea.

RAMPHOS, *Rostrum*.

RAMULUS, *Ramuseulus*.

RAMUNCULUS, *Ramuseulus*.

RAMUS, *Cladus*, a *branch*, (F.) *Rameau*. A division of an artery, vein, or nerve. Also, the male organ.

RAMUS DURIOR SEPTIMÆ CONJUGATIONIS, *Facial nerve*.

RAMUS'CLUSUS, *Ram'ulus*, *Ramunculus*, *Sar'culus*, *Cladiscos*, diminutive of *ramus*, 'a branch.' A division of a ramus. (F.) *Ramuncule*, *Ramille*.

RANA ESCULEN'TA, 'esculent frog,' (F.) *Grenouille*. This frog and the bull-frog, *Rana Taurina*—are eaten as delicacies. They are nutritious, and easily digested.

RANA, *Ranula*.

RANCE, *Rancid*.

RANCID, *Rancidus*, *Sapros*. (F.) *Rance*, from *rancere*, 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may thus become very irritating, and unfit for the purposes for which they were originally intended.

RAN'DIA DUMETO'RUM, *R. Spino'sa*, *Coultium Coromatum*, *Garden'ia seu Posogoe'ria Dumeto'rini* seu *Spino'sa*. A Coromandel shrub; *Ord. Cinchonacæ*: the fruit of which, bruised and thrown on the water, intoxicates, or even

kills fish. In the form of powder, it is a powerful emetic.

RANDIA SPINOSA, R. dumetorum.

RANINE, *Rani'na*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RANTREE, *Sorbus acuparia*.

RAN'ULA, diminutive of *rana*, 'a frog,' so called from its resemblance: *Dysphagia Ranula*, *Emphragma salivæ rē*, *Batrachos*, *Batrochium*, *Hydroglossa*, *Hypoglossis*, *Hypoglossum*, *Hypoglotis*, *Hypoglossium*, *Rana*, *Frog Tongue*, (F.) *Grenouillette*. A small, soft, fluctuating, and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

RANULA LAPIDEA, see *Calculi*, salivary.

RANUNCULUS, (F.) *Renoucle*, (Sc.) *Yellow gowan*, *Ord. Ranunculaceæ*; *Sex. Syst. Polyandria Polygynia*. Diminutive of *rana*, 'a frog,' because found in marshy places where frogs abound. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See *Poison*. They are, also, acrid and vesicant, when applied to the skin, and have accordingly been often used as counter-irritants. The following species answer to this description.

RANUNCULUS ABORTIVUS, *Small-flowered Crowfoot*, *Chicken-pepper*.

RANUNCULUS ACRIS, *R. pratensis* seu *Stevenii* seu *viridulus* seu *syriacus* seu *Siculus*, *Upright Meadow* or *Tall Crowfoot*, *Butter Cups*, (Prov.) *Craissey*, *Guilty Cups*, *Yellow-weed*, *Blister-weed*, *Pilewort*, *Burwort*, *Meadow-bloom*, *Yellows*, (F.), *Bouton d'or*.

RANUNCULUS ALBUS, *Anemone nemorosa*.

RANUNCULUS AQUATICUS, *R. sceleratus*.

RANUNCULUS BULBOSUS, *R. latus*, *Ranunculus* (Ph. U. S.), *Bulbous* or *Bulbous-rooted Crowfoot*, *Butter Cups*, (F.) *Renoucle bulbeuse*, *Bassinet*.

RANUNCULUS DIGITATUS, *R. sceleratus*.

RANUNCULUS DECLINATUS, *R. flammula*.

RANUNCULUS FICARIA, *R. vernus* seu *præcox*, *Chelidonium minus*, *Serophularia minor*, *Ficaria ranunculoides* seu *verna* seu *communis*, *Chelidonia rotundifolia minor*, *Cursuma hæmorrhoidalis herba*, *Ægylethron*, *Lessercelandine*, *Pilewort*, (F.) *Petite Chélideine*, *Petite Éclairé*, *Ficaire*, *Herbe aux hæmorrhoides*. The leaves and root have been used medicinally;—the leaves as an antiscorbutic; the root as a cataplasm in piles.

RANUNCULUS FLAMMULA, *R. declinatus*, *Flammula*, *Surrecta alba*, *Smaller Water Crowfoot*, *Lesser Spearwort*, (F.) *Petite Douce*.

RANUNCULUS ILLYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS LÆTUS, *R. bulbosus* — r. *Nemorosus*, *Anemone nemorosa* — r. *Palustris*, *R. sceleratus* — r. *Pratensis*, *R. acris*.

RANUNCULUS PENNSYLVANICUS, *Bristly Crowfoot*.

RANUNCULUS PRÆCOX, *R. ficaria*.

RANUNCULUS PUBESCENS, Grows in ditches and marshes in South Africa. The expressed

juice is used by the Cape Colonists in cancerous ulcers.

RANUNCULUS REPENS, *Creeping Crowfoot*—r. *Rufulus*, *R. acris*.

RANUNCULUS SCCLERATUS, *R. Palustris* seu *umbellatus* seu *digitatus* seu *aquatiscus*, *Linnæi*, *A'pium*, *Herba Sardo'nia*, *Herba Scclerata*, *Hecato'nia palustris*, *Marsh* or *Crushed* or *Celery-leaved Crowfoot*.

RANUNCULUS SICULUS, *R. acris* — r. *Stevenii*, *R. acris* — r. *Umbellatus*, *R. sccleratus* — r. *Vernus*, *R. ficaria* — r. *Virginianus*, *Lobelia syphilitica*.

RAPA NAPUS, *Brassica rapa* — r. *Rotunda*, *Brassica rapa*.

RAPE, *Brassica napus*, *Stuprum*.

RAPHANE'DON, from *ραβανις*, 'a radish, like a radish.' *Rhaphædon*. A transverse fracture of a long bone, leaving no splinters;—what has been called, in France, *Fracture en rave*.

RAPHANIA, *Convulsio Raphania*, *Raphania*, *Morbis spasmodicus malignus* seu *popularis* seu *Sile'siacus*, *Eclampsia typhoides*, *Synclonus Raphania*. Linnæus gives this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raphanus Raphanistrum* seu *syriacus*, *Raphanistrum seg'etum* seu *arvensis*, *Rapistrum*, being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See *Convulsio cerealis*.

RAPHANIA MAÏZTICA, *Pellagra*.

RAPHANIS, *Raphanus hortensis* — r. *Magna*, *Cochlearia armoracia*.

RHAPHANISTRUM ARVENSE, see *Raphania*.

RAPHANUS, *R. hortensis*.

RAPHANUS HORTENSIS, *Raphanus*, *R. sativus* seu *niger*, *Raphanis*, *Rhaphanus*, *Radic'na*, *Rhaphys*, *Raphys*, *Rhaps*, *Rapys*, *Radish*, (F.) *Raifort*, *Radis*. *Ord. Cruciferae*. *Sex. Syst. Tetradynamia Siliquosa*. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

RAPHANUS MARINUS, *Cochlearia armoracia* — r. *Raphanistrum*, see *Raphania* — r. *Rusticanus*, *Cochlearia armoracia* — r. *Sylvestris*, see *Raphania*.

RAPHĒ, *Rhaphē*, *ραφή*, 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the *raphe* or *tramis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphē* seu *Raphē superior* seu *Linea Media'na* seu *Sutur'na corporis callosi* *exter'na* seu *chorda longitudinalis Lawis'ii* is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHĒX, *Chenopodium vulvaria*.

RAPHIANKIS'TRON, from *ραφιον*, 'a needle,' and *αγκιστρος*, 'a hook.' An instrument employed in the formation of artificial pupil.

RAPHION, *Needle*.

RAPHIS, *Needle*.

RAPHYS, *Raphanus hortensis*.

RAPISTRUM, see *Raphania*.

RAPON'TIC, *Rheum rhaponticum*.

RAPPORT (F.), *Relatio*, *Renunciatio*, 'a report.' A deposition made by a physician or surgeon, to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c.

Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires*, the object of which was to obtain provisions for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *provisoires*. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

RAPPORT, Eructation, Regurgitation.

RAPTUS POST-TERGANEUS, Opisthotonos.

RAPUM MAJUS, Brassica rapa.

RAPUNTIIUM SYPHILITICUM, Lobelia siphilitica.

RÂPURE, Rasura.

RAPYS, Raphanus hortensis.

RAQUETTE, Cactus opuntia.

RAREFACIENS, *Rarificiens*, *Aræoticus*, (F.) *Rarifiant*, from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RARÉFIANT, Rarefaciens.

RARIFACIENS, Rarefaciens.

RA'RITAS, (F.) *Rareté*. Rarity; scantiness; fewness.

RARITAS DENTIIUM. A large space between the teeth, which appear to be, and may be, too few.

RASCATIO, Excretion.

RASCETA, Carpus, Malleolus — r. Pedis, Tarsus.

RASCHA, Carpus, Malleolus.

RASETA, Carpus, Malleolus.

RASETTA, Carpus, Malleolus.

RASH, Exanthem — r. Fever, Searlatina — r. Canker, see *Cynanche maligna* — r. Lichenous, Lichen — r. Mercurial, Eczema mercuriale — r. Mulberry, see Typhus — r. Nettle, Urticaria — r. Rose, Roseola — r. Summer, Lichen tropicus — r. Tooth, Strophulus — r. Wildfire, Ignis sylvaticus.

RASOIR, Razor.

RASORISM. The Italian medical doctrine of contro-stimulus, of which Rasori was the founder.

RASORIUM, Raspatorium.

RASPATORIUM, *Rasorium*, *Rat'ula*, *Scalprum rosorium*, *Xyster*, *Xystrerium*, *Xystrum*, *Rat'ula*, *Ranc'ina*, *Rancin'ula*, *Scalprum*, (F.) *Rugine*, *Grattoir*. An instrument used for rasping bones, to detach the periosteum, — either in certain surgical operations, or for anatomical purposes.

RASPBERRY, *Rubus idæus* — r. Black, see *Rubus strigosus* — r. Ground, *Hydrastis Canadensis* — r. Wild, *Rubus strigosus*.

RASPING, Eructation.

RASPS, *Rubus fruticosus*.

RASSETA PEDIS, Tarsus.

RASTETA, Carpus, Malleolus.

RASU'RA, *Xysma*, *Xysmos*, (F.) *Râpure*, from *radere*, *rasum*, 'to scrape.' A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ræ Cornu Cervi*, *Hartshorn shavings*.

RASURA, Scobs.

RATAFI'A, (F.) *Alcoolé sucré*, *Succharo-alcoolé*. A liquor prepared by imparting to ardent

spirits the flavour of various kinds of fruits, adding sugar.

RATANHY, *Krameria ratanbia* — r. of the Antilles, *Krameria ixina*.

RATE, Spleen.

RATELEUX, Splenicus.

RÂTELIER, see *Dentier*.

RATIO, *Rationalitas*, from *reor*, *ratus*, 'to think.' A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum*, an explanation of the symptoms, — *Ratio medendi*, *Genus curatio'nis*, *Via curandi*; the reason, mode or manner of cure.

RATIO, Reason — r. Medendi, see *Ratio* — r. Symptomatum, see *Ratio*.

RAT'IONAL, *Rationalis*, (F.) *Ratiomel*. Same etymon as *Ratio*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French, also, say *Signes rationales*, in opposition to *Signes sensibles*. See *Organic*.

RATIONALITAS, Ratio.

RATSBANE, Arsenious acid.

RATTLE, *Râle*.

RATTLES, THE, see *Râle*.

RATTLEBUSH, *Sophora tinctoria*.

RATTLESNAKE, *Crotalus horridus* — r. Leaf, *Goodyera pubescens* — r. Plantain, *Goodyera pubescens* — r. Root, *Nabalus albus*, *Polygala senega*, *Trillium latifolium* — r. Weed, *Hieracium venosum*.

RATTLESNAKE'S MASTER, *Agave Virginea*, *Liutris scariosa*, *Nabalus albus*.

RATTLEWEED, *Actæa racemosa*.

RATULA, Raspatorium.

RAUCE'DO, *Raucitas*, *Paraphonia rauca*, *Asperitas Arte'riæ asperæ*, *Vox rauca*, *Brauchus*, *Hoarseness*, (Sc.) *Roup*, (Prov.) *Raup*, (F.) *Enrouement*, *Raucité*, from *raucus*, 'hoarse.' A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

RAUCEDO CATARRHA'LIS. Hoarseness from cold.

RAUCITAS, Raucedo.

RAUCITÉ, Raucedo.

RAUCOUS, *Raucus*. 'Hoarse,' as a raucous voice — *Vox rauca seu rancis'ona*.

RAVE, Brassica rapa.

RAVERY, Delirium.

RAWP, Raucedo.

RAY, Diarrhœa.

RAYONNÉ, Radiated.

RAYONS SOUS-IRIENS, Ciliary processes

RAZOR, *Culter Tonsor'ius*, *Machæ'ris*, *Novacula*, *Xyrum*, *Xyruus*, (F.) *Rasoir*, from *radere*, *rasum*, 'to shave.' An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

REACHING, Vomiturition.

REACTION, *Reactio*, from *re*, 'again,' and *agere*, *actum*, 'to act.' An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix naturæ*. It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbid influences.

READ, Rennet.

REAL'GAR, *Realgal*, *Arlada*, *Arladar*, *Auripigmentum rubrum*, *Arsenicum rubrum factit'ium*, *Abesni*, *Sundara'cha Græco'rnum*, *Red Sulphuret of Mercury*. A violent poison. See *Poison*.

REAM, Cream.

REASON, *Ra'tio, Logos, (F.) Raison.* Same etymon as Ratio. The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, Mummy.

REBONA, Mummy.

REBOUTEUR, *Rebouneur.*

RECEIVER, *Ampulla, (F.) Ballon, Récipient,* from *recipere, receptum, (re, and capere, 'to take,') 'to take, to receive.'* In pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort in distillation. Like the retort, the receiver may be *plain* or *tubulated*.

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

RECEPTACULA DURÆ MATRIS, Sinuses of the dura mater.

RECEPTACULUM CHYLI, 'receptacle of the chyle;' *R. Pecqueti seu Pecquetianum, Diversorium seu Stagnum chyli, Sacculus chyliifer seu ro'rifer seu lactens, Al'vens ampullusius seu ampullus'cens, Utriculus lacteus, Vesicula chyli, Ampulla chyli'era seu chyli, Cister'na lumbaris seu Chyli, Chylocystis, Chylodochium, Lat'ices lactei, Lumbar cistern, Reservoir of Pecquet, (F.) Réservoir du chyle, R. de Pecquet, Citerne lombaire.* A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

RECEPTACULUM COTUN'NI. A triangular space, formed by a separation of the two laminae of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

RECEPTACULUM PECQUETI, *R. Chyli*—*r. Sellæ equinæ lateribus appositum, Cavernous sinus.*

RECEPTIVITY, *Receptiv'itas, (F.) Réceptivité.* Same etymon as Receiver. A word used by Tissot to express the susceptibility of certain organs to receive morbid impressions.

RECEPTUM, Prescription.

RECESSIO, Paroxysm.

RECESSUS, Abscess, Sinus—*r. Sulciformis, see Fovea vestibuli.*

RECHAMALCA, Rachamelca.

RECHUTE, see Relapse.

RECIDIVA MORBI, Relapse.

RÉCIDIVE, see Relapse.

REC'IPÉ, (L.) (*re, and capere, 'to take,')* A Latin word which signifies 'take.' (F.) *Prenez,* and with which prescriptions are commenced. It is, often, represented by *R, R,* and was formerly by γ , the symbol of Jove. See Abbreviation.

RÉCIPIENT, Receiver.

RECIPROCATION, VIBRATIONS OF, see Sound.

RECLINATIO, Reclination—*r. Palpebrarum, Ectropion.*

RECLINATION, *Reclina'tio, from reclinare, reclinatum, (re, and clinare, 'to bend,')* 'to bend back.' A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

RECLUSOR PALPEBRARUM, Levator palpebræ superioris.

RECOMPOSITION, Metasynchronis.

RECONVALESCENTIA, Convalescence.

RECORDATIO, Memory.

RECORDATUS, Memory.

RECORPORATIVUS, Metasyncritic.

RECOVERY, Restauratio.

RECREATIO, Restauratio.

RECREMENT, *Recremen'tum, from re, and cernere, cretum, 'to sift.'* A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluids are said to be *recrement'ial, (F.) Récrémenteux, Récrémentitiel; Humores inquin'ni.*

RECREMENTA VESICÆ, Urine.

RECREMENTITAL FLUIDS, see Recreation.

RECREMEN'TO-EXCREMENTIT'IAL. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

RECREMENTUM, Recreation.

RECRUDESCENTIA, *Palinco'tesis, Recrudescence, from re, 'again,' and crudus, 'raw.'* An increase of a disease after a temporary remission.

RECTAL, *Rectalis.* Appertaining, or relating to, the rectum,—as '*rectal tube.*' See Tube, rectal.

RECTIFICA'TION, *Rectifica'tio, from rectum facere, 'to make right.'* An operation by which certain liquids are purified by distilling them, either singly or after admixture with other substances.

RECTITIS. A hybrid word, from *rectum,* and *itis,* denoting inflammation; properly *arthritis, or proctitis.* Inflammation of the rectum. *Proctalgia inflammato'ria.*

RECTO, in composition, signifies relating or belonging to the rectum.

RECTOCELE, Cystocele.

RECTOSTENOSIS, Stricture of the rectum.

RECTO-UTERINE, *Recto-uterinus, from rectum, and uterus.* Appertaining, or relating, to the rectum and uterus.

RECTO-UTERINE FOLDS, see Uterus.

RECTO-VAG'INAL, *Recto-vagina'lis.* That which relates or belongs to the rectum and vagina.

RECTO-VAGINAL FISTULA is owing to a preternatural communication between the rectum and vagina through the above septum.

RECTO-VAGINAL SEPTUM, (F.) *Cloison recto-vaginale,* is formed by the junction—back to back—(or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

RECTO-VESICAL, *Recto-vesical'lis.* Having relation to the rectum and bladder; as the "*recto-vesical fold or pouch*" of the peritoneum, between the rectum and bladder. See Urinary Bladder.

RECTUM, from *rectus,* so called from a notion that it is straight. It is not so. *Intestinum Rectum, Apenthy'smenos, Euthyen'teron, Longaon, Longas, Longaon, Archos, Cys'saros, Princeps, Monocolon [?], Bum-gut, (Prov.) Jot-gut.* The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus.* It is cylindrical, but *sacculated,* as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum.

Like the other portions of the ennal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columnæ, Columnæ carvææ* of the *Rectum* or of *Morgagni*, (F.) *Columnæ du rectum* or de *Morgagni*. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal*. The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the faecal matters, as they pass from the colon, which serves as a reservoir for them.

RECTUS, 'straight.' (F.) *Droit*. A term, used in anatomy for parts that pursue a straight course; — as

RECTUS ABDOMINIS, (F.) *Pubio-sternal, Sternopubien* (Ch.), *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the *linea alba*. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

RECTUS ANTERIOR BREVIS, *Rectus capitis internus minor* — r. *Anterior longus*, *R. capitis internus major* — r. *Capitis anticus longus*, *R. e. internus major*.

RECTUS CAPITIS INTERNUS MAJOR, *R. internus major seu anterior longus seu capitis anticus longus*, (F.) *Trachélo-basilaire, Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebrae. It is inserted into the basilar process of the occipital bone.

RECTUS CAPITIS INTERNUS MINOR, *R. internus minor seu anterior brevis, Ren'venus, An'venus*, (F.) *Petit trachélo-basilaire, Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilar process.

RECTUS CAPITIS LATERALIS, *R. lateralis seu lateralis Fallopii, Transversalis anticus primus*, (F.) *Trachélo-atloïdo-basilaire, Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

RECTUS CAPITIS POSTICUS MAJOR, *R. Major seu Capitis posticus minor* (Albinus), *Spino-az-oïdo-occipitalis*, (F.) *Az-oïdo-occipitale* (Ch.), *Grand droit postérieur de la tête*. A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

RECTUS CAPITIS POSTICUS MINOR, *R. minor*, (F.) *Taber-atloïdo-occipital, Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête*. A flat,

triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

RECTUS CAPITIS POSTICUS MINOR, *R. e. p. major* — r. *Cruis*, *R. femoris*.

RECTUS EXTERNUS OCULI, *Abductor oculi, Indignabundus, Indignatorius, Iracundus, Oculum movens secundus, Orbito-externo-scleroticien*. All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe, Irascible* or *Abducteur*, is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

RECTUS FEMORIS, *Rectus seu Gracilis anterior seu cruvis*, (F.) *Ilio-ratulier, Droit antérieur de la cuisse*. A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

RECTUS INFERIOR OCULI, *Depressor oculi, Timidus, Deprimens, Humilis, Oculum movens quartus*, (F.) *Sous-optico-sphéno-scleroticien, Droit inférieur ou abaisseur de l'œil, Muscle humble*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

RECTUS INTERNUS OCULI, *Adducens oculi, Bitorius, Oculi adductor, Oculum movens primus*, (F.) *Orbito-intus-scleroticien, Droit interne de l'œil ou adducteur ou buveur*. It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

RECTUS SUPERIOR OCULI, *Attollens oculi seu oculum, Levator seu Elevator oculi, Superbus, Oculum movens tertius*, (F.) *Sus-optico-sphéno-scleroticien, Droit supérieur ou Élévateur de l'œil, Déléigneur*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary.[?]

RECTUS INFERIOR FEMORIS, *Gracilis* — r. *Internus major*, *R. capitis internus major* — r. *Internus minor*, *R. capitis internus minor* — r. *Lateralis*, *R. capitis lateralis* — r. *Lateralis Fallopii*, *R. capitis lateralis* — r. *Major*, *R. capitis posticus major* — r. *Minor*, *R. capitis posticus minor*.

RECBITORIUM, *Anaelinterium*.

RECUPERATION, *Restauratio*.

RECUPERATIVE, *Recuperatory*, from *recuperatio*, 'recovery.' Restorative. Recovering. Belonging to recovery.

RECUR'RENT, *Recur'rens*, from *recur'rere*, (*re*, and *currere*), 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate.

RECURRENT ARTERIES. This name has been given to several arteries of the forearm, and to one of the leg. In the forearm, there are, 1. The *Radial recurrent*, *Artère récurrente de l'épicardyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent*, *A. récurrente de l'épitrochlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent*, *A. récurrente olécranienn*

(Ch.). It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In the leg, — the *Arteria recurrens tibia'lis*, *A. recurrens du genou* (Ch.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

RECURRENT BANDAGES are formed by convolutions of bandages, which make a kind of cap for the part—as the head—to which they are applied.

RECURVATIO, see Hump.

RECUTITUS, Apella.

REDBEAN, *Abrus precatorius*.

REDBERRY, *Arbutus uva ursi*, *Gaultheria*, *Panax quinquefolium*—r. Bitter, *Cornus Florida*—r. Swamp, *Vaccinium oxycoccos*.

REDGOWN, *Strophulus*.

RED HEAD, *Asclepias Curassavica*.

REDMAILKES, *Papaver rhœas*.

REDROD, *Cornus sericea*.

RED ROOT, *Celastrus*, *Lachnanthes tinctoria*, *Sanguinaria Canadensis*.

REDSHANKS, *Polygonum persicaria*.

RED WATER TREE, see Sassy Bark.

REDIMICULUM, *Dialema*.

REDINGOTES ANGLAISES, see Condom.

REDINTEGRATIO, Regeneration, Restoration.

REDIVIA, *Paronychia*.

RÉDONNANCE, Plethora.

REDOUBLEMENT, Exacerbation, Paroxysm.

REDRESSEUR UTÉRIN, Pessary, intra-uterine.

REDS, Menses.

REDUCTIO, Reduction, Taxis—r. *Præputii Impedita*, *Phimosi*.

REDUCTION, *Reductio*, *Repositio*, *Restitutio*, *Diapylaxis*, *Dioplasmus*, *Syntaxis*, from *reducere*, *reductum*, (*re*, and *ducere*, *ductum*, 'to lead,') 'to bring back.' A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

In pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

REDUNDANTIA, Plethora.

REDUVIA, *Paronychia*.

REED MACE, *Typha latifolia*.

REFECTIO, *Restauratio*.

REFLECTIVA, *Analeptica*.

REFECTUS, *Restauratio*.

REFICIENTIA, *Analeptica*.

REFLECTION, *Reflexio*, (*re*, and *flecto*, *flectum*, 'to bend,') A bending or turning back. Duplicate.

REFLECTOR EPIGLOT'TIDIS. A muscle, which arises from the arytenoid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

REFLEX MOVEMENTS, see Motion—r. System of nerves, see Excito-motory, and Nerves.

REFLEXIO, Reflection—r. *Palpebrarum*, *Ectropion*.

RÉFORME, Invaliding.

REFRACTION, *Refractio*, *Photocamp'sis*, *Diaclasis*, from *re*, and *frangere*, *fractum*, 'to break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

RÉFRIGÉRANT, see Alembic.

REFRIGÉRANTS, *Refrigerantia*, *Psychitica*, *Antitherma*, *Frige'facientia*. (F.) *Rufraichisants*, *Réfrigératifs*, *Desaltérants*, from *re*, and *frigere*, 'to cool.' Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the *Potassæ Nitras* [?], the *Sodæ Boras* [?], but chiefly the abstraction of caloric by ice and ice-drinks, cold water, cold lemonades, soda-water, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

RÉFRIGÉRATIFS, Refrigerants.

REFRIGERATOR, see Alembic.

REGENERATIO, Reproduction.

REGENERATION, *Regeneratio*, *Palingentesis*, *Redintegratio*, from *re*, and *generare*, *generatum*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

REGIMEN, (F.) *Régime*, from *regere*, 'to govern.' The rational and methodical use of food, and of everything essential to life; both in a state of health and disease. It is often restricted, in its meaning, to *Diet*. It is sometimes used synonymously with hygiene.

RÉGIME SANITAIRE and SYSTÈME SANITAIRE, mean the measures and regulations adopted to prevent the development and propagation of diseases reputed to be pestilential, — especially plague, yellow fever, and cholera.

REGINA PRATI, *Spiræa ulmaria*.

REGIO, Region.

REGIO AURICULARIS. The region of the ear.

REGIO BUCCA'LIS. The region of the cheek.

REGIO CARDIACA, Epigastric region.

REGIO CERVICA'LIS. The region of the neck. The cervical region.

REGIO EPIGASTRICA, Epigastrium.

REGIO FACIA'LIS. The facial region.

REGIO FRONTALIS. The frontal region.

REGIO GASTRICA, Umbilical region—r. Hypogastrica, see Hypogastrium—r. Hypochondriaca, Hypochondre—r. Iliaca, Iliac region—r. Inguinalis, Inguinal region—r. Ischiadica, Ischiadic region—r. Jugalis, Jugal region—r. Lumbalis, Lumbi—r. Mentalis, Mental region—r. Mesogastrica, Umbilical region—r. Nasalis, Nasal region—r. Nuchæ, Nuchal region—r. Nuchalis, Nuchal region—r. Occipitalis, Occiput—r. Occipitalis inferior, Nuchal region—r. Perinæi, Perinæum—r. Præcordiaca, Præcordial region—r. Pubis, Pubic region—r. Stomachalis, Epigastric region—r. Stomachica, Epigastric region—r. Temporalis, Temple—r. Umbilicalis, Umbilical region.

REGION, *Re'gio*. Same etymon. Anatomists have called *regions*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

RÉGION OMBILICALE, Umbilical region.

REGIONAL ANATOMY, see Anatomy.

RÈGLES, Menses—r. *Déviés*, Menstruation, vicarious—r. *Difficiles*, Dysmenorrhœa.

RÉGLISSE, Glycyrrhiza.

RÈGNE ANIMAL, see Animal.

REGULAR, *Regula'ris*, from *regula*, (*regere*, 'to govern,') 'a rule.' According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

REGULAR PRACTITIONER. One who practises his profession according to the rules established by law or custom.

REGULUS ANTIMONII, Antimonium.

REGURGITATION, *Regurgitatio*. The act by which a canal or reservoir throws back sub-

stances accumulated in it. *Mitral regurgitation*, for example, means the reflux of blood through the left auriculo-ventricular opening, during the contraction of the left ventricle. Regurgitation is also applied to the *puking* or *possetting* of infants; and to the *rising* of solids or fluids into the mouth in the adult, — from *re*, and *gorge*, (*gorges*), 'the throat.' (F.) *Rapport*. What is called "vomiting at pleasure" is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Renvois*.

REIF, Psora.

REIN, Kidney.

REINE DES PRES, Spiræa ulmaria.

REINERZ, MINERAL WATERS OF. Rein-erz is a small town in Silesia, three German miles from Glatz. The waters are acidulous ephal-bentes. The principal springs are the tepid drinking spring, the cold spring, and three bath-ing springs.

REINFORCEMENT, FASCICULUS OF, F. *Cuneatus*. A band of fibres from the *corpus in-uminatum*, or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious sub-stance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which its seems to derive new fibres.

REINS, Kidneys, Lumbi.

REJECTIO, *Anagoge*, from *rejicere*, *rejectum*, (*re*, and *jacere*, 'to cast,') 'to cast back.' Every excretion by the mouth, — spitting, expectoration, regurgitation, or vomiting.

REJECTIO SANGUINIS E PULMONIBUS, Hæmo-lysis.

REJUVENESCENCE, *Rejuvenescencia*, from *re*, 'again,' and *juvenescens*, 'growing young;' (*juvenis*, 'a youth'.) A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

RELACHANT, Relaxant.

RELACHEMENT, Relaxation.

RELAPSE, *Hypotrophè*, *Epistrophè*, *Hypotrophè*, *Morbi recidiva*, *Hypotropiasmus*, from *re*, 'again,' and *labor, lapsus*, 'I fall down.' The return of a disease, during, or shortly after, con-valescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidivus*) for the return of a complaint, at a greater or less period after the complete recovery of health.

The terms *Relapsing fever*, *Short fever*, *Five-day fever*, *Seven-day fever*, *Bilious Remittent fever*, *Remitting Icteric fever*, and *Mild Yellow fever*, (F.) *Fievre à rechute*, have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and was generally attended with icteric symptoms. The main phenomena disap-peared at about the end of a week; but in many cases a relapse occurred about the end of a fort-night. Few died of the affection.

RELAPSING FEVER, see Relapse.

RELATIO, *Rapport*.

RELATION, FUNCTIONS OF, see Function.

RELAXANT, *Laxans*, *Molleticum*, *Chalasti-cum*, *Parveticum*, (F.) *Relâchant*, from *re*, and *lazare*, 'to loosen.' A medicine which diminishes

the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATIO CORDIS ET ARTERIARUM, Diastole.

RELAXATION, *Relaxatio*. Same etymon. *Chalastis*, *Chalastinos*, (F) *Relâchement*. In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

RELÈVE-PAUPIÈRE. An instrument for raising the eyelid.

RELEVEUR DE L'ANUS. Levator ani — *r. de la Lèvre inférieure*, Levator labii inferioris — *r. du Menton*, Levator labii inferioris — *r. de l'Omoplate*, Levator scapulæ — *r. de la Prostata*, Levator prostatae — *r. de l'Urèthre*, Levator ure-thræ.

RELIGIOUS DISEASES, (F.) *Maladies reli-gieuses*. Diseases affecting the nervous system, and arising from the excitement of religious emo-tions. See *Convulsionnaire*.

RELIQUAT, (F.) The remnant or remains of a disease.

REMAK FIBRES, see Fibres, Remak.

REMANSIO MENSIIUM, Amenorrhœa.

REMÈDE, Clyster, Medicament — *r. du Capuchin*, Liquor hydrargyri nitrici — *r. de Durande*, Liquor anodynus terebinthinatus — *r. du Duc d'Antin*, Liquor hydrargyri nitrici.

REMEDIAL, Medicinal.

REMEDiate, Medicinal.

REMEDILESS, Incurable.

REMEDIIUM, Juvars, Medicament — *r. Den-tificium*, Dentifrice.

REMEDY, Medicament — *r. English*, Cinchona.

REMISSIO, Deeline, Remission — *r. Cordis et Arteriarum*, Diastole — *r. Morbi*, Remission — *r. Virium*, Atony.

REMIS'SION, *Remis'sio*, *Epan'esis*, *An'esis*, *Submis'sio*, *Aph'esis*, *En'dosis*, *Meio'sis*, from *re-mittere*, (*re*, and *mittere*, *missum*, 'to send'), 'to relax.' In a more extensive signification, a temporary diminution of the symptoms of a dis-ease, either acute or chronic, *Remis'sio morbi*. Diminution in the febrile symptoms, such as occurs in a remittent fever between the exacer-bations.

REMETIC, Medicament.

REMITTENS ICTERODES, Fever, yellow.

REMITTENT, *Remit'tens*. Same etymon. Any disease which presents *remissions*.

REMITTENT OF CHILDREN, Fever, infantile remit-tent.

REMITTENT FEVER, *Febris remit'tens*, *Epan'e-tus*, *Exac'erbatum*, *paroxysmal*, *sub-continual*, *endem'ic*, *endem'ial* or *endem'ical fever*, (F.) *Fievre rémittente*, is one which strikingly exacerbates and remits, but without intermission. The ordi-nary bilious fever of the United States is a simple remittent — *Epanetus mitis*, (F.) *Fievre rémittente simple*.

REMITTENT FEVER, BILIOUS, Remittent fever, see Relapse.

REMITTING ICTERIC FEVER, see Relapse.

REM'ORA, from *remorari*, (*re*, and *mora*, 'de-lay,') 'to arrest.' Stoppage, stagnation, — as of blood. Also, the name of two surgical instru-ments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hibbani*, (F.) *Arrêt d'Hibban*, *Echene'is*, was employed to maintain fractures and luxations reduced. It is not now used.

REMORA ARATRI, *Ononis spinosa*.

REN, Kidney.

RENAL, *Renalis*, from *Ren*, 'the kidney.' That which relates to the kidney.

RENAL ARTERIES, *Emulg'ent Arteries*, are very large and short, and commonly two in number—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

RENAL CAPSULE, Capsule, renal—r. Nerve, see Splanchic Nerves.

RENAL PLEXUSES, *Emulg'ent Plexuses*. These are two:—one on each side. They proceed from fasciculi of the solar and cœliac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENAL VEINS, *Emulgent Veins*. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCHUS, Snoring, Stertor.

REN'ULUS, *Renic'ulus*, *Ren'ulus*, diminutive of *Ren*, 'a kidney.' A small kidney. A lobe of the kidney.

RENDLES, Rennet.

RENEAL'MIA EXALTA'TA, *Alpin'ia exaltata* seu *tubulata*. A plant of British Guiana, which is possessed of diaphoretic and diuretic properties; and, in large doses, is emetic. It is much used there in dropsy, rheumatism, dysentery, &c. The bruised rhizoma is the part employed.

RENES SUCCENTURIATI, Capsules, renal.

RENICULUS, Renculus.

RENIFORM, Nephroid.

RENNES, MINERAL WATERS OF. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature 103 to 121°, of Fahr.

RENNET, *Rennet*, *Coag'ulum*, *πυρία*, *πυρία*, *Pytia*, *Pyet'ia*, from (G.) *gerinnen*, 'to coagulate' [?], (F.) *Caille-lait*. When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion—*Rennet*, *Rendles*, *Ronning*, (Prov.) *Earning*, *Preaser*, *Read*, *Running*, *Steep*—is added to milk.

RENNET WHEY, see Serum lactis.

RENONCULE, *Ranunculus*—r. *Bulbouse*, *Ranunculus bulbosus*.

RENOUÉE, *Polygonum aviculare*—r. *Âcre*, *Polygonum hydropiper*.

RENOUEUR, (F.) *Rebouteur*, *Rhabilleur*, from *re*, and *nouer*, (*nodus*, 'a knot,') 'to tie or knit again.' A *bone-doctor*:—a *bone-setter*. One who makes a trade of reducing fractures and dislocations.

RENOVATIO, Ananeosis.

RENSELAERIA VIRGINICA, *Peltandra Virginica*.

RENUENS, *Rectus capitis internus minor*.

RENULUS, Renculus.

RENUM ATONIA, *Nephratonia*—r. *Paralysis*, *Nephratonia*.

RENUNCIATIO, *Rapport*.

RENVERSEMENT DE LA LANGUE, *Paraglossa*—r. *de la Matrice*, *Uterus*, inversion of the—r. *des Paupières*, *Ectropion*—r. *du Rectum*, *Proctocœle*—r. *de la Vessie*, *Exocyste*, *Extrophia* of the bladder.

RENVOIS, see *Regurgitation*,

REPANDATIO, *Lordosis*.

REPARATIO, *Restauratio*.

REPARATIVE, *Repar'atory*. Having the power of restoring or repairing.

REPELLENTIA, *Repellents*.

REPEL'LENTS, *Repellent'ia*, *Repercutient'ia*, *Apocrus'tica*, *Repercus'sives*, (F.) *Répercu'ssifs*, from *re*, and *pellere*, 'to drive.' Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

RÉPERCUSSIFS, *Repellents*.

REPERCUSSIO, *Contra-fissura*, *Repercussion*.

REPERCUS'SION, *Repercus'sio*, *Anac'lasis*, from *re*, and *percutio*, *percussum*, (*per*, and *quere*, 'to shake or batter,') 'I strike back.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence*, *Delitescen'tia*, for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect *delitescence* differs from *metastasis*: *Délitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution*. *Repercussion* also means *Ballotement*.

REPERCUSSIVES, *Repellents*.

REPERCUTIEN'TIA, *Repellents*.

REPLETION, *Fulness*, *Plethora*.

REPLI LONGITUDINAL DE LA MÉNINGE, *Falx cerebri*.

REPOSITIO, *Anaplasia*, *Reduction*, *Taxis*.

REPOUSSOIR, *Punch*—r. *d'Arêtes*, *Probang*.

REPRIMENS, *Epischematicus*.

REPRODUCTION, *Reproduc'tio*, *Regenera'tio*, from *re*, and *producere*, *productum*, (*pro*, and *ducere*.) The function by which living bodies produce bodies similar to themselves. See *Generation*. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

Species.	Age capable of engendering.	Duration of gestation.	Number of young at each birth.	Period of cessation of the function.
<i>Primates.</i>				
Man	14 years	9 months	1 to 3	At a somewhat advanced age.
Monkeys (large)	3 years	7 months	Do.	
Do. (long tailed)	2 years	6 months	Do.	
<i>Carnivora.</i>				
Bear	2 years	112 days	1 to 4	25 to 30 years.
Badger	3 to 4	20 to 25 years.
Hedgehog	1 year	1 mo. and 10 days	3 to 5	Produces during life.
Ferret	11 months	Do.	5 to 9 twice a year	
Oner	3 months	3 to 4	10 years. (?)
Pole-cat, Marten, Weasel, and Ermine, Didelphis, Opossum, and Phlander,	before 1 year	56 days	3 to 6	
Lion	2 years	3 to 4 months	3 to 4	
Tiger, Leopard, Lynx	Do.	3 months	4 to 5	
Wild Cat	before 1 year	9 weeks	3 to 4	
Wolf	2 years	56 days	4 to 6	
Dog, in the most natural state,	2 years	73 days	5 to 9	
Fox	10 months	63 days	3 to 6	
Jackall	1 year	2 months	Do.	
Isatis	Do.	5 to 8	
Phoca	63 days	6 to 7	
.....	3 months (?)	2 to 3	
<i>Rodentia.</i>				
Squirrel	1 year	45 days	3 to 4 twice a year	Produces during life.
Flying Squirrel	3 to 4	Do.
Ondatra	3 to 5	Lives 6 years.
Beaver	4 months	2 to 3	Lives 8 years.
Hare	1 year	30 days	{ 2 to 4 several } { times a year }	
Rabbit	6 months	Do.	4 to 8 do.	Lives 8 or 9 years.
Rat	Do.	5 or 6 weeks	5 to 6 do.	Produces during life.
Mouse	Do.	1 month	Do.	Do.
Marmot	6 weeks	2 to 4	Do.
Guinea Pig	5 to 6 weeks	3 weeks	5 to 8 times a year	Do.
Dormouse	1 year	3 to 5
<i>Edentata.</i>				
Armadilla	4 times a year	7 to 8 years. (?)
<i>Ruminantia.</i>				
Camel	4 years	11 months or 1 y'r	1	40 to 50 years.
Dromedary	Do.	Do.	1	Do.
Buffalo	3 years	9 months	1	15 to 18 years.
Beef	2 years	Do.	1 to 2	9 years.
Lama	3 years	Do.	12 years.
Reindeer	2 years	8 months	1	Lives 16 years.
Buck and Doe	1½ year	Do.	1 to 2	Lives 25 or 30 years.
Roebuck	Do.	5 months	Do.	Lives 12 or 15 years.
Saga (Antelope)	1 year	Do.	Do.	Lives 15 or 20 years.
Chamois and Wild Goat	Do.	Do.	1, 2, and 3	Lives 18 or 20 years.
Goat	Do.	Do.	Do.	7 years.
Musimon	1½ year	Do.	1 to 2	8 or 10 years.
Sheep	1 year	Do.	Do.	8 years.
<i>Solipedes.</i>				
Horse	2½ years	200 days	1 to 2	25 or 30 years.
Ass	Do.	Do.	Do.	Do.
Zebra	Do.	Do.	Do.	Do.
<i>Pachydermata.</i>				
Hog	9 months or 1 year	4 months	10 to 20	15 years.
Elephant	16 years (?)	9 to 11 months	1 or 2	Lives 70 years. (?)
Rhinoceros	5 years (?)	1 or 2 (?)	Lives 60 years. (?)
Hippopotamus	1
Morse	9 months	1

REPRODUCTION MÉRISMATIQUE, see Generation.
 REPULSORIUM, Punch.
 REPURGATIO, *Anacatharsis*, from *re*, and *urgare*, 'to cleanse.' According to Cestelli — purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgantia*.
 REQUIES, Acinesia.
 REQUIETIO, Acinesia.

RES CONTRA-NATURAM. 'Things against nature,' (F.) *Choses contre-nature*, are those things which tend to destroy man; — as disease, and every thing connected with it.
 RES CULINARIA, Culinary art—r. *Medica*, *Medicina*.
 RES NATURALES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURA'LES, (F.) *Choses non-naturelles*. Those things which, anciently, formed the matter of hygiene. See Non-naturals.

RES VENEREA, Coition—r. Vestiaria, Vestitus.

RÊSEA U, Rete, Reticulum—r. *Admirable*, Rete mirabile—r. *Intermédiaire*, see Corpus spongiosum urethræ—r. *Merveilleux*, Rete mirabile.

RESECTIO, Resection—r. Articulorum, see Resection.

RESECT'ION, *Resect'io*, from *resicare*, *resectum*, (*re*, and *secare*,) 'to cut off.' A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw.—*Resectio articulo'rum*, *Decapita'tio articulo'rum*.

RESECT'ION, see Amputation.

RESEDA CRISPATA—r. Luteola—r. Lanceolata—r. Luteola.

RESEDA LUTE'OLA, *R. lanceolata* seu *crispata*, *Lute'ola*, *Weld*, *Dyer's Weed*. A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, Aperient,

RESERVE AIR, see Respiration.

RÊSERVOIR DE LA BILE, Gall-bladder—r. *du Chyle*, Receptaculum chyli—r. *des Larmes*, Lachrymal sac—r. of Pecquet, Receptaculum chyli—r. *de Pecquet*, Receptaculum chyli—r. of the Thymus, see Thymus.

RESIDENTIA, Sediment.

RESIDUAL AIR, see Respiration.

RESIMUS, Camus.

RESIN, *Resi'na*, *Rheti'ne*, (F.) *Résine*. A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, ACAROID, see Xanthorrhœa—r. Botany Bay, see Xanthorrhœa—r. Cayenne, Caoutchouc—r. of New Holland, see Xanthorrhœa—r. of the Spruce fir, see Pinus abies—r. of Xanthorrhœa, see Xanthorrhœa.

RESINA, Resin—r. Abietis, see Pinus abies, Pinus picea—r. Abietis humida, see Pinus abies—r. Abietis sicca, see Pinus abies—r. Acaroides, see Xanthorrhœa—r. Alba, see Pinus sylvestris—r. Alba humida, see Pinus Abies—r. Cayennensis, Caoutchouc—r. Copal, Copal—r. Elastica, Caoutchouc—r. Flava, see Pinus sylvestris—r. Fluida Canadensis, see Pinus balsamea—r. Jalapæ, Extractum jalapæ resinosum—r. Juniperi, Sandarac—r. Laricis, see Pinus larix—r. Lentiscina, see Pistachia lentiscus—r. Liquida pini balsamea, see Pinus balsamea—r. Liquida pini laricis, see Pinus larix—r. Lutea Novi Belgii, see Xanthorrhœa—r. Nigra, Colophonia—r. Pini, see Pinus sylvestris—r. Pini empyreumatica liquida, see Pinus sylvestris—r. Pini abietis sponte concreta, see Pinus abies—r. Strobilina, see Pinus balsamea, and Pinus mughos—r. Terebinthi, see Pistachia terebinthus.

RESINA'TUM, *Rhetino'ton*. An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RÊSINE, Resin—r. *de Cayenne*, Caoutchouc—r. *Élastique*, Caoutchouc—r. *de Gaïac*, see Guaiacum—r. *Gomart*, see Bursera gummifera—r. *de Lierre*, see Hedera helix.

RESINOCE'RUM, *Rhetinoce'ron*, from *ρητιν*, 'resin,' and *κνος*, 'wax.' A mixture of resin and wax.—Galen.

RESINOSA, in Pharmacy, resinous substances.

RÊSOLUTIFS, Discutients.

RESOLUTIO, Resolution—r. Membrorum, Paralysis.

RESOLUTIO MORBI. The resolution or disappearance of a disease; especially when without any critical evacuation.

RESOLUTIO ET DIABROSIS VENTRICULI, Gastromalacia—r. Nervorum, Paralysis—r. Ventriculi autopteptic, Gastromalacia—r. Virium, Dialysis.

RESOLU'TION, *Resolut'io*, *Discus'sio*, from *resolvere*, (*re* and *solvere*, *solutum*, 'to loosen.')

Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

RÊSOLUTION DES MEMBRES, Paralysis.

RESOLVENTIA, Discutients.

RES'ONANCE, (F.) *Retentissement*, *Résonance*, *Résonnement*, from *re*, 'again,' and *sono*, 'I sound.' 'A return of sound.' A resounding; a reverberation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health,—as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchoph'ony*, from *βρογχος*, 'bronchus,' and *φωνη*, 'the voice;' (F.) *Voix bronchique*, *Voix tubaire*, *V. bourdonnante*.

Resonance is also used in the sense of resounding; as when the chest is said to be resonant on percussion.

RESONANCE, VESIC'ULO-TYMPANIT'IC, see Vesiculo tympanitic—r. Vibrations of, see Sound.

RESONITUS, Contra-fissura.

RES'ONANT, *Res'onans*, *Res'onns*, (F.) *Retentissant*, *Résonnant*. Resounding. See Resonance.

RÊSONNANCE, Resonance.

RESONNEMENT, Resonance.

RESORBENS, Absorbent.

RESORPTIO, Absorption, Resorption—r. Cutanea, see Absorption—r. Cutis, see Absorption.

RESORPTION, *Resorp'tio*, from *resorbere*, *resortum*, (*re*, 'again,' and *sorbere*,) 'to absorb again.' Absorption of a fluid which has been previously deposited in a part by the exhalants, as of pus, blood, serum, &c.

RES'PIRABLE, *Respirabilis*. Same etymon as Respiration. Capable of being breathed. Adapted for respiration.

RESPIRAMEN, Respiration.

RESPIRAMENTUM, Respiration.

RÊSPIRATEUR, Respirator, Respiratory.

RESPIRATIO, Respiration—r. Abolita, Apnœa—r. Brevis, Dyspnœa—r. Difficilis, Dyspnœa—r. Stertens, Stertor—r. Stertuosa, Stertor.

RÊSPIRATION, *Respira'tio*, *Anap'noë*, from *respiro*, (*re*, and *spiro*,) 'I take breath.' *Anapneusis*, *Pneusis spiratio*, *Respira'men*, *Respiramentum*, *Respira'tus*, *Respir'itus*, *Spir'itus*. A function proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities which belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs*. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration*. The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and

the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into *first*, the *residual air*, or that which cannot be expelled from the lungs, but remains after a full and forcible expiration, estimated at 120 cubic inches: *secondly*, the *supplementary or reserve air* or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches: *thirdly*, the *breath, tidal or breathing air*, valued at 26 cubic inches: and *fourthly*, the *complementary or complementary air*, or that which can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

RESPIRATION BRONCHIQUE, see *Murmur, respiratory*.

RESPIRATION, BRONCHO-VESICULAR. A morbid modification of the respiratory murmur, having more or less of the characters of the bronchial and the vesicular respiration combined. It denotes incomplete solidification of the lung, as from the presence of tubercle. — Flint.

RESPIRATION OF THE CELLS, *Murmur, respiratory* — *r. Cogged-wheel, Respiration, jerking* — *r. Entrecoupée, Respiration, jerking* — *r. Exagérée, see Puerile* — *r. Hypervésiculaire, see Puerile*.

RESPIRATION, JERKING, Cogged-wheel, or Wavy respiration, (F.) *R. Saccadée ou Entrecoupée*. When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculous of the lung with corresponding pleuritic adhesion. — Walshe.

RESPIRATION, LUCTUEUSE, see *Luctueux* — *r. Metallique, Tintement métallique* — *r. Nulle, see Murmur, respiratory*.

RESPIRATION PROOF, *Docimasia pulmonum*.

RESPIRATION, PUERILE, see *Puerile* — *r. Répense, see Murmur, respiratory* — *r. Rude, see Murmur, respiratory* — *r. Silencieuse, see Murmur, respiratory* — *r. Saccadée, R. jerking* — *r. Soufflante, Murmur, respiratory* — *r. Supplémentaire, see Puerile* — *r. Tubal, see Murmur, respiratory* — *r. Wavy, Respiration, jerking*.

RESPIRATOIRE, *Respiratory*.

RESPIRATOR, (F.) *Respirateur*. Same etymon. Various instruments, under this name, have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

RESPIRATORIUM VENTRIS, *Diaphragm*.

RESPIRATORIUS, *Respiratory*.

RESPIRATORY, Respiratorius, (F.) *Respirateur, Respiratoire*. Appertaining to respiration. An epithet applied to the murmur heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See *Murmur*.

RESPIRATORY, EXTERNAL, NERVE, see *Thoracic nerves*.

RESPIRATORY GANGLIA, see *Encephalon*.

RESPIRATORY, INTERNAL, NERVES, *Diaphragmatic Nerves* — *r. Nerve of the face, Facial Nerve* — *r. Superior, nerve, Spinal Nerve*.

RESPIRATORY TRACT, Tractus respiratorius. The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See *Nerves*.

RESPIRATUS, *Respiration*.

RESPIRITUS, *Respiration*.

RESSERRÉ, (VENTRE), *Constipation*.

RESTA BOVIS, *Ononis spinosa*.

RESTAGNATIO, *Eruetation*.

RESTAURANS, *Analeptic, Corroborant*.

RESTAURATIO, Rejection, Rejection, Analept'sis, Anatrept'sis, Anacomp'sis, Analept'sis, Anacomp'sis, Apocreas'tusis. Restoration of strength, after disease or great fatigue; *Epanortho'sis, Re-creatio, Redintegratio, Restaura'tio virium*. Return of the organs to their normal condition. *Recovery, Reem'p'tion, Repar'tion*.

RESTAURATIO VIRIUM, see *Restauratio*.

REST HARROW, *Ononis spinosa*.

RESTIFORMIS, from *restis*, 'a rope,' and *forma*, 'shape.' Shaped like a rope, as the 'Corpora restiformia.'

RESTIFORMIS PROCESSUS, *Coracoid*.

RESTITUTIO, *Reduction* — *r. Organica, Morio-plastic* — *r. Partium deperditarum, Morio-plastic*.

RESTLESSNESS, *Agitation*.

RESTORATION, *Restauratio*.

RESTORATIVE, *Analeptic, Corroborant*.

RESTRICTIO INTESTINI RECTI scu ANI, *Stricture of the rectum*.

RESUMPTIVUS, Resumpto'rius; from *re*, 'again,' and *sumere, sumptum*, 'to take.' Causing to resume. *Resumptivum*. Any agent calculated to restore flesh and strength to one who has been reduced.

RESUMPTORIUS, *Resumptivus*.

RESURRECTION-MAN, Resurrectionist.

RESURRECTIONIST, Resurrection-man, Body snatcher: from *re*, and *surgere, surrectum*, 'to arise.' An individual who violates the sanctuaries of the grave to obtain subjects for dissection.

RESUSCITATION, Resuscita'tio, from *resuscitare, (re, and suscitare, sursum citare seu elevare)* 'to move up,' 'to stir up anew.' *Revivification*. The restoration of persons, apparently dead, to life. See *Asphyxia* and *Suffocation*.

RETCHING, Vomiturition.

RETE, Plexus — *r. Malpighii, Corpus mucosum*.

RETÉ, 'a net,' (Reticulum, 'a small net,') Diction, (F.) Réseau. A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network.

RETÉ has also been applied to the *epiploon*. — *Castelli*.

RETÉ MAJUS, *Epiploon, gastro-colic*.

RETÉ MIRABILÉ, (F.) Réseau admirable, R. merveilleux. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

RETÉ MIRABILÉ scu RETÉ VASCULOSUM MALPIGHII is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

RETÉ MUCOSUM, Corpus mucosum.

RETÉ TESTIS, Reté Vasculosum Testis scu Halleri. An irregular plexus or network, formed by the communication of the *Vasa recta, Tubuli scu Ductuli recti*, at the upper and back part of the testicle. These *Vasa recta* are sent out at the back part of the testicle, from the convoluted seminal tubes. The *Rete Vasculosum testis* sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymus.

RETENTIO, Retention — *r. Aerea, Dyspnoea* — *r. Alvinia, Constipation* — *r. Bilis, Ischocolia*.

RETENTIO FLUXUS HÆMORRHOIDALIS. Suppression of the hæmorrhoidal flux.

RETENTIO FŒTUS, Dystocia — *r. Lactis, Ischogalactia* — *r. Lochiorum, Ischocolia* — *r. Mensium,*

see Amenorrhœa — r. Spermatis, Ischospemia — r. Sudoris, Hydroschesis.

RETEN'TION, *Retentio*, *Apolep'sia*, *Apolep'sis*, from *retinere*, *retentum*, (*re*, and *tenere*.) 'to hold back.' Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it for a short period.

RETENTION OF URINE: *Parn'ria Retentio'nis vesic'alis*, *Ischu'ria vesic'alis*, *Retentio Uri'næ*, (F.) *Rétention d'urine*. A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury*, *Strangury*, and *Ischury*. Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

RETENTISSANT, Resonant.

RETENTISSEMENT, Resonance — r. *Autophonique*, see *Autophonia*.

RETIA UTERI, see *Uterus*.

RETICULAR, *Retiform*, *Reticula'ris*, *Ret'inus*, *Amphiblestroï'des*, *Dyctoï'des*, *Retifor'mis*, from *rete*, (diminutive *reticulum*.) 'a net.' That which resembles a net. An epithet applied to many structures in the body.

RETICULAR BODY, *Corpus mucosum* — r. Substance, Cellular tissue.

RETICULARIA OFFICINALIS, *Lichen pulmonarius*.

RETICULUM: diminutive of *rete*, 'a net.' The *Bonnet* or *Honeycomb bag* or *stomach*, (Sc.) *Kingshood*, (F.) *Bonnet*, *Réseau* — the second stomach of the ruminant animal. See also, *Epiploon*, and *Rete*.

RETICULUM CUTANEUM, *Rete mucosum* — r. *Mucosum*. *Rete mucosum*.

RETIFORM, *Reticular*.

RET'INA, from *rete*, 'a net.' *Tu'nica ret'ina* seu *reticula'ris* seu *retifor'mis* seu *in'tima* seu *ver'te'a ocul'i*, *Involucrum reti comparat'um*, *Ver'ienta'ris membra'na*, *Amphiblestroï'des membra'na*, (F.) *Rétine*. A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It terminates by a defined edge — *margo dentatus* — at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of several laminae; so joined together, that it is difficult to discriminate them. The one — the innermost — is medullary, and pulpy; the other — the outer — is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

RETINACULA, see *Retinaculum* — r. *Morgagnii*, see *Fræna* of the valve of *Bauhin*.

RETINACULUM, from *retinere*, (*re*, and *tenere*.) 'to hold back.' A surgical instrument,

formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum. — *Scultet*. *Retinacula* are also band-like extensions of a cellulose-membranous structure, which seem to suspend the ovum in the *Follicle* of *De Graaf*. They appear to correspond to the *chalazæ* of the egg of the bird.

RETINACULUM, *Bride*.

RETINACULUM TEN'DINUM PERONEORUM, *Vagina malleolaris externa*. The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

RET'INAL, *Retina'lis*. Relating or appertaining to the retina.

RÉTINE, *Retina*.

RETIN'ITIS, *Inflammat'io Ret'inæ*, *Amphiblestroï'd'itis*, *Dicty'itis*, (F.) *Rétinite*, from *retina* and *itis*, a suffix denoting inflammation, — a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

RÉTINOÏDÉ, see *Rhétinolé*.

RÉTINOLÉ, see *Rhétinolé*.

RETINOSCOPY, *Retinoscop'ia*, from *retina*, and *σκοπεω*, 'I view.' Examination of the retina.

RETINUS, *Reticular*.

RETORT, *Retor'ta*, *Batia*, *Cornu*, *Cornu'ta*, *Cornes'ta*, *Cornumina*, (F.) *Cornue*, from *retorqueo*, (*re*, and *torqueo*, *tortum*.) 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain*, or have a *tubulure* for admitting substances whilst the distillation is going on. In the latter case, it is said to be *in'ulated*, (F.) *Cornue tubulée*.

RETRACTION. *Retrac'tio*, from *retrahere*, (*re*, and *trahere*, *tractum*.) 'to draw back.' State of a part, when drawn towards the centre of the body or backwards; — as retraction of the testicles. Sometimes it is used synonymously with *shortening* or *drawing up*; as in *retraction* of the thigh.

RÉTRACTION DE LA MATRICE, *Retroversio uteri*.

RETRACTOR ANGULI ORIS, *Buccinator*.

RETRAHENS AURIS, *Posterior* seu *Triceps Auris*, *Triacanda'lis*, *Retrahens Auric'ulæ* seu *Auriculam*, *Secundus propriorum Auric'ulæ*, *Bicauda'lis*, *Dep'rimens Auric'ulæ*, *Proprius Auris externæ*, (F.) *Mastoïdo-conchinien*, *Mastoïdo-oriculaire* (Ch.), *Auriculaire postérieur*. It consists of one or more small fasciculi or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

RETRAIT VENTRICULAIRE, *Heart*, hypertrophy of the.

RÉTRÉCISSEMENT. *Arctatio*, *Stricture* — r. *de l'Urèthre*, *Urthrostenosis*.

RETRIMENTA VESICÆ, *Urine*.

RETRIMENTUM, *Excrement*

RETROCESSION, *Retroces'sio*, *Retroces'sus*, *Retroges'sus*, from *retrocedere*, *retroces'sum*, (*retro*, 'backwards,' and *cedere*, 'to give place.') The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

RETROCESSUS, *Retrocession*.

RETROFLEXIO UTERI, see *Retroversio uteri*.

RETROGRESSUS, *Retrocession*.

RETROPHARYNGEAL, *Retropharynge'us*, from *retro*, 'backwards,' and *pharynx*, 'the pharynx.' Relating to parts behind the pharynx, —

as 'retropharyngeal abscess,'—an abscess behind the pharynx.

RÉTROPULSION DE LA MATRICE, Retroversio uteri

RETRO-U'TERINE, *Retro-uteri'nus*, (F.) *Rétro-utérin*, from *retro*, and *uterus*. Behind the uterus, as *retro-uterine abscess*, (F.) *Abscès rétro-utérin*; — an abscess seated behind the uterus.

RETROVACCINATION, from *retro*, 'backwards,' and *vaccination*. Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

RETROVERSIO U'TERI, (*retro*, 'backwards,' and *vertere*, *versum*, 'to turn.') *Retroversion of the Uterus*, *Ædoptois Uteri retroversio*, *Amphulixis* seu *Amphulixis Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité* ou *Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

A simple inclination, or bending of the uterus, backwards, is termed *Retroflexion of the U'terus*, *Retroflexio U'teri*; not unfrequently, however, this is used synonymously with Retroversion of the Uterus.

RÉTROVERSION DE LA MATRICE, Retroversio uteri.

REUNIO, Synthesis—r. Partium separatarum, see Synthesis — r. per Primam intentionem, see Intention — r. per Secundam intentionem, see Intention — r. Vasorum, Anastomosis.

RÉUNION PRIMITIVE, see Intention — r. *Secondaire*, see Intention.

REVACCINATION, see Vaccina.

REVALENTA ARABICA, see Erym.

RÉVASSERIE, Incoherence; see Somnium.

RÊVE, Somnium.

RÊVEIL, see Sleep—r. *en Sursaut*, see Sleep.

REVELLENT, Derivative.

RÉVERIE, Aphelxia.

REVERY, Aphelxia.

REVIVIFICATION, Resuscitation.

RÉVULSIF, Derivative.

REVULSION, *Revulsio*, from *re*, and *vellere*, *vulsum*, 'to pluck;' *Antis'pasia*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

REVULSIVE, Derivative—r. Bleeding, see Bloodletting.

REVULSORIUS, Derivative.

REX AMARORUM, *Soulamen amara*—r. *Meallorum*, *Aurum*.

REYNOLDS'S SPECIFIC, see *Vinum colchici*.

REZZLE, Wheeze.

RHACHETÆ, Rachitæ.

RHACHETRUM, *Medulla spinalis*.

RHACHLEI, Rachitæ.

RHACHIIAGRA, *Rachisagra*.

RHACHIALGIA, *Rachialgia*, *Rhachiodynia*, Spinal irritation.

RHACHIALGITIS, Spinal irritation, Myelitis.

RHACHIDAGRA, *Rachisagra*, *Rachialgia*, *Rhachiodynia*.

RHACHIOCYPHOSIS, *Gibbositas*.

RHACHIODYN'IA, from *ραχis*, 'the vertebral column,' and *οδυνη*, 'pain;' *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, Myelitis.

RHACHIOPLEGIA, Paraplegia.

RHACHIOSCOLIOMA, Scoliosis.

RHACHIOSCOLIOSIS, Scoliosis.

RHACHIOSTROPHO'SIS, from *ραχis*, 'the vertebral column,' and *στροφω*, 'I turn;' *Contortio column'aræ vertebral'is*. Deviation of the vertebral column.

RHACHIOT'OMUS, *Rhachiot'omum*, from *ραχis*, 'the vertebral column,' and *τομη*, 'incision.' An instrument for opening the vertebral column.

RHACHIPA'GIA, *Rachipa'gia*, from *ραχis*, 'the spine,' and *παγω*, 'I fasten.' A monstrous union of two fetuses, in which they are connected at the spine.

RHACHIPARALYSIS, Paraplegia.

RHACHIPHYMA, *Rachiphyma*.

RHACHIRRIHEUMA, *Lumbago*.

RHACHIS, Vertebral column—r. *Nasi*, see *Nasus*.

RHACHISAGRA, *Rachisagra*.

RHACHITÆ, from *ραχισ*, appertaining or relating to *ραχis*, 'the vertebral column;' *Rhachitæ's*, *Rachitæ*, *Rhachitæ*, or *Rachitæ's*. The muscles of the spine.

RHACHITES, *Medulla spinalis*.

RHACHITICUS, *Rachiticus*.

RHACHITIS, *Rachitis*—r. *Adultorum*, *Mollities ossium*—r. *Spinalis*, *Rachisagra*.

RHACHITISMUS, *Rachitis*.

RHACHIOSIS, *Rachosis*.

RHACHUS, *Rhucus*, *Rhagus*, from *παγω*, or *πηγνυμι*, 'to break.' A wrinkle. A laceration of the skin. A lacerated ulcer—*ulcus lac'erum*.

RHACUS, *Rhachus*, *Wrinkle*.

RHÆBOCRANIA, *Torticollis*.

RHAGADES, *ραγιδες*, *Rhagad'ia*, from *παγω* or *πηγνυμι*, 'to break or rend;' *Scissur'ar. Fissur'ar. Fimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see *Fissure*.

RHAGÉ, *Ragé*, *ραγν*. Same etymon. A suffix denoting violent rupture or discharge, as in *Hemorrhage*, *Menorrhagia*, &c.

RHAGE, *L'issure*.

RHAGES. *Uvæ passæ.*

RHAGICUS, *Rhagoides.*

RHAGODEITIS, *Uveitis.*

RHAGOÏDES, *Rhagoïdes, Rhagoïdeus, Rha-*
gicus, from 'ράξ, 'payos, 'a berry,' 'a grape.'
Grape-like; as *Tunica Rhagoides*: the uvea.
Also, the choroid coat of the eye.

RHAGUS, *Rhachus, Wrinkle.*

RHAMNI BACCÆ, see *Rhamnus*—*r. Succus*,
see *Rhamnus*.

RHAMNUS, 'ραμνος, *R. catharticus, Spina*
cervi'na seu domes'tica seu infecto'ria, Rhamnus
solutivus, Cervispi'na, Buckthorn, Pringig buck-
thorn, (F.) *Nerprun purgatif, Bourgnépine,*
Épine de cerf. Family, Rhamnaceæ. Sex. Syst.
Pentandria Monogynia. The berries—*Rhamni*
Baccæ—have a faint and disagreeable odour; and
bitterish, nauseous taste. Their juice—*Rhamni*
Succus—is cathartic, and apt to excite griping,
which must be obviated by the use of diluents.

RHAMNUS ALATERNUS, *R. Hispan'icus, Alater-*
nus latifolius, Common alaternus, (F.) *Alaterne*.
The leaves have been used as detergents and as-
tringents, in the form of gargle especially.

RHAMNUS FRANGULA, *Black Alder, Frangula*
Alnus, Alnus Nigra, (F.) *Aune noir, Bour-lane,*
Bourgene. All the parts of this tree, as well as
of the common alder, are astringent and bitter.
The bark is most so. The inner, yellow bark of
the trunk or root acts as a cathartic. It has also
been employed as an anthelmintic.

RHAMNUS HISPANICUS, *R. alaternus*—*r. Jujuba*,
see *Jujube*—*r. Lotus*, see *Jujube*—*r. Ziziphus*, see
Jujube.

RHANTER, *Canthus*, (greater.)

RHAPHANEDON, *Raphanedon*.

RHAPHANIA, *Raphania*.

RHAPHANIS, *Raphanus hortensis*.

RHAPHANUS, *Raphanus hortensis*.

RHAPHIE, *Raphe, Suture.*

RHAPHOSYMPHYSIS, from ραφή, 'suture,'
and συμφύσις, 'union.' Union by suture,—as of
the bones of the cranium.

RHAPHYS, *Raphanus hortensis*.

RHAPONTICUM, *Rheum Rhaponticum*—*r.*
Vulgare, Centaurea centaurium.

RHAPONTIQUE, *Rheum rhaponticum*.

RHAPS, *Raphanus hortensis*.

RHAPYS, *Raphanus hortensis*.

RHATANTA, *Krameria ratanhia*.

RHAX, see *Vitis vinifera*.

RHEGE, *Cramp, Contusion, Laceration.*

RHEGMA, *Cramp, Contusion, Laceration,*

Rhexis—*r. Ligamentare, Apospasmus.*

RHEGMUS, *Cramp, Contusion, Laceration.*

RHEMBASMUS, *Somnambulism.*

RHEMBĒ, *Rhembus*, 'a wandering about,'
from 'ρεμβειν, 'to wander about.' Irregularity in
the return of febrile paroxysms.

RHEMBUS, *Rhembe*.

RHENCHUS, *Rattle, Snoring.*

RHENNIS, *Rattle, Snoring.*

RHEON, *Rheum.*

RHETINE, *Resin.*

RHETINOCERON, *Resinatum.*

RHÉTINOLÉ. A name given by M. Béral
to a medicine, which results from the union of a
resin with other medicinal substances. The
Rhétinolés of Béral differ from the *Rhétinoïdes*
in containing but one resin, whilst in the latter
there are several.

RHÉTINOÏDES, see *Rhétinolé*.

RHETINOTON, *Resinatum.*

RHEUM, (pronounced *room*.) *Rheu'ma, ρευμα,*
(F.) *Rhume*; from 'ρεω, 'to flow.' Any thin
watery discharge from mucous membranes or
skin; as the thin discharge from the air passages
arising from cold.

RHEUM, SALT. A popular name in the United
States, like 'tetter,' for various cutaneous affec-
tions of the eczematous and herpetic forms more
especially. It is at times applied to a kind of
chronic psoriasis; and likewise to cutaneous af-
fections in those who immerse the hands in met-
allic or acid solutions. Webster defines it "a
vague and indefinite popular name, applied to
almost all the non-febrile cutaneous eruptions
which are common among adults, except ring-
worm and itch."

RHEUM, *Rhabarbarum, Rheon, Rha, Rheum,*
Lap'atham orientalē seu Chinen'se, Rhubar'ba-
rum ve'rum seu Tartar'icum seu Siber'icum seu
Tur'icum, Rhubarb, (F.) *Rhabarbe, Rhubarbe*.
From *Rha*, now called *Volga*, a river in Russia
from which it was first brought. *Ord. Poly-*
gonaceæ. Sex. Syst. Enneandria Trigynia. The
root—*Rheum*—is the part used in medicine. Its
odour is aromatic, peculiar, and rather nauseous;
taste, somewhat aromatic, subacid, bitterish, and
astringent. It colours the saliva and the urine
yellow. It is easily pulverized, and forms a pow-
der of a bright buff-yellow colour. Both water
and spirit extract its virtues. *Rhubarb* root is
purgative, stomachic and astringent. [?] It is
chiefly used for the properties first mentioned.
Externally, the powder is sometimes sprinkled
over ulcers, to assist their granulation. Dose, ℞j
to ℥ss of the powder. In a smaller dose, it is
stomachic.

Numerous species of *Rheum*, *Rh. palmatum,*
Rh. undulatum, and *Rh. compactum*, have purga-
tive roots.

The rhubarbs most used in the United States
are the *Chinese or India Rhubarb*—*Rheum Si-*
nen'se seu In'dicum; the *Russian, Turkey or Ba-*
charian Rhubarb—*Rheum Rus'sicum seu Tur'ci-*
cum; and *European Rhubarb*.

RHEUM COMPACTUM, *Rheum*—*r. Indicum*, see
Rheum—*r. Palmatum, Rheum*.

RHEUM RHAPON'TICUM, *Rhapontic Rhubarb*;
Rhaponticum, Rhabarbarum Dioscor'idis seu
Antiquo'rum, (F.) *Rhapontique, Rhapontic, Ra-*
pontic. The root of this seems to have been the
rhubarb of the ancients. It is more astringent
than that of the *rheum palmatum*, and less pur-
gative; for the latter purpose, two or three
drachms being required for a dose. *French, Ra-*
pontic, or *Krimea Rhubarb*, is obtained from this
species, as well as from *Rh. undulatum*, and *Rh.*
compactum.

RHEUM RUSSICUM, see *Rheum*—*r. Sinense*, see
Rheum—*r. Turcicum*, see *Rheum*—*r. Undulatum*,
see *Rheum*.

RHEUMA, *Catarrh, Diarrhœa, Rheum, Rheu-*
matism. Also, inflammation of a fibrous tissue,
as in *rheumatism* and *gout*.—*Fuchs*.

RHEUMA CATARRHALE, *Bronchitis, (chronic)*
—*r. Epidemicum, Bronchitis, chronic, Catarrh,*
epidemic—*r. Pectoris, Catarrh*—*r. Uteri, Leu-*
orrhœa.

RHEUMAPYRA, *Rheumatism, acute.*

RHEUMARTHITIS, see *Rheumatism, acute.*

RHEUMARTHROSIS, see *Rheumatism, acute.*

RHEUMATALGIA, *Rheumatism, chronic*—*r.*
Arthritica, see *Rheumatism, acute.*

RHEUMATIC, *Rheumat'icus, Rheumatis'mal,*
(F.) *Rhumatismal, Rhumatique*. Belonging to
rheumatism; as *rheumatic fever*. Also, applied to
one affected with *rheumatism*; (F.) *Rhumatisant*.

RHEUMATIC DIATHESIS, *Diath'esis rheumat'-*
ica. The special condition of the body that gives
occasion to *rheumatism*. It may exist without
presenting the usual phenomena in the joints;
whilst the heart may be seriously affected.

RHEUMATICS, *Rheumatism*.

RHEUMATISM, *Catarrha'ea* from 'ρευμα,
'*ρευματος*, 'a defluxion, catarrh.' *Dolor Rheumat-*

icus et arthriticens, (Hoffman,) *Rheumatosis Myositis*, *Rheuma*, *Myodynism*, (vulg.) *Rheumatiz*, *Rheumatice*, (F.) *Rheumatisme*. A kind of shifting phlegmasia or neuralgia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular*, *Articular*, and *Synovial*, which have been applied to it. The disease may be *acuta*, or *chronica*.

RHEUMATISM OF THE ABDOMEN, *Cœliorrhœuma*.

RHEUMATISM, ACUTE, *Rheumatismus acutus seu articulorum acutus seu universalis febrilis seu inflammatorius seu hyperthemicus*, *Arthrosia acuta*, *Rheumatopyra*, *Rheumap'gra*, *Febris rheumatica inflammatoria*, *Synocha rheumatica*, *Myositis*, *Myitis*, *Cænna* seu *Arthritis rheumatismus*, *Arthro-rheumatismus*, *Synovitis rheumatialis*, *Hæmo-arthritis*, *Rheumatic Fever*, (F.) *Rheumatisme aigu*, *Rh. articulaire aigu*, *Fidère rhumatismale*, usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease (*metastatic rheumatism*) to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in *chronic*; they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet. At times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthritic rheumatism* or *Rheumatic gout*, *Rheumatologia arthritica*, *Rheumarthrosia*, *Rheumarthritis*, *Arthritis rheumatica seu juvenilis*.

RHEUMATISM OF THE ARM, *Brachiorrhœuma*—*r. Arthritic*, see *Rheumatism*, acute—*r. of the Bladder*, *Cystorrhœuma*—*r. of the Bowels*, *Enterorrhœuma*.

RHEUMATISM, CAP'SULAR, *Rheumatismus capsularis*, Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised

by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

RHEUMATISM OF THE CHEST, *Pleurodynia*.

RHEUMATISM, CHRONIC, *Arthrosia chronica*, *Rheumatismus chronicus seu nonfebrilis seu vulgariis seu inveteratus seu habitualis seu frigidus*, *Rheumatologia*, *Rheumatologia*, *Rheumatodynia*, *Arthrodynia*, *Arthritis arthrodynia*, (F.) *Rheumatisme chronique*, *Rheumatologie*. is attended with pains in the hips, shoulders, knees, and other large joints. These are at times confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

RHEUMATISM OF THE EXTREMITIES, *Acorrhœuma*—*r. of the Face*, *Prosoporrhœuma*—*r. Gouty*, see *Rheumatism*, acute—*r. of the Heart*, *Cardiorrhœuma*—*r. Lead*, see *Lead rheumatism*—*r. of the Leg*, *Scelorrhœuma*—*r. of a Limb*, *Merorrhœuma*—*r. Local*, *Merorrhœuma*—*r. of the Loins*, *Lumbago*—*r. Metastatic*, see *Rh. acute*—*r. of the Neck*, *Torticollis*—*r. Partial*, *Merorrhœuma*.

RHEUMATISM, PREABDOMINAL. (F.) *Rheumatisme pré-abdominal*. Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Gênest and Requin to be the same as the *nervous affection of the peritoneum* of Goech.

RHEUMATISM ROOT, *Jeffersonia Bartoni*.

RHEUMATISM OF THE SKIN, see *Dermalgia*—*r. Topical*, *Merorrhœuma*—*r. of the Uterus*, *Metorrhœuma*.

RHEUMATISM, VISCERAL. Rheumatism affecting the muscular or fibrous tissues of the viscera.

RHEUMATISM WEED, *Pyrola maculata*, P. umbellata.

RHEUMATISMAL, *Rheumatic*.

RHEUMATISMUS ABDOMINIS, *Coeliorrhœuma*—*r. Acutus*, *Rheumatism*, acute—*r. Articulorum acutus*, *Rheumatism*, acute—*r. Brachii*, *Brachiorrhœuma*—*r. Cancrosus*, *Neuralgia faciei*—*r. Cervicis*, *Torticollis*—*r. Colli*, *Torticollis*—*r. Cordis*, *Cardiorrhœuma*—*r. Cruris*, *Scelorrhœuma*—*r. Dorsalis*, *Lumbago*—*r. Extremitatum*, *Acorrhœuma*—*r. Faciei*, *Prosoporrhœuma*—*r. Febrilis*, *Dengue*—*r. Inflammatorius seu hypersthenicus*, *Rheumatismus acutus*—*r. Intestinalium*, *Enterorrhœuma*—*r. Intestinalium cum ulcere*, *Dysentery*—*r. Larvatus*, *Neuralgia faciei*—*r. Localis*, *Merorrhœuma*—*r. Memborum singularium*, *Merorrhœuma*—*r. Non febrilis*, *Rheumatism*, acute—*r. Partialis*, *Merorrhœuma*—*r. Pectoris*, *Pleurodynia*—*r. Phlegmonodes*, *Myositis*—*r. Spurius nervosus*, *Neuralgia*—*r. Universalis febrilis*, *Rheumatism*, acute—*r. Uteri*, *Metorrhœuma*—*r. Vesicæ urinariæ*, *Cystorrhœuma*—*r. Vulgaris seu inveteratus seu habitualis seu frigidus*, *Rheumatism*, chronic.

RHEUMATIZ, *Rheumatism*.

RHEUMATODYNIA, *Rheumatism*, chronic.

RHEUMATOPHTHALMIA, *Rheumophthalmia*; from *ὀφθαλμία*, *ophthalmos*, 'rheumatism,' and *ὀφθαλμία*, 'inflammation of the eyes.' *Rheumatic ophthalmia*.

RHEUMATOPYRA, Rheumatism, acute.
 RHEUMATOSIS, Rheumatism.
 RHEUMOPHTHALMIA, Rheumatophthalmia, Scleritis.
 RHEXIS, ῥηξις, *Rhagma*, *Diruptio*, *Ruptio*, *Ruptura*, *Rupture*. From ῥηγγνυμι, 'to break.' Rupture of a vessel or organ. Spontaneous opening of an abscess.
 RHEXIS OCULI. Bursting of the eye from any cause; spontaneous or excited.
 RHICNOSIS, from ῥικνοσμαι, 'to become wrinkled;' *Cutis corrugatio*. Wrinkling of the skin from extenuation of the body; opposed to *εγκαυσις*, or distension from repletion.
 RHIGOS, Rigor.
 RHIN, Nasus.
 RHINAL'GIA, *Rhinodyn'ia*, from ῥιν, 'the nose,' and *αλγος*, 'pain.' Pain in the nose.
 RHINAL'GIA AB INTRU'SIS. Pain in the nose from foreign bodies.
 RHINAL'GIA VERMINO'SA. Pain in the nose from worms.
 RHINAN'CHONĒ, *Rhinan'gia*, *Rhinostegnos'is*; from ῥιν, 'the nose,' and *αγγωνη*, 'narrowness.' Contraction of the nose. Snuffles.
 RHINANGIA, Rhinanchone, Snuffles.
 RHINCHOS, Rostrum.
 RHINENCEPHALIA, Cyclopia.
 RHINEN'CHYSIS, *Rhinenchys'ia*, from ῥιν, 'the nose,' *εν*, 'in,' and *χυσις*, 'I pour.' An infusion or injection, made into the nostrils, with a syringe called *Rhinen'chites*.
 RHINES, Nares.
 RHINITIS, *Nasi'tis*, from ῥιν, ῥινος, 'the nose,' and *ιτις*, denoting inflammation. Inflammation of the nose. Coryza.
 RHINITIS ULCEROSA, Ozaena.
 RHINOBLENNORRHŒA, Rhinorrhœa.
 RHINOCACĒ, *Coryza scarlatino'sa*; from ῥιν, ῥινος, 'the nose,' and *κακος*, 'evil.' The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane, that accompany the worst forms of scarlatina.
 RHINOCATARRHIUS, Coryza.
 RHINOCNES'MUS, from ῥιν, ῥινος, 'the nose,' and *κνησμος*, 'itching.' Itching of the nose.
 RHINODYNIA, Rhinalgia.
 RHINOPHONIA, from ῥιν, ῥινος, 'the nose,' and *φωνη*, 'the voice.' A nasal voice, called, also, *Dyspho'nia immodulata nasalis*, *Porapho'nia nasalis* seu *res'onans*, *Psellis'onus nasitas*, *Mycteropho'nia*, *Na'sitas*, *Vox* seu *Paralalia nasalis*. Speaking through the nose.
 RHINOPLAS'TIC, *Rhinoplast'ica* (ars) *Rhinoplasty*, from ῥιν, ῥινος, 'the nose,' and *πλασσω*, 'I form.' An epithet applied to the operation for forming a new nose. The *Taliacotian operation*, so called because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.
 RHINOP'TIA, from ῥιν, 'the nose,' and *οπτομαι*, 'I see.' The act of seeing over the nose. Squinting over the nose.
 RHINORRHAGIA, Epistaxis.
 RHINOR'RHAPHY, *Rhinorrhaph'ia*, from ῥιν, ῥινος, 'nose,' and *ραφη*, 'a suture.' An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, removing it, and bringing together the edges of the wound by harelip suture.
 RHINORRHŒA, *Rhinoenorrhœa*, from ῥιν, ῥινος, 'the nose,' and ῥεω, 'I flow.' A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

RHINO'SIS, from ῥινος, 'a skin, leather,' or from *ρινος*, 'rugous.' The state of looseness and excess of skin observed in phthisis.—Vogel.
 RHINOSTEGNOSIS, Rhinanchone.
 RHIPTASMOS, Jactation.
 RHIPTOLUSIA, Affusion.
 RHIS, Nasus.
 RHIZA, Radix.
 RHIZAGRA, Punch.
 RHIZO'MA, *Rhizome*, from ῥιζα, 'a root.' The part of the root of a plant, which consists of wood or flesh, as in the carrot.
 RHIZOPH'AGUS, from ῥιζα, 'a root,' and *φαγω*, 'I eat.' One who lives on roots.
 RHIZOTOMIST, see Simplex.
 RHIZOTOMUS, Apothecary.
 RHOA, Punica granatum.
 RHODELĒ'ON, *Oleum rosa'rum*. Oil of roses, or oil impregnated with roses.
 RHO'DIA, *Rhodi'ola ro'sea*, *Rosea*, *Rosewort*, (F.) *Rhodiola*, from ῥοδον, 'a rose,' owing to its odour. *Scr. Syst.* Diœcia Octandria. The root, *Roseroot*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.
 RHO'DINUS, ῥοδίνος, *Rho'dius*, *Rosa'ceus*, *Ro'seus*, *Rosa'tus*, (F.) *Rosat*, *Rosy*. Formed of, or containing, roses.
 RHODIOLA ROSEA, Rhodia.
 RHODIOLE, Rhodia.
 RHODITES VINUM. Wine in which roses have been macerated.
 RHODIUM LIGNUM, *Rhodium* or *Rosewood*, from ῥοδον, 'a rose.' The wood or root of a tree supposed to be *Genista Canariensis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. *Ord.* Leguminosæ. *Scr. Syst.* Diadelphica Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.
 RHODIUS, Rhodius.
 RHODODAPHNE, Nerium oleander.
 RHODODAPHNIS, Nerium oleander.
 RHODODEN'DRON CHRYSAN'THEMUM, *R. chrysan'thum* seu *aur'eum* seu *officina'le*, *Oleander*, *Rose-bay*, *Yellow rhododendrum*, *Mountain Laurel*, (F.) *Rosage*, *R. chrysanthe*, *Rose de Sibérie*, from ῥοδον, 'a rose,' and *δενδρον*, 'a tree.' *Nat. Ord.* Ericacæ. *Scr. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.
 RHODODEN'DRON MAX'IMUM, *Great Laurel*, *American Rose-bay*. An indigenous shrub, *Ord.* Ericacæ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.
 RHODODENDRON PUNCTATUM. Indigenous; has similar properties.
 RHODOM'ELA PALMA'TA, (ῥοδον, 'a rose,' and *μελι*, 'honey,') *Dulse*, *Saccharine Fucus*. One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.
 RHODOMELI, Mel rosæ.
 RHODON, Rosa, Rosa centifolia.
 RHODOSACCHARUM, Confectio rosæ gallicæ.
 RHODOSTACTON, Mel rosæ.
 RHODOSTAGMA, Aqua rosæ.
 RHŒA, Punica granatum.
 RHŒAS, see Papaver rhœas.
 RHOEBDESIS, Absorption.
 RHEUM, Rheum.
 RHOGMOS, Rattle.
 RHOITES, ῥοιτης, a wine impregnated with the pomegranate; from ῥοα, the *Pomegranate*, — Dioscorides. A confection, made by boiling the

juice of the pomegranate in honey. — Paulus of Ægina.

RHOMBOÏDEUS, from 'ῥομβος, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboides major* and *minor*, *Rhomboides, Cervici-dorso-scapulaire*. A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboides major* and *Rh. minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotatory motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

RHOMBOS, 'ῥομβος. A bandage mentioned by Galen, so called on account of its rhomboidal shape.

RHONCHAL, *Rhoncha'lia*, from *rhonchus*, 'rattle.' Relating or appertaining to rhonchus; — as 'rhonchal fluctuation,' the fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi. — Walshe.

RHONCHUS, Rattle, Snoring, Stertor — r. Cavernous, see Gurgling — r. Cavernulous, see Gurgling.

RHONCHUS, CLICKING. A rhonchus which has been considered positively indicative of the existence of tubercles in the lungs. [?]

RHONCHUS, CREPITANS, *Râle crépitaunt* — r. Crepitans Redux, see Crepitant — r. Mucous, see *Râle muqueux* — r. Sibillans, see *Râle crépitaunt* — r. Sibilus, *Râle sibilant* — r. Sonorus, *Râle sonore* — r. Suberepitaunt, see *Râle muqueux*.

RHOPALISMUS, Priapismus.

RHOPALOSIS, Plica, Pupil, Uvea.

RHOPE, Congestion.

RHOTACISMUS, Rotacism.

RHUBARB, Rheum — r. Chinese, see Rheum — r. French, Rheum Rhaponticum — r. India, see Rheum — r. Krimea, Rheum Rhaponticum — r. Monk's, Rumex Alpinus, Rumex patientia — r. Poor man's, Thalictron — r. Rhapontic, Rheum Rhaponticum — r. Russia, see Rheum — r. Turkey, see Rheum — r. Wild, Convolvulus panduratus.

RHUBARBE, Rheum — r. *Fausse*, Thalictron — r. *des Indes*, Convolvulus mechoacan — r. *des Paneres*, Thalictron — r. *Sauvage*, Rumex patientia.

RHUE, Ruta.

RHUM, Rum.

RHUMAPYRA, Rheumatism, acute.

RHUMATALGIA, Rheumatism, chronic.

RHUMATLGIE, Rheumatism, chronic.

RHUMATIQUE, Rheumatic.

RHUMATISANT, Rheumatic.

RHUMATISMAL, Rheumatic.

RHUMATISME, Rheumatism — r. *Aigu*, Rheumatism, acute — r. *Articulaire aigu*, Rheumatism, acute — r. *Chronique*, Rheumatism, chronic — r. *Præabdominale*, Rheumatism, præabdominal — r. *d. l'Utérus*, Metrorrhœma.

RHUME, Rheum — r. *de Cerveau*, Coryza — r. *de Poitrine*, Catarrh.

RHUS COPALLINA, see *Rhus glabra*.

RHUS CORIARIA, *Adriaou*, *Sumach*, *Shn mach*, *Elm-leaved Sumach*, (F.) *Sumac des Corroyeurs*, *Rouze*. Ord. Anacardiaceæ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus *rhus* that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRA, 'Smooth Sumach.' Indige-

nous, and official in the Pharmacopœia of the United States. An infusion of the fruit — *Rhus glabra* [?] — which is acid and astringent, has been used as a cooling drink, and as a gargle. An infusion of the inner bark of the root has been recommended in mercurial ptyalism.

RHUS RADICANS, *R. vernix*, *Poison vine* (America). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis, and other nervous affections.

RHUS SYLVESTRIS, *Myrica* gale.

RHUS TYPHINA, *Stag's horn Sumach*, and **RHUS COPALLINA**, *Moutain Sumach*, have similar properties.

RHUS TOXICODENDRON, *Toxicodendron*, *Poison Oak* (America), (F.) *Sumac vérucaux*. This plant has been used in paralytic affections and cutaneous eruptions. It is poisonous, like the last. Dose, gr. ss. to gr. iv.

RHUS TYPHINA, see *Rhus glabra*.

RHUS VENENATA, *Poison Sumach*, and **RHUS COPALLINA**, have similar properties.

RHUS VERNIX, *Rh. radicans*.

RHYAS, from 'ῥω, 'I flow.' An ulceration of the lachrymal caruncle, with a constant flow of tears. — Blancard.

RHYPARIA, *Rupia*, *Sordes primarum viarum*.

RHYPIA, *Rupia*.

RHYPOS, *Sordes*.

RHYPTICA, *Detergents*.

RHYPTICUS, *Abstergent*.

RHYSSIS, *Flux*.

RHYSMUS, *Rhythm*.

RHYSSEMA, *Wrinkle*.

RHYTHM, *Rhythmus*, 'ῥυθμος, *Rhysmus*, (F.) *Rhythme*, 'measured movement.' The order of proportion, as regards time, which reigns between the different movements of an organ — as of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse; and to the paroxysmal movements of an intermittent.

RHYTHMICAL, *Periodical*.

RHYTHMICAL CONTRACTIONS OF MUSCLES are those that succeed one another after regular intervals.

RHYTHMUS, *Rhythm*.

RHYTIDOSIS, *Rutidosis*.

RIB, *Costa* — r. *False*, see *Costa* — r. *Floating*, see *Costa* — r. *Sternal*, see *Costa* — r. *True*, see *Costa*.

RIBES GROSSULARIA, *R. uva crispa*.

RIBES NIGRUM, *R. olidum*, *Grossularia nigra*, *Cassis*, *Black Currant*, *Gazel*, (F.) *Groseillier noir*. Ord. Grossulariæ. *Sex. Syst.* Pentandria Monogynia. The berries — *Black currants* — have been recommended in sore-throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES OLIDUM, *R. nigrum* — r. *Officinale*, *R. rubrum*.

RIBES RUBRUM, *R. officinale* seu *vulgarè*, *Grossularia non spiuosa* seu *rabra*, *Red currant*, (F.) *Groseillier rouge*; of which the *White* is only a variety. It is cultivated, and affords an agreeable fruit — *Red currants*, (F.) *Groseilles*. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBES UVA CRISPA, *R. grossularia*, *Common gooseberry*. The fruit — *Grossularia*, (F.) *Groseille à moquecan*, *Gooseberry*, *Feaberry* — is agreeable, and makes a good preserve.

RIBES VULGARE, *R. rubrum*.

RIBGRASS, *Plantago lanceolata*.

RIBS, *NECK OF THE*, *Collum costarum* — r. *Short*, see *Costa*.

RIBWORT, *Plantago Virginica*.

RICE, *Oryza*—*r.* Disease, Cholera—*r.* Ground, see *Oryza*—*r.* Jelly, see *Oryza*.

RICE WATER, see *Oryza*. The evacuations of cholera have been termed—*from their resemblance to rice-water*—‘*rice-water discharges*’; and in India, ‘*congee discharges*’;—*congee* in Hindoostanee meaning ‘*rice-water*.’

RICE, WILD, *Zizania aquatica*’

RICHARDSONIA, see *Ipeacacuanha*.

RICHLEAF, *Collinsonia Canadensis*.

RICHWEED, *Actæa racemosa*, *Ambrosia trifida*, *Collinsonia Canadensis*, *Pilea pumila*.

RICIN, *Ricinus communis*.

RICINOIDES, *Jatropha curcas*.

RICINUS COMMUNIS, from *ricinus*, ‘*a tick*,’ which its seed resembles; *Ricinus vulgaria* seu *viridis*, *Palma Christi*, *Cataputia major*, *Faba purgatrix*, *Cerna*, *Kerua*, *Cici*, *Castor oil plant*, (F.) *Ricin*, *Fève purgatif*. *Ord.* Euphorbiaceæ. *See Syst.* Monœcia Monadelphia. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds—*Semina Cataputia majoris* seu *Ricini vulgaria*—will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor-seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kerva seu heriinum*, *Alker'ca*, *O. Ricini* seu *Cic'inum* seu *Palmae liquidum* seu *de Palmâ Christi*,—in the United States often called simply *Oil*, (F.) *Huile de Ricin*—is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where powerfully stimulating purgatives would be injurious. Dose. fʒj to fʒiiss. Hufeland recommends that a drop of croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *Oleum Ricini Officinale*.

At the Cape of Good Hope the oil is obtained from *Ricinus lividus*.

A variety of *Ricinus* at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammae, or of a strong decoction, with which the mammae and the external parts of generation are washed.

RICINUS LIVIDUS, see *Ricinus communis* — *r.* Major, *Jatropha curcas*—*r.* Minor, *Jatropha manihot* — *r.* *Viridis*, *R. communis* — *r.* *Vulgaris*, *R. communis*.

RICK, *Malleolus*.

RICKETS, *Rachitis*.

RICKETY, *Rachiticus*.

RICTUS LUPINUS, see *Harelip*.

RIDE, *Wrinkle*.

RIDÉ, *Wrinkled*.

RIDING (of Bones). *Ossium superpositio*, (F.) *Cheuchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities *riding* over each other instead of being end to end.

RIDING-HAG, *Incubus*.

RIFE, (Sax.) *rîfe*, (Prov.) *Brief*. Prevailing; as applied to diseases.

RIFT, *Eructation*.

RIGIDITAS, *Rigidity*.

RIGIDITAS ARTICULORUM, *Ancylosis spuria*. Stiffness of the joints. False ancylosis.

RIGIDITÉ, *Rigidity*—*r.* *Cadavérique*, see *Rigidity*.

RIGIDITY, *Rigiditas*, from *rigere*, ‘*to stiffen*,’ (F.) *Rigidité*, *Roidenr*, *Ruidenr*. Great stiffness of fibre, or want of suppleness. The stiffness of the dead body. *Cadaveric rigidity*, (F.) *Roidenr* ou *Rigidité cadavérique*, is one of the signs of the cessation of life. It may be removed, how-

ever, for a time, by the injection into the arteries of oxygenated defibrinated blood. See *Rigor mortis*.

RIGOR, *Rhigos*, *Algor*, *Coldness*, *Cheim'io*, (F.) *Frisson*. Same etymon. Sensation of cold, with involuntary *shivering* or *shaking* of the whole body:—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill*, (Prov.) *cream*; *frigus ten'is*, *perfrigeratio*.

RIGOR ARDUUM, *Contractura*—*r.* *Cadaverosus*, *Rigor mortis*—*r.* *Corporis mortui*, *Rigor mortis*—*r.* *Emortualis*, *Rigor mortis*—*r.* *Maxillæ inferioris*, *Trismus*.

RIGOR MORTIS, *R. corporis mortui* seu *cadaverosus* seu *emortualis*, *Necronarce'ma*, (F.) *Roidenr* ou *Raidenr* ou *Rigidité cadavérique*. ‘*Stiffness of death*.’ Death stiffening. The rigidity of limbs that occurs on dissolution. See *Rigidity*.

RIGOR NERVORUM, *Tetanus*—*r.* *Nervosus*, *Tetanus*.

RIMA, *Schisma*, *Schiza*; ‘*a fissure, a cleft*’; as *Rima* seu *Rimula Glottidis* seu *Laryngis*, the opening of the glottis. *Rima* seu *R. magna vulvæ*, *Introitus*, *Sinus vulvæ*, *Scapha*, *Scaphus* seu *Fissura magna* seu *Scissura vulvæ*, *Schiza*, the opening of the vulva. See *Vulva*. *Rima oris*, the opening of the mouth.

RIMA CANALIS ORBITARII, *Suborbitar fissure*—*r.* *ad Infundibulum*, *Vulva cerebri*—*r.* *Laryngis*, *Rima glottidis*—*r.* *Magna Vulvæ*, see *Rima*—*r.* *Oris*, see *Rima*—*r.* *Transversa Magna Cerebri*, *Fissure*, *transverse of the brain*—*r.* *Vulvæ*, see *Rima*.

RIME, *Rbagades*.

RIMULA GLOTTIDIS, *Rima glottidis*—*r.* *Laryngis*, *Rima glottidis*.

RINÆUS, *Compressor naris*.

RINCHOS, *Rostrum*.

RING, (Sax.) *hping*, *ping*, (Germ.) *Ring*, *Cricos*, (F.) *Ameaen*. A name given to natural, circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or canal:—as the *umbilical ring*, *inguinal ring*, &c.

RINGS, FESTOONED, *Annuli fibro-cartilaginei*—*r.* *Fibro-cartilagineous*, *Annuli fibro-cartilaginei*.

RING-FINGER, *Annular finger*.

RINGMAN, *Annular finger*.

RINGWORM, *Herpes circinatus*—*r.* of the Scalp, *Porrigi scutulata*—*r.* *Ulcerative*, *Herpes exedens*—*r.* *Vesicular*, *Herpes præputii*.

RIO VINAIGRO, *Passambio*. A stream of some size in New Grenada, which is strongly impregnated with sulphuric acid.

RIRE ou RIS, *Risus*—*r.* *Canin*, *Canine laugh*—*r.* *Moqueur*, *Canine laugh*—*r.* *Sardonien*, *Canine laugh*, *Risus sardonicus*—*r.* *Sardonique*, *Canine laugh*.

RISAGON, *Cassumunar*.

RISIGALLUM, *Orpiment*.

RISING, see *Regurgitation*—*r.* of the Lights, *Cynanche trachealis*.

RISING or ELEVATION OF THE PULSE, *Pulsus elevatio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISORIVUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISSIGALLUM, *Orpiment*.

RISUS, from *ridere*, *risum*, ‘*to laugh*.’ *Gelus*, *Laughing*, *Laughter*, *Laugh*, (F.) *Rire* ou *Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

RISUS APIUM, *Ranunculus sceleratus*—*r.* *Caninus*, *Canine laugh*—*r.* *Involuntarius*, *Canine*

laugh — r. Sardonius, Canine laugh — r. Spasticus, Canine laugh.

RITA-CRISTINA. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

RIVER WEED, *Conferva rivalis.*

RIVING, Eructation.

RIZ, Oryza.

ROAN TREE, *Sorbus acuparia.*

ROB, *Robb, Robub, Rohob, Rohab,* (F.) *Extrait des fruits.* This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sapa*, and, when not quite so thick, *Defrutum*.

ROB CYNOSBATUS, *Confectio rosæ caninæ* — r. ex Moris, Diamorion — r. Nucum, Dincaryon.

ROBIN-RUN-AWAY, *Glechoma hederacea.*

ROBIN-RUN-THE-HEDGE, *Galium aparine.*

ROBINIA AMA'RA, *Ord. Leguminosæ. Ser. Syst. Diadelphia Decandria.* The roots of the *Robinia amara* of Cochin China are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.

ROBINIA PSEUDO-ACA'CIA, *Pseudacacia odorata, Fulse Aca'cia, Black Locust, Locust-tree;* native of America. The flowers are said to possess antispasmodic properties, and the bark of the root to be emetic and cathartic.

ROBORANS, Corroborant.

ROBORANTIA, Tonics.

ROBUB, Rob.

ROCCELLA, *Lichen roccella* — r. *Tinetoria*, *Lichen roccella.*

ROCHE'S EMBROCATION FOR HOOPING-COUGH. An empirical preparation, composed of *ol. oliv.* $\frac{3}{4}$ xvj, *ol. succin.* $\frac{3}{4}$ viij, *ol. caryoph.* q. s. to scent it strongly.

ROCHER, see Temporal bone.

ROCHETTA ALEXANDRINA, Soda.

ROCKBRIDGE ALUM SPRINGS, see Virginia, mineral waters of.

ROCKET, GARDEN, *Brassica eruca* — r. Roman, *Brassica eruca.*

ROCK ROSE, *Helianthemum Canadense*, H. *Corymbosum.*

ROCOU, Terra Orleana.

RODDIKIN, Abomasus.

RODENS, see *Sorbus acuparia.*

RODEN-TREE, *Sorbus acuparia.*

RODSCHIEDIA BURSA PASTORIS, *Thlaspi bursa.*

ROGNE, Psora.

ROHAB, Rob.

ROIHENA BARK, *Swietenia.*

ROHOB, Rob.

ROIHUN, see *Strychnos nux vomica.*

ROIIDEUR, Rigidity — r. *Cadavérique*, Rigor mortis.

ROISDORFF, MINERAL WATERS OF. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, Bandage, Fascia.

ROMARIN, *Rosmarinus* — r. *des Marais*, *Stactice limonium* — r. *Sauvage*, *Ledum sylvestre.*

ROME, (CLIMATE OF.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favourable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

ROMPEURE, *Hernia.*

ROMPT-PIERRE, *Pimpinella saxifraga.*

RONCE, *Rubus idæus* — r. *Bleue*, *Rubus cæsius* — r. *de Montagne*, *Rubus chamaemorus* — r. *Noire*, *Rubus fruticosus.*

RONCHUS, Snoring, Stertor.

ROUND, Round — r. *Grand*, *Terres major* — r. *Petit*, *Terres minor.*

RONE, *Sorbus acuparia.*

RONFLEMENT, Snoring, Stertor, see Rattle — r. *de Diable*, *Bruit de Diable.*

RONNACHS, *Triticum repens.*

RONNING, Rennet.

ROOB, Rob.

ROOF OF THE MOUTH, Palate.

ROOM, Pityriasis.

ROOT, Radix — r. *Ague*, *Aletris farinosa* — r. Bitter, *Apocynum androsæmifolium* — r. Canada, *Asclepias tuberosa* — r. Colic, *Aletris* — r. Red, *Celastrus*, *Laeanthes tinctoria* — r. Rough, *Liatris.*

ROOT OF SCARCITY, *Beta hybrida.*

ROOT, SQUAW, *Actæa racemosa* — r. Sweet, *Aeo-rus calamus* — r. Unicorn, *Aletris farinosa* — r. White, *Ligusticum actæoefolium* — r. Yellow, *Xanthoriza apiifolia*, *Jeffersonia Bartoni.*

ROPE, Nanus.

ROPE BARK, *Direa palustris.*

ROQUETTE, *Brassica eruca*, Soda.

RORELLA, *Drosera rotundifolia.*

RORIFEROUS, Ror'ifer, (F.) *Rorifère*, from *ros*, *roris*, 'dew,' and *ferre*, 'to carry.' An epithet given to vessels which pour exhaled fluids on the surface of organs.

RORIFEROUS DUCT, Thoracic duct.

ROS, Sperm — r. *Calabrinus*, *Fraxinus ornus* — r. *Solis*, *Drosera rotundifolia.*

ROSA, ('*podor*'), *R. centifolia* — r. *Azeliana*, *R. canina.*

ROSA ALBA, *R. usitatissima* seu *leucantha*. The *White Rose*, (F.) *Rosier blanc*. *Ord. Rosaceæ. Ser. Syst. Icosandria Polygynia.* The flowers of this species possess similar but inferior qualities to the damask.

ROSA ARMATA, *R. canina* — r. *Asturica*, see *Pellagra* — r. *Austriaca*, *R. Gallica* — r. *Calycina*, *R. canina.*

ROSA CANINA, *R. sylvestris* seu *sentico'sa* seu *Swartzia'na* seu *Azelia'na* seu *arma'ta* seu *caly-ci'na* seu *rubra vulgaris*, *Cygnor'rhodon*, *Cauir'ibus*, *Cau'ius Senticis*, *Cynocyp'tisus*, *Cynospas'tum*, *Cygnos'batus*, *Dog rose*, *Wild Briar*, *Hip Tree*, (F.) *Rose du chien*, *Eglantier de chien*, *E. sauvage*. The fruit of this variety, called *Heps* or *Hips*, *Hops*, (Se.) *Doghip*, has a sourish taste, and is formed into a conserve. See *Confectio cynosbati*. It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctures, &c.

ROSA CENTIFOLIA, *Rosa, R. Damascena* seu *Pallida*, *Heatomphy'la*, *Damask Rose*, *Hundred leaved* or *Cabbage rose*, (F.) *Rosier à cent feuilles*, *Rhodon*. The petals of this rose have an extremely fragrant odour, and sub-acidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose water, *Oil of Roses*, *Oleum Rosæ*, *Atar*, *Otto* or *Essence of Roses*, and the formation of a syrup.

ROSA DAMASCENA, *R. centifolia.*

ROSA GAL'LICA, *R. Austriaca* seu *rubra*, *Red Rose*, (F.) *Rosier de Provens*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

ROSA LEUCANTHA, *R. alba* — r. *Pallida*, *R. centifolia* — r. *Rubra*, *R. Gallica* — r. *Rubra vulgaris*, *R. canina* — r. *Saltans*, *Essera* — r. *Senticosa*, *R. canina* — r. *Swartziana*, *R. canina* — r. *Sylvestris*, *R. canina* — r. *Usatitissima*, *R. alba.*

ROSACE, *Roseola.*

ROSACEUS, *Rhodinus.*

ROSAGE, *Nerium oleander*, *Rhododendron chrysanthemum.*

ROSAGO. *Nerium oleander*.
 ROSALIA. *Scarlatina*.
 ROSALIÆ. *Scarlatina*.
 ROSAT. *Rhodinus*.
 ROSATUS. *Rhodinus*.
 ROSE, *Erysipelas* — r. Cabbage, *Rosa centifolia* — r. Campion, *Lychnis githago* — r. Christmas, *Helleborus niger* — r. Corn, *Papaver rhoeas* — r. Damask, *Rosa centifolia* — r. Dog, *Rosa canina* — r. Dog, conserve or confection of, *Confectio rosæ caninæ*.
 ROSE DU CHIEN, *Rosa canina*.
 ROSE, HUNDRED-LEAVED, *Rosa centifolia* — r. *Marine*, *Rosmarinus*.
 ROSE RASH, *Roseola*.
 ROSE, RED, *Rosa Gallica* — r. Rock, *Helianthemum corymbosum*.
 ROSE DE SIBÉRIE, *Rhododendron crysanthemum* — r. Spots, Spots, red.
 ROSE, WHITE, *Rosa alba*.
 ROSEA, *Rhodia*.
 ROSEBALM, SCARLET, *Monarda coccinea*.
 ROSEBAY, AMERICAN, *Rhododendron maximum*.
 ROSE DROP, *Gutta rosea*.
 ROSÉE DU SOLEIL, *Drosera rotundifolia*.
 ROSELLINA, *Roseola*.
 ROSEMARY, *Rosmarinus* — r. Marsh, *Statice himonium*, and *S. Caroliniana* — r. Wild, *Eriocephalus umbellulatus*.
 ROSENHEIM, MINERAL WATERS OF. *Rosenheim* is 34 miles S. E. from *Münich*, in *Bavaria*. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.
 ROSE'OLA, *Ecanthe'sis Roseola*, *Rose Rash*, (F.) *Roséole*, *Éruption anormale*, *Rosace*, *Fièvre rouge*, *Éfflorescence érysipélatense*, from *rosa*, 'the rose,' on account of the colour. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See *Roseola*, *Rubeola*, and *Scarlatina*.
 ROSEOLA ACNOSA, *Gutta rosea*.
 ROSEOLA ÆSTIVA. The affection which prevails in summer. The eruption is of a darker colour, and is attended with more itching.
 ROSEOLA ANNULA'TA. Characterized by patches in the form of rose-coloured rays, with central areas of the colour of the skin.
 ROSEOLA FICOSA, *Sycosis* — r. *Typhosa*, Spots, red — r. *Variolosa*, *Roseola*.
 ROSE'OLÆ, *Roseola*, *Rosellina*, *Rube'ola spuria*, *Falsæ* or *French measles*, (F.) *Roséole*, *Fausse rougeole*. This name is also given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubeolæ* by some, and *Rube'oloid*, a term, which is applicable to any eruption resembling *rubeola*. An eruption which often precedes that of small-pox is termed *Roseola Variolosa*.
 ROSÉOLE, *Roseola*, *Roseolæ*.
 ROSE PINK, *Chironia angularis*.
 ROSES, MILK OF. A cosmetic wash, formed, according to one method, of uncarbonate of potash, gr. vj; oil of almonds, ℥j; essence of bergamot, ℥ij; aquæ rosæ, ℥ij; orange flower water, ℥ij. Mix.
 ROSEUS, *Rhodinus*.
 ROSEWOOD, *Rhodium lignum*.
 ROSEWORT, *Rhodia*.

ROSIER BLANC, *Rosa alba* — r. à Cent feuilles, *R. centifolia* — r. de Provins, *Rosa Gallica*.
 ROSIN, BLACK, *Colophonia* — r. Brown, *Colophonia*.
 ROSIN WEED, *Silphium laciniatum*.
 ROSIN, WHITE, see *Pinus sylvestris* — r. Yellow, see *Pinus sylvestris*.
 ROSIO STOMACHI, *Cardialgia* — r. *Ventriculi*, *Cardialgia*.
 ROSMARINUM, *Rosmarinus*.
 ROSMARI'NUS, *R. officinalis* seu *latifolius* seu *horten'sis*, *Alchachil*, *Libano'tis coronaria*, *Dendrolib'anus*, *Rosemary*, (F.) *Romarin*, *Rose marine*, *Encensier*; *Ord.* Labiatae. *Ser. Syst.* *Diandria Monogynia*. The tops of this plant, *Rosmarinus* (Ph. U. S.), *Herba Anthos*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, *αἶθος*. Its oil — *Oleum Rosmarini* — is official. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.
 ROSMARINUS HORTENSIS, *Rosmarinus* — r. *Latifolius*, *Rosmarinus* — r. *Officinalis*, *Rosmarinus* — r. *Stæchadis facie*, *Teucrium creticum* — r. *Sylvestris*, *Ledum sylvestre*.
 ROSSALIA, *Scarlatina* — r. *Squamosa*, *Scarlatina*.
 ROSSIGNOL. A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radio-carpal joint.
 ROSSOLIO, see *Spirit*.
 ROSTRUM, *Rhinos*, *Rinchos*, *Ramphos*, 'a beak.' (F.) *Bec*. A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num*, *anati'num*, *psittaci'num*, *vultur'i'num*, *cyg'neum* seu *olor'i'num*, *grui'num*, *lacerati'num*, &c.
 ROSTRUM EXTERNUM, *Olecranon* — r. *Porcinum*, *Acromion* — r. *Posterius*, *Olecranon* — r. *Sphenoidale*, *Azyges processus*.
 ROSY BETTY, *Erigeron bellidifolium* — r. Bush, *Spiræa tomentosa* — r. Drop, *Gutta rosea* — r. Wheel, *Gutta rosea*.
 ROT, *Eruetation*.
 ROT, Grinders', *Asthma*, *grinders'*.
 ROT'ACISM, *Rotacism'us*, *Rottacismus*, *Rhotacis'mus*, *Psellis'mus rhotacis'mus*, (F.) *Grasseyement*. A vicious pronunciation of the Greek, *P, Rau*, common in the northern parts of England; especially near Newcastle. Called, there, the *Burr* or *Burrh*.
 ROTACISMUS, *Grasseyement*, *Rotacism*.
 ROTA'TOR, from *rotare*, *rotatum*, (*rota*, 'a wheel,' 'to turn round,' (F.) *Rotateur*. A name given to several muscles that turn the parts to which they are attached upon their axes; — such as the oblique muscles of the eyes, the pronators, supinators, &c.
 ROTATOR, *Trochanter*.
 ROTATO'RES DORSI. Eleven small muscles on each side of the dorsal vertebrae, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebra above, as far as the base of the transverse process. Their action is to rotate the individual vertebrae on each other.
 ROTATO'RES FEMORIS, *Obturatores* — r. *Oculi*, *Oblique muscles of the eye*.
 ROTCOLL, *Cochlearia armoracia*.
 ROTTACISMUS, *Rotacism*.
 ROTTLE'RA TINCTORIA. A euphorbiaceous plant of India. A powder is attached to the fruit capsule of this plant, which is brushed off and col-

lee'd when the fruit is dry. It is called *Kameyla*, is used in Northern India as a vermifuge for dogs; and has proved effectual against tapeworm in man. The dose is two or three drachms, which purges.

ROTULA, Patella, Trochiscus—r. Genu, Patella.

ROTULAD, see Rotular aspect.

ROTULAR; from *rotula*, 'the patella.' Relating or appertaining to the patella.

ROTULAR ASPECT. An aspect towards the side on which the rotula is situated.—Barelay. *Rotulad* is used by the same writer, adverbially, to signify 'towards the rotular aspect.'

ROTULE, Patella.

ROTULIAN, *Rotulianus*, (F.) *Rotlien*. Relating or belonging to the rotula or patella.

ROTUNDUS, Round.

ROU'OU, Terra Orleansa.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Marquerie*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, Coleochar—r. *d'Angleterre*, Coleochar—r. *de Prusse*, Coleochar—r. *du Sineg*, Hamatin.

ROUGEOLE, Rubeola—r. *Fansse*, Roseolæ.

ROUGEURS, Flush.

ROUGH ROOT, *Liatriis*.

ROUILLE, Rubiginous.

ROULEMENT DU LAMBEAU, see Flap.

ROUND, *Teres*, *Rotundus*, (F.) *Rond*. Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See *Teres*.

ROUND FORAMEN, *Foramen rotundum*.—A foramen of the sphenoid bone, a little behind the *foramen lacerum superius*, which gives passage to the second branch of the fifth pair of nerves, called *superior maxillary*.

ROUND HEART, *Thaspium atropurpureum*.

ROUND LIGAMENTS OF THE UTERUS, *Ligamenta rotunda Uteri*, (F.) *Cordons sus-pubiens* (Ch.), *Cordons vasculaires*, *Ligaments ronds de l'utérus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre.

ROUP, *Cynanehe trachealis*, Raucedo.

ROURE, *Rhus coriaria*.

ROUTINE PRACTITIONER, Routinist.

ROUTINIST, pronounced *routenist*; (F.) *Routinier*; from (F.) *routine*, 'a regular habit or practice, unvaried by circumstances.' One who practises in such an unvaried manner:—a *routine practitioner*.

ROVE, Scab.

ROVING, Delirium.

ROWLAND'S SPRINGS, see Georgia, mineral waters of.

ROWTING, Snoring.

RUBBER, INDIAN, Caoutchouc.

RUBBING SOUND, *Bruit de Frottement*.

RUBE'DO, *Rubor*, 'redness;' from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

RUBEFA'CIENT, *Erethisma*, *Erethisticum*, *Rubefaciens*, from *rubere*, 'red.' and *facio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine which causes redness of the skin. The action is called *Rubefaction*.

RUBÉFIANT, Rubefacient.

RUBE'OLA, *Rubeola vulg'aris*, from *rubere*, 'I am red.' *Rose'olæ*, *Ecanthe'nis Rubeola*, *Vetero'na*, *Blac'ciæ*, *Ferræ*, *Blactiæ*, *Bovill'æ*, *Morbill'i*, *Scarlati'na pustulo'sa seu miliol'ris*, *Febris morbill'o'sa*, *Typhis morbillosus*, *Phenicis'mna*, *Eophy'mata*, *Measles*, (Sc.) *Mirles*, (Prov.) *Creas*, *Creseds*, *Mulla*, *Manles*, *Measlings*, (F.) *Rougeole*, *Fèvre morbillense*. One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on the third, fifth, or sixth day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of flea-bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semi-circles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself; but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPURIA, which he calls RUBEOLA sine CATARRHO. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease. He also gives the name, RUBEOLA NIGRA or BLACK MEASLES, to an unusual appearance of the measles about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

RUBEOLA SPURIA, Roseolæ.

RUBEOLÆ, Roseolæ.

RUBEOLOID, see Roseolæ.

RUB'IA, from *rubere*, 'red.' *R. Tincto'rum* seu *peregrina* seu *sylvest'ris seu major*, *Erythrod'anon*, *Radix rubra*, *Dyer's Madder*, *Madder*, (F.) *Garance*. Family, Rubiaceæ. Ser. Syst. Tetrandria Monogynia. The root of this plant—*Rubia*, (Ph. U. S.)—has a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIG'INOUS, *Rubiginosus*, from *rubigo*, *rubiginis*, 'rust,' (F.) *Rouillé*. Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

RUBINUS VERUS, Anthrax.

RUBOR, Rubedo.

RUBRI'CA FABRI'LIS, from *rubere*, 'red.' A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle*, *Red Chalk*.

RUBRICA SINOP'ICA. A heavy, compact, reddish earth: formerly used in diarrhœa.

RUBRIN, Hamatin.

RUBUS AFFINIS, *R. fruticosus*; allied to *rubere*, 'red.'

RUBUS ARCTICUS, *Shrubby Strawberry*, *Bacca Norland'icæ*. Ord. Rosaceæ. Ser. Syst. Icosandria Polygynia. The fruit is recommended by Linnaeus as possessing antiseptic, refrigerant, and antiseorbatic qualities.

RUBUS BATUS, *R. cæsius*.

RUBUS CÆSIUS, *R. batus*, *Deuberry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivialis* seu *Canadensis* seu *procumbens* seu *flagellaris*, *American Dewberry*, *Low Blackberry*, is astringent.

RUBUS CANADENSIS, see *R. cæsius*.

RUBUS CHAMÆMORUS, *Cloudberry Tree*, *Chamæmorus*, *C. Norvegica*, *Chamædryis*, *Cloudberryes*, *Kaot-berryes*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

RUBUS FLAGELLARIS, see *R. cæsius*—*r. Framboisianus*, *R. idæus*—*r. Frondosus*, *R. fruticosus*.

RUBUS FRUTICOSUS, *R. affinis* seu *paniculatus* seu *niger* seu *frondosus* seu *vulgaris*; *Common Bramble*, which affords *Blackberries*, (Prov.) *Brambleberries*, *Bumblekites*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villosus*, *American Blackberry*, *High or standing blackberry*, *Hairy American Bramble*, is astringent and has been used in the last stages of dysentery, and in cholera infantum.

RUBUS IDÆUS, *R. frambosianus*, *Batos*; *Raspberry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties—(Sc.) *Rasps*, (Prov.) *Hindberries*—is extremely agreeable; and is much used. It was, formerly, called *Batioum moron*.

RUBUS NIGER, *R. fruticosus*—*r. Occidentalis*, see *R. strigosus*—*r. Paniculatus*, *R. fruticosus*—*r. Procumbens*, see *R. cæsius*.

RUBUS STRIGOSUS, *Wild red raspberry*, of the United States. The leaves are often used as a mild astringent, as well as those of *Rubus occidentalis*, *Black Raspberry*.

RUBUS TRIVIALIS, see *Rubus cæsius*—*r. Villosus*, see *Rubus fruticosus*—*r. Vulgaris*, *R. fruticosus*.

RUCKING, Eructation.

RUCTAMEN, Eructation.

RUCTATIO, Eructation.

RUCTUATIO, Eructation.

RUCTUOSITAS, see Eructation.

RUCTUS, Eructation—*r. Acidus*, *Oxyregmia*—*r. Nidorosus*, *Cnissoregmia*.

RUDBECKIA LACINIATA, *Cone flower*, *Thiuble weed*; indigenous: *Order*, *Compositæ*; is diuretic, and has been given in nephritic affections.

RUDDLE, HARD, *Rubrica fabrilis*.

RUDIMENTAL, *Rudimenta'lis*, (F.) *Rudimentaire*, from *rudimentum*, 'the first beginning.' That which is but slightly developed.

RUDOLPHIA FRONDOSA, *Butea frondosa*.

RUE, *Ruta*—*r. Common*, *Ruta*—*r. de Chèvre*, *Galega officinalis*—*r. Goat's*, *Galega officinalis*—*r. Goat's*, *Virginia*, *Galega Virginiana*—*r. Meadow*, *Thalictron*—*r. des Murailles*, *Asplenium ruta muraria*—*r. des Prés*, *Thalictron*—*r. Sauvage*, *Ruta*.

RUELLES, Wrinkles.

RUFF, Eructation.

RUGA, Wrinkle.

RUGINE, *Raspatorium*.

RUGISSEMENT, *Rugitus*.

RUGITUS, *Brycheth'mos*, from *rugire*, *rugituu*, 'to roar.' (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

RUGOSE, Wrinkled.

RUGOUS, Wrinkled.

RUM, *Tafia*, *Spir'itus Jamaicenis*, *Molas'ses*

Spirit, (F.) *Rhum*. A spirit distilled from sugar, or molasses. See *Spirit*.

RUMA, *Mamma*.

RUMEN, *Hypogastrium*, *Ingluvies*.

RUMEX ACETOSELLA, *Sheep Sorrel*, *Field Sorrel*; indigenous; has similar virtues.

RUMEX ACETOSUS, *R. tuberosus* seu *intermedius*, *Lap'athum pratense*, *Ox'alis Aceto'sa*, *Acetosus vulgaris* seu *pratensis* seu *nostras*, *Anax'yris*, *A. arvensis*, *Sour dock*, *Sorrel*, *Common Sorrel*, (Sc.) *Ducken*, (F.) *Oseille*, *Vinette*, *Aigrette*, *Savelle*. *Ord.* *Polygonaceæ*. *Sex. Syst.* *Hexandria Trigynia*. The leaves are sour, and are used in cookery, and also as a refrigerant.

RUMEX ACUTUS, *Sharp-pointed Wild dock*, *Oxylap'athum*, *Lap'athum*, *L. sylvestrè* seu *acutum*, *Rumex*, *R. paludosus* seu *pustillus*, *Lap'athos*, (F.) *Patience sauvage*. A decoction of the root has long been used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

RUMEX ÆTNEENSIS, *R. scutatus*.

RUMEX ALPINUS, *Aceto'sa Alpina*. The systematic name of the plant that affords the *Monk's Rhubarb*, (F.) *Rhabarbe des Moines*. See *Rumex patientia*.

RUMEX AQUATICUS, *Rumex hydrolapathum*—*r. Britannica*, *Rumex hydrolapathum*—*r. Conferius*, *R. patientia*—*r. Dignus*, *Oxyria reniformis*—*r. Glaucus*, *R. scutatus*—*r. Hastatus*, *R. scutatus*—*r. Hastifolius*, *R. Scutatus*.

RUMEX HYDROLAPATHUM, *Water-Dock*, (Old Eng.) *Brokeleak*, *Hydrolapathum*, *Rumex aquaticus* seu *Britan'nica*, *Herba Britan'nica*, *Lap'athum aquaticum*, (F.) *Parelle*, *Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

RUMEX INTERMEDIUS, *R. acetosus*.

RUMEX OBTUSIFOLIUS, *Lap'athum sylvestrè*, *Blunt-leaved Dock*, *Bitter dock*. The root of this, as well as of *R. CRISPUS*, *Curled*, or *Sour*, or *Yellow*, has similar virtues to those of the other species. Both have been used in decoction in the same cases as sarsaparilla.

RUMEX OXYOTUS, *R. scutatus*—*r. Paludosus*, *R. acutus*.

RUMEX PATIENTIA, *R. confer'tus*, *Lap'athum hortensè*, *Rhabar'barum monacho'rum*, *Hippolap'athum*, *Patient'ia*, *Garden Patience*, *Monk's Rhubarb*, (F.) *Patience*, *Rhabarbe sauvage*, *Parelle*. This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, is, according to Linnæus, obtained from the *Rumex patientia*; according to Murray, from the *Rumex alpinus*.

RUMEX PUSILLUS, *R. acutus*.

RUMEX SANGUINEUS, *The root of the bloody dock* or *bloody veined Dock*, has an austere and astringent taste: and has been employed in dysentery. It is called, also, *Lap'athum sanguineum*, (F.) *Oseille ou Patience Rouge*, *Sangdragon*.

RUMEX SCUTATUS, *R. glaucus* seu *hastifolius* seu *Ætne'sis* seu *oxyotus* seu *hastatus*, *Aceto'sa rotundifolia* seu *Roma'na* seu *Rotundifolia hortens'is* seu *scutata*, *Lap'athum scutatum* seu *rotundifolia*, *Roman* or *Garden Sorrel*, *Green Sauce*, *French Sorrel*, (F.) *Oseille boucher*, *Oseille ronde*, *Petite O*. Virtues the same as those of the common sorrel.

RUMEX TUBEROSUS, *R. acetosus*.

RUMINATION, *Rumina'tio*, from *ruma* or *rumen*, 'the gullet,' *Merycis'mus*. A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man. One who ruminates is in French *mérycole*.

RUMMET, Pityriasis.
 RUMP, *Coupon*—r. Bone, Coccyx.
 RUNCHEs, *Sinapis arvensis*.
 RUNCINA, *Raspatorium*.
 RUNCINULA, *Raspatorium*.
 RUNKILL, Wrinkle.
 RUNKLE, Wrinkle.
 RUNNET, Rennet.
 RUNNING, (*Cursus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.
 RUNNINg, Rennet.
 RUNSH, *Sinapis arvensis*.
 RUNUNCULA, *Raspatorium*.
 RUPES, Lips of the Vulva. See Lip.
 RUPIA, *Rhyphia*, *Ulcus atonicum*, *Ephly'sis Rhy'phia*, *Rhypha'ria*, from *'ρυος*, 'filth.' An eruption of large flattish blebs, which contain a fluid—at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.
 It requires the use of tonics internally, and of stimulating ointments externally.
 RUPIA ESCHAROT'ICA, *Pem'phigus infan'tilis seu gangre'no'sus*; known in Ireland under the names—*white blisters*, *eating hive* and *burnt holes*. An affection, which bears a close similarity to pemphigus, particularly in the absence of a thick rugous crust, whilst in its chief feature, that of ulceration, it evidently belongs to Rupia.
 RUPTIBILITAS, Fragilitas.
 RUPTIO, Rhexis.
 RUPTORIUM, Cauterium—r. Commune, *Potassa fusa*.
 RUPTURA, Ecerixis, Hernia, Laceration, Rhexis—r. Corneæ, Ceratorrhexis—r. Herniosa, Hernia—r. Ovarii, Oariorrhexis—r. Uteri, Uterus, rupture of the—r. Vaginæ, Colporrhexis.
 RUPTURE, Hernia, Rhexis—r. *du Cœur*, Cardiorrhexis—r. of the Groin, Bubonocelc—r. *de la Matrice*, Uterus, rupture of the—r. Wort, Herniaria glabra.
 RUPTURED, see Hernial.
 RUSCUS, *R. aculeatus*, *Bruscus*, *Oxymyr'rhinè*, *Oxymyr'sinè*, *Myrtacantha*, *Catun'gelos*, *Myrcan'tha*, *Scol'pia re'gia*, *Wild Myrtle*, *Centromyr'inè*, *Butcher's Broom*, (Prov.) *Knee-holly*, (F.) *Petit houx*, *Fragou*. Ord. Smilacææ. *Sec. Syst.* Diœcia Monadelphia. The root has been recommended as an aperient and diuretic.
 RUSCUS ACULEATUS, Ruscus.

RUSCUS HYPOGLOS'SUM, *Ucula'ria*, *Hypoglossum*, *Hippogloss'um*, *Bislin'gna*, *Bonif'cia*, *Laurus Alexandri'na augustifolia*, (F.) *Laurier Alexandrin*, *Langue de cheval*. Formerly used against relaxed uvula.
 RUSII, SWEET, *Acorus calamus*, *Juncus odoratus*.

RUSMA, see Orpiment.
 RUSPIN'S STYPTIC, see Styptic, Ruspini's.
 RUSPIN'S TINCTURE FOR THE TEETH. An empirical preparation, composed of *Florentine orris* ʒviii, *cloves* ʒj, *rectified spirit Oij*, *ambergis* ʒj.
 RUT, Heat.
 RUTA, *'ρυτη*, *R. græcolens seu hortens'is seu altera*, *Pey'annon*, *Bea'ssa*, *Common Rue*, (F.) *Rue*, *Rhue*, *Rue sauvage*, *Herbe de grace*; Ord. Rutacææ. *Sec. Syst.* Decandria Monogynia. The plant has a strong, ungrateful odour, and bitter pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ʒij. The leaves are officinal—*Ruta*. (Ph. U. S.)

Oleum Ruta, distilled Oil of Rue, is antispasmodic; and, externally, rubefacient. Dose, gr. ij to vj.

RUTA ALTERA, Ruta—r. Capraria, Galega officinalis—r. Graveolens, Ruta—r. Hortensis, Ruta—r. Muraria, *Asplenium ruta muraria*.

RUTABULUM, Penis.
 RUTACEUM, from *Ruta*, 'rue.' Vinegar of rue.
 RUTIDOMA, see Rutidosis.

RUTIDOSIS, *Rytdo'sis*, *Rhytdo'sis*, from *ρυτιδω*, 'I wrinkle.' The act of wrinkling; as *Rutidoma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIA'NA TUNICA, (F.) *Lame* ou *Membrane Ruyschienne*. According to Ruysch, and the greater part of his disciples, the choroid coat of the eye is formed of two laminae. His son gave to the inner the name *Tunica Ruyschia'na* or *Membrana Ruyschia'na* seu *Ruysch'ii*.

Tunica Cellulo'sa Ruyschia'na is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE. Secale—r. Horned, Ergot—r. Robbin's, *Polytrichum juniperinum*—r. Spurred, Ergot.

RYTIDOSIS, Rutidosis.

RYTIS, Wrinkle.

S.

S. A. &c., see Abbreviation.
 SAAG, Urine.
 SABADILLA, *Veratrum sabadilla*, see Veratrina.
 SABADILLIN, see Veratrina.
 SABATILLA, *Veratrum sabadilla*.
 SABBATIA, *Chironia angularis*—s. Angularis, *Chironia angularis*.
 SABINA, *Juniperus sabina*.
 SABINE, *Juniperus sabina*.
 SABLÉ, *Maculo'sus*, 'sanded,' from *sabulum*, 'sand.' Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

SABOT DE VÉNUS JAUNE, *Cypripedium luteum*.

SABUCUS, *Sambucus*.
 SAB'ULOUS, *Sabulo'sus*, *Areno'sus*, *Psammo'des*, from *sabulum*, 'sand.' The sandy deposit often seen in the urine.

SABULUM CONARII, see Pineal gland.

SABURA, *Saburra*.

SABUR'RA, *Sabu'ra*, *Sordes*. This word signifies, by derivation, 'coarse sand, or ballast.' In its common acceptation, it means *foulness of the stomach*, as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly di-

gested. The *Saburral state*, *Colluvies gastrica*, *Cruditates ventriculi*, *Gastritis mas*, (F.) *Embarcas gastrique*, *État saburral*, is an accumulation of saburrae in the stomach, (F.) *Saburres gastriques*, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, Helminthiasis.
SABURRAL, *Saburra'lis*. Relating or appertaining to saburrae,—as the 'saburral state.'

SABURRATIO, Arenatio.
SABURRES GASTRIQUES, see Saburra.
SAC, see Sack—*s. Herniaire*, Hernial sac—*s.* of the Omentum, see Epiploon, gastro-hepatic.

SACCADÉ, see Respiration, jerking.
SACCATUS, Encysted.
SACCHAR, Saccharum.
SACCHARHYDROLÉ, Syrup.
SACCHARI FÆX, Melasses.
SACCHARINA, *Saccharolés*.
SACCHARO-ALCOOLÉ, Ratafia.

SACCHAROLÉ LIQUIDE, Mellitum, Syrup—*s. Mou*, Conserva, Electuarium—*s. Solide*, see Pastel, and Tabella.

SACCHAROLÉS (F.), *Sacchari'ua*, from *saccharum*, 'sugar.' A name given by MM. Henry and Guibourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béal so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

SACCHAROMETER, (F.) *Saccharomètre*, *Pèse-sirop*, from *saccharum*, 'sugar,' and *μετρον*, 'measure.' A hydrometer adapted for determining the density of syrups. The marginal figure is graduated to Baumé's scale. See Areometer.

SACCHAROMYCES, *Torula cerevisiæ*.

SACCHARORRHŒA, Glycyrrhœa—*s. Cutanea*, *Sudor dulcis*.

SACCHARORRHŒA LAC'TEA, *Galactorrhœa saccharata*. A secretion of unusually sweet milk.

SACCHARORRHŒA PULMONA'LIS, *Sputum dulcè* seu *saccharatum*. The copious expectoration of unusually sweet matter from the lungs.

SACCHARORRHŒA URINOSA, Diabetes mellitus.

SACCHARUM, *Sacchar*, *сахар*, from Arabic, or rather Sanscrit, *Sakar*, 'white earth;' *Suchar*, *Suechar*, *Sutter*, *Zuchar*, *Zu'caro*, *As'sakar*, *Tigala*, *Zac'charum*, *Zozar*, *Zu'charum*, *Zuc'carum*, *Zuchra*, *Mel arundinæum*, *Sugar*, (F.) *Sucre*. The produce of the juice of *Sac'charum officinarum* seu *officinale* of Linnaeus, *Cal'amus Indicus* seu *Saccharinum*, *Sugar Cane*, (F.) *Canne à Sucre*, *Cannavelle*; *Aru'do saccharifera* of Sloane; *Ord. Graminæ*; *Sex. Syst. Triandria Dignia*, and also of the beet, maple, &c.

True Sugars are those with which alcoholic fermentation may be effected, by the addition of yeast and water. They are:—

- | Species. | Varieties. | |
|----------|------------|--|
| 1..... | } | Hard sugar of the cane, maple, beet, chestnut, &c. |
| 2..... | | Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c. |
| 3..... | | Hard sugar of the grape, ripe fruits, starch, diabetes, &c. |
| 4..... | | Hard sugar of the mushroom. |

Imperfect sugars are those in which alcoholic fermentation cannot be effected by means of yeast and water.

- | Species. | Varieties. |
|----------|-------------------------|
| 1..... | Manna. |
| 2..... | Sugar of Milk. |
| 3..... | Sugar of jelly or glue. |
| 4..... | Liquorice. |
| 5..... | Picromel. |

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is nutritious, and is employed as an aliment, and as a eutrophic demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

Liver or Hepatic Sugar, (F.) *Sucre du Foie*, has been recently found to be a normal secretion of the liver. It is more readily assimilated than other varieties of sugar. See Glucose.

SACCHARUM ACER'NUM, *S. Canadensè*, *Maple Sugar*, is often used as a demulcent.

SAC'CHARUM ALBUM, *S. purificatum*, *Saccharum* (Ph. U. S.), *Sal Indus*, *White Sugar*, *Refined Sugar* is the *Loaf Sugar*. *Double-refined Sugar* has been called *Tabarzet*.

SACCHARUM ALUMINATUM. Equal parts of white sugar and alum, powdered. Used as a styptic.

SACCHARUM CANDIDUM, *S. caudum* seu *cautum* seu *cautum*, *Al'phenic*, *Nabot*, *Sugar candy*, *Sugar candian*, (F.) *Sucre Candi*, is the crystallized juice of the cane.

SACCHARUM CANDUM, *S. Candidum*—*s. Cantum*, *S. Candidum*—*s. Canthum*, *S. Candidum*—*s. Commune*, *Saccharum non-purificatum*.

SACCHARUM HORDEA'TUM, *Barley Sugar*, (Prov.) *Sugar barley*, *Penides*, *Penid'ium*, *Sac'charum penid'ium*, is a variety of sugar candy.

SACCHARUM LACTIS, *Sugar of milk*.

SACCHARUM NON-PURIFICA'TUM, *Muscovado*, *raw*, *brown* or *moist sugar*, is the *S. commu'ne*, *S. rubrum*, *Mel canna*, or *coarse sugar*.

SACCHARUM OFFICINARUM, see *Saccharum*—*s. Penidium*, *Hordeatum*—*s. Rosaceum*, *Confectio rosæ gallicæ*—*s. Saturni*, *Plumbi superacetas*.

SACCHARURE, from *saccharum*, 'sugar.' A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures.—Béal.

SACCULATED, Encysted.

SACCULATUS, Encysted.

SACCULI ADIPOSI, *Fatty vesicles*—*s. Chalicophori*, see *Lacunæ* of Bone—*s. Laryngei*, *Ventricles of the larynx*.

SAC'CVLI MEDICINA'LES, *Bags* containing medicinal substances.

SACCULI MEDULLARES, see *Medullary membrane*.

SAC'CVLUS, diminutive of *saccus*, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes* and *otoconies*: one of these is termed the *sacculus vestibuli*, the other *sacculus*. See *Semicircular canals*.

SACCULUS, *Marsupium*—*s. Cephalicus*, *Cucupha*—*s. Chylifer* seu *rorifer*, *Receptaculum chyli*—*s. Cordis*, *Pericardium*—*s. Ellipticus*, see *Semicircular canals*—*s. Lactiferus*, see *Lactiferous vessels*.

SAC'CVLUS LARYNG'IS. A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx.—Hilton.

Saccharometer.

SACCULUS MEDICINALIS, Pulvinar medicatum —s. Sphæricus, see Semicircular canals—s. Vesical. see Bladder, sacculated —s. Vestibuli, Semicircular canals, see Sacculus.

SACCUS, Sac —s. Coli, Cæcum —s. Cordis, Pericardium—s. Herniosus, Hernial sac—s. Epiploicus, Epiploon —s. Intestini crassi, Cæcum —s. Laerymalis, Lachrymal sac —s. Laerumalis, Lachrymal sac —s. Lacteus, Receptaculum chyli —s. Mucosus, see Bursa mucosæ —s. Peritonæi retro-ventricularis, see Epiploon, gastro-hepatic —s. Pleuræ, Pleura—s. Venarum cavarum, Sinus dexter cordis —s. Venarum pulmonalium, Sinus pulmonalis.

SACER, Sacral —s. Ignis, Herpes zoster —s. Morbus, Epilepsy —s. Musculus, Transversalis dorsii.

SACERDOTIS PENIS, Arum maculatum.

SACHET (F.), *Sac'culus*, 'a little sac.' A small bag containing perfumes to be placed among clothes to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves and powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *oil of roses*, twenty-four drops; *oil of lavender*, *oil of bergamot*, each one drachm; *musk*, six grains. A scent-bag.

SACK, (F.) *Sac*, 'dry.' A dry wine used by our ancestors; *Vin sec*. Probably *Sherry*.

SACK, *Saccus*, *Seclusorium*; Sax. *pac*. A bag or pouch.

SACK, **HER'NIAL**, *Saccus herni'osus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

SACK POSSET; from *sack*, 'the wine,' and *posset*. A posset made of sack, milk and other ingredients.

SACK, **SEROUS**. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

SACK WHEY, Wine Whey.

SACRAD, see Sacral aspect.

SACRA FISTULA, Vertebral column.

SACRAL, *Sacer*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

SACRAL ARTERIES are distinguished into, 1. The *anterior* or *middle sacral*, *Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries*, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an archel manner, towards the coccyx, with the middle sacral. They give off *external* and *posterior branches*, which enter the sacral foramina; and *internal branches*, which are distributed to the pyramidalis, sacrum, &c.

SACRAL ASPECT. An aspect towards the region where the sacrum is situated.—Barelay. *Sacrad*

is used by the same writer adverbially to signify 'towards the sacral aspect.'

SACRAL EXTREMITIES. The lower limbs.

SACRAL GROOVES, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

SACRAL NERVES, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, from the hypogastric plexus. The fifth and sixth (*coccygeal nerve*) are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

SACRAL PLEXUS, *Sciatic plexus*,—the *sacral portion of the crural plexus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pubic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

SACRÉ, Sacral.

SACRO, in composition, relating or belonging to the sacrum.

SACROCOCYGE'AL, *Sacro-coccyge'us*. Relating to the sacrum and coccyx.

SACROCOCYGE'AL ARTICULA'TION is that of the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments;—an *anterior* and a *posterior sacro-coccygeal*.

SACROCOSTALIS, *Sacro-lumbalis*—s. *Fémoral*, *Gluteus major*.

SACROCOXAL'GIA, from *sacro*, *coxa*, 'the hip,' and *algos*, 'pain,' a hybrid term. Some authors have called this a rheumatic affection of the sacro-iliac symphysis.

SACROIL'IAC, *Sacro-ili'acus*. That which relates to the sacrum and ilium.

SACROÏLIAC ARTICULA'TION, **SYM'PHYSIS** or **SYNCHONDRO'SIS**, *Ilio-sacral articulation*, *symphysis* or *synchondrosis*, is the union of two surfaces;—two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are innervated by an articular cartilage. The bands which strengthen them are the two *sacro-sciatic ligaments*, the *sacro-spiual*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro-iliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

SACROÏSCHIA'TICUS, *Sacro-sciatic*.

SACROLOMBAIRE, *Sacro-lumbalis*.

SACROLUMBAR, *Sacro-lumba'lis*, *Sacro-lombaire*. That which belongs to the sacrum and loins.

SACROLUMBAR, *Sacro-lumba'lis*, *Sacro-lumbaris Muscle*, *Sacro-costa'lis*, *Dorso-traché'lian portion of the Sacro-spiual* of Chaussier, (F.) *Lombo-costo-traché'lien*, *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ili; to the extremities of the transverse processes of the lumbar vertebra; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the

posterior tubercle of the transverse processes of the last five cervical vertebrae. The sacro-lumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, and at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Musculi Accessorii seu Additamentum ad Sacro-lumbalem*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervicalis descendens, Cervicollis descendens Diemerbroeckii, Transversalis collateralis colli, Accessorius ad Sacro-lumbalem*, (F.) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebrae, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

SACROSCIATIC, *Sacro-ischiat'icus*. That which belongs to the sacrum and ischium.

SACROSCIATIC LIGAMENTS are two ligaments, which assist in securing the sacro-iliac articulation. The *great or posterior sacro-sciatic ligament* extends from the crista ilii and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less or anterior sacro-sciatic ligament* arises from the same point, and terminates in the spine of the ischium.

SACROSPINAL, Dorso-trachelian portion of the sacro-lumbalis.

SACROSPINALIS. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transverso-spinalis, and intertransversalis muscles. He divides it into three portions.

SACROTROCHANTÉRIEN, Pyramidalis.

SACROVERTÉBRAL, *Sacro-vertebra'lis*. That which relates to the sacrum and the vertebrae.

SACROVERTÉBRAL ARTICULATION is the junction of the last vertebrae of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Promontory of the Sacrum*, or the *Sacro-vertebral Angle*.

SACROVERTÉBRAL LIGAMENT is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones *in situ*.

SACRUM, *Os sacrum seu basilarè seu Alagas seu latum seu clun'ium, Lns, Luz, Ver'tebra magna, Albaghazi, Héron ost'con, Clunis, Subver'tebra, Subver'tebrium, Vet'ula*; from *sacer*, 'sacred,' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has,—1. A *pelvic or anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size, from above downwards. Through them pass the anterior branches of the sacral nerves. 2. A *spinal or posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a

continuation of the spinous processes of the vertebrae; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *vertebral surface or base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection, formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Promontory, Promontorium Ossis Sacri, Great Angle of the Sacrum or Sacro-vertebral Angle*. 4. A *coccygeal face or apex*, (F.) *Face coccygienne ou Sommet*, which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins*, which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, TURKISH, *Sella Turcica*.

SÆPES, Sepes.

SAFFLOW, *Carthamus tinctorius*.

SAFFLOWER, *Carthamus tinctorius*.

SAFFRON, *Crocus* — s. *Bastard, Carthamus tinctorius* — s. *Dyers', Carthamus tinctorius*.

SAFFRON FLOWER, *Carthamus tinctorius*.

SAFFRON MEADOW, *Colchicum autumnale*.

SAFFRAN BÁTARD, *Carthamus tinctorius, Colchicum autumnale* — s. *des Indes, Curcuma longa* — s. *de Mars apéritif, Ferri subcarbonas* — s. *de Mars astringent, Colcothar* — s. *des Prés, Colchicum autumnale* — s. *Racine de, Curcuma longa*.

SAFFRANUM, *Carthamus tinctorius*.

SAFRE, Smalt.

SAGA, Sago.

SAGAPÉNUM, *Sag'apin, Serapi'non*, (F.) *Gomme sérapihique*. A gum-resin, supposed to be obtained from the *Ferula Per'sica*. *Ord. Umbelliferae. Sex. Syst. Pentandria Digynia*. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

SAGAPIN, *Sagapenum*.

SAGE, *Salvia* — s. *Indian, Eupatorium perforliatum* — s. *Jerusalem, Pulmonaria*.

SAGE TREE, *Lantana*.

SAGE, WILD, *Salvia Africana, S. Lyrata*.

SAGE-FEMME, *Midwife*.

SAGENA, *Epiploon*.

SAGESSE DES CHIRURGIENS, *Sisymbrium Sophia*.

SAGIMEN VITRI, *Soda, subcarbonate of*.

SAGITTAL, *Sagitta'lis, Sagitta'tus*, from *sagitta*, 'an arrow.'

SAGITTAL FURROW, Sagittal Groove, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

SAGITTAL SUTURE, *Obelæ'a sutu'ra seu Raphæ, Sutura Virg'ata seu jugu'lis seu Rabdoi'des*,

Rhabdoïdes, Rhabdoïdes, Rhabdoïdeus seu *Biparietalis* seu *Interparietalis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTARIA VARIABILIS. From *sagitta*, 'an arrow,' owing to the prevalent form of the leaves. *Arrowhead, Arrowleaf, Arrow weed, Wapata* of Oregon; *Nat. Ord. Alismaceæ*. Esculent, yielding fecula like arrow-root. The roots are cooling and sub-astringent, and are at times applied to the feet in cases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

SAGITTARIUM ALEXIPHAR'MACUM, *Malacæ radix, Canna Indica, Arum'do Indica*. A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGITTATUS, Sagittal.

SAGO, *Sagus, Sagu, Sagu, Segu, Amylum palmaceum*, (F.) *Sagou, Sagne*. A fecula, obtained from the pith of the *Sagus rumphii*, *Cycas circinalis*, *C. revoluta*, &c., growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

To make sago into a proper mucilage for the sick, a tablespoonful of it should be macerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken, that the grains are perfectly dissolved by long boiling and constant stirring.

Sago posset is made by putting *sago*, ʒij, into water. Oij; boiling until the mucilage is formed: then rubbing *sugar*, ʒss, on the rind of a lemon, and putting it with *tincture of ginger*, fʒj, into *sherry*, Oss; adding this mixture to the mucilage, and boiling for five minutes.—It is a good restorative.

SAGO, FRENCH, see *Solanum tuberosum*, and *Arrow-root*, common — s. *Portland Island*, see *Arum maculatum*.

SAGOU, Sago.

SAGU, Sago.

SAGUE, Sago — s. *Petit*, see *Solanum tuberosum*.

SAGUERUS GOMUTO, see *Toddy* — s. *Rumphii*, see *Toddy* — s. *Saccharifer*, see *Toddy*.

SAGUS, Sago — s. *Rumphii*, see *Sago*.

SAHARA, *Insomnia*.

SAIDSCHÜTZ WATER, *Seidschütz water*.

SAGNÉE, *Blood-letting* — s. *Spoliative, Spoliativa phlebotomia*.

SAILNEMENT DU NEZ, *Epistaxis*.

SAILORS' DISEASES, &c., OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be ward off by proper attention to cleanliness and ventilation.

SAIN BOIS, *Daphne gnidium* — s. *Doux, Adeps præparatus*.

SANT AMAND, MINERAL WATERS OF. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahr.

SANT ANTHONY'S FIRE, *Erysipelas*.

SANT AUGUSTINE, CLIMATE OF. This

sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

SAINT CATHERINE'S SPRINGS, see *Canada, Mineral waters of*.

SAINT CHARLES'S ROOT, *Carlo Sancto (Radix)*.

SAINT CROIX, *Santa Cruz*.

SAINT JAMES'S WORT, *Senecio Jacobæa, Thlaspi bursa*.

SAINT JOHN'S DANCE, see *Mania, dancing*. — *St. John's Wort, Hypericum perforatum*.

SAINT KITTS, see *West Indies*.

SAINT LEONARD'S, CLIMATE OF. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthisical valetudinarian.

SAINT MYON, MINERAL WATERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAINT NECTAIRE, MINERAL WATERS OF. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fahr.

SAINT PARDAUX, MINERAL WATERS OF. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

SAINT SAUVEUR, MINERAL WATERS OF. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93° Fahr.

SAINT VINCENT'S, see *West Indies*.

SAINT VITUS'S DANCE, *Chorea*, see *Mania, dancing* — s. *Vitus's Dance of the Voice, Balbuties*.

SAIR, Ulcer.

SAIRE, Essera.

SALAAAM CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Satyriasis—s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, (CLIMATE OF.) A small place—the Montpellier of Huxham—which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisic invalid as a winter retreat.

SALEP, *Saloop'* (so pronounced.) *Salab, Salop.* The prepared bulb of the *Orchis mas'cula* and other species of *Orchis*. The salep of Cachmere is from a species of *Euloph'ia*. Salep is in small, irregular, hard masses. In its composition in relation to water, it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and adding to the solution sugar and milk.

SALEP, OTAREITE, Arrow-root. (Tahiti).

SALER'NUM, (SCHOOL OF.) An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century. The work on hygiene, "*De Conservandâ Valetudine*," which bears its name, has passed through several editions in various

languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, *Lythrum salicaria*.

SALICINE, see *Salix*.

SALICORNIA ARABICA, &c., see *Soda*.

SALINE', *Sal'ims, Salina'cius, Salina'cidus, Salit'us, Salsus, Hal'ims, Halmy'rus, 'αλμυρος, Halico'des, Sali'nonis*, from *sol*. That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT or MIXTURE. This may be made as follows:—*Potass. carbon. ℥j, acid. citric. sen tartar. gr. xv seu succ. limon. recent. ℥ss, aquæ f℥viii, syrups. enjusvis ℥j. M.* Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT or MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See *Powders, soda*.

SALINES, see *Kentucky, mineral waters of*.

SALINOUS, *Saline*.

SALIS AMMONIACI FLORES, *Ammonia carbonas*.

SALITIO, *Leap*.

SALITUS, *Saline*.

SALIUM, *Saliva*.

SALIUNCA, *Valeriana Celtica*.

SALIV'À, *Si'alon, Si'elon, Sialo'ma, Pty'sma, Pty'alon, Pty'elon, Sal'ium, Sputa'men, Sputa'mentum, Sputum, Spittle*, (Old. Eng.) *Spaul*, (Prov.) *Spoat*. An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton, and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, *pty'aline, princip'ium saliv'ar'æ, materia sial'ina, Cas'ein of the saliv'ar, Saliv'ary albumen*, of 1.4 of mucus, 1.7 of chlorides of potassium and sodium, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

SALIVÆ FLUXUS CIBO VISO, see *Salivation*.

SALIV'ÀIRE, *Anthemis pyrethrum, Salivary*.

SALIVAL, *Salivary*.

SALIVANS, *Sialagogue*.

SALIVANT, *Sialagogue*.

SALIVARIS, *Salivary*—s. *Herba, Anthemis pyrethrum*.

SALIV'ARY, *Saliv'arius, Saliv'aris, Salivo'rus, Sali'val, Sali'vus*, from *saliva*, (F.) *Salivaire*. That which belongs to the saliva.

SALIVARY ALBUMEN, see *Saliva*—s. *Calculi*, see *Calculi, salivary*.

SALIVARY FIS'TULE, *Syalosyrin'ges*, are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

SALIVARY GLANDS, *Secreting organs of the saliva, Salival glands*, are situate symmetrically, to the number of four, on each side of the face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts—*Ductus Saliv'arii*, (F.) *Canaux ou Conduits salivaires*—carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The *parotid*; 2. The *submaxillary*; 3. The *sublingual*; and 4. The *intra-lingual or lingual*, seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold.

SALIVATIO, Salivation.—s. Mercurialis, Salivation, mercurial.

SALIVATIO, *Salivatio*, *S. caliditas*, *Epiphora ptyalis'mus*, *Sialis'mus*, *Sputum Oris*, *Sialoachia*, *Sialismus*, *Sialorrhoe'a*, *Sialozomia*, *Ptyalismus*, *Ptyalism*, *Fluxus salivæ*, (F.) *Flux de Bouches*, *Flux salivæ*, *Ptyalismus*; from *Saliva*. A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

Ptyalismus acutus sympathet'ic'us, *Salivæ fluxus cibo vivo*, *Mouth watering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acutus mellitus*, *Apoceno'sis ptyalis'mus mellitus*, *Dulcedo Sputatorum*, or *Sweet spittle*. In this, the saliva has a sweet or mucilaginous taste.

SALIVATION, MERCURIAL, *Salivatio mercurialis*, *Sialozomia seu Ptyalismus mercurialis*, *P. hydrargyric'us*, (F.) *Ptyalismus mercuriel*, *Salivation mercurielle*. Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial*, *Hydrargyro-stomatit'is*, (F.) *Stomatite mercurielle*.

SALIVATION MERCURIELLE, Salivation, mercurial.

SALIVATUM, Sialagogue.

SALIVOSUS, Salivary.

SALIVOUS, Salivary.

SALIX. The *Willow*, *I'tea*, (Prov.) *Sally*, *Sally-wathy*, (Se.) *Sanch*, *Sangh*, *Willan*, (F.) *Sinle*. A genus of plants in the Linnæan system. *Ord.* Salicæe.

SALIX FRAG'ILIS, *S. pendula* seu *decip'iens* seu *amygdali'na* seu *persicifolia* seu *Russeli'na* seu *pippoph'æfolia* seu *Trevira'nii*, or *Crack willow* (Ph. D.) **SALIX ALBA**, *S. cærn'lea* seu *vitel'ina*, or *White willow* (Ph. D. and Ph. U. S.), (F.) *Oier*. **SALIX LATIFOLIA**, or *broad-leaved willow*. **SALIX CA'PREA**, *S. Sphacel'ata* seu *toment'osa*, or *Great round-leaved willow* (Ph. L.) **SALIX PENTAN'DRIA** seu *HEMAPHRODIT'ICA*. **SALIX HU'MILIS**. *Low bush willow*, *Speckled willow*. **SALIX VITULI'NA**, **SALIX ERIOCEPH'ALA**. The bark of each of these has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Salicine*. It has been found in about fourteen species of salix and eight species of Populus; is like the quinia in medicinal efficacy. Dose, ℥j to ʒj of the powder. Dose of *Salicine* from 4 to 6 grains.

SALIX ÆGYPTIACA, *Calaf*.

SALLENDERS, *Malandria*.

SALLIS, *Adeps*.

SALLOW, *Lurid*.

SALLY, *Salix*.

SALLY-WITHY, *Salix*.

SALMIAC, *Ammoniac murias*.

SALOOP, *Salep*. Also, *sassafras tea* flavored with milk and sugar. Under this name a tea is sold in the streets of London which consists of an infusion of the wood of *Laurus Sassafras* with the addition of milk and sugar—*Sassafras Tea*.

SALPETRA, *Potassa*, *nitrate of Soda*, *nitrate of*.

SALPINGEMPHRAX'IS, from *σαλπιγξ*, *σαλπιγος*, 'a tube,' and *εμφραξις*, 'obstruction.' Ob-

struction of the Eustachian tube;—a cause of deafness.

SALPINGIT'IS, from *σαλπιγξ*, *σαλπιγος*, 'a tube,' and *itis*, 'denoting inflammation.' Inflammation of the Eustachian tube.

SALPINGOCY'ESIS, *Paracoc'ois tuba'ria*, *Gravid'itas tuba'ria*, from *σαλπιγξ*, *σαλπιγος*, 'a tube or trumpet,' and *κοισις*, 'pregnancy.' Tubal pregnancy.—See *Pregnancy*, *tubal*.

SALPINGOMALLÉ'EN, *Tensor tympani*.

SALPINGOPHARYNGE'US, from *σαλπιγξ*, *σαλπιγος*, 'a trumpet,' and *φαρυγξ*, 'the pharynx.' *Valsalva* and *Douglas* have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINGOSTAPHYLINUS, *Circumflex muscles*—s. *Staphylinus internus*, *Levator palati*.

SALPINGOSTENOCH'ORIA, from *σαλπιγξ*, *σαλπιγος*, 'a tube,' *στενος*, 'narrow,' and *χωρα*, 'space.' *Narrowness* or *stricture* of the Eustachian tube.

SALPINX, *Tuba*.

SALSAMENTUM CRUDUM, *Omotarichos*.

SALSAPARILLA GERMANICA, *Sarsaparilla Germanica*.

SALSEDO MUCRUM, *Potassæ nitras*.

SALSEPARILLE, *Smilax sarsaparilla*,—s. *d'Allemagne*, *Sarsaparilla Germanica*—s. *du Brésil*, s. *Curaçoe*, s. *de Honduras*, s. *de Pérou*, and s. *de Portugal*, see *Smilax sarsaparilla*.

SALSIFI, *Tragopogon porrifolium*.

SALSILAGO, *Muria*.

SALSOLA DECUMBENS, *S. Kali*.

SALSO'LA KALI, *S. Decumbens*, *Kali soda* seu *spinosum cochlear'um*, *Prickly Saltwort*, *Tragus sive Tragum Matthi'ali*. *Ord.* *Chenopodiaceæ*; from *sal*, 'salt,' owing to its saline properties. This plant, as well as *Salsola sativa* and *Salsola soda* seu *longifolia*, *Kali inermis*, *Herba vitri*, produces the alkaline salt, commonly called *Barilla*, *Soda*, or *Kelp*.

SALSOLA LONGIFOLIA, *S. Kali*—s. *Sativa*, &c., see *S. Kali*, and *Soda*—s. *Soda*, see *S. Kali*.

SALSUGINOSUS, *Halmiroydes*.

SALSUS, *Saline*.

SALT, *Sol. Hal. Halb*, 'αλς,' (F.) *Sel*. A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* exclusively to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base. *Alkaline salts* or *subsals*, (F.) *Sous-sels*, those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid: the termination of which is changed into *ite*, when the name of the acid is in *ous*;—*ate*, when it is in *ic*. Thus the salts formed by the sulphurous acid are *sulphites*; those by the sulphuric acid *sulphates*. 2. This name is followed up by that of the oxyd, which enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto*, *dento*, *trito*, &c., put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base; *double salts* with two different bases; *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical*, as chlorine, iodine, &c. An *oxygensalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

SALT, APERIENT, OF FREDERICK, Soda, sulphate of—s. Baker's, Ammonia carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesia sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesia sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lymington, see Soda, sulphate of—s. Preston, see Ammonia carbonas—s. Rochelle, Soda, tartrate of—s. Rock, Soda, muriate of—s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammonia carbonas—s. of Soda, Soda, subcarbonate of—s. Sore-throat, Potassæ nitras fusus sulphatis paucillo mixtus.

SALT OF TARTAR, see Potassæ subcarbonas, and Potash.

SALT, TASTELESS PURGING, Soda, phosphate of.

SALT OF URINE, Ammonia carbonas.

SALT, WHITE, Soda, muriate of.

SALT OF WOODSOOT, Ammonia carbonas—s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing—s. Saneti Viti, Chorea.

SALT'ERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore, and is well protected from winds, particularly the northerly.

SALTISH, Halmyrodes.

SALTPETRE, Potassæ nitras.

SALTUS, Leap, Vulva—s. Tendinum, Subsul-tinum tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIOUS, Salutory.

SALUBRIOUSNESS, Salubrity.

SALUBRIS, Salutory.

SALUBRITY, *Salu'britas*, *Salu'briousness*, (F.) *Salubrité*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, Sanitas.

SALUTAIRE, Salutory.

SALUTARY, *Peries'ticos*, *Saluta'ris*, *Salu'ber*, *Salu'bris*, *Hygie'nis*, *Hygiast'icus*, *Hygie'rus*, *Salu'brinus*, (F.) *Salutaire*, *Salubre*. Same etymon. Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALUTIFEROUS, *Salu'tifer*; from *salus*, *salutis*, 'health,' and *fero*, 'I bear.' Bringing health; health-bearing.

SALVATEL'LA; same etymon, [?] *Vena salvatell'a*, is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, BLISTERING, Unguentum lyttæ—s. Deshler's, Ceratum resinæ compositum—s. Eye, Unguentum oxidi zinci impuri—s. Eye, Singleton's, Unguentum hydrargyri nitrico-oxidi—s. Healing, Cerate of calamine.

SAL'VIA. (from *salveo*, 'to be sound,' owing to its reputed healing qualities:) *S. officinalis* seu *horten'sis* seu *vulga'ris* seu *minor*, *Elelis'phacos*, *Sage*, *Save*, (F.) *Sauge*, *Petite Sauge*, *Thé d'Europe* ou de *France*. *Ord.* Labiata. *Sex.* *Syst.* Diandria Monogynia. Sage leaves, *Salvia* (Ph. U. S.), have a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Their virtues

depend upon an essential oil. They are tonic, stimulant, and carminative. In the form of a weak infusion, Sage is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA AFRICA'NA, *Wild Sage*, a South African species, has the same medical properties as *Salvia*.

SALVIA COLORATA, *Salvia*.

SALVIA HORMI'NUM, *S. colorata*, *Horminum*, *H. coloratum* seu *sativum*, (F.) *Sauge-hormin*, of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, *Salvia*.

SALVIA LYRA'TA, *Wild Sage*, *Cancer Weed*; indigenous. The fresh leaves, bruised, are used to destroy warts. It has been supposed to be of use in cancer.

SALVIA MINOR, *Salvia*—s. *Officinalis*, *Salvia*.

SALVIA SCLA'REA, *Sclearia*, *Gallit'richum*, *Æthio'pis*, *Biser'mas*, *Colus Jovis*, *Common Clary*, (F.) *Sauge sclarée*, *Grand sauge*, *Orvale* ou *Tout-bonne*. The leaves have been recommended as corroborants and anti-spasmodics.

SALVIA VITÆ, *Asplenium ruta muraria*—s. *Vulgaris*, *Salvia*,

SAMADE'RA IN'DICA, *Ord.* *Simarubæ*, furnishes the *Niepa bark*, which is possessed of antiperiodic properties.

SAMBU'CUS, from *σαμβυχη*, an ancient musical instrument, said to have been made of its wood. *Sabu'cus*, *Sambucus nigra* seu *vulga'ris* seu *arbo'rea*, *Actæ*, *Infelix lignum*; *Elder*, *El-noire*, *Ellen-tree*, *Ellarne*, (Sc.) *Boartree*, *Bore-tree*, *Bowntree*, (Prov.) *Bottry tree*, *Burtree*, *Ellet*, *Elren*, *Scar*, (F.) *Siveau commun*. *Ord.* Caprifoliaceæ. *Sex.* *Syst.* Pentandria Digynia—(the flower and bark were formerly called *Cano'pum*). The flowers, berries, and bark of the elder have been used in medicine. The flowers have been reputed diaphoretic and discutient; the berries, aperient and sudorific; the bark, purgative, and, in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBU'CUS ARBOREA, *Sambucus*—s. *Chamæ-actæ*, *S. ebulus*.

SAMBU'CUS EB'ULUS, *S. Chamæactæ* seu *helion* seu *hu'milis* seu *herba'cea*, *Ebulus*, *Chamæactæ*, *Od'occos*, *Dwarf-elder*, *Danewort*, (F.) *Hibble*, *Yible*. The root, interior bark, leaves, flowers, *Sambucus* (Ph. U. S.), berries, (*Baccæ seu Grana Actes*.) and seeds, have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues. The berries of *Sambucus Canadensis*, the *Common Elder* of America, are made officinal in the Pharmacopœia of the United States. A distilled water of the flowers, *Aqua Sambu'ci*, *Elder Water*, is officinal in the London and Edinburgh Pharmacopœias.

SAMBU'CUS HELION, *Sambucus ebulus*—s. *Herbacæ*, *S. ebulus*—s. *Humilis*, *S. ebulus*—s. *Nigra*, *Sambucus*.

SAMBU'CUS PU'BENS, *S. pubescens* seu *racemo'sa*, *Red-berried Elder*; indigenous. The bark, in decoction, is said to be a valuable hydragogue cathartic.

SAMBU'CUS RACEMOSA, *S. pubens*—s. *Vulgaris*, *Sambucus*.

SAMI TERRA, *Sa'mian Earth*. An argillaceous earth, found in the island of *Samos*, to which were ascribed virtues similar to those of the *Terra Lemniæ*.—Galen, *Dioscorides*.

SAM'IUS LAPIS. A stone found in the Isle of *Samos*, which the ancients believed to be astringent and refrigerant.

SAMP'HIRE, *Crithium maritimum*.

SAMPSON, *Black*, *Echinacea purpurea*.

SAMP SUCHUS, *Thymus mastichina*.

SAMPUCUS, *Origanum majorana*.

SAMPSYCHINON, *Sampsuchinum*. An ointment composed of *σάμψυχον*, which was perhaps marjoram. — Dioscorides.

SANABILIS, Curable.

SANABLE, Curable.

SANAMUNDA, *Geum urbanum*.

SANATIO, Curation, Cure.

SANATIVE, Curative.

SANATORIUM, Sanitarium.

SANATORY, Curative.

SAN GIULIANO, MINERAL WATERS OF.

At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; argil and silica. — Santi.

SAND, see Gravel — *s.* Brain, see Pineal gland — *s.* Pineal, see Pineal gland.

SANDALUM CÆRULEUM, *Guilandina moringa* — *s.* *Rubrum*, *Pterocarpus santalinus*.

SAN'DARAC, *Sandara'cha*, *Gum Juniper* or *Sandarach*, *Pounce*, *Gummi Juniperi*, *Sandara'ca*, *Vernix sicca*, *Resina Juniperi*, (F.) *Sondaraque*, *Gomme de Génévrier*. A name given, by the Arabs, to an odoriferous resin, that flows from the *Thuja aphylla*. *Ord.* Coniferæ. *Ser. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.

SANDARACHA GRÆCORUM, Realgar.

SAND-BLIND, nearly blind. A defect of vision, in which small particles seem to fly before the eyes. See Metamorphopsia.

SANDERS, see Saunders.

SANDIVER, see Vitrum.

SANDIX, *Plumbi oxydum rubrum*.

SANDYX, *Plumbi oxydum rubrum*.

SANG, Blood — *s.* *Artériel*, Arterial blood — *s.* *Dragon*, *Rumex sanguineus* — *s.* *Dragon*, see *Calamus rotang* — *s.* *Globules du*, Globules of the blood — *s.* *Porte de*, Hæmorrhagia.

SANGAREE'. Wine and water, sweetened and spiced.

SANGLLOT, Sob.

SANGSUE, Hirudo.

SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.

SANGUIFICATIO, Hæmatisis — *s.* Debiliior, *Hyp hæmatisis*.

SANGUIFLUXUS, Hæmorrhagia — *s.* Uterinus, *Metrorrhagia*.

SANGUIMOTION, Circulation.

SANGUIMOTORY, Circulatory.

SANGUIN, (*Vaisseau*.) Blood-vessel.

SANGUINALIS CORRIGIOLA, *Polygonum aviculare*.

SANGUINARIA, from *sanguis*, *sanguinis*, 'blood,' owing to the colour of its juice. *S. Canadaensis* seu *aculis*, *Bloodroot*, *Bloodroot*, *Puccoon*, *Red Puccoon*, *Red Root*, *Indian Paint*, *Turmeric*. *Nat. Ord.* *Papaveraceæ*. *Ser. Syst.* *Polyandria Monogynia*. A North American plant, the rhizoma, *Sanguinaria* (Ph. U. S.), and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.

SANGUINARIA, *Polygonum aviculare*.

SANGUINE, *Sanguineus*, *Sanguinosus*, *Hæmaticus*, *Hæmatodes*, *Hæmateus*, *Hæmativus*, *Hæmades*, *Hæmades*, *Sanguineus*, *Hæmatic*, (F.) *Sanguin*. From *sanguis*, *sanguinis*, 'blood.' Bloody, blood-like; having the colour of blood, as 'a sanguine countenance.' Relating to, or containing blood — as 'sanguine temperament.' *Plethoric*.

SANGUINEA, *Potassæ nitras*.

SANGUINENESS, *Plethora*.

SANGUINEOUS, *Plethoric*, *Sanguine*.

SANGUINEUS, *Sanguine*.

SANGUINIS ABSORPTIO, *Hæmorrhophesis* — *s.* *Congestio*, *Congestion* — *s.* *Dissolutio*, *Hæmateolysis* — *s.* *Fluor*, *Hæmoptysis* — *s.* *Fluor Vesicæ*, *Cystorrhagia* — *s.* *Ictus*, *Apoplexy* — *s.* *Missio*. *Blood-letting* — *s.* *Profluvium copiosum*, *Hæmorrhagia* — *s.* *Profluvium ex Ore*, *Stomatorrhagia* — *s.* *Stagnatio*, *Hæmostasis*.

SANGUINOLENT, *Sanguinolentus*, from *sanguis*, *sanguinis*, 'blood.' Tinged with blood. An epithet applied, particularly, to the sputa when so tinged. *Bloody*.

SANGUINOSUS, *Sanguine*.

SANGUIPURGIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

SANGUIS, *Blood*, *Sperm* — *s.* *Concretus*, *Coagulum* — *s.* *Draconis*, see *Calamus rotang* — *s.* *Hirci siccatus*, see *Blood* — *s.* *Menstruus*, see *Menses* — *s.* in *Urinâ*, *Hæmaturia* — *s.* *Virginis primum menstruata*, see *Menses*.

SANGUISOR'BA CANADENSIS, *Canada Burnett*. From *sanguis*, 'blood,' and *sorbere*, 'to absorb.' A tall indigenous plant — *Ord.* *Rosaceæ* — with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as

SANGUISOR'BA OFFICINALIS, *S. carnea* seu *rubra*, *Italian Pimpinell*, *Pimpinella Italica* seu *officinalis*, (F.) *Pimpinelle noire*. It was formerly used as an astringent and tonic, in hæmorrhages, dysentery, &c.

SANGUISUGA, Hirudo.

SANGUISUGUM, from *sanguis*, 'blood,' and *sugere*, 'to suck.' A barbarous term, to denote too great an accumulation of blood in the heart. — *Bonetus*.

SANICULA, *Sanicula*, *S. Marilandica* — *s.* *Americana*, *Heuchera cortusa* — *s.* *de Mariland*, *Sanicula Marilandica* — *s.* *Yorkshire*, *Pinguicula vulgaris*.

SANICULA, (from *sano*, 'I heal,') *Saxifraga granulata*.

SANICULA, *S. Europæa* seu *officinarum* seu *mas*, *Astrantia diapiensia*, *Caucalis Smicula*, *Cucullata*, *Dodeca'theon*, *Sym'phytum petræum*, *Diapiensia*, *D. cortusa*, *San'icle*, *Wood March*, (F.) *Toute-saine*. *Ord.* *Umbelliferae*. *Ser. Syst.* *Pentandria Digynia*. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA Eboracensis, *Pinguicula vulgaris* — *s.* *Europæa*, *Sanieula*.

SANICULA MARILANDICA, *San'icle*, *Ma'ryland Swicicle*, *Black Snakeroot*, (F.) *Swicicle de Mariland*. This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever. It has been recommended, also, in chorea.

SANICULA MONTANA, *Pinguicula vulgaris* — *s.* *Officinarum*, *Sanicula*.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from *sanis*, gen. *sanidos*, 'a board,' and *idos*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

SANIE, *Sanies*.

SANIES, *Ichor*, *Tabum*, *Virus*, *Pus malignum* seu *corrosivum*, (F.) *Sanie*, corrupted from *sanguis*, 'blood.' A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIEUX, *Ichorous*.

SANIODES, *Sanidodes*.

SANIOSUS, *Ichorous*.

SANIOUS, *Ichorous*.

SANITARIUM, *Sanato'rium*. Same etymon. as the next. A retreat selected for valetudina-

rians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SANITARY, *San'atory*, from *sanitas*, 'health,' (F.) *Sanitaire*. That which relates to health, and especially to public health; as *établissement sanitaire*, *police sanitaire*.

SANITAS, from *sanns*, 'healthy,' *Hygi'ea*, *Hygi'ea*, *Hygion'asis*, *Hygi'asis*, *Integ'ritas*, *Prosper'itas* *Valetu'dinis*, *Salus*, *Hygi'ea*, *Valetu'do*, *Valitu'do*, *Valetu'do bona seu secun'da seu com'moda*, *Hygi'ea*, *Euzoodyna'mia*, *Health*, (Sc.) *Heil*, *Heyle*, *Heal*, (F.) *Santé*, from *sanns*, 'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity. *Sanity* is often used for soundness of mind.

SANITA, Cure.

SANITY, *Sanitas*.

SANKIRA, *Smilax China*.

SANS PAIRE, (*Veine*), *Azygos vein*.

SANTA CRUZ, (CLIMATE OF.) This West India island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

SANTAL BLANC, *Santalum album*—*s. Rouge*, *Pterocarpus santalinus*.

SANTALUM, see *Pterocarpus santalinus*.

SANTALUM ALBUM, *S. cit'rinnm* seu *pallidum* seu *myrtifolium*, *Sir'ium myrtifolium*, *Yellow Saunders*, (F.) *Santal blanc*. Ord. *Santalaceæ*. *Sex. Syst.* *Tetrandria Monogynia*. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but it is not now employed. The saunders' woods are called, collectively, in French, *Santanx*.

SANTALUM MYRTIFOLIUM, *S. album*—*s. Rubrum*, *Pterocarpus santalinus*.

SANTÉ, *Sanitas*.

SANTONICUM, *Artemisia santonicum*.

SANTONINE, *San'tonin*, *Cinin*. A peculiar crystalline substance obtained from *Artemisia Santonica*. It possesses the anthelmintic properties of the plant. Dose, five or six grains.

SANTORINI, **FISSURES OF**, (F.) *Incisions* ou *Scissions de Santorini*. Clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, **TUBERCLES OF**. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See *Corniculum Laryngis*.

SAYVE, *Sinapis*.

SAO'RIA, *Suarja*. The ripe and dried fruit of *Maesa* seu *Bacob'otrys picta*, an Abyssinian tree, which is administered in its native country, in powder, in doses of from 32 to 44 grammes, as a tæniacuge.

SAP, Sax. *ræpe*. (G.) *Saft*, *A'borum Succus* seu *Lympha*, (F.) *Sève*. The circulating fluid of the vegetable, which corresponds to the blood of the animal.

SAPA, see *Rob*.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHENA, *Saphena*.

SAPHENA, *Saphæ'na*, from *σαφης*, 'manifest,' 'evident.' (F.) *Saphène*. A name given to two subcutaneous veins of the lower limb. These

are: 1. The **GREAT SAPHENA VEIN**, *S. interna*, *Tibio-malle'olar* (Ch.), (F.) *Grande Veine Saphène* ou *Saphène interne*. Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is further increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The **LESSER VENA SAPHENA** or *Saphena externa*, *Perone'o-malle'olar Vein* of Chaus sier, (F.) *Petite Veine Saphène* ou *Saphène externe*, commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPHÈNE, *Saphena*.

SAPHENOUS, *Saphenous*; from *Saphena*. Of or belonging to the saphena.

SAPHENOUS NERVES are two in number, and are branches of the crural or femoral nerve. They are the *short saphenous*—*nervus cutaneus interus*; and the *long saphenous*—*nervus cutaneus internus longus*.

The *external saphenous*, formed by the union of the communicans poplitei and communicans peronei, passes down the leg by the side of the external saphenous vein of the foot.

SAPID, *Sa'porous*, *Sap'idus*, (F.) *Savoureux*, from *sapere*, 'to taste.' Possessed of sapidity. Having the power of affecting the organs of taste.

SAPIDITY, *Sap'idness*, *Saporos'ity*, *Sapor*, (F.) *Sapidité*. The quality of bodies that gives them taste.

SAPIN COMMUN, *Pinus picea*.

SAPIN'DUS, (*sapo*, and *Indus*, 'Indian soap.') *S. Saponaria*, *Saponaria*, *Soap Tree*, (F.) *Savonnier commun*. Ord. *Sapindacææ*. The name of the plant that affords the *Soap Nuts*, *Saponaria Nucula*, *Bac'cæ Bermuden'ses*, *Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SAPO, *Soap*, Sax. *ræpe*, *Smegma*, (F.) *Savon*. A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil. See *Sapo medicinalis*.

YELLOW SOAP is formed of turpentine, oil, and alkali.

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases

of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy*, it is used to favour the solution of resins.

SAPo AC'IDUS, *Acid Soap*, is a combination of a fixed oil with an acid.

SAPo AMMONIACALIS, *Linimentum ammoniæ fortius*—s. *Ammoniacæ oleaceus*, *Linimentum ammoniæ fortius*—s. *Amygdalinus*, *Sapo medicinalis*—s. *Cacaotinus*, *Sapo cæcæoneus*—s. *Calcarius*, *Linimentum aquæ calcis*—s. *Castiliensis*, see *Sapo medicinalis*.

SAPo COCO'NEUS, *Sapo cacaoti'nis*, *Soap of Cocoa-Nut Oil*, (F.) *Savon de cacao*, has been much used in Germany in herpetic affections.

SAPo DURUS, *S. medicinalis*—s. *Hispanicus*, see *S. medicinalis*.

SAPo KALICUS, *S. Mollis*.

SAPo LIQ'UIDUS, *Liquid Soap*, *Lotio saponacea*, is a cosmetic which is composed of olive oil $\frac{5}{8}$ iv, ol. tartari per deliquium $\frac{5}{8}$ ss. Rub together, and add aquæ rosarum $\frac{5}{8}$ xij.

SAPo MEDICINA'LIS, *Sapo amygdali'nis*, *Medicinal Soap*, (F.) *Savon médicinal*, is made with oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispanicus* seu *Castilien'sis*, *Spanish or Castile soap*, *Sapo durus*, *Sapo* (Ph. U. S.), (F.) *Savon dur*, of olive oil and soda.

SAPo MOLLIS, *S. vir'idis* seu *niger* seu *kal'licus*, *Common or Soft Soap*, (F.) *Savon mou ou noir*, is made of potash and oil or tallow. The *Sapo vulgaris* or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

SAPo NIGER, *Black Soap*, *Melanosmeg'ma*, is a composition of train oil and an alkali: and **GREEN SOAP**, *Sapo vir'idis*, of hempseed, linseed, or rape oil, with an alkali. See *Sapo mollis*.

SAPo VEGETABILIS, *Pulvis gummosus alkalinus*—r. *Viridis*, *Sapo mollis*—r. *Vulgaris*, see *Sapo mollis*.

SAPONA'CEOUS, *Saponacea*, (F.) *Sapouacé*, from *sapo*, *saponis*, 'soap.' Soapy. Containing soap, as *Linimentum saponaceum*, *Soap liniment*.

SAPONAIRE, *Saponaria*.

SAPONARIA, from *Sapo*, 'soap,' the juice forming a lather with water. *Soap-wort*, *Bruise-wort*, *Bouncing Bet*, *Struthium*, *Lama'ria*, *Lychin officinalis* seu *sylvestris*, *Iber'ima*, *Boot'ia vulgaris*, (F.) *Saponaire*, *Savonnrière*. *Ord.* Caryophyllaceæ. *Sec. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

SAPONARIA, *Sapindus saponaria*.

SAPONARIE NUCULÆ, see *Sapindus saponaria*.

SAPONÉ. Soap, to which are added substances capable of communicating to it new properties, without affecting its own.—Béral.

SAPONÆA. A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

SAPONULES, *Sapon'uli*, (F.) *Savounles*. Same etymon. Combinations of volatile or essential oils with different bases.

ACID SAPONULES are combinations of such oils with different acids.

SAPONULÉ. A tincture (*aleoolé*), sufficiently charged with soap to cause it to assume a gelatinous shape.—Béral.

SAPONURE. A medicine, formed of soap, in powder, and of resinous or extractive matters.

SAPOR, *Sapiditas*, *Savour*.

SAPOROSITY, *Sapiditas*.

SAPOROUS, *Sapidus*.

SAPOTA, *S. Alchras*, *Achras Sapota* seu *ant'lia* seu *Zapota*, *El nispero*, *Oval-fruited Sapota*, (F.) *Sapotier*, *Sapotillier*, *Sapotilla*. *Fam.*

Sapotaceæ. *Sec. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

SAPOTA ALCHRAS, *Sapota*.

SAPOTIER, *Sapota*.

SAPOTILLA, *Sapota*.

SAPOTILLIER, *Sapota*.

SAPROPYRA, *Typhus gravior*.

SAPROS, *Putrid*, *Rancid*.

SAPROS'TOMUS, from *σαπρος*, 'foul, of a bad odour,' and *στομα*, 'mouth.' One who has an offensive breath.

SAPROTÉS, *Putrefaction*.

SARAPUS, *Sarapans*. One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *σαιρω*, 'I grin,' and *πους*, 'the foot.' See *Kyllosis*.

SARATO'GA, **MINERAL WATERS OF**. The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every part of the United States. The following analysis has been given of the *Congress spring*. In a wine gallon—*gaseous contents*: carbonic acid, 311 cubic inches; atmospheric air, 7. *Solid contents*: chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, gr. 95.788; carbonate of lime, gr. 98.098; carbonate of iron, gr. 5.075; silica, gr. 1.5; bromide of potassium, a trace. Total, gr. 597.943.—Steel.

The *Walton or Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

SARCEPIPOCELE, *Sarcoëpiplocele*.

SARCEPILOMPHALOCELE, *Sarcoëpiplophaloccele*.

SARCEPILOMPHALUS, *Sarcoëpiplophalus*.

SARCIDIUM, *Caruncle*.

SARCINA, *Fœtus*.

SARCINA VENTRIC'ULI, *S. Goodsir'ii*, *L. Sarcina*, 'a pack, a woolpack;' *Merismop'edia ventriculi* (Robin). A microscopic cryptogamous plant found in the fluid of waterbrash.

SARCION, *Caruncle*.

SARCITES, *Anasarca*—s. *Flatusus*, *Emphysema*.

SARCITIS, *Myositis*.

SARCOCE'LÉ, *Hernia caruo'sa*, *Scirrhus Testic'uli*, from *σαρξ*, *σαρκος*, 'flesh,' and *κληη*, 'a tumour;' *Sarco'ma scroti*, (F.) *Hernie charnue*. Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life, is the extirpation of the testicle.

SARCOCOL'LA, (F.) *Colle chair*, from *σαρξ*,

'flesh,' and κολλα, 'glue.' A resinous matter, obtained from *Penæa Sarcocol'la*, *P. mucronat'a*, and other species of *Penæa*; an African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish hue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCODES, Carneous.

SARCOËPIPOCELE, *Sarcepi'pocel'ê*, from σαρξ, σαρκος, 'flesh,' επιπλοον, 'the epiploon,' and κηλη, 'a tumour.' Epiplocele, complicated with sarcoma or sarcocele.

SARCOËPIPLOMPHALUS, *Sarcepi'plom'phalus*, *Sarcepi'plom'phalocel'ê*, from σαρξ, σαρκος, 'flesh,' επιπλοον, 'the epiploon,' and ομφαλος, 'the navel.' Umbilical hernia, formed by scirrhus epiploon or complicated with sarcoma.

SARCOHYDROCELE, Hydro-sarcocele.

SARCOLEMMA, *Sarcol'em'ma*, from σαρξ, σαρκος, 'flesh,' and λεμμα, 'a coat.' The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi.—Bowman. See Perymysium.

SARCOLOGIA, Myology, Sarcology.

SARCOLOGY, *Sarcol'og'ia*, from σαρξ, σαρκος, 'flesh,' and λογος, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

SARCOMA, *Emphy'ma Sarcoma*, *Sarcom'a-tous tumour*, *Sarco'sis*, *Porrus*, *Sarcophy'ia*, *Excarsco'm'a*, *Excarsco'm'a*, *Tumour car'nens*, *Excrescent'ia carno'sa*, *Pol'yypus carno'sus*, from σαρξ, σαρκος, 'flesh.' Any species of excrescence having a fleshy consistence.

SARCOMA, CARCINOMATOUS. Scirrhus—s. Cercosis. see Cercosis—s. Epulis. Epulis—s. Gelatinous, see Tumour, fibro-cellular—s. Mastoid, Mammary sarcoma—s. Medullare, see Encephaloid—s. Medullary, Encephaloid, Hæmatodes fungus—s. Pulpy, Hæmatodes fungus—s. Scroti, Sarcocele.

SARCOMA, COMMON VASCULAR OR ORGANIZED OF ABERNETHY, *Emphy'ma Sarcoma Vasculo'sum*, is vascular throughout: texture simple; when bulky, napped on the surface with arborescent veins. Found over the body and limbs generally.

SARCOMATEUX, Sarcomatous.

SARCOMATODES, Sarcomatous.

SARCOMATOSUS, Sarcomatous.

SARCOMATOUS, *Sarcomato'sus*, *Sarcoma-todes*, (F.) *Sarcomateux*. Belonging to, or having the characters of sarcoma.

SARCOMPHALUM, Sarcomphalus.

SARCOM'PHALUS, *Sarcom'phalum*, from σαρξ, σαρκος, 'flesh,' and ομφαλος, 'the navel.' A scirrhus or fleshy tumour, developed at the navel.

SARCOMYCES, Sarcosponges.

SARCOPHAGUS, Carnivorous, Cathartic.

SARCOPHYIA, Excrescence, Sarcoma.

SARCOPSYLLA PENETRANS, *Chique*.

SARCOPE, *Acnus*.

SARCOPEDES, SCABIEL, see Psora.

SARCOPYODES, from σαρξ, σαρκος, 'flesh,' πονον, 'pus,' and ειδος, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

SARCO'SIS, from σαρξ, σαρκος, 'flesh.' The formation of flesh. Also, sarcoma.

SARCO'SIS BULBI, *Exophthal'mia fungo'sa* seu *sarcomat'ica*. A fleshy growth from the globe of the eye.

SARCOSIS UTERI, Metrauxie.

SARCOSPONG'US, *Sarcomy'ces*, from σαρξ, σαρκος, 'flesh,' and σπογγος, 'fungus.' A fleshy fungus.

SARCOSTOSIS, Osteo-sarcoma.

SARCOTIC, Incarnans.

SARCOUS, from σαρξ, σαρκος, 'flesh.' Of or belonging to, flesh or muscle—as 'sarcous tissue.'

SARCOUS ELEMENTS, *Prim'itive particles*. The elementary particles, which, by their union, form the mass of muscular fibre.—Bowman.

SARDIASIS, Canine laugh, Risus sardonius.

SARDONIA HERBA, Ranunculus sceleratus.

SARDONIASIS, Canine laugh, Risus sardonius.

SARDONIUS RISUS, Canine laugh.

SARE, Essera.

SARRACENIA, *Side-saddle plant*, *Flytrap*. The root of *Sarracenia flava* and *S. variol'aris* is bitter and astringent, and has been used in South Carolina, as a domestic remedy in dyspepsia.

SARRASIN, Polygonum fagopyrum.

SARRÊTE, Trismus infantum.

SARRIETTE, *Satureia hortensis*—s. de Crète, *Satureia capitata*.

SARSA, Smilax sarsaparilla.

SARSAPARILLA, (S.) *Zarza*, 'a briar,' and *parilla*, 'a little vine.' *Menispermum Canadense*, Smilax S.

SARSAPARILLA, FALSE, *Aralia nudicaulis*.

SARSAPARILLA GERMANICA, *Gramen major seu rubrum*, *Salsaparilla Germanica*, *Carex Arenaria*, (F.) *Laiche*, *L. des Sables*, *Salspareille d'Allemagne*, *Chèndent rouge*. Ord. Cyperacæ. Sex. Syst. Monœcia Triandria. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARSAPARILLA, INDIAN, *Hemidesmus Indicus*—s. Wild, *Aralia nudicaulis*.

SARTAPARILLA, Smilax sarsaparilla.

SARTORIUS, from sartor, 'a tailor,' because used in crossing the legs. *Sito'rius*, *Longis'simus Fem'oris*, *Fasci'al'is*, *F. Longus seu suto'rius*, (F.) *Ilio-cresti-tibial*, *Ilio-prætibial* (Ch.), *Conturier*. A muscle situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, Flesh, Pulp.

SARZA, Smilax sarsaparilla.

SASSA GUM. A gum, occasionally carried into the European markets from the East, and answering exactly to Bruce's description of the product of a tree, which he calls *Sassa*. It has considerable resemblance to Gum Tragacanth.

SASSAFRAS, *Laurus sassafras*, *Nectandra cymbarum*—s. Medulla, see *Laurus sassafras*—s. Nut, see *Pichurim beans*—s. *Radicis cortex*, see *Laurus sassafras*.

SASSAFRAS, SWAMP, *Magnolia glauca*.

SASSAFRAS TEA, Saloop.

SASSY BARK, A poisonous bark of a large tree—*Genus*, *Erythrophleum*, *E. Judicia'le*; *Nut. Ord. Fabacæ*; *Red water tree* of Sierra Leone—growing in Western and Central Africa, used in an ordeal to which persons, suspected of witchcraft, secret murder, and other crimes, are subjected, to test their innocence or guilt. Hence it is called, in Congo, *ordeal bark*, and in Ashantee and Liberia, *doom bark*.

SAT'ELLITE, *Satelles*, genitive *Satellit'is*. That which guards. That which is placed near.

SATELLITE VEINS are those that accompany arteries.

SATHE, Penis.
SATIES, Satiety.
SATIETAS, Plesmone, Satiety.
SATIETY, *Sati'etas*, *Satu'ritas*, *Sat'ies*, *Satura'tio*, *Plethos*, *Plesmoni*, from *satiare* (itself from *satis*, 'enough'), 'to give enough.' Disgust for food: commonly produced by repletion.
SATIN, Lunaria rediviva.
SATURANS, Absorbent (medicine.)
SATURATIO, Satiety, Saturation.
SATURATIO, *Satura'tio*, from *saturare*, *saturatum*, (*satis*, 'enough'), 'to satiate.' The state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.
SATUREIA CAPITA'TA, from *Σατυροι*, 'the Satyrs:' owing to its presumed power of exciting to venery. *Cil'iated Sa'tory*, *Thymra*, *Summer Sa'tory*, (F.) *Sarriette* seu *capitata* seu *Cret'icus*, *Cuni'la*, (F.) *Sarriette* de Crète. Ord. Labiatae. Sex. Syst. Didynamia Gymnosperma. Possesses similar properties to thyme.
SATUREIA HORTENS'IS, *Satureia*, *S. sati'va*, *Cuni'la sativa* Plin'ii, *Thymra*, *Summer Sa'tory*, (F.) *Sarriette*. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.
SATUREIA ORIGANOIDES, *Cunila mariana*—s. *Sativa*, *S. hortensis*.
SATURITAS, Satiety.
SATURNI DULCEDO, Plumbi superacetes.
SATURNINE, *Saturni'nis*, from *saturus*, 'lead.' Containing, or caused by, lead.
SATURNINE BREATH. The peculiar odour of the breath in one labouring under Saturnismus.
SATURNISMUS, *Intoxica'tio* seu *Cachex'ia* seu *Dyscrasia saturni'na*, *Molybdocachex'ia*, from *saturus*, 'lead.' Poisoning by lead; lead-poisoning: saturnine cachexy.
SATURNUS, Plumbum.
SATYRIASIS, from *Σατυρος*, 'a Satyr;' because the Satyrs were greatly addicted to venery. *S. furens*, *Satyriasis'nis*, *Satyris'mus*, *Priapism'us*, *Salic'itus*, *Brachi'na*, *Aras'con*, *Lagne'sis* *Salic'itus*, *L. furor moscili'nis*, *Lagne'a*, *Lagne'ia*, *Lagne'sis*, *Lasciv'ia*, *Lasciv'itas*, *Tenti'go vere'tri*. An irresistible desire, in man, to have frequent connexion with females, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.
SATYRIASIS FURENS, Satyriasis.
SATYRIASMUS, Satyriasis.
SATYRION, Orchis mascula.
SATYRISMUS, Satyriasis.
SATYRIUM, *Goodyera pubescens*.
SAUARJA, Saoria.
SAUCE-ALONE, Alliaria.
SAUCE, GREEN, *Rumex scutatus*.
SAUCH, *Salix*.
SAUER KRAUT, (G.), 'sour cabbage,' (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.
SAUGE, *Salvia*—s. *des Bois*, *Teucrium scordium*—s. *Grande*, *Salvia sclarea*—s. *Hornin*, *Salvia horminum*—s. *de Jérusalem*, *Pulmonaria*—s. *Petite*, *Salvia*—s. *Sclaree*, *Salvia sclarea*.
SAUGH, *Salix*.
SAULE, *Salix*.

SAUMURE, Muria.
SAUNDERS, RED, *Pterocarpus santalinus*—s. Tree, *Pterocarpus santalinus*—s. Yellow, *Santalum album*.
SAURA, Lizard.
SAURURUS CER'NUUS, from *σαυρος*, 'a lizard,' and *ουρα*, 'a tail.' *Lizard's Tail*, *Breast weed*. Indigenus; Order, Saururaceae; flowering in June. It has been used in lumbago. The bruised root is emollient, and is a popular application to inflamed breasts.
SAUSAGE POISON, Allantotoxium.
SAUT, Leap.
SAUTEUSES, see *Convulsionnaire*.
SAUVE-VIE, *Asplenium ruta muraria*.
SAVE, Sage.
SAVEUR, Savour.
SAVINE, *Juniperus sabina*.
SAVINIER, *Juniperus sabina*.
SAVON, Sapo—s. *Ammoniaco*, *Linimentum ammoniaco fortius*—s. *Cucaco*, *Sapo coconeus*—s. *Colaïre*, *Linimentum aquæ calcis*—s. *Dnr*, *Sapo durus*—s. *Médiçinal*, *Sapo medicinalis*—s. *Mou*, *Sapo mollis*—s. *Noir*, *Sapo mollis*.
SAVONNIER COMMUN, *Sapindus saponaria*.
SAVONNIÈRE, Saponaria.
SAVONULE, Saponulus.
SAVONULUS, Saponulus.
SAVORY, CILLIATED, *Satureia capitata*—s. Summer. *Satureia hortensis*.
SA'VOUR, *Sapor*, *Taste*, (F.) *Savour*. Quality of bodies, by which they act upon the sense of taste. Chymists, at times, avail themselves of this quality to analyse an unknown substance.
SAVŒUREUX, Savoury.
SA'VOURY, *Sap'idus*, (F.) *Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.
SAVOYAN, *Galium verum*.
SAW, *Prion*, *Serra*, (Da.) *Sawe*, (Sax.) *раза*, (F.) *Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.
SAW, AMPUTATION, *Serra amputato'ria*. The saw used in amputation.
SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.
SAW PALMETTO, *Chamaerops serratula*—s. Wort, *Liatrix*.
SAXIFRAGA, from *saxum*, 'a stone,' and *frango*, 'I break.' *Pimpinella saxifraga*—s. Anglica, *Peucedanum silaus*.
SAXIFRAGA CRASSIFOLIA. Ord. Saxifragaceae. Sex. Syst. Decandria Digynia. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.
SAXIFRAGA GRANULA'TA, *S. alba*, *Sanic'ula*, *Sedum*, *White sax'ifrage*, (F.) *Saxifrage granulee*. Recommended as diuretic and lithontriptic; but not used.
SAXIFRAGA RUBRA, *Spiræa filipendula*—s. Vulgaris, *Peucedanum silaus*.
SAXIFRAGE, BURNET, *Pimpinella saxifraga*—s. *Grannée*, *Saxifraga granulata*—s. Meadow, *Peucedanum silaus*—s. White, *Saxifraga granulata*.
SAXIFRAGUS, Lithontriptic.
SAXON'ICUS PULVIS. A powder, prepared with the roots of the wild and cultivated ange-

lica; the asclepias vincetoxicum, &c. It was considered formerly as an antidote.

SCAB, *Scabies*, from *scabere*, 'to dig.' *Scall*, (Prov.) *Rove*. An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.

SCABBY or SCABBED. Covered or diseased with scabs.

SCABIES, Psora — s. Agria, Lichen — s. Capitis, Porrigo lupinosa, Porrigo scutulata — s. Capitis favosa, Porrigo favosa — s. Crustosa, Radzyge — s. Fera, Ecthyma.

SCABIES FERINA, *Itch of animals*, *Mange*, (pronounced *Moyuge*.) A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable.

SCABIES FERINA, Psoriasis — s. Norwegica Boeckii, Radzyge — s. Papuliformis, Prurigo — s. Sicca, Lichen, Psoriasis — s. Venerea contagiosa, Scherlievo.

SCABIEUSE ORDINAIRE, Scabiosa.

SCABIOLA, Scabies.

SCABIOSA, *S. arvensis*, *Tri'chera arvensis*, *Field Scabious*, (Sc.) *Eastning wort*, (F.) *Scabieuse ordinaire*. Ord. Dipsacæ. *Sex. Syst.* Tetrandria Monogynia. From *scaber*, 'rough,' owing to its rough hairy surface.' The plant is bitter and sub-astringent, and was formerly used in the cure of leprous affections and diseased lungs.

SCABIOSA ARVENSIS, Scabiosa — s. Carduifolia, Echinops.

SCABIOSA SUCCI'SA, *Succisa*, *S. pratensis*, *Asteroccephalus succisa*, *Morsus Diab'oli*, *Devil's bit*, (F.) *Mors du Diable*, has similar properties.

SCABIOUS, Erigeron Philadelphicum — s. Field, Scabiosa — s. Sweet, Erigeron heterophyllum.

SCABISH, *Ænothera biennis*.

SCABRITIES, Lichen, Trachoma.

SCALA, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.

SCALE OF THE COCH'LEA, *Gyri seu Ductus spirales seu Canales cochleæ*, (F.) *Rampes ou Échelles du Limaçon* — are the cavities in the cochlea, separated from each other by the spiral septum. The one — *Scala inter'na seu posterior seu inferior coch'leæ*, *S. tym'pani* — would communicate with the cavitas tympani by the fenestra rotunda, were it not for the membrane that closes it. The other — *Scala exter'na seu anterior seu superior coch'leæ*, *S. vestibuli* — opens into the cavity of the vestibule. The scalæ communicate with each other by an opening at the top of the partition.

SCALA ANTERIOR COCHLEÆ, see Scala — s. Clausa, see Scala — s. Externa cochleæ, see Scala — s. Inferior cochleæ, see Scala — s. Interior cochleæ, see Scala — s. Posterior cochleæ, see Scala — s. Superior cochleæ, see Scala — s. Tympani, see Cochlea, and Scala — s. Vestibuli, see Cochlea, and Scala.

SCALDRICKS, *Sinapis arvensis*.

SCALE, (Sax.) *cale*, from *scylan*, 'to divide, separate;' (G.) *Schale*, 'shell, peel;' *schälen*, 'to shell, to peel.' *Squama*, *Lepis*, (F.) *Escaille*, *Écaille*. An opaque and thickened lamina of cuticle, commonly produced by some degree of inflammation of the true skin, over which it is formed.

SCALE, DRY, Psoriasis.

SCALÈNE ANTÉRIEUR, Scalenus anticus — s. *Postérieur*, Scalenus posticus.

SCALE'NUS, *σκαλνος*, 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists

have given the name to two muscles. 1. SCALENUS ANTI'CUS, *Portion of the Costo-trachelian* (Ch.), (F.) *Scalène antérieur*, is situate at the internal and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebræ. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. SCALENUS POSTI'CUS, (F.) *Scalène postérieur*, *Portion of the Costo-trachelian* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebræ of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmering, have described five scaleni muscles on each side, and have called them *Scalenus prior*, *S. minimus*, *S. lateralis*, *S. medius*, *S. posticus*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anticus*, *medius*, and *posticus*; or, *primus*, *secundus*, and *tertius*; Winslow, Boyer, and many of the French anatomists, — two, as above described.

SCALING — same etymon as Scale — in dentistry, is an operation, which consists in removing the tartar from the teeth.

SCALL, ((Sc.) *Skaw*.) Impetigo, Scab — s. Asbestos, see Eczema of the hairy scalp — s. Crusted, Impetigo — s. Dry, Psoriasis — s. Honeycomb, Porrigo favosa — s. Humid, Eczema — s. Milky, Porrigo larvalis — s. Papulous, Ecthyma — s. Running, Eczema, Impetigo — s. Vesicular, Eczema capitis — s. Washerwoman's, Psoriasis diffusa.

SCALLARD, Porrigo.

SCALLED HEAD, Porrigo, P. scutulata.

SCALP, Teut. *Schelp*, 'a shell.' (Old Eng.) *Scop*. The integuments covering the head. The hairy scalp is called, also, *Capillitium*, *Trichotom*, *Cæsaries*, (F.) *Chevelure*, *Cuir chevelu*.

SCALPEL, *Scalpelium*, *Scalpelus*, *Canter*, *Incisorium*, *Smi'leon*; from *scalpo*, 'I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, Scalpel — s. Lenticulare, Phacopis.

SCALPELLUS, *Bistouri*, Scalpel.

SCALPEUM, *Bistouri*.

SCALPRUM, Raspatorium — s. Chirurgicum, Lancet.

SCALPRUM DENTARIUM, *Lima dentaria*. A tooth-file. A dental file or file used by the dentist.

SCALPRUM RASORIUM, Raspatorium.

SCALY, Squamous.

SCALY DISEASES OF SQUMÆ, *Lepido'ses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCAMMA, Fossa.

SCAMMONÉE D'ALEP, *Convolvulus scammonia*.

SCAMMONIUM, see *Convolvulus scammonia*

— s. *Syriacum*, *Convolvulus scammonia*.

SCAMMONY, *Convolvulus scammonia*.

SCAMMONY, BOURBON. The concrete juice of *Periploca Mauritiana*.

SCAMMONY, GERMAN. The concrete juice of *Convolvulus sepium*.

SCAMMONY OF MONTPELLIER, *Cynanchum Montpellicum*.

SCAMNUM HIPPOCRATICUM, (*scamnum*,

'a bench') *Bathron Hippocrati*'an of Galen. (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counter-extension were effected by a winch. It is described in Galen, Oribasius, Seultetus, &c. See *Bathron*.

SCANDIX. *S. cerefolium*.

SCANDIX BULBOCASTANUM, *Bunium bulbocastanum*.

SCANDIX CEREFOLIUM. *Scandix*, *Scandyls*, *Pecten Ven'erin*, *Cerefolium*, *Daucus Segrin'ius*, *Chærophyllum*, *Ch. Sati'cum* seu *Cerefolium*, *Athris'cus cerefolium*, *Chærofolium*, *Chervil*, (F.) *Cerfeuil*. *Ord.* Umbelliferae. *Sex. Syst.* Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORATA. *Sweet Cic'cley*. Properties the same as the other. Also, *Chærophyllum odoratum*.

SCANDULARIUS MUSCULUS, *Parathenar*, *Transversus pedis*.

SCANDYX. *Scandix cerefolium*.

SCAPHĀ, *Scaphus*, 'a skiff or cock-boat,' from *σκαφος*, 'I make hollow.' The excavation or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rimæ vulvæ. Also the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diaclet'us*.

SCAPHIA. *Nates*.

SCAPHION, *Cranium*, *Papaver* (Capsule).

SCAPHIUM OCULARE, *Pelvis Ocularis*, *Eye-glass*, (F.) *Bassin ou Gondole oculaire*, (*Éclaire*). A small porcelain, glass or metallic vessel, used for applying lotions to the eye.

SCAPHIO-CARPO-SUPER-PIALANGIUS POLLICIS, *Abductor pollicis brevis*.

SCAPHIÖID, *Scaphoi'des*, from *σκαφη*, 'a skiff,' and *εidos*, 'form.' A name given to several parts.

SCAPHÖID FOSSA. *Fossa Scaphoi'des*, (F.) *Enfoncement Scaphöide*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHÖID BONE OF THE HAND, *Os Scaphöides Manûs* seu *navicularê* seu *cymbifor'mê*, *Boat-like bone*, (F.) *Scaphöide de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoides. Between the upper and under cartilaginous surfaces there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity*, where it is articulated with the *os magnum*, which gives name to the bone. There is a *process* on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

SCAPHÖID BONE OF THE FOOT, *Os Scaphöides Pedis* seu *navicularê* seu *cymbifor'mê*, *Boat-like bone*, (F.) *Scaphöide du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, museles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the *ossa cuneiformia*. Between the *os naviculare* and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

SCAPHÖIDE DE LA MAIN, *Os scaphoides manûs*—*a. du Pied*, *Os scaphoides pedis*.

SCAPHÖIDO-ASTRAG'ALAN, *Scaphöido-astragal'um*. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphöido-astragulan ligament*.

SCAPHÖIDO-CUBOID, *Scaphöido-cuboid'æ-us*. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, *Navicularis fossa*.

SCAPHUS, *Auditory canal*, *external*, *Rima vulvæ*, *Scapha*.

SCAP'ULA, *Scap'ulum*, *Plata*, *Omo'plata*, *Homio'plata*, *Scop'tula*, *Epino'tion*, *Latitu'do hu'meri*, *Omo'platê*, *Os latum hu'meri*, *Scutum thorac'is* seu *cordis*, *Spat'hula*, *Pteryg'ium*, *Chelo'nium*, *Spat'ula*; *Blade-bone*, *Shoulder-blade*, (Prov.) *Shield-bone*, *Plate-bone*, *Spade-bone*, (F.) *Omo'plata*. An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has. 1. A *posterior* or *dorsal surface* or *Dorsum*, *Testu'do scapul'æ*, divided transversely into two parts, by a triangular process, called *Spine of the Scapula*; which terminates by a considerable eminence, called *Acromion*. Above the spine, is the *Fossa supra-spinata*; below it, the *F. infra-spinata*. 2. An *anterior* or *costal surface* or *venter*, forming the *Fossa subscapularis*. 3. A *superior* or *cervical edge*, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process*. 4. A *posterior* or *vertebral edge*, called, also, the *base*. 5. An *outer* or *axillary* or *inferior edge*, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrow part called the *cervix* or *neck*. The edges or margins are, also, called *costæ*. The scapula has three angles—*an inferior*, *superior*, and *anterior*.

SCAPULA, *Humerus*.

SCAPULE NASI, *Partes laterales nasi*. The lateral parts of the nose.

SCAPULAL'GIA; from *scapula*, 'the shoulder-blade,' and *algos*, 'pain.' Arthralgia of the shoulder-joint.

SCAP'ULAR, *Scap'ulary*, *Scapula'ris*, (F.) *Scapulaire*, from *scapula*, 'the shoulder-blade.' That which relates or belongs to the scapula.

SCAPULAR APONEURO'SIS. A broad, thin aponeurosis, with decussating fibres; which is attached, *above*, to the spine of the scapula; *below*, to a crest between the *teres major* and *infra-spinatus*; *within*, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

SCAPULAR ARTERIES. These are several. *a.* The *Superior scapular*, *Superficial scapular* of Sömmering, *Dorsal'is scapulæ superior*, *Transversal'is scapulæ*, *T. Hu'meri*. This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical*. It passes behind the clavical, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. *b.* The *inferior scapular* or *common scapular* or *internal scapular* or *subscapular artery*, *A. Thorac'ica axilla'ris* seu *ala'ris* is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus—gives off several branches to the nripit, and divides into two branches:—the one, *Scapula'ris*

interna, and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, the *Dorsalis Scapulae inferior* seu *Circumflexa Scapularis*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

SCAPULAR NOTCH, see Notch, scapular.

SCAPULAR VEINS follow the same course as the arteries, which they accompany.

SCAPULARE, Scapulary.

SCAPULARY, *Scapularis*, *Fascia Scapularis*, from *scapula*. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails passing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAPULODYNIA, from *scapula*, and *odynē*, 'pain.' A hybrid word, signifying pain or rheumatism of the shoulder.

SCAPULO-HUMERAL. An epithet given to the *shoulder-joint*. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the glenoid ligament, and a synovial capsule.

SCAPULO-HUMÉRAL, Teres major—*s. Huméro-olécraniēn*, Trieps extensor cubiti—*s. Hyoidien*, Omohyoideus—*s. Radial*, Biceps flexor cubiti—*s. Trochitérien*, grand, Infra-spinatus.

SCAPUS, Penis, see Hair.

SCAR, Cicatrix.

SCAR, *Seam*. To mark with a cicatrix or seam;—as *scarred*, (Sc.) *arred*, means marked with a cicatrix or seam.

SCARABÆOLUS HEMISPHERICUS, *Coccus cacti*.

SCARBOROUGH, MINERAL WATERS OF. *Scarborough Spa*. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge: the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCARCHT, Hermaphrodite.

SCARDAMYGMUS, *Scardamyxis*, (F.) *Clignement*, from *σκαρδαμυσσιν*, 'to wink.' Winking.

SCARFSKIN, Epidermis.

SCARIFICATION, *Scarificatio*, *Amyxis*, *Schasis*, *Catacasmus*, *Catuchasmus*, *Amygmus*, *Schasmus*, *Encharaxis*, from *σκαριφασαι*, 'to make a slight scratch.' The act of scarifying. Also, a small incision, *Am'yehē*, made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes,—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French, *Mouchetures*.

SCARIFICATION, *Scarificatorium*, *Schasterrinum*. Same etymon. An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIFICATORIUM, Scarificator.

SCARIOLA, *Cichorium endivia*, *Lactuca scariola*.

SCARIOLE, *Cichorum endivia*.

SCARLATA, *Scarlatina*.

SCARLATINA, from (L.) *scarlatte*, 'a deep red.' *Scarlatia*, *Emanthesis Rosalia*, *Rosalia*, *Rossalia*, *R. squamosa*, *Rosalia*, *Rubeola*, of some, *Morbilli ignei* seu *confluentes*, *Morbis scarlatinosus*, *Febris scarlatinosae* seu *rubra*, *Gutturis morbus epidemicens Foresti*, *Purpura*, *Typhus scarlatinus*, *Porphyrismus*, *Porphyrisma*, *Scarlet* or *Rash-fever*, (F.) *Fièvre rouge*, *F. pourprée*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned:—the *S. simplex* seu *febris* seu *benigna* seu *sine anginâ*, in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling, and the contagious property slight;—and the *S. Anginosa* seu *Paristhmica* seu *Cynanchica* seu *mitior*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlatina maligna* seu *gravior*, has been reckoned a variety of this, in its worst degree. It agrees with the *Cynanche maligna* of Cullen.

Scarlatina belongs to the *Major exanthemata*, and is a disease, chiefly, of children. The eruption differs from that of measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbificants, such as mercury and squill, &c.

SCARLATINA ANGINOSA, see Scarlatina—*s. Benigna*, see Scarlatina—*s. Cynanchica*, see Scarlatina—*s. Febris*, see Scarlatina—*s. Gravior*, see Scarlatina—*s. Miliaris*, *Rubeola*—*s. Mitior*, see Scarlatina—*s. Paristhmica*, see Scarlatina—*s. Pustulosa*, *Rubeola*—*s. Rheumatica*, *Dengue*—*s. Sine Anginâ*, see Scarlatina—*s. Urticata*, *Urticaria*.

SCARLATINOUS, *Scarlati'nal*, *Scarlatino'sus*. Relating or appertaining to scarlatina.

SCARLET BERRY, *Solanum dulcamara*.

SCARLET FEVER, Scarlatina.

SCATACRASIA, *Scoracrasia*.

SCATACRATIA, *Scoracrasia*.

SCAW, *Sambucus*.

SCEAU DE SALOMON, *Convallaria polygonatum*.

SCELAL'GIA, from *σκαλος*, 'the leg,' and *αλγος*, 'pain.' Pain of the leg.

SCELALGIA ANTICA, *Neuralgia femoro-pretibialis*—*s. Postica*, *Neuralgia femoro-poplitea*—*s. Puerperarum*, *Phegmatia dolens*.

SCELETEU'SIS. Mummification. Also, the mode of making a skeleton, *Skeletope'a*, *Syntax'is*.

SCELETOLOGIA, *Skeletology*.

SCELETON, *Skeleton*.

SCELETOPEA, *Sceletusis*.

SCELETUM, *Skeleton*—*s. Artificiale*, see *Skeleton*—*s. Naturale*, see *Skeleton*.

SCELONCUS, *Phegmatia dolens*.

SCELORRIEU'MA, *Rheumatis'nis cruris*, from *σκαλος*, 'the leg,' and *ρευμα*, 'defluxion, rheumatism.' Rheumatism of the leg.

SCELOS, *Leg*.

SCELOTYRBE, Chorea, Porphyra nautica — s. Febrilis, see Subsultus tendinum — s. Festinans, Paralysis agitans — s. Tarnitismus, Chorea.

SCEPARNON, Annios, Asia.

SCEPASTERIUM, *Coverchef*.

SCEPASTRUM, *Coverchef*.

SCEPTRUM, Penis.

SCHASIS, Scarification.

SCHASMUS, Scarification.

SCHASTERION, Flenu, Lancet, Scarificator.

SCHIBA ARABUM, Artemisia santonica.

SCHEDULA, Prescription.

SCHERBET', *Sherbet', Serbet', Tscherbet' Sar-be'thum, Sorbet'tum, Sorbet'tum*. A drink prepared by the Turks, Persians, Egyptians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Skerljevo, Male di Scherlievo, Male di Breno, Male di Finne, Male di Scarlideo, Male scabioso venereo, Margarettiza, Morbus Croatia seu fluminien'sis, Eramba'sia Illy'ica, Scabies venerea contagio'sa, Venereal Itch*. A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are: — pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

Affections, known by this name, as well as by those of *Male di Breno, Falcadi'na, Boala* and *Frenga*, prevail in the frontier countries of the Austrian empire, and are generally regarded as contagious, of syphilitic origin, and as having been introduced from a surrounding country. The terms appear, however, in the course of time, to have been applied to a variety of ulcers, eruptions, and other morbid conditions in no way connected with syphilis, so that they lost their peculiar signification. — Sigmund.

SCHERO'MA. A dryness of the eye from the want of lachrymal secretion. — Dictionaries.

SCHIAS, Neuralgia femoro-poplitea.

SCHIATICUS, Sciatic.

SCHIDAKE'DON, *Schidace'dum, Schindace'dum, Schindal'annus, Schindal'mus*, from *σείζω*, 'I cleave.' A longitudinal fracture of a bone. — Galen.

SCHINDACEDUM, Schidakedon.

SCHINDALAMUS, Schidakedon, Schindylesis.

SCHINDALESTIS, Schindylesis.

SCHINDALMUS, Schidakedon, Schindylesis.

SCHINDYLE'SIS, *Schindale'sis, Schindal'annus, Schindal'mus*. An articulation of bones — by furrowing, as it were; as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces: — from *σχιζω*, 'I split into small pieces.' — Hippocrates.

SCHINELÆ'ON, from *σχιτος*, 'the mastic tree,' and *λαϊον*, 'oil;' *Oleum lentis'cinum*. Oil of mastic. — Dioscorides.

SCHINOCEPHALUS, Scillocephalus.

SCHINOS, Scilla.

SCHINZNACH or HAPSBURG, MINERAL WATERS OF. These springs are situate three leagues from Baden, and are amongst the most celebrated bathing-places in Switzerland. The waters are of the saline sulphurous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases.

SCHISMA, Fissure, Rima.

SCHISTOCEPH'ALUS, from *σχιστος*, 'cleft,

separated,' and *κεφαλη*, 'head.' A monster having some part of the head cleft or fissured. — Gurlt.

SCHISTOCOR'MUS, from *σχιστος*, 'cleft, separated,' and *κορμος*, 'trunk.' A monster having some part of the trunk cleft or fissured. — Gurlt.

SCHISTOM'ELUS, from *σχιστος*, 'cleft, separated,' and *μελος*, 'a limb.' A monster whose limbs are fissured.

SCHISTORRHACHIS, Hydrorachis.

SCHISTOSO'MUS, from *σχιστος*, 'cleft,' and *σωμα*, 'body.' A malformation of the abdomen, in which the fissure and evagination extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly. — Vogel.

SCHIZA, Rima, Rima vulvæ.

SCHIZATRICH'IA, *Trichos'chisia, Schizotrich'ia*, from *σχιζω*, 'I split,' and *τριξ*, *τριχος*, 'a hair.' The splitting of the hairs at their extremities. — J. P. Frank.

SCHLANGENBAD, MINERAL WATERS OF. Schlangenbad is a much-frequented watering-place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

SCHNAPPS, SCHIEDAM, see Gin.

SCHNEIDERIAN MEMBRANE, Pituitary membrane.

SCHENANTHUS, *Juncus odoratus*.

SCHOLA, School.

SCHOLLERA OXYCOCCOS, *Vaccinium oxycoccos*.

SCHOOL, *Schola*, (F.) *École*. A place of education. In Europe the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated, are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time not fewer, perhaps, than 40. Those most numerous attended, are Jefferson Medical College of Philadelphia, the medical department of the University of Pennsylvania, and the University of Nashville.

SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF. The waters of this New Jersey Spring are a carbonated chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silice, and carbonate, and oxide of iron.

SCHORBUTUS, Purpura.

SCHOUSBÆA COCCINEA, *Cacocicia coccinea*.

SCHWALBACH or LANGEN-SCHWALBACH, MINERAL WATERS OF. Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, oxygen, &c. Employed as a tonic.

SCHWANN, WHITE SUBSTANCE OF, see Substance, white, of Schwann.

SCHWENDECK, MINERAL WATERS OF. These waters are about 5 leagues from Munich, in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and

oxide of iron, and are much used for cutaneous affections.

SCIATIC, *Sciaticus*, *Ischiatic*, *Ischiaticus*, *Sciaticus*, (F.) *Sciaticus*, from *ισχιον*, 'the haunch.' A word formed by contraction from *ischiatric*, which latter is still used. See *Ischiatic*.

SCIATIC NERVE, GREAT, *Nervus ischiadicus*, *Great femoro-popliteal* (Ch.), (F.) *Grand nerf sciaticus*, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third abductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

SCIATIC NERVE, LESSER, *Inferior glutæal branch of the sacral plexus*, *Lesser femoro-popliteal nerve* (Ch.), (F.) *Nerf petit sciaticus*, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cutanei clunium inferiores* — to the glutæus maximus; a *sciatic branch or infra-pelvic cutaneous or perineal cutaneous*, *Pudendaalis longus inferior*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.; and a *posterior femoral cutaneous branch* — *middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

SCIATIC NOTCH, GREAT, *Sciatic Foramen*, *Incisura ischiadica major*, (F.) *Grande échancrure sciaticus* ou *grand trou sciaticus*, is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments. The *lesser sciatic notch*, *Incisura ischiadica minor*, *Luna Albi'ni*, (F.) *Petite échancrure ischiaticus*, is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

SCIATIC REGION, *Ischiadic region*.

SCIATIC SPINE, *Spine of the Ischium*, *Spinous Process of the Ischium*, is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

SCIATICA, Neuralgia femoro-poplitea.

SCIATIQUE, Neuralgia femoro-poplitea, Sciatica.

SCIE, Saw.

SCIENTIA HERMETICA, Alchymy—s. Mendicini, Medicina—s. Medica, Medicina.

SCIEROPIA, from *σκιεος*, 'shady,' and *ωψ*, 'the eye.' A defect of vision, in which all objects have a darker hue than natural.

SCILLA, *σκίλλα*, from *σχιζω*, 'I cleave, I split' [?]. *Scilla seu Squilla maritima*, *Scylla*, *Aschil*, *Schinos*, *Oculus Typhonis*, *Omithogalum maritimum* seu *squilla*, *Stellæris* seu *Urginea scilla*, *Cepa maritima scilla*, *Squilla*, *Squill* or *sea onion*, *Eye of Typhon*, (F.) *Oignon marin*. Ord. Liliaceæ. Sex. Syst. Hexandria Monogynia. Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when

rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine*. Dose, gr. j to v of the dried root, united or not with mercury.

SCILLA ESCULEN'TA, *Phalan'gium esculentum*, *Eastern Quamash*, *Wild Hy'acynth*; indigenous; flowering in May. An article of diet amongst the Western Indians. It is made into bread and poultices for inflamed breasts.

SCILLITIC, *Scilliticus*, (F.) *Scillitique*, from *scilla*, 'squill.' Containing squill.

SCILLOCEPH'ALUS, *Schinoceph'alus*, from *σκίλλα*, 'the squill,' and *κεφαλη*, 'head.' One who has a large bulbiform head.

SCINCUS, *σκινκος* or *σκιγγος*. A species of *Saurus* or *Lacer'ta*, common in Egypt, and much extolled by the ancients as alexipharmic and aphrodisiac.

SCINTIL'LA VEN'ERIS, 'a spark, a relic of Venus.' A name given, by Paracelsus, to the impotence and loss of power in the limbs, produced by syphilis.

SCINTILLEMENT DE L'ŒIL, Confusio.

SCIOM'ACHY, *Skionachiu*, *Skiamachia*; from *σκια*, 'a shade,' and *μαχη*, 'a fight.' A gymnastic exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

SCIRHUS, *Scirrhus*.

SCIRPUS PALUSTRIS, *Eleocharis palustris*.

SCIRRHE, *Scirrhus*.

SCIRRHOBLEPHARONCUS, see *Scleriasis*.

SCIRRHOCELE, *Orcheocele scirrhosa*.

SCIRRHOGAS'TRIA, *Scirrhus ventriculi*, (F.) *Squirrogastris*; from *scirrhus*, and *γαστηρ*, 'stomach.' *Scirrhus of the stomach*.

SCIRRHOID, *Scirrhoïdes*, *Scirrho'des*, from *σκίρος*, 'scirrhus,' and *εἶδος*, 'resemblance.' Resembling scirrhus.

SCIRRHOMA, *Scirrhus*.

SCIRRHOPHTHAL'MIA, *Sclerophthal'mia*, from *scirrhus*, and *ὀφθαλμος*, 'the eye.' *Cancer oculi*. *Cancer of the eye*.

SCIRRHOPHTHALMIA PALPEBRARUM, see *Scleriasis*.

SCIRRHOSARCA NEONATORUM, Induration of the cellular tissue.

SCIRRHOSIS, *Scirrhus*.

SCIRRHIOUS, *Scirrho'sus*, (F.) *Squirrheux*, from *scirrhus*. Of or belonging to scirrhus.

SCIRRHUS SARCO'MA OF AB'ERNETHY, *Emphy'ma sarco'ma scirrhosum*. Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS, *Scirrhus*, *Squirrhus*, *Skirrhus*, *Scirrho'ma*, *Scirrho'sis*, *Cancer scirrho'sus*, *Carcinoma simplex seu fibrosum*, *Induratio maligna*, *Sclerus*, *Carcinom'atous sarco'ma*, *Hard or Fibrous cancer*; from *σκίρος*, 'hard,' 'indurated;' (F.) *Squirrhe*, *Squirre*, *Schirre*, *Skirre*, *Cancer dur* ou *squirrheux* ou *fibreux*. A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface;

and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrhusis* for a livid excrecence caused by inflammation.

SCIRRUS ET CARCINOMA VENTRICULI, see Gastrostenosis cardiaca et pylorica — s. Hepatitis, Hepatosecirrhos — s. Intestinorum, Enteropathia cancerosa — s. Palpebrarum, see Scleriosis — s. Testiculii, Sarcocele — s. Uteri, Metroscirrhos — s. Ventriculi, Gastroscirrhos.

SCISSION, see Generation.

SCISSIPARITÉ, see Generation.

SCISSORS, *Scissor*, 'a carver,' from *scindere*, *scissum*, 'to cut.' *Forfecer*, *Forpex*, *Paulis*, *Tamis*, (F.) *Ciseaux*. A well-known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are straight or curved. Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à cuniler*; at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles are also much used. They are called in France *Ciseaux cunilés*. Scissors are used for dividing soft, loose, indurated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrecences, &c.

SCISSURA, Fissure — s. Vulvæ, see Rima.

SCISSURE, Rhagades.

SCISSURE DE GLASER, Fissure, glenoid — s. *Grand méliane du Cervelet*, Valley — s. *de Santorini*, Santorini, fissure of.

SKERLJEVO, Scherlievo.

SCLAREA, Salvia sclarea.

SCLEREMA, Induration of the cellular tissue.

SCLÉRÈME, Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERENCEPIHALIA, *Induratio cerebri*, from *σκληρος*, 'hard,' and *εγκεφαλον*, 'the brain.' (F.) *Endurcissement du cerveau*. Induration of the brain.

SCLERIA, Scleriosis.

SCLERIA'ASIS, *Sclero'ma*, *Sclero'sis*, *Scler'ia*, *Sclery'smus*, *Neph'ritis*, from *σκληρος*, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Collo'itas* seu *Scirrhopthalmia* seu *Scirrhus palpebrarum*, *Scirrhublepharom'ens*; at others, hardness of the genital organs of the female; probably synonymous with scirrhus. — Galen. Paulus. Hardness of bones, *Fragilitas Ossium*.

SCLERITIS, Sclerotitis.

SCLERODERMA, Induration of the cellular tissue.

SCLERODES, Sclerotic.

SCLERO-IRITIS, Inflammation of the sclerotic and iris.

SCLEROMA, Induration of the cellular tissue, Scleriosis.

SCLEROMENIX, Dura mater.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, Hordeolum, Scirrhopthalmia.

SCLEROS, Hard.

SCLEROSARCO'MA, from *σκληρος*, 'hard,' and *σαρκωμα*, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Induration of the cellular tissue, Scleriosis.

SCLEROSTENOSIS CUTANEA, Induration of the cellular tissue.

SCLEROTIC, *Sclerotica*, from *σκληρος*, 'I harden.' *Cornea opaca*, *Sclero'des*, *Tunica dura* seu *albuginea* seu *durior* et *crassior* seu *extima* seu *alba* seu *caulida* seu *innominata oculi*, *Sclerotia*, (F.) *Sclerotique*. A hard, resisting, opaque membrane, of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tunica albuginea*. It forms the white of the eye, *Albulmen* seu *Album oculi*, *Lan'chades*, *Log'ades*, *Loch'ades*, *Len'cades*. The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. Its inner surface is of a light brown colour, owing to a delicate areolar tissue containing brown pigment cells; and hence called *Membra'na* seu *Lamina fusca*. In the fœtus, the sclerotic may be separated into two very distinct laminae.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICITIS, Sclerotitis.

SCLEROTICONYX'IS, *Scleronyx'is*, *Sclerotonyx'is*, from *scleroticus*, and *νυξ*, 'puncturing.' Perforation of the sclerotic in the operation for cataract by depression.

SCLEROTICUS, Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTITIS, *Inflammatio Sclerotica*, *Leuc'itis*, *Lonchad'itis*, *Logad'itis*, *Scler'itis*, *Sclerocit'itis*, *Rhenmat'ic ophthalmia*, *Ophthalmia arthrit'ica*, from *scleroticus*, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.

SCLEROTIUM CLAVUS, see Ergot.

SCLERUNTIUS, Indurans.

SCLERUS, Induration, Scirrhus.

SCLERYNTICUS, Indurans.

SCLERY'SMA, from *σκληρος*, 'hard.' Induration; also, induration of the liver.

SCLERYSMUS, Scleriosis.

SCLIRUS, Scirrhus.

SCLOPETA'RIOUS, from *sclopetum*, 'a gun.' Relating to a gun. Hence, *Aqua sclopetaria*, a water for gunshot wounds. *Vul'nera sclopetaria*, gunshot wounds, &c.

SCLOPETOPLAGE, Wounds, gunshot.

SCOB'S, *Prisma*, *Xyama*, *Ramen'um*, *Ran'ra*. A shaving; also, an alkali; and the scoria of any metal.

SCENANTHUM, Junceus odoratus.

SCOLECESIS, Helminthiasis.

SCOLEXIASIS, Helminthiasis.

SCOLEX, Ascaris lumbricoides.

SCOLIOMA, Scoliosis.

SCOLIO'SIS, *Scolio'ma*, *Skolio'sis*, *Rhachio-scolio'ma*, from *σκολιος*, 'crooked.' A distortion of the spine to one side. See Hump.

SCOLOPENDRA, Asplenium scolopendrium.

SCOLOPENDRIA, Asplenium ceterach, and A. scolopendrium.

SCOLOPENDRIUM LINGUA, Asplenium scolopendrium — s. *Officinatum*, Asplenium scolopendrium — s. *Phyllitis*, Asplenium scolopendrium — s. *Ruta muraria*, Asplenium ruta muraria — s. *Vulgare*, Asplenium scolopendrium.

SCOLOPOMACHÆRION, from *σκολοπαξ*, 'the woodcock,' and *μαχαιρα*, 'a knife;' so called because it is bent a little at the extremity like a woodcock's bill. A sort of blunt-pointed bistoury. — Scultetus.

SCOLYMUS SATIVUS, *Cynara scolymus*.
SCOOP, Teut. Schoepe, *Cochlea'rē*, (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.
SCOP, Hebd. Scalp.
SCOPA REGIA, Ruscus.
SCOPARIUS, see *Spartium scoparium*.
SCOPE, σκοπη, *Scopy*, *Scop'ia*, *Scopos*, from σκοπεω, 'I look around.' A common suffix to words meaning 'view, inspection,' as *cranoscopy*, *stethoscopy*, &c.
SCOPOLINA ATROPOIDES, *Hyoscyamus scopolia*.
SCOPTULA, *Scopula*.
SCOPULA, Brush.
SCOR, Excrement.
SCORACRAT'IA, *Scoraera'sia*, *Scataera'sia*, *Scataerati'a*, *Copraerati'a*, *Copraera'sia*, *Incontinenti'a Alvi*, from σκορ, 'excrement,' and ακρατια, 'want of control.' Want of power to retain the fæces. Involuntary evacuation of the fæces.
SCORBUT, *Porphyra nautica*, *Purpura hæmorrhagica*—*s. des Alpes*, *Pellagra*—*s. de Terre*, *Purpura hæmorrhagica*.
SCORBU'TIC, *Scorbnticus*, (F.) *Scorbntique*, From *scorbutus*, 'scurvy.' That which belongs to scurvy. One affected with scurvy.
SCORBUTUS, *Purpura*—*s. Alpinus*, *Pellagra*—*s. Nauticus*, *Porphyra nautica*—*s. Oris*, *Cancer aquaticus*.
SCORDINEMA, *Carebaria*, *Pandiculation*.
SCORDINISMUS, *Carebaria*, *Pandiculation*.
SCORDIUM, *Teucrium scordium*.
SCORDON, *Allium*.
SCORDOSMINE, *Oxyd*, *cystic*.
SCORITH, *Sulphur*.
SCORIUM, *Scrotum*.
SCORODON, *Allium*.
SCORPIODEX'IS, from σκορπιος, 'the scorpion,' and δεξις, 'bite'—more properly, *SCORPIOSTIG'MA*; from σκορπιος, and στιγμα, 'puncture.' The sting of the scorpion.
SCOR'PION, *Scor'pio*, *Scorpins*, from σκορπιος, 'I enrage.' A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An *Oil of Scorpion* was once made from them, which is not now used.
SCORPIOSTIGMA, *Scorpiodexis*.
SCORPIUS, *Scorpion*.
SCORTUM, *Scrotum*.
SCORZONE'RA, *S. hu'milis seu lana'ta seu nervo'sa*, *Escorzone'ra*, from *scurzo*, old Spanish for a viper, *Viperaria*, *Serpentaria Hispan'ica*, *Offic'inal viper's grass*, *Viper's grass*, *Goat's grass*. Family, *Cichoraceæ*. Sex. Syst. Syngenesia *Polygamia*. The roots have been used as alexipharmics, and in hypochochriacal disorders and obstructions of the viscera. The root of the *Scorzovera Hispan'ica* is esculent, but inefficient as a drug.
SCOTAS'MA, *Scoto'ma*, *Scoto'dia*, *Scoto'sis*, *Scotos*; from σκοτος, 'darkness.' Obscurity of vision, darkness, *Suffusio rad'ians*. Also *Scotodinia*.
SCOTCH FIDDLE, *Psora*.
SCOTODIA, *Scotasma*, *Scotodinia*.
SCOTODIN'IA, *Scoto'ma*, *Dians Scoto'ma*, *Scotod'ine*, *Tenebrico'sa verti'go*, *Scotos*, *Scotas'ma*, *Scoto'sis*, *Scot'omy*, from σκοτος, 'darkness,' and δεινω, 'I turn round.' Giddiness, with impaired sight, often succeeded by headach. See *Vertigo*.
SCOTOMA, *Scotasma*, *Scotodinia*.
SCOTOMY, *Scotodinia*.

SCOTOS, *Scotasma*, *Scotodinia*.
SCOTOSIS, *Scotodinia*.
SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.
SCOUR, *Diarrhœa*.
SCOURING, *Diarrhœa*.
SCRAT, *Hermaphrodite*, *Psora*.
SCRATCH, *Psora*.
SCREATUS, *Excretion*.
SCRIPULUM, *Scruple*.
SCRIPTIUM, *Scruple*.
SCRIPTULUM, *Scruple*.
SCRIPULUM, *Scruple*.
SCRIPULUS, *Scruple*.
SCRIVENER'S CRAMP, *Cramp*, *writers'*.
SCROBIC'ULUS, *Scrobic'ulum*, (F.) *Fossette*. A little ditch or furrow; diminutive of *scrobs*, 'a ditch.'
SCROBIC'ULUS CORDIS, *Anticard'ium*, *Procard'ium*, (F.) *Fossette du cœur*, *Avant-cœur*, *Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.
SCROBICULUS VARIOLÆ, *Pockmark*.
SCROFFÆ, *Scrofula*.
SCROF'ULA, *Scroph'ula*, *Scroph'ulæ*; from *scrofa*, 'a sow'; as *Chœras* is from χοιρος, 'a hog,' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis*, *Morbus scrophulo'sus*, *Vit'ina scrophulo'sum*, *Cacochym'ia seu Cachex'ia seu Dyscras'ia scrophulo'sa*, *Pæda troph'ia glandulo'sa*, *Struma*, *Chœras*, *Coiras*, *Tabes Glandula'ris*, *Adeno'sis scrofulo'sa*, *Scroffæ*, *King's evil*, *The Evil*, *Quince*, *Cruels* (Scotticè), (F.) *Scrophules*, *Scrofules*, *Strumes*, *Ecrovelles*, *Tubercus froïdes*, *Tubercules des glandes lymphatiques*, *Mal du Roi*. A state of the system characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.
SCROFULA ABDOMINALIS INTERNA, *Physconia strumosa*.
SCROFULAIRE, *Scrophularia nodosa*—*s. Aquatique*, *Scrophularia aquatica*.
SCROFULARIA, *Scrophularia*.
SCROFULES, *Scrofula*.
SCROFULEUX, *Scrofulous*.
SCROF'ULOUS, *Scrophulo'sus*, *Scroph'ularius*, *Strumous*, *Strumo'sus*, (F.) *Scrofulentz*, *Strumeuz*. Suffering from, or relating to, scrofula.
SCROOBY-GRASS, *Cochlearia officinalis*.
SCROOF, *Scarf*.
SCROG-LEGGED, *Cnemosciosis*.
SCROPHULA, *Scrofula*—*s. Mesenterica*, *Tabes mesenterica*—*s. Mollucana*, *Fambœsia*.
SCROPHULÆ, *Scrofula*—*s. Gonorrhœicæ*, *Gonorrhœa impura*.

SCROPHULARIA, from *scrofula*, against which it has been employed. *S. Nodosa*.

SCROPHULARIA AQUATICA, *Betonica aquatica*, *Ficaria*, *Ferraria*, *Castranigula*, *Greater Water Figwort*, *Water Betony*, (F.) *Serofulaire aquatique*. Ord. Scrophulariaceæ. The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FÆTIDA, *Scrophularia nodosa* — *s. Lanceolata*, *S. Nodosa* — *s. Marilandica*, *S. Nodosa* — *s. Minor*, *Ranunculus ficaria*.

SCROPHULARIA NODOSA, *S. fœtida* seu *vulgaris* seu *luccolnta* seu *Marilandica*, *Millenaria*, *Scrophularia*, *Figwort*, *Kenelwood*, *Holmes-wood*, *Heal-all*, (F.) *Serofulaire*, *Herbe aux érouelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, serofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, *Scrophularia nodosa*. SCROPHULARIUS, Scrofulous.

SCROPHULES, *Scrofula* — *s. Mésentériques*, *Tubes mesenterica*.

SCROPHULOSIS, Scrofula.

SCROPHULOSUS, Scrofulous.

SCROTAL, *Scrotalis*; from *scrotum*. Relating to the scrotum, — as *Hernia scrotalis*, serotal hernia.

SCROTAL NERVE, see Genito-crural Nerve.

SCROTOCELĒ, Oscheocele, Oschocele. A hybrid term; from (L.) *scrotum*, and *κηλη*, 'a tumour.' *Hernia Scrotalis*, *Scrotal hernia*. Inguinal hernia, descending into the scrotum.

SCROTUM, from *scortens*, *scortenum*, 'made of leather' [?]. *Scorium*, *Oschē*, *Oschēus*, *Oscheus*, *Oscus*, *Oschēon*, *Ochēus*, *Pevin*, *Scortum*, *Marsupium*, *Bur'sula*, *Bursa testinum* seu *virilis*, *Capillus* [?], *Orchis*, *Folliculus genitalis*, *Hernia*, *the Purse*, *the Cod*, (F.) *Les bourses*. The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

SCROTUM CORDIS, Pericardium — *s. Pendulum*, *Rhachosis*.

SCRUBIE, *Purpura nautica*.

SCRUBIE-GRASS, *Cochlearia officinalis*.

SCRUPLE, *Diobolon*, *Grammarinum*, *Scrupulus*, *Scrupulum*, *Scriptulus*, *Scriptulum*, *Scriptum*, *Scrupulum*, *Scriptum*, *Scrupulum*. A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture, *Scudamore's*.

SCULL, *Cranium* — *s. Cap*, *Calvaria*.

SCURF, Sax. *scurf*, Teut. *Schorft*; (Prov.) *Seroof*, *Furfura*. Small exfoliations of the cuticle are so called.

SCURFY, *Furfuraceus*.

SCURVY OF THE ALPS, *Pellagra* — *s. Land*, *Purpura hæmorrhagica* — *s. Petechial*, *Purpura simplex* — *s. Sea*, *Porphyra nautica*.

SCURVY GRASS, *Sisyrinchium Bermudianum* — *s. Grass*, *common*, *Cochlearia officinalis* — *s. Grass*, *lemon*, *Cochlearia officinalis* — *s. Grass*, *wild*, *Cochlearia cornopopus*.

SCUTELLA, *Cup*.

SCUTELLARIA CAROLINIANA, *S. integrifolia*.

SCUTELLA'RIA GALERICULA'TA, from *scutella*, 'a cup,' in allusion to the form of the calyx. *Cassida galericulata*, *Tertiana'ria*, *Skull-cap*, (F.) *Casside bleue*, *Toque*. Ord. Labiata. *Sex. Syst.* *Didymania Angiosperma*. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTELLARIA HYSSOPIFOLIA, *S. integrifolia*. SCUTELLARIA INTEGRIFOLIA, *S. hyssopifolia* seu *Caroliniana*, — another indigenous variety, — is an intense bitter.

SCUTELLA'RIA LATERIFLO'RA, *Skull-cap*, *Mad-dog skullcap*, *Madweed*, *Hoodwort*, *Blue Pimpernel*. An indigenous plant, which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind. By some, however, it is regarded as a good nervine.

SCUTICULA DIGITORUM MANÛS, Phalanges of the fingers.

SCUTTER, *Diarrhoea*.

SCUTULÆ DIGITORUM MANÛS, Phalanges of the fingers.

SCUTUM, Thyroid cartilage — *s. Cordis*, *Scapula*, *Sternum* — *s. Genu*, *Patella* — *s. Pectoris*, *Sternum*, *Thorax*.

SCUTUM STOMACHICUM. A large plaster, applied to the breast or stomach.

SCUTUM THORACIS, *Scapula*.

SCYBALA, plural of *σκαβαλον*, 'dung.' *Enterolithus Scybalum*, *Excrementum Alvi sicco'ra*, *Fæces induratae*. Hard fecal matters discharged in round lumps.

SCYLLA, *Scilla*.

SCYPHOPHORUS PYXIDATUS, *Lichen pyxidatus*.

SCYPHUS AUDITORIUS, Infundibulum of the cochlea — *s. Cerebri*, Infundibulum of the brain — *s. Viessencii*, Infundibulum of the cochlea

SCYROS, *Callosity*.

SCYTALIDES DIGITORUM MANÛS, Phalanges of the fingers.

SCYTHICA, (RADIX.) *Glycyrrhiza*.

SCYTHROPASMUS, from *συθρος*, 'gloomy;' *σχυθροπασμῶν*, 'to look gloomy;' *Valtus tet'icens et mæstus*. A gloomy; depressed countenance, of bad augury in serious diseases

SCYTITIS, *Cytitis*.

SCYTODEPSIUM, *Tannin*.

SEA AIR. The air in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for serofulous and debilitated individuals. The sea and sea-coast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, *Nausea marina*.

SEA-WARE, see *Pila marina* — *s. Water*, see *Water*, *sea*.

SEAL. GOLDEN, *Hydrastis Canadensis* — *s. Solomon's*, *Convallaria polygonatum* — *s. Solomon's*, *great*, *Convallaria canaliculata* — *s. Solomon's*, *smaller*, *Convallaria pubescens*.

SEAM, *Cicatrix*.

SEARCHER, *Body searcher*.

SEARCHING, *Sounding*; from (F.) *chercher*, 'to seek.' The operation of ascertaining, by the introduction of a metallic instrument, whether there is a stone in the bladder.

SEASONING, *Aclimation* — *s. Fever*, *Fever*, *stranger's*.

SEAT, *Anus* — *s. Bone*, *Ischion*.

SÉBACÉ, *Sebaceous*.

SEBA'CEOUS, *Seba'ceus*, (F.) *Sébacé*; from *sebum*, 'suet.' That which has the nature of suet.

SEBACEOUS FLUX, Stearrhœa.

SEBACEOUS, SEBIP'AROUS or SEBIF'EROUS GLANDS, *Sebaceous Follicles* or *Crypts*, *Folliculi sebacei*, *Cryptæ sebaceæ*, *Oil* or *Mil'itary glands*, are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smegma cutaneum*, *Sebum cutaneum*, having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of the female. They secrete a sebaceous matter, which emits a peculiar odour; and hence, after the name of those who described them, have been called *Glandulæ odoriferæ Tyso'ni*, *G. Tyso'ni*, *Glandulæ Littrid'ne* seu *Littrii*, *Tyson's glands*, (F.) *Glandes de Littré*; and, also, *Glandulæ odoriferæ* seu *sebaceæ glandis*, *G. coronæ penis*, *Folliculi sebacei coronæ glandis*, *Glandulæ odoriferæ præputii*.

SEBASTOMA'NIA, from *αεβαστος*, 'worshipped,' and *mania*. Religious insanity, Demonomania.

SEBESTENA, *Cordia myxa* seu *sebest'na* seu *Africa'na* seu *domestica* seu *obl'igna*, *Sebest'na officinalis*, *Seb'esten*, *Sebsten*, *Myxa*, *Cornus sanguinea*, *Prunus sebest'na*, *Smooth-leaved Cordia*, *Assyr'ian plum*, (F.) *Sebestier myxa*. *Ord. Cordiaceæ*. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBESTIER MYXA, *Sebestena*.

SEBIFEROUS, see Sebaceous.

SEBIPAROUS, see Sebaceous.

SEBORRHAGIA, Stearrhœa.

SEBORRHŒA, Stearrhœa.

SEBSTEN, *Sebestina*.

SEBUM, Pinguedo, *Sevum*—s. *Cutaneum*, see Sebaceous glands—s. *Palpebrale*, *Chassie*—s. *Præputiale*, *Smegma præputii*.

SECA'LE, *S. cereal'è* seu *barbatum*. The Rye plant. (F.) *Seigle*. *Ord. Gramineæ*. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency: and hence its internal use at first generally produces a laxative effect.

SECALE BARBATUM, *Secale*—s. *Cornutum*, *Ergot*—s. *Luxurians*, *Ergot*—s. *Maternum turgidum* seu *temulentum*, *Ergot*.

SECALIS MATER, *Ergot*.

SÉCATEUR DES AMYGDALES, *Amygdalotome*.

SECERNENT, *Secreting*.

SECERNING, *Secreting*—s. *Substance of the kidney*, see *Kidney*.

SECESSIO FÆCUM, *Defecation*.

SECESSUS NIGER, *Melæna*.

SÈCHE, *Sepia*.

SECLUSORIUM, *Sac*.

SECONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary*. A *secondary amputation* is one performed after the constitutional effects of an injury have mainly passed away. See *Fever*, *secondary*; and *Hæmorrhagia*, for *Secondary Hemorrhage*.

SECUNDINES, *Secundines*.

SECRETA. Same etymon as *Secretion*. Things or matters secreted or separated from the blood.

SECRETING, *Secreterius*, *Secer'ning*, *Secer'ent*, *Excer'nent*, (F.) *Sécréteur*, *Sécrétoire*. Same etymon as *Secretion*. That which secretes, — as a *secreting organ*.

SECRETIO, *Secretion*—s. *Lactis*, *Galactosis*—s. *Lotii*, *Uropoësis*—s. *Urinæ*, *Uropoësis*—s. *Vicaria*, see *Vicarius*.

SECRETION, *Secre'tio*, *Poc'risis*; from *secerere*, *secretum*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *follicular*, and *glandular*. Simple secretions are those which exist ready-formed in the blood, and pass out of the vessels by an act of exosmose, whilst the more complicated are formed from the liquor sanguinis by cell-agency. The latter, alone, are, by some, called *Secretions*.

SÉCRÉTOIRE, *Secreting*.

SECRETORIUS, *Secreting*.

SECT, *METHODICAL*, *Methodists*.

SECTIO, *Section*. The act of cutting. A division.

SECTIO ALTA, see *Lithotomy*—s. *Anatomica*, *Dissection*—s. *Cadaveris*, *Autopsia cadaverica*—s. *Cadaveris legalis*, *Autopsia cadaverica*—s. *Cæsarea*, *Cæsarean section*—s. *Franconiana*, see *Lithotomy*—s. *Hypogastrica*, see *Lithotomy*—s. *Lateralis*, see *Lithotomy*—s. *Legalis*, *Autopsia cadaverica legalis*—s. *Mariana*, see *Lithotomy*—s. *Nympharum*, *Nymphotomy*—s. *Perinæalis*, *Perineal section*—s. *Rectovesicalis*, see *Lithotomy*—s. *Renalis*, *Nephrotomy*—s. *Tendinum*, *Tenotomy*—s. *Vagino-vesicalis*, *Colpocystotomia*—s. *Vesicalis*, *Lithotomy*.

SECTION, *Sectio*—s. *Sigaultian*, *Symphysotomy*.

SECUNDÆ, *Secundines*.

SECUNDINÆ, *Secundines*.

SECUNDINES, *Hystera*, *Denter'ion*, *Metra*, *Secun'dæ*, *Secund'na*, *After-birth*, (F.) *Arrière-fuit*, *Secundines*, *Délieve*, from *secundare*, (*secundus*, 'second,') 'to follow.' All that remains in the uterus after the birth of the child,—viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fœtus; hence their name. See *Délieve*.

SECUNDUS PROPRIORUM AURICULÆ, *Retrahens auris*.

SEDANTIA, *Sedatives*.

SED'ATIVES, *Sedati'va*, *Paon'ia*, *Sedan'tia*, *Adec'ta*, *Catastaltica*, *Deprime'ntia*, (F.) *Sédatifs*, *Calmans*, *Tempérans*, from *sedare*, *sedatum*, 'to settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: *Acidum Hydrocyanicum*, *Acidum Hydro-sulphuricum*, *Tabaicum*, *Missio Sanguinis*, and certain gases by inhalation, as azote, carbonic acid [?], carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, *Levator ani*.

SEDES, *Anus*, *Excrement*—s. *Cruentæ*, *Dysentery*, *Hæmatochezia*—s. *Lactescentes*, *Cœliac flux*—s. *Procidua*, *Proctocele*.

SEDHEE, *Bangue*.

SED'IMENT, *Sedimen'tum*, *Lemma*, *Residen'tia*. Same etymon. (F.) *Dépôt*. A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypostasis*. *Hypostema*, *Residen'tia*, *Subsiden'tia*, (F.) *Dépôt de Urine*. This sediment or deposit varies in different states of the system. In calculous affec-

tions, it is one of the most important objects of attention.

SEDIMENTUM, Sediment — s. Urinæ laterici-um, see Lateritious — s. Urinæ pityroides, see Furfuraceous.

SEDITIA, Nates.

SEDLITZ, MINERAL WATERS OF, *Seid- litz water*. Springs in Bohemia, near Prague, which are simple salines. They contain sulphate and carbonate of magnesia, chiefly chloride of magnesia, sulphates of potassa, soda, and lime, carbonic acid and carbonate of lime. They are employed as purgatives in a multitude of diseases.

ARTIFICIAL SELDITZ POWDERS, in no respect, however, resembling the natural ingredients, are formed of *Sulph. et Potassa tritras* ℞ij, *Soda car- bon.* ℞ij, in one paper; *Acid tartaric.* gr. xxxv, in another. For half a pint of water.

SÉDON BRÛLANT, Sedum — s. *Reprise*, Sedum telephium.

SEDUM, *S. acré* seu *glucia'lè* seu *minus* seu *vermicula'rè*, from *sedeo*, 'I sit,' owing to its at- tachment to rocks and walls. *Illec'ebra*, *Hel- léc'ebra*, *Illec'ebrium*, *Vermicula'rè*, *Vermiculi- ria*, *Piper muric'è*, *Sempervi'vum acré*, *Aci'rhyr- sion*, *Ed'nion*, *Wull pepper*, *Jack of the But'tery*, *Picket*, *Bird's bread*, *Stone crop*, *Biting Stone crop*, *Small Houseleek*, (F.) *Joubarbe acré*, *Orpin brûlant*, *Vermiculaire brûlante*, *Sédon brûlant*. Ord. Crassulacæ. *Sex. Syst.* Decandria Penta- gynia. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM, *Saxifraga granulata* — s. *Glaciale*, Sedum — s. *Majus*, *Sempervivum tectorum* — s. *Minus*, Sedum.

SEDUM TELEPHIUM, *S. telephoides*, *Faba crassa*, *Cras'sula*, *C. Major*, *Illec'ebra major*, *Tele'phium*, *Faba'ria cras'sula*, *Faba crassa*, *Anacamp'seros*, *A. al'bicans* seu *triphyl'l'a sen vulga'ris*, *Orpine*, (F.) *Sédon reprise*, *Grand orpin*, *Fève épua'se*, *Joubarbe des vignes*, &c. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEDUM TELEPHOIDES, *S. Telephium* — s. *Vermi- culare*, Sedum.

SEED, Sperm.

SEGMENTA CARTILAGINEA, see Trachea.

SEGMENTA'TION, *Segmenta'tio*, from Lat. *segmentum*, 'a segment,' itself from *seco*, 'to cut.' The act of being divided into segments or por- tions. (F.) *Segmentation*, *Fractionnement*, *Sillon- nement*. A term applied to the division of the vitellus or yolk into 'segments,' each containing a transparent vesicle, which may be a descendant of the primordial or germ cell.

SEGNIT'IA, *Segnit'ies*, from *seguis*, 'slug- gish.' Sluggishness or torpor in the exercise of a function: — as *SEGNITIES ALVI*, Torpor of the bowels; *SEGNITIES VIRIUM*, Languor.

SEGNITIES, Segnitia.

SEGRAY, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEGU, Sago.

SEIDLITZ, Sedlitz.

SEIDSCHÛTZ, SEYDSCHÛTZ or SAID- SCHÛTZ, MINERAL WATERS OF. Bitter springs, in the neighbourhood of those of Püllna and Sedlitz, in Bohemia, which contain chiefly sulphate, nitrate, muriate, and carbonate of magnesia, sulphates of potassa, soda, and lime; carbonate of lime, iron and manganese. The water is an excellent cathartic, and is well known in Europe.

SEIGLE, Secale — s. *Corun*, Ergot — s. *Cor- rompu*, Ergot — s. à *Éperon*, Ergot — s. *Ergotée*, Ergot — s. *Ergotisé*, Ergot — s. *Fruix*, Ergot.

SEIN, Uterus, see Mamma.

SEIRIASIS, *Coup de Soleil*.

SEIZURES, HIDDEN, see Hidden seizures.

SEKISKAYAVODKA, see Spirit.

SEL, Salt — s. *Admirable de Lémery*, *Magnesia sulphas* — s. *Admirable perlé*, *Sodu*, phosphate of — s. *Ammoniac*, *Ammoniaë murias* — s. *Arménic*, *Ammoniaë murias* — s. *Arseuic de Moëquer*, Ar- seniate of protoxide of potassium — s. *de Cuisine*, *Soda*, muriate of — s. *de Déroque*, *Narcotine* — s. *d'Égra*, *Magnesia sulphas* — s. *de Lait*, Sugar of Milk — s. *Marin*, *Soda*, muriate of — s. *d'Opium*, *Narcotine* — s. *d'Oseille*, *Potassa oxalis* — s. *de Saturne*, *Plumbi superacetat* — s. *de Verre*, see Vitrum — s. *Volatil d'Angleterre*, *Ammoniaë car- bonas*.

SELAGO, *Camphorosma Monspeliciae*, *Lycopodium selago*.

SELENE, Moon, see Nail.

SELENIASIS, *Sonnambulism*.

SELENIASMUS, *Sonnambulism*.

SELENOBLETUS, *Lunatic*.

SELENOGAMIA, *Sonnambulism*.

SELERY, *Apium graveolens*.

SELF-ABUSE, *Masturbation*.

SELF-HEAL, *Prunella*.

SELF-LIMITED. An epithet applied to dis- eases which appear to run a definite course, but little modified by treatment, — small-pox, for example.

SELF-POLLUTION, *Masturbation*.

SEL' BRA, *Semil'bra*, *Sembella*, 'half a pound.' Six ounces, Troy; eight Avoirdupois.

SELIN'ITES, *σελινιτης*. Wine impregnated with the seeds of the *σελινον* or *snallage*. — *Dios- corides*.

SELINUM ANGELICA, *Angelica Sylvestris* — s. *Galbanum*, *Bubon galbanum* — s. *Impera- toria*, *Imperatoria* — s. *Lactescens*, *Peucedanum palustre* — s. *Marsh*, *Peucedanum palustre* — s. *Opononax*, *Pastinaca opononax* — s. *Oreoselinum*, *Athamanta aureoselinum* — s. *Ostruthium*, *Impera- toria* — s. *Palustre*, *Peucedanum palustre* — s. *Pastinaca*, *Pastinaca sativa* — s. *Peucedanum*, *Peucedanum* — s. *Pubescens*, *Angelica sylvestris* — s. *Sylvestre*, *Angelica sylvestris*, *Peucedanum palustre* — s. *Thysselinum*, *Peucedanum palustre*.

SELLA, *S. Turcica* — s. *Equina*, *S. Turcica* — s. *Familiarica*, *Lasanum* — s. *Obstetricia*, *Diphrus* — s. *Sphenoidalis*, *S. Turcica*.

SELLA TUR'CICA, *Ephipp'ium*, *Fossa Pituita- ria*, *Sella*, *S. equina* seu *sphenoida'lis*, *Pituitary fossa*, *Turkish Saddle*, (F.) *Selle Turcique* ou *du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes, and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle*. The broad rough plate, behind, and somewhat overhanging the *Sella Turcica* is the *Dorsum Ephippii*.

SELLA TURCICA, *Pituitaria fossa*.

SELLE TURCIQUE, *Sella Turcica* — s. *du Turc*, *Sella Turcica*.

SELS NEUTRES, *Neutral salts*.

SELTZ or SELTZER, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburg, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient.

ARTIFICIAL SELTZER WATER may be made from *muriat. acid.* gr. xxxv, *water* ℞j, *white mar- ble* gr. iij. Stop up till dissolved. Add *carbonate of Magnesia*, gr. v, and, after some time, *uncar- bonate of soda*, gr. xxxij. Close it till used.

SEMELLA, Selibra.

SEMECARPUS ANACARDIUM, *Avicennia tomentosa*.

SEMEIOGRAPHY, *Semeiograph'ia*, *Semeiography*, *Semeiogra'phia*, *Symptomatog'raphy*, from *σημειον*, 'a symptom,' and *γραφη*, 'a description.' A description of symptoms or signs of disease.

SEMEIOLOGY, *Semeiologicē*, *Semeiology*, *Semeiologicē*, *Phænomenolog'ia*, from *σημειον*, 'a symptom,' and *λογος*, 'a discourse.' (F.) *Séméiotique*. The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

SEMEION, Sign — s. Boethematicum, Indication.

SEMEIOSIS, Semeiology.

SÉMÉIOTIQUE, Semeiology.

SEMEN, Sperm — s. Badian, *Illicium anisatum* — s. Cina, see *Artemisia santonica* — s. Contra, see *Artemisia santonica* — s. *Contra d'Alep*, *Artemisia santonica* — s. *Contra vermes*, *Artemisia santonica* — s. *Masculinum* seu *virile* seu *genitale*, Sperm — s. *Muliebree*, Sperm (of the female) — s. *Sanctum*, see *Artemisia santonica* — s. *Santonici*, see *Artemisia santonica* — s. *Zedoariæ*, see *Artemisia santonica*.

SEMENCE, Sperm.

SEMENTINA, *Artemisia santonica*.

SEMI, from *ἡμισ*, 'half.' *Semi* or *demi*, in composition, universally signifies 'half,' both in French and English.

SEMIANIMIS, *Semimor'tuus*, *Sem'inex*, *Semivivens*; from *semi*, 'half,' and *animus*, 'soul.' Half-living. Half-dead.

SEMI-BULB OF THE FEMALE, *Calvus vestibuli*.

SEMICANALICULUS, Sulcus.

SEMICANALIS, Sulcus.

SEMICEPHALUS, *Hemicephalus*.

SEMICIRCULI OSSEI, *Semicircular* canals. SEMICIRCULAR, *Semicircula'ris*. From *semi*, and *circulus*, 'a circle.' (F.) *Demicirculaire*. That which represents the half of a circle.

SEMICIRCULAR CANALS, *Canales* seu *Ductus semicirculares* seu *tubæform'es* seu *circula'res*, *Semicirculi ossei*, *Funes* seu *Canaliculi semiannullares labyrinthi*, (F.) *Canaux demicirculaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical*, *canalis semicircula'ris verticalis superior*; another *posterior* or *oblique*, *canalis semicircula'ris verticalis posterior*, and the third *exterior* or *horizontal*, *canalis semicircula'ris horizontalis*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampullæ*; and by both extremities they open into the vestibule, in the sac at its superior part—the *Sacculus Ellipticus*, *Alveus* seu *Utriculus* seu *Sinus communis*, *Sinus* seu *Alveus utriculus*, *Socculus vestibuli* or *Median sinus*, *Utricule*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sacculus sphaer'icus*, or *Sacculus*.

SEMICIRCULUS EXSCULPTUS, Hiatus diaphragmatis aorticus.

SEMICONGIUS, Half a gallon, or four pints.

SEMICUBIUM, *Semicupium*, *Inses'sio*, *Inces'sio*, *Encathis'ma*, *Ecathis'ma*, (F.) *Demi'bain*, from *semi*, and *enbare*, 'to lie down.' A half-bath, or such as receives only the hips or extremities.

SEMICUPIUM, Bath, half, Semi-cubium.

SEMI-FIBULEUS, *Peronæus brevis*.

SEMI-INTEROSSEUS INDICIS, *Abductor indicis*.

SEMI-INTEROSSEUS POLLICIS, *Opponens pollicis*.

SEMILIBRA, *Selibra*.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoes, a sort of nocturnal bird. The fruits are a celebrated South American remedy in Ague.

SEMILUNAR, *Semiluna'ris*, (F.) *Demilunaire* ou *Semilunaire*, from *semi*, and *luna*, 'the moon.' Having the shape of a half-moon.

SEMILUNAR CARTILAGES, *Semilunar fibrocartilages*, *Sigmoid cartilages*, *Cartilag'ines sigmoideæ* seu *semilunares*, are two fibro-cartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

SEMILUNAR GANGLION, — *Ganglion abdominale* seu *splanchnicum* seu *transversum* seu *sola'rè*, *G. suprènal*, (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery numerous filaments proceed, which go to the formation of the solar plexus.

SEMILUNAR NOTCH OF THE STERNUM, *Fourchette* — s. *Valves*, *Sigmoid valves*.

SEMILUNULA UNGUITUM, see *Nail*.

SEMI-MAS, Eunuch.

SEMIMASCULATUS, Eunuch.

SEMIMASCULUS, Eunuch.

SEMIMEMBRANEOUS, *Semimembranosus*.

SEMIMEMBRANOSUS, *Semimembra'neus*, (F.) *Ischio-popliti-femoral*, *Ischio-popliti-tibial*, (Ch.) *Demimembraneus*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

SEMIMORTUUS, *Semianimis*.

SEMINA CATAPUTLÆ MAJORIS, see *Ricinus communis*.

SEMINA FRIGIDA MAJORA. The *greater cold seeds*. The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINORA. The *lesser cold seeds*. The ancients gave this name to the seeds of the lettuce, purslane, endive, and cichory.

SEMINA RICINI VULGARIS, see *Ricinus communis*.

SEMINAL, Spermatic — s. *Filaments*, *Spermatozoa* — s. *Fluid*, *Sperm* — s. *Granules*, see *Granule*.

SEMINALE MEMBRUM, *Penis*.

SEMINALIS, Spermatic.

SEMINERVOSUS, *Semi-tendinosus*.

SEMIORBITULARIS, *Orbicularis oris*.

SEMIPESTIS, *Typhus*.

SEMINEX, *Semianimis*.

SEMINIA MORBORUM, *Predisposition*.

SEMINIFEROUS, from *semen*, *seminis*, 'sperm,' and *fero*, 'I carry.' *Spermatoph'orous*.

An epithet given to the vessels which secrete and convey the seminal fluid.

SEMINIST, Animalculist.

SEMINIUM, Sperm.

SEMIORAPHY, Semeiography.

SEMIOLGY, Semeiology.

SEMIION, Sign.

SEMIOTICE, Semeiotice — s. Faciei, Physiognomy.

SEMIPLÉGIA, Hemiplegia.

SEMIEXTUM, Hemiection.

SEMICILICUS. A weight of one drachm or three scruples. — Rhodius.

SEMIIDERATIO, Hemiplegia.

SEMIIDERATUS, see Hemiplegia.

SEMIOMNIS, Coma.

SEMIOPITUS, Coma.

SEMIOPORUS, Coma.

SEMIPECULUM. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy. — Fabricius Hildanus.

SEMI SPINA' LIS COLLI, *Semispinalis seu transversa-spinalis seu spina'lis seu transversa'lis colli*, *Articulo-spinalis*, *Spinalis cervicis*, *Transverso-spinal*, (F.) *Demi-épineux ou transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebrae, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted in the spinous processes of all the cervical vertebrae, except the first and last. Its action is, to extend the neck obliquely backwards and to one side.

SEMI SPINALIS DORSI, *Semi-spinalis externus*, *Transverso-spinalis dorsii*, *Semi-spinatus*, (Riolan), *Transverso-spinal*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebrae, by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebrae, by as many tendons. Its action is, to extend the spine obliquely backwards.

SEMI SPINALIS EXTERNUS, *Semi-spinalis dorsii* — s. *Internus*, *Transversalis dorsii* — s. *Spinatus*, *Longissimus dorsii*, *Semi-spinalis dorsii*.

SEMI SPINATUS COLLI, *Semispinalis colli*.

SEMI'SIS, *Semis*. The half of a pound, ounce, drachm, &c.

SEMITENDINOSUS, *Semi-nerrosus*, (F.) *Ischio-crúti-tibialis*, *Ischio-pré-tibialis*, (Ch.) *Demitendineux*, *Deminerveux*. This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium — to which it is attached by a flat tendon, common to it and the biceps — as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its uses are the same as those of the semimembranosus.

SEMITERTIANA, Hemitritæa.

SEMIUNCIA, Hemiuncion.

SEMI VIR, Eunuch.

SEMI VIVUS, Semianimis.

SEMOLA, BULLOCK'S; a farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids, is said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

SEMOLINA, *Manna croup*. This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the

latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland, it is called *Cracoe groats*.

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. A recent analysis makes it consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

SEMPERVIVUM ACRE, Sedum.

SEMPERVIVUM TECTORUM, *S. majus seu tectorum*; from *semper*, 'always,' and *vivo*, 'I live,' because always green, *Aizoön*, *Beiholaten*, *Buphthalmus*, *Barba Jovis*, *Agriosin'ara*, *Andrachahara*, *Chrysoesper'mm*, *Horse-Leek*, *Sengreen*, *Pear*, *Fonets*, (Prov.) *Cyphel*, *Jupiter's Beard*, (F.) *Jonbarbe des toits*. The leaves have a mild, subacid austerity, and are often applied to bruises and old ulcers.

SEMUDA, Betula.

SEMUNCIA, Hemiuncion.

SENA, Cassia senna.

SÉNÉ, Cassia senna — s. *d'Amérique*, Cassia Marilandica — s. *Faux*, Colutea — s. *Indigène*, Colutea — s. *des Prés*, *Gratiola officinalis*.

SENEBIERA CORONOPUS, Cochlearia coronopus.

SENECA OIL, Petroleum, (New York.)

SENECIO, *S. vulg'aris*, from *senex*, 'an old man,' in allusion to the grayish down on many species; *Erig'erm*, *Cortalon*, *Erigeron*, *Gronndsel*, *Fireweed*, (Se.) *Gronndic Swallow*, (F.) *Senecio commun*. Ord. Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and antiseorbutic.

SENECIO AU'REUS, *Golden ragweed*, *Wild valerian*, *Life root*, *Squaw root*; indigenous. Is an excitant, diaphoretic, and diuretic. The dried plant is used in decoction; — \mathfrak{z} ss to Oj of water.

SENECIO HIERACIFOLIUS, *Erechtites hieracifolius*.

SENECIO JACOBÆ'A, *Jacobæ'a*, *St. James's Wort*, *Ragwort*, (Se.) *Bruwede*, *Weebo*, (F.) *Jacobée*. The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has often been employed in cases of wounds and bruises.

SENEÇON COMMUN, Senecio.

SENECTA, Senectus.

SENECTA ANGUIM. The east skin of a serpent. A decoction of it is said to cure deafness!

SENECTA DECREPITA, *Deerepitude* — s. *Extrema*, *Deerepitude* — s. *Summa*, *Deerepitude* — s. *Ultima*, *Deerepitude*.

SENECTUS, *Senecta*, from *senex*, 'an old man;' *Gerax*, *Se'nium*, *Ætas senilia seu provec'tu seu malo*, *Old age*, *Senility*, (F.) *Vielléssé*. The last period of life, commencing, according to some, at 60 years of age, — according to M. Flourens at 70, — but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties.

SENECTUS ULTIMA, *Deerepitude*.

SENEGA, *Polygala senega*.

SENÉGAL, GUM, *Gummi Senegalens'æ seu Sen'æa seu Sen'ega seu Sen'ica*. The exudation from *Aca'cia seu Mimosa Senegal*. — Ord. Leguminosæ. *Sex. Syst.* Polygamia Monœcia — which grows in the country of Africa through

which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE, see *Polygala senega*.

SENÉGRAIN, *Trigonella fœnum*.

SENEKA, *Polygala senega*.

SENEVÉ, *Sinapis*.

SENGREEN, *Sempervivum tectorum*.

SENILE, *Seni'lis*, from *senex*, 'an old man.' Relating or belonging to old age: — as '*senile delirium*;' dotage.

SENILITY, *Senectus*.

SENNA, *Cassia senna*—s. *Alexandrina*, *Cassia senna*—s. *American*, *Cassia Marilandica*—s. *Bladder*, *Colutea arborescens*—s. *Essence of*, prepared, *Selway's*, see *Infusum sennæ compositum*—s. *Germanica*, *Colutea*—s. *Italica*, *Cassia senna*—s. *Prairie*, *Cassia, chamæcrista*—s. *Wild*, *Cassia chamæcrista*, *Cassia Marilandica*.

SENS, *Sense*—s. *Génital*, *Appetite*, *venereal*.

SENSATION, *Sensa'tio*, from *sentire*, *sentium*, 'to feel;' *Æsthe'ma*. The consciousness or cognisance by the brain of an impression caused by an external body on the organs of the senses. (F.) *Sentiment*. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external*, *internal*, and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objective sensations* are produced by impressions on the peripheral nerves; as in vision, audition, &c. *Subjective sensations*, are such as originate centrally, or in the encephalon,—as *tinnitus aurium*.

SENSATIONAL, *Sentient*.

SENSE, *Sensus*, *Sens'io*, *Æsthe'sis*, (F.) *Sens*. Same etymon as *Sensation*. A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number; sight, hearing, smell, taste, and touch. Of these, the first two and the last administer more to the intellect: and, hence, have been called by some, the *intellectual senses*; the other two seem more destined for the nutrition of the body: and, hence, have been termed *corporeal* or *nutritive senses*. Other senses have been suggested — as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesis, &c.

SENSES, NERVOUS SYSTEM OF THE, *Medulla oblongata*.

SENSIBILITAS, *Sensibility*—s. *Anomala*. see *Irritable*—s. *Aucta*, see *Irritable*—s. *Morbosa*, see *Irritable*.

SENSIBILITY, *Sensibil'itas*. Same etymon as *Sensation*: *Æsthe'ma*. The faculty of receiving and transmitting impressions, and having the consciousness of them. It thus includes three secondary properties, *impressibility*, (F.) *impressibility*, *transmissibility*, and *perceptibility*. *Bichat* defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal*: in the latter, where not, he terms it *organic*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does

not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible — if not in health—in disease. The free extremities of the hair and nails, and the epidermis, are not so. See *Insensibility*.

SENSIFEROUS, *Sentient*.

SENSIO, *Sense*.

SENSORIUM, *Sensorium*.

SENSORI-VOLIT'IONAL. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

SENSORIAL, *Sentient*.

SENSORIAL POWER, according to *Dr. Wilson Philip*, is composed of the two functions of sensation and volition. *Dr. Darwin* included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

SENSORIUM, *S. commu'nē*, *Or'ganon sensorium internum*, *Sensito'rium*, *Empo'rium spirituum*, *Æsthe'terion*, *Sens'ory*. Same etymon. The common centre of sensations.

SENSORY, *Sensorium*, *Sentient*.

SEN'SORY GANG'LIA. A name given by *Dr. Carpenter* to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory*, *optic*, *auditory*, and *gustatory*.

SENSORY NERVES, *Nerves of sensation*, are so called in contradistinction to *Motor* nerves. There are *general sensory nerves*—as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory*, as those of the senses.

SENSUS ÆGRITUDINIS, *Indisposition*—s. *Osmometricus*, *Olfaction*—s. *Perversus*, *Pseudæsthesia*.

SENTIENT, *Sen'tiens*, *Sens'ory*, *Ideü'genous*, *Sens'o'rial*, *Sens'a'tional*, *Sensif'eros*. Same etymon. Feeling, causing feeling.

SENTIENT EXTREMITIES OF NERVES are their minute terminations in the organs.

SENTINA, *Pituitary gland*.

SENTIMENT, see *Sensation*.

SEPARATO'RIUM, from *separare*, *separatum*, 'to separate.' A surgical instrument, for separating the pericranium from the skull.

A *Sep'aratory*, *Vitrum Hypoclepticum*, is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, *Sepedonogenesis*.

SEPEDON, *Putrefaction*.

SEPEDONODES, *Putrid*.

SEPEDONOGEN'ESIS, *Sepedogen'esis*, from *σηπέδων*, 'putrescency,' and *γένεσις*, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPEs, *Sæ'pes*, 'a hedge,' 'a row,' as *Sepes* seu *Se'ries* seu *Pecten den'tium*:—a row of teeth.

SEPEs DENTium, see *Sepes*.

SEPHIRUS, *Scleriasis*.

SE'PIA, *σπία*, *S. officina'lis*, *Se'pium*, *Cuttle-Fish*, (Sc.) *Hose-Fish*, *Slieve-Fish*, (F.) *Sèche*. *Class* *Cephalopoda*. The osseous part of the cuttle-fish; (F.) *Os de Seche*—*Præcip'itans my'num*—has been used as an absorbent, and is often added to tooth-powders.

SEPLASIA'RIOUS. A name formerly given to one who sold perfumes, ointments, &c. It is derived from *Sep'lasia*, the name of a public place at *Capua*, where such preparations were frequently sold. A druggist.

SEPSICHYMIA, *Septochymia*.

SEPSIS, *Putrefaction*.

SEPTÆMIA; from *σηπτος*, 'rotten,' and 'αίμα,

'blood.' A morbid condition of the blood produced by septic or putrid matters.

SEPTAL, *Septa'lia*, from *Septum*. Relating, or appertaining to, a septum: as 'septal walls of the heart'—those that separate the cavities from each other.

SEPTANA FEBRIS, Fever, septan.

SEPTENARY, *Septena'rius*, (F.) *Septénaire*, from *septem*, 'seven.' 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, Climacteric, (years.)

SEPTERIUS, Septic.

SEPTFOIL, UPRIGHT, Tormentilla.

SEPTIC, *Septicus*, *Septus*, *Septerius*, from *σηπτιν*, 'to rot,' *σηπτος*, 'rotten.' That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTIC POISON, see Poison.

SEPTICEMIA, Septæmia.

SEPTIMESTRIS FÆTUS, see Fœtus septimestrus.

SEPTINERVIA, Plantago.

SEPTOCHYMIA, *Sepsichymia*; from *σηπτις*, 'putrefaction,' and *χυμος*, 'juice.' Putrefaction or putrescence of the humours.

SEPTON, Azote.

SEPTOPYRA, Typhus gravior.

SEPTULUM; diminutive of *septum*. A division between small spaces or cavities—as the *septula* or fibrous cords given off by the mediastinum testis to be inserted into the inner surface of the tunica albuginea.

SEPTUM, (F.) *Cloison*, 'a partition,' from *sepio*, *septum*, 'I fence in.' A part destined to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM ATRIORUM, *S. Auricula'rum*. The septum or partition between the auricles of the heart.

SEPTUM AURICULARUM, *S. Atriorum*—s. Cerebelli, Falx cerebelli—s. Cerebri, Falx cerebri—s. Cochleæ auditoriæ, Lamina spiralis.

SEPTUM CORDIS, *Septum medianum cordis*. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, Tentorium.

SEPTUM LUCIDUM seu *pellucidum* seu *ten'ne* et *pellucidum* seu *medianum*, *Speculum*, *S. lucidum*, *Lapis specula'ris*, *Mediastinum* seu *Diaphragma ventriculo'rum latero'rum cerebri*. (F.) *Septum medianum* (Ch.), *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminae: between which a small cavity exists, filled by a serous fluid, *ventriculus septi pellucidi*, see Ventricles of the Brain. The brothers Wenzel are of opinion that this cavity is lined by a peculiar membrane.

SEPTUM MËDIAN, *S. lucidum*—s. *Mélian du cercelet*, Falx cerebelli—s. *Medium cerebri*, *S. lucidum*.

SEPTUM NA'RIUM, *Interseptum* seu *Dissepimentum* seu *Interf'num* seu *Diserimen* seu *Iubrea* seu *Diaphragma na'rium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary

membrane, which receives a considerable number of nerves and vessels.

SEPTUM NASI, see Nares.

SEPTUM PARVUM OCCIPITALE, Falx cerebelli—s. *Pectiniforme*, see *Cavernous bodies*—s. *Pellucidum*, *S. lucidum*—s. *Scalæ*, *Lamina spiralis*—s. *Staphylin*, *Velum pendulum pulati*—s. *Tenuum* et *pellucidum*, *S. lucidum*—s. *Thoracis*, *Mediastinum*—s. *Transverse*, *Tentorium*—s. *Transversum*, *Diaphragm*—s. *Vestibuli nervoso-membranaceum*, see *Labyrinth*.

SEPTUS, Septicus.

SEPUM, Serum.

SEQUESTRUM, "the depositing of a disputed thing in the hands of a third person!" The portion of bone, in necrosis, which is dead, and separated from the living bone; uniting, whilst retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfoliation*. The portion of bone surrounding it is the *Capsula sequestralis*.

SERAPEUM, Syrup.

SERAPINON, Sagapenum.

SERAPIUM, Syrup.

SERBET, Scherbet.

SËREUX, Serous.

SËRICO-CARPUS TORTIFOLIUS, *Coryza bifolia*, *Aster tortifolius*; indigenous; Order, *Compositæ*: is said to be diuretic.

SËRICUM, *Silk*; from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombix Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

SERICUM ANGLICUM, see *Sparadrapum adhaesivum*.

SERIES DENTIUM, see *Sepes*.

SËRIEUX, Serious.

SËRINGUE, Syringe.

SERIOLA, Cichorium intybus.

SËRIOUS, *Serius*, (F.) *Sérieux*, *Grave*. A term applied to a disease, *Dyspathia*, *Morbus gravis*, and to a symptom that is attended with danger.

SERIS, Cichorium intybus.

SERMOUNTAIN, *Laserpitium album*.

SERO-COLITIS, see *Colitis*.

SERO-CYSTIC, *Sero-cysticus*. An epithet for tumours of the female breast, which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

SERO-HEPATITIS, see *Hepatitis*.

SËR'OLIN, from *serum* and *olein*. A peculiar fatty matter detected in the blood by Boudet, Lecanu, Sanson, and others.

SËROSITÉ, Serum.

SËROSIY, Serum.

SËROUS, *Serous*, (F.) *Séroux*; from *serum*. Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See *Serum*.

SËROUS LAYER, see *Tache embryonnaire*—s. *Membranes*, *Membranes*, *serous*.

SËRPEDO, Psoriasis.

SËRPENT, *Serpens*, *Anguis*, *Ophis*; from *serpo*, 'I creep.' A snake.

SNAKE BWOOTH was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See *Poisons*, table of.

SËRPENTARE NOIRE, *Actæa racemosa*—s. *Range*, *Polygonum* *historta*.

SËRPENTARIA, *Aristolochia serpentaria*—s. *Gallorum*, *Arum dracunculus*—s. *Hispanica*, *Scorzonera*—s. *Minor*, *Arum maculatum*—s. *Nigra*, *Actæa racemosa*.

SERPENTARIÆ BRAZILIENSIS RADIX,
Caincæ radix.

SERPENTIN, see Alembic.

SERPENTINE, Ophites.

SERPENTINUS, Ophites.

SERPES, Herpes.

SERPIG'INOUS, from *serpere*, 'to creep.'

An epithet given to certain affections, which creep, as it were, from one part to another,—'*Serpiginous* erysipelas,' (F.) *Erysipèle serpigineux*.

SERPIGO, Herpes circinatus, Lichen psoriasis.

SERPILLUM, Thymus serpyllum.

SERPOLET, Thymus serpyllum.

SERPULLUM, Thymus serpyllum.

SERPULLUM, Thymus serpyllum—s. Citra-

tum, see Thymus serpyllum.

SERRA, Saw—s. Amputatoria, Saw, amputa-

tion—s. Versatilis, Trepan.

SERRATULA AMA'RA, from *serra*, 'a saw,'

owing to its serrated leaves. *Family*, Cynaroc-

phaleæ. *Sex. Syst.* Syngenesia Polygamia æqualis.

A species of *Sawwort*, recommended in ague.

SERRATULA BEHEN, Centaurea behen.

SERRATUS, Dentate—s. Anticus Minor, Pec-

torialis minor.

SERRA'TUS MAGNUS. So called from its ser-

rated appearance; from *serra*, 'a saw.'

Serratus major anti'cus, *S. major*, (F.) *Costo-basi-scapulaire*,

Costo-scapulaire (Ch.), *Grand dentelé*. A very

broad (especially anteriorly), thin, flat, irregularly

quadrilateral muscle, situate at the sides of the thor-

ax. It is attached, before, to the external surface

of the first 8 or 9 ribs, by as many distinct digita-

tions: and, behind, to the spinal edge of the scapula.

The superior fibres are almost horizontal; the

lower become gradually more and more oblique

upwards and backwards. This muscle carries

the scapula forwards, and causes it to execute a

movement of rotation, which directs its inferior

angle forwards, and the anterior upwards. When

the shoulder is fixed, it raises the ribs.

SERRATUS MAJOR, *Serratus magnus*—s. Major

anticus, *Serratus magnus*.

SERRATUS POSTI'CUS INFERIOR, (F.) *Dorso-*

lombo-costal, *Lombo-costal* (Ch.), *Petit dentelé*

postérieur et inférieur. A broader and thinner

muscle than the following, but nearly of the

same shape. It is situate obliquely at the lower

part of the back; and extends from the spinous

processes of the last two or three dorsal vertebræ,

and the first two or three lumbar, to the inferior

margin of the last four false ribs. This muscle

depresses the ribs, and thus concurs in expiration.

It is an antagonist to the next.

SERRATUS POSTI'CUS SUPERIOR, (F.) *Cervici-*

dorso-costal, *Dorso-costal*, (Ch.) *Petit dentelé su-*

périeur. A flat, thin, quadrilateral muscle;

situate obliquely at the posterior inferior part of

the neck, and the superior part of the back. It

passes from the posterior cervical ligament, the

spinous process of the last cervical vertebra;

from the spinous processes of the first two or

three dorsal, to the second, third, fourth, and

fifth ribs; into which it is inserted by as many

digitations. It raises the ribs, and is, conse-

quently, an inspiratory muscle.

SERRE-ARTÈRE, *Presse-artère*.

SERRE-COU (F.), from *serrer*, 'to squeeze,'

and *cou*, 'the neck.' An instrument, invented by

Chabert, for compressing the jugular vein, in

bleeding from that vessel. It surrounds the neck

like a collar, and, by means of a pad, exerts the

necessary pressure.

SERRE-FINE, (F.), from *serrer*, 'to squeeze,'

and *fin*, 'fine.' A small spring forceps, invented

by M. Vidal. It is formed of a wire of metal,

turned in the middle into two spirals, one in front

of the other. This constitutes the spring. Each

branch describes nearly the letter S; and one ex-

trémity forms the spiral, the other lays hold of

the parts to be united.

SERRE-NŒUD (F.), from *serrer*, 'to squeeze,'

and *nœud*, 'a knot.' This name has been given

to various instruments, employed by the surgeon

for tightening a ligature passed round a pedicu-

lated tumour, or any part which has to be de-

stroyed by ligature slowly and gradually. Thus,

there is the *serre-nœud* of Roderic, the *constric-*

teur of Herbinaux, the *serre-nœud* of Desault, &c.

SERRE NŒUD DE DESCHAMPS, *Presse-*

artère.

SERTULA CAMPANA, *Trifolium melilotus*.

SERUM, Sperm.

SERUM, 'whey.' *Orrhos*, *Oros*, *Seros'ity*, (F.)

Sérosité. The most watery portion of animal

fluids, exhaled by serous membranes. It is a

constituent part of blood, milk, &c.

SERUM OF THE BLOOD, *Hæ'mydor*, *Orrhos*,

Serum seu *Ichor sanguinis*, (F.) *Sérum du Sang*,

is the liquid which separates from the blood, when

coagulated at rest. It is of a greenish-yellow

colour; viscid, slightly coagulable by heat, acids,

and alcohol. It is composed of water; chloride

of sodium; certain phosphates; and albumen,

constantly united to soda, almost in a sapona-

ceous combination.

The fluid which exudes from the albumen of

the serum of the blood, when coagulated by heat,

is by some called *seros'ity*.

SÉRUM DU SANG, S. of the blood.

SERUM LACTIS, *Aqua Lactis*; *Serum of Milk*,

Whey, (Prov.) *Whig*, (F.) *Sérum du lait*, *Petit*

lait. That part of milk from which the butter and

caseous matter have been separated. It is a

transparent, citrine-coloured liquid, containing

sugar of milk, mucilage, acetic acid, phosphate

of lime, and some other saline substances. It

is used as a slightly nutritious diluent and refri-

gerant. The French have magistral formulæ

the basis of which is whey. They are called

Petits-laits, or 'wheys.'

SERUM LACTIS HOFFMAN'NI, (F.) *Petit-lait*

d'Hoffmann, is a name given to the liquid re-

sulting from treating with boiling water milk

which has been evaporated to an almost solid

consistence. It is not much used.

RENNET WHEY is made thus: *milk* 2 pints:

rennet $\frac{3}{4}$ ss, infused in a little hot water; mix and

keep in a gentle heat for some hours, then strain.

—Gray.

SERUM SANGUINIS, Serum of the blood.

SERUM OF SEROUS MEMBRANES, *Serum mem-*

branarum serosarum, *Water of Dropsy*, (F.)

Sérum des membranes séreuses, *Eau des hydro-*

piques. It resembles the serum of the blood,—

especially in cases of hydroecle. The water of

hydrothorax and ascites contains much less al-

bumen:—sometimes enough to coagulate on the

application of heat: at others, not.

SERVICE, MOUNTAIN, *Sorbus acuparia*.

SERVICE TREE, *Sorbus domestica*.

SERVLETTE EN CARRÉ, *Cowreckef*.

SĒSAME, *Sesamum orientale*.

SESAMOID, *Sesamoï'des*, *Sesamo'des*, *Sesa-*

moids, from *εσαμη*, 'a grain of sesamum,' and

ειδος, 'resemblance.'

SESAMOID BONES, *Ossa* seu *Ossi'cula sesamoï-*

des, are small bones, situate in the substance of

tendons, near certain joints. Their number is

various. They are commonly more in the male

than female. Two are constantly met with be-

neath the metatarso-phalangeal articulations of

the great toe. Sometimes, the articulations of

other bones of the metatarsus with the phal-

anges of the toes have them likewise. In the

hand, there are two before the metacarpo-phal-

angeal joint of the thumb. At times, they are

met with in the other metacarpophalangeal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peroneus longus. These bones are commonly round, and flattened only on one surface, which is incrustated with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification: and arc, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoidea* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

SESAMUM, see *Sesamum orientale*.

SESAMUM ORIENTALE, *S. edulis* seu *oleiferum* seu *Indicum*, *Bennè*, *Oily Grain*, (F.) *Sésame*, *Jugéline*. *Orl.* Bignoniaceæ. The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

Benne oil, *Oleum Sesami*, is used in the Southern States as a laxative. The leaves—*Sesami folia*, (Ph. U. S.)—afford, by infusion, an excellent mucilage.

SESCUN'CIA, *Sesquim'cia*, *Hemio'ion*. An ounce and a half. See *Sesqui*.

SESELI, *Laserpitium siler*—s. *Ægopodium*, *Ligusticum podagraria*—s. *Annuum*, *S. tortuosum*—s. *Carum*, *Carum*—s. *Carvi*, *Carum*—s. *Creticum*, *Tordylium officinale*—s. *Feniculifolium*, *Sison ammi*—s. *Graveolens*, *Apium graveolens*—s. *Meum*, *Æthusa meum*—s. *Patens*, *S. tortuosum*—s. *Pratense*, *Peucedanum silaus*—s. *des Pres*, *Peucedanum silaus*.

SESELI TORTUOSUM, *S. Massilien'se* seu *animum* seu *patens*, *Enanthè striata rig'ida*, *Hartbeert* of *Marseilles*. The seeds have a warm taste: and a greater degree of pungency than those of *Laserpitium siler*, which is the *Seseli* of the Pharmacopœias.

SESELI, *Laserpitium siler*, *Seseli*.

SESQUI. This word, joined with any number, weight, measure, &c., signifies one and a half: as *sesquicentum*, 'a grain and a half.'

SESEQUUNCIA, *Sesuncia*.

SETA EQUINA, 'horse-hair.' *Hairworm*, *Helmintus Gordii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Cal'ica Lappon'ica*, in which the gripings are, at times, exceedingly severe.

SETA'CEUM. *Seto*, *Seton*, from *seto*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and arcolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it, with the thread attached. Every day a fresh

portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmia, cephalgia; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

SETARIA ROCCELLA, *Lichen roccella*.

SETPAST, see *Furunculus*.

SETO, *Setaceum*.

SETON, *Setaceum*.

SETTERWORT, *Helleborus foetidus*.

SEVADILLA, *Veratrum sabadilla*.

SEVATIO, *Steatoma*.

SÈVE, *Sap*.

SEVENBARK, *Hydrangea arborescens*.

SÈVRAGE, *Weaning*.

SEVUM, *Pinguedo*.

SEVUM, *Sebum*, *Sepum*, *Stear*, *Adeps ovilli*, *Sevum vervecinum*. *Suet*, *mutton suet*; *Pinguedo*.

SEVUM PRÆPARATUM, *Scrum* (Ph. U. S.),—*Ovilli Scrum Præparatum*, *Prepared Suet*, (F.) *Graisse de Mouton*, *Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk (3ij to Oj), and is used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

SEVUM VERVECINUM, *Sevum*.

SEX, *Sexus*, *Genos*, *Physis*. The physical difference between male and female in animals and vegetables:—as the *Male sex*, *Sexus potior* seu *fortior* seu *virilis*; and the *Female sex*, *Sexus sequior*, *S. mulie'bris*, *Alter Sexus*, 'The Sex.'

SEXTANS, from *sextus*, 'the sixth;' *Sexta pars libræ*. The sixth part of a pound.—Galen.

SEXTARIUS. Same etymon. An ancient measure for liquid and solid substances; the sixth part of a congius. See *Weights and Measures*.

SEX'TULA. Same etymon. *Hex'dygm*, 'ἕξα-γυόν'. The sixth part of an ounce.

SEX'UAL, *Sexualis*, from *sexus*, 'sex.' That which relates to the sex; which characterizes the sex.

SEXUAL DISEASES, *Morbi sexual'es*, are the diseases of the genital organs; as *SEXUAL FUNCTIONS* are the genital functions.

SEXUAL INTERCOURSE, *Coition*—s. *Organs*, *Genital organs*.

SEXUS, *Sex*—s. *Alter*, see *Sex*—s. *Fortior*, see *Sex*—s. *Muliebris*, see *Sex*—s. *Potior*, see *Sex*—s. *Sequior*, see *Sex*—s. *Virilis*, see *Sex*.

SEYDSCHÜTZ WATER, *Seidschütz water*.

SHACKLE, *Carpus*.

SHACKLE-HAMMED, see *Cnemoseoliosis*.

SHADDOCK. The fruit of *Citrus decumana*, called after the captain of a vessel who first took it to the West Indies from China. It is large; but inferior to the orange in flavour. It keeps, however, longer; and, hence, is useful on long voyages.

SHAKERS, see *Convulsionnaire*.

SHAKES, *Intermittent*.

SHAKING, *Intermittent*, see *Rigor*.

SHALLOT, *Echalotte*.

SHAMPOO'ING, *Champooing*, *Massing*, (F.) *Massage*, *Massement*. A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

SHAMROCK, INDIAN. *Trillium latifolium*—s. *Water*, *Menyanthes verna*.

SHANKER, *Chanere*.

SHANNONDALE SALINE SPRINGS.

These are within a few miles of Charlestown, Jefferson County, Virginia. They are mildly aperient and diuretic.

SHARON SPRINGS, NEW YORK. These springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of sodium, sulphohydrate of calcium, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fahr.

SHEATH, Vagina.

SHEDDING OF THE TEETH, see Dentition.

SHEEP POISON, *Kalmia latifolia*.

SHELLBARK, see Hickory.

SHELL FLOWER, *Trillium latifolium* — s. Liquid, see *Calcei murias* — s. Membrane, *Membrana testæ*.

SHEPHERD'S PURSE, *Tblaspi bursa* — s. Sun dial, *Anagallis arvensis*.

SHERBET, *Scherbet* — s. Orange, see *Syrupus aurantii*.

SHERMAN'S WORM LOZENGES, see Worm lozenges, Sherman's.

SHERRY, Sack, see Wine.

SHIELD-BONE, *Scapula*.

SHIELD, WATER, *Nelumbium luteum*.

SHILDER, *Humerus*.

SHIN, *O'crea, Crista tib'ia*, Sax. *rcina*. The spine or anterior part of the tibia or leg. It is, also, called *Anticne'nion*, and *Crea*.

SHINBONE, *Tibia*.

SHINGLES, *Herpes zoster*.

SHINLEAF, *Pyrola*.

SHINLOCK, *Brassica eruca*.

SHIP FEVER, see Typhus.

SHITABED, *Leontodon taraxacum*.

SHIVERING, see Rigor.

SHOCK, see Concussion.

SHOCK, NERVOUS, *Vital Shock, Vital Depression, Nervous Depression, Fatal Sinking*. Sudden or instantaneous depression of organic, nervous, or vital power, often with more or less perturbation of body and mind, passing either into reaction, or into fatal sinking, occasioned by the nature, severity or extent of injury, or by an overwhelming moral calamity. — Copland.

SHOCK, VITAL, Shock, nervous.

SHOOT, Crick-in-the-neck.

SHORT, Sax. *rcceort*, from *rcinan*, 'to cut, to shear,' shored, shor'd, short, (F.) *Court*. A word used, by anatomists, in opposition to long; and to distinguish parts from each other that have otherwise the same name.

SHORT BONES, for example, are those in which the three dimensions—length, breadth, and thickness—are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.

SHORT-OF-PUFF, Short-winded — s. Ribs, see Costa.

SHORTSIGHTED, Myopic.

SHORTSIGHTEDNESS, Myopia.

SHORTWINDED, Pury.

SHOTBUSH, *Aralia spinosa*.

SHOTT, Pleurodynia.

SHOULDER, *Humerus* — s. Blade, *Scapula* — s. Bone, *Humerus*.

SHOUP, Hanch.

SHOVEL PICKEREL WEED, *Unisema deltifolia* — s. Pond, *Unisema deltifolia*.

SHOW, see Parturition.

SHOW-CHOO, see Spirit.

SHOWER-BATH, see Bath.

SHRUB, perhaps, from Arabic, *sharab*, 'syrup.' A compound of spirits, lemon-juice, and sugar.

SHRUB, SWEET, *Calycanthus* — s. Sweet-scented, *Calycanthus*.

SHRUMP-SHOULDERED, see Hump.

SHUD'DERING, *Frem'itus, Phryg'na*, from (G.) Schauder, Schauet, (F.) *Frémissement, Tremaillement*. A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

SHULL-BANE, *Humerus*.

SHUMAC, *Rhus coriaria*.

SIAGANTRITIS, from *σιγων*, 'the jaw,' *αντρον*, 'a cavity,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the antrum of Highmore.

SIAGON, Maxillary bone.

SIAGO'NAGRA, from *σιγων*, 'the jaw,' and *αγα*, 'a seizure.' *Arthritis maxilla'ris*. A gouty or rheumatic affection of the joint of the lower jaw.

SIALACHUS, Salivation.

SIAL'AGOGUE, *Sialogo'gus, Sial'ogogue, Ptyal'ogogue, Ptyal'magogue, Sali'vans, Salivat'um, Sialocinet'icus, Aporhlegmat'isans per os*, (F.) *Salivant*; from *σιλον*, 'saliva,' and *αγω*, 'I expel.' That which provokes the secretion of saliva. Pyrethrum and mercury are sialogogues. Sialogogues may be of two kinds, those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former, — pyrethrum to the latter class. The chief sialogogues are armoracia, calamus, mezereum, pyrethrum, tabacum, and zingiber.

SIAL'ICA, from *σιλον*, 'saliva.' Medicines, which affect the salivary glands. — Pereira.

SIALISMUS, Salivation.

SIALOCINETICUS, Sialogogue.

SIALOLITHI, *Calculi*, salivary.

SIALOLOG'IA, from *σιλον*, 'saliva,' and *λογος*, 'a discourse.' A treatise on saliva.

SIALOMA, Saliva.

SIALON, Saliva.

SIALORRHŒA, Salivation.

SIALOS'CHESIS, from *σιλον*, 'saliva,' and *σχισις*, 'retention.' Retention or suppression of the saliva.

SIALOSYRINGES, Salivary fistulæ.

SIALOZEMIA, Salivation — s. *Mercurialis*, Salivation, mercurial.

SIAMESE TWINS, see Twins, Siamese.

SIBARE, Phrenitis.

SIBBENS, *Sivrens, Frambo'sia Scotica*. An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sicin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sicin*, the inhabitants have made *sievin, sibben, sibbens, and sivrens*. By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch. — Jamieson.

SIB'ILANT, *Sib'ilus, Sib'ilans*, from *sibilo*, 'I hiss, I whistle.' Making a hissing or whistling sound. See *Râle sibilant*.

SIBILISMUS AURIUM, Tinnitus aurium.

SIBILUS AURIUM, Tinnitus aurium.

SICCANT'IA, from *sicare*, 'to dry.' *Xeran'tica*, (F.) *Siccatifs*. Drying medicines. See Desiccativa.

SICCATIFS, Siccantia.

SICCATIO, Drying.

SICCHA'SIA, *σικχασια*, 'disgust.' A distressing disgust for food; such as is experienced by women with child.

SICILICUM. A Roman weight of about two drachms.

SICK, Sax. *reoc*, *Eger*, *Egro'tus*, *Nos'erona*, *Nos'ides*, *Jacens*, *Laborio'sus*, *Labo'rans*, (F.) *Malade*. Labouring under disease; *Dineas'ed*, *Distemp'ered*, Ill, *Ailing*, *Disor'dered*. Such is its acceptation in old English, and generally in the United States. In most parts of the United States, if a patient is affected with a slight indisposition, he is said to be *sick*; if with one more severe, he is said to be *ill*; (Prov.) *had*, *hally*. In England, it most commonly means,—affected with disorder of the stomach, or nausea.

A sick person, *Eger*, *Egro'tus*, (F.) *Malade*, who is under the charge of a physician is said to be a *patient*, or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract.

SICK STOMACH, Milk sickness.

SICKLY, *Morbu'sus*, *Valentudin'arius*, *Adyn'atos*, *Nos'erona*, *Nos'ides*, *Morbuse*, *Mor'bulent*, *Unhealth'y*, (Se.) *Hough*, (F.) *Maladif*. Subject to be sick, or in feeble health. Ailing.

SICKNESS, Disease, Plague — *s.* Falling, Epilepsy — *s.* Mountain, Puna — *s.* River, Milk sickness — *s.* Sea, Nausea marina — *s.* of the Stomach, Vomiting — *s.* Swamp, Milk sickness.

SICLIUM, Sicilium.

SICUA, Cupping-glass.

SICULA, Beta, Penis.

SICYEDON, Caledon.

SIDA ABUTILON, Abutilon Avicennæ.

SIDE, PAIN IN THE, Pleurodynia.

SIDERA'TIO, *Sydera'tio*, *Sidera'tion*, from *sides*, *sideris*, 'a star,' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets — *Planet-struck*. The ancients comprised under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

SIDERATIO, Apoplexy, Asphyxia, Phrenitis — *s.* *Osis*, *Spina ventosa*.

SIDERATION, Astrobolismos, Sideratio.

SIDERION, Ferramentum.

SIDERITES, Magnet.

SIDERITIS, Magnet, Teucrium chamæpitys.

SIDEROKRENÆ, Water, mineral, (chalybeate.)

SIDEROPEGÆ, Water, mineral (chalybeate).

SIDEROS, Ferrum.

SIDEROXYLON, Chrysophyllum canino.

SIDE SADDLE-PLANT, *Sarracenia*.

SIDHEE, see Gunjah.

SIDMOUTH (CLIMATE OF). Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea-fogs.

SIÈGE, Anus.

SIELISMOS, Salivation.

SIELON, Saliva.

SIEVE, see Cribration — *s.* Drum, see Cribration.

SIFFLEMENT (F.), from *siffler*, 'to whistle.' Whistling.

SIFFLEMENT MODULÉ, *Chant des artères*, *Bruit musical*, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects. Various musical sounds, (F.) *Bruits musicaux*, are described from fancied resemblances:—as *Bruit de piétement*, resembling the clucking of the hen;—*Bruit de jappement*, resembling the barking or yelping of a young dog, &c.

The sound is chiefly met with in those labouring under chlorosis.

SIGAULTIAN SECTION, Symphyseotomy.

SIGE, Tenebrity.

SIGH, Suspirium.

SIGHT, Vision — *s.* Askew, *Dysopia lateralis* — *s.* False, *Metamorphopsia*, *Pseudoblepsia* — *s.* Feebleness of, *Amblyopia*.

SIGILLUM SALAMONIS, *Convallaria polygonatum* — *s.* *Virginatis*, *Hymen*.

SIGMATOID, Sigmoid.

SIGMOID, *Sigmoid'al*, *Sig'matoid*, *Sigmoid'es*, *Sigmo'es*, *Sigmo'idens*; from *sigma* and *eidos*, 'resemblance.' That which has the form of the Greek S or C.

SIGMOID CARTILAGES, Semilunar cartilages.

SIGMOID CAVITIES OR FOSSÆ OF THE ULNA, (F.) *Cavités* ou *Fosses sigmoïdes*, are two notches at the upper part of that bone,—one for the reception of the humerus; the other for that of the radius.

SIGMOID FLEXURE OF THE COLON, *Flexura sigmoï'dea* seu *ili'aca*, is a turn the colon takes immediately before its termination in the rectum.

SIGMOID FOSSA (of the temporal bone), *Fossa sigmoidea*.

SIGMOID or SEMILUNAR VALVES, *Valvæ Sigmoïdes*, *Processus Sigmoï'des*, (F.) *Valvæ sigmoïdes* ou *semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpus'culum* seu *Glob'ulus Arantii*, which completely closes up the passage. It is, also, called *Corpusculum Margagnii* and *C. Semoï'deum*, (F.) *Globule d'Arantius*.

SIGN, *Signum*, *Semi'um*, (F.) *Signe*. Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anænetic* or *commentorative signs*;—those which accompany it are termed *diagnostic*, if they reveal the nature or seat of the disease,—*prognostic*, when they indicate its probable duration and termination. See Symptom.

SIGNA ASSIDENTIA, see *Assidens*.

SIGNATURE, *Signatura*, *Signatio*, from *signum*, 'a sign;' *Episphagism'um*. This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

SIGNATURES OF PLANTS meant certain peculiarities in their external formation or colour, which indicated that they were adapted for particular diseases:—as in the case of the *Lungwort*, *Liverwort*, &c.

SIGNES AVANT-COUREURS, Precursory signs — *s.* *Præcursus*, Precursory signs.

SIGNUM, see Parturition — *s.* Characteristicum, see Pathognomonie — *s.* Conjectum, see Pathognomonie — *s.* Diacriticum, see Diacritica signa — *s.* Morbi essentialia, see Pathognomonie.

SILACH, *Silac*, An Arabic word, used to designate thickening of the eyelids, *Crossi'lica Palpebrarum*; and, also, *Alpecia*.—Forestus, Stephanns.

SILENCE, see Murmur, respiratory.

SILENE CRASSIFOLIA, *Cucubalus behen*—

s. Inflata, Cucubalus behen — s. Thorei, Cucubalus behen.

SILENĒ VIRGIN'ICA, *Ground Pink, Wild Pink, Catch Fly.* Ord. Caryophyllaceæ. The root has been employed in decoction, as an efficacious anthelmintic.

SILENE PENNSYLVAN'ICA probably has the same properties.

SILER LANCIFOLIUM, *Laserpitium siler* — s. Montanum, *Laserpitium siler*.

SIL'LIQUA, *Cera'tion*; the carat. A weight of about four grains. A pod.

SILLIQUA ARABICA, *Tamarindus* — s. Araci aromatici, see *Vanilla* — s. Banillæ, see *Vanilla* — s. Dulcis, *Ceratonium siliqua* — s. Vanigliæ, see *Vanilla* — s. Vanillie, see *Vanilla*.

SILQUASTRUM PLINII, *Capsicum annum*.

SILK, Sericum.

SILK GRASS, *Yucca filamentosa* — s. Weed, *Asclepias Sullivantii*, *Asclepias tuberosa* — s. Weed, common. *Asclepias Syriaca* — s. Weed, flesh-coloured, *Asclepias incarnata* — s. Weed, swamp, *Asclepias incarnata* — s. Worm, see *Sericum*.

SILLOX, Sulcus — s. *Horizontal de la veine ombilicale*, see *Liver* — s. *Transversale*, see *Liver* — s. *de la Veine cave inférieur*, see *Liver* — s. *de la Veine porte*, see *Liver*.

SILLONNEMENT, Segmentation.

SILLO, Camus.

SILPHIUM, *Laserpitium*.

SILPH'IVM LACINIATUM, *Rosin weed, Compass plant, Polar plant*.

SILPHIUM PERFOLIATUM, *Cup Plant, Turpentine Sm Flower*, and

SILPHIUM TEREBINTHINACEUM, *Pra'irie Bardock*; *Nat. Order*, *Compositæ*; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum which is esteemed stimulant and antispasmodic.

SILURUS GLANIS, see *Ichthyocolla*.

SILUS, Camus.

SILVER, Argentum — s. Ammonio-chloride of, see *Argentum* — s. Chloride of, see *Argentum* — s. Chloruret of, see *Argentum* — s. Cyanide of, see *Argentum* — s. Cyanuret of, see *Argentum* — s. Iodide of, see *Argentum* — s. Ioduret of, see *Argentum*.

SILVER LEAF, *Magnolia macrophylla*.

SILVER, MURIATE OF, see *Argentum* — s. Nitrate of, *Argenti nitras* — s. Oxide of, see *Argentum*.

SILVER AND AMMONIA, CHLORIDE OF, see *Argentum* — s. and *Ammonia*, chloruret of, see *Argentum* — s. and *Soda*, Hyposulphite of, *Sodæ argenti hyposulphis*.

SILYBUM, *Carduus marianus* — s. *Maculatum*, *Carduus marianus* — s. *Marianum*, *Carduus marianus*.

SIMABA CEDRON. *Nat. Fam.* *Simarubaceæ*. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

SIMABA QUASSIOIDES, *Nima quassioides*.

SIMAROUBA, *Quassia simarouba* — s. *Bitter*, *Quassia simarouba* — s. *Faux*, *Malpighia mourella*.

SIMARUBA OFFICINALIS, *Quassia simarouba*.

SIMILATIO, Assimilation.

SIMITIUM, *Plumbi subcarbonas*.

SIMO, Camus.

SIMONEA FOLLICULORUM, *Acarus folliculorum*.

SIMOTRACHELUS, *Bysauchen*.

SIMPLER'S JOY, *Verbena hastata*.

SIMPLES, Medicinal herbs. One skilled in simples is called a *Simplist*, a *Rhizotomist*.

SIMPLIST, see *Simples*.

SIMULATED DISEASES, Feigned diseases.

SIMULATI MORBI, Feigned diseases.

SIMUS, Camus.

SINA LEVANTICA, *Artemisia santonica*.

SINAPELÆON, from *σινάπι*, 'mustard,' and *ἐλαιον*, 'oil.' Oil impregnated with mustard.

SINAPI, *Sinapis*.

SINAP'IS, *S. nigra* seu *cer'na* seu *Olive'ria'na*, *Bras'sica nigra*, *Nap'us*, *Eru'ca*, *Sina'p'e*, *Sina'pi*, *Sine'pi*, *Na'pium*, *Napy*, *Common Black Mustard*, (F.) *Moutarde noire ou grise*, *Sénévk*, *Sauce*. Ord. *Crucifere*. *Sex. Syst.* *Tetradynamia Siliquosa*. The seeds are inodorous, when entire; but, when bruised, the colour is very pungent; taste bitterish and acrid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See *Sinapism*.

SINAPIS ALBA, *S. folio'sa*, *Bonannia officina'lis*, *Nap'us Lenco-sina'pis*, *White Mustard*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil—*Oleum Sinapis*—is a powerful stimulant and rubefacient. In the pharmacopœias of the United States and London, *Sinapis* is the seeds of *Sinapis nigra* and *Sinapis alba*.

Whitehead's Essence of Mustard consists of oil of turpentine, camphor, and a portion of spirit of Rosemary; to which is added a small quantity of flour of mustard. It is a celebrated embrocation for rheumatism, &c.

Whitehead's Essence of Mustard Pills consist of yellow resin and balsam of tolu enough to make into pills.

Mustard Whey is made by taking bruised mustard seeds ℥ss, and milk Oj. Boil together until the milk is curdled, and strain.

This whey is used in dropsy.

SINAPIS ARVEN'SIS, *S. Timoria'na*, *Charlock*, *Wild Mustard*, *Garlock*, *Chadlock*, *Rush*, (Sc.) *Runches*, *Scaldricks*, *Skelloch*, *Skellie*. The seeds are sometimes substituted for black mustard.

SINAPIS CER'NUA, *Sinapis* — s. *Eruca*, *Brassica eruca* — s. *Folio'sa*, *S. alba* — s. *Nigra*, see *Sinapis alba* — s. *Oliveriana*, *Sinapis* — s. *Tamoriana*, *S. arvensis* — s. *Tuberosa*, *Brassica rapa*.

SINAPISIS, *Bole Armenian*.

SINAPISIM, *Sinapis'mus*, from *sinapis*, 'mustard.' A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the due consistence. See *Cataplasma sinapis*.

SIN'ICIPUT, *Sincipital Region*, *Syn'ciput*, *Hemicephal'um*. The French use it synonymously with *vertex*, *Mesocra'nium*, *Mesocra'nium*. By some, it is applied to the frontal region or forehead, or forehead of the cranium, *Hemicephal'um*, *Hemicephal'um*. The parietal bones have been called *sincipital bones*, *Ossa sincip'itis*, (F.) *Ossa du sinciput*.

SINDON, *σινδων*, very fine linen. A small piece of rag, or round pledget, supported by a thread at the middle, and introduced into the opening in the cranium made by the trephine.

SINEPI, *Sinapis*.

SINEW, *Tendon*.

SINGLETON'S GOLDEN OINTMENT is formed of sulphuret of arsenic (realgar,) and lard or spermaceti ointment.

SINGULT'OUS, *Lyggo'des*, *Lyggo'des*, *Lyggo'des*, *Lyggo'des*, (F.) *Singultens*, from *singultus*, 'hicough.' Relating to or affected with hicough.

SINGULTUS, *Lynx*, *Lygnus*, *Sprachstolper*, *Clonus* seu *Pneusis singultus*, *Hiccough*, *Hiccup*. (*Prov.*) *Heuk*, *Yoke*, (Sc.) *Eekiu*, *Eeskin*, (F.) *Hoquet*. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

SIN'ISTRAD, from *sinister*, 'to the left hand.' A term used by Dr. Barclay, adverbially, to signify 'towards the sinister aspect.' See *Mesial*.

SINISTRAL ASPECT, see *Mesial*.

SINKING, FATAL, Shock, nervous.

SIN'UEUX, Sinuous.

SINUOSITAS, Sinus.

SIN'UOUS, *Sinuosus*, (F.) *Sinuenx*, from *sinus*, 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulae, which are tortuous.

SINUS, *Sinuositus*, *Сулпос*, *Abson'sio*, *Eurycho'ria*, *Recess'us*, (F.) *Golfe*, 'a cavity.' Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.;—and to the bosom.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clupier*.

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS ACUSTICES, Auditory canal, internal—*s. Ampullaceus*, *Cavitas elliptica*—*s. Aortici*. Sinuses of Valsalva—*s. Arteriosus*. *S. pulmonalis*—*s. Basilar*. *Sinus transversus*—*s. Caverneus*, *Cavernosus*, *Cavernosus uteri*, *Sinus uterini*—*s. Cavernosus*, *Cavernous sinus*—*s. Cerebri*, *Ventricles of the brain*—*s. Choroidien*, *S. quartus*—*s. Circular*, of Ridley, *Sinus coronarius*—*s. Circularis*, *S. coronarius*—*s. Communis*, see *Semicircular canals*—*s. Coronaire du cœur*, see *Cardiac veins*.

SINUS CORONA'RIIUS, *S. circularis* seu *circularis Ridleyi*, *Circular sinus of Ridley*, *Coronary sinus*. A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

SINUS CORONARY, *Sinus coronarius*—*s. Coronary of the heart*, *Sinus coronary*, venous.

SINUS CORONARY, VENOSUS, *Coronary sinus of the heart*. A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculo-ventricular furrow.

SINUS COXE, see *Cotyloid*—*s. Droit*, *S. quartus*.

SINUS DEXTER CORDIS, *S. venarum cavarum* seu *venosus*, *Saccus venarum cavarum*. The right auricle of the heart:—*A'trium cordis dexterrum*. See *Auricula*.

SINUS OF THE DURA MATER, *S. seu Fis'tula seu Cavitate seu Ventriculi seu Tubuli seu Sinuquiductus seu Receptacula Duræ matris*, are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong,—the *petrous sinuses*, superior and inferior; the *transverse sinus*; the

cavernous sinuses; and the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

SINUS FALCIFORMIS INFERIOR, *S. longitudinalis inferior*—*s. Falciformis superior*, *S. longitudinalis superior*—*s. Fourth*, *Toreular Herophili*—*s. Genæ pituitarius*, *Antrum of Highmore*—*s. of the Jugular vein*, see *Jugular veins*—*s. Lacrymalis*, *Lachrymal sac*—*s. Lactiferus*, see *Lactiferous vesicles*.

SINUS OF THE LARYNX, *Ventricles of the larynx*.

SINUSES, LAT'ERAL, *Sinus transversi*, *S. magni*, *S. laterales*, (F.) *Sinus lateraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili or confluence of the sinuses, and terminates at the sinus of the jugular vein.

SINUS LATÉRAUX, Sinuses, lateral.

SINUSES, LONGITUDINAL, *S. Longitudinales*. These are two in number. 1. **SUPERIOR LONGITUDINAL SINUS**, *S. falciformis superior* seu *triangularis*, *Sinus median*, (Ch.) A long, triangular canal; convex above, concave below; which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. **INFERIOR LONGITUDINAL SINUS**, *S. falciformis inferior*, *Vena falcis cerebri*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

SINUS MAGNI, Sinuses, lateral—*s. Maxillary*, *Antrum of Highmore*—*s. Median*, *Sinus longitudinalis superior*—*s. Median*, see *Semicircular canals*—*s. Muliebris*, *Vagina*.

SINUS OCCIPITAL, *Sinus occipitalis*. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend—becoming broader and nearer each other—into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmerring have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinus, which they have called *anterior occipital sinus*.

SINUS OCCIPITALIS ANTERIOR, *Sinus transversus*—*s. Ophthalmic*, see *Cavernous sinus*—*s. Perpendicularis*, *S. quartus*—*s. Ovatus*, see *Crista vestibularis*—*s. Pituitarii frontis*, *Frontal sinuses*—*s. Pocularis*, see *Ejaculatory ducts*—*s. Polymorphus*, *Cavernous sinus*—*s. Portarum*, see *Liver*—*s. Præstatae*, see *Ejaculatory Ducts*—*s. Pudendi*, *Vagina*—*s. Pudoris*, *Vagina*, *Vulva*—*s. Pulmonales*, *Sinuses of Valsalva*.

SINUS PULMONALIS, *S. sinister cordis* seu *venarum pulmonalium* seu *arteriosus*, *Saccus venarum pulmonalium*, *A'trium cordis sinisterum*. The left auricle of the heart. See *Auricula*.

SINUS OF THE PULMONARY VEINS, *Auricle*, left.

SINUS QUARTES, *S. perpendicularis*, *Straight sinus*, (F.) *Sinus choroidien* (Ch.), *Sinus droit*. This sinus—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx

cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophilli. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *venæ Galeni*, the superior cerebellous veins, &c.

SINUS RENUM, Pelvis of the kidney—s. Rhomboides, see Ventricles of the brain—s. Rotundus, see Crista vestibuli—s. of the Septum lucidum, Ventricle, fifth—s. Sinister cordis, S. pulmonalis—s. Sphenoidalis, Cavernous sinus—s. Straight, S. quartus—s. Superciliares, Frontal sinuses—s. Terminalis, Circulus venosus—s. Transversi, Sinuses, lateral.

SINUS TRANSVERSUS, *S. occipitalis anterior*, *Basilar sinus*. This sinus lies transversely at the anterior part of the basilar process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situated between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

SINUS TRIANGULARIS, S. longitudinal, superior—s. Urogenitalis, Urogenital sinus.

SINUS, UTERINI, *S. cavernosi Uteri*, *Uterine sinuses*. A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

SINUS UTRICULOSUS, see Semicircular canals—s. *des Vaisseaux séminifères*, Corpus Highmori.

SINUSES OF VALSALVA are three depressions in the aorta—*Sinus aortici*,—and pulmonary artery—*Sinus pulmonales*—immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the reflux blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large sinus of Valsalva*.

SINUS OF THE VENA CAVA, Auricle, right—s. Venarum cavarum, S. dexter cordis—s. Venarum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis.

SINUSES, VERTEBRAL, (F.) *Sinus vertebrae*. Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebrae, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses*. They are situated at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebrae. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

SINUS VULVAE, Rima vulvae.

SIPEERI, Bebeeru.

SIPEERINE, see Bebeeru.

SIPHAR, Peritoneum.

SIPHILIS, Syphilis.

SIPHITA, Somnambulism—s. Prava, Chorea.

SIPHON, Siphon—s. Urinae, Diabetes.

SIPHON, *Sipho*, *σῖφων*, 'a tube.' A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the liquid; and air is sucked from the extremity of the lower limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the longer limb is below the level

of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon, by means of which the air can be drawn from it.

SIPHON, PLUNGING. An instrument, used in pharmacy for obtaining a specimen,—at times, a measured specimen,—of any liquid. With this view, the instrument is immersed into liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette*.

SIPHONIA CAIUCHU, see Caoutchouc—s. Elastic, see Caoutchouc.

SIPHUNCULUS, Syringe.

SIRA, Orpiment.

SIRENS, Symmeles.

SIRIASIS, *Coup de Soleil*, Insolation, Phrenitis—s. *Égyptiaca*, *Coup de Soleil*.

SIRIUM MYRTIFOLIUM, Santalum album.

SIRIUS, Canicula.

SIROP, Syrup—s. *de Capillaire*, see Adiantum capillus veneris—s. *de Coralline*, see Corallina Corsicana—s. *Simple*, Mel despumatum.

SIRUP, Syrup.

SISON AMMI, *Ethusa ammi*, *Cnidium tenuifolium*, *Pimpinella laterifolia*, *Seseli feniculifolium*, Ord. Umbelliferae. *Sex. Syst.* Pentandria Digynia. The plant that affords the *Ammi verum* of the shops; (F.) *Ammi des Boutiques*. The seeds—*Semen Ammioticretici seu veri*—were once used as a carminative.

SISON AMOMUM, (F.) *Anome faux*, is considered to be excitant and diuretic. It is the *field honeysort*.

SISON ANISUM, *Pimpinella anisum*—s. Podagraria, Ligusticum podagraria.

SISTENS, Epischetivus.

SISYMBRIUM ALLIARIA, Alliaria—s. Barbarea, Erysimum barbarea—s. Erucastrum, Brassica eruca—s. Menthastrum, Mentha aquatica.

SISYMBRIUM NASTURTIUM, *Nasturtium aquaticum seu officinale*, *Laver odoratum*, *Cratægium*, *Cressi*, *Cardaminæ fontana seu nasturtium*, *Water Cress*, (F.) *Cresson de fontaine*. Ord. Cruciferae. *Sex. Syst.* Tetradynamia Siliquosa. Water-cresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbutic qualities.

SISYMBRIUM OFFICINALE, Erysimum—s. Parviflorum, S. sophia.

SISYMBRIUM SOPHIA, *S. parviflorum*, *Herb Sophia*, *Sophia Chirurgorum*, *Flix* or *Flux weed*, (F.) *Sageesse des Chirurgiens*. It was once reputed to be antelmintic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium*, as *N. PALUSTRE*, *Marsh water-cress*; and *N. AMPHIBIUM*, *Water-radish*, possess similar virtues with *Nasturtium officinale*.

SISYRINCHIUM BERMUDIANUM, *Blue-eyed Lily*, *Physic* or *Senvey grass*; indigenous; Order, Iridaceae: flowering from June to August. Used as a cathartic by the Thompsonians. A decoction of the root is acid and cathartic.

SITICULOSUS, Dipsodes, see Alterative.

SITIENS, Dipsodes.

SITIS, Thirst—s. Intensa, Polydipsia—s. Morbosa, Polydipsia.

SITKA MINERAL WATERS OF. See Archangel. New, mineral waters of.

SITOS, Aliment.

SITUS ALIENUS, Ectopia—s. Anomalus seu perversus intestinorum, Splanchnectopia—s. Mutatus, Ectopia, see Monster—s. Perversus, Ectopia.

SITZBATH, see Bath, half.

SIUM, *S. nodiflorum* seu *angustifolium* seu *Berula seu erectum* seu *incisum*, *Apium sium*, *Helioscia dium nodiflorum*, *Berula angustifolia*, *Berula*, *Creeping Water-parsnep*. (F.) *Berle nodiflora*. *Ord.* Umbelliferae. *Sex. Syst.* Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

SIUM ANGUSTIFOLIUM, *S. nodiflorum*—s. *Apium*, *Apium graveolens*—s. *Berula*, *S. nodiflorum*—s. *Bulbocastanum*, *Bunium bulbocastanum*—s. *Carvi*, *Carum*—s. *Erectum*, *S. nodiflorum*—s. *Graveolens*, *Apium graveolens*—s. *Incisum*, *S. nodiflorum*.

SIUM LATIFOLIUM is the common *Water-parsnep* of the United States. It is said to be poisonous.

SIUM LUNA'RE. The root is eaten by the Chepewyan. It has an agreeable nutty flavour. By the Canadians, it is called *Quene de Rat*. The poisonous roots of *Cicuta virosa*, *C. maculata*, and *C. bulbifera*, are often mistaken for it.—Sir J. Richardson.

SIUM NISI. The plant whose root is called *Radic Nisi*, *Nizin*, *Nindsin*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties. See *Panax schinseng*.

SIUM NODIFLORUM, *Sium*—s. *Silaus*, *Peucedanum silaus*.

SIUM SIS'AREM, *Skirret*, (F.) *Cervi*, *Girole*, is used as a salad in Europe; and has been thought a useful diet in chest affections.

SIUM VILGARE, *Ligusticum podagraria*.

SIVEN, *Rubus idaeus*.

SIVVENS, *Sibbens*.

SKAW, *Seall*.

SKEELY, *Strabismus*.

SKELETA, *Emaciation*.

SKELETOL'OGY, *Scelctolog'ia*, (F.) *Squeletologie*, from *skeleton*, and *logos*, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndeomology*.

SKELET'ON, *Scel'etum*, *Skeleton*, *Cadav'er exsiccatum*; (Old Eng. and Prov.) *At'omy*, *Anat'omy*, (Sc.) *Spaig*, (F.) *Squelette*, *Chorpente ossueuse*; (*σκελετος*, 'dried up,' from *σκελλω*, 'I dry.') A dried body. The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external*, *Exo-skeleton*, *Dermo-skeleton*. In others, as in birds, the mammalia, &c., it is *internal*, *Endo-skeleton*, *Neuro-skeleton*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural*, *Scel'etum natura'le*; when articulated by means of wires, *artificial* or *articulated*, *Scel'etum artificia'le*.

SKELETOPE'IA, *Scelctope'ia*, *Scelcten'ois*, from *skeleton*, and *ποιω*, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by their union; and to demonstrate their connexions, relations, modes of union, &c.

SKELLIE, *Sinapis arvensis*, *Strabismus*.

SKELLOCH, *Sinapis arvensis*.

SKEV'SCH, *Erigeron Philadelphicum*.

SKEVISH, *FLEABANE*, *Erigeron Philadelphicum*.

SKEW SIGHT, *Dysopia lateralis*.

SKIN. *Cutis*—s. *Brouzed*, see *Capsule*, *renal*.

SKIN-BIND, *Induration of the cellular tissue*.

SKIN-BOUND DISEASE, *Induration of the cellular tissue*.

SKIN, *SCARF*, *Epidermis*.

SKIN-TIGHT, *Induration of the cellular tissue*.

SKIOMACHIA, *Sciomachy*.

SKIRRET, *Sium sisarum*.

SKIRRHUS, *Scirrhus*.

SKIRSE, *Scirrhus*.

SKITTER, *Diarrhoea*.

SKOKE, *Phytolacca decandra*.

SKOLEMORA FERNAMBUCENSIS, *Geof'raea vermifuga*.

SKOLIOSIS, *Scoliosis*.

SKUE-SIGHT, *Dysopia lateralis*.

SKULL, *Cranium*.

SKULL-CAP, *Calvaria*, *Scutellaria galericulata*—s. *Cap*, *maddog*, *Scutellaria laterifolia*.

SKUNK-CABBAGE, *Dracontium foetidum*.

SKUNK-WEED, *Dracontium foetidum*.

SLAB, *Torticollis*.

SLABBERING, *Slavering*.

SLATE, *IRISH*, *Hibernicus lapis*.

SLATERS, *Onisci aselli*.

SLATKAIA TRAVA, see *Spirit*.

SLAV'ERING, *Slab'ering*, *Slob'ering*, *Dvir'elling*, (Old E.) *Pirtling*, from *saliva*, *Ptyalis'imus iners*, (F.) *Bave*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, *Sax. rlep*: *Somnus*, *Sompnus*, *Sopor*, *Dormit'io*, *Hypnos*, (F.) *Sommeil*. Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking*, (F.) *Éveil*, *Réveil*. Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Réveil en sursaut*,—as in nightmare, affections of the heart, hypochondriasis, &c.

SLEEP, **MAGNET'IC**, *Hypno'sis biomagnet'ica*, is the sleep induced by the so-called animal magnetism. See *Magnetism*, *animal*.

SLEEP, **NERVOUS**, see *Magnetism*, *animal*.

SLEEPLESSNESS, *Insomnia*.

SLEEP-WALKING, *Sonnambulism*.

SLIACS, **MINERAL WATERS OF**. *Sliacs* is a favourite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

SLIDING OF THE FLAP, see *Flap*.

SLIEVE-FISH, *Sepia*.

SLING, (G.) *Sehlinge*, *Mitel'la*, *Mit'rinn*, (F.) *Écharpe*. A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes* or *slings*; as the *Grande écharpe*, *Écharpe mayenne*, *Petite écharpe*, *Écharpe de J. L. Petit*, &c.

SLIPPERS, *Impatiens*.

SLIT AND TAIL BANDAGE, *Invaginated bandage*.

SLOBBERING, *Slavering*.

SLOE, *Viburnum prunifolium*.

SLOE-TREE, *Prunus spinosa*.

SLOKE, **GREEN**, *Ulva latissima*.

SLOUGH, *Eschar*.

SLOVEN WOOD, *Artemisia abrotanum*.

SLOWS, *Milk-sickness*.

SLUG, *Limax*—s. *Sea*, *Biche de Mer*.

SLUMBER, *Somnolency*.

SMALLAGE, *Apium graveolens*.

SMALL-POX, Variola—s. Modified, Varioloid.

SMALT, *Protax'idle* of Cobalt, *Smaltum*, *Safre*, *Zaffre*, *Azur*, *Blue Starch*. This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAG'DUS, *σμαραγδος*, (F.) *Émeraude*. The emerald. It was formerly regarded as a tonic.

SMARTWEED, *Polygonum hydropiper*, P. punctatum.

SMECTICA, Detergents.

SMECTIS, *Cimolia terra*.

SMECTRIS, *Cimolia terra*.

SMEGMA, *σμηγμα*, from *σμηχειν*, 'to wipe, to rub off.' Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

SMEGMA ARTICULARE, *Synovia*—s. *Cutaneum*, see *Sebaceous glands*.

SMEGMA PRÆPUTII, *Sebum præputia'le*. The fatty secretion from the sebaceous follicles of the glans penis.

SMEGMATORRHŒA, *Stearrhœa*.

SMEGMORRHŒA, *Stearrhœa*.

SMELL. SENSE OF, *Olfaction*.

SMELLING, *Olfaction*.

SMELLOME'S OINTMENT FOR THE EYES, *Ceratum resinæ*.

SMILACINA RACEMOSA, *False Spikenard*; indigenous; *Ord. Liliacæ*; is said to be alterative, diuretic and diaphoretic.

SMILAX, *σμιλαξ*, *Taxus baccata*—s. *Aspera Chinensis*, *Smilax China*—s. *Aspera Peruviana*, *Smilax sarsaparilla*—s. *Canellæfolia*, *S. pseudo-China*.

SMILAX CHINA, *S. aspera Chinen'sis*. *Ord. Smilacææ*. *Ser. Syst. Diocia Hexandria*. The root—*China*, *Ch. orientalis seu ponderosa seu vera*, *Sansira*, *Gauquara*, *China root*, (F.) *Squine*, *Esquine*, *Racine de Chine*. Formerly much used in cutaneous and venereal affections.

SMILAX GLAUCA; indigenous; has similar virtues to those of *S. Sarsaparilla*.

SMILAX HEDEREFOLIA, *S. pseudo-China*—s. *Indica Spinosa*, *Smilax pseudo-China*—s. *Officinalis*, *Smilax sarsaparilla*.

SMILAX PSEUDO-CHINA, *S. Indica spinosa seu emellæfolia seu hederæfolia*, *China occidentalis seu spuria nodosa*, *American or West India China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

SMILAX SARSAPARILLA, *S. officinalis*, *Sarsaparilla*, *Sartaparilla*, *Smilax aspera Peruviana*, *Sarza*, *Sarsa*, *Carivillan'di*, *Ica Pecan'ga*, *Macepatli*, *Zarsa*, *Zarsaparilla*, (F.) *Salseparille*. The root of this and other species of *Smilax* is inodorous; taste bitterish, feculaceous, and fibrous; of a dark colour externally; white within. It is possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulcerations, &c., continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℞j to ℞j of the powder.

It is obtained from Honduras, Brazil, and Peru—the varieties being called respectively, *Honduras*, (F.) *Salseparille de Honduras*; *Brazil*, (F.) *S. de Brésil ou de Portugal*, and *Peruvian Sarsaparilla*, (F.) *S. de Pérou ou caraque*.

SMILAX TAMNOIDES; indigenous; has similar properties.

SMILĒ, *σμιλη*. A curved, two-edged bistoury. A knife.

SMILEON, *Scalpel*.

SMIT, see *Contagion*.

SMITTLE, see *Contagious*.

SMYRNA, *Myrrha*.

SMYRNISMOS, *Embalming*.

SMYRNIUM OLUSATRUM, *Smyr'nium*, from *σμύρα*, 'myrrh,' the odour of the seeds resembling that of myrrh; *Hipposeli'num*, *Macer'ona*, *Macedonisi'num*, *Herba Alexandri'na*, *Gri'elum*, *Agrioseli'num*, *Alexan'ders*, *Alsanders*. A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAGGLE-TEETH, *Odontoparalaxis*.

SNAGREL, *Aristolochia serpentaria*.

SNAIL, *Limax*—s. *Shell*, *Cochlea*.

SNAKEHEAD, *Chelone glabra*.

SNAKEROOT, *Garuleum bipinnatum*—s.

Birihwort, *Aristolochia serpentaria*—s. *Black*, *Actæa racemosa*, *Sanicula Marilandica*—s. *Button*, *Eryngium aquaticum*, *Liatris spicata*—s. *Canada*, *Asarum Canadense*—s. *Dewitt*, *Prenanthes*—s. *Evergreen*, *Polygala paucifolia*—s. *Heart*, *Asarum Canadense*—s. *Virginiana*, *Aristolochia serpentaria*—s. *White*, *Eupatorium ageratoides*.

SNAKEWEED, *Aristolochia serpentaria*, *Helenium autumnale*, *Aristolonium bistorta*—s. *American*, *Cicuta maculata*.

SNEEZING, from Sax. *nieþan*, (G.) *Niesen*, (probably an example of onomatopœia.) *Clonus Sternuta'tio*, *Sternuta'tio*, *Sternutament'um*, *Sternument'um*, *Ptarmos*, (Sc.) *Neesing*, (F.) *Éternement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies which adhere to the pituitary membrane, and have occasioned the movement.

SNEEZEWORD, *Achillea ptarmica*, *Helenium autumnale*.

SNIRRELS, *Nares*.

SNOB, *Nasal mucus*.

SNORING, *Snore*. (Sax.) *ΓΝΟΡΑ*, *Rhenchus*, *Renchus*, *Rhenchis*, *Ronchus*, *Rhonchus*, *Stertor*, (Sc.) *Roiting* (probably a case of onomatopœia), (F.) *Ronflement*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest—in some cases of pulmonary catarrh—a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

SNOT, *Nasal mucus*.

SNOTH, *Nasal mucus*.

SNOOT, *Nasus*.

SNOW, Sax. *Γναβ*, *Nix*, *Chion*, (F.) *Neige*. Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

SNOWBALL, *Cephalanthus occidentalis*.

SNOWBERRY, *Symphoricarpos racemosus*.

SNOWDROP TREE, *Chionanthus Virginica*.

SNOW-BLINDNESS, *Blindness* produced by the reflection of the solar light from snow. As a preventive, *Snow Eyes* are used by the Esquimaux. These are made of extremely light wood, with a bridge resting on the nose like spectacles, and a narrow slit for the passage of the light.

SNOW EYES, see *Snow Blindness*.

SNUFF, CEPHALIC, *Pulvis asari compositus*.

SNUFFLES, Teut. *Snuffeln* (probably an example of onomatopœia), *Grave'do neonato'rum*, *Rhinan'gia*, *Rhinanch'onē*. Breathing hard through the nose, often owing to accumulation of the mucous secretions,—an affection to which

infants are liable, and which is relieved by oiling the interior of the nostrils.

SNURLE, Coryza.

SNURLES, Nares.

SOAP, Sapo — s. Acid, see Sapo.

SOAP BERRIES, Sapindus saponaria.

SOAP, BLACK, see Sapo — s. Castile, Sapo durus.

SOAP OF THE COCOA-NUT OIL, see Sapo.

SOAP, COMMON OR SOFT, see Sapo — s. Liquid, see Sapo — s. Medicinal, see Sapo — s. Spanish, Sapo durus — s. Yellow, see Sapo.

SOAPWORT, Saponaria.

SOB, from Sax. *soþian*, 'to grieve,' (probably an example of onomatopœia); (F.) *Souglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBBY, Corpulent.

SOBOLES, Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, see Parotid.

SOCIETY, *Societas*, (F.) *Société*, from *socius*, 'a companion.' An association for the promotion of some common object.

SOCIETIES, MEDICAL. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the States, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the States, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications, are the following: IN AMERICA, — The Massachusetts Medical Society; the Physico-medical, and Medical Societies of the State of New York; the College of Physicians of Philadelphia, and the American Medical Association. IN EUROPE, — The Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland; the Medico-Chirurgical and Phrenological Societies of Edinburgh; the College of Physicians, the Medico-Chirurgical the Medical and the Sydenham Societies of London; the Associated Apothecaries and Surgeon Apothecaries of England and Wales, and the Provincial Medical and Surgical Association; the Royal Academy of Surgery, the Royal Society of Medicine, the Société Médicale d'Émulation, the Société de Médecine, the Royal Academy of Medicine, the Société Médicale d'Observation, and the Société de Biologie, of Paris; the Medico-Chirurgical Academy of Vienna; the Medical Societies of Berlin and Copenhagen, &c., &c. IN ASIA, — The Medical and Physical Society of Calcutta.

Valuable medical essays are likewise contained in the published Transactions of the American Philosophical Society; the Royal Societies of London, Edinburgh, Göttingen, &c.; the Imperial Academy of Sciences of Paris; the Imperial Society of Sciences of St. Petersburg and Vienna; the Royal Academy of Sciences of Turin; the Academia Imperialis Leopoldina Naturæ Curiosorum, &c.

SOCORDIA, Hallucination.

SODA, An Arabic word. Protoxide of sodium, (F.) *Sonde*, is obtained by adding caustic lime to a solution of carbonate of soda. The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not officinal.

Soda impura, *Barilla*, *Bariglia*, *Barillor*,

Soda Hispanica, *Anatron*, *Natron*, *Anatron*, *Nitrum Antiquorum*, *Kelp*, *Aphronitrum*, *Sal alkalinus fixus fossilis*, *Carbomus Soda impura*, *Subcarbomus Soda impura*, *Amuchron*. The mineral alkali is obtained from several sources; — naturally, in Egypt: artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast; — as the *Salsola sativra*, *S. soda*, *S. tragus*, *Salicornia herbacea*, *Salicornia Arabica*, &c. The *Barilla ashes* are from the ashes of the *Salicornia Europæica*; the *Kelp*, *Sonde de Vareyre*, from the *Fucus vesiculosus* and other varieties; — the *Turkey Barilla*, *Rouquette*, *Centre du Levant*, *Rochet*, *Alexandrina*, from the *Mesembryanthemum Copiticum*; — the *Alicant Barilla*, *Soda Alicantina* seu *Alonensis*, from the *Mesembryanthemum nudiflorum*; — and the *Carthagena Barilla*, from the *Salicornia* and *Salsola*.

Impure subcarbonate of soda, (F.) *Sonde du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, Cardialgia, Cephalalgia, Pyrosis.

SODA ACETATA, *Soda Acetata*, *Acetate of Soda*, *Terra foliata mineralis*, (F.) *Acétate de soude*. This salt is used in similar cases with the acetate of potass.

SODA AÉRATA, *Soda carbonas* — s. *Alonensis*, *Soda* — s. *Borate* of, *Borax* — s. *Bicarbonate* of, *Soda carbonas* — s. *Bilate* of, *Picromel* — s. *Borate* of, *Borax* — s. *Boraxata*, *Borax*.

SODA, CARBONATE OF, *Soda Carbonas* seu *Bicarbonas*, *Carbonas Natricum*, *Soda Aërata*, *Bicarbonate of Soda*, *Carbonate of protoxide of Sodium*, (F.) *Carbonate de Soude*, *S. effervescente ou aérée ou crayeuse*. (*Soda subcarb.* Bj, *aqua destill.* Oij. Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and better adapted for effervescing draughts.

SODA CAUSTICA, *Protoxide of Sodium*, *Caustic Soda*, (F.) *Soude caustique*, *S. à la Chaux*, *Sonde pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

SODA, CHLORIDE OF, *S. Chlorinata*, *Soda Chloridum* seu *Chloruretum*, *Chlorinated Soda*, *Natrium Oxymuriaticum*, *Oxymuriate of Soda*, (F.) *Chlorure de Soude*, *Chlorure d'acide de Sodium*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See *Liquor Soda Chlorinate*.

SODA, CHLORINATED, *Soda chloride* of — s. *Hispanica*, *Soda* — s. *Hydrochlorate* of, *Soda muriate* of.

SODA, HYPOSTULPHITE OF, *Soda hypostulphis*, (F.) *Hypostulphite de Soude*. This salt has been lately extolled in chronic cutaneous, and scrofulous affections. It is given in syrup.

SODA, LITHATE OF, *Urate of soda* — s. *Mephite* of, *Soda*, subcarbonate of.

SODA, MURIATE OF, *S. muria* seu *muria* seu *Alkali minerali salinum*, *Soda murias*, *Sol communis seu culinari* seu *fumicum* seu *gemma* seu *marinus* seu *albus* seu *fossilis* seu *lividum*, *Muria*, *Natron muriatum*, *Natron muriatum*, *Hydrochloricus Natricum*, *Chloruretum Sodii*, *Sodii Chloridum*, *Common salt*, *Sea salt*, *Rock salt*, *Bay salt*, *White salt*, *Quadrichloruret of Sodium*, *Hydrochlorate of protoxide of Sodium*, *Hydrochlorate of Soda*, *Chloride of Sodium*, (F.) *Chlorure de Sodium*, *Sel marin*, *Sel de Cuisine*.

In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and antheimintic. Externally, stimulant. It is a well-known and useful culinary substance. It has been greatly recommended as an antiperiodic in the dose of \mathfrak{ss} or $\mathfrak{ʒi}$.

SODA, NITRATE OF, *Sodæ Nitras, Natron seu Natrum nitricum, Nitras natricus, Alkali mine-ralle nitratum, Nitrum Rhomboïdale seu cubi-cum, Nitras Natricum, Sulphætra, Nitrate of protoxide of Soda, Protonitrate of Sodium, Cubic Nitre.* Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

SODA, OXYMURIATE OF, *Sodæ chloride of.*

SODA, PHOSPHATE OF, *S. Phosphorata, Sodæ phosphas, Phosphas Natricum, Natrum Orphosphorodes, Sal mirabile perlutum, Alkali mine-ralle phosphoratum, Subphosphate of protoxide of Sodium, Subprotophosphate of Sodium, Subphosphate of Soda, Tribasic phosphate of Soda, Tasteless purging salt, (F.) Phosphate de Soude, Sel admirable perlé.* (Boue burnt to whiteness and powdered, \mathfrak{bxx} ; Sulphuric acid, \mathfrak{lvj} ; Carbonate of soda, q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gal-lon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phos-phoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—Ph. U. S.) Cathartic, in the dose of from \mathfrak{ss} to $\mathfrak{ʒj}$.

SODA, PHOSPHATE OF, TRIBASIC, *S. Phosphate of—s.* Powders, see Powders, Soda—s. Springs, see Water, Mineral (gaseous).

SODA, SUBCARBONATE OF, *Sodæ Subcarbonas, S. Carbonas* (Ph. U. S.), *Natron præparatum, Sal Sodæ, S. alkali, Flos Salis, Sagine Vitri, Salt of Soda or of Barilla, Subcarbonate of protoxide of Sodium, Mephite of Soda, (F.) Sous-carbonate de Soude.* The impure carbonate, dissolved in water; the solution filtered and crys-tallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a deob-struent in serofulous and other affections. Dose, gr. x to $\mathfrak{ʒss}$.

The dried Subcarbonate of Soda, *Sodæ Sub-carbonas esiccata, Sodæ carbonas esiccatus*, (Ph. U. S.) *Carbonas Sodæ siccatum, (F.) Sous-carbonate de Soude desséché*, is employed as an antacid and lithontriptic. Dose, gr. x to xv.

SODA, SUBPHOSPHATE OF, *S. phosphate of.*

SODA, SULPHATE OF, *Sodæ Sulphas, Natron vitriolatum, Sal catharticum seu mirabile Glauberi, Alkali minerale sulphuricum, Natrum sulphuricum, Soda vitriolata, Sulphas natricus, Apéritif Salt of Frederick, Glauber's Salts, (F.) Sulfate de Soude.* Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with sub-carbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, $\mathfrak{ʒvj}$ to $\mathfrak{ʒx}$.

The *Lymington Glauber's Salts* is a Sulphate

of *Magnesia aul Soda*, and is obtained from the mother liquor of sea-water, or by dissolving Ep-som salt in a solution of Glauber's salt.

SODA, TARTRATE OF, *Tartrate of potass and Soda, Tartarised Soda, Rochelle or Seignette's Salt, Soda Tartarizata, Sal Rapelle'sis seu Poly-chrestum Seignetti seu Seignetti, Natron tartarizatum, Trartris potassæ et Sodæ, Sodæ et Potassæ Tartras* (Ph. U. S.), *Sodæ potassio-tartras, Tartras Potassæ et Sodæ, (F.) Tartrate de potasse et de Soude.* (*Sodæ carb. ʒi; potass. bitart.* in pulv. $\mathfrak{ʒxvj}$, *Aq. bullieut.* Ov. Dissolve the carbonate in water; and add, gradually, the bitartrate. Filter the solution and crystallize.—Ph. U. S.) It is a gentle cathartic. Dose, $\mathfrak{ʒss}$ to $\mathfrak{ʒj}$.

SODA, URATE OF, Urate of Soda—s. Vitriolata, S. sulphate of.

SODA WATER, Acidulous water, simple.

SODA AND SILVER, HYPOSULPHITE OF, *Sodæ et Argenti Hyposulphitis.*

SODÆ ACETAS, *Sodæ acetate of—s.* Arsenias, Arseniate of soda—s. Biboras, Borax—s. Bicar-bonas, Soda, carbonate of—s. Boras, Borax—s. Boras alealescens, Borax—s. Boras supersaturus, Borax—s. Carbonas, Soda—s. Carbonas, Soda, subcarbonate of—s. Carbonas esiccatus, see Soda, subcarbonate of—s. Carbonas impurus, Soda—s. Chloras, Soda, chlorate of—s. Hypo-sulphis, Hyposulphite of soda—s. Murias, Soda, muriate of—s. Nitras, Soda, nitrate of—s. Phos-phas, Soda, phosphate of—s. et Potassæ tartras, Soda, tartrate of—s. Potassio-tartras, Soda, tartrate of—s. Subboras, Borax—s. Subcarbonas impura, Soda.

SODÆ ET ARGENTI HYPOSULPHIS, *Hyposulphite of soda and silver, (F.) Hyposulphite de Soude et d'Argent.* This salt is formed by pouring a solution of hyposulphite of soda over oxide of silver recently precipitated by potassa, until the oxide is entirely dissolved. Crystals are afforded by evaporation. A solution of it is used in the same cases as one of the nitrate of silver.

SODII AURO-TERCHLORIDUM, see Gold—s. Chloridum, Soda, muriate of—s. Chloruretum, Soda, muriate of.

SODII IODIDUM, *Iodide of sodium.* This salt has been prescribed in the same cases as the iodide of potassium.

SODIUM, *Natrium, Natronium.* The metallic basis of soda.

SODIUM, CARBONATE OF PROTOXIDE OF, *Sodæ carbonas—s.* Chloride of, Soda, muriate of—s. Chlorure de, Soda, muriate of—s. Chlorure d'Oxide de, Soda, chloride of—s. Protonitrate of, Soda, nitrate of—s. Protoxide of, Soda—s. Protoxide of, hydrochlorate of, Soda, muriate of—s. Protoxide of, nitrate of, Soda, nitrate of—s. Protoxide of, phosphate of, Soda, phosphate of—s. Protoxide of, subcarbonate of, Soda, subcarbonate of—s. Quadri-chloruret of, Soda, muriate of—s. Subborate of protoxide of, Borax—s. Subproto-borate of, Borax—s. Subprotophosphate of, Soda, phosphate of.

SODOMA GALLORUM, Syphilis.

SODOMIA, Buggery.

SODOMY, Buggery.

SOFTENING, Mollities.

SOL-POUR-SOL, Homœozygy.

SOIE, Sericum.

SOIF, Thirst—s. Excessive, Polydipsia.

SOL, Gold.

SOL-LUNAR, *Sol-lunaris*; from *sol*, 'the sun,' and *luna*, 'the moon.' An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

SOLAMEN INTESTINORUM, *Pimpinella anisum—s.* Scabiosorum, *Fumaria.*

SOLANOID, *Solanoides*; a hybrid word, from

solanum, 'the potato,' and *ειδος*, 'resemblance.' Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhus and euphaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLANUM, *S. nigrum* seu *vulgare* seu *vulgatum*, *Common or Garden Nightshade*, (F.) *Morelle à fruit noir*. Family, Solanaceæ. See *Syst. Pentandria Monogynia*. A narcotic poison. The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

SOLANUM CAROLINENSE, *Horse nettle*; indigenous. The juice of the berries has been employed successfully in idiopathic tetanus. [?]

SOLANUM DULCAMA'RA, *S. scandens* seu *lignosum*, *Dulcamara*, *D. flexuosa*, *Glyciphyron*, *Amarum dulce*, Στρογγυλος of Theophrastus, *Bittersweet*, *Woody Nightshade*, *Bittersweet Nightshade*, *Bittersweet Vine*, *Nightshade Vine*, *Violet bloom*, (F.) *Douce-amère*, *Morelle grimpante*, *Vigne de Judée*. The taste of the stalks is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, serofula, and jaundice. Dose, in powder, ℞j to ℞j.

SOLANUM ESCULENTUM, *S. tuberosum* — s. *Fœtidum*, *Datura stramonium* — s. *Furiosum*, *Atropa belladonna* — s. *Hortense nigrum*, *Atropa belladonna* — s. *Humboldtii*, *S. Lycopersicum* — s. *Lethale*, *Atropa belladonna* — s. *Lignosum*, *S. dulcamara*.

SOLANUM LYCOPER'SICUM; *Lycopersicon esculentum*, *L. pomum amo'ris* seu *Humboldtii* seu *pseudolyopersicum*, *Melum lycopersicum*, *Laceapple plant*. The fruit of this, called *Tomato*, *Tomato* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, *Phytolacca decandra* — s. *Maniacum*, *Atropa belladonna*, *Datura stramonium* — s. *Melanocerasus*, *Atropa belladonna*.

SOLANUM MELON'GENA, *Melongenæ*, *Egg-plant*, *Mad Apple plant*; (F.) *Anbergine*. A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Pomum Melon'genæ*, *Melum insculum*, is prepared in soups and sauces in those countries, like the tomato.

SOLANUM NIGRUM, *Solanum*.

SOLANUM NIV'EUM. A South African plant, the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

SOLANUM PARMENTERII, *S. tuberosum* — s. *Pseudolyopersicum*, *S. Lycopersicum* — s. *Quadrifolium*, *Paris* — s. *Racemosum Americanum*, *Phytolacca decandra*.

SOLANUM SANCTUM; *Pul'vinate Nightshade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM SCANDENS, *S. Dulcamara*.

SOLANUM TIBERO'SUM, *S. esculentum* seu *Parmenterii*, *Lycopersicon tuberosum*, *Papas Anavien'um*, *Papas Americanum*, *Americanum Tuberosum*, *Battata Virginia'na*, *Battatos*; the *Potato*, (F.) *Pomme de Terre*. A native of Peru. A nutritious and wholesome vegetable: one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour*, *P. Starch*, *French Sago*, *Petit Snyne*, *Common Arrow-root*, &c.

SOLANUM URENS, *Capsicum annuum* — s. *Vesicarium*, *Physalis*.

SOLANUM VIRGINIANUM: indigenous; is said to resemble *Solanum nigrum* in its properties.

SOLANUM VULGARE, *Solanum*.

SOLAR, *Solaris*, from *sol*, *solis*, 'the sun.' Relating to the sun; having rays like the sun.

SOLAR PLEXUS, *Plexus solaris*, *Centum commun'is*, *Cerebrum abdominal'e*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastrics. It seems to be chiefly intended for the aorta, and accompanies all its branches: furnishing many secondary plexuses, which are called the *infradiaphragmatic*, *colicæ*, *superior mesenteric*, *inferior mesenteric*, *renal* or *emulgent*, *spermatie*, &c.

SOLDANELLA, *Convolvulus soldanella*.

SOLDIER'S WEED, *Matico*.

SOLE, *Solum*, *S. pedis*, *Solen*, *Basis cor'poris*, *Ichnus*, *Superficie' pedis plantaris*, *Pedi'na*, *Vestig'ium*, *Pedi'na*, *Peza*, *Pelma*, *Plantaris superficie' pedis*, *Facies conca'ra* seu *inferior* seu *Plantum* seu *Conca'rum* seu *Pars inferior* seu *Plantis* seu *Planta* seu *Vala pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEA, *Sole* — s. *Ipecacuanha*, see *Ipecacuanha*.

SOLÉAIRE, *Soleus*.

SOLEN, *Cradle*, see *Vertebral column*.

SOLENARIUM, from *σωλην*, 'a canal, a pipe.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*. The word *Solen* itself — *σωλην*, *Cun'alis* — was used, in antiquity, for a grooved channel or cradle, in which a fractured limb was placed.

SOLENOSTEMMA ARGEL, *Cynanchum oleifolium*.

SOLE'US, *Gastrocnemius inter'nus*, *Tibio-calcæus*, (Ch. ;) (F.) *Soléaire*, from *sulea*, 'a sole of a shoe,' owing to its shape. A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the gastrocnemius externus, to form the tendo Achillis. This muscle extends the foot on the leg, and conversely.

SOLID, *Solidus*, *St'e'veus*, from *solum*, 'the ground.' A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereology*, from *στερεος*, 'solid,' and *λογος*, 'a discourse.'

SOLIDA'GO, from *solidus*, 'I make firm,' in allusion to its properties as a vulnerary. See *Solidago virgaurea*.

SOLIDAGO SARACENICA, *S. virgaurea*.

SOLIDA'GO RIG'IDA, *Rigid Goldenrod*, *Bones' styptic*; indigenous; of the Composite family, flowering in August and September; is astringent and tonic.

SOLIDA'GO VIRGAU'REA, *S. vulg'ris* seu *Saracenicæ*, *Virga aurea*, *Herba ilo'rea*, *Cany'za coma aurea*, *Sym'phytum Petrac'um*, *El'cheyria*, *Consol'ida*, *Saracenicæ*, *Golden rod*, (F.) *Verge*

d'or, Herbe des juis. The leaves of *Solida'go* *odo'ra*—*SOLIDA'GO* (Ph. U. S.)—*Fragrant* or *Sweet-scented Golden-rod*—and the flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

SOLIDAGO VULGARIS, S. virgaurea.

SOLIDISM, Patholog' in solida'ris. The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Sol'id-ists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbid agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, Boiguoire, Tania solium.

SOLUBILITY, Solubil'ites, from *solvere, solutum*, 'to dissolve.' That property of a body by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

NAMES OF SALTS.	Solubility in 100 parts water.	
	at 60°	at 212°
<i>Acids.</i>		
Benzoic.....	0.208	4.17
Citric.....	133	200
Oxalic.....	50	100
Tartaric.....	very soluble	
<i>Salts.</i>		
Acetate of Potassa.....	100	
Soda.....	35	
Bitartrate of Potassa.....	1.5	3.3
Borate of Soda.....	8.4	16.8
Carbonate of Ammonia.....	50	
Magnesia.....	2	
Potassa.....	25	
Soda.....	50	
Chlorate of Potassa.....	6	40
Soda.....	35	35
Chloride of Calcium.....	200	
Magnesium.....	100	
Potassium.....	33	
Sodium.....	35-42	36-16
Muriate of Ammonia.....	33	100
Nitrate of Potassa.....	14.25	100
Soda.....	33	100
Phosphate of Soda.....	25	50
Sulphate of Ammonia.....	50	100
Copper.....	25	50
Iron.....	50	100
Magnesia.....	100	133
Potassa.....	6.25	20
Soda.....	37	125
Supersulphate of Potassa.....	5.0	100
Tartrate of Potassa.....	25	
Potassa and Soda.....	20	
Antimony & Soda.....	6.6	33

SOLUM, Solc—s. *Pedis, Metatarsus, Sole.*

SOLUTÉ, Solution.

SOLUTIO, Solution—s. *Alexiteria Gaubiana*, see *Disinfection*—s. *Ammonia subcarbonatis, Liqueur ammonia subcarbonatis*—s. *Arsenicalis, Liqueur arsenicalis*—s. *Arsenicata, Liqueur arsenicalis*—s. *Arsenitis kalica, Liqueur arsenicalis*—s. *Calcis, Liqueur calcis*—s. *Camphora aetherea, Tinctura aetherea camphorata*—s. *Camphora oleosa, Linimentum camphora*—s. *Continui, Solution of continuity*—s. *Cupri ammoniati, Liqueur Cupri ammoniati*—s. *Ferri nitratis, Liqueur Ferri nitratis*—s. *Guaiaei gummosa, Mistura guaiaei*—s. *Muriatis barytae, Baryta, muriate of—s. Muriatis calcis, see Calcis murias*—s. *Muriatis ferri aetherea, Tinctura seu alcohol sulfurico-aethereus ferri*—s. *Muriatis hydrargyri oxygenati, Liqueur hydrargyri oxymuriatis*—s. *Potassii iodidi iodureta, Liqueur iodini compositus*—s. *Resinae gtaiaei*

aquea, Mistura guaiaei—s. *Solventis Mineralis, Liqueur Arsenici chloridi*—s. *Subcarbonatis ammoniaci spirituosus, Spiritus ammonia.*

SOLUTIO SULPHATIS CUPRI COMPOSITA, Aqua vitriolica cuprica, Sydenham's Styptic Water, (Sulph. cupri, ℥ij, alum., acid. sulph., āā ℥ij, aqua, ℥vij; dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

SOLUTION, Solutio, Lysis, (F.) Dissolution, from *solvere, solutum*, 'to dissolve.' An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation—*Solutum, (F.) Soluté.* It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

SOLUTION OF ACETATE OF AMMONIA, Liqueur ammonia acetatis—s. of *Acetate of morphia, Liqueur morphia acetatis*—s. *Alkaline, see Fuligokali*—s. of *Alkaline iron, Liqueur ferri alkalini*—s. of *Alum, compound, Liqueur aluminis compositus*—s. of *subcarbonate of Ammonia, Liqueur ammonia subcarbonatis*—s. of *Ammoniated copper, Liqueur cupri ammoniati*—s. *Arsenical, Liqueur arsenicalis*—s. *Arsenical, De Valangin's, Liqueur Arsenici chloridi*—s. of *Carbonate of Soda, Liqueur sodae carbonatis*—s. of *Charcoal, concentrated, see Tinctura catechu*—s. of *Chlorinated soda, Liqueur sodae chlorinatae*—s. of *Chloride of Arsenic, Liqueur Arsenici chloridi*—s. of *Chloride of Zinc, see Burnett's disinfecting liquid*—s. of *Citrate of Ammonia, Liqueur ammonia citratis*—s. of *Citrate of Magnesia, see Magnesia citras*—s. of *Citrate of Potassa, Liqueur potassae citratis*—s. of *Continuity, see Continuity*—s. of *Corrosive sublimate, Liqueur hydrargyri oxymuriatis*—s. *De Valangin's, Liqueur arsenici chloridi*—s. *Donovan's, see Arsenic and Mercury, Iodide of—s. Fowler's, Liqueur arsenicalis*—s. *Gannal's, see Aluminae sulphas*—s. of *Gutta percha in Chloroform, see Gutta percha*—s. *Heinecke's, see Arseniate of Soda.*

SOLUTION, GOADBY'S, called after the proposer, is made of bay salt, corrosive sublimate or arsenious acid, and water. It is employed to preserve animal substances.

SOLUTION OF HYDRIODATE OF POTASS, Liqueur potassae hydriodatis—s. of *Iodide of iron, Liqueur ferri iodidi*—s. of *Iodine, compound, Liqueur iodinii compositus*—s. of *Iron, nitrated, Liqueur ferri nitratis*—s. *Labarraque's, Eau de Javelle*—s. of *Lime, Liqueur calcis*—s. *Lugol's, Liqueur iodinii compositus*—s. of *Magnesia, condensed, Magnesia, fluid*—s. of *Monro, Liqueur of Monro*—s. of *Nitrate of iron, Liqueur ferri nitratis*—s. of *Oxymuriate of mercury, Liqueur hydrargyri oxymuriatis*—s. *Par les huiles, Olea medicinalia*—s. *Pearson's, see Arseniate of soda*—s. *Plenck's, see Hydrargyri oxydum cinereum*—s. *de Potasse, Liqueur potassae*—s. of *Potassa, Liqueur potassae*—s. of *Sesquinitrate of iron, Liqueur ferri nitratis*—s. of *Soda, Liqueur sodae*—s. of *Subacetate of lead, Liqueur plumbi subacetatis*—s. of *Subacetate of lead, diluted, Liqueur plumbi subacetatis dilutus*—s. of *Subcarbonate of potass, Liqueur potassae subcarbonatis*—s. of *Sulphate of morphia, Liqueur morphiae sulphatis*—s. of *Tartarized antimony, Vinum antimonii tartarizati*—s. of *Ternitate of sesquioxide of iron, Liqueur ferri nitratis*—s. of *Van Swieten, Liqueur hydrargyri oxymuriatis.*

SOLUTIVUS, Laxative.

SOLUTUM, Solution.

SOLVENS, Solvent—s. *Minerale, Liqueur arsenicalis.*

SOLVENT, Solvens, (F.) Fondant, from *solvere*, 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstruct-

tions and extraneous substances. Thus we have solvents of the stone in the bladder, &c. See Dissolventia.

SOLVENT, MINERAL, Liquor arsenicalis.

SOMA, Body, Corpus.

SOMASCETICS, Gymnastics.

SOMASCÉTIQUE, Gymnastics.

SOMATIC, *Somat'icus*; from *σωμα, σωματος*, 'the body.' That which concerns the body;—as somatic death, or death of the body, in contradistinction to molecular death or the death of a part.

SOMATODYM'IA, from *σωμα, σωματος*, 'the body,' and *δύω*, 'I enter into.' A double monstrosity in which the trunks are united. Of this, there are several varieties:—*Vertebrodym'ia*, where the union is by the vertebrae; *Ischiodym'ia*, by the ossa isehii; *Sternodym'ia*, by the sternum; *Supraomphalodym'ia*, (F.) *Sus-omphalodym'ia*, by the super-umbilical regions; *Supra et infra-omphalodym'ia*, by the superior and inferior umbilical regions; and *Sterno-omphalodym'ia*, where the union is by both the sternal and the umbilical regions.—Cruveilhier.

SOMATOL'OGY, *Somatolog'ia*, from *σωμα, σωματος*, 'the body,' and *λογος*, 'a discourse.' A treatise on the human body. Anatomy.

SOMATOTOMY, Anatomy.

SOMMEIL, Sleep.

SOMNAMBULATION, Somnambulism.

SOMNAMBULISM, *Somnambula'tio*, *Hypnobate'sis*, *Hypnobata'sis*, *Hypnobat'ia*, *Hypnobat'isis*, *Rhembas'mus*, *Lunatis'mus*, *Hypnonerg'ia*, *Seleuog'ia*, *Nyctobate'sis*, *Antonyctobat'ia*, *Seleni'asis*, *Selenias'mus*, *Somnambulis'mus*, *Nyctobat'ia*, *Noctambula'tio*, *Noctambulis'mus*, *Nyctobat'ia*, *Nyctobat'ia*, *Siph'ita*, *Syph'ita*, *Paron'ria ambulans*, *Noctisur'ginnu*, *Oneirodyn'ia act'iva*, *Cenopu'dia*, *Somno-vigil*, *Somnambula'tion*, *Sleep-walking*, from *somnus*, 'sleep,' and *ambulare*, 'to walk.' A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely by his subjective sensations; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is,—so to arrange the bed-chamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

SOMNAMBULISM, MAGNETIC, MESMERIC, or ARTIFICIAL, *Somnambulis'mus artificia'lis*, *Cataph'ora magnet'ica*, *Somnip'athy*, is that peculiar condition, into which individuals are thrown by the *Animal Magnetizer*. It occurs only in those of weak nervous temperament; in hysterical females, &c.

SOMNAMBULISMUS, Somnambulism—s. Artificial, Somnambulism, magnetic.

SOMNAMBULIST, *Somnambulus*, *Hypnobates*, *Hypnobates*, *Noctambulus*, *Lunaticus*, *Noctambulo*, *Somnambulo*. A sleep-walker.

SOMNAMBULIS'TIC, Relating or appertaining to somnambulism,—as the '*somnambulis'tic state*.'

SOMNAMBULO, Somnambulist.

SOMNIA'TIO, from *somnium*, 'a dream.' The act of dreaming.

SOMNIATIO MORBOSA, Oneironosus—s. in Statu vigili, Hallucination.

SOMNIF'EROUS, *Som'nifer*, *Soporifer*, *Hypnot'icus*, *Hypnopu'us*, *Soporati'vus*, *Soporif'ic*, *Soporiferous*, (F.) *Assoupissant*; an epithet for a medicine which causes sleep, from *somnus*, 'sleep,' and *fero*, 'I carry.'

SOMNIL'QUIST; same etymon as the next. One who talks in his sleep.

SOMNILO'QUIUM, *Somniloquis'mus*, *Somniloquium*, from *somnus*, 'sleep,' and *loquor*, 'I speak.' Talking in the sleep.

SOMNOPATHY, Somnambulism, magnetic.

SOMNIUM, *Euy'p'niun*, *Insom'niun*, a *Dream*, (Sc.) *Suevini*, *Suev'ing*, *Suev'nyng*, *Suev'nyng*, (F.) *Rêve*, *Songye*. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Réasseries*.

SOMNO-VIGIL, Somnambulism.

SOMNOLENCY, *Somnole'ntia*, *Hypnæsthe'sis*, *Hypno'dia*, *Dormita'tio*, *Carus* *Lethar'gus* *Cataph'ora*, *Cataphora*, *Coma Somnolentum*, *Caro'sis*, *Slumber*, *Heav'iness*, (F.) *Assoupissement*; from *somnus*, 'sleep.' Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMPNUUS, Sleep.

SON, Furfur, Sound.

SONCHUS, *συχχος*, *S. Olera'ceus*, *Hiera'cium olera'ceum*, *Cicer'bita*, *Sow Thistle*, *Swine-thistle*, (F.) *Laiteron doux*. Ord. Cichoraceæ. Most of the species of Sonchus abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONCHUS FLORIDANUS, Mulgedium Florida-num.

SONDE, Sound, Specillum—s. *Cannelée*, Director.

SONDE D'ANEL. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lacrymal passages through the punctum lacrymale.

SONDE DE BELLOC. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

SONDE BRISÉE (F.), *Eyed probe*. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

SONDE À CONDUCTEUR (F.). A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

SONDE À DARD, see Lithotomy (high operation).

SONDE DE LAFOREST. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

SONDE ou PINCE DE HUNTER. A cylindrical silver canula; of the size of a common catheter; open at both extremities, and contain-

ing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

SONDE DE VARECQ. Soda.

SONGE, Somnium.

SONITUS AURIUM, Tinnitus aurium—s. Fluidi, Hygrecchema—s. Hepaticus, Hepatechema—s. Intestinalis, Enterechema—s. Stomachicus, Gasterrechema.

SONOROUS RHONCHUS, *Râle sonore*.

SONUS, Sound—s. Vocis, Accent.

SOOJA, see Dolichos.

SOOJIE, BASTER'S, a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

SOOL, Gastroperiodynia.

SOOT, Fuligo—s. Tea, see Fuligokali—s. Wart, Cancer, chimney-sweeper's.

SOPHIA, Sisybrium sophia—s. Chirurgorum, Sisybrium sophia.

SOPHISTICATIO, Falsification.

SOPHO'RA HEPTAPHYL/LA, *Anticholer'ia*. Ord. Leguminosæ. Sex. Syst. Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

SOPHORA TINCTORIA, *Baptis'ia* seu *Podalyr'ia Tinctor'ia*, *Indigof'era*, *Wild Indigo*, *Indigo Weed*, *Broom*, *Indigo Broom*, *Horsefly Weed*, *Yellow Broom*, *Clover Broom*, *Rattle Bush*, *Yellow Indigo*. An American plant, the taste of whose root is unpleasant, sub-acrid, and nauseous—very similar to that of ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the cortical part of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

Baptis'ia Leonantha, *Tall white false Indigo*, an indigenous plant, has the same properties.

SOPHRONISTÆ DENTES, see Dentition.

SOPHRONISTERES DENTES, see Dentition.

SOPHROSYNE, Temperance.

SOPHENS, Paregoric.

SOPHO, Opium.

SOPOR. A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

SOPOR CAROTICUS, Carus.

SOPORARIÆ ARTERIÆ, Carotids.

SOPORATIVUS, Somniferous.

SOPORIFERUS, Somniferous.

SOPORIFIC, Somniferous.

SOPOROUS, *Soporosus*, (F.) *Soporeux*, from *sopor*, 'sleep.' Sleepy; causing sleep.

SORA, *Essera*.

SORB TREE, *Sorbus domestica*.

SORBASTRELLA, *Pimpinella saxifraga*.

SORBEFA'CIENT, *Sorbefac'iens*, from *sorbere*, 'to suck in,' and *facere*, 'to make.' A remedy that promotes absorption.

The following are the chief sorbefacients or modifiers of nutritive action—*entrophics*:—Acida Vegetabilia; Alkalia; Ammoniacum; Brominium; Galbanum; Hydrargyri Præparata; Iodinium; Liqueur Calcii chloridi; Spongia usta; Compression, (methodical); Friction; Mental Sorbefacients. (Imagination, Emotions.)

SORBETHUM, Scherbet.

SORBETTUM, Scherbet.

SORBETUM, Scherbet.

SORBIER DES OISELEURS, *Sorbus acuparia*.

SORBITIO, Jus.

SORBITIO CARNIS seu EX CARNE. Broth or soup made of meat.

SORBITUM, Jus.

SORBUM, see *Sorbus domestica*.

SORBUS, *Cratægus aria*, s. domestica.

SORBUS ACUPARIA seu ACCUPARIA, *Mes'pilus*, *M. acuparia*, *Mountain Service*, *Mountain Ash*, *Quicken tree*, *Roan tree*, *Witchin*, *Witch hazel*, *Witch wood*, (Sc.) *Roden tree*, *Roun tree*, *Rowan tree*, *Rone*, (Prov.) *Keer*, *Rantree*, (F.) *Sorbier des Oiseleurs*, *Frêne sauvage*, (F.) Rosacæ. The berries—(Sc.) *Rodens*—of this tree are employed for similar purposes as the last.

SORBUS ALPINA, *Cratægus aria*.

SORBUS AMERICANA, *Pyrus Americana*, *American Mountain Ash*. The bark resembles that of the Wild Cherry, and might be used in the same cases.

SORBUS ARIA, *Cratægus aria*—s. *Acuparia*, *S. acuparia*—s. *Cydonia*, *Pyrus cydonia*.

SORBUS DOMESTICA, *Sorbus*, *Pyrus domestica*, *Mes'pilus domestica*, *Oie*, *Service* or *Sorb Tree*, (F.) *Cormier*. Family, Rosacæ. Sex. Syst. Icosandria Trigynia. The fruit of this tree, *Sorbium*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

SORBUS MALUS, *Pyrus malus*.

SORDES, *Rhypos*, 'Filth.' A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in adynamic fevers more especially, and of foul matters in the stomach—*Sordes primarum viarum*, *Rhypparia*. The French call an ulcer, exhibiting such an appearance, *sordid*. Also dirt of any kind.

SORDES, Ichor, Saburra—s. Acidæ, Acidities—s. Aurium, Cerumen—s. Primarum viarum *Embarras gastrique*, see *Sordes*—s. Ventris, Excrement.

SORDICULÆ AURIUM, Cerumen.

SORE, Ulcer.

SORE, BAY. A disease which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

SORE MOUTH, Stomatitis—s. Gangrenous, Cancer aquaticus—s. Throat, Cyanche—s. Throat, Clergyman's, Pharyngitis, follicular—s. Throat, inflammatory, Cyanche tonsillaris—s. Throat, putrid, Cyanche maligna—s. Throat, tubercular, Pharyngitis, follicular—s. Throat, ulcerous, Cyanche maligna.

SORENESS, Sax. *ropp*, 'vexed, molested.' *Paraps'is acris teneritu'do*. Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

SORGHUM, *Panicum Italicum*.

SOROCCO, Puna.

SOROCCHE, Puna.

SORORIA'TIO, from *sorores*, 'sisters,' *sororio*, 'to grow up or swell together.' The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammae begin to show, —*sororiantes mammae*—was formerly called *sororiana virgo*.—Plautus.

SORREL, COMMON, *Rumex acetosus*—s. Field, *Rumex acetosella*—s. French, *Rumex scutatus*—s. Garden, *Rumex scutatus*—s. Mountain, *Oxalis acetosella*. *Oxyria reniformis*—s. Salt of, Potass, oxalate of—s. Roman, *Rumex scutatus*—s. Sheep, *Rumex acetosella*.

SORREL TREE, *Andromeda arborca*, A. mariana.
SORREL, WELSH, *Oxyria reniformis*—s. White,
Oxalis acetosella—s. Wood, Yellow, *Oxalis stricta*.
SOSTRUM, *Sotrum*, from *σωζεν*, 'to save,'
σωρη, 'a preserver.' A reward given to one who
 saves the life of another. A physician's fee or
honorarium, (F.) *Honoraire*.

SOTERIA DOCTRINA, Medicina.

SOTERIE AQUÆ, Waters, mineral.

SOTIRELLA, Ancient name of a medicine
 composed of opium and other narcotics, nutmeg,
saffron, camphor and soot. It was used in cer-
 tain diseases of the teeth.

SOTRUM, *Sotrum*.

SOUBRESAUT, Subtilus tendinum.

SOUCHERLOON, Bit noben.

SOUCHET DES INDES, *Cureuma longa*—
 s. Odorant, *Cyperus longus*—s. *Roud*, *Cyperus*
rotundus.

SOUCI, *Calendula officinalis*, Panophobia—
 s. *des Alpes*, *Arnica montana*—s. *des Champs*,
Calendula arvensis—s. *Ordinaire*, *Calendula*
officinalis.

SOUDE, Soda—s. *Acétate de*, Soda, acetate
 of—s. *Aéré*, *Sodæ carbonas*—s. *Borate de*, *Borax*—
 s. *Borate saturé de*, *Borax*—s. *Carbonate*
de, *Sodæ carbonas*—s. *Cristique*, *Sodæ caustica*
 of—s. *à la Chanx*, *Sodæ caustica*—s. *Chlorure de*,
 Soda, chloride of—s. *du Commerce*, Soda—s.
Craquelée, *Sodæ carbonas*—s. *Effervescente*, *Sodæ*
carbonas—s. *Hyposulfite de*, Soda, hyposulphite
 of—s. *Phosphate de*, Soda, phosphate of—s. *et de*
Potasse, *Tartrate de*, Soda, tartrate of—s. *Pure*,
 Soda caustica—s. *Sousborate de*, *Borax*—s. *Sous-*
carbonate de, Soda, subcarbonate of—s. *Sulfate*
de, Soda, sulphate of.

SOUFFLE, see *Murmur*, respiratory—s. *Am-*
phorique, see *Cavernous respiration*—s. *Bron-*
chique, see *Murmur*, respiratory—s. *Métallique*,
 see *Cavernous respiration*—s. *Placentaire*, *Bruit*
placentaire—s. *Trachéal*, see *Murmur*, respiratory
 —s. *Tubaire*, see *Murmur*, respiratory—s. *Utérin*,
Bruit placentaire—s. *Voilé*, see *Cavernous*
respiration.

SOUFFLE, WHISPERING. A bellows' sound heard
 over solidified lung and excavations when the
 patient whispers.—*Flint*.

SOUFRE, Sulphur—s. *Carburé*, *Carbonis*
sulphurem—s. *Iodure de*, *Sulphuris iodidum*—s.
Sublimé, *Sulphur sublimatum*—s. *Végétal*, *Lycop-*
odium.

SOULLURE, Pollution.

SOULA'MEA AMA'RA, *Rex amarorum*. A
 shrub of the Moluccas; *Order*, Polygalaceæ; all
 the parts of which are of great bitterness—"hor-
 rendula amarities." It is employed by the Malays,
 and, it is said, with success in cholera and pleu-
 risy: and as a febrifuge.

SOUND, *Specillum*, *Stylus*, *Exploratorium*,
Rodi'olus, (F.) *Sonde*. An instrument used by
 surgeons to discover whether there be a stone in
 the bladder. It is usually made of highly pol-
 ished steel, and is shaped like the catheter. The
 operation is termed sounding.

The French *Sonde* has, however, a more ex-
 tensive signification. It means different instru-
 ments introduced into cavities of certain organs,
 or into wounds, fistulas, &c., to investigate their
 condition, or to fulfil some therapeutical indica-
 tion. See *Sonde*.

SOUND, *Sonus*, *Echos*, *Noise*, (F.) *Son*, *Bruit*.
 The sensation produced on the auditory nerve by
 the vibrations of a sonorous body. Sounds may
 be propagated in three modes. 1. By *reciproca-*
tion or *continuance*, as when a sounding body, of
 a definite pitch, produces a musical tone when
 another body of the same pitch is sounded near it.
 2. By *resonance*, as when a sounding body
 is placed in connection with another, one or more

of whose parts may be thrown into reciprocal vi-
 bration; and 3. By *conduction*, as where the vi-
 brations are transmitted through fluid, liquid, or
 solid media.

SOUND, Catheterize, Syncope, S. Auricular,
Apyromele—s. Bellows, friction, rasp, saw, lancet,
 &c., see *Bruit*—s. Cracked pot, *Bruit de pot fêlé*
 —s. Crumpling, pulmonary, *Froissement pulmo-*
naire—s. Laryngeal, *Laryngeche*.

SOUND, UTERINE, *Uterine longie*, (F.) *Sonde*
utérine. An instrument, somewhat similar to a
 small male catheter, to be introduced into the
 cavity of the uterus, in the diagnosis of diseases
 of that viscus. When notched on the stem, it
 enables the size of the uterine cavity to be ap-
 preciated, and becomes a good *hystero-meter*.

SOUNDING, Searching, see *Sound*.

SOUNDNESS OF MIND, Sanity.

SOUPPIE, Sigh.

SOUR BERRY, see *Oxycantha Galeni*, *Vaccin-*
ium oxycoccos—s. *Dock*, boreal, *Oxyria reni-*
formis—s. Leaf, *Andromeda arborea*—s. Tree
Andromeda arborea—s. Wood, *Andromeda*
arborea.

SOURCIL, Supercilium.

SOURCILIER, *Corrugator supercilli*, Super-
 ciliary.

SOURD, Deaf.

SOURDS-MUETS, see *Mutitas surdorum*.

SOUR-MILK, Buttermilk.

SOUR-SOP, *Bromelia ananas*.

SOURWOOD, *Andromeda mariana*.

SOUS-ACROMIO-CLAVI-HUMÉRAL, Del-
 toïd—s. *Atloïdien*, *Subatloïdaus*—s. *Azôïdieu*,
Subazôïdeus—s. *Azotate de Bismuth*, *Bismuth*,
 subnitrate of—s. *Clavier*, *Subclavius*—s. *Costaux*,
Intercostal—s. *Cutané*, *Subcutaneous*—s. *Épi-*
neux, *Infra-spinatus*—s. *Lingual*, *Sub-lingual*—

Pubio-crété-tibial, *Graeilis*—s. *Pubio-pré-tibial*,
Graeilis—s. *Pubio-trochantérien-externe*, *Obtura-*
tor externus—s. *Pubio-trochantérien-interne*,
Obturator internus—s. *Scapulaire*, *Subscapularis*—
Scapulo-trochiuën, *Subscapularis*—s. *Sels*, see
Salt.

SOUTH CAROLINA, MINERAL WATERS
 OF. *Glenn's Springs*, in Spartanburg District,
 are highly charged with salts of lime, and, not
 far from them, is a chalybeate. *West's Spring*,
 and *Chick's Springs*, a few miles from Greenville,
 resemble Glenn's Springs.

SOUTHERNWOOD, *Artemisia abrotanum*—
 s. Field, *Artemisia campestris*—s. *Maritim*, *Ar-*
temisia maritima—s. *Tartarian*, *Artemisia santo-*
nia.

SOWBREAD, *Arthanita*, *Cyclamen*.

SOWENS, Flummery.

SOY, see *Dolichos soja*.

SOYMIDA FEBRIFUGA, *Swietenia febrifuga*.

SPA, MINERAL WATERS OF. A town
 seven leagues southeast of Liège, where there
 are several springs, possessing a sharp acidulous
 taste; containing much carbonic acid, carbonates
 of iron, lime, and magnesia; carbonate of soda,
 and chloride of sodium. The water is much used
 as a tonic.

SPA WATER, ARTIFICIAL. *Sodæ subcarb.*, gr.
 vij; *magnesiæ carbon.*, ℥j; *limat. ferri.*, gr. iij;
sodii chlorid., gr. j; *aqvæ*, Oij. Impregnate
 with gas from *marble powder* and *sulph. acid.*,
 ãñ Æx.

SPACE, INTERPEDUNCULAR, see *Inter-*
peduncular—s. Perforated, anterior, *Locus per-*

foratus anticus — s. Perforated, posterior, see Tarini pons.

SPADE-BONE, Scapula.

SPADO, Castratus, Eunuch, Spasm.

SPAGYRIA, Chymistry.

SPAGYRISTS, from *σπαω*, 'I separate,' and *γυρω*, 'I assemble,' because they reduced compounds into elements, and formed the latter into compounds [?]. A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom. *Medici'na Paracelsi'stica* seu *Spagyrica*, was likewise called *Hermel'ica*, because it was believed that the means of cure adopted in it had been found in the books of Hermes.

SPAIG, Skeleton.

SPANÆMIA, from *σπανος*, 'poor,' and *αιμα*, 'blood.' Poverty of the blood. Diminution in the quantity of fibrin and red corpuscles of the blood, — as where bleeding has been carried beyond certain limits. — Simon.

SPANÆMIC, *Spanæmicum* (remedium), *Dysplast'icium*, *Plastily'icium* et *erethily'icium*, *Hæmatoly'icium*, *Dyscrasi'acum*. Same etymon as the last. Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood, — as iodine, bromine, &c.

SPANDARAPUM, Sparadrapum.

SPANING, Weaning.

SPANISH FLY, *Cantharis* — s. Juice, Extractum glycyrrhizæ.

SPANNADRAPUM, Sparadrapum.

SPANOPOGON, from *σπανος*, 'rare,' and *πωγων*, 'beard.' One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogones*.

SPARADRAPA, Sparadrapum.

SPARADRAPIER. The name of a machine for spreading sparadraps. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

SPARADRAPUM, *Sparadra'pa*, *Sparadrapus*, *Tela emplast'ica* seu *emplast'rica*, *Spandrap'um*, *Spannadrappum*, (F.) *Sparadrap*. Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following:—

SPARADRAPUM ADHÆSIVUM, *Adhæsive Plaster*. A spread plaster of the *Emplastrum adhæsivum*. It is also called *Strapping*.

English Court Plaster is a Sparadrap, (F.) *Taffetas agglutinatif*, *T. gommé*, *Taffetas d'Angleterre*, *Ser'icum Anglicum*, *Emplast'rum Anglicum*. *E. Anglica'num*, *E. Adhæsivum Woodstock'ii*, *E. Ichthyocol'læ telæ inductum*, *E. Glutinosum*, *Tela Ichthyocol'læ glutinans*, *Isinglass Plaster*. It is made by stretching black silk, and brushing it over with a solution of isinglass \mathfrak{z} j. in proof spirit \mathfrak{z} xij. to which tinct. benzoin. \mathfrak{z} ij. are added. When dry, this is repeated five times; after this, two coats are given it of a solution of tereb. Chia \mathfrak{z} iv. in tinct. benz. \mathfrak{z} vj. which render it less liable to crack.

Liston's Isinglass Plaster is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

SPARADRAPUM PRO FONTIC'ULIS, *Issue Plaster*, is sometimes made of simple douchylon, \mathfrak{b} ij; Burgundy pitch and sarcocolla, each \mathfrak{z} iv; common turpentine, \mathfrak{z} j. Spread upon linen and polished with a moistened calendering glass rubber.

SPARADRAPUM seu TELA GALTERI, *Defensive*

Plaster, (F.) *Toile de Gautier*. This is made of olive oil, \mathfrak{b} ss; snet, \mathfrak{z} iv; wax, \mathfrak{z} x; litharge, common turpentine, thus, and mastich, $\mathfrak{a}\mathfrak{a}$, \mathfrak{z} ij; bole armeniac, flour, $\mathfrak{a}\mathfrak{a}$ \mathfrak{z} j. Pour it, while liquid, upon cloth, and spread. Used for issues and to keep on dressings.

SPARADRAPUM VESICATORIUM. Several substances have been introduced as substitutes for blistering plaster, (see *Emplastrum Lyttæ*), under the names, *Tela vesicato'ria*, *Blistering Tissue*, &c., and other forms of which are the *Taffetas vésicant* ou *épispastique*, *Papier épispastique*, *Charta vesicato'ria*. They are made of an ethereal or alcoholic extract of cantharides, or of cantharidin, mixed with wax, and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents.

SPARADRAPUM VIRIDE, *Corn Plaster*. This may be made of yellow wax, \mathfrak{b} ij; Burgundy pitch, \mathfrak{z} xij; common turpentine, \mathfrak{z} vj; verdigris, \mathfrak{z} ij; spread on cloth and polished.

Kennedy's Corn Plaster is made of yellow wax, \mathfrak{b} ij; Venice turpentine, \mathfrak{z} ij; verdigris, \mathfrak{z} j.

SPARADRAPUS, Sparadrapum.

SPARAGMA, Laceration.

SPARAGMOS, Spasm.

SPARAGUS, Asparagus.

SPARALTIUM, *Clyster uteri'nis*. An injection into the vagina. — Ruland and Johnson.

SPAREDIA. A ligature covered with the white of egg. — Paracelsus.

SPARGANIUM RAMOSUM, *Great Burreed*, from *Sparganon*, owing to the ribbon-like leaves. Indigenous; Order, Typhaceæ; flowering in July and August. The roots are subastringent, but esulent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammæ.

SPARGANON, *Sparganum*, from *σπαρω*, 'I swathe,' 'I wrap,' 'Swathing clothes;' a kind of bandage, with which children were formerly surrounded. — Foësius. Also, a fasciæ.

SPARGANOSIS, *Spargo'sis*, *Intumescen'tia lactea mamma'rum Mastodyn'ia polyg'ala*, from *σπαρωω*, 'I am ready to burst.' Extreme distension of the breasts by milk. Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PUERPERARUM, *Phlegmatia dolens*.

SPARGANUM, Sparganon.

SPARROWGRASS, Asparagus.

SPARSUS, Sporadic.

SPARTIUM JUN'CEUM, *Spanish broom*. Ord. Leguminosæ. A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy — 10 or 15 grains three times a day.

SPARTIUM SCOPA'RIUM, *Cyt'isus scopari'us*, *Genista*, (F. *scopari'ia* seu *hirsuta*, *Cytisogenista*, *Broom*, (G. *Genêt à balai*). *Broom Tops*, *Spartii Cacumina*, *Scopari'us*, (Ph. U. S.,) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, \mathfrak{d} j to \mathfrak{z} j. All the genistæ have similar virtues. A decoction of genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPARTIUM TINCTORIUM, *Genista tinctoria*.

SPASM, *Spasmus*, *Sparagmos*, *Syno'cè*, *Spado*, from *σπαω*, 'I draw.' The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions; and these, again, have been divided into tonic spasm, *Paraton'ia*, which consists in permanent rigidity and immobility of the muscles that are the seat of it (see Tetanus); and clonic spasm,

which consists in alternate contractions and relaxations (see Convulsion).

Cullen has a class, *Spasmi*—the *neurospasmi* of Fuchs.

SPASM, CLONIC, Convulsion—s. Cynic, see Canine laugh.

SPASM OF THE GLOTTIS, Asthma thymicum.

SPASM, HISTORIC, OF THE FACE, see Tic.

SPASM OF THE LARYNX, Asthma thymicum.

SPASM, MASTICATORY, OF THE FACE, Trismus.

SPASM WITH RIGIDITY, Tetanus.

SPASM, WRITERS'. Involuntary spasms of the muscles of the thumb and index finger, observed, at times, in those who are much accustomed to writing. See Cramp, writers'.

SPASMATICUS, Spasmodicus.

SPASMATODES, Spasmodicus.

SPASME DE LA GLOTTE ET DU THORAX, Asthma thymicum—s. de la Vessie, Cysto-spasmus.

SPASMI, see Spasm.

SPASMODES, Convulsive.

SPASMODIC, Spasmodicus.

SPASMOL'OGY, *Spasmologia*, from *σπασμος*, 'spasm,' and *λογος*, 'a treatise.' A treatise on spasms.

SPASMOLYGMUS, Singultus.

SPASMOT'ICUS, *Spasmat'icus*, *Spasmat'odes*, *Spas'ticus*, *Spastic*, *Spasmod'ic*, (F.) *Spasmodique*, *Spastique*, from *σπασμος*, 'spasm.' Anything relating to spasm. Also, an antispasmodic.

Morbi contractiv'is, *M. spasmod'ici*, &c., are diseases accompanied with spasm.

SPASMUS, Convulsion, Spasm—s. Aurium, Otalgia—s. Bronchialis, Asthma—s. Caninus, see Canine laugh—s. Clonicus, Convulsion—s. Cynicus, see Canine laugh—s. Facialis, Tic—s. Glottidis, Asthma thymicum—s. Linguae, Glossospasmus—s. Maxillae inferioris, Trismus—s. Muscularis, Cramp—s. Musculorum Faciei, Canine laugh—s. Nutans, Convulsion, salaam—s. Periphericus, Horrida cutis—s. Universalis, Synclonus—s. Ventriculi, see Cardialgia—s. Vesicae, Cysto-spasmus.

SPASNTIA, same etymon as Spasm. [?] A term used by Mercurialis to designate the lancinating pain produced, at times, in the chest by violent fits of coughing.

SPASTIC, Spasmodicus, Tonic spasm.

SPASTICUM, Tetanic.

SPATHA, Hypaleipton.

SPATHES'TER, from *σπαω*, 'I draw.' A surgical instrument, used for drawing the prepuce over the glans, when too short.—P. Amman.

SPATHOMELE, Spatula.

SPATHULA, Scapula, Spatula—s. Foetida, Iris foetidissima.

SPATHYEMA FOETIDA, Dracontium foetidum.

SPATIA INTERLOBULARES, Interlobular fissures.

SPATILĒ, *σπατιλη*, 'human excrement.' A liquid fecal evacuation. Excrement.—Hippocrates.

SPATIUM ORIS, Mouth—s. Trigonum, Lyra.

SPATTERDOCK, Nuphar advena.

SPATULA, *Spath'ula*, diminutive of *Spatha*, *σπαθη*, 'a broad-sword.' *Spathome'le*, *Spicill'um litum*. An instrument used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

SPATULA PRO ORIS, Glossospatha.

SPAUD, Humerus.

SPAUL, Saliva.

SPAUT BONE, Humerus.

SPAW-BONE, Humerus.

SPAYING, see Castration.

SPEAKING-BRASH, Brash, weaning.

SPEARWORT, Ranunculus flammula.

SPEAUTER, Zinc.

SPECIAL, see Specific.

SPEC'IALIST, (F.) *Spécialiste*. One who devotes himself to a specialty; as to diseases of particular parts, as of the eye, ear, chest, &c.

SPECIES, (F.) *Espèces*, *Spécialités*, *Thés composés*. Official mixtures of substances cut or bruised. Sometimes used for compound powders, as it always appears to have been formerly. See Pulvis.

SPECIES AROMATICÆ, Pulvis cinnamomi compositus—s. Diacinnamomi, Pulvis cinnamomi compositus—s. Diacretæ, Pulvis cretæ compos.—s. Diagalapæ, Pulvis jalapæ compositus—s. Diambræ sine odoratis, Pulvis cinnamomi compositus—s. Diatrageanthæ frigide, Pulvis tragacanthæ compositus—s. Hieræ pieræ, Pulvis aloes cum canellâ—s. Lactificantes Rhazis, Pulvis cinnamomi compositus—s. e Scordio cum opio, Pulvis cretæ compositus cum opio—s. e Scordio sine opio, Pulvis cretæ compositus.

SPECIF'IC, *Spécificus*, *Nosocrat'ic*, (F.) *Spécifique*, from *species*, 'a form or fashion,' and *facere*, 'to make.' A substance to which is attributed the special property of removing some particular disease. Probably no such remedy exists. Mercury in syphilis, and sulphur in the itch, have been regarded as the strongest examples. The word is also used adjectively in the sense of *special*; as "mercury has a *specific* or *special* action on the salivary glands."

SPECIFIC OF HERRENSCHWAND. A once celebrated German vermifuge. It is said to have consisted of 10 grains of Gamboge, with 20 of Carbouate of Potassu. It is affirmed, that mercury and arsenic have also been found in it.—Paris.

SPECIFICUM PARACELSI, Potassæ sulphas.

SPECIL'LUM, *Melè*, *Stylus*, *Explorator'ium*, from *specio*, 'I examine,' *Spécl'ion*, a probe, (F.) *Styilet*, *Soude*. A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

SPECILLUM, Evericulum, Hypaleipton, Sond—s. Auricularium, Apyromcle—s. Cereum, *Bougie*—s. Excavatum, Stylus excavatus—s. Latum, Spatula—s. Minus, Melotis.

SPÉCIOLÉ, Species.

SPECKS OF THE CORNEA, see Caligo.

SPECLARION, Specillum.

SPECTACLES, from *spectare*, 'to behold;' *Couspicill'ia*, (Sc.) *Breela*, (F.) *Besicles*, *Lunettes ordinaires*, *Cousseres*. Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *convex* or *concave*, according as the sight is more or less short, (*myopic*.) or long, (*presbyopic*.) When the glass is adapted to one eye, it is called an *Eye-glass*, *Couspicill'ium*, *Perspicill'ium*, *Vitrum ocular'è*.

SPECULA'RIS LAPIS. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.—Pliny.

SPECULUM, *Catop'ter*, *Catop'trou*, *Diop'trou*. In Latin, 'a mirror;' from *specio*, 'I see.' In surgery, it means different instruments for dilating cavities, and facilitating their examination. See Dilator. There are various instruments of this kind,—the *S. Ani*, *S. Auris*, *S. Vaginae*, (*Colpeny'uter*, *Elytreny'uter*.) *S. Matr'icis*, *S. Oruli*, *S. Oris* ((F.) *Bâillon*.) *S. Gutturis*, *S. Vesicæ*.

SPECULUM CITRINUM, Orpiment—s. Indicum, Ferri limatura—s. Lucidum, Septum lucidum—s.

Oris, Glossocatochus—s. Veneris, Achillea millefolium.

SPECUS, Vulva—s. Cordis, Ventricle of the Heart—s. Pro medallâ spinali, see Vertebral column—s. Vertebralis, see Vertebral column.

SPEDALSKE, see Radzyge.

SPEDALSKHED, see Radzyge.

SPEECH, Voice, articulated.

SPEECHLESSNESS, Mutitas.

SPEEDIMAN'S PILLS, see Pilulæ aloes et myrrhæ.

SPEEDWELL, BROOKLIME, Veronica becabunga—s. Female, Antirrhinum elatine—s. Official, Veronica—s. Purslain, Veronica peregrina—s. Water, Veronica becabunga.

SPELL-BONE, Fibula.

SPELTRUM, Zincum.

SPERAGE, Asparagus.

SPERAGUS, Asparagus.

SPERMA, σπέρμα, σπερματος, from σπειρω, 'I sow.' *Spermatic fluid or liquor, Seminal fluid, Seed, Semen, S. viri'lè seu masculi'nium seu genita'lè, Semini'um, Genita'lè, Medull'æ, Ros, Sanguis, Serum, Humor genita'tis seu semina'tis seu ven'e'rens, Uri'na genita'tis, Genita'ra, Sperma, S. viri'lè, Sperm'i'um, Tho'rè, Tho'rus, Lac maris, Lagne'a, Lagni'a, Lagnen'na, Germen, Vita'lè virus, Male's milk, Prop'agatory or genital liquor, Vital or quickening venom, (F.) Semence, Fluide séminal.* A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Ara sem'inis, Gonad'ra*, is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and transparent, which is considered to be the secretion of the prostate,—the other, white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations show that it contains *spermatozo'a*, or more properly *spermatozo'id's*; for their animalcular nature is not demonstrated. They are produced in cells—*sperm-cells*—and have probably no more title to be considered animalcular, than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *semial granules, gran'ula sem'inis*. Pure sperm, in its most perfect state, consists principally of spermatozoids and seminal granules; both of which are enveloped in a small quantity of fluid, *liquor sem'inis, spermatic liquor*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm—*Semen mulie'brè, Thelygonum*. The increased secretion that places is chiefly from the glands of Duverney.

Sperm also means spermaceti.

Sperm CELL, see Sperm.

SPERMA, Sperm—s. Mercurii, Hydrargyrus acetatus.

SPERMA RANA'RUM, *Sperni'ola* seu *Sperni'olum* seu *Sperni'ola* seu *Sperni'olum rana'rum*. Frog's spawn. Once used in medicine.

SPERMACETI, Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, Spermatorrhœa.

SPERMATACRASIA, Spermatorrhœa.

SPERMATACRATIA, Spermatorrhœa.

SPERMATIC, *Spermat'icus, Semina'tis, Sem'inul, (F.) Spermatique*, from σπέρμα, σπερματος. That which relates to the sperm. A name given to different parts connected with the organs of generation.

SPERMATIC ARTERIES, *Arteriæ Spermaticæ* seu *præparantes, (F.) Artères testiculaires, A. de l'ovaire* (Cb.), are two in number—one on each side—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic cord, and divides into fasciculi of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery, *ov'rian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

SPERMATIC CORD, or CHORD, *Testicular Cord, Funic'ulus Spermaticus, Corpus varico'sum, (F.) Cordon spermatique ou testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibro-cellular cord, which unites the peritonæum to the upper part of the tunica vaginalis, and in which encysted hydroecle of the spermatic cord occurs. All these parts are united together by a very lax, areolar tissue, and surrounded by coats, which, reckoning from without, are:—1. The skin and areolar membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the cord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic cord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other:—the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

SPERMATIC FILAMENTS, Spermatozoa—s. Fluid, Sperm.

SPERMATIC GANGLION. A large ganglion, formed by branches from the hypogastric ganglion, and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robt. Lee describes *res'ical* and *vag'inial ganglia*, and anterior and posterior *subperitone'al ganglia* and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

SPERMATIC LIQUOR, Liquor seminis, see Sperm.

SPERMATIC PASSAGES or WAYS, *Via Spermaticæ*, are the canals concerned in the excretion of semen. See Testicle.

SPERMATIC PLEXUSES of nerves, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ov'rian nerves*. They

cannot be traced into the substance of these organs.

SPERMATIC VEINS are two or three in number on each side. They accompany the spermatic artery, and open — those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscles, called the *Caverna spermiforme*.

SPERMATIN, see Sperm.

SPERMATIS'MUS, *Emis'sio seminis*, from *σπέρμα*, *σπέρματος*, 'sperm,' The emission of sperm. *Spermaticism* or *Animalism* is the doctrine, which maintains that the embryo is produced by the, so called, spermatic animalcules.

SPERMATIST, *Animaleulist*.

SPERMATOCOC'CI, *Spermatozoa*.

SPERMATOCE'LE, *Hernia seminaria scroti*, *Ouchro'e'le seminaria*, *Gonoc'e'le*, from *σπέρμα*, *σπέρματος*, 'sperm,' and *κηλη*, 'a tumour.' The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, *varicocele*.

SPERMATOCLE'MMA, see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDORRHAG'IA, *Cystorrhag'ia ejaculatoria*, *Hæmat'ria ejaculatoria* seu *seminaria*, from *σπέρμα*, *σπέρματος*, 'sperm,' and *κυστις*, 'bladder,' and *ραγη*, 'a breaking forth.' A discharge of blood from the urethra, or the act of ejaculation of sperm.

SPERMATODES, *Gonoides*.

SPERMATOGON'IA, *Spermogon'ia*, *Spermator'ia*, *Spermator'ia*, *Spermator'ia*, from *σπέρμα*, *σπέρματος*, 'sperm,' and *γεννω*, 'to beget.' The preparation or secretion of sperm.

SPERMATOID, *Gonoides*.

SPERMATOLEPSIS, see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatalog'ia*, from *σπέρμα*, *σπέρματος*, 'sperm,' and *λογος*, 'a discourse.' A treatise on sperm.

SPERMATOPI'OROUS, *Seminif'erous*, from *σπέρμα*, *σπέρματος*, 'sperm,' and *φέρω*, 'I carry.' Sperm-bearing. The cells or granules in the sperm have been so called.

SPERMATOPE'IA, *Spermato'gia*.

SPERMATOPOESIS, *Spermato'gia*.

SPERMATOP'OE'ITIC, *Spermato'pous*.

SPERMATOPE'US, *Spermato'pous*, *Spermato'pous*, *Gonero'pous*, *Gonero'pous*, *Gonero'pous*, from *σπέρμα*, *σπέρματος*, 'sperm,' and *ποιεω*, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRH'EA, *Spermorrh'ea*, *Spermator'ia*, *Spermator'ia*, *Spermator'ia*, *Gonoc'ra'ia*, *Gonoc'ra'ia*, *Gonoc'ra'ia*, *Spermator'ia*, *Gonorrh'ea vera*, (F.) *Flux de Sperme*, *Pollutions*, *Pertes seminales*; from *σπέρμα*, *σπέρματος*, 'sperm,' and *ρηνω*, 'I flow.' An emission of sperm, without copulation. See *Gonorrh'ea*, and *Pollution*.

SPERMATORRH'EA ATONICA, *Gonorrh'ea lixor'um*.

SPERMATOS'CHESIS, from *σπέρμα*, *σπέρματος*, 'sperm,' and *σχησις*, 'retention.' Retention or suppression of the spermatic secretion.

SPERMATOZEMIA, *Spermatorrh'ea*.

SPERMATOZO'A, *Zoosper'mata*, from *σπέρμα*, *σπέρματος*, 'sperm,' and *ζωον*, 'animal.' *Animalcula seminaria* seu *spermatica*, *Fila spermatica*, *Corpuscula seminis*, *spermato'ci*, *Ver-*

miculi spermatici, *Spermatozo'idis*, *Sem'inul* or *spermatic filaments*, *Spermatic* or *seminal animalcules* [?], (F.) *Zoospermes*, *Spermatozoïtes*. Reputed animalcules seen in the sperm; by most physiologists supposed to be the formative agents in generation. See Sperm.

SPERMATOZOAIRES, *Spermatozoa*.

SPERMATOZOIDS, *Spermatozoa*.

SPERMIO'LUM RANARUM, *Sperma ranarum*.

SPERMIIUM, *Sperm*, *Spermato'gia*.

SPERMOBOLE, see Ejaculation, *Spermatis-mus*.

SPERMOEDIA CLAVUS, *Ergot*.

SPERMOGONIA, *Spermato'gia*.

SPERMORRH'EA, *Spermatorrh'ea*.

SPERMIO'LUM RANARUM, *Sperma ranarum*.

SPEWING, *Vomiting*.

SPHAC'ELATED, *Sphacelatus*, (F.) *Sphacellé*. Struck with sphacelias.

SPHACELATION, *Mortification*.

SPHAC'ÈLE, *Sphacelus* — *s. de la Bouche*, *Cancer aquaticus*.

SPHACELIA SEGETUM, see *Ergot*.

SPHACELISMUS, *Sphacelus* — *s. Cerebri*, *Phrenitis*.

SPHAC'ELUS, *σφακελος*, *Gangræna Sphacelus*, *Sphacelismus*, *Cold mortification*, (F.) *Sphacèle*, *Gangrène froide*, from *σφαζω*, 'I slay.' This word is used, by some, synonymously with *gangrene*: by others, with *gangrene* when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecrosis*, which must be thrown off, — or is, in other words, totally dead. The foul disorganized portion of an ulcer — called the *slough* — must be considered a kind of sphacelus.

Sphacelus was formerly used to denote excessive pain; and for agitation from excessive pain, or violent emotion.

SPHACELUS CEREALIS, *Ergotism* — *s. Nosocomialis*, *Hospital gangrene*.

SPH'ERA, *Pila* — *s. Marina*, *Pila marina* — *s. Thalassia*, *Pila marina*.

SPH'ERANTHIUS INDICUS, *Adaca*.

SPH'ERIA SINENSIS, (*σφαίρα*, 'a globe,') *Hia Tsao Tom Tchom*, *Hia Tsao Tong Tchong*, *Toku Kaso*, *Summer plant winter worm*. A fungus which projects from the neck of a lepidopterous insect. It is highly esteemed by the Chinese as a tonic, like ginseng.

SPH'ERIDION, *Pilula*

SPH'ERION, *Globule*, *Pilula*.

SPH'EROCEPHALA ELATI'OR, *Echinops*.

SPH'EROCOCCUS CRIS'PUS, *Fucus crispus* — *s. Helminthochortus*, *Corallina Corsicana* — *s. Lichenoides*, *Fucus anlylaceus*.

SPH'ERULA GALE'NI, *Pilula*.

SPH'ERULE SANG'VINI, *Globules of the blood*.

SPHAGE, *Throat*.

SPHENDONE, *Funda*.

SPHENOID, in the composition of anatomical terms, usually means, belonging or relating to the sphenoid bone.

SPHENOCEPHAL'IA, from *σφην*, 'a wedge,' and *κεφαλη*, 'head.' *Monstrosity*, in which the head is wedge shaped, owing to the projection of the anterior fontanel region.

SPHÉNO-ÉPINEUSE, (*Artère*), *Meningeal artery*, middle.

SPHENOID, *Sphenoides*, *Sphenoides*, *Sphenoides*, *Sphenoidalis*, (F.) *Sphénoïde*, from *σφην*, 'a wedge,' and *ειδος*, 'resemblance.' *Wedge-shaped*. Hence,

SPHENOID BONE, *Sphenoides os*, *Os basilar'æ seu cuneifor'mè seu cuneo comparatum seu sphenoides*.

noida'le seu multiforme seu azygos seu papilla-rè seu polymorphon seu parilla'rè seu basilla'rè seu alæformè seu sphenoidæum seu vespiformè seu inconjugatum seu pterygoideum seu alatum seu colatòrii, Pterygoid bone. An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An inferior or guttural surface, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina — ovale, spinale, &c. 2. A superior or cerebral surface, on which are: — the clinoid processes; the pituitary fossa; the foramina (ovale, rotundum, and spinale); the Apophysis of Ingrassias or lesser wing; the foramen opticum, &c. 3. An occipital or posterior surface, which is articulated with the basilar process of the occipital bone. 4. An anterior or orbital nasal surface; having, anteriorly, a crista to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses*. 5. Two zygomatico-temporal or external surfaces, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion*; and *alæ*, which are four in number, and are subdivided into *great* (Temporal Plates or Wings, *Alæ magnæ*) and *little* (Apophyses of Ingrassias, *Alæ minores*, *Processus ensiformes*).

The *Sphenoid suture* surrounds the bone.

SPHENOID, SPINOUS PROCESS OF THE, Sphenoid spine.

SPHENOID'AL, *Sphenoidalis*. That which belongs or relates to the sphenoid bone.

SPHENOIDAL COR'NUA, *Cor'na Sphenoidalia*, (F.) *Cornets sphénoïdaux ou de Bertin*, *Osselets de Bertin*, *Ossicula Bertini*, *Ossa triangulæria*, *Pyr'amids of Wistar*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

SPHENOIDAL OR SUPERIOR ORBITARY FISSURE, *Fora'men lac'erum superius*, (F.) *Fente sphénoïdale*, is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit between which and the cranium it is a means of communication, and transmits the third, fourth, and sixth pair of nerves, and the first branch of the fifth pair, to the eye and its appendages.

SPHENOIDAL SPINE, *Spina seu Crista sphenoidalis*, (F.) *Épine sphénoïdale*, *Spinous Process of the Sphenoid*; — 1. A projecting crista at the inferior surface of the sphenoid-bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *stylloid process* is frequently met with.

SPHENOIDES, Cuneiform, Sphenoid — s. Os, Sphenoid bone.

SPHENOMAX'ILLARY, *Spheno-maxilla'ris*. That which relates to the sphenoid and maxillary bones.

SPHENOMAXILLARY FISSURE, *Inferior orbital Fissure*, (F.) *Fente sphéno-maxillaire ou orbitaire inférieure*; called, also, *Fora'men lac'erum inferius seu spheno-maxilla'rè*, is situate at the

posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbital cavity and the zygomatic fossa.

SPHENOMAXILLARY FOSSA is a name given by some anatomists, to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

SPHENO-OR'BITAR. A name given by Béclard to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENOPAL'ATINE, *Sphenopalati'nus*. That which relates to the sphenoid and palate bones.

SPHENOPALATINE ARTERY, *Large lateral nasal A.*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

SPHENOPALATINE FORA'MEN is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

SPHENOPALATINE GANGLION, *Ganglion of Meckel*, *Sphenoid'al G.* (Ch.) A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphæno-palatium, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal or sphenopalatine filaments, inferior or palatine filaments*, and a *posterior filament*, which is the *Vidian or pterygoid nerve*.

SPHENOPALATINE NERVES, *Lateral nasal nerves*, arise from the ganglion — just described — at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

SPHENOPALATINUS, *Levator palati*.

SPHENOPARI'ETAL, *Spheno-parieta'lis*. That which belongs or relates to the sphenoid and parietal bones.

SPHENOPARIETAL SUTURE is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, *Circumflexus* — s. *Salpingostaphylinus*, *Circumflexus* — s. *Salpingo-mollis*, *Laxator tympani*.

SPHENOSIS, *see Wedged*.

SPHENOSTAPHYLINUS, *Levator palati*.

SPHENOTEMP'ORAL, *Spheno-tempora'lis*. That which belongs to the sphenoid and temporal bones.

SPHENOTEMPORAL SUTURE is the suture at the articulation of the great alæ of the sphenoid bone with the squamous portion of the temporal. Béclard gives the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHEX, *Wasp*.

SPHINCTER, σφιγκτηρ, *Constrictor*, *Musculus constrictorius*, from σφιγγω, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

SPHINCTER ANI, *Annula'ris Ani*. Many anatomists have described two sphincter muscles of the anus: — 1. The *S. externus seu cutaneus*, *As-*

pidis'cos, *Coccygio-entant-sphincter*, *Orbicula'ris Recti*, *Constrictor Ani*, *Coccygio-anal*, (Ch.) It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric ares, which are attached, behind, to the extremity of the coccyx, by a dense, areolar substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversi perinei muscles. This muscle contracts and closes the anus. 2. The *inner or internal Sphincter Ani*, *Sphincter intestini'lis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

SPHINCTER GULÆ, *Constrictores pharyngis* — s. *Ilei*, *Basilii*, valve of — s. *Intestinalis*, *Sphincter ani internus* — s. *Laborum*, *Orbicularis oris* — s. *Oculi*, *Orbicularis palpebrarum* — s. *Palpebrarum*, *Orbicularis palpebrarum* — s. *Pylori*, see *Pylorus* — s. *Vaginae*, *Constrictores cunni* — s. *Ventriculi*, *Pylorus*.

SPHINCTER VESICÆ, *Sphincter of the bladder*. Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name **PSEUDO-SPHINCTER** to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See *Compressor urethræ*.

SPHONDYLIIUM, *Heracleum spondylium*.

SPHONGUS, *Fungus*, *Spongia*.

SPHRAGIDONYPHARGOCOME'ITA, from *σφραγίς*, 'a seal,' *οὐλὴ*, *οὐυχός*, 'a nail,' *αργός*, 'white,' or perhaps *αργυρός*, 'silver,' and *κομῆς*, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings.—Aristophanes, *Hippocrates*.

SPHYGMA, *Pulse*.

SPHYGMIC, *Sphygmicus*, (F.) *Sphygmique*, from *σφυγμός*, 'pulse.' Relating to the pulse: — pulsatory.

SPHYGMIC ART, *Ars Sphygmica*. The art of judging by the pulse, in health or disease.

SPHYGMICA DOCTRINA, *Sphygmologia*.

SPHYGMICUS, *Throbbing*.

SPHYGMOCEPHALUS, *Crotaphe*.

SPHYGMODES, *Throbbing*.

SPHYGMOLEGIUM, *Pulsilegium*.

SPHYGMOGRAPHI; from *σφυγμός*, 'the pulse,' and *γραφῶς*, 'I describe.' An instrument which, when applied over an artery, indicates the character of the pulse as to force and extent of undulations.—Vierordt.

SPHYGMOLOG'IA, *Sphygmology*, *Sphygmica Doctrina*, *Ars Sphygmica*, from *σφυγμός*, 'the pulse,' and *λόγος*, 'a description.' The doctrine of the pulse.

SPHYGMOMETER, *Pulsilegium*.

SPHYGMOS, *Pulsation*, *Pulse*.

SPHYGMOSCOPIUM, *Pulsilegium*.

SPHYRA, *Malleolus*.

SPHYXIS, *Pulsation*.

SPICÆ, *Lavandula Spica*.

SPICA, *Fuscia repens*, *Spica bandage*, (F.) *Épi*. A bandage so called in consequence of its somewhat resembling a spike of barley. The turns of the bandage cross like the letter V; — each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body, and in a different manner in each case: thus, there is the *Spica seu Fuscia inguinalis*, *Spica inguinalis duplex*, the spica for the shoulder, and another for the thumb.

SPICA, *Lavandula Spica* — s. *Alpina*, *Valeriana*

Celtica — s. *Celtica*, *Valeriana Celtica* — s. *Indica*, *Nardus Indica* — s. *Nardi*, *Nardus Indica*.

SPICEBERRY, *Gaultheria*, *Laurus Beuzoin*.

SPICEBUSH, *Laurus Benzoin*.

SPICES, **FOUR**, see *Myrtus pimenta*.

SPICEWOOD, *Laurus Benzoin*.

SPICILLUM, *Spicillum*.

SPIDER, see *Aranæ tela*.

SPIDERWORT, *Liliago*, *Tradescantia Virginica*.

SPIGELIA, *S. Marilandica*.

SPIGELIA ANTHELMIA, *Demarea'ra Pinkroot*, a native of South America and the West India Islands, has properties like the

SPIGELIA MARILAN'DICA, *S. Lonic'era*, *Anthelmia*, *Lonic'ern Marilandica*, *Perennial Wormgrass* or *Indian Pink*, *Carolina Pink*, *Starbloom*, *Wormroot*, *Not. Ord. Gentianaceæ*. *Class. Pentandria. Order. Monogynia*. Indigenous. The root — *Spigelia* (Ph. U. S.) *Pinkroot* — is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. Dose, gr. x to ʒss.

SPIGNEL, *Æthusa meum*.

SPIKENEED, *Conyza squarrosa*, *Nardus Indica* — s. *American*, *Aralia racemosa* — s. *False Smalacina racemosa* — s. *Small*, *Aralia nudicaulis* — s. *Tree*, *Aralia spinosa*.

SPILANTHES ACMELLA, *Spilanthes acmella*.

SPILAN'THUS ACMEL'LA, *S. ciliata* seu *fimbriata*, *Spilanthes acmella*, from *σπίλος*, 'a spot,' and *αἶθος*, 'a flower,' owing to its dotted or speckled flower, *Bidens acmella*, *Achmella*, *Ac-mella*, *A. Maritima*, *Verbesi'na acmella*, *Balm-leaved Spilanthes*. *Ord. Compositæ. Sex. Syst. Syngenesia Polygamia æqualis*. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

SPILAN'THUS BALM-LEAVED, *Spilanthes acmella* — s. *Ciliata*, *S. acmella* — s. *Fimbriata*, *S. acmella*.

SPILAN'THUS OLERA'CEUS, *Spear-leaved Spilanthes*, (F.) *Cresson de Para*. A tincture of the plant has been recommended in toothach.

SPILL, see *Nævus*.

SPILOMA, see *Nævus*.

SPILLOSIS, *Ephichrosis* — s. *Ephelis*, *Ephelides* — s. *Poliosis*, *Poliosis*.

SPILSBURY'S ANTISCORBUTIC DROPS. An empirical preparation, formed of *hydrarg. oxymer.*, *rad. gentian.*, *cort. aurunt.* sicc. āā ʒij; *antimon. crud.*, *santal. rubr.* āā ʒi; *spiritus vini rectific.* aquæ, āā ʒviij.

SPINA, 'a thorn;' *Spine*, (F.) *Épine*. A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are: — the *nasal spine*, the *spine of the scapula*, the *spine of the ischium*, the *four iliac spines*, the *pubic spine*, the *maxillary*, the *sphenoid*, &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column*.

SPINA, *Penis* — s. *Acida*, *Oxyacantha Galeni* — s. *Ægyptinea*, see *Acanthia gummi* — s. *Alba*, *Carduus marianus*, *Mespilus oxyacantha*, *Onopordium acanthium* — s. *Bifida*, *Hydrorachis* — s. *Cervina*, *Rhamnus* — s. *Domestica*, *Rhamnus* — s. *Dorsi*, *Vertebral column*, see *Nasus* — s. *Dorsi introrsum Flexa*, *Lordosis* — s. *Ferrea*, *Pin* — s. *Helmontii*, *Agnillon* — s. *Hirci*, *Astragalus verus* — s. *Infectoria*, *Rhamnus* — s. *Nodosa*, *Ruchitis* — s. *Sphenoidalis*, *Sphenoidal spine*.

SPINA VENTOSA, *Spinæ ventositas*, *Tere'do*,

Ostiarthroacæ, *Fungus* seu *Tumor fungosus articuli*, *Lupia junctura*, *Hyperspongia*, *Flatus spinæ*, *Arthroacæ*, *Pædarthroacæ*, *Sideratio Ossis*, *Cancer* seu *Gangræna Ossis*, *Exostosis*, *White Swelling* (of some). A term of no definite meaning, as is obvious from these various words having been considered its synonymes. By some, it is defined to be—a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is considered to be a tumour arising from an internal cavity of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, *Hydrarthrus*, and *Mollities Ossium*.

SPINA VERTEBRALIS, Vertebral column.

SPINACH, Spinacia.

SPINACHIA, Spinacia.

SPINA'CIA, *Spina'chia*, *Spina'cia olera'cea*, *Spinage*, *Spinach*, (F.) *Épinard*. Ord. Chenopodiaceæ. *Sex. Syst.* Diœcia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

SPINACIA OLERACEA, Spinacia.

SPINÆ, Spinous processes—s. *Ventositas*, *Spina ventosa*.

SPINAGE, Spinacia.

SPINAL, *Spina'lis*, *Spino'sus*, *Spina'tus*, *Rachid'ian*, (F.) *Épinière*. *Rachidien*, from *spina*, 'the spine.' That which relates to the vertebral column.

SPINAL ARTERIES, *Arteriæ spinales*, are two in number, viz: 1. The posterior spinal, *Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The anterior spinal artery, *A. médiane antérieure*, (Ch.) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum oecipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal Arteries* or *Rachidian Arteries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

SPINAL CORD, *Medulla spinalis*.

SPINAL FORAM'INA, (F.) *Trous rachidiens*, in the abstract, are the foramina formed by every two contiguous vertebrae, through which the spinal nerves issue. See *Vertebral*. The term *Foramen Spina'te seu spino'sum* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen sphenospino'sum*, (F.) *Trou Sphéno-épineux ou petit rond*, *Trou épineux*.

SPINAL GANGLION, see *Encephalon*.

SPINAL IRRITATION, *Rhachialgi'tis*, *Rhachial'gia*, *Neural'gia spino'lis*, *Notal'gia*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebrae, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however,

by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revealing impression on a very sensible portion of the cutaneous surface.

SPINAL NERVE, *Ac'cessory of the Par vagum* or *8th pair*, *Accessory nerve of Willis*, *Spinal Accessory*, *Superior res'piratory N.*, *Eleventh pair of encephalic nerves*, (F.) *Spino-cranio-trapézien*, *Trachélo-dorsal* (Ch.), arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves, at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoidens, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together—*nervus vagus cum accessorio*—resemble the spinal nerves; the former, with its ganglion, being the posterior root; the latter, the anterior.

SPINAL NERVES, Vertebral nerves—s. *Prolongation*, *Medulla spinalis*.

SPINAL SYSTEM OF NERVES, see *Nerves*.

SPINALES COLLI MINORES, *Interspinales colli*—s. et *Transversales lumborum*, *Transversalis dorsi*.

SPINALIS CERVICIS, *Semi-spinalis colli*—s. *Colli*, *Semi-spinalis colli*.

SPINALIS DORSI, *Spinalis Dorsi major*, (F.) *Grand épineux du dos*. Winslow calls thus some fleshy fasciuli, which are situate on the lateral surfaces of the spinous processes: from the third dorsal vertebra to the first or second lumbar; and which form part of the transverso-spinalis of most authors. The same anatomist calls—*Spina'lis Dorsi minor*, *Petit épineux du dos*—some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transverso-spinalis. All these fleshy fasciuli strengthen the vertebral column.

SPINATI, *Interspinales colli*.

SPINATUS, Spinal.

SPINDLE TREE, *Euonymus Americannus*.

SPINE, Vertebral column—s. *Curvature of the Gibbositas*—s. *Hæmal*, *Sternum*—s. *Neural*, *Spinous process*.

SPINGEL, *Anethum*.

SPINI-AXOIDO-OCCHIPITALIS, *Rectus capitis posticus major*—s. *Axoido-trachéli-atloïdien*, *Obliquus inferior capitis*.

SPINITIS, *Myelitis*.

SPIN'NICK, *Nanus*.

SPINO-DORSITIS, *Myelitis*.

SPINOLA, see *Hydrorachis*.

SPINOSUS, Spinal.

SPINOUS, *Spino'sus*, (F.) *Épineux*, from *spina*, 'a thorn.' Having the shape of a spine or thorn.

SPINOUS PROC'ESSES or APOPH'YSES of the *Vertebrae*, *Acan'thæ*, *Spinæ*, *Cynol'ophoi*, *Neural Spines* of Mr. Owen, (F.) *Apophyses épineuses*, are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See *Vertebra*.

SPINTHEROPIA, *Confusio*.

SPINULA, Pin.

SPIRAC'ULA, (F.) *Spiracules*, from *spiro*, 'I breathe,' 'Breathing-holes.' Respiratory pores of the skin.

SPIRÆ CEREBRI, *Convolutions*, *cerebral*.

SPIRÆA DENUdata, *S. ulmaria*.

SPIRÆA FILIPENDULA, *Filipendula*, *Sariff-raja rubra*, *Dropwort*, (F.) *Filipendula*. Ord. R. *Rasaceæ*. *Sec. Syst. leosandria* Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA LOBATA, *S. Palmata*, *Queen of the Prairie*, *American Meadowsweet*. An oil, resembling oleum gaultheriæ, is obtained from the roots and stems.

SPIRÆA OPULIFOLIA, *Opulus-leaved Spiræa*, *Nine Bark*, has similar properties.

SPIRÆA PALMATA, *S. lobata*.

SPIRÆA TOMENTOSA, *Hardhack*, *Red meadowsweet*, *Steeple bush*, *Rosy bush*, *White leaf*. The root of this indigenous species, *Spiræa* (Pfl. U. S.), which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spirææ* ʒss; aquæ Oj.)

SPIRÆA TRIFOLIATA, *Gillenia trifoliata*.

SPIRÆA ULMARIA, *S. denudata*, *Ulmaria*, *U. palustris*, *Regina Prati*, *Barba capræ*, *Barbula capri-na*, *Meadow Sweet*, *Queen of the Meadows*, (F.) *Ulmair*, *Spirée ulmaire*, *Reine des Prés*, *Vignette*, *Herbe aux Abeilles*. The leaves have been recommended as mild astringents and diuretics—the flowers as antispasmodics and diaphoretics.

SPIRAMENTA PULMONUM, see Pulmo.

SPIRAMENTUM ANIMÆ, Pulmo.

SPIRAMINA PALPEBRARUM, Lacrymal puncta—s. Pulmonum, see Pulmo.

SPIRATIO, Respiration.

SPIRÉE ULMAIRE, *Spiræa ulmaria*.

SPIRIT, *Spir'itus*; from *spirare*, 'to breathe, to exhale' (F.) *Esprit*, *Alcoolat*. A name given to every liquid product of distillation. Spirits were formerly distinguished into—inflammable, acid, and alkaline; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief:

Arrack. Distilled from coarse palm sugar, named *jaggery*, fermented with the bark of the *Mimosa leucophlea*; also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. *Mahwah Arrack*. Made in India from the flowers of the Madhwa tree, *Bassia butyræa*.

2. *Tebu*. Made from palm wine, in the Philippine Islands.

Araka. Distilled, by the Tartars, from koumiss, fermented mares' milk.

Araki. Distilled from dates, by the Egyptians.

Arika. A variety of koumiss, distilled from fermented mares' milk, in Tartary and Iceland.

Brandy. Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Aguardiente*, (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco*, so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour, is made from Muscatel grapes, and is called *Aguardiente de Italia*. It is sometimes seen in the United States.

2. *Lao*. Made from rice, in Siam.

3. *Rakia*. Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rossolis*. Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster*. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekin-kayavodka*. Made from the lees of wine and fruit at Scio.

Geneva, *Hollands*, (*genièvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

Gin. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

Goldwasser. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

Kirschwasser. Distilled from the Malaché cherry, in Switzerland.

Maraschino. Distilled from the Macarska cherry, at Zara, the capital of Dalmatia.

Rum, (supposed to be derived from the terminal syllable of the word *saccharum*: but the aboriginal Americans call this liquor *Rum*.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

Starkaia trava. Made in Kautschatka, from a sweet grass.

Show-choo. Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

Whisky, (supposed to be derived from *usque*, the first two syllables of *usquebaugh*, the original name in Ireland.) Distilled, in Scotland and Ireland, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-cann*, or *wadness* of the head. The best Scotch whisky is *Glenlivet*, the best Irish, *Emmishoven*.

Y-wer-a. Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Affghanistsans, from ewes' milk; and that made in Kautschatka, from a species of mushroom, named *umehner*.

SPIRIT OF AMMONIA, FETID, *Spiritus ammoniæ foetidus*—s. of Ammonia, succinated, *Spiritus ammoniæ succinatus*—s. of Aniseed, *Spiritus anisi*.

SPIRIT, BATHING, FREEMAN'S, see *Linimentum saponis compos.*—s. Bathing, Jackson's, see *Linimentum saponis compos.*—s. Bezoardic of Bassius, see *Bassii spiritus Bezoardicus*—s. Bone, *Liquor volatilis cornu cervi*.

SPIRIT OF BURRHUS, *Burri spiritus matricalis*—s. of Camphor, *Spiritus Camphoræ*—s. of Caraway, *Spiritus carui*—s. of Colechicum, ammoniated, *Spiritus colchici ammoniatus*—s. of Cinnamon, *Spiritus cinnamomi*—s. of Ether, aromatic, *Spiritus ætheris aromaticus*.

SPIRIT, FUMING, OF BEGUIN, *Ammonia sulphuretum*—s. Fuming, of Boyle, *Ammonia sulphuretum*.

SPIRIT OF HARTSHORN, *Liquor volatilis cornu cervi*—s. of Horseradish, compound, *Spiritus armoracæ compositus*—s. of Juniper, compound, *Spiritus juniperi compositus*—s. of Lavender, *Spiritus lavandulæ*—s. of Lavender, compound, *Spiritus lavandulæ compositus*—s. of Minderer's, *Liquor ammoniæ acetatis*—s. of Nitre, sweet, *Spiritus ætheris nitrici*—s. of Nitric ether, *Spiritus ætheris nitrici*—s. of Pennyroyal, *Spiritus pulegii*—s. of Peppermint, *Spiritus menthæ pipéritæ*—s. of Pimento, *Spiritus pimentæ*.

SPIRIT, PROOF, *Spiritus tenuior*—s. Pyroxylic, *Spiritus Pyroxylicus*.

SPIRIT OF ROSEMARY, *Spiritus rosmarini*—s. of Salt, *Muriaticum acidum*—s. of Scurvygrass, golden, see *Spiritus armoracæ compositus*—s. of Spearmint, *Spiritus menthæ viridis*—s. of Sulphuric ether, *Spiritus ætheris sulphurici*—s. of Sulphuric ether, compound, *Spiritus ætheris sulphurici compositus*—s. of Turpentine, *Oleum terebinthinæ rectificatum*.

SPRIT, VERDIGRIS, Aceticum acidum.

SPRIT OF VITRIOL, Sulphuric acid—s. of Wine, Spiritus rectificatus—s. of Wine and camphor, Spiritus camphoræ.

SPRIT, WOOD, Spiritus Pyroxylicus.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUOUS, Alcoholic.

SPIRITUS, Breath, Life, Respiration, Spirit—s. Æthereus nitrosus, Spiritus ætheris nitrici—s. Æthereus vitriolicus, Spiritus ætheris sulphurici.

SPRITUS ÆTHERIS AROMATICUS, *Æther Sulphuricus cum alcohol'e aromaticus, Eliæ'ir vitrioli dulcè, Sweet Eliæ'ir of Vitriol, Vigna's Eliæ'ir of Vitriol, Aromatic Spirit of Æther.* (Cinnamon. cort. contus. ʒij, cardam. sem. contus. ʒiiss, piperis longi fruct. cont., zingib. rad. concis., sing. ʒj, spiritus ætheris sulphuric. Oj. Macerate, for 14 days, in a stopped glass vessel and strain. *Ph. L.*) It is used as a stimulant in nervous affections. Dose, fʒss to fʒj.

SPIRITUS ÆTHERIS COMPOSITUS, Spiritus Ætheris sulphurici compositus—s. Ætheris hydrochlorici, Spiritus Ætheris muriatici.

SPRITUS ÆTHERIS MURIATICI, *Sp. Æ. Hydrochlorici, Sp. Muriatici ætheris, Sp. Salis dulcis, Æther Muriaticus alcoholicus, Spirit of hydrochloric or muriatic ether, Dulcified marine acid.* An old preparation, made by adding one part of muriatic acid to three parts of rectified spirit, and distilling. Its action is like that of the spiritus ætheris nitrici.

SPIRITUS ÆTHERIS NITRICI, *Sp. Ætheris nitrosi seu nitri dulcis seu Æthereus nitrosus, Æther nitricus alcoolisatus, A'cidum Nitri dulcificatum, Sweet Spirit of Nitre, Nitre drops, Spirit of Nitric Ether, (F.) Éther azoteux alcoolisé, Liqueur anodine nitreuse.* (Nitrate of Potassa, in coarse powder, ʒij, Sulphuric acid, ʒiiss; Alcohol, Oixss; Diluted Alcohol, Oj; Carbonate of Potassa, ʒj. Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon.—*Ph. U. S.*) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gtt. xxv to fʒj. Specific gravity, 0.834.

SPIRITUS ÆTHERIS OLEOSUS, Spiritus Ætheris sulphurici compositus, Oleum æthereum.

SPIRITUS ÆTHERIS SULPHURICI, *Æther Sulphuricus cum Alcohol'e, Liqueur Æthereus Sulphuricus, Spiritus Vitrioli dulcis, S. Ætheris vitriolici, Liqueur Sulphuricus alcoolisatus, Spirit of Sulphuric Ether.* (*Æther sulphuric.* Oss; *sp. rect.* Oj. Mix. *Ph. L.*) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, fʒss to fʒij.

SPIRITUS ÆTHERIS SULPHURICI COMPOSITUS, (*Ph. U. S.* 1842), *S. ætheris vitriolici compositus seu Ætheris compositus* (*Ph. U. S.* 1851) seu *Spiritus æthereus oleosus, Liqueur anodynus seu anodynus mineralis Hoffmanni, Compound Spirit of Sulphuric Ether, Hoffmann's Anodyne Liqueur,* (*F.*) *Éther hydrique alcoolisé, Éther sulfurique alcoolisé, Esprit d'Éther sulfurique, Liqueur anodine d'Hoffman.* (*Æther Sulphuric.* Oss; Alcohol, Oj; *Ol. Æther.* fʒij. *Ph. U. S.* *Ph. L.*) Mix. A stimulant and antispasmodic. Specific gravity, 0.816.

SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS, Spiritus ætheris sulphurici comp.

SPIRITUS AMMONIÆ, *Al'kali ammoniacum spirituosum, Al'cohol ammoniatum, Sp. salis ammoniaci, Sp. salis ammoniaci vinosus seu dulcis seu dulcificatus, Ammoniaci alcoholisatus, Liqueur ammoniaci vinosus, L. ammonia spirituosus,*

Lixivium ammoniacalè vinosum, Solutio subcarbonatis ammoniaci spirituosæ, (F.) Esprit d'ammoniaque. (*Ammon. muriat.* in pulv. subtilissim., calcis, aa ʒij; alcohol. fʒxx; aquæ, fʒix. The water is employed to slack the lime; the muriate of ammonia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. *Ph. U. S.*) Stimulant and antispasmodic. Dose, fʒss to fʒj.

SPIRITUS AMMONIÆ AROMATICUS, *Alcohol ammoniatum aromaticum, Spiritus salis volatilis oleosus seu volatilis aromaticus seu ammoniaci compositus, Sal volatile oleosum Sylicii, Tinctura aromatica ammoniata, Liqueur oleosus Sylicii, Lixivium ammoniacalè aromaticum, Aromatic ammoniated Alcohol, Sal volatilis Drops.* (*Ammon. muriat.* ʒv; *Potass. carb.* ʒviij; *cinam. cont., caryophyll. cont.* aa ʒij; *Limon. cort.* ʒiv; alcohol, aquæ aa, Ov. M. Distil Oviijss. Stimulant. Dose, fʒss to fʒj.

SPIRITUS AMMONIÆ COMPOSITUS, Spiritus aromaticus.

SPIRITUS AMMONIÆ FÆTIDUS, *Sp. volatilis fetidus, Al'cohol ammoniatum fetidum, Tinctura asafetida ammoniata, Fetid Spirit of Ammonia, Fit Drops.* (*Ammon. muriat.* ʒx, *Potass. carb.* ʒxvj. *Sp. rectificat., Aquæ* aa ʒij, (*Imp. meas.*) *Asafetida.* ʒv, *Distil.* Oij, (*Imp. meas.*) Macerate for 12 hours, and distil Oiss. *Ph. L.*) Stimulant and antispasmodic. Dose, fʒss to fʒj.

SPIRITUS AMMONIÆ SUCCINATUS, *Sp. Ammoniaci cum Succino, Sp. Salis Ammoniaci lactescens seu lactens, Tinctura ammoniaci composita, Ammoniacum succinatum, Aqua Luccia, Liqueur ex Ammonia et Oleo Succini, L. ex'citans, Succinated Spirit of Ammonia, Common Eau de Luce.* (*Mastic.* ʒij, *sp. rect.* fʒix, *ol. Lavand.* gtt. xiv, *ol. succin.* gtt. iv, *liq. ammon.* fʒx. Macerate the mastic in the alcohol, and pour off the clear tincture: add the rest and shake. *Ph. L.*) Stimulant and antispasmodic. Dose, gtt. x to fʒss, or fʒj.

SPIRITUS ANIMALES, see Nervous fluid.

SPIRITUS ANISI, *Sp. Anisi compositus, Aqua anisi for'tis, A. Sem'inum Anisi composita, Spirit of Aniseed, (F.) Esprit d'anis.* (*Anisi sem. cont.* ʒss, *spirit tenuior.* cong., aquæ quod satis sit ad prohibendum empyreuma. *Ph. L.*) Carminative. Dose, fʒss to fʒss. In the compound spirit, angelica is usually an ingredient.

SPIRITUS ANTHOS, Spiritus rosmarini.

SPIRITUS ARMORACIÆ COMPOSITUS, *Sp. Raphani compositus, Aqua Raphani composita, Compound Spirit of Horseradish, (F.) Esprit de rai-fort composé.* (*Armorac. rad. recent. concis., curant. cort. exsic., sing.* ʒij, *myrist. nuc. contus.* ʒss, *spirit. ten. cong., aquæ* q. s. ad prohibendum empyreuma. *Ph. L.*) Stimulant and antiscorbutic. [?] Dose, fʒj to fʒij.

The Golden Spirit of Scurvy grass—an empirical preparation—is formed by adding gamboge ʒviij, to one gallon of the *sp. armoraciæ compositus*.

Greenough's Tincture for the teeth is formed of amygd. amar. ʒij, *lig. Bresil., cassia bacc.,* aa ʒiv, *irid. Florent.* ʒij, *coccinell., sal. acetosella, alum.* aa ʒj, *sp. vin. rect.* Oij, *sp. armoraciæ comp.* fʒss.

SPIRITUS BEGONIÆ, Ammoniac sulphuretum—s. Bellidus, see Osmintopsis asteriscoides.

SPIRITUS CAMPHORÆ, *Sp. Camphoratus seu vinosus camphoratus, Tinctura Camphoræ* (*Ph. U. S.*), *Spirit of Wine and Camphor, Spirit of Camphor, (F.) Esprit de Camphre, Alcool camphré, Eau de Vie camphrée.* (*Camphor.* ʒiv, alcohol. Oij. Dissolve.) Stimulant, anodyne and discutient. Used only externally.

SPIRITUS CARUI, *Sp. Cari Carni, Aqua Sem-inum Carui fortis seu Seminum Carui, Spirit of Caraway, Strong Carui Waters*, (F.) *Esprit de Carui*. (Carui sem. cont. ℥iiss, *Sp. tenuior*, cong., aquæ q. s. Distil a gallon. Ph. L.) Caruinative. Dose, ℥j to ℥jss.

SPIRITUS CINNAMOMI, *Sp. Lauri Cinnamomi, Aqua Cinnamomi fortis seu Cinnam. spirituosæ, Spirit of Cinamon, Strong Cinnamon Water*, (F.) *Esprit de Cannelle*. (Cort. cinnum. ℥v, sp. rect. Oivss.) Stimulant and carminative. Dose, ℥j to ℥jss.

SPIRITUS COLCHICI AMMONIATVS, *Tinctura Colchici Compouita, Ammoniated Spirit of Colchicum, Compound Tincture of Colchicum*. (Sem. colchic. cont. ℥ij, sp. ammon. aromat. Oj. Ph. L.) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from grt. xxx to ℥j.

SPIRITUS CORNU CERVI, *Liquor volatilis C.C.—s. Fortior, see Alcohol—s. Fumans Beguini, Ammonie sulphuretum—s. Genitalis, Aura seminis—s. Jauaicensis, Rum.*

SPIRITUS JUNIPERI COMPOSITVS, *Aqua Juniperi composita, Compound Spirit of Juniper*, (F.) *Esprit de genièvre composé*. (Ol. junip. ℥is, Ol. carni, Ol. fenicul. āā ℥x; Alcohol dilut. cong. Solve. Ph. U. S.) Stimulant and diuretic. Dose, ℥j to ℥jss.

SPIRITUS LAURI CINNAMOMI, *Spiritus einnamomi.*

SPIRITUS LAVANDULÆ, *Sp. Lavandulæ spicæ seu Lavand. simplex, Lavender Water*, (F.) *Esprit de Lavande*. (Lavand. recent. ℔ij. Alcohol. cong., aquæ Oij. Distil a gallon. Ph. U. S.) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

SPIRITUS LAVANDULÆ COMPOSITVS, *Tinctura Lavandulæ composita, Red Hartsbarn, Lavender drops, Compound Spirit of Lavender*, (F.) *Esprit de Lavande composé*. (Sp. Lavand. Oijj., sp. rosamarin. Oj, cinnam. contus. ℥j, myristic. cont. ℥ss, caryophyll. cont. ℥ij, santali concis. ℥ij. Mace-rate for 14 days, and filter through paper. Ph. U. S.) Stimulant. Dose, grt. xl to ℥ij.

SPIRITUS LETHALIS, *Carbonic acid—s. Lumbricorum, Liquor volatilis cornu cervi.*

SPIRITUS MENTHÆ PIPERITÆ, *Sp. Menthæ piperitidis, Aqua Menthæ piperitidis spirituosæ, Spirit of Peppermint*, (F.) *Esprit de Menthe poivrée*. (Olei. menth. pip. ℥vjss, sp. rectif. Oivss, aquæ. q. s. Distil a gallon. Ph. L.) Carminative and stimulant. Dose, ℥jss to ℥ij.

SPIRITUS MENTHÆ SATIVÆ, *Spiritus menthæ viridis.*

SPIRITUS MENTHÆ VIRIDIS, *Spiritus menthæ sativæ, Aqua Menthæ vulgaris spirituosæ, Spirit of Spearmint*, (F.) *Esprit de Menthe vert*. (Olei Menth. virid. ℥vjss, sp. rectif. Oivss, aq. q. s. Distil a gallon. Ph. L.) Like the last in properties and dose.

SPIRITUS MILLEPÆDARUM, *Liquor cornu cervi—s. Muriaticus æthereus, Spiritus Ætheris muriatici.*

SPIRITUS MYRSITICÆ, *Sp. Myrsiticæ Moschatæ seu Nucis Moschatæ, Aqua Nucis Moschatæ seu Nephriticæ, Nutmeg Water*, (F.) *Esprit de Muscade*. (Myrist. cont. ℥ij, Alcohol. dil. cong., aquæ Oj. Distil a gallon.) Cordial and carminative. Dose, ℥j to ℥jiv.

SPIRITUS MYRTI PIMENTÆ, *Spiritus pimentæ—s. Nitri acidus, Nitric acid—s. Nitri dulcis, Spiritus ætheris nitrici—s. Nitri duplex, Nitric acid—s. Nitri fumans, Nitric acid—s. Nitri Glauberi, Nitric acid—s. Nitri simplex, see Nitric acid—s. Nitri vulgaris, see Nitric acid—s. Nucis moschatæ, Spiritus myrsiticæ—s. Ophthalmicus Mindereri, Liquor ammoniæ acetatis.*

SPIRITUS PIMENTÆ, *Sp. Myrti Pimentæ seu Pimento, Aqua Mirabilis, Spirit of Pimento*. (Ol. Piment. f. ℥ij, Alcohol. dilut. cong. Solve. Ph. U. S.) Cordial and carminative. Dose, ℥j to ℥jiv.

SPIRITUS PULEGII, *Aqua Pulegii spirituosæ, Spirit of Pennyroyal, Spirituous Pennyroyal Water*, (F.) *Esprit de Ponirot*. (Olei pulegii ℥vij, sp. rect. Oivss, aquæ. q. s. Distil a gallon. Ph. L.) Same as spirit of spearmint in properties and dose.

SPIRITUS PYRO-ACETICUS, *Acetone.*

SPIRITUS PYROXYLICUS, *Pyroxylic spirit, Wood spirit, Wood alcohol, Pyroxylic alcohol, Methylic alcohol, Hydrated oxide of methyle, Bihydrate of Methylene*, (F.) *Esprit pyroxylique, Esprit de bois*. This substance is by some supposed to have been the article given in phthisis, by Dr. Hastings, under the names *Naphtha* and *Wood Naphtha*. It was probably, however, the *Pyro-acetic spirit*. See Acetone. When wood is subjected to destructive distillation, about one per cent. of an inflammable volatile liquid, along with other products, passes over, which, when separated and purified, constitutes pyroxylic spirit. It is given in the same cases and doses as Acetone.

SPIRITUS RECTIFICATUS, *Sp. Vini rectificatus seu vino'sus rectificatus, Ænostag'ma, Ænelæum, Pyra'nus, Alcohol, A. Vini, Spirit of Wine*, (F.) *Esprit de Vin rectifié*. Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—S. g., according to the London Pharmacopœia, 0·838; according to that of Dublin, 0·840; of Edinburgh and United States, 0·835, (see Alcohol,) and of Paris, 0·819 to 0·827.

SPIRITUS RECTOR, AROMA—s. Raphani compositus, Spiritus amaracæ compositus—s. Roriferus, Gaz sanguinis.

SPIRITUS ROSMARINI, *Sp. Rosmarini officinalis, Sp. Anthos, Spirit of Rosemary, Hungary Water*, (F.) *Esprit de Romarin*. (Ol. rosmarini ℥jiv, Alcohol. cong. Solve. Ph. U. S.) Stimulant. Dose, ℥j to ℥jiv.

SPIRITUS SALIS ACIDUS seu FUMANS, Muriaticum acidum—s. Salis-ammoniaci, Spiritus ammoniæ—s. Salis ammoniaci aquosus, Liquor ammoniæ—s. Salis ammoniaci lactescens seu lacteus, Spiritus ammoniaci succinatus—s. Salis ammoniaci sulphuratus, Ammonie sulphuretum—s. Salis dulcis, Spiritus ætheris muriatici—s. Salis Glauberi, Muriaticum acidum—s. Salis marini, Muriaticum acidum—s. Salis marini coagulatus, Potassæ urinas—s. Salis volatilis oleosus, Spiritus ammoniæ aromaticus—s. Sulphurico-æthereus camphoratus, Tinctura ætherica composita—s. Sulphurico-æthereus martialis, Tinctura seu Alcohol sulphurico-æthereus ferri—s. Sulphuris, Sulphurous acid—s. Sulphuris per campanam, Sulphurous acid—s. Sulphuris volatilis, Ammonie sulphuretum—s. Sulphurous volatilis, Sulphurous acid.

SPIRITUS TENUIOR, Alcohol dilutum, Spiritus riu'sus tenuior, Proof Spirit, (F.) *Esprit de vin délayé*. Generally made for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. g. Lond. 0·920; Edinb. and United States, 0·935. It is employed in the same cases as those in which the alcohol is used:—chiefly, as a solvent of vegetable matters, in the form of tinctures.

SPIRITUS VENERIS, Aceticum acidum—s. Vini Gallici, Brandy—s. Vini rectificatus, Spiritus rectificatus—s. Vinous camphoratus, Spiritus camphoræ—s. Vinous tenuior, Spiritus tenuior—s.

Vitalis, Nervous fluid — s. Vitrioli, Sulphuric acid — s. Vitrioli acidus Vogleri, Sulphuricum acidum dilutum — s. Vitrioli coagulatus Mynsichti, Potassæ sulphas — s. Vitrioli dulcis, Spiritus ætheris sulphurici — s. Vitrioli phlogisticatus, Sulphurous acid — s. Volatilis aromaticus, Spiritus ammoniæ aromaticus — s. Volatilis foetidus, Spiritus ammoniæ foetidus.

SPIROID CANAL, Aquæductus Fallopii.

SPIROETER, a hybrid term, from *spiro*, 'I breathe,' and *μετρον*, 'a measure': — properly *Anapnom'eter*, *Pneusom'eter*, *Pneumom'eter*, *Pneumatom'eter*, *Pulmom'eter*, *Pneumonom'eter*. Any instrument for measuring the quantity of air concerned in respiration, and, consequently, the capacity of the lungs. This mode of measurement has been called *Spirom'etry*, as it was formerly called *Pulmom'etry*. The term *spirometer* is now usually applied to a kind of gasometer introduced by Dr. Hutchinson to estimate the quantity of air contained in, or, rather, expelled from the lungs under different circumstances.

SPIROPTERA HOMINIS, see Worms.

SPISSANTIA, Incrassantia.

SPIT, Sputum.

SPITAL, Hospital.

SPIT'AL, MINERAL WATERS OF. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPITH'AMA, *σπιθαμη*, *Dodrans*. A measure of twelve fingers' breadth, or about nine inches.

SPITTING, Exspuition.

SPITTLE, Saliva — s. Sweet, see Salivation.

SPLANCHNA, Entrails.

SPLANCHNECTOP'IA, *Splanchnodias'tasis*, *Situs perver'sus seu anom'ulus intestino'rum*; from *σπλαγγων*, 'an intestine,' *εκ*, 'out of,' and *τοπος*, 'placc.' Misplacement or ectopia of the intestines.

SPLANCHNELMINTHIA, Worms,

SPLANCHNEURYS'MA, from *σπλαγγων*, 'an intestine,' and *ευρυω*, 'I dilate.' Morbid dilatation of the intestines.

SPLANCHNIC, *Splanchn'icus*, *Vis'ceral*, (F.) *Splanchnique*, from *σπλαγγων*, 'a viscus.' Relating or belonging to the viscera.

SPLANCHNIC CAV'TIES are the three great cavities of the body;—those of the cranium, chest, and abdomen.

SPLANCHNIC NERVES belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve*, (F.) *Grand surrénal* (Ch.), Its roots—four or five in number—come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *lesser splanchnic nerve*, *Renal nerve*, (F.) *Splanchnique accessoire* of Walthcr, *Petit surrénal*, (Ch.,) is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglia, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

SPLANCHNICA. Medicines adapted to diseases of the bowels. Also, the 2d order of the class

Celiaca of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, *Splanchnectopia*.

SPLANCHNODYNE, from *σπλαγγων*, 'a viscus,' and *δύνη*, 'pain.' Pain in the bowels.

SPLANCHNOGRAPHIA, *Splanchnography*.

SPLANCHNOGRAPHY, *Splanchnog'ra'phia*, from *σπλαγγων*, 'a viscus,' and *γραφη*, 'a description.' The part of anatomy which treats of the viscera.

SPLANCHNOLITHIASIS; from *σπλαγγων*, 'a viscus,' and *λιθος*, 'a stone.' The formation of a calculous concretion in any viscus.

SPLANCHNOL'OGY, *Splanchnolog'ia*, from *σπλαγγων*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, *Splanchnography*.

SPLANCHNOPATHIA, from *σπλαγγων*, 'a viscus,' and *παθος*, 'suffering.' A disease of the intestines.

SPLANCHNOSCLEROSIS, from *σπλαγγων*, 'a viscus,' and *σκληρος*, 'hard.' Induration of a viscus.

SPLANCHNOT'OMY, *Splanchnotom'ia*, *Splanchnot'omē*, from *σπλαγγων*, 'a viscus,' and *τεμνω*, 'I cut.' Dissection or anatomy of the viscera.

SPLAT-FOOT, see Kylosis.

SPLAYFOOT, see Kylosis.

SPLEEN, *σπλην*, *Lien*, *Hepar sinistrum* seu *adulter'num*, *Fomes ventric'uli*, *Milt*, (Sc.) *Milt*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is 4½ inches; its thickness 2½; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations — *splenic corpuscles* or *Malpighian bodies* of the spleen. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations — *trabeculae*. At its inner edge is a fissure, *Hilus* seu *Porta lie'nis*, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. The best opinion is, that it appertains to hæmatisation, and acts as a diverticulum to the vascular system.

SPLEEN, Hypochondriasis — s. Malpighian bodies of the, see Spleen — s. Supernumerary, *Lienculus*.

SPLEENWORT, *Asplenium*, A. filix foemina, *Asplenium scolopendrium* — s. Bush, *Comptonia asplenifolia*.

SPLEN, Spleen.

SPLENAL'GIA, *Neural'gia lie'nis*, *Sple'nica*, *Splendyn'ia*, from *splen*, and *αλγος*, 'pain.' Pain in the spleen.

SPLENALGIA BENGALENSIS, see Cachexia, splenic — s. Phlegmonodea, *Splenitis* — s. Subinflammatoria chronica, *Splenoncus*.

SPLENATROPH'IA, *Atroph'ia Lie'nis*, from *splen*, and *atroph'ia*, 'atrophy.' Wasting or atrophy of the spleen.

SPLENAUXE, *Splenoncus*.

SPLENECTAMA, *Splenoparectama*.

SPLENECTASIS, *Splenoparectama*.

SPLENECTOM'IA, *Splenectomē*, from *splen*, *εκ*, 'out of,' and *τεμνω*, 'I cut.' Extirpation of the spleen.

SPLENECTOP'IA, *Dislocat'io* seu *Ectop'ia lie'nis* seu *splenis*, *Anomosplénotopie* — Piorry; from *splen*, and *εκτοπος*, (*εκ*, and *τοπος*), 'out of

place.' Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAXIS, *Splenophrax'is*, from *splen*, and *εμφρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel. See Splenoneus.

SPLENES, Hypochondriasis.

SPLENETICUS, *Splēnit'icus*, *Splēnit'icus*, *Lien'no'sus*, (F.) *Rotelenz*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLENIC, *Splēnicus*, *Splēnius*, (F.) *Splē-nique*, from *splen*. That which relates to the spleen.

SPLENIC ARTERY. It arises from the celiac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

SPLENIC CACHEXIA, see Cachexia splenica—s. Corpuscles, see Spleen.

SPLENIC PLEXUS is a nervous network, which proceeds from the celiac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

SPLENIC VEIN, *Vena splē'nica*, *V. lien'alis*, arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the *vasa brevia*, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENICA, Splenalgia. Also, medicines which affect the spleen.—Percira.

SPLENICUS, Spleneticus, Splenic.

SPLENIOLA, Compress.

SPLENIS TUMOR, Ague cake.

SPLENISATION, Splenization.

SPLENISCUS, Compress.

SPLENITICUS, Splenic.

SPLENITIS, from *splen*, and *itis*, denoting inflammation. Inflammation of the spleen. *Empyema splēnitis*, *Inflammati'o lien'is*, *I. splēnis*, *Splēn'gia phlegmono'idea*, *Lien'itis*, (F.) *Splē-nite*, *Inflammation de la Rate*. A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It generally affects the capsulæ—*Episplēnit'is*, *Peri-splēnit'is*—and must be treated like other inflammations.

SPLENIUM, Compress—s. Corporis Callosi, see Corpus callosum—s. Cruciatum, *Croix de Malte*.

SPLENIUS, *S. Cap'itis* seu *Colli*, (F.) *Cervico-dorso-mastoidien et dorso-trachélien*, *Cervico-mastoïdien* (Ch.), *Posterior mastoid muscle*. So called from its resemblance to the *splecu* of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebrae; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebrae, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli*, and *Splenius cap'itis*. The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

SPLENIZATION, *Splenizatio*, *Splēnificatio*, *Splēnificatio*, (F.) *Splēnisation*, from *splen*. A

term applied to the state of the lung in the first or second stage of pneumonia, in which its tissue resembles that of the spleen.

SPLENOCE'LE, *Hern'ia lien'alis*, from *splen*, and *κηλη*, 'a tumour.' Hernia formed by the spleen.

SPLENODYNIA, Splenalgia.

SPLENOG'RAPHY, *Splenograph'ia*, from *splen*, and *γραφη*, 'n description.' A description of the spleen.

SPLENOHE'MIA, (F.) *Splēnohémie*, from *splen*, and *αιμα*, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

SPLENOID, *Splēnoï'des*, *Splēno'des*, from *splen*, and *ειδος*, 'resemblance.' Spleen-like. Having the appearance of the spleen.

SPLENOL'OGY, *Splēnolog'ia*, from *splen*, and *λογος*, 'a discourse.' A treatise on the spleen.

SPLENOMALA' CIA, *Lienomala'cia*, from *splen*, and *μαλακος*, 'soft.' Morbid softening of the spleen.

SPLENONCIE, Splenoneus.

SPLENON'CUS, *Megalosplē'nia*, *Hypertroph'ia* seu *Supernutrit'io splēnis* seu *lien'is*, *Intumescen'tia* seu *Inflam'tus* seu *Phyco'nia lien'is*, *Splēn'al'gia subinflammato'ria chron'ica*, *Splēno-phrac'is*, *Splēnoz'is*, *Hypersplēnotroph'ia*, *Lien'ingens*, (F.) *Splēnécie*, *Hypertrophie de la Rate*; from *splen*, and *ογκος*, 'a tumour.' Tumefaction of the spleen. See Ague cake.

SPLENOPARECTAMA, *Splēnopectama*, *Splēnopectat'is*, *Splēno'ctasis*, from *splen*, and *παρακταμα*, 'excessive volume.' Excessive enlargement of the spleen.—Ploncquet.

SPLENOPARECTASIS, Splenoparectama.

SPLENOPIHRAXIA, Splenemphraxis.

SPLENORRHAG'IA, from *splen*, and *ραγη* 'rupture.' Hemorrhage from the spleen.

SPLENOSCIRRHUS, from *splen*, and *σκιρρος*, 'hardness.' Scirrhus or cancer of the spleen.

SPLENOT'OMY, *Splēnotom'ia*, *Splēno'tomē*, from *splen*, and *τεμνω*, 'I cut.' Dissection of the spleen.

SPLINT, Teut. Splinter, from *splijten*, 'to split'; *Hastel'la*, *Ass'ula*, *Asser'entum*, *Plag'ula*, *Narthez*, *Fer'ula*, (F.) *Attelle*, *Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

SPLINTER, (F.) *Esquille*. Same etymon. This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation, until it is removed,—*Aculeus lign'is*, (F.) *Écharde*.

It is also applied to fragments that separate from a fractured or diseased bone.

SPLITCLOTH, *Linteum scissum*. A bandage for the head, consisting of a central part, and six or eight tails. The *single split cloth* has four tails. It is regarded as the most convenient bandage for the head, face and jaws.

SPLITROCK, *Heuchera cortusa*.

SPOAT, *Saliva*.

SPODIUM GRÆCORUM, *Album græcum*.

SPOLIARIUM, *Apodyterium*.

SPOLIATIVE, *Spoliat'iva*, from *spoliare*, *spoliatum*, 'to take away.' (F.) *Spoliatif*. *Phlebotom'ia spoliat'iva*, (F.) *Saignée spoliative*. Blood-letting, used for the purpose of diminishing the mass of blood.

SPOLIATORIUM, *Apodyterium*.

SPONDLES, *Vertebrae*.

SPONDYLAL'GIA, *Spondylodynia*, from *σπονδύλος*, 'a vertebra,' and *άλγος*, 'pain.' Pain in the vertebræ. *Cacorrhachitis*. See *Vertebral Disease*.

SPONDYLARTHRI'TIS, from *σπονδύλος*, 'a vertebra,' *ἄρθρον*, 'a joint,' and *itis*, denoting inflammation. Gouty or rheumatic inflammation of the spinal column.

SPONDYLARTHROCACE, Vertebral disease.

SPONDYLL, Vertebræ.

SPONDYLIS, Coccyx.

SPONDYLI'TIS, *Inflammatio vertebræ*, from *σπονδύλος*, and *itis*, denoting inflammation. Inflammation of the vertebræ.

SPONDYLIUM, Coccyx, *Heracleum spondylium*.

SPONDYLOCACE, Vertebral disease.

SPONDYLODYNIA, *Spondylalgia*.

SPONDYLOPATHIA, from *σπονδύλος*, 'a vertebra,' and *πάθος*, 'a disease.' A disease of the vertebral column.

SPONDYLOPYOSIS, Vertebral disease.

SPOND'YLUS, *σπονδύλος*. A vertebra. Also, the vertex.

SPONGE, **BASTARD**, *Alcyonium*.

SPONGI. The tumefied glands of the neck.

SPON'GIA, *S. officinalis seu Mari'na*, *Spongus*, *Sphongus*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the *Class* *Porifera*, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in *surgery*, for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Spongia cerata*, *Waxed*, *Cerated* or *Prepared Sponge* or *Sponge Tent*.

SPONGIA ASSA, *S. Usta*—*s. Cerata*, see *Spongia* — *s. Cynosbati*, *Bedegar*.

SPONGIA USTA, *S. Assa*, *Carbo spongia*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U. S. Dose, ʒi to ʒiij.

SPON'GIEÆ LAPIS. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

SPONGIODES, *Spongoid*.

SPONGIOLE, *Spongiolum*, *Spongiola*, *Sponge'let*; from *σπογγιον*, 'a small sponge.' The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPON'GION. Ancient name of an epithem made of goats' dung; and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.—*Paulus*, *Goræus*.

SPONGIO-PILINE, from *spongia*, 'sponge,' and *pilus*, 'a hair.' A fabric, composed of sponge and wool, felted together in three layers, and coated, on one of its surfaces, with caoutchouc, which renders it impermeable. It is of great service as a cataplasm, fomentation, vehicle for lotions, liniments, &c.

SPONGIOSUM (OS), Ethmoid bone.

SPONGIOSUS, *Spongoid*.

SPONGOID, *Spongoides*, *Spongiodes*, *Spongioides*, *Spongy*, from *σπογγια*, 'sponge,' and *ειδος*, 'resemblance.' Resembling sponge. Of the nature of sponge.

SPONGOID INFLAMMATION, *Hæmatodes fungus*.

SPONGOID TISSUE, (F.) *Tissu spongoidé*. An adventitious spongy tissue, found in cases of rickets.—*Guérin*.

SPONGOS, Tonsil.

SPONGY, *Spongoid*.

SPONGY TISSUE, see *Bone*.

SPONSA SOLIS, *Calendula officinalis*.

SPONTANEOUS, *Spontaneus*, (F.) *Spontanée*, from *sponte*, 'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Spontaneous lassitude* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Spontaneous Amputation* is the separation of a limb from the fœtus in utero.

SPONTANEOUS EVOLUTION, see *Evolution* — *s. Version*, *Evolution*, *spontaneous*.

SPONTÉPARITÉ, *Generation*, *spontaneous*.

SPOON, *Umbilicus*.

SPOONWOOD, *Kalmia latifolia*, *Tilia Americana*.

SPORAD'IC, *Sporades*, *Sporad'ici*, *Morbi dispersi seu parsii*, (F.) *Maladies sporadiques*, from *σπειρω*, 'I spread.' Diseases which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

SPORE, *Spor'ule*, *Sporum*, *Sporulum*, from *σπειρω*, 'I sow.' The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

SPORID'IUM; same etymon. The reproductive body in algaecous plants, which resembles the spore of other plants.

SPORULE, *Spore*.

SPORUM, *Spore*.

SPOTS, CEREBRAL, *Taches cérébrales* — *s. Germinal*, see *Molecule* — *s. Meningitic*, *Taches méningitiques*.

SPOTS, RED, (F.) *Taches rouges*, *Rose spots*, *Rose'olæ seu Pap'ulæ typhosæ*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, *Spots, red*.

SPRAIN, corrupted from *strain* [?]—*Subluxatio*, *Distortio*, *Dias'trophê*, *Diastrem'ma*, *Luxatio imperfecta*, *Exarthre'ma*, *Exarthrosis*, *Strem'ma*, *Thlasma Stren'ma*, *Wrench*, (Sc.) *Wramp*, (Prov.) *Kench*, *Keak*, (F.) *Détorse*, *Entorse*, *Fou-lure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints; — as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

SPRAT, YELLOW-BILLED, *Cupea thryssa*.
SPRUCE BEER, *White Spruce Beer*. A beer made as follows: To 10 gallons of water, add 6 pounds of sugar, and 4 oz. of essence of spruce.

Add yeast, and bottle, when ready. It is grateful and antiscorbatic.

SPRUCE BEER POWDERS may be formed of *white sugar*, ℥j, and ℥ij; *sodæ subcarb.*, gr. xxvj; *essence of spruce*, gr. x. in each blue paper; and *acid of tartar*, ℥ss in each white paper. For half a pint of water.

SPUITIO, Exspuition.

SPUMA ARGENTI, Plumbi oxydum semivitreum—s. Cerevisiæ, Vest—s. Trium draconum, Antimonium muriatum.

SPUMEUX, Frothy.

SPUMOSUS, Frothy.

SPUNK, Boletus igniarius.

SPUR, Sax. *спур*, (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURBLIND, Myopia.

SPURGE, **CAPER**, Euphorbia lathyris—s. Cypress, Euphorbia Cyparissias—s. Flax, Daphne gnidium—s. Flowering, large, Euphorbia corollata—s. Garden, Euphorbia lathyris—s. Greater, Euphorbia palustris—s. Ipecacuanha, Euphorbia ipecacuanha.

SPURGE LAUREL, Daphne laurcola.

SPURGE MARSH, Euphorbia palustris.

SPURGE OLIVE, Cneorum tricoccum, Daphne mezereum.

SPURGE, PETTY, Euphorbia peplus—s. Sea, Euphorbia paralias—s. Spotted, Euphorbia maculata—s. Sun, Euphorbia helioscopia—s. Wartwort, Euphorbia helioscopia.

SPUTA, PRUNE JUICE, see Prune Juice.

SPUTAMEN, Saliva, Sputum.

SPUTAMENTUM, Saliva, Sputum.

SPUTATIO, Exspuition.

SPUTATION, Exspuition.

SPUTATORIUS, Expectorant.

SPUTUM, plural *Sputa*, *Apochrem'ma*, *Chrem'ma*, *Emptys'ma*, *Sputa'men*, *Pty'elon*, *Pytis'ma*, *Spit*, from *spere*, *sputum*, 'to spit.' (F.) *Crachot*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eru'ginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mousseux*, when covered with froth; *rubig'inous*, (F.) *rubigineux* ou *rouillé*, when of a reddish-yellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

SPUTUM CRUENTUM, Hæmoptysis—s. Duleæ, Sæcharorrhœa pulmonalis—s. Oris, Salivation—s. Saccharatum, Sæcharorrhœa pulmonalis—s. Sanguinis, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Squamous portion, Table.

SQUAMÆ, Scaly diseases.

SQUAMARIA, Plumbago Europæa.

SQUAMEUX, Squamous.

SQUAMIFORMIS, Squamous.

SQUAMOUS, *Squamo'us*, *Lepido'des*, *Lepido'des*, *Squamifor'mis*, *Scaly*; from *squama*, 'a scale.' That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* ou *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale. See Temporal Bone.

SQUAMOUS SUTURE, *Sutu'ra squamo'sa* seu *men-do'sa* seu *lepi'do'des* seu *lepi'do'des* seu *crani squamo'sa*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain scaly cutaneous affections are also called *squamous*, (F.) *squameux*. See Scale.

SQUARE STALK, *Monarda coccinea*.

SQUARRA TONDENS, Porrigo decalvans.

SQUATTING PILLS, *Pilule opiatae*.

SQUAW-MINT, *Hedeoma*.

SQUAW-ROOT, *Actæa racemosa*, Caulophyllum thalictroides, *Senecio aureus*.

SQUAW-WEED, *Erigeron Philadelphicus*.

SQUEAMISINESS, *Festidium cibi*.

SQUEAZINESS, Nausea.

SQUELETTE, Skeleton.

SQUELETTELOGIE, Skeletology.

SQUILL, *Seilla*—s. Vinegar of, *Acetum seillæ*.

SQUILLA, *Seilla*.

SQUINANCIE, *Cynanehe*, *Cynanehe tonsillar*.

SQUINANCY, **COMMON**, *Cynanehe tonsillar*.

SQUINANTHIA, *Cynanehe*.

SQUINANTHIUS, *Juncus odoratus*.

SQUINE, *Suilax China*.

SQUINSY, *Cynanehe tonsillar*.

SQUINT-EYED, see Strabismus.

SQUINTER, see Strabismus.

SQUINTING, Strabismus.

SQUINZEY, *Cynanehe tonsillar*.

SQUIRRE, *Scirrhus*—s. *en Cuirasse*, see Lig-neous.

SQUIRRHE, *Scirrhus*.

SQUIRREL CORN, *Dicentra Canadensis*.

SQUIRREUX, *Scirrhus*.

SQUIRROGASTRIE, *Scirrhogastria*.

SQUIRRUS, *Scirrhus*.

SQUIRT, Syringe.

STACHELBERG, **MINERAL WATERS OF**. Stachelberg Springs arc far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS FETIDA, Galeopsis.

STACTE, Myrrha.

STADE, Stage.

STADIUM, Period, Stage.

STADIUM ACMES seu **STA'SEOS**. The period of the height of a disease.

STADIUM ANNIHILATI'NIS seu **CONVALESCEN-TIÆ** seu **RECONVALESCENTIÆ**. The period of recovery from disease.

STADIUM AUGMEN'TI seu **INCREMENTI** MOREI. The period or stage of increase of a disease.

STADIUM CALORIS, Stage, (hot)—s. *Convalescentiæ*, S. annihilationis.

STADIUM DECREMEN'TI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, Stage, (cold)—s. *Incrementi Morbi*, S. *Augmenti morbi*—s. *Latentis Contagii*, *Prodromus*—s. *Opportunitatis*, *Prodromus*—s. *Prodromorum*, *Prodromus*—s. *Reconvalescentiæ*, S. *Annihilationis*.

STAFF, (D.) *Staf*. An instrument of great importance in lithotomy,—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, **CLIMBING**, *Celastrus scandens*.

STAFFA, Stapes.

STAG'S PIZZLE, see Cervus.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stadr*. The period or degree of a disease; especially the period of an intermittent:—as the *cold stage*,—*sta'dium fri'goris*—*hot stage*, &c

STAGGERBUSH, *Andromeda mariana*.

STAGGERWEED, *Delphinium*.

STAGIUM. The sixth part of an ounce.

STAGMA, from *σταζω*, 'I distil;' *Stalag'ma*. Any distilled liquid or liquor.

STAGNA, Gutta.

STAGNATION, *Stagnatio*, from *stagnare*, *stagnatum*, 'to form a pond,' (*stagnum*, 'a pond.') Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, *Receptaculum chyli*.

STAHLIAN. One who follows the doctrine of Stahl.

STAHLIANISM. The doctrine of Stahl, which considered every vital action under the direction and presidency of the soul. See *Ani-mist*.

STALAGMA, *Stagma*.

STALAGMITIS CAMBODGIÏDES, *S. Cambodgia*, from *σταλαγμα*, 'a drop'—the gum ex-
uding by drops. Gumboe was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by Murray to specimens of two distinct trees of different genera. See *Cambogia*.

STALAGMOS, *Distillation*.

STALE, *Urine*.

STALTIUS, *Incarnans*.

STAMMERING, *Balbuties*—s. of the *Fingers*, *Cramp*, *writers*'.

STAMP, *Cochet*—s. *Medicine*, *Cachet*—s. *Ocu-list*, *Cachet*.

STAMPING MILL, see *Pulverization*.

STANG, see *Throbbing*.

STANGOS, *Tin*.

STANNI MURIAS, *Tin*, *muriate of*—s. *Oxy-dul murias*, *Tin*, *muriate of*—s. *Pulvis*, see *Tin*.

STANNIOLUM, *Tin-foil*.

STANNUM, *Tin*—s. *Cinereum*, *Bismuth*—s. *Foliatum*, *Tin-foil*—s. *Glaciale*, *Bismuth*—s. *Granulatum*, see *Tin*—s. *Indicum*, *Zincum*.

STAPÉDIEN, *Stapedius*.

STAPE'DIUS, *Stapes*, (F.) *Stapédien*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards.

STAPES, genitive *Stapēdis*, (*sto* and *pes*.) *Stapha*, *Staffa*, 'a stirrup.' (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a *stirrup*. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane of which it is united. Its branches are one anterior, and the other posterior. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHA, *Stapes*.

STAPHIS, *Delphinium staphisagria*.

STAPHISAGRIA, *Delphinium staphisagria*.

STAPHISAIGRE, *Delphinium staphisagria*.

STAPHYLÆMATOMA, from *σταφυλη*, 'the uvula,' and *hæmatoma*. A tumour formed by ef-fusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, *Staphylepartes*.

STAPHYLE, *Uvula*. see *Vitis vinifera*.

STAPHYLEPAR'TES, from *σταφυλη*, 'the uvula,' and *επιρω*, 'I lift up.' *Staph'ylagra*. An instrument for laying hold of, and removing the uvula.—*Paulus*.

STAPHYLINI, see *Azygos muscle*—s. *Medii*, see *Azygos muscle*.

STAPHYLINO-PHARYNGEUS, *Palato-pharyngeus*.

STAPHYLINUS EXTERNUS, *Circumflexus*.

STAPHYLIS, *Nipple*.

STAPHYLITIS, *Uvulitis*.

STAPHYLIUM, *Nipple*.

STAPHYLODIALYSIS, *Cionis*, *Staphylœdema*.

STAPHYLÆDE'MA, from *σταφυλη*, 'the uvula,' and *œdema*. *Augi'na uvula'ris*, *Dysphag'gia uru-lo'sa*, *Hyprostaph'ylē*, *Hyprostaphyl'itis*, *Staphylo-dial'ysis*, *Prolapsus* seu *Propt'osis* seu *Ciccus* seu *Edema u'vulae*, *Himms*, *Himantoma*, *Himant'osis*, *Staphylo'cus*, *Staphylo'cia*, *Prodne'tio u'vulae à pituità*, *U'vula decid'ua seu relac'ta*, *Cras'pedon*. Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglu-tition, cough, &c. Scarification, astringent gar-gles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, from *σταφυλη*, 'a grape.' *Uva'tio*, *Myoceph'alon*, *Myioceph'alon*, *Parop'osis*, *Staphy'lo'ma*, *Staphy'lo'sis*, *Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

STAPHYLOMA CONICUM, *Staphyloma of the cornea*—s. *Pellucidum conicum*, *Staphyloma of the cornea*.

STAPHYLOMA OF THE CORNEA, *Sugar-loaf Cornea* or *Con'ical Cornea*, *Con'ical hydrophthal'mia*, *Staphy'lo'ma con'icum* seu *pellu'cidum con'icum*, *Conophthal'mia*, *Prolap'sus cor'neae*, *Ceraton'cus*, *Hypercerato'sis*, *Hypercer'asia*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

STAPHYLOMA OF THE IRIS is the disease de-scribed by Scarpa under the name *Procidencia Iridis*. It is hernia of the iris, through an acci-dental opening of the cornea. Also, *iridauexis*.

STAPHYLOMA OF THE SCLEROT'IC, *Staphyloma sclerot'icæ*, differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

STAPHYLOMA UVEÆ, *Iridauexis*.

STAPHYLONCIA, *Staphylœdema*.

STAPHYLONCUS, *Staphylœdema*.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*, from *σταφυλη*, 'the uvula,' and *πλασσω*, 'I form.' An epithet applied to the operation for replacing the soft palate, when it has been lost. *Staph'ylo-plasty*, *Pal'atoplasty*, a word of hybrid formation, is the operation for closing the palatine vault.

STAPHYLOR'RAPHY, *Velosynth'esis*, *Staphylo'r'rha'phia*, *Kionorrha'phia*, *Cionorrhaph'ia*, *Ucanor'rhap'hē*, *Uranorrha'phia*, *Uraniscorrha'phia*, *Uraniscor'rhap'hē*, from *σταφυλη*, 'the uvu-la,' and *ραφη*, 'a suture.' The operation for uni-ting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, *Staphyloma*.

STAPHYLOT'OMY, *Staphylo'tomia*, from *σταφυλη*, 'the uvula,' and *τομη*, 'incision.' Amputa-tion of the uvula.

STAR APPLE, BROAD-LEAVED, *Chryso-phyllum canino*—s. *Blazing*, *Aletris farinosa*—s. *Bloom*, *Spigelia Marilandica*—s. *Grass*, *Aletris farinosa*, *Ilypoxys erecta*.

STAR, KNAP-WEED, *Centaurea calcitrapa*.

STAR OF THE NORTH, *Geum urbanum*.

STAR STROKE, *Comp-de-soleil*—s. *Wort*, *Aletris farinosa*—s. *Wort*, *golden*, *Bubonium*—s. *Wort*, *water*, *Callitriche verna*.

STARBECK SPA. A chalybeate spring at Harrogate.

STARCH, *Sax. rεαρε*, 'rigid, stiff,' *Amylum*.

STARCH, ANIMAL, *Corpora amylacea*—s. *Blue*, *Smalt*—s. *Candia*, *Tous-les-mois*.

STARCH CORPUSCLES, *Corpora amylacea*.

STARCH, IODIDE OF, *Iod'idium seu Iodure'tum Am'yli*, *Am'ylum iodat'um*, (F.) *Iodure d'Amidon*; prepared by triturating iodine and starch, is said to have the eutrophic effects of iodine; but, by some, is esteemed inert. Dose, four to six grains.

STARCH, POTATO, see *Solanum tuberosum*.
 STARCH SUGAR, Glucose.
 STARCH, TACCA, Arrowroot, Tahiti.
 STARKEY'S PILLS, see *Pilulæ ex helleboro et myrrha*.
 STASE, Stasis.
 STASIS, *στασις*, from *στανω*, 'I stop,' (F.) *Stase*. This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids, — Stasis never.

STASIS, Station.
 STATE MEDICINE, Medicine, state.
 STATICAL, *Statistical*, *Statisicus*, (F.) *Statique*. Same etymon. An epithet applied to the physical phenomena presented by organized bodies in contradistinction to the organic or vital.

STATICA SEPTI NARIUM, *Appendicæ cutanea septi narium*. The cutaneous appendage to the septum narium.

STATICAL, Static.

STATICE CAROLINIANA, of the United States. (*στατικός*, 'restraining,') *American* or *Sea-side Thrift*, *Marsh Rosemary*, *Marsh Root*, *Ink-root*, *Sea Lavender*, *Ord. Plumbaginaceæ*, is considered to be a mere variety of the *Statice limonium*. The root is the *Statice* — (Ph. U. S.).

STATICE LIMOINIUM, *S. Maritimum*, *Behen rubrum*, *Limonium*, *L. majus* seu *vulgaris*, *Behen*, *Behnen Ackmar*, *Sea Lavender*, *Red Behen*, *Marsh Rosemary*, *Lavender Thrift*, (F.) *Behen rouge*, *Romarin des marais*, *Lavaude triste ou de mer*. The roots have been esteemed astringent, tonic, and eminently antiseptic.

STATICE MARITIMUM, *S. limonium*—s. *Vulgare*, *S. limonium*.

STATION, *Statio*, *Stasis*, *Status*, from *stare*, *statum*, 'to stand.' The act of standing.

STATIONARY, *Stationarius*, (F.) *Stationnaire*. Same etymon. A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATISTICS, MEDICAL, *Vital Statistics*, *Biostatistics*, (*Status*, 'a state,') (F.) *Statistique médicale*. That part of medicine which relates to details — *medico-statistical* — connected with the mortality, salubrity, &c., of different countries and situations.

It has, also, been used in a wider sense to signify the same as *Numerical method*, (F.) *Méthode numérique*; which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATISTICS, VITAL, *Statistics*, *medicæ*.

STATURE, *Statura*, *Megethos*, *Magnitudo corporis*, from *sto*, *statum*, 'to stand.' The height of the human figure. The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	STATURE.	
	Feet.	In.
An Englishman	6	4½
	to	
	5	00
An Englishwoman	5	4
	to	
	5	00
European male skeleton	5	8
Do.	5	5
A Negro at the Lunatic Hospital, Liverpool	5	10½
Another from Virginia	5	5½
Another from the Gold Coast	5	8
Another	5	00

	STATURE.	
	Feet.	In.
Negro skeleton	4	1½
Another	5	7½
A Lascar	5	4
Venus de Medici	5	00
Tyson's Chiupansô (<i>Simia Troglodytes</i>)	2	2
Mr. Abel's Orang Otang	2	7
Camper's Do.	less than 30	
Mr. White's Monkey	2	2

STATUS, *Aeme* — s. *Cruditatis*, *Crudity* — s. *Erethiticus*, *Nervosus diathesis* — s. *Gastricus*, *Embarras gastrique* — s. *Nervosus*, *Nervosus diathesis* — s. *Parturiendi*, *Parturition* — s. *Sthenicus*, *Sthenia* — s. *Verminosus*, *Helminthiasis*.

STAVESACRE, *Delphinium staphisagria*.

STAXIS, *σταξις*, *Apostaxis*. A slight epistaxis or nasal hemorrhage. — Hippocrates.

STEAM-DOCTOR. A term applied to one who treats all or most diseases by steam.

STEAR, see *Fat*, *Sebum*.

STÉARATÉ, *Emplastrum*.

STEARIN, see *Fat*.

STEARINUM CETACEUM, *Cetaceum*.

STÉAROLÉ, *Pomatum* — s. *Solide*, *Emplastrum*.

STEAROSIS, *Steatosis*.

STEARRHŒA, *Stearorrhœa*, *Seborrhœa*, *Seborrhag*, *Smegmatorrhœa*, *Smegmorrhœa*, *Fluxus sebaceus*, *Sebaceous Flux*, from *στεαρ*, 'suet,' and *ρῶα*, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEARRHŒA NIGRICANS. A term used by Dr. Neligan, of Dublin, for a black discoloration of the face, observed in young females affected with derangement of the catamenia, and which, in his opinion, is owing to a dark secretion from the cutaneous sebaceous glands.

STEATITES, *Polysarcia*.

STEATOULĒ, from *στεαρ*, *στεατος*, 'suet,' and *κῆλη*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

STEATOMA, *Tumor larvæus*, from *στεαρ*, *στεατος*, 'suet,' *Σερατίο*, *Emphyma encystis steatoma*. An encysted tumour, whose contents are similar to fat.

STEATOPYGA, from *στεαρ*, *στεατος*, 'fat,' and *πυγή*, 'buttocks.' *Buttock-hump*. Fat buttocks; such as exist in the Hottentot female.

STEARORRHŒA, *Stearrhœa*.

STEATOSIS, *Stearosis*. Fatty degeneration of a part, or unusual deposition and accumulation of fat in its adipose tissue.

STEATOSIS CORDIS, *Degeneratio adiposa cordis*, *Cardiethmoliposis* and *Cardiomyoliposis* (Piorry), *Fatty heart*. Unusual deposition of fat on the heart — by some presumed to be occasionally a true adipous degeneration of the substance of the heart.

STEATOSIS HEPATICA, *Adiposis hepatica*.

STEATOZOON FOLLICULORUM, *Acarus Folliculorum*.

STEEL, *Chalybs*.

STEEP, *Rennet*.

STEEPLE-BUSH, *Spiræa tomentosa*.

STEER'S OPODELDOCH, see *Opodeldoch*, *Steer's*.

STEGMONTII, see *Parturient*.

STEGANOPODES, *στεγανopodes*, *Plumipedes*. They who have flat feet, or are web-footed, from *στεγανος*, 'covered,' and *πους*, 'foot.'

STEGNOSIS, *Stenosia*, *Constipatio*, *Stipatio*, *Condensatio*, *Obstrunctio*, from *στεγνωω*, 'I constrict.' Constriction or narrowness of the pores and vessels. *Stricture*. *Constipation*. *Suppression* of the evacuations. See *Arctatio*.

STEGNOTICA, *Astringents*.

STEIROSIS, Sterilitas.

STELENGIS, Stridor dentium.

STELLA, *Fus'cia stell'ata*, (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRÆ, Plantago coronopus.

STELLARIA MEDIA, Alsine media—s. Scilla. Scilla.

STELLATA RUPINA, Centaurea calcitrapa.

STELL'ULÆ VERHEYEN'II, (*stella*, 'a star,' *stell'ula*, 'a little star,') *Substantia stell'ata serpenti'no seu radi'ata*, *Ellych'nia*. A stelliform plexus of veins at the surface of the kidney, which gives origin to the interlobular veins.

STELOCHITIS, Osteocolla.

STENAGMUS, Susprium.

STENAXIS, Susprium.

STENIA, Sthenia.

STENICUS, Active.

STENOBREGMATE, see Cranium.

STENOCARDIA, Angina pectoris, Cardiostenosis.

STENOCHORIA, *Stenochori'asis*, from *στενος*, 'narrow,' and *χωρα*, 'space.' Angustia. Employed by some for contraction of the vagina.

STENOCHORIA INTESTINI RECTI, Stricture of the rectum—s. *Œsophagi*, *Dysphagia constricta*.

STENOMYCTERIA, from *στενος*, 'narrow,' and *μυκτηρ*, 'nose.' Contraction of the nasal passages.

STENOSIS, Stegnosis.

STENOSTEGNOSIS, Stenostenosis.

STENOSTENOSIS, *Stenostegno'sis*, from *Steno*, and *στενωσις*, 'contraction.' *Obstructio ductus Stenoni'ni*. Narrowness or contraction of the duct of Steno.

STENOSTOMIA, from *στενος*, 'narrow,' and *στομα*, 'mouth.' Contraction of the mouth.

STENOTHORACES, from *στενος*, 'narrow,' and *θωραξ*, *θωρακος*, 'the chest.' They who have narrow chests.

STENTOROPHONUS, from *Στεντωρ*, *Stentor*, a Greek of powerful voice in the army before Troy; and *φωνη*, 'voice.' One who has a strong voice.

STEPHANE, Crown.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000—about \$25,000.

STEPHENSIA ELONGATA, Matico.

STEPMOTHER'S BLESSING, Hangnail.

STERA, Uterns.

STERCORACEOUS, *Stercora'rius*, *Diachoret'icus*, *Ster'coral*, from *stercus*, *stercoris*, 'dung.' *Fæcal*, *Fæcal*, (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: *à posteriori* has been similarly used.

STERCORAIRE, Stercoraceous.

STERCUS, Excrement, Fimus—s. Anseris, Fimus anseris—s. Caninum album, Album Græcum—s. Diaboli, Asafetida—s. Equi non castrati, Fimus.

STERCUS HUMA'NUM, Homerda. Human excrement.

STERCUS LACERTÆ, Crocodilia.

STEREOCYSTIS, from *στερεος*, 'hard,' and *κυστις*, 'cyst.' A hard encysted tumour.

STEREOS, Solid.

STEREOSCOPE, *Stereoscop'ium*, from *στερεος*, 'solid,' and *σκοπεω*, 'I view.' A physical instrument by means of which plane pictures of an object are made on each retina, and so blended as to appear as one in relief. Also, an instrument for detecting a calculus in the bladder, and foreign bodies in the soft parts. It resembles a common catheter, having an expanded free extremity.

STEREOTICA, from *στερεος*, 'hard.' Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STERILE, *Ste'r'ilis*, *A'gonos*, *Aph'or'nis*, *Aph'or'iens*, *Ablast'es*, *Infecun'dus*, *Barren*, (F.) *Sté-ile*. Same etymon as Sterilitas. Not producing fruit; infecund.

STERILIS, Sterile.

STERILITAS, *Agon'ia*, *Steiro'sis*, *Stiro'sis*, *Ageme'sia*, *Agenne'sis*, *Infecun'ditas*, *Steril'ity*, *Acy'e'sis*, *Bar'remness*, *Infecun'dity*, *Aph'or'nia*, *Ate'nia*, *Atoc'ia*, from *στερεος*, or *στερος*, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

STERNAD, see Sternal.

STERNAL, *Sterna'lis*, from *sternum*, 'the breast bone.' Relating or appertaining to the sternum or breast bone.

STERNAL ASPECT. The aspect of the body where the sternum is situate.—Barclay. *Sternal* is used by the same writer adverbially to signify towards the sternal aspect.

STERNALGIA, Angina pectoris.

STERNO, in composition, belonging, or relating to, the sternum or breast bone.

STERNO-CLAVICULAR, *Sterno-clavicula'ris*. That which relates to the sternum and clavicle.

STERNO-CLAVICULAR ARTICULATION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two *radiated sterno-clavicular*, (F.) *Sterno-claviculaires rayonnées*; one anterior, and one posterior—an *inter-clavicular ligament* extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage*. The costo-clavicular ligament may also be considered to belong to this articulation.

STERNO-CLAVIO-MASTOÏDIEN, *Sterno-cleido-mastoideus*—s. *Cleido-hyoideus*, *Sterno-hyoideus*.

STERNO-CLEIDO BRACHIALIS, *Pectoralis major*.

STERNO-CLEIDO-MASTOÏDEUS, *Sterno-mastoideus*, *Cleido-mastoïdens*, *Mastoïdens*, *M. anterior*, *Nuta'tor cap'itis*; (F.) *Sterno-clavio-mastoïdien*, *Sterno-mastoïdien*; from *στερνον*, 'the sternum,' *κλεις*, 'the clavicle,' and *μαστος*, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line

of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

STERNO-COSTAL. *Triangularis sterni* — *s. Costo-clavico-humeral*, *Pectoralis major* — *s. Humeral*, *Pectoralis major*.

STERNO-HYOIDEUS, *Sterno-cleido-hyoideus*, *Sterno-hyoides*, *Hyoidea primus*; from *στερον*, 'the sternum,' and *υοειδης*, 'the os hyoides.' A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum; — at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

STERNO-MASTOÏDIEN, *Sterno-cleido-mastoideus* — *s. Pubien*, *Rectus abdominis*.

STERNO-THYROÏDEUS, *Sterno-thyroïdes*, *Bran'china*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage: and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides by the medium of the thyro-hyoid membrane.

STERNODYNIA, see *Stomatodynia* — *s. Syn-copalis*, *Angina pectoris* — *s. Syncoptica* et *Palpitans*, *Angina pectoris*.

STERNO-OMPHALODYMIA, see *Somatodymia*.

STERNOPA'GIA, from *στερον*, 'the breast bone,' and *παγω*, 'I fasten.' A monstrous union of fetuses, in which they are attached at the sternum.

STERNUM, *Sternum*, from *στερος*, 'solid,' *Pectus*, *Oss avær seu pectoris seu xiphoides seu gladioli seu ensiforme*, *Scutum cordis seu pectoris*, *Breast Bone*, *Hamal Spine* of Owen. An azygous symmetrical bone, situate at the forepart of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage — the xiphoid. It has an anterior or cutaneous surface, a posterior or mediastinal — a superior or clavicular extremity, and an inferior or abdominal. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Béclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4. *Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *enxi-sternal*.

STERNUMENTUM, Sneezing.

STERNUTAMENTORIA, *Achillea ptarmica*.

STERNUTAMENTUM, Sneezing.

STERNUTATIO, Sneezing.

STERNUTATOIRE, *Sternutatory*.

STERNUTATORY, *Sternutatoria*, from *sternutare*, *sternutatum*, 'to sneeze.' *Sternutamentum*, *Erri'num*, *Ptor'micum*, *Anarchi'num*, (F.) *Sternutatoire*, A substance which provokes sneezing; as tobacco, &c. — See *Errhine*.

STERTEUR, *Stertor*.

STERTOR, *Ronchus* or *Rhynchus*, *Renchus*, *Rhenus*, (F.) *Sterteur*, *Ronflement*, from *stertere*, 'to snore.' The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *stertorosa*, (F.) *Stertovens*; *Respiratio stertuosa* seu *stertens* seu *stertorosa*.

STERTOROUS, see *Stertor*.

STETHÆMIA, *Hyperæmia Pulmonum* seu *Pectoris*, *Congestio Pulmonum* seu *Pectoris*, (F.) *Hyperæmie* ou *Congestion des Pommons*; from

σθηθος, 'the chest,' and *αίμα*, 'blood.' *Hyperæmia* of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

STETHOCATHARSIS, *Expectoration*.

STETHOCHYSIS, *Hydrothorax*.

STETHODESMIS, *Corset*.

STETHODESMIUM, *Corset*.

STETHODESMUS, *Corset*.

STETHOMETER, from *σθηθος*, 'the chest,' and *μετρον*, 'measure.' An instrument, proposed by Dr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

Under the name *Thoracometer*, Dr. Sibson has described an instrument of his invention, which is employed with a similar view as the stethometer of Dr. Quain. — *Med. Chir. Transact.*, vol. xxxi.

STETHOPARALYSIS, *Paralysis nervorum thoracis*, *phrenicorum*, &c.; from *σθηθος*, 'the chest,' and *παράλυσις*, 'paralysis.' Palsy of the muscles of the chest.

STETHORRHEUMA, *Pleurodynia*.

STETHOSCOPE, *Stethoscopium*, *Stethoscopus*, *Echoscopus*, *Psophometer*, *Thoracoscopium*, from *σθηθος*, 'the chest,' and *σκοπεω*, 'I examine.' An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Stethoscopy*, *Stethoscopyia*, &c., is what Laënnec terms *Auscultation médiate*, *Mediate Auscultation*.

STETHOSCOPIA, see *Auscultation*, and *Stethoscope*.

STETHOSCOPIC, *Stethoscopicus*, (F.) *Stéthoscopique*. Same etymon as *Stethoscope*. Furnished by stethoscopy or auscultation, — as a 'stethoscopic sign.'

STETHOSCOPY, see *Stethoscope*.

STETHUS, *Thorax*.

STEW, *Stove*.

STHENIA, *Sten'ia*, *Diathesis sthenica*, *Status sthenicus*, *Vis acta*, from *σθενος*, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians, as well as *Asthenia*, — its antitheton. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, *Active*.

STHENOPYRA, *Synocha*.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIBIALISM, *Stibialis'mus*, from *stibium*, 'antimony.' The aggregate phenomena produced by antimonials, when given in large quantities:—antimonial intoxication or poisoning.

STIBIATUS TARTRIS LIXIVLÆ, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum —s. Deuto-murias sublimatus, Antimonium muriatum—s. et Potassæ deuto-tartras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitandum paratum, Algaroth—s. Oxodes album, Antimonium diaphoreticum—s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydi sulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum—s. Subhydrosulphas, Antimonii sulphuretum rubrum—s. Submurias præcipitandum paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum.

STIBIO-DERMIC, see Unguentum antimonii.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS ARABICA, *Lavendula stœchas*.

STICKWORT, Agrimony.

STICTA PULMONACEA, *Lichen pulmonarius*.

STIFF JOINT, MUSCULAR, Contractura.

STIFF JOINTS, Milk sickness.

STIFFNECK, Torticollicis.

STIGMA, Cicatrice.

STIGMATA, see *Nævus*. The breathing pores of insects are so called.

STIGMATA OVARIORUM, *Cicatrix Ovariorum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, Cosmetic.

STILL, Alembic.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, Epistaxis.

STILLBORN, (F.) *Mort-né*. Born still or lifeless,—dead born.

STILLICIDIUM, *Substillum*, from *stilla*, 'a drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly the urine—drop by drop. Also a kind of embrocation, *Stillicidium supra partem*, effected by dropping a liquid upon a part.

STILLICIDIUM LACRYMARUM, Epiphora—s. *Narium*, *Coryza*—s. *Sanguinis e naribus*, Epistaxis—s. *Supra partem*, see *Stillicidium*.

STILLIN'GIA, *S. sylvatica*, *Queen's Root*, *Queen's delight*, *Yaw root*, *Mar'cory*, *Cocksp hat*. An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst. Monœcia Monadelphia. Nat. Ord. Euphorbiacæ*. The root—*Stillingia*, Ph. U. S.—is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

STIMATO'SIS, *Stymatosis*, *Hæmorrhag'ia Penis*, *Stymatorrhag'ia*, *Phallorrhag'ia*, *Caulorrhag'ia*, from *στυμα*, 'priapism,' itself from *στυειν*, 'to erect.' Hemorrhage from the male organ, accompanied or not with priapism.

STIMMI, Antimonium.

STIMULANT, *Stim'ulans*, *Excitans*, *In'citans*, *Incentiv'um*, *Irritans*, *Excitant*, *Incentant*, *Hypersthenic*, *Pyretogenetic*, from *stimulare*, 'to goad.' A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffrisable*,—that is, have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimul'ation*, *Stimula'tio*, *Incenta'tio*.

The chief stimulants are the following: Æther Sulphuricus, Ammonia, Assæfœtida, Brucia, Camphora, Capsicum, Castoreum, Cinnamonum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinium, Nux Vomica, Olea Essentiaia, Opium (in small dose), Piper. Sinapis, Strychnia, Zingiber,—Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)

STIM'ULUS, 'a goad.' *Incentiv'um*, *Irritamentum*, *Irritamentum*, *Potentia Irritans*. Any thing which excites the animal economy.

STINE, Hordeolum.

STINK POKE, *Dracontium fœtidum*—s. Weed, *Chenopodium anthelminticum*, *Datura stramonium*, *Polanisia graveolens*.

STIPATIO, Stegosis.

STIPATIO TELE CELLULO'SÆ INFANTUM. Induration of the cellular tissue of children.

STIROSIS, Sterilitas.

STITCH, same root as *stick*, Sax. *reician*. (G.) *stecken*, (Sc.) *Stomd*, (Prov.) *Dag*, (F.) *Point*, (L.) *Punctum*; (from *pingere*, *punctum*, 'to prick or sting.') An acute lancinating pain, like that produced by the puncture of a sharp needle.

STITCH, COMMON, Suture, common—s. Royal, see Suture—s. in the Side, Pleurodynia.

STIZOLOBIUM, *Dolichos priuriens*.

STLENGIS, Stridor dentium.

STOBÆA RUBICAULIS. A South African plant, *Nat. Ord. Compositæ*. A tincture of the bruised roots is diuretic, and of great service in gravel.

STOCKING, LACED, (F.) *Bas lassé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STŒCHAS ARABICA, *Lavendula stœchas*.

STÆCHIOLOGY, *Stæchiolog'ia*, (F.) *Stæchiologie*; from *σταιχιον*, 'element,' and *λογος*, 'a discourse.' A treatise, or the theory, of elements; hence of the elementary parts of organized substances.

STOICHEION, Element.

STOMA, Mouth.

STOMACACÆ, *Stomacocacæ*, *Stomal'gia*, *Labisul'cium*, *Cheiloc'acæ*, *Uloc'acæ*, *Cheilomala'cia*, *Stomatoma*, *Stomatocero'sis*, *Cancer Ovis*, *Canker*, from *στωμα*, 'the mouth,' and *κακος*, 'evil.' Fœtor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquaticus*; see *Cancer Aquaticus*. Also, Scurvy.

STOMACACE, *Porphyra nautica*—s. *Gangrænosum*, *Cancer aquaticus*—s. *Universale*, *Purpura hæmorrhagica*.

STOMACAL, Stomachal.

STOMACALGIA, Cardialgia.

STOMACH, *Stom'achus*, *Ventriculus*, *Nedys*, *Anacœlia*, *Gaster*, *Glutn'pateus*, *Maw*, (of animals), (Sc.) *Kyte*, *Pechan*, (Prov.) *Warison*, (F.) *Estomac*, from *στωμα*, 'a mouth.' One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme.

When viewed externally, the stomach has. 1. An *anterior face*, which looks a little upwards. 2. An *inferior face*, directed downwards. 3. An *inferior or colic margin*, which is convex and extensive, and is called the *greater curvature*. (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A *superior or diaphragmatic margin*, which is shorter, concave, and is called the *lesser curvature*. (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left or œsophageal orifice*, called, also, the *cardia*. *Oes. ventriculi* or *upper orifice*. 6. A *right or intestinal, or inferior orifice*, called the *pylorus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature — the *great tuberosity* or *great cul-de-sac* or *fundus* of the stomach; and. 8. A less extensive dilatation, situate to the right of the greater curvature. — *The lesser tuberosity* or *lesser cul-de-sac*. *Antrum Pylori*. The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum. The middle coat is muscular,—some of its fibres running longitudinally; others, transversely, and others obliquely. The innermost membrane is of a mucous nature. *Crusta villosa ventriculi*, *Gastro-mycodermis*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner*. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

STOMACH CELL, see *Favulus*—s. *Disease*, *Limosis*.

STOMACH, FIRST, *Ingluvies*.

STOMACH PUMP, *Gastrenrchyta*, *Antli'a gastrica*, (F.) *Pompe pour l'estomac*. A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat,—the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach-tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

STOMACH, SECOND, *Proventriculus*—s. *Sick*, *Milk sickness*—s. *Third*, *Ventriculus cullosus*.

STOMACH TUBE, see *Tube*, *œsophageal*.

STOMACHAL, *Stomachic*, *Stomachical*, *Cardiacus*, *Stomachicus*, *Stomachalis*, *Visceralis*, (F.) *Stomacal*, *Stomachique*. That which belongs to the stomach; that which is good for the sto-

mach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, *Cardialgia*.

STOMACHI RESOLUTIO, *Dyspepsia*.

STOMACHIC, *Stomachal*.

STOMACHICAL, *Stomachal*.

STOMACHIQUE, *Stomachal*.

STOMACHUS, from *στομα*, 'mouth.' This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach, (see *Cardia*), and for the stomach itself. Hippocrates calls the neck of the bladder *στομαχος κστεως*; and the neck of the uterus *της μητρας στομαχος*.

STOMATOG'IA, *Stomatologia*, *Stomatodynia*, from *στομα*, 'mouth,' and *αλγος*, 'pain.' Pain in the mouth.

STOMAPYRA, *Aphthæ*—s. *Aphtha*, *Aphthæ*.

STOMATALGIA, *Stomalgia*.

STOMATEL'CIA, *Stomateleosis*; from *στομα*, *στοματος*, 'the mouth,' and *ελκος*, 'an ulcer.' Ulceration of the mouth.

STOMAT'IA, *Stomatopathia*; from *στομα*, *στοματος*, 'the mouth.' Disease of the mouth.

STOMAT'IC, *Stomat'icus*, from *στομα*, *στοματος*, 'mouth.' A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITE APHTHEUSE, *Stomatitis*, *aphthous*—s. *Charbonneuse*, *Cancer aquaticus*—s. *Conennense*, *Stomatitis*, *pseudo-membranous*—s. *Crèmeuse guttae*, *Aphthæ*—s. *Folliculaire*, *Stomatitis*, *aphthous*—s. *Gangreneuse*, *Cancer aquaticus*—s. *Mercurielle*, see *Salivation*, *mercurial*—s. *Ulcéreuse*, *Stomatitis*, *aphthous*.

STOMATIT'IS, from *στομα*, *στοματος*, 'the mouth,' and *itis*, denoting inflammation. (F.) *Inflammation de la Bouche*; Inflammation of the mouth.

STOMATITIS, APHTHOUS, *S. follicular* or *ulcéreuse*, *Em'phlysis Aphtha*, *A. Adultorum*, (F.) *Stomatite*, *S. aphthense* ou *folliculaire* ou *ulcéreuse*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

STOMATITIS, ERYTHEM'ATOUS. Simple inflammation of the mouth.

STOMATITIS, EXSUDATIVA, *Aphthæ*—s. *Follicular*, *S. aphthous*—s. *Gangrenous*, *Cancer aquaticus*—s. *Materna*, *Stomatitis* of nursing women.

STOMATITIS, MERCURIAL, *S. mercurialis*, *Hydragrogostomat'is*, *Hydragrogostomat'itis*. Inflammation of the mouth induced by mercury.

STOMATITIS OF NURSING-WOMEN, *S. Nutri'ennu* seu *Mater'na*, appears to be a variety of *S. aphthous*.

STOMATITIS NUTRICUM, *Stomatitis* of nursing-women.

STOMATITIS, PSEUDOMEMBRANOUS, (F.) *Stomatite conennense*, *Diphthérite buccale*, *Pseudo-membranous inflammation of the mouth*;—in its worst form, *Stomatyphus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen except in large foundling establishments.

STOMATITIS, ULCEROUS, *S. aphthous*—s. *Vesiculosa infantum*, *Aphthæ*.

STOMATOCACE, *Stomacæe*.

STOMATODYNIA, *Stomalgia*.

STOMATO-GASTRIC, *Stomato-gastricus*, *Stomogastric*, *Stomogastricus*, from *στομα*, *στοματος*, 'the mouth,' and *γαστρικ*, 'the stomach.' Appertaining to the mouth and stomach,—as the *stomato-gastric* ganglia of the lower animals. See *Encephalon* and *Nerves*.

STOMATOMALACIA PUTRIDA, Cancer aquaticus.

STOMATONECROSIS, Cancer aquaticus, Stomatocace.

STOMATONOMA, Stomatocace.

STOMATOPANUS, from *στομα*, *στοματος*, 'the mouth,' and *πανος*, 'a glandular tumour.' *Stomatophyma glandulosum*, *Panus Fan'cinn*. Tumefaction of the glands of the mouth.

STOMATOPHYMA, from *στομα*, *στοματος*, 'the mouth,' and *φυμα*, 'a swelling.' A swelling in the mouth.

STOMATOPHYMA GLANDULOSUM, Stomatopanus.

STOMATOPLAS'TIC, *Stomatoplas'ticus*; from *στομα*, *στοματος*, 'the mouth,' and *πλασσω*, 'I form.' An epithet for the operation of forming a mouth, where the aperture has been contracted from any cause. *Stomatoplas'ty*.

STOMATORRHAG'IA, *Stomatorrhœ'a*, *Hæmorrhag'ia oris seu fan'cinn*, *Sanguinis profusivum ex Or'e*, *Hæmorrhoides Oris*, *Stomato'sis*, *Hæmorrhag'ia*, (F.) *Hæmorrhagie buccale*, from *στομα*, *στοματος*, 'the mouth,' and *ρηννμι*, 'I break out.' Hemorrhage from the mouth.

STOMATORRHAGIA ALVEOLORUM, Phatnorrhagia — s. *Gingivarum*, Ulorrhagia.

STOMATORRHEA, Stomatorrhagia.

STOMATOSCOPE, from *στομα*, *στοματος*, 'mouth,' and *σκοπεω*, 'I view.' Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum oris*.

STOMATOSEPSIS, Cancer aquaticus.

STOMATOSIS, Stomatorrhagia.

STOMATOSPASMUS, Trismus.

STOMATYPHIUS, Stomatitis, pseudomembranous.

STOMENCEPHALUS, Stomoecephalus.

STOMOCEPH'ALUS, *Stomoeceph'alus*, (F.) *Stomoecephale*, *Stomoecephale*; from *στομα*, 'mouth,' and *κεφαλη*, 'head.' A genus of monsters, having two contiguous eyes, or a double eye occupying the median line; the nasal apparatus atrophied and forming a tube (*troupe*); the jaws rudimentary; and the mouth imperfect or wanting.—I. G. St. Hilaire.

STOMOMANICON, *Platysma myoides*.

STOMORRHAGIA, Stomatorrhagia.

STONE IN THE BLADDER, *Calculi vesical* — s. *Binder*, *Osteocolla* — s. *Crop*, *Sedum* — s. *Crop*, biting, *Sedum* — s. *Mint*, *Cunila mariana* — s. *Pock*, *Aene* — s. *Root*, *Collinsonia Canadensis*.

STONES, THE, Testes.

STOOL, Dejectio.

STOOL, CALOMEL, see *Calomel*.

STORAX, *Styrax* — s. *Liquida*, *Liquidambar styraciflua*.

STOREY'S WORM CAKES. An empirical preparation, formed of *calomel* ℞j, *jalap* ℞j, *zingib.* ℞ij, *sacch.* ℞j, *cinnab. antim.* q. s. to colour them: *synrup. simpl.* q. s. to make into cakes.

STORKBILL, *Geranium maculatum*.

STOUND, *Stitch*.

STOVE, *Estuaf'rium*, *Stupha*. Old French, *Estuve*; a *Stew*, (F.) *Étuve*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry*, (F.) *sèche*. The latter, which is used by the Turks, is the *Lacon'icium* or *Calid'rium* of the Romans. The former is their *Tepid'arium* or *Vapora'rium*. These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

STRABI, see *Strabismus*.

STRABILISMOS, *Strabismus*.

STRABISMUS, *Strabilis'mos*, *Parop'sis Stra-*

bismus, from *στραβος*, 'twisted,' 'one who squints;' *Strabos'itos*, *Loxophthol'mus*, *Distor'sio*, *Lus'citus*, *Illo'sis*, *Illo'sis*, *Helo'sis*, *Squinting*, *Cross eye*, (Prov.) *Doyle*, *Gleeing*, (Sc.) *Skellie*, *Skeely*, (F.) *Strabisme*, *Vue lonche*, *Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single*, or affect one eye only, or *double*, and it may be *convergent* or *divergent*.

Those affected with Strabismus are called *Strabi*, *Strab'ones*, *Strab'oni*, *Srebbi*, *Illo*, *Illo'ides*, *Squint'ers*, *Squint-eyed*, (Sc.) *Gleyed*, (F.) *Louches*, *Bigles*. A slight deviation is generally called a *Cost* in the *Eye*, and, sometimes, a *Cock-eye*.

STRABISMUS, CONVERGENT, see *Strabismus*—s. *Divergent*, see *Strabismus*—s. *Double*, see *Strabismus*—s. *Single*, see *Strabismus*.

STRABONES, see *Strabismus*.

STRABONI, see *Strabismus*.

STRABOSITAS, *Strabismus*.

STRABOTOMY, *Strabotom'ia*, from *στραβος*, 'one who squints,' and *τομη*, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

STRAE-DEATH, see *Death*.

STRAIN, Sprain.

STRAIN, *colare*, (F.) *conler*, from *σπραγγεν*, *stringere*, (F.) *estreindre*, 'to constrict or squeeze.' To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, *Nisus*.

STRAITS OF THE PELVIS, see *Pelvis*.

STRAMOINE, *Datura stramonium*.

STRAMONIA, *Datura stramonium*.

STRAMONIUM, *Datura stramonium*—s. *Fœtidum*, *Datura stramonium*—s. *Majus album*. *Datura stramonium* — s. *Spinosum*, *Datura stramonium* — s. *Vulgatum*, *Datura stramonium*.

STRANGL'IDES, from *σπραγγω*, 'I compress.' Small, hard tumours, which form, as in the breast when the milk does not find issue.

STRANGALION, Tubercle.

STRANGALIS, Tubercle.

STRANGALISMUS, *Strangulation*.

STRANGERS' FEVER, see *Fever*, *strangers'*.

STRANGULATIO, *Orthopnoea*, *Strangulation* — s. *Uterina*, *Angone*. — s. *Vulvæ*, *Hysteria*.

STRANGULA'TION, *Strangula'tio*, *Phix*, *Pnig'mos*, *Strangalis'mus*, (F.) *Étranglement*, *Strangulation*. From *σπραγγω*, 'I constrict or squeeze.' State of a part too closely constricted. Thus we say that there is *strangulation* of an in-

testinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine*, it means the forcible obstruction of the air passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lycoides.

STRANGURIA, Enuresis—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury—s. *Menstruelle*, Dysmenorrhœa.

STRANGURIOUS; same etymon as the next. Affected with, or of the nature of, strangury.

STRANG'URY, *Strang'uria*, *Par'uria stillatitia*, from *σπρῆγγειν*, 'to squeeze,' and *οὐρον*, 'urine?' *Dys'uria*, *Uri'næ Stillitid'ium seu Substillina*, (F.) *Strangurie*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRAPPING, WATER, see Water-dressing—s. Wet, see Water-dressing.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, *Achillea millefolium*.

STRATUM BACILLATUM, see Tunica Jacobi—s. Corneum, Epidermis—s. Malpighii, Corpus mucosum—s. Pigmenti, see Choroid—s. Proligerum, Proligerous disc.

STRAWBERRY, *Fragaria*—s. Bush, *Euonymus Americanus*—s. Shrubby, *Rubus arcticus*—s. Tree, *Euonymus Americanus*—s. Wild, *Fragaria Virginiana*.

STREAK, PRIMITIVE, Groove, primitive.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, see Strabismus.

STREBLOSIS, Luxation.

STREMMMA, Luxation, Sprain.

STREPITUS MORBUS, 'Noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS AURIUM, Tinnitus aurium.

STRETCHING, Pandeuction.

STRIE, Vileices—s. Ciliales, Ciliary processes—s. Corneæ, *Tenia semicircularis*—s. Longitudinales Lancisii, see Corpus callosum—s. Medullares, see Processes teretes—s. Retinæ subjectæ ligamento ciliari, Halo signatus—s. Semilunares, *Tenia semicircularis*—s. Terminales, *Tenia semicircularis*—s. Transversales Willisii, see Corpus callosum.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, *Cannelé*, Grooved, see Corpora striata.

STRIBILIGO, Efflorescence.

STRICTURA, Stricture—s. Ani, Stricture of the rectum—s. Intestini recti, Stricture of the rectum—s. Intestini recti spasmodica, Stricture of the rectum, spasmodic—s. Œsophagi callosa, *Dysphagia constricta*—s. Œsophagi spasmodica, *Dysphagismus*—s. Pharyngis seu Œsophagi vera, *Dysphagia constricta*—s. Præputii, Phimosi—s. Urethrae, Urethrostenosis—s. Ventriculi, Stricture of the stomach.

STRICTURE, *Strict'ura*, from *stringere*, *strictum*, 'to tie hard.' *Coarctatio*, *Steno'sis*, (F.) *Rétrécissement*. A diminution or contracted con-

dition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, *Dysphagia constricta*—s. of the Pharynx, *Dysphagia constricta*.

STRICTURE OF THE RECTUM, SPASMODIC, *Strict'ura Intestini Recti spasmod'ica*, *Obstr'ctio Recti spast'ica*. An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

Stricture of the rectum, *Strict'ura Ani seu Intestini Recti*, *Archostegno'ma*, *Rectostenosis*, *Euthyenterostenoma*, *Archostegno'sis*, *Archostenosis*, *Proctoœnch'is*, *Anguati'tio* et *Restrict'io intestini recti seu ani*, *Stenochord'ia intestini recti*, *Procto-steno'sis organ'ica*, occurs also organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE STOMACH, *Gastrosteno'sis*, *Coarctatio seu Strict'ura ventriculi*. See Gastrostenosis cardinca, &c.

STRICTURE OF THE URETHRA, Urethrostenosis—s. of the Urinary bladder, Cystostenochoria—s. Vesicæ urinariæ, Cystostenochoria.

STRIDOR DENTIIUM, *Brygmus*.

STRIGA CARTILAGINOSA CORDIS, Isthmus of the fossa ovalis.

STRIGIL, *Strig'ilis*, *Sten'gis*, *Stelen'gis*. A flesh-brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STRIPED MUSCULAR FIBRE, see Muscular fibre.

STROBILITITES, from *στροβίλος*, *stro'bilus*, 'a cone of the pine,' Wine impregnated with the cones of the pine.

STROEMIA, Cadaba.

STROKE, APOPLECTIC. An apoplectic seizure.

STROKE, BACK, OF THE HEART, Impulse, diastolic.

STROKE, PARALYTIC. A sudden attack of encephalo-spinal paralysis.

STROMA, *Strag'ulum*, *Strawentum*; *στρομα*, 'a bed or couch,' from *σπρῶννω*, *σπρῶννυρι*, 'to spread out; to cover.' The bed or foundation-texture of an organ,—as the stroma of the ovary. Applied, also, to the bed or base of any deposit—as the 'amorphous stroma' of serofulous deposits.

STROMBULCUS, Forceps (bullet.)

STRONGLE, *Strongylus*—s. *Géant*, *Strongylus gigas*.

STRON'GYLUS, from *στρογγυλος*, 'round.' Hippocrates, Chabert, and others, mean the *Ascaris lumbricoides* by this term. The *Strongylus Gigas*, *Eustron'gylus gigas*, *Ascaris viscera'lis* seu *ren'lis*, *Ensa'ria viscera'lis* et *ren'lis*, (F.) *Strangle*, *S. géant*, is, however, distinct. It has an obtuse, flat head; mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

STRONGYLUS, Teres.

STROPHOS, Tormina.

STROPHULE, *Strophulus*.

STROPH'ULUS, *Lichen'ania stroph'ulus*, *Ebullit'io*, *Evant'hemia seu Ero'nia strophulus*, *Red Gum*, *Red Gown*, *Tooth Rash*, *White Gum*, *Milk-spots*, (F.) *Strophule*, *Fene de dents*. It consists of an eruption of red, or sometimes

whitish pimples, occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seem at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species, — *Strophulus intertinctus*, Red gum or gown; *S. albidus*, white gum; *S. confertus*, rank red gum, Tooth rash; *S. volatilis* or *Erythema volaticum*, and *S. can didus*.

STROPHULUS SYLVESTRIS, Ignis sylvaticus—s. Volaticus, Ignis sylvaticus.

STROPHUS, Tormina.

STRUCTIO, Structura.

STRUCTURAL; same etymon as the next. Of, or belonging to, structure.

STRUCTURE, *Structura*, *Structio*, *Conformatio*, *Catascenē*, from *struere*, *structum*, 'to build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed. See Tissue.

STRUMA, Bronchocele, Scrofula.

STRUMA ADIPOSA, *Obesitas colli*. Fatty neck. Prominence of the neck from obesity.

STRUMA FUNGOSA, Encephaloid.

STRUMES, Scrofula.

STRUMEUX, Scrofulous.

STRUMOSIS CEREBRI, Encephalophymata—s. Pulmonum, Tubercles of the lungs.

STRUMOSUS, Scrofulous.

STRUMOUS, Scrofulous.

STRUTHIOPHAGUS, from *στροθιον*, 'a young ostrich,' and *φαγω*, 'I eat.' Struthiophagous tribes still exist in some parts of Africa.

STRUTHIUM, Saponaria.

STRUVE'S LOTION FOR HOOPING-COUGH, see Lotion, Struve's, for hooping-cough.

STRYCHNIA, *Strychnia*, *Strychnine*, *Strychninum*, *Strychnum*, *Vanqueline*, *Tellanine*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been found in *Strychnos nux vomica*, *S. Colubrina*, *S. Tienté*, *Ignatia amara*, *Cerbera Thevetia*, and *C. Aohuai*. (*Nucis vomica*. rasur. ÷iv: calcis pulv. ʒvj: acid. muriat. fʒij; alcohol, acid. sulphuric. dil., liquor. ammonia, carbon. animal. purif., aqna, āā q. s. Digest the nux vomica in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors, and distil off the alcohol by means of a water-bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The ac-

tion—therapeutic and toxicol of strychnia on man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the nux vomica. Dose, one-sixteenth to one-twelfth of a grain.

STRYCHNIA, ACETATE OF, *Strychnia acetat*—s. Hydriodate of, *Strychnia hydriodas*—s. Iodate of, *Strychnia iodas*—s. Iodide of, *Strychnia hydriodas*.

STRYCHNIA, I'ODIDE OF IODHYDRATE OF. (F.) *Iodure d'Iodhydrate de Strychnine*. is made by pouring a solution of ioduretted iodide of potassium into a solution of a salt of strychnia: treating the precipitate with boiling alcohol, and crystallizing. Used in the same cases as strychnia. Dose, a tenth to a sixth of a grain.

STRYCHNIA, MURIATE OF, *Strychnia murias*—s. Nitrate of, *Strychnia nitras*—s. Sulphate of, *Strychnia sulphas*.

STRYCHNIA AND ZINC, DOUBLE IODIDE OF, Zinc and Strychnia, double iodide of.

STRYCHNIA ACETATE, *Strychninum* seu *Strychninum acetatum*, *Acetas strychnii* seu *strychniens*, *Acetate* of *Strychnia* or *Strychnine*. This salt is formed by the direct combination of strychnia with acetic acid. It is given in the same cases as pure strychnia.

STRYCHNIA HYDRIODAS, *S. iodhydricas*, *Strychninum hydroiodicum*, *Hydriodas* seu *Iodhydricas strychniens*, *Hydriodate* or *Iodide* of *Strychnia*, is prepared by mixing a solution of iodide of potassium with a concentrated solution of acetate of strychnia.

STRYCHNIA IODAS, *Strychnia iodas*, *Strychnina Iodata*, *Strychninum* seu *Strychninum Iodicum*, *Iodas Strychnii* seu *Strychniens*, *Iodate* of *Strychnia* or *Strychnine*. This salt may be formed by adding a concentrated solution of iodide acid to strychnia; treating with boiling alcohol; filtering, and leaving it to spontaneous evaporation.

STRYCHNIA MURIAS, *Muriate* of *Strychnia*. (The product of the union of muriatic acid and strychnia.) Used in the same cases as strychnia.

STRYCHNIA NITRAS, *Strychninum nitricum*, *Nitrate* of *Strychnia* or *Strychnine*, (F.) *Nitrate* on *Azotate* of *Strychnine*. (The product of the union of nitric acid and strychnia.) Used in the same cases as strychnia.

STRYCHNIA SULPHAS, *Strychninum sulphuricum*, *Sulphate* of *Strychnia* or *Strychnine*. Has the same properties.

STRYCHNINA, Strychnia.

STRYCHNINE, Strychnia—s. Azotate of, Strychnia nitras.

STRYCHNINUM, Strychnia.

STRYCHNINISM, see Strychnos nux vomica.

STRYCHNIUM, Strychnia—s. Aceticum, *Strychnia acetat*—s. Nitricum, *Strychnia nitras*—s. Sulphuricum, *Strychnia sulphas*.

STRYCHNOS, *Solanum dulcamara*—s. Colubrina, see Strychnia, and *S. Nux vomica*—s. Guianensis, see Curare—s. Ignatii, *Ignatia amara*.

STRYCHNOS NUX VOMICA, *Nux Vomica*, *Metella*, *Contram*, *Koochla tree*. Nat. Ord. Loganiaceae. *Sex. Syst.* Pentandria Monogynia. (F.) *Vomiquier*. A tree of the family *Strychnoides*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica*, *Vomic* or *Poisson vert*, *Bachelors' buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but subsequently an alcoholic extract was prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *Alcoholic Extract*, *Extractum nucis*

comica spirituosum seu nucis comica resinosa seu nucis comica alcoholicum, (F.) *Extrait alcoolique de noix comique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhoea and dysentery. When taken to such an extent as to induce toxical phenomena — *Strychnium* — it causes, at first, or when given in a smaller dose, greatly augmented excitability of the spinal nervous system, with slight transient paroxysms of spasms of the limbs, and hurried respiration. In larger doses, the excitability is still more developed, with paroxysms of prolonged general tetanic convulsions, laryngismus or contraction of the glottis, violent efforts of respiration, apoplexy, and asphyxia.

The following is the formula for the preparation of the *EXTRACTUM NUCIS VOMICÆ* of the Pharm. U. S. Take of *Nux vomica*, ℞j; *Alcohol*, a sufficient quantity. Expose the *Nux vomica* to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The bark is the *false angustura* or false *cusparia bark*; *Rohou*. See *Brechea antilyserientica*.

The wood of *STRYCHNOS COLUBRINA*, *Modira caniram*, an Indian tree, which contains strychnia, was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave in intermittents. It is the *Lignum Colubrinum*, (F.) *Bois de Couleuvre*.

Under the names *στρογγη*, and *στρογγος*, different kinds of nightshade are described by Dioscorides.

STRYCHNOS IGNATI, *Ignatia amara*.

STRYCHNOS POTATIFORM, *Clearing nut*. The fruit of a large tree of Silhet, which, when ripe, is sold in the markets of India, and has been introduced into those of London, under the name *Niraullea* or *Nirmillies*. One of them is well rubbed for a minute or two around the inside of a vessel containing water, which it purifies by causing the impurities, which the fluid contains, to be deposited through its albumen and casein it is supposed.

STRYCHNOS PSEUDOQUINA, *Quina do Campo*, of Brazil, is used by the natives as a substitute for cinchona.

STRYCHNOS TIEUTÉ, see *Strychnia*, and *Upas* — s. *Toxicaria*, see *Toxifera*, and *Curare*.

STRYPHNA, *Astringents*.

STRYPHINOS, *Acerb*.

STUDIOSUS MEDICINÆ, *Philiatros*.

STUDIUM INANE, *Aphelxia otiosa*.

STUDY, *BROWN*, *Aphelxia otiosa*.

STUFF, see *Medicament*.

STUFFING, *Cynanche trachealis*.

STULTITIA, *Fatuitas*.

STUMP, (G.) *Stumpf*. (D.) *Stomp*, 'a stump;' also, 'blunt.' (F.) *Moignon*. The part remaining from which a limb or other part has been amputated or removed in any manner. Also, the portion of a tooth remaining in the alveolus, after the corona has been removed, (F.) *Chicot*.

STUMPFoot, *Kyllosis*.

STUNNED. Old French, *Estonné*. (F.) *Étonné*, (L.) *attonitus*, 'astonished.' An epithet, applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, *στυπη*, *Stupha*, *Stuppa*, *στυπη*, *Stupéon*. Tow, used in certain surgical apparatuses

and dressings, (F.) *Étoupe*. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe*. The act of applying such stupe is called *staping*.

STUPE, *Stupa*.

STUPEFACIENTIA, *Narcotics*.

STUPEFACTIFS, *Narcotics*.

STUPEFACTIO, *Narcosis*.

STUPEFIANTS, *Narcotics*.

STUPEION, *Stupa*.

STUPEUR, *Stupor*.

STUPHA, *Stove*, *Stupa*.

STUPIA, *Tin*.

STUPIDITAS, *Idiotism*, *Imbecility*.

STUPING, see *Stupe*.

STUPOR, *Eplexia*, *Eplexia*, *Consternatio*, (Sc.) *Swarf*, *Swarf*, (F.) *Stupeur*, from *stupere*, 'to be stupefied.' Diminished activity of the intellectual faculties, often amounting to lethargy. It occurs in many affections, especially in the neuroses.

STUPOR, *Narcosis* — s. *Artium*, *Obdormitio* — s. *Dentium*, *Hæmodia* — s. *Formicans*, *Formication* — s. *Mentis*, *Fatuitas* — s. *Vigilans*, *Catalepsy*.

STUPPE, *Stupa*.

STUPRATION, *Stuprum*.

STUPRUM, *Rape*, *Stupratio*, (F.) *Défloration*, *Viol*. Forceful and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Défloration*, *Défloratio*, *Devirginatio*, *Vitatio*, *Apanthismus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine, — if signs of virginity no longer exist, — whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time.

STUTTERING, *Balbuties*.

STYAN, *Hordeolum*.

STYE, *Hordeolum*.

STYGMATES. M. J. Cloquet has proposed this word, or *Stigmates*, from *στυγμα*, 'a mark,' to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of a hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro-cartilaginous nature.

STYLET, *Speillum*.

STYLI, *Styloid processes*.

STYLIFORM, *Styloid*.

STYLO, in composition, relating or belonging to the styloid process of the temporal bone.

STYLO-CERATOIDES, *Stylo-hyoideus* — s. *Cerato-hyoideus*, *Stylo-hyoideus*.

STYLO-CHONDRO-HYOÏDEUS. A name given, by Douglas and Albinus, to a fleshy fasciculus which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoïdes varius*, *Stylo-hyoïdes alter*.

STYLO-GLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before: is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLO-HYOÏDEUS, *Stylo-cer'ato-hyoïdeus*, *Stylo-ceratoïdes*, *Stylo-hyoïdes major*, (F.) *Stylo-hyoïdien*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow, — especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

STYLO-HYOID LIGAMENT is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

STYLO-HYOID NERVE is the second branch given off by the facial nerve.

STYLOID, *Styliform*, *Styloïdes*, *Graphioïdes*, *Graphoïdes*, *Graphoïdes*, *Graphidoïdes*, *Belonoïdes*, from *στυλος*, 'a style,' 'a peg,' 'a pin,' and *ειδος*, 'shape.' Shaped like a peg or pin.

STYLOID CORNUA, see Hyoides os.

STYLOID PROC'ESSES, *Pencil-like Processes*, *Processes Belvoïdes* seu *Belemnoïdes* seu *Belonoïdes* seu *Graphioïdes* seu *Graphoïdes*, *Styli*, are, 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoïdeus muscles, and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYLO-MASTOID, *Stylo-mastoïdeus*. That which relates to the styloid and mastoid processes.

STYLO-MASTOID ARTERY arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semi-circular canals; and terminates by anastomosing with a branch of the *Arteria meningæa media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylo-mastoid*—to the posterior auricular artery itself.

STYLO-MASTOID FORAMEN, *Foramen Stylo-mastoïdeum* seu *Aqueductus Fallopii*, (F.) *Trou anonyne*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLO-MAX'ILLARY, *Stylo-maxilla'ris*. That which relates to the styloid processes and jaw.

The **STYLO-MAXILLARY LIGAMENT** is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

STYLO-PHARYNGEUS, (F.) *Stylo-thyro-pharyngien*. A muscle, situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

STYLOPH'ORUM DIPHYL'LUM, *Meconopsis diphylla*, *Chelido'nium diphyllum*, *Celandine* or *Horn Poppy*, *Bruse root*. An indigenous plant, of the family *Papaveraceæ*, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel: and has been applied externally to contusions. &c.

STYLO-THYRO-PHARYNGIEN, *Stylo-pharyngiens*.

STYLUS, Sound.

STYLUS EXCAVATUS, *Specillum excavatum*, A hollow sound.

STYMA, Erection, Priapismus.

STYMATOSIS, Stomatosis.

STYMATATA, from *στυμμα*, *στυμμαρος*, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

STYPSIS, Astriction, Constipation.

STYPTERIA, Alumen, Styptics.

STYPTIC, see Styptics.

STYPTIC, BINELLI'S, *Aqua Binellii*—s. Brocchieri's, *Aqua Brocchierii*.

STYPTIC, EATON'S. A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of calcined green vitriol, ζij ; *proof spirit*, tinged with a little oak bark, Oij.

STYPTIC, HELVETIUS'S, see *Ferrum tartarizatum*, and *Styptic*, Eaton's.

STYPTIC, PAGLIARI'S, *Hæmostatic*, *Pagliari's*.

STYPTIC, RUSPINI'S, *Liquor Stypticus Ruspini*. A nostrum, said to consist of gallic acid, a small quantity of sulphate of zinc and opium, dissolved in a mixture of alcohol and rose-water, which has had much reputation as an internal and external astringent.

STYPTICS, *Contrahentia*, *Constrictiva Medicamenta*, *Constringentia*, *Anastaltica*, *Catastaltica*, *Stypteria*, (F.) *Styptiques*, from *στυπω*, 'I constringe.' Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage, — *Emæmon*. A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, *mechanically*, in it. A *chymical styptic* is one which coagulates, *chymically*, the blood around a bleeding orifice.

STYRAC'INUM O'LEUM. Oil obtained by boiling storax in good olive oil.

STYRAX, *στυραξ*. A resin obtained from *Styrax officinalis* and *S. calami'ta*. It is the *solid storax*; — *official storax*. There are two kinds of storax met with: 1. *Red Storax*, *Gum Storax*, *Thes Judæorum*, *Styrax rubra*, *Styracis balsamum*, *Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and perhaps from the *Liquidambar Orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax*, *Styrax calami'ta*. That which has been received in reeds or vessels, and has had saw-dust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

PURIFIED STORAX, *S. colata* seu *purificata*, *S. præparata*, *Extractum styracis*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence. — Ph. U. S. Dose, gr. x to xxx.

STYRAX ALBA, see *Myroxylon Peruiferum* — s. Benzoin, see Benjamin — s. Calamita, see *Styrax* — s. *Liquida*, *Liquidambar styraciflua* — s. *Officinalis*, see *Styrax*.

STYSIS, Erection, Priapismus.

SUAVEOLENS, Beneolens.

SUB. A common Latin prefix, often signifying 'beneath,' or 'a lower degree.'

SUBACIDUS, Acidulous.

SUBAC'TIO, *Chiro'sis*, *Cheiro'sis*, from *subigo*, *subactum*, (*sub*, and *ago*), 'to subject, to prepare.' The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

SUBAFFECTIO, *Hydropathia*.

SUBAGITATRIX, *Tribade*.

SUB-ATLOÏDEUS, *Infra-atloïdeus*, (F.) *Sous-atloïdien*. That which is situate beneath the

atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUB-AXOÏDEUS, *Infra-axoïdeus*, (F.) *Sous-axoïdien*. That which is below the *axis* or *vertebra dentata*. Chaussier has given this name to the third pair of cervical nerves.

SUBAZOTAS BISMUTICUS, Bismuth, subnitrate of.

SUBBORAS NATRICUM, Borax.

SUBCARTILAGINEUM, Hypoehondræ.

SUBCLAVIAN, *Subclavicus*, *Subclavicula'ris*, from *sub*, and *clavis*, 'the clavicle.' That which is under the clavicle.

SUBCLAVIAN ARTERIES, (F.) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scæleni muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral and inferior thyroidal*. 2. *Downwards*, the *interval mammary and superior intercostal*. 3. *Outwards*, the *transverse cervical or posterior scapular, the superior scapular, and the posterior cervical or profunda*.

SUBCLAVIAN or SUBCLAVIUS MUSCLE, *Subclavicus*, (F.) *Costo-claviculaire* (Ch.), *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

SUBCLAVIAN VEINS, (F.) *Veines sous-clavières*, are continuations of the axillary, and extend from the inferior extremity of the scælenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

SUBCLAVIC'ULA, from *sub*, and *clavicula*, 'the clavicle.' The first rib.

SUBCLAVICULARIS, Subclavian.

SUBCLAVIUS, Subclavian muscle.

SUBCRUEN'TUS, 'somewhat bloody;' from *sub*, and *cruentus*, 'bloody;' *Hypæ'mon*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆI, see *Cruræus*.

SUBCUTANEOUS, *subcutaneus*, from *sub*, and *cutis*, 'the skin;' *Intercutaneus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

SUBCUTANEOUS SECTION, Hypodermatomy.

SUBCUTANEUS COLLI, Superficialis colli—s. Male (Nervus), Orbital nerve.

SUBDELIRIUM, Typhomania.

SUBDITA, *Subditiv'ia*, from *subdere*, (*sub*, and *dare*), 'to put under;' *Pros'theta*. Medicines introduced into some one of the natural apertures:—as suppositories, pessaries, &c.

SUBDITITIA, Subdita.

SUBDUCTIO, Dejection.

SUBER, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*, (F.) *Liège*. Family, Amentacææ. Ser. Syst. Monœcia Polyandria. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

SUBETHI, Coma.

SUBFRONTA' LIS SUTU'RA, from *sub*, and *frons*, *frontis*, 'the forehead.' A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

SUBGRONDATIO, Depression.

SUBIUMERATIO, Catonismus.

SUBIGITATRIX, Tribas.

SUBINFLAMMATIO, Subinflammation—s. Hepatis, Hepatitis, ebronæ.

SUBINFLAMMATIO, *Subinflammatio*, from *sub*, and *inflammatio*. *Inflammationis*, *Hypophlegmasia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. There are, however, no such vessels. Lymphatic engorgements, serofula, herpes, and cancer be considered subinflammations.

SUBINTRAN'TES FEBRES, from *sub*, and *intrare*, 'to enter.' *Communiqu' tes febres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

SUBJECTIVE SENSATIONS, see Sensation.

SUBJEE, Bangue.

SUBLIGACULUM, Truss.

SUBLIGATURA, Truss.

SUBLIMENTUM, Emœorema.

SUBLIMATE, CORROSIVE, Hydrargyri oxymurias.

SUBLIMATION, *Sublimatio*, *Meteorismus*, *Hypso'sis*, from *sublimis*, 'exalted.' An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c. are commonly obtained by sublimation. The product of sublimation is a *Sub'imate Sublimatum*, (F.) *Sublimé*.

SUBLIMATUM CORROSIVUM, Hydrargyri oxymurias.

SUBLIMATUS CORROSIVUS, Hydrargyri oxymurias.

SUBLIME, Sublimis.

SUBLIMÉ, Emœorema, Sublimate—s. *Corrosif*, Hydrargyri oxymurias.

SUBLIMIS, (F.) *Sublimis*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term *respiration subline* for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the alæ nasi at the time of inspiration.

SUBLINGUA, Uvula.

SUBLINGUAL, *Sublingualis*, (F.) *Souslingual*, from *sub*, and *lingua*, 'the tongue.' That which is seated under the tongue.

SUBLINGUAL ARTERY, with some, is the *Lingual*. With others, it is a branch given off by the lingual opposite the genio-glossus muscle, which is distributed particularly to the sublingual gland, to the mylo-hyoid, and genio-glossus muscles, &c.

SUBLINGUAL GLAND, *Glandula sublingualis* seu *Bartolini'na* seu *Rivini'na*, is seated in the substance of the inferior paries of the mouth,

beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts — *Ductus Riviniani* seu *Waltherianus*—some of which open beneath the frænum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

SUBLINGUIUM, Uvula.

SUBLINGUIUM, Epiglottis.

SUBLOBULAR, *Sublobularis*; from *sub*, and *lobus*, 'a lobe,' *lobulus*, 'a little lobe.' That which is placed under a lobe.

SUBLOBULAR VEINS OF THE LIVER. The veins in which the intra-lobular veins terminate. By their union, the sublobular veins form the hepatic veins.

SUBLUXATIO, Sprain.

SUBMAMMARY, *Submammaris*, (F.) *Sous-mammaire*, from *sub*, and *mamma*, 'the breast.' Under the mamma or breast:—hence, 'submammary inflammation,' inflammation of the areolar tissue beneath the mamma.

SUBMAXILLARY, *Submaxillaris*, *Infra-maxillaris*, (F.) *Sous-maxillaire*, from *sub*, and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

SUBMAXILLARY GANGLION is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

SUBMAXILLARY GLAND, *Maxillary Gland*, *Hypogonath'aden*, *Hyposial'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum linguæ, by a very small orifice. It is also called *Ductus inferior*.

SUBMENTAL, *Submentalis*, (F.) *Sousmental*, from *sub*, and *mentum*, 'the chin.' Situate under the chin.

SUBMENTAL ARTERY is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoidicus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

SUBMENTAL VEIN, which accompanies the artery, opens into the labial.

SUBMERSION, *Submersio*, from *sub*, and *mergere*, *mersum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid.

Asphyxia by *submersio*, *A. Immersorum*, *Drowning*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

SUBMISSIO, Remission — s. *Cordis*, *Systole*.

SUBMU'COUS, *Submu'cus*; from *sub*, and *mucus*. Under a mucous membrane,—as the 'submucous areolar tissue.'

SUBMURIAS AMMONIACO-HYDRARGYRICUS, *Hydrargyrum præcipitatum*.

SUBMUSCULAR, *Submuscularis*; from *sub*,

and *musculus*, 'a muscle.' Seated beneath muscles or a muscular layer.

SUBOCCIPITAL, *Suboccipitalis*; from *sub*, and *occiput*. That which is situated under the occiput.

SUBOCCIPITAL NERVE, Occipital nerve.

SUBORBITAR, *Suborbitarius*, *Infra-or'bitar*, *Infra-or'italis*, *Infra-orbitarius*, (F.) *Sous-orbitaire*, from *sub*, and *orbita*, 'the orbit.' That which is seated beneath the orbital cavity.

SUBORBITAR ARTERY, *Infra-orbitar A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

SUBORBITAR CANAL, *Infra-orbitar Canal*, (F.) *Canal ou Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen-infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

SUBORBITAR FISSURE, *Infra-orbitar Fissure*, *Fissura infra-orbitalis*, *Rima canalis orbitarii*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

SUBORBITAR FOSSA, Canine fossa.

SUBORBITAR NERVES, *Infra-orbitar Nerves*, seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments*, *inferior* or *labial*, *internal* or *nasal*, and *external* or *buccal*.

SUBPERITONEAL, *Subperitonealis*; from *sub*, and *peritoneum*. That which lies under the peritoneum.

SUBPERITONEAL APONEUROSIS, Fascia, subperitoneal — s. *Ganglia*, see *Spermatic ganglion*.

SUBPLACENTA, *Decidua membrana*.

SUBPOPLITEUS, *Popliteus muscle*.

SUBPUBIC ARCH, *Arcus subpubicus*, from *sub*, and *pubis*. A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

SUBPUBIC MEMBRANE, Obturator membrane.

SUBPUBIO-FEMORALIS, *Abductor brevis* — s. *Prostatius*, *Compressor prostatae*.

SUPPURATIO, Suppuration.

SUBPUTRIS, *Hyposaprus*.

SUBSCAPULAR, *Subscapularis*, (F.) *Sous-scapulaire*, *Sous-scapulo-trochiiien*, from *sub*, and *scapula*, 'the shoulder-blade.' That which is beneath the scapula.

SUBSCAPULAR FOSSA, *Fossa Subscapularis*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

SUBSCAPULAR MUSCLE, *Subscapularis Musc'le*, *Innersus*, *Infra-scapularis*, (F.) *Sous-scapulo-trochiiien* (Ch.), *Porte-feuille*, *Muscle-sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

SUBSCAPULAR NERVES are two in number.

One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subserous muscle.

SUBSEROUS, *Subserosus*; from *sub*, and *serous*. Under a serous membrane,—as the 'subserous areolar tissue.'

SUBSIDENTIA, Sediment.

SUBSTANCE ÉMAILLÉE DES DENTS, Enamel of the teeth — s. Horny, see Tooth.

SUBSTANCE, HYALINE, Cytoblastema — s. Intercellular, Cytoblastema — s. *Vitrée des Dents*, Enamel of the teeth.

SUBSTANCE, WHITE, OF SCHWANN. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

SUBSTANTIA ADAMANTINA DENTIIUM, Enamel.

SUBSTANTIA FERRUGINÆA, *Locus cinereus*. An ash coloured substance, produced by the existence of well marked pigmentary matter in the floor of the fourth ventricle or *rhomboïd fossa*.

SUBSTANTIA FILAMENTOSA DENTIIUM, Enamel — s. *Grisea Centralis*, see *Medulla spinalis* — s. *Hyalina*, Cytoblastema — s. *Nigra pedunculii*, see *Peduncles of the brain* — s. *Ossea dentium*, see *Tooth* — s. *Ostoides*, see *Tooth* — s. *Perforata anterior*, *Locus perforatus anticus*.

SUBSTANTIA PERFORATA MEDIA. When the pia mater has been removed from the space between the *crura cerebri*, termed the *intercrural* or *interpunctular*, the surface appears cribriform from the perforations of the numerous minute vessels which penetrate it. This is the *substantia perforata media* of Vieq d'Azyr.

SUBSTANTIA PERFORATA POSTERIOR, see *Tarini pons* — s. *Pulposa Dentis*, *Dental pulp* — s. *Radiata*, *Stellule Verheyenii* — s. *Rhomboidea*, *Corpus dentium* — s. *Spongiosa Urethrae*, *Corpus spongiosum urethrae* — s. *Stellata serpentina*, *Stellule Verheyenii* — s. *Vitrea dentium*, Enamel of the teeth — s. *Vitrea*, Cytoblastema — s. *Vitrea dentium*, Enamel.

SUBSTANTIVE, *Substantivus*; from *substare*, (*sub*, and *stare*), 'to stand under or subsist.' An epithet applied by Dr. Paracelsus to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment: the condiment, as mustard, eaten with it, an *adjective* aliment.

SUBSTILLUM, Stillidium.

SUBSULTIO, Palpitation.

SUBSULTUS TEN'DINUM, *Saltus tendinum*, *Clonus subsultus*, *Subsultus*, *Cephalog'gia spasmodica*, *Myop'imus*, *Twitching of the Tendons*, (F.) *Soubresaut*, from *subsilio*, *subsultum*, (*sub* and *silio*), 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibilitas*, *Scleroty'be febrilis*, and *Irritabilitas morbo'na*.

SUBSURTAS, Deafness.

SUBUBERES, from *sub*, and *ubera*, 'the breasts.' *Infantes sugentes*, *Sucking children*. Infants at the breast, in contradistinction to *Lact'beres*, *απογαλακτοι*, or those which have been weaned.

SUBUN'GUAL, *Subungual*, *Subunguical*, (F.) *Sous-ungulé*, from *sub*, and *unguis*, 'a nail.' Belonging to parts under the nail; — as *subungual exostosis*, (F.) *Exostose sous-ungulé*, an exostosis under the nail of the great toe especially.

SUBVERSIO STOMACHI, Vomiturition.

SUBVERTEBRA, Sacrum.

SUBVERTEBRUM, Sacrum.

SUBVOLA, Hypothear.

SUC, *Succus* — s. *de Citron*, see *Citrus medica* — s. *Gastrique*, *Gastric juice* — s. *de Kino*, *Kino* — s. *Mellullaire*, *Marrow* — s. *du Limon*, see *Citrus medica* — s. *Nourricier*, *Liquor sanguinis* — s. *Pancréatique*, see *Pancreas*.

SUCCA'GO, from *succus*, 'juice.' The inspissated juice of plants; robs, jellies, &c.

SUCCEDANÉ, *Succedaneum*.

SUCCEDANEUM, *Succidaneum*, *Substitutum*, *Antihelloneum*, *Surrogatum*, *Anticubelloneum*, *Quid pro quo*, from *succedere*, (*sub*, and *cedere*), 'to go under, to come in place of another.' (F.) *Succédané*. An epithet for medicines that may be substituted for others possessing similar properties. Also, used, in dentistry, for an amalgam for filling teeth.

SUCCENTURIATUS, from *succenturiare*, (*sub*, and *centuria*), 'to supply a soldier to fill a vacancy,' and hence, 'to substitute or put in the room of.' That which is a substitute for another, as *Renes succenturiati*, *Ventriculus succenturiatus*, &c.

SUCCHAR, *Saccharum*.

SUCCIDANEUM, *Succedaneum*.

SUCCIN, *Succinum*.

SUCCINCTURA, *Diaphragm*.

SUCCINCTUS, *Diaphragm*.

SUCCINI RESINA, *Musk*, artificial.

SUCCINIC ACID, *Ac'idum Succ'ini*, *A. Succinicum*, *Acor Succinens*, *Sal Succini*, *Sal volatile Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUC'CIUM, *Electrum*, *Ambra*, *Ambram*, *Am-par*, *Beren'ce*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*, from *succus*, 'juice,' because at one time supposed to exude from a tree. This kind of fossil resin, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour, transparent, and has a shining lustre. S. g. 1.08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil — the *Oilum seu Balsammum Succ'ini*, (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *Oilum Succ'ini rectificatum*, *Rectified Oil of Amber*, is made as follows:—*Oil of Amber*, Oj; *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well-stopped bottles.—(Ph. U. S.)

The *White amber*, *Lencelectrum*, (F.) *Ambre blanc*, is a variety.

SUCCINUM CINEREUM, *Ambergris* — s. *Griseum*, *Ambergris*.

SUCCION, *Sucking*.

SUCCISA, *Scabiosa succisa* — s. *Pratensis*, *S. succisa*.

SUCCOCOLLATA, *Chocolate*.

SUCCOLATA, *Chocolate*.

SUCCORY, *Wild*, *Cichorium intybus*, *Chironia angularis*.

SUC'COTASH, *Suck'atash*. A term of Indian derivation. A favorite dish in New England, formed of *green Indian corn* and *beans* boiled together.

SUCCUBUS, from *sub*, and *cubare*, 'to lie.' Some authors have used this word synonymously with nightmare. Others mean by it a female phantom, with which a man in his sleep may believe he has intercourse; — as *Iucubus* has been applied to the male phantom, with which a female may dream she is similarly situated.

SUCCUS, *Chylus*, *Opos*, *Opis'ma*, *Chylis'ma*, *Eechylo'ma*, *Apothlium'ma*, *Juice*, (F.) *Suc*, from *sugere*, *suctum*, 'to suck.' The fluid obtained by pressing plants, flesh, &c.; *Succus expressus*, *Opole* (official), *Opolide* (magistral), according to Chéreau. It is, also, applied to certain animal fluids, as *S. Gastricus*, &c.

SUCCUS ACALÆ GERMANICÆ INSPISSATUS, see *Prunus spinosa* — *s. Acaciæ nostratis*, see *Prunus spinosa* — *s. Arborum*, Sap — *s. Cicutæ spissatus*, *Extractum conii* — *s. Cyrenaicus*, *Laserpitium*.

SUCCUS ENTERICUS, *S. Intestinalis*, *Liquor intestinalis* sen *eutericus*, *Intestinal Juice*. The fluid copiously secreted from the lining membrane of the small intestines.

SUCCUS EXPRESSUS, *Apothlimma* — *s. Gastricus*, *Gastric juice* — *s. Glycyrrhizæ*, *Extractum glycyrrhizæ* — *s. Hypocistidis*, see *Cytinus* — *s. Intestinalis*, *Succus entericus* — *s. Japonicus*, *Catechu* — *s. Limonis*, see *Citrus medica* — *s. Liquiritiæ*, *Extractum glycyrrhizæ* — *s. Nervus*, *Nervous fluid* — *s. Nutritius*, *Chyle* — *s. Orni concretus*, see *Fraxinus ornus* — *s. Pancreaticus*, see *Pancreas* — *s. Spissatus Aconiti Napelli*, *Extractum aconiti* — *s. Spissatus atropæ belladonnæ*, *Extractum belladonnæ* — *s. Spissatus conii maculati*, *Extractum cicutæ* — *s. Spissatus hyoseyami nigri*, *Extractum hyoseyami* — *s. Spissatus lactuæ sativæ*, *Extractum lactuæ*.

SUCCUSION, *Succus'sio*, *Hippocrat'ic Succus'sion*, from *succutio*, *succussum*, (*sub*, and *quatio*), 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, (*fluctuation by successio*,) by giving the body one or more slight shakes.

SUCCUSSIO, *Ballottement*.

SUCHOR, *Saccharum*.

SUCKATASHI, *Succotash*.

SUCKING, *Sue'tio*, *Suctus*, *Athelx'is*, *Bdalsis*, *Myze'sis*, (F.) *Succio*, from *sugere*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

SUCKING BOTTLE. A bottle so formed, that, when filled with milk, it can be sucked from instead of the breast.

SUCKING CHILD, *Lactens*. A suckling.

SUCKLE, *Lactare*, *γαλακτοτροφειν*, *τεθρηειν*, (F.) *Allaiter* ou *Alaiter*. Same etymon. To give suck. To nurse.

SUCKLING, *Lactation*, *Lonicera perilymenum*, *Sucking child*.

SUCRE, *Saccharum* — *s. Candi*, *Saccharum candidum* — *s. du Foie*, see *Saccharum* — *s. de Lait*, *Sugar of milk* — *s. de Saturne*, *Plumbi superacetatis* — *s. Tors*, *Penidium*.

SUCTIO, *Exsuctio*, *Sucking*.

SUCTION POWER. The force exerted on the blood in the veins, by the active dilatation of the heart. See *Derivation*.

SUCTORIA, from *sugere*, *suctum*, 'to suck.' Animals provided with mouths for sucking. Also, organs for sucking or adhesion, — hence termed *suctorial* — as '*suctorial oscula*.'

SUCTORIAL, see *Suctoriora*.

SUCTUS, *Sucking*.

SUDAMINA, *Hydro'ata*, *Hidro'ta*, *Pap'ulæ sudorales*, *Suffersu'ræ*, *Alha'sef*, *Planta noctis*, *Boa*, from *sudor*, 'sweat.' Small vesicles, which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended

with much sweating. It is a military eruption. See *Military fever*.

SUDAMINA, *Desudatio*, *Échaubouluures*, *Lichen tropicus*.

SUDARIUM, *Achicolum*.

SUDATIO, *Ephidrosis*.

SUDATIUNCULA, *Ephidrosis*.

SUDATORIA, *Hidrosis* — *s. Maligna*, see *Sudor Anglicus*.

SUDATORIUM, *Achicolum*.

SUDATORY, *Achicolum*.

SUDOR, *ἰδρωσ*, *Hidros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

SUDOR, *Miliary fever*.

SUDOR ANGLICUS, *Hidrom'osus*, *Hidrop'lyra*, *Hidrop'pyretos*, *Febris* seu *Miliaris sudatoria*, *Sudor miliaris*, *Morbus sudatorius*, *Ephen'era maligna seu sudatoria seu Britannica seu Anglica pestilens*, *Pestis Britannica*, *Sudatoria maligna*, *Sweating Sickness*, *Sweating Fever*, (F.) *Suette*, *S. Miliare*; *S. épidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name *SUETTE DE PICARDIE*, *Suette des Picards*, *Fièvre suante*; *Miliaris sudatoria*, *Sudor Picardicus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were profuse sweats and a military eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

A form of it, in which the perspiration was of a black colour, was called *Sudor Anglicus niger*, *Melanophidros'is*, *Black English Sweating sickness* or *fever*.

SUDOR COLLIQUATIVUS, *S. Profusus*.

SUDOR CRUENTUS, *S. sanguinis*, *Hæmatidros'is*, *Hæmathidros'is*, *Ephidros'is cruenta*, *Hæmorrhag'ia per Cutem*, (F.) *Hématidrose*, *Sueur de Saug*; *Sweating of blood*, *Bloody sweat*, *Hæmorrhage from the skin*. Cutaneous perspiration intermixed with blood: — a very uncommon affection.

SUDOR DULCIS, *Saccharorrhœ'a cutanea*, *Ephidros'is saccharata*. A discharge of saccharine matter by perspiration.

SUDOR LOCALIS, *Meridrosis* — *s. Miliaris*, *Military fever*, *Sudor Anglicus* — *s. Partialis*, *Meridrosis*.

SUDOR PROFUSUS, *S. Colliquativus*. A profuse or immoderate sweat.

SUDOR SANGUINEUS, *Sudor cruentus* — *s. Universalis*. *Panhidrosis*.

SUDORIFER, *Sudoriferous*, *Sudorific*.

SUDORIFEROUS, *Sudor'ifer*, *Hydroph'orus*, from *sudor*, and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands.

SUDORIFIC, *Sudorif'icium*, *Sudor'ifer*, *Hidrot'icium*, *Hidrot'erium*, *Hidrotop'eum*, *Hidropoët'icium*, (F.) *Sudorifique*, from *sudor*, and *facio*, 'I make.' A medicine which provokes sweating. See *Diaphoretic*.

FOUR SUDORIFIC WOODS, *Quatuor ligna sudorifica*, were, formerly, *guaiacum*, *perfumed cherry*, *sassa-parilla*, and *sassafras*.

SUDORIPAROUS, see Perspiration.

SUDORIS NULLITAS, Anidrosis — s. Privatio, Anidrosis — s. Suppressio, Ischidrosis.

SUET, Sebum.

SUETTE, Sudor Anglieus — s. *Epidémique*, Sudor Anglieus — s. *Miltaire*, Sudor Anglieus — s. *de Picardie*, Sudor picardieus — s. *des Picards*, Sudor picardieus.

SUEUR, Sudor — s. *Anglaise*, Sudor Anglieus — s. *d'Expression*, Expression, sweat of — s. *de Sang*, Diapedesis, Sudor cruentus — s. *Urineuse*, Uridrosis.

SUFFERSURÆ, Sudamina.

SUFFIMEN, Suffimentum.

SUFFIMENTUM, *Hypocapnis'ma*, *Suffim'en*, *Thymia'ma*, *Suffitus*, *Suffumigatio*, *Suffumigatio*, (F.) *Parfum*; from *suffio*, 'I perfume.' A perfume; suffumige; fumigation.

SUFFITIO, Fumigation.

SUFFITUS, Fumigation, Suffimentum.

SUFFLATIO, Puffiness.

SUFFOCATIO, Suffocation, Orthopnoea — s. Hypochondriaca, Hypochondriasis — s. Hysterica, Angone — s. Stridula, Cyanche trachealis — s. Uterina, Angone.

SUFFOCATIO, *Suffocatio*, *Præfocatio*, *Apopnie'sis*, *Asphyxia*, *Melanæ'ma*, from *sub*, and *falsc*, pl. *fauces*, 'the jaws.' Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases*, *drowning*, *hanging*, *strangling*, or *smothering*. The principal morbid appearances in such cases are: — the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

Treatment of suspended animation by suffocation in general. The patient must be conveyed into a room not too warm. Blood-letting must be used, if at all, with caution; — friction must be employed with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

SUFFOCATIO, *Pnigophob'ia*, (F.) *Étouffement*, is used, as *strangling* is, for threatened suffocation. It means the state of dyspnoea and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

SUFFOCATIO UTÉRINE, Angone, Hysteria.

SUFFRAGO, Poples.

SUFFUMIGATION, Suffimentum.

SUFFUMIGE, Suffimentum.

SUFFUMIGIUM, Fumigation.

SUFFUMINATIO, Fumigation.

SUFFUSIO, Pseudoblepsia — s. Auriginosa, Icterus — s. Bilis, Icterus — s. Colorans, Chromopsia — s. Dimidiens, Hemiopia — s. Exclarans, Oxyopia — s. Fellis, Icterus — s. Lentis crystallina, Cataract — s. Metamorphopsis, Metamorphopsia — s. Multiplicans, see Diplopia — s. Myodes, Metamorphopsia — s. Nigra, Amaurosis — s. Oculi, Cataract, Pseudoblepsia — s. Oculorum, Metamorphopsia — s. Radians, Scotasma — s. Sanguinis, Eechymona.

SUGAR, Saccharum — s. Barley, Penidium, Saccharum hordeatum.

SUGAR CANDY, Saccharum candidum — s. Cane, see Saccharum.

SUGAR, DIABETIC, Glucose — s. Fruit, Glucose

— s. Grape, Glucose — s. Hepatic, see Saccharum — s. Honey, Glucose.

SUGAR OF LEAD, Plumbi superacetates.

SUGAR, LIVER, see Saccharum.

SUGAR, MAGNETIC, *Saccharum Magnet'icum*. A quack preparation, said to be composed of sugar and cannabis. It is given in nervous cases.

SUGAR OF MILK, *Saccharum lactis*, *Gulae'to-saccharum*, *Lactose*, *Lactine*, (F.) *Sucre de Lait*, *Sel de Lait*, is obtained from whey by evaporation and crystallization. It possesses the demulcent properties of the sugars.

SUGAR, MUSCLE, Inosite.

SUGAR PINE, see Arrowroot — s. Starch, Glucose.

SUGAR, URINARY, Glucose.

SUGARS, VARIOUS, see Saccharum.

SUGARBERRY, *Celtis occidentalis*.

SUGGILLATIO, *Sugilla'tio*, *Livor*, *Edema cruentum*, *Sugillation*, *Bruise*; from *sugillare*, *sugillation*, 'to beat black and blue.' By most authors used synonymously with ecchymosis and ecchymoma. It is, also, applied to the spots, or ecchymoses which occur in consequence of intrinsic causes, — in disease and in incipient putrefaction. It is common in dead bodies; *Livor sen macula emortu'alis*. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises: — Whether the appearance have been induced before death or afterwards? Whether it be a case of ecchymosis or of *sugillation*? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUGGRUNDIUM, perhaps from *suggeredi*, (*sub*, and *gradior*), 'to go or come up to.' The eave of a house.

SUGGRUNDIUM OCULI, Superciliary arch — s. Superciliorium, Frontal protuberance.

SUICIDA, Autochir.

SUICIDAL INSANITY, Suicide.

SUICIDE, *Suicid'ium*: from *suicædes*, 'murder of one's self.' The act of killing one's self. *Autoch'ria*, *Autocton'ia*, *Idiocton'ia*, *Autophon'ia*. Suicide is very frequently the result of disease of the mind: the individual seeming, at times, to be irresistibly impelled to self-destruction. — *Melancho'lia Suicid'ium* seu *autoch'ria*, *Suicid'al Insan'ity*. Also, one who commits self-murder.

SUË, Fuligo.

SUIF, Sebum.

SUITES DE COUCHES, Lochia.

SULCATUS, *Canalé*, Grooved.

SULCI, plural of Suleus.

SULCI CILIARES, Halo signatus.

SULCULUS LABII SUPERIORIS, Lacuna Labii superioris.

SULCUS, *Semicanal'is*, *Semicanal'ulus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs. See Anfractuosity.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gontières*, 'gutters.' Also, the vulva.

SULCUS ANTERO-POSTERIOR JECORIS, see Liver — s. Labii superioris, Lacuna Labii superioris.

SULCUS, LATERAL, ANTERIOR, OF THE SPINAL MARROW. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

SULCUS, LATERAL, POSTERIOR, OF THE SPINAL MARROW, corresponds with the attachment of the posterior roots of the spinal nerves.

SULCUS RETRO-GLANDULARIS, see Glans — s. Sinus lateralis, Fossa sigmoidea — s. Transversalis, see Liver — s. Umlilicalis, see Liver.

SULFATE D'AMMONIAQUE, Ammonia sulphas.

SULFIDUM CARBONII, Carbonis sulphuretum.

SULFUR, Sulphur.

SULFURE DE CARBON, Carbonis sulphuretum.

SULPHAS ALUMINARIS, Alumen—s. Ammoniacæ Cupratus, Cuprum ammoniatum—s. Cadmicus, Cadmii Sulphas—s. Kalico-aluminicum, Alumen—s. Natricus, Soda, sulphate of—s. Zincicum, Zinci sulphas.

SULPHUR, *Sulfur, Scorith, The'ou, Thion, Averich, Terra folia'ta, Fumus cit'rinus, Aquila, Brimstone, (F.) Soufre. Native Sulphur* is called *Rock and Black Sulphur, Sulphur vivum* seu *nigrum*. Sulphur, as we meet with it, is in rolls, *Sulphur in rot'alis* seu *rotundum, Roll Brimstone*. It is a volcanic production, and is obtained in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly inodorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

SULPHUR ANTIMONIATUM, Antimonii sulphuretum præcipitatum—s. Caballinum, see Sulphur sublimatum—s. Carburet of, Carbonis sulphuretum—s. Chloratum, Sulphur, chloride of.

SULPHUR, CHLORIDE OF, *Sulphuris Chloridum* seu *Dichloridum, Sulphur chloratum, Hypochloritum sulphurosium, Chlorum hypersulphuratum, Dichloride* or *Protochloride* or *Hypochloride* or *Subchloride* of Sulphur, *Bisulphuret of Chlorine*, is obtained by passing dry chlorine gas over washed and dried flowers of sulphur, until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

SULPHUR, DICHLORIDE OF, Sulphur, chloride of—s. Hypochloride of, Sulphur, chloride of—s. Iodatium, Sulphuris iodidum—s. Iodide of, Sulphuris iodidum—s. Ioduret of, Sulphuris iodidum—s. Liver of, Potassæ sulphuretum.

SULPHUR LOTUM, *Sulphur sublimatum lotum, Washed Sulphur, Magisterium Sulphuris, Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

SULPHUR NIGRUM, Sulphur vivum, see Sulphur sublimatum.

SULPHUR PRÆCIPITATUM, *Lac Sulphuris, Milk of Sulphur, Precipitated Sulphur, (F.) Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

SULPHUR, PROTOCHLORIDE OF, Sulphur chloride of—s. Subchloride of, Sulphur, chloride of.

SULPHUR SUBLIMATUM, *Sulphur, (Ph. U. S.) Sublimed Sulphur, Flowers of Sulphur (F.) Soufre sublimé, Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific [?], and it is a valuable remedy in most cutaneous affections that are local. Dose, ℥ss to ℥ij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone, Dregs of Sulphur vivum, Sulphur caballinum* seu *vivum, Sulphuris vivi recemen'ta*. They are very impure, and are only used externally.

SULPHUR, VEGETABLE, Lycopodium—s. Wort, Peucedanum.

SULPHURATUS, Sulphureous, Sulphurated. SULPHUREOUS, *Sulphurosus, Sulphuricus, Sulphuratus, Sulphureted*. Possessing the properties of, or relating to, or containing sulphur.

SULPHURETTED, Sulphureous—s. Hydrogen, see Hydrogen, sulphuretted.

SULPHURETUM AMMONIACÆ, Ammonia sulphuretum—s. Ammonia hydrogenatum, Liquor fumans Boylii—s. Kalicum, Potassæ sulphuretum—s. Lixivia, Potassæ sulphuretum.

SULPHURIC ACID, *Ac'idum Sulphuricum* seu *Sulfuricum, Oleum Vitrioli, Spiritus Vitrioli* seu *vitrioli fortis, Acidum vitriolicum, A. Vitrioli dephlogisticatum, Oil of Vitriol, Spirit of Vitriol, Vitriolic Acid, Acor Sulphuris, (F.) Acide Sulphurique* ou *Sulfurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1.845 (Ph. U. S.) It is escharotic, stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

SULPHURIC ACID, AROMATIC, *Ac'idum Sulphuricum Aromaticum, A. vitriolicum aromaticum, seu vitriolicum alcoh'le aromaticum, Elixir vitrioli seu vitrioli aromaticum seu vitrioli Myrsiciti* seu *vitrioli Edinburgen'sium* seu *vitrioli cum tincturâ aromaticâ* seu *vitrioli dulcè* seu *acido-aromaticum, Alcohol cum aromaticis sulphuricatus, Tinctura acidi sulphurici*, is formed of sulphuric acid, f ℥ijss; ginger, bruised, ℥j; cinnamon, bruised, ℥ss; Alcohol, Oij.—Ph. U. S. Dose, gtt. x to xxx. Its properties are like those of the next preparation, than which it is more frequently employed, being more agreeable.

SULPHURIC ACID, DILUTED, *Ac'idum Sulphuricum Dilutum, A. vitriolicum dilutum, Elixir vitrioli, Spiritus vitrioli ac'idus Voyle'ri, Elixir of Vitriol, (F.) Acide sulfurique délayé*, is formed, according to the Pharmacopœia of the United States, by adding *aq. destillat.* f ℥xiiij, to acid. sulph. f ℥j. It is tonic, astringent, and refrigerant. Dose, gtt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ℥vj of water.

Very dilute sulphuric acid was formerly termed *Plegma vitrioli*.

SULPHURIS CARBURETUM, Carbonis sulphuretum.

SULPHURIS CHLORIDUM, Sulphur, chloride of—s. Dichloridum, Sulphur, chloride of.

SULPHURIS IODIDUM, *S. Iodure'tum, Sulphur Iodatium, Ioduret* or *Iodide of Sulphur, (F.) Soufre Ioduré, Iodure de Soufre*. It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin. ℥iv; sulphur. ℥i*.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool, break it, and put the iodide into bottles, which are to be well stopped.

SULPHURIUS, Sulphureous.

SULPHUROSUS, Sulphureous.

SULPHUROUS, Sulphureous.

SULPHUROUS ACID, *Ac'idum sulphurosicum* seu *sulphuris volat'ile* seu *Sulphurosium* seu *Sulfurosium, Spiritus sulphuris* seu *sulphurosus volat'ilis* seu *sulphuris per campanam* seu *vitrioli phlogistica'tus, Gas sulphuris, (F.) Acide Sulfureux, Air Acide Vitriolique*. Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes

used in the gaseous, — at others, in the liquid, state. Sulphurous acid gas is used to disinfect clothes, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

SULTZMALT, MINERAL WATERS OF. Sultzalt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

SUMAC DES CORROYEURS, *Rhus coriaria* — s. *Vénéneux*, *Rhus toxicodendron*.

SUMACH, *Rhus coriaria* — s. Mountain, *Rhus copallina* — s. Poison, *Rhus venenata* — s. Stag's Horn, *Rhus typhina*.

SUMBUL. The name of a root, *Sumbuli radix*, *Jatamansi*, *Musk-root*, presumed to belong to the Umbelliferae family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

SUMBUL RADIX, *Sumbul root*.

SUMEN, Hypogastrium.

SUMMER COMPLAINT. A popular name in the United States, for diarrhoea occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

SUMMER DISEASES, see Estival — s. Plant winter worm, *Sphæria Sinensis* — s. Rash, Lichen tropicus.

SUMMITAS CUTIS, Epidermis.

SUMMUS HUMERUS, Aeronium.

SUN BURN, Ephelesides — s. Dew, *Drosera rotundifolia* — s. Flower, false, *Helenium autumnale* — s. Flower, swamp, *Helenium autumnale* — s. Flower, tickweed, *Coreopsis trichosperma* — s. Flower, turpentine, *Silphium perfoliatum* — s. Pain, see Hemierania — s. Rash, Lichen — s. Stroke, *Coup de Soleil* — s. Stroke, Egyptian, *Coup de Soleil*.

SUPELLECTILE DIOGENIS, Palm.

SUPELLEX ANATOMICA, Museum anatomicum — s. Diogenis, Palm.

SUPER. A common Latin prefix; in composition, signifying 'above.'

SUPERBUS, Rectus superior oculi.

SUPERCHLORIDUM FORMYLICUM. Chloroform.

SUPERCILIARIS, Corrugator supercilii.

SUPERCILIARY, *Superciliaris*, from *super*, and *cilium*, 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier*.

SUPERCIARY ARCHES, *Superciliary Ridges*, *Arcus superciliares*, *Suggravidia oculorum*. (F.) *Arcades sourcilieres*, are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosses*, and covered by the superciliaris muscle, to which they give attachment.

SUPERCILIARY RIDGES, *Superciliary arches*.

SUPERCILIUM, *Ophrya*, *Ophrya*, *Vallum*, (F.) *Sourcil*. Same etymon. The *eyebrows* (Sc.) *Breus*, (Prov.) *Eye-breen*, are two arched eminences, — convex above, and more or less prominent, according to the individual, — which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff

hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum*, *frontalis*, and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

SUPERCILIUM ACETABULI. The edge of the cotyloid cavity of the os innominatum.

SUPERCONCEPTION, see Superfætation.

SUPEREVACUATIO, Hypercrisis.

SUPERFECUNDATION, see Superfætation.

SUPERFIBRINATION, Hyperinosis.

SUPERFICIALIS COLLI, *Subcutanea Collis*.

A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

SUPERFICIES ORBITALIS, see Maxillary bone (superior) — s. *Plantaris Pedis*, Sole.

SUPERFECUNDATIO, Superfætation.

SUPERFETATIO, Superfætation.

SUPERFETATION, *Superfætatio*, *Epicyesis*, *Hypercyesis*, *Hypercyema*, *Superimpregnatio*, *Epigonê*, *Superfœcundatio*, *Superfœcundatio*, *Superimpregnatio*, from *super* and *fœtare*, 'to breed.' Conception of a fœtus — *epicyema* — in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception*.

SUPERGEMINALIS, Epilidymis.

SUPERGENUALIS, Patella.

SUPERHUMERALE, Epomis.

SUPERIMPRÆGNATIO, Superfætation.

SUPERIOR AURIS, Attollens aurem — s. *Rotundus clitoridis*, *Ischio-cavernosus*.

SUPERLABIA, Clitoris.

SUPERLIGAMEN, Epidesmus.

SUPERLIGULA, Epiglottis.

SUPERNUMERARY FINGER, *Digitus supernumerarius*.

SUPERNUTRITIO LIENIS, *Splenoneus* — s. *Splenis*, *Splenoneus*.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPURGATIO, Hypercatharsis.

SUPERSCAPULARIS, *Supraspinatus* — s. Inferior, *Infra-spinatus*.

SUPINATEUR COURT on *PETIT*, *Supinator radii brevis* — s. *Grand* ou *long*, *Supinator radii longus*.

SUPINATION, *Supinatio*, from *supinus*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the anterior surface of the latter becomes superior.

In Pathology, *Supination*, *Supinatio*, *Hyptiosma*, *Hyptiosmus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINATOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu *MINOR*, *Supinator radii brevis* — s. *Longus* seu *major*, *Supinator radii longus*.

SUPINATOR RADII BREVIS, *S. brevis* seu *minor*, (F.) *Épicondyléo-radial* (Ch.), *Supinateur court* ou *petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to

a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Brachio-radialis*, (F.) *Huméro-sus-radialis* (Ch.). Long ou grand *supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, Hypopodia.

SUPLANTALIA, Hypopodia.

SUPPLEMENTA EPIPLOICA, Appendiculæ pinguedinosæ.

SUPPLEMENTARY AIR, see Respiration.

SUPPORTER, ABDOMINAL, Belt, Russian —s. Utero-Abdominal, see Belt, Russian.

SUPPOSITION DE PART, Pregnancy, protracted.

SUPPOSITOIRE, Suppositorium.

SUPPOSITORIUM, Suppository —s. Uterinum. Pessary.

SUPPOSITORY, *Suppositivum*, *Hypotheton*, *Bacillus*, *Balanismus*, *Balanus*, *Glaus*, *G. subdidivialis*, *Nodulus intestinalis*, from *supponere*, *suppositum*, (*sub* and *ponere*, 'to put'), 'to put under,' (F.) *Suppositoire*. A solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum; — either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO ALVI, Constipation —s. Lochiorium, Ischlochia—s. Lotii, Ischuria—s. Menstruum, Amenorrhœa—s. Menstruationis, Amenorrhœa —s. Sudoris, Ischidrosis.

SUPPRESSION DU FLUX MENSTRU-EL, Amenorrhœa—s. *de Part*, see Parturition—s. *d'Urine*, Ischuria.

SUPPURANS, Suppurative.

SUPPURARE, Suppurate.

SUPPURATE, *Suppuratæ*, (F.) *Suppurer*, (Prov.) *Beal* (vulgarly). To form or secrete pus.

SUPPURATION, *Suppuratio*, *Suppuratio*, *Ecpyema*, *Parulenta*, *Pyosis*, *Pyësis*, *Diapyëma*, *Diapyësis*, *Pyogenia simplex*, *Pu'rulence*, *Pu'rilency*, *Gath'ering*, (F.) *Abouissement*. Formation or secretion of pus, (see, also *Pyogenia*,) from *sub*, 'under,' and *pus*, *puris*. It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the areolar membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it is formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUPPURATIVE, *Suppurans*, *Suppurativus*, *Diapyëticus*, *Ecpyëticus*, *Epyiscontus*, (F.) *Suppuratif*. Same etymon. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPPURER, Suppurate.

SUPRA. A common Latin prefix; in composition, signifying 'above.'

SUPRA-COSTALES, *Levatores Costarum*, (F.) *Sur-costaux*, from *supra*, and *costa*, 'a rib.' A name given to twelve small, fleshy fasciuli, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior mar-

gin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others, consider them to form part of the intercostales externi.

SUPRA-HEPATIC VEINS, see Hepatic veins.

SUPRA-OMPHALODYMIA, see Somatodymia —s. et *Infra-omphalodymia*, see Somatodymia.

SUPRA-ORBITAR, *Supra-orbitalis*, *Supra-orbitarius*, (F.) *Sus-orbitaire*, from *supra*, and *orbita*, 'the orbit.' That which is situate above the orbit.

SUPRA-ORBITAR FORAMEN, *F. Supra-orbitarium* seu *orbitarium superius*, (F.) *Trou sus-orbitaire* ou *orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbital arch. It gives passage to the *supra-orbitar* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PUBIAN, *Supra-pubic*, *Supra-pubialis*, from *supra*, and *pubes*. That which is seated above the pubis.

SUPRA-PUBIAN NERVE, (F.) *Nerv sus-pubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the *poas muscle*; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

SUPRA-RENAL, *Supra-renal*, (F.) *Surrénal*, from *supra*, and *ren*, 'the kidney.' Seated above the kidney —as the *supra-renal capsule*.

SUPRA-SCAPULAR: *Supra-scapularis*, from *supra*, and *scapula*. Seated above the scapula:—as

SUPRA-SCAPULAR NERVE. This arises from the fifth cervical; passes through the supra-scapular notch, and is distributed to the supra-spinatus and infra-spinatus muscles.

SUPRA-SCAPULARIS, *Supra-scapular*, and *Supra-spinatus muscle*.

SUPRA-SEMIORBITULARIS, *Orbicularis oris*.

SUPRA-SPINATUS, *Supra-spinosus*, (F.) *Sur-épineux*, *Sus-épineux*, from *supra*, and *spina*. That which is seated above the spine.

SUPRA-SPINATA FOSSA, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

SUPRA-SPINATUS MUSCLE, *Super-scapularis*, *Supra-scapularis*, (F.) *Sus-spino-scapulo-trochitérien*, *Petit sus-scapulo-trochitérien* (Ch.), is situated in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

SUPRA-SPINO'SA LIGAMENTA, *Supra-spinal ligaments*, are two in number. 1. The *Dorso-lumbo-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebræ from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical-supra-spinal ligament*, (F.) *Ligament sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

SUR, *Supra*. A French prefix, signifying 'above.'

SURA, *Gastrocnemë*, *Gastrocnemïa*, *Gastrocnemium*; *Calf of the leg*, (F.) *Molle*, *Gras de*

below by strings passing between the thighs, and fixed to the cincture behind.

SUSPENSORY LIGAMENT OF THE LIVER, *Ligamentum latum, Suspensorium hepatis, Perpendiculum hepatis*, is a triangular dupliature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falcx of the umbilical vein.

SUSPENSORY LIGAMENT OF THE PENIS is a fibro-cellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

SUSPENSUM, Enæorema—s. *Urinæ, Enæorema*.

SUSPIRATION, Suspirium.

SUSPIRATUS, Suspirium.

SUSPIRITUS, Suspirium.

SUSPIR'UM, Suspira'tio, Suspira'tus, Suspir'itus, from *sus*, and *spiro*, 'I breathe;' *Myg-mus, Mych'mus, Mychthis'mus, Stenag'mus, Stenax'is, Sigh, Suspira'tion, (F.) Soupir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed,—a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*:—the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

SUSPIR'UM CARDIACUM, Angina pectoris.

SUSTENTACULUM, Aliment.

SUSTENTATOR CLITORIDIS, Erector clitoridis—s. *Penis, Erector penis.*

SUSURRATION, Whispering.

SUSURRUS, Bourdonnement—s. *Aurium, Tinnitus aurium.*

SUTELA, Suture.

SUTERBERRY, Xanthoxylum fraxineum.

SUTORIUS, Sartorius.

SUTTER, Saccharum.

SUTURA ABDOMINALIS, Gastroraphy—s. *Arealis, Coronal suture*—s. *Biparietalis, Sagittal suture*—s. *Clavata, Suture, quilled*—s. *Corporis callosi externa, see Raphe*—s. *Cranii squamosa, Squamous suture*—s. *Dentata, see Suture*—s. *Frontoparietalis, Coronal suture*—s. *Interparietalis, Sagittal suture*—s. *Jugalis, Sagittal suture*—s. *Lambdoidal, Lambdoid suture*—s. *Limboza, see Suture*—s. *Lepidoides, Squamous suture*—s. *Mendosa, Squamous suture*—s. *Notha, see Suture*—s. *Obelæa, Sagittal suture*—s. *Ossium Spuria, Harmony*—s. *Proræ, Lambdoid suture*—s. *Punctata, Suture, common*—s. *Puppis, Coronal suture*—s. *Rhabdoides, Sagittal suture*—s. *Serrata, see Suture, Sagittal suture*—s. *Spuria, see Suture*—s. *Squamosa, see Suture*—s. *Vera, see Suture.*

SUTURAL, Sutura'lis; same etymon as the next. Relating to a suture.

SUTURE, Sutu'ra, Sute'la, Armē, Rhaphē, from *suer, sutum*, 'to stitch,' *Dove-tail joint, (F.) Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dove-tailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures, sutu'ra vera*, the two temporal are called *false sutures, sutura nothæ seu spu'ria seu squamo'sa*.

A *dentated suture—Sutu'ra denta'ta*—is one in which the processes are long and dentiform,

as in the interparietal suture. In a *serrated suture—sutu'ra seu sutu'ra's serrata*—the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutu'ra limbo'sa* there is along with the dentated margins a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

SUTURE, in Surgery, Rha'phē, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture, the quilled suture, the glover's suture, and the twisted suture*. 1. The **INTERRUPTED SUTURE, (F.) Suture à points séparés, Suture entrecoupée**, is performed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The **QUILLED SUTURE, Sutura clava'ta, (F.) Suture enchevillée ou emplumée ou empueñe, Compound Suture**, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. The **CLAMP SUTURE**, used by Dr. Sims, of New York, in the treatment of vesico-vaginal fistula, is a modification of this. It is formed by two cylinders of silver or lead, perforated at several points for the passage of small pieces of fine silver wire, which are to supply the places of thread, and are prevented from slipping by perforated shot carried down upon them, pressed against the cylinders, and kept in situ by being firmly pinched with pliers. 3. The **GLOVER'S SUTURE, Contin'ued or Uninterrupted Suture, (F.) Suture de Pelletier, ou en surget**, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura puncta'ta, (F.) Suture à points passés*, has been used in similar cases. 4. The **ROYAL STITCH or SUTURE** is the name of an old operation for the cure of bubonocæle. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The **TWISTED SUTURE, (F.) Suture entortillée**, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure ∞. The number of pins and sutures must, of course, correspond with the extent of the

wound. This is the suture used in cases of hare-lip. The **BUTTON SUTURE**, of Dr. Bozeman, of Alabama, employed in vesico-vaginal fistula, is a modification of this. 6. The **SUTURE À ANSE**, of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally. 7. The **IMPLANTED SUTURE**, (F.) *Suture implantée*, is formed by pins arranged parallel to the edges of the wound, and implanted in their substance. By means of threads, the needles are approximated so as to bring the edges of the wound together. 8. The **PLASTIC SUTURE**, so called by Prof. Panncoast, of Philadelphia, its proposer, is a suture by tongue and groove. The groove is made by an incision in the part, which is to receive the flap. The tongue is made on the flap by bevelling off the two surfaces, cuticular and adipose. The suture is made by passing a loop of thread, by two punctures, deep through the inner lip of the groove. The two needles are passed through the base of the tongue, and again through the outer lip of the groove. The two ends of the thread are then tied over a small roll of adhesive plaster, by which the tongue is, of necessity, forced deep into the groove. Four raw surfaces are thus firmly held in connection, making the union of parts, by this suture, a very certain process.

SUTURE, BUTTON, see Suture, (twisted) — s. **Clamp**, see Suture, (quilled) — s. **Compound Suture**, quilled — s. **Continued Suture**, glover's — s. *Écailleuse*, Squamous suture — s. *Empennée*, Suture, quilled — s. *Emplumée*, Suture, quilled — s. *Eucherillée*, Suture, quilled — s. *Entortillée*, Suture, twisted — s. *Entrecompée*, Suture, interrupted — s. **False Harmony**, see Suture — s. *Implantée*, see Suture, (implanted) — s. *Occipitale*, Lambdoid suture — s. *Occipito-parietal*, Lambdoid suture — s. *de Pelletier*, Suture, glover's — s. **Perineal, Perinaorrhaphy** — s. **Plastic**, see Suture — s. *à Points passés*, Suture, common — s. *à Points séparés*, Suture, interrupted — s. **Sagittal**, see Sagittal suture — s. *Squamense*, Squamous suture — s. *en Surget*, Suture, glover's — s. **Superficial Harmony** — s. **Uninterrupted**, see Suture, glover's.

SWAB, from Sax. *ƿæbban*, 'to clean with a mop.' A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to decedent parts. The process is termed *Scabbing*.

SWADDLING CLOTHES, Swathing clothes.

SWAGBELLY, Physconia.

SWALLOW, *Hirundo* — s. **Wort**, *Aselepias vincetoxicum* — s. **Wort**, orange, *Aselepias tuberosa* — s. **Wort**, tuberous-rooted, *Aselepias tuberosa* — s. **Wort**, white, *Aselepias vincetoxicum*.

SWALLOW'S NEST, *Nidus hirundinis*.

SWALME, Exerescence, Tumour.

SWAMP CABBAGE, *Dracontium foetidum* — s. **Dogwood**, *Petala trifoliata* — s. **Sickness**, Milk sickness — s. **Wood**, *Cephalanthus occidentalis*, *Direa palustris*.

SWARFE, Stupor, Syncope.

SWATHING CLOTHES, *Swaddling Clothes*, *Juennab'ula*, *Fascia*, *Panni*, from Sax. *ƿæðan*, 'to bind.' (F.) *Maillet*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAT, *Sudor* — s. **Bloody**, *Sudor cruentus* —

s. **Glands**, see *Perspiration* — s. **Root**, *Polemonium reptans* — s. **Seab**, *Crusta genu equinae*.

SWEATING, *Ephidrosis* — s. **Bath**, *Achicolum* — s. of **Blood**, see *Diapedesis*, and *Sudor cruentus* — s. **House**, *Achicolum* — s. **Plant**, *Eupatorium perfoliatum* — s. **Room**, *Achicolum* — s. **Sickness**, *Sudor Anglicus*.

SWEATING SICKNESS, MALWAH. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah in India.

SWEBBING, Syncope.

SWEE, Vertigo.

SWEEMING, Syncope.

SWEEMISH, see Syncope.

SWEET BITTER, *Triosteum* — s. **Bread**, *Pancreas*, *Thymus* — s. **Bush**, *Comptonia asplenifolia* — s. **Fern**, *Comptonia asplenifolia* — s. **Flag**, *Acorus calamus* — s. **Pod**, *Cerontium siliqua* — s. **Root**, *Aralia nudicaulis*.

SWELLING, *Epanante'ma*, *Exar'ma*, *Exade'sis*, *Pre'sis*, *Pre'sema*, *Oncus*, *Ectumefactio*, *Tumor*, *Tumefactio*, (Prov.) *Blaving*, *Boist*, *Cont*, (Old Eng.) *Boche*, *Bollyuge*, *Bolning*, (F.) *Eufure*, *Gouflement*, from Sax. *ƿyellan*, (D.) *swellen* (G.) *schwellen*, 'to swell,' Morbid increase of bulk in the whole, or a part, of the body. See *Tumour*.

SWELLING, WHITE, *Hydrarthrus*.

SWENSIE, *Cynanche*.

SWENYNG, *Somnium*.

SWERE, Stupor, Syncope.

SWERTIA CHIRAYITA, *Gentiana chirayita* — s. *Difformis*, see *Calumba* — s. *Frasera*, see *Calumba* — s. *Lutea*, *Gentiana lutea*.

SWEULN, *Somnium*.

SWEVYNG, *Somnium*.

SWEVYNGG, *Somnium*.

SWIETE'NIA FEBRIF'UGA, after Van Swieten, *S. Sol'mida*, *Soym'ida* seu *Cedre'la febrif'uga*, *Fel'rifuge* *Swiete'nia*, (F.) *Mahogan febrifuge*. Ord. *Meliaceæ*. *Sex. Syst.* *Decandria Monogynia*. The bark of this tree, which is a native of the East Indies, called there *Rohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ℞j to ℞ij of the powder.

SWIETE'NIA MAHOG'ANI, *Cedrus Mahog'ani*, *Mahogany Tree*, grows in the West Indies and tropical America, and is possessed of similar properties.

SWIETE'NIA SENEGALEN'SIS, *Khaya Senegalen'sis*. A common forest tree on the borders of the Gambia. The bark called *Caïl-cedra*, and *Kareou Khayi*, is bitter and antiperiodic.

SWIETENIA SOMIDA, *S. Febrifuga*.

SWIM, Air bladder.

SWIMBLADDER, Air bladder.

SWIMMING, *Natation* — s. **Bladder**, *Air bladder* — s. of the **Head**, *Vertigo*.

SWINACIE, *Cynanche tonsillaris*.

SWINE-POX, see *Varicella*.

SWINE-SAME, *Adeps*.

SWINE-THISTLE, *Sonchus*.

SWINNYNG, *Vertigo*.

SWOON, Syncope.

SWOONING, Syncope.

SWOUNDING, Syncope.

SYALADENITIS, *Inflamma'tio glandula'rum saliva'rum*, from *σαλον*, 'saliva,' *αδην*, 'a gland,' and *itis*, denoting inflammation. Inflammation of the salivary glands.

SYCAMINOS, *Morus nigra*.

SYCAMINUM, see *Morus nigra*.

SYCE, *Ficus*, *Ficus carica*.

SYCEA, *Ficus*.

SYCEPH'ALUS, from *συν*, 'with,' 'together,'

and κεφαλή, 'head.' A monster having two heads united together.

SYCIION, συκιον, from συκον, 'a fig.' A decoction of dried figs.

SYCIOS ANGULA'TUS. *One-seeded star cucumber, Wild Bryony.* The roots and seeds of this indigenous plant, Order, Cucurbitaceæ, are bitter, purgative and diuretic. It is used in dropsy in the same cases as bryony.

SYCITES, from συκον, 'a fig.' Wine, in which figs have been infused.

SYCITES, Catorehites.

SYCOMA, Ficus.

SYCO'SIS. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. A horny excrescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches;—*Phyma Sycosis, Rose'ola fice'sa, Acne ment'agra.* Of this he has given two species: 1. *Sycosis Menti, S. barbæ, Men'tagra, Menti'go, Varus Men'tagra, Mentagroph'ya, Chiuwelk, Chiuwelk, Barber's Itch, (F.) Dartre pustuleuse mentage*; and, 2. *Sycosis Capil'li, S. Capillit'ii.* The treatment, in both cases, resembles that for por-rigo favosa.

SYCOSIS, Ficus.

SYCUM, Ficus.

SYDERATIO, Sideratio.

SYLLEPSIS, Conception.

SYLLEPSIOLOG'IA, from συλληψις, 'conception,' and λογος, 'a description.' The doctrine of conception.

SYM, SYN, συν, 'with, together,' like the cum, con, cor, &c., of the Latins. A common prefix. Before b, p, ph, ps, and m,—sym, or syn, is changed into syp or xym, (com;) before c, ch, g, k, and x, into syn or xym, syg, xyg, (con;); before l into syl or xyl, (col;); before r into syr or xyr (cor;) and before s into sy or xy, and sys, (co and cos.)

SYMBLEPHARON. Ankyloblepharon.

SYMBLEPHARO'SIS, *Concretio palpebra-rum cum bulbo oculi*, from sym, and βλεφαρον, 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOL, *Sym'bolum, Character, (F.) Carac-tère*, from συμβαλλω (syn, and βαλλω, 'I throw'), 'I compare.' A sign or representation of some-thing else.

The following are the symbols used in pre-scriptions:

R, Recipe. See R.

gr., Granum, a grain.

ʒ, Serupulus seu scrupulum, a scruple.

ʒ, Drachma, a drachm.

ʒ, Uncia, an ounce.

lb, Libra, a pound.

lb, Libra, pounds.

℥, Minimum, a minim.

ʒ, Fluidrachma, a fluidrachm.

ʒ, Fluiduncia, a fluidounce.

o, Octarius, a pint.

C, Congius, a gallon. See Abbreviation.

SYMBOLE, Commisure.

SYMBOLEUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLICA, Symptomatology.

SYMBOLUM, Sympathy.

SYMÉTRIE, Symmetry.

SYMÉTRIQUE, Symmetrical.

SYMMELES, from sym, and μελος, 'an ex-tremity.' *Mon'opus.* A genus of monsters whose extremities are joined together: *Sirens.*—I. G. St. Hilaire.

SYMMETRIA, Symmetry.

SYMMETRICAL, *Symmet'ricus, συμμετρως, (F.) Symétrique*, from sym, and μετρον, 'to mea-sure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which—if situate, the one to the right, the other to the left of this line—have a similar conformation, and a perfectly analogous arrangement.

SYMMETRICAL DISEASES, see Symmetry.

SYMMETRY, *Symmet'ria, Commens'am, Mem-bro'rum Om'nium Competent'ia, Propor'tio, (F.) Symétrie.* The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side of the median line; *Bilatéral Symmetry.* Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed—and there is evidence in favour of the assertion—to be a law of the animal economy, that when uninfluenced by dis-turbing agents, all general or constitutional dis-eases affect equally and similarly the correspond-ing parts of the two sides of the body. This has been called the *Symmetry of Diseases*; and the resulting diseases are said to be *symmet'ricul.*

SYMMETRY OF DISEASES, see Symmetry.

SYMPARATERESIS, Observation.

SYMPASMA, Catapsasna.

SYMPATHESIS, Sympathy.

SYMPATHETIC, *Sympath'icus, Sympatheti-cus, (F.) Sympathique*, from sym, and παθος, 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affec-tion*, produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to dif-ferent nerves. See Trisplanchnic, Pneumogastric, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve—s. Middle, Pneumogastric—s. Nerve, Trisplanchnic nerve.

SYMPATHETIC POWDER, *Pulvis sympath'icus* or *Powder of Sympathy* of Sir Kenelme Digby, was composed of calcined sulphate of iron, pre-pared in a particular manner. It was long sup-posed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully ex-cluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic — s. *Nerf, Trisplanchnic nerve.*

SYMPATHY, *Sympath'ia, Sympathe'sis, Com-pas'sio, Consensus, Sympathetis'mus, Xympath'ia, Conflux'io, Conspirat'io, Commer'cium, Consor'tium, Homoiopath'ia, Homoieth'nia, Adelp'hix'is, Symbolis'mus, Symbolizat'io, Sym'bolum.* Same etymon. The connexion that exists between the action of two or more organs, more or less dis-tant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between

different organs throws light on the etiology of diseases, their seat, and the particular organs towards which our therapeutical means should be directed. See Irritation.

SYMPEPSIS, Coction.

SYMPEXIS, Concretion.

SYMPHORA, Congestion.

SYMPHOREMA, Congestion.

SYMPHORESIS, Congestion.

SYMPHORICARPUS RACEMOSUS, *Snow-berry*; from *συνφορέω*, 'to bear together,' and *καρπός*, 'fruit,' owing to the clustered berries. An indigenous plant, Order Caprifoliaceæ, Tribe Lonicereæ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

SYMPHYIA, Symphysis.

SYMPHYOCEPH'ALUS, *Metop'agæa*, *Cephalop'agæa*, from *συνφύσις*, (*συν*, and *φύσις*, 'to grow,') 'united together,' and *κεφαλή*, 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOTOMY, *Symphysiotomy*, *Symphysiotomy*, *Symphysiotomy*, from *συνφύσις*, and *τέμνω*, 'I cut.' The operation or section of the *Symphysis*, *Signatlian operation* or *sectum*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *désymphyser*, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHYS'IA, from *συνφύσις*, 'to grow together.' A malformation consisting in the union of parts that are usually divided.—Brechet.

SYMPHYSIOTOMIA, Symphysiotomy.

SYMPHYSIS, *Symphysia*, *Coalescentia*, *Coalitio*, *Coalitio*, (F.) *Symphysis*, from *συνφύσις*, (*συν*, 'with,' and *φύσις*, 'I grow'), 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name *symphysis* has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacro-iliac symphysis*, &c. See *Monster*.

SYMPHYTUM, Coalescence, Commissure, Insertion—s. *Cartilaginea*, *Synchondrosis*—s. *Ligamentosa*, *Syndesmosis*—s. *Ossium muscularis*, *Syssaerosis*—s. *Pubis*, *Pubic articulation*.

SYMPHYOTOMY, Symphysiotomy.

SYMPHYTOS, Hereditary.

SYMPHYTUM. Same etymon. *Symphytum officinale* seu *album* seu *Bohemicum*, *Consolida major*, *Camfrey*, *Alum*, *Alus*, (Prov.) *Knit-back*, (F.) *Grande Consoude*, *Oreilles d'âne*. Ord. *Borraginaceæ*. *Sex. Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhoea, &c.

SYMPHYTUM, *Solidago virgaurea*—s. *Album*, *Symphytum*—s. *Bohemium*, *Symphytum*—s. *Minimum*, *Bellis*—s. *Minus*, *Prunella*—s. *Officinale*, *Symphytum*.

SYMPHYTUM PETRÆ'UM, *Coris Monapeliensis*, *Montpel'ier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, *Sanicula*.

SYMPLOCARP'US ANGUSTISPATHA, *Dracontium angustispatha*—s. *Fætida*, *Dracontium fœtidum*.

SYMPOD'IA, *Monopod'ia*, from *συν*, and *πους*, *πούς*, 'a foot.' A monstrosity in which there is coalescence of the lower extremities.

SYMPTOM, *Symptom'ia*, *Ac'cidens*, *Causa*, from *συν*, and *πτωσις*, 'a fall,' from *πιπτω*, 'I fall.' Any change, perceptible to the senses in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. *Symptom*, at one time, was generally used in the same sense as *sign*; but with many, perhaps most, of the present day, the former signifies a functional or vital phenomenon of disease, whilst the latter is applied to that which is more directly physical:—and hence the expressions *functional* or *vital phenomena* or *symptoms*, in contradistinction to the *physical signs* afforded by auscultation, percussion, &c. See *Sign*.

SYMPTOMA TURPITUDINIS, *Nymphomania*.

SYMPTOMATIC, *Symptomat'icus*, (F.) *Symptomatique*. That which is a symptom of some other affection. Thus we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOGRAPHY, *Semeiography*.

SYMPTOMATOLOGY, *Symptomatology*, *Symbology*, from *symptomata*, and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

SYMPTOSIS, from *συν*, and *πτωσις*, 'I fall.' Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

SYN, *Syn*.

SYNEREMA, *Corrugation*.

SYNERGION, *Concausa*.

SYNANCHIE, *Cynanche*, *Cynanche tonsillar*.

SYNANCHIE, *Cynanche*.

SYNAPHYMENTIS, see *Ophthalmia*.

SYNAPTASE, see *Amygdalin*.

SYNARTHRODIA, *Synarthrosis*.

SYNARTHRODIAL, *Synarthrodial'is*, from *συν*, and *ἄρθρωσις*, 'articulation.' That which belongs to *synarthrosis*; as *Synarthrodial articulation*.

SYNARTHROSIS, *Synarthrodia*, *Articulation'is*, *Coarticulation'is*. An immovable articulation. *Synarthrosis* includes three species: *Suture*, *Harmony*, and *Gomphosis*.

SYNARTHROESIS, *Congestion*.

SYNATHROISMUS, *Congestion*.

SYNCAN'THUS, from *συν*, and *κανθος*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

SYNCHONDROSIS, *Symphysia* seu *Copula* seu *Connex'ia cartilaginea*, *Chondrosyndesmosis*, from *συν*, and *χονδρός*, 'a cartilage.' Union or articulation of bones by means of cartilage:—as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

SYNCHONDROTOMY, *Symphysiotomy*.

SYNCHRONIUS, *Synchronous*.

SYNCHRONOUS, *Syn'chronus*, *Synchron'is*, *Isochronous*, from *συν*, and *χρονος*, 'time.' That which occurs at the same time. Thus the pulsations of an artery are said to be synchronous with those of the heart.

SYNCHRONUS, *Synchronous*.

SYNCHYSIS, *Confusio*—s. *Sparkling*, *Confusio*.

SYNCIPUT, *Sineiput*.

SYNCLONESIS, Synclonus.

SYN'CLONUS, *Synclone'sis*, from *συγκλονεω*, (*συν*, and *κλονεω*, 'I shake,') 'I shake together.' Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will; *Clon'ici universales*, *Clonus*, (Young.) Also, general spasm, *spas'mus universalis*. See Tremor, Chorea, &c.

SYNCLONUS BALLISMUS, Paralysis agitans—s. Beriberia, Beriberi—s. Chorea, Chorea—s. Raphania, Raphania—s. Saltans, Chorea—s. Tremor, Tremor.

SYNCOMIS'TUS, from *συγκομιζω*, (*συν*, and *κομιζω*), 'I bring together.' *Αντοψυρος*, *Panis domesticus*, *secundarius*, *cibarius*, *confusivus*. Bread of the whole wheat, or of the unsifted meal. *Household bread*. Also a cataplasm made of the same.

SYN'COPAL, *Syncopalis*, *Syncopticus*, *Syncoptus*. Same etymon as Syncope; as *Syn'copal Fever*, *Febris Syncopalis*. A pernicious intermittent, characterized by repeated attacks of syncope.

SYN'COPE, from *συκοπω*, (*συν*, and *κοπω*, 'to fall,') 'I fall down.' *An'imi defectio seu deliquium*, *Leipopsych'ia*, *Lipopsych'ia*, *Ap'sych'ia*, *Apsyx'ia*, *Lipsis An'imi*, *Asphyx'ia*, *Apsyx'ia*, *Lipothym'ia*, *Leipothym'ia*, *Lipophyx'ia*, *Eclips'is*, *Su'bitus animi casus*, *Anencephalohæmia*, *Ap'sychy*, *Swoon*, *Swooning*, *Fainting*, *Fainting fit*, *Faintness*, *Exol'ution*, (Sc.) *Drow*, *Dualm*, *Swarzf*, *Swerf*, *Searth*, (Prov.) *Fower*, *Sæebbing*, *Siceeming*, *Sicounding*, *Somd*, (F.) *Évanouissement*, *Défaillance*, *Pamouison*. Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed *faintishness*; and the person is said to be *faint*, (Prov.) *Siveish*.

SYNCOPE ANGENS, Angina pectoris—s. Anginosa, Angina pectoris.

SYNCOPTICUS, Syncopal.

SYNCOPTUS, Syncopal.

SYNCRITICA, Astringents.

SYNDACTYLUS, Aschistodactylus.

SYNDESMITIS, see Ophthalmia. Also, inflammation of articular ligaments: *Inflammatio ligamentorum*, from *syndesmos*, 'ligament,' and *itis*, denoting inflammation.

SYNDESMOG'RAPHY, *Syndesmograph'ia*, from *syndesmos*, 'a ligament,' and *γραφη*, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOL'OGY, *Syndesmolog'ia*, from *syndesmos*, 'a ligament,' and *λογος*, 'a treatise, discourse.' A treatise on the ligaments.

SYNDESMO-PHARYNGE'US. A fasciculus of the constrictor pharyngis superior.

SYNDESMOS, Ligament.

SYNDESMO'SIS, *Synnenro'sis*, *Synyme'nesis*, *Connex'io seu Syn'physis ligamentosa*, *Commis'sura ner'væ*, *Connervatio*, *Colligatio*, from *syndesmos*, 'ligament.' The articulation of two or more bones by means of ligament;—as of the radius with the ulna.

SYNDESMOT'OMY, *Syndesmotom'ia*, from *syndesmos*, 'ligament,' and *τεμνω*, 'I cut or dissect.' Dissection of the ligaments.

SYNDESMUS, Bandage, Ligament.

SYN'DROMĒ, from *syn*, and *δρομος*, 'a course.' *Concur'sus*, *Concourse*. A name given by the Empirical Sect to the union of symptoms which takes place in diseases:—*Syndromē plethorica*, for example, meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHES, see Continued fever.

SYNECHIA, from *syn*, and *εχειν*, 'to have,' or 'to hold.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia anterior*; the latter, *S. posterior*.

SYNERGIA, Synergy.

SYNERGIA, Synergy.

SYNERGIE, Synergy.

SYN'ERGY, *Synergi'a*, *Synergy'a*, (F.) *Synergie*; from *syn*, and *εργον*, 'work.' A correlation or concurrence of action between different organs in health; and, according to some, in disease.

SYNESIS, Intellect.

SYNEUROSIS, Syndesmosis.

SYNEZISIS, *Synize'sis*, *Consident'ia*, from *syn*, and *ευνυζειν*, 'to join.'

SYNEZISIS PUPILL'Æ, *Parop'sis Synizesis*, *Caligo à Synizesi*, *Caligo seu Imperforatio seu Phthisis pupillæ*, *Amys'is*, *Closure or occlusion or obliteration of the Pupil*. This disease is sometimes a faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezisis are completely blind: the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil*.

SYNGENES, Hereditary.

SYNGENICUS, Congenital.

SYNHYMENESIS, Synymenesis.

SYNIMENESIS, Synymenesis.

SYNZESIS, Considentia, Synezis.

SYNEUROSIS, Syndesmosis.

SYN'OCHA, from *συνεχω*, (*συν*, and *εχω*, 'I have or hold,') 'I continue.' *Inflam'matory or Dynam'ic Fever*, *Angiop'ryra*, *Sthenop'ryra*, *Febris cunso'des seu canmato'des seu deu'rens seu ardens seu contin'ua sanguin'ea seu contin'ua non putris seu ocmastica seu acutu seu acuta sanguin'ea seu continens seu continens non putrida seu angioten'ica seu sthenica seu sanguin'ea seu inflammat'ria*, *Homot'onos*, *Syn'ochus* (Vogel), *S. impu'tris* (Galen), *Ene'cia canna seu ton'ica*, *Phlogop'ryrus*, *Canna*, *Calentura continua*, (F.) *Fièvre ardente ou continente inflammatoire ou sanguine ou irritative ou angeioténique ou inflammatoire*, *Gastro-entérite intense*; *General inflammation*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute—s. Vaccina, Vaccina.

SYN'OCHAL, *Synocha'lis*; same etymon. Relating to, or having the characters of, synocha.

SYN'OCHUS, *Ene'cia syn'ochus*, *Febris leuta*, (Linnæus), same etymon. Continued fever, compounded of synocha and typhus:—in its commencement often resembling the former; in its progress, the latter: *Mixed fever*, *Common continued fever*, *Syn'ochoid fever*. See Continued fever, Fever, and Typhus.

SYNOCHUS, Synocha—s. Biliosa. Fever, gastric, Fever, bilious—s. Catarrhalis, Influenza—s. Icteo-

roides, Fever, yellow—s. *Imputris*, *Synocha*—s. *Miliaria*, Miliary fever—s. *Varicella*, *Varicella*.

SYNOLE, Spasm.

SYNONIA, Synovia.

SYNOSTEOGRAPHY, *Synosteographia*, from *syn*, σστων, 'a bone,' and *γραφω*, 'I describe.' The part of anatomy which describes the joints.

SYNOSTEOLOGY, *Synostelogy*'ia, from *syn*, σστων, 'a bone,' and *λογος*, 'a treatise.' A treatise on the joints.

SYNOSTEOSIS, *Synosto'sis*, from *syn*, and σστων, 'a bone.' Union by means of bone.

SYNOSTEOTOMY, *Synosteotomia*, from *syn*, 'with,' σστων, 'a bone,' and *τεμνω*, 'to cut.' Dissection of the joints.

SYNOSTOSIS, Synostosis.

SYNOVIA, from *syn*, and *ων*, 'an egg.' *Mucil'go*, *Un'guen seu Unguen'tum seu Smeqma articulo'rum*, *Synovia*, *Arum'gia articulo'ris*, *Mucil'go articulo'rum seu junctura'rum*, *Humor articulo'ris*, *Hydrarthrus*, *Humor seu Hæmidium nativum seu Gluten articulo'rum*, *Arthrohydrine*, (F.) *Synovie*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, albumen, soda, chloride of sodium, phosphate of lime, and—Foureroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNOVIAL, *Synovialis*. That which relates to the synovia.

SYNOVIAL GLANDS, *Havers's Glands*, *Gland'ule articulo'res seu Synoviales seu Haversianæ*, are the secretory fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been called *Synovial sim'bræ*, (F.) *Frangæ synoviales*.

SYNOVITIS, from *Synovia*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane, *arthrophlogo'sis synovialis*. When it affects the bursæ, it is, sometimes called *Bursitis*.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (neute.)

SYNTASIS, *συνταξις*, from *συντενω*, (*συν*, and *τενω*, 'I stretch,' 'I strain.') Tension of parts: hence *συνταξια*, are medicines which render parts tense. *Syntex'is*, on the other hand, means *Colligatio*, or wasting of the body; from *συντηκω*, 'I melt together.'

SYNTAXIS, Articulation, Reduction, Taxis—g. *Serrata*, see Suture.

SYNTEOPYRA, Hectic fever.

SYNTECTOPYRA, Hectic fever.

SYNTENOSIS, from *syn*, and *τενω*, 'a tendon.' A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERESIS, Prophylaxis.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colliquation, Consumption, see Syntasis.

SYTHIENA. A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina.

SYTHESIS, *Ren'io*, 'composition or putting together,' from *syn*, and *τιθημι*, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. *Ren'io junctum separata'rum*, *Syn'thesis of contin'ity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Syn'thesis of contin'ity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYNTHESIS, Composition.

SYNTHETISMUS, same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counter-extension, coaptation, and bandaging.

SYNTONINE, see Fibrin.

SYNTRIPMA, Conditio.

SYNTRIPMA, Conditio.

SYNTROPHIOS, Connutritus.

SYNULOSIS, Cicatrization.

SYNULOTICA, Cicatrization.

SYNUSIA, Coition.

SYNYME'NESIS, *Synhyme'nesis*, *Synime'nesis*, from *syn*, and *υμνη*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the fœtus.

SYNYMENESIS, Syndesmosis.

SYPHAR, Peritonæum.

SYPHILIDES, *Syphillid'æ*, (F.) *Dermo-syphillides*, *Dermatosis véroleuse*. Same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

SYPHILIDIATER, *Syphillidiater*, from *Syphillis*, and *ιατρος*, 'a physician.' A pox doctor. One who occupies himself in treating syphilis.

SYPHILIDOMANIA, Syphilomania.

SYPHILIPHO'BIA, from *Syphillis* and *φοβος*, 'dread.' A morbid dread of syphilis, giving rise to fancied symptoms of the disease: a form of hypochondriasis.

SYPHILIS, *S. ven'erea seu maligna*, *Siphilis*, *Syphillismus*, *Cachex'ia seu Cacoehym'ia Ven'erea*, *Malum ven'ereum*, *Puden'dago*, *Mercurium*, *Lues*, *L. ven'erea seu syphillis*, *Morbus Gall'icus seu Ital'icus seu Hispan'icus seu Neapolitanus seu Ind'icus seu apheodis'ius*, *Pactus*, *Basilis'cus*, *Boæ*, *Sod'oma Gallo'rum*; *Veneréal*, *Veneréal Disease*, *Pox*, *French Pox*, *French Crust*, *French Distemper*, *Foul Disease*, old cant term, *Grievous*, (Prov.) *Pip*, (Sc.) *Glengore*, *Glengour*, *Grandgore*, (F.) *Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Française*, *Maladie de Vénus*. The etymology of syphilis is unknown. Some consider it to proceed from *svs*, 'a hog,' and *φιλω*, 'I love;' others, from *συν*, 'with,' and *φιλω*, 'I love;' and others, with more probability, from *ειψλος*,—formed, by contraction, from *σιπαλος*,—'a reproach,' &c. It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a primary symptom or sore; but there are others which are secondary or constitutional. These are:—ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed tertiary phenomena. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisiphilic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and

tonics and eutrophics have been administered. The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

SYPHILIS INDICA, Frambœsia.

SYPHILIS PSEUDO-SYPHILIS, *Lues Syphiloïdes*, *Pseudo-syphilis*. A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Sivvens*, *Radesyge*, &c., have been referred to this head.

SYPHILISATION, Syphilization.

SYPHILISMUS, Syphilis.

SYPHILITIC, *Syphiliticus*, (F.) *Syphilitique*, *Véroligne*, *Vérolé*. Belonging, or relating to syphilis—as ‘a syphilitic ulcer.’

SYPHILIZATION, *Syphilitisatio*, (F.) *Syphilisation*. Saturation of the system by inoculation with the matter of syphilis. It has been used as a curative procedure in syphilis, as well as a preventive of that disease; and for the cure of other cachexiæ, as cancer.

SYPHILODERM'A, from *syphilis*, and *δερμα*, ‘skin.’ A cutaneous eruption of a syphilitic character.—E. Wilson.

SYPHILOG'RAPHER, from *syphilis*, and *γραφω*, ‘I describe.’ A writer on syphilis.

SYPHILOID, *Syphiloïdes*; from *syphilis*, and *ειδος*, ‘resemblance.’ Resembling syphilis,—as ‘a syphilitoid affection.’

SYPHILOM'ANIA, *Syphilidomania*,—vulgarly, *Noddlé Pox*. A mania, with which some persons are affected, so that they subject themselves to antivereal treatment, under the erroneous impression that they are affected with syphilis.

SYPHITA, Sommelularis.

SYPHOAURICULIS, Ottenchytes.

SYPHON, see Siphon.

SYRIGMOPH'ONIA, from *συριγμος*, ‘piping,’ and *φωνη*, ‘voice.’ A piping state of the voice.

SYRIGMUS, Tinnitus aurium.

SYRINGA, Eustachian Tube, Fistula, Syringe, Trachea—s. *Clysmatica*, Syringe, (Clyster.)

SYRIN'GA VULGA'RIS, *Lilac vulga'ris*, *Common Lilac*. Ord. Oleaceæ. The leaves and fruit are bitter and somewhat acrid, and have been used as tonics and antiperiodics.

SYRINGE, *Syr'inx*, *Syrin'ga*, *Sipho Siphun'entus*, *Squrt*, (F.) *Seringue*, from *σφαις*, *σφαιγος*, ‘a pipe.’ A familiar apparatus through which any liquor is injected.

Various forms of syringe are used in medicine and surgery.

SYRINGE, **CLYSTER**, *Syrin'ga clysmatica*, *Clystanti'um*, (F.) *Clysopompe*. A syringe for administering clysters.

SYRINGE, **CUPPING**, *Antlia sanguisuga*.

SYRINGES AÉRIFERI, see Bronchia.

SYRINGICUS, Fistulous.

SYRINGITIS EUSTA'CHII, Inflammation of the Eustachian tube.

SYRINGMOS, Tinnitus aurium.

SYRINGODES, Fistulous.

SYRINGOTOME, *Syringot'omus*, *Syringot'omum*, from *σφαις*, *σφαιγος*, ‘a pipe,’ ‘a fistula,’ and *τεμνειν*, ‘to cut.’ A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts.

SYRINGOT'OMY, *Syringotom'ia*. Same etymon as the last. The operation for fistula in ano by incision.

SYRINX, Eustachian tube, Fistula, Syringe, Trachea—s. *Hiera*, Vertebral column.

SYRMAIS'MOS, from *σφαιζω*, ‘I evacuate.’ A gentle evacuation by vomiting or stool.

SYROP, Syrup—s. *d'Ail*, Syrupus allii—s. *d'Armoise composé*, Syrupus aromaticus—s. *de Chicorée composé*, Syrupus de cichorio compositus—s. *des Cinq racines*, Syrupus e quinque radicibus—s. *de Coquelicot*, Syrupus rhœados—s. *de Cuisinier*, Syrupus de sarsaparillâ et sennâ compositus—s. *d'Éther*, Syrupus cum æthere sulphurico paratus—s. *de Gingembre*, Syrupus zingiberis—s. *de Gnimawec*, Syrupus althææ—s. *de Longue vie*, Mellitus de mercuriali compositum—s. *de Mercure*, Syrupus de mercurio mediante gummi—s. *de Mon de veon*, see Syrupus zingiberis—s. *de Mûres*, Syrupus mori—s. *de Nerprun*, Syrupus rhamni—s. *de Pavots blancs*, Syrupus papaveris—s. *de Pommes composé*, see Syrupus sennæ—s. *de Quinquina avec le Vin*, Syrupus de kinâ kinâ cum vino—s. *de Roses pâles*, Syrupus rosæ—s. *de Roses rouges*, Syrupus rosæ—s. *de Vinaigre*, S. aceti.

SYRUP, Syrup, *Syr'upus*, *Serapi'um*, *Serape'um*, (F.) *Syrop*, *Sirop*, *Saccharolé liquide*, *Saccharohydrolé*; derived, according to some, from *συρω*, ‘I draw,’ and *σπος*, ‘juice,’ but more probably, from the Arabic *Siruph*, *Sirab*, or *Scharab*, which signifies ‘a potion.’ A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it is directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1.261 when boiling, and about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

SYRUP OF ALMONDS, Syrupus amygdalæ.

SYRUP, **ANTISCORBUTIC**, Syrupus antiscorbuticus—s. *Balsamic*, Syrupus toltanus.

SYRUP OF BUCKTHORN, Syrupus rhamni—s. of Calfr's lungs, see Syrupus zingiberis—s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino—s. of Cinchona, Syrupus cinchonix—s. of Citric acid, Syrupus acidi citrici—s. of Clove July flower, Syrupus caryophylli rubri—s. of Clove pinks, Syrupus Caryophylli rubri—s. of Cochina, Syrupus cœci—s. of Emetine, Syrupus emetinæ—s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlic, Syrupus allii—s. of Ginger, Syrupus zingiberis—s. of Gum Arabic, Syrupus acaciæ,

SYRUP, **HIVE**, Syrupus scillæ compositus.

SYRUP OF HONEY, Mellitus simplex—s. of Iodide of iron, Liqueur Ferri iodidi—s. of Ipecacuanha, Syrupus ipecacuanhæ—s. of Jalap, Syrupus jalapæ—s. of Lemon, Syrupus limonis—s. of Marshmallow, Syrupus althææ—s. of Meadow saffron, Syrupus colchici autumnalis—s. of acetate of Morphia, Syrupus morphiæ acetatis—s. of muriate of Morphia, Syrupus morphiæ muriatis—s. of Mugwort, compound, Syrupus aromaticus—s. of Mulberries, Syrupus mori—s. of Orange juice, see Syrupus aurantii—s. of Orange peel, Syrupus aurantii—s. of Orgeat, Syrupus amygdalæ—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhœados—s. of Quinia, Syrupus quiniæ—s. of Rhu-

tany, Syrupus kramerizæ—s. of Rhubarb, Syrupus rhei—s. of Rhubarb, aromatic, Syrupus rhei aromaticus—s. of Rhubarb, spiced, Syrupus rhei aromaticus—s. of Roses, Syrupus rosæ—s. of Roses, red, Syrupus rosæ gallicæ—s. of Saffron, Syrupus croci—s. of Sarsaparilla, Syrupus sarsaparillæ—s. of Sarsaparilla and senna, compound, Syrupus de sarsaparilla et sennâ compositus—s. of Sarsaparilla, compound, see Syrupus de sarsaparilla et sennâ compositus—s. of Sarsaparilla, Indian, Syrupus heiduesmi—s. of Scammony, Syrupus de scammonia—s. of Seneka, Syrupus senegæ—s. of Senna, Syrupus sennæ—s. Simple, Syrupus simplex—s. of Squill, Syrupus scillæ—s. of Squill, compound, Syrupus scillæ compositus—s. of Suceory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus tolu-tanus—s. of Vinegar, Syrupus aceti—s. of Violets, Syrupus violæ—s. of Wild cherry bark, Syrupus Pruni Virginianæ.

SYRUPUS, S. simplex.

SYRUPUS ACA'CIÆ, *Syrup of Gum Arabic*, (Acacia) ℥ij, Sacchar. ℥xv, Ag. f ℥viij. Dissolve the gum in the water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose, f ℥j to f ℥ij.

SYRUPUS AC'ETI, S. Ac'idi Aceto'si, *Syrup of Vinegar*, (F.) Syrop de Vinaigre. (Aceti Oiiiss, sacch. purif. lbijss. Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose, f ℥j to f ℥ij.

SYRUPUS ACIDI ACETOSI, S. aceti.

SYRUPUS AC'IDI CIT'RICI, *Syrup of Citric Acid*. (Acid. citric. pulv. ℥ij; Ol. Limon. ℥iv; Syrup. Oij. Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

SYRUPUS CUM Æ'THERE SULPH'URICO PARATUS, *Syrup of Ether*, (F.) Syrop d'ether. (Very pure sugar, 1000 p.; distilled water, 500 p.; dissolve in the cold, and strain; add sulphuric ether, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

SYRUPUS AL'LII, *Syrup of Garlic*, (F.) Syrop d'ail. (Allii recent. concis. ℥vj, aceti. destillat. Oj, sacchar. lbij. Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) Use, same as that of garlic. Dose, f ℥j to f ℥ij.

SYRUPUS ALTHÆÆ, S. ex Althæ'a seu de Althæ'a seu Althææ officinalis, *Syrup of Marsh-mallow*, (F.) Syrop de Guimauve. (Althææ rad. recent. cont. ℥ss, sacch. pur. lbij, aquæ Oiv. Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose, f ℥j to f ℥ij.

SYRUPUS AMOMI ZINGIBERIS, S. zingiberis.

SYRUPUS AMYGD'ALÆ, *Syrup of Almonds*, S. of Orgeat, Orgeat. (Amygdal. dulc. lbj, amygdal. amar. ℥iv, aquæ, Oij, sacchar. lbvj. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluid-ounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles, which must be well stopped, and kept in a cool place. Ph. U. S.)

SYRUPUS ANTIC'AUSOTICI, see Anticausodie.

SYRUPUS ANTISCORBU'TICUS, S. de Armora'ciâ

compositus, *Antiscorbutic Syrup*. (Leaves of cochlearia, blackbean, water-cresses, horse-radish root and bitter oranges, each lbj, cinnamon, ℥ss. Cut, and pour on white wine lbiv. Macerate for two days; distil over Oj in a sand-bath; add to this sugar, lbij, and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add sugar lbij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. Ph. P.) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, f ℥ij to f ℥ij.

SYRUPUS AROMAT'ICUS, S. de Artemisiâ compositus, *Compound Syrup of Mugwort*, (F.) Syrop d'armoise composé. (Tops of artemisia vulgaris, in flower, ℥vj, inula root, lignisticum levisticum, and fennel, each, ℥ss, pennyroyal, catmint, sarine leaves, each ℥vi, marjoram, hyssop, pyrethrum, rue, basil, each ℥ij, niseed and cinnamon, each ℥ix; bruise and macerate in hydromel lbxviij; distil over Oss; add to this a pound of sugar. Again, take the liquid that remains in the cucurbit, strain it gently; and add sugar lbiv. Then mix the two. Ph. P.) Tonic, emmenagogue, &c.

SYRUPUS DE ARMORACIÂ COMPOSITUS, S. antiscorbuticus—s. de Artemisiâ compositus, S. antiscorbuticus—s. Asparagi, see Asparagus.

SYRUPUS AURANTII, S. Aurantiorum seu Citri Aurantii seu Corticis Aurantii seu Aurantii Corticis (Ph. U. S.) seu e Corticibus Aurantiorum seu de Corticē Aurantiorum, *Syrup of Orange peel*. (Aurant. cort. cont. ℥ij, ag. fer. Oj, sacch. lbjss. Macerate the peel in the water for twelve hours. Add the sugar. Ph. U. S.) Stomachic. Dose, f ℥j to f ℥ij.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding white sugar lbij to lbj of the juice of oranges, strained and clarified.

SYRUPUS BALSAMICUS, S. toluatanus.

SYRUPUS CARYOPHYLLI RUBRI, S. Infusio'nis florum caryophyllorum, S. Dianthi Caryophylli, *Syrup of Clove July flower or of Clove Pink*. (Petalarum dianthæ, caryoph. recent., unguibus resectis, lbj, aquæ bull. Oiv, sacch. purif. lbvij. Ph. E.) Aromatic.

SYRUPUS CASSLE SENNÆ, S. sennæ.

SYRUPUS DE CICHORIO COMPOSITUS, S. de Rheo, *Compound Syrup of Suceory*, (F.) Syrop de chicorée composé. (Root of suceory ℥vj, leaves of suceory ℥ix, leaves of fumitory and scolopendrinum, each ℥ij, Alkekeugi berries ℥ij. Boil in water Oxiv to Oxij; pass through cloth, and dissolve in white sugar lbv. Boil till it has the consistency of syrup. Again, take water Ovij, rhubarb ℥vj, yellow sanders and cinnamon, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. Ph. P.) It is laxative and stomachic. Dose, f ℥j to f ℥ss.

SYRUPUS CINCHONÆ CUM VINO, S. de kinâ kinâ cum vino.

SYRUPUS CINCHO'NIÆ, *Syrup of Cincho'nia*. (Simple syrup one pound; sulphate of cinchonina nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS CITRI AURANTII, S. aurantii.

SYRUPUS COCCI, *Syrup of Cochineal*. (Cocc. cont. ℥iv. Ag. destillat. bullient. Oj (Imp. meas.), sacchar. lbij, vel q. s. Sp. rectificat. f ℥iiss, vel q. s. Ph. L.) Chiefly used as a coloring agent.

SYRUPUS COL'CHICI AUTUMNALIS, S. Colchici, *Syrup of Meadow Saffron*. (Rad. colch. autumn. recent. ℥j, acidi acetoni, f ℥xvi, sacch. pur. ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain with gentle expression. To the strained fluid add the sugar, and boil to a syrup. Ph. E.) Diuretic, antiarthritic. Dose, f ℥j to f ℥ss, or more.

SYRUPUS CORTICIS AURANTII, *S. aurantii* — *s. Citri medicæ, S. limonum* — *s. e Succo citronum, S. limonum.*

SYRUPUS CROCI, *Syrup of Saffron.* (*Croci stigmata*, ℥j, *aquæ fervent.* Oj, *sacch. purif.* ℥iiss. *Ph. L.*) Cardiac. Chiefly used for colouring.

SYRUPUS DIACODION, *Diacodium* — *s. Dianthi Caryophylli, S. caryophylli rubri.*

SYRUPUS EMETICÆ, *Syrup of Emetine.* (*Simple syrup* ℥ij, *emetine* 16 gr.) In small doses, expectorant; and in large, emetic.

SYRUPUS EMPYREUMATICUS, Melasses — *s. Ferri iodidi, Liqueur Ferri iodidi.*

SYRUPUS HEMIDESMI, *Syrup of Indian Sarsaparilla.* (*Hemidesm.* cont. ℥iv (avoidup.), *Ag. destillat. bullient.* Oj (Imp. meas.), *sacchar.* q. s. *Ph. D.*) A weak preparation of hemidesmus.

SYRUPUS HYDRARGYRI, *Syrupus de mercurio mediante gummi* — *s. Infusionis florum caryophyllorum, Syrupus caryophylli rubri.*

SYRUPUS IPECACUANÆ, *Syrup of Ipecacuanha.* (*Ipecac.* in pulv. crass. ℥j, *alcohol. dilut.* Oj, *sacchar.* ℥iiss, *aquæ* q. s. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. *Ph. U. S.*) It may also be prepared by displacement.

SYRUPUS DE JALAP'Â, *Syrup of Jalap.* (*Pulv. Jalapæ* ℥x, *sem. coriandr., fœnicul. dulc.* āā ℥ss; *aquæ* f ℥xijss, *sacch.* ℥xxv. *Ph. P.*) Cathartic. Dose, f ℥ij to f ℥ss for children.

SYRUPUS DE KINÀ KINÀ CUM VINO, *S. Cinchona cum vino, Syrup of Cinchona with wine.* (*F.*) *Syrup de quinquina avec le vin.* (*Cort. cinchona officinalis* ℥ij, *ext. cinchonæ* ℥vj, *vini albi* (*Vin. Lunel. seu cujusvis ei similis.*) Oj, *alcohol* (s. g. 985 to 915.) f ℥j, *sacchar.* lb. ℥iiss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. *Ph. P.*) Dose, f ℥ss to f ℥j.

SYRUPUS KRAMERLE, *Syrup of Rhatany.* (*Ext. Kramer.* ℥ij, *aquæ* Oj, *sacchar.* ℥ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. *Ph. U. S.* It may also be made by displacement from *kramer.* in pulv. crass. ℥ij, *sacchar.* ℥iiss; *aq.* q. s.) An adjunct to astringent mixtures; or given in diarrhoea, a teaspoonful to a child.

SYRUPUS LIMONIS, *S. Limonum* — *s. Succi limonis, S. limonum.*

SYRUPUS LIMO'NUM, *S. limonia* (*Ph. U. S.*) *seu citri medicæ seu e succo citro'num seu e succo limo'num seu succi limonis, Syrup of Lemon.* (*Limon Syrup.* (*Limon. succ. colat.* Oj, *sacchar.* ℥ij.) Cooling, antiseptic.

SYRUPUS E MECONIO, *S. papaveris* — *s. de Melle, Mellitum simplex.*

SYRUPUS DE MERCURIO MEDIAN'TE GUMMI, *S. Hydrargyri, Mercurius gummosus Plenc'ii.* (*F.*) *Syrup de mercure, Mercure gommeux de Plenc.* (*Hydrargyri pur.* ℥j, *p. gum. acaciæ,* ℥ij, *syrup diacod.* ℥ss. Rub together till the mercury is extinguished. *Ph. P.*) Possesses the properties of blue pill. Dose, gr. ij to viij, or more.

SYRUPUS MORI, *S. e succo mororum seu succi mori, Syrup of Mulberries.* (*F.*) *Syrup de mûres.* (*Mori succ. colat.* Oj, *sacchar. purif.* ℥ij. *Ph. L.*) Gratefully refrigerant.

SYRUPUS E SUCCO MORORUM, *S. mori.*

SYRUPUS MORPHLE ACETA'TIS, *Syrup of acetate of morphia.* (*Liq. morphicæ acet.* f ℥j, *syrup* f ℥xv. *Ph. D.*) Dose, f ℥ss to f ℥j, as an opiate.

SYRUPUS MORPHLE MURIA'TIS, *Syrup of muriate of morphia.* (*Liq. morph. muriat.* f ℥j;

syrup f ℥xvij. *M. Ph. D.*) Dose, f ℥ss to f ℥j, as an opiate.

SYRUPUS MORPHLE SULPHA'TIS may be made in the same way.

SYRUPUS NIGER, Melasses.

SYRUPUS PAPAVERIS, *S. papaveris somniferi seu papaveris albi seu emeco'no seu de meconio, Diacondium, Syrup of poppies.* (*F.*) *Syrup de pavots blancs ou Diacond.* (*Papav. capsul. excisat. et contus. exemptis seminibus,* ℥xiv, *sacch. pur.* ℥ij, *aq. fervent.* cong. ijss. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as to form a syrup. *Ph. L.*) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, *S. rheados* — *s. de Pomis compositus, see S. sennæ.*

SYRUPUS PROTEÆ, see *Protea mellifera.*

SYRUPUS PRUNI VIRGINIANÆ, *Syrup of Wild cherry bark.* (*Pruni Virginiana* in pulv. crass. ℥v, *sacchar.* ℥ij, *Aquæ,* q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. *Ph. U. S.*, 1851.) Dose, as a demulcent expectorant, f ℥j to f ℥ij.

SYRUPUS E PULMONIBUS VITULINIS, see *Syrupus Zingiberis.*

SYRUPUS QUINÆ, *Syrup of Quinia.* (*Simple syrup,* 2 pints, *sulphate of quinia,* 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS E QUINTÈ RADICIBUS, *Syrup of five roots.* (*F.*) *Syrup des cinq racines.* (*Rad. apii, fœniculi, apii petroselinii,* āā ℥v. Infuse for 24 hours in boiling water Oiss, and strain. *Rad. asparag., rusci aculeati,* āā ℥v, *aquæ,* Ovij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add *white sugar.* ℥vj. *Ph. P.*) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f ℥ss to f ℥j, or more.

SYRUPUS RHAMNI, *S. Rhamni cathartici seu de Spina cervinâ seu spina cervinâ, Syrup of Buckthorn.* (*F.*) *Syrup de nerprun.* (*Rhamn. baccar. succ. recent. Oiv. zingib. rad. concis., pimentæ bacc. contrit.,* āā ℥ss, *sacch. purif.* ℥iiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. *Ph. L.*) Cathartic, but apt to gripe. Dose, f ℥iv to f ℥j.

SYRUPUS RHEI, *Syrup of Rhubarb.* (*Rhei,* in pulv. crass., ℥ij; *Alcohol,* Oss; *Aquæ,* Oiss; *sacchar.* ℥ij. Mix the alcohol and water; pour f ℥iv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the alcohol and water. By means of a water-bath, evaporate to f ℥xij; add the sugar, and make a syrup. *Ph. U. S.*) Dose to a child, as a laxative, one or two teaspoonfuls.

SYRUPUS RHEI AROMAT'ICUS, *Aromatic or Spiced Syrup of Rhubarb.* (*Rhei* cont. ℥iiss; *Caryophyl. cont., Cinnam. cont.* āā ℥ss; *Myrist. cont.* ℥ij; *Alcohol. dilut.* Oij; *Syrup* Ovij. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain: then, by means of a water-bath, evaporate the liquor to a pint,

and while still hot, mix with the syrup previously heated. Ph. U. S.) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, fʒj; to an adult, fʒj.

SYRUPUS DE RHEO, Syrupus de Cichorio compositus.

SYRUPUS RHEI ADOS, *S. de papaver'eræ errat'ico seu papaveris erratici, Syrup of Red Poppy, (F.) Syrup de coquelicot. (Rheud. petal. recent. ʒj, aq. fervent. fʒxvii), sacch. purif. ʒiiss.* To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. Ph. L.) Chiefly used to give colour.

A fœtitious syrup is often made of aloes, dissolved in simple syrup.

SYRUPUS ROSÆ, *S. rosarum soluti'ens seu e rosæ sicciæ seu rosæ centifolizæ seu rosæ cœnis soluti'ens, Syrup of Roses, (F.) Syrup de roses pâles. (Rosæ centif. petal. exsic. ʒviij, sacch. purif. ʒviij, aq. fervent. Oiv.* Macerate the petals for 12 hours. Evaporate the strained liquor to ʒiiss. Add the sugar. Ph. L.) Gently laxative. Dose, fʒij to fʒiiss, or more.

SYRUPUS ROSÆ GAL'LICÆ, *Syrup of Red Roses, (F.) Syrup de roses rouges. (Rosæ Gallic. petal. exsic. ʒviij, aquæ bull. Ovi, sacch. purif. ʒviij;* prepared like the last. Ph. E.) Mildly astringent. Added to stomachic infusions.

SYRUPUS SACCHARI, S. Simplex.

SYRUPUS SARSAPARILLÆ, *S. Sarsæ, S. Sarzæ, Syrup of Sarsaparilla. (Rad. Sarsap. cont. ʒj, aquæ bullient. cong., sacch. purif. ʒj.* Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. Ph. L.) Used in the same cases as the root. Dose, fʒj to fʒiv, and more.

SYRUPUS DE SARSAPARILLÆ ET SENNÆ COMPOSITUS, *Compound Syrup of Sarsaparilla and Senna, (F.) Syrup de Cuisinier. (Rad. Sarsap. concis. ʒij.* Infuse for 24 hours in warm water Oxiij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with flowers of borage, white roses, senna leaves and anised, each ʒij; reduce to half; pass, and add honey ʒij. Boil to a syrup. Ph. P.) It is considered to be alterant, depurative, and sudorific. Dose, fʒss to fʒij.

A similar syrup, under the name SYRUPUS SARSAPARILLÆ COMPOSITUS, *Compound Syrup of Sarsaparilla,* is directed in the Pharmacopœia of the United States. (Sarsaparill. cont. ʒij; Lign. gniac. rasur. ʒiij; Rosæ centifol., Sennæ, Glycyrrhiz. cont. ʒiij; Ol. Sassafras. Ol. Anisi. ʒiij; Ol. Gualtheriæ m. iij; Alcohol. dilut. Ox. ʒiij. Sacchar. ʒviij.) Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. Ph. U. S.)

It may also be made by the process of displacement.

SYRUPUS SARSÆ, *S. Sarsaparillæ — s. Sarzæ, S. Sarsaparillæ.*

SYRUPUS DE SCAMMONIO, *Syrup of Scammony. (Pulv. Scammon. ʒss, sacch. alb. ʒiv, alcohol. (s. g. '985 to '915) fʒviij.* Heat the mixture moderately; then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add Syrup of Violets, fʒiv. Ph. P.)

ʒj contains 18 grains of scammony. Dose, fʒj to fʒss.

SYRUPUS SCILLÆ, *S. scillit'icæ seu scillæ marit'imæ, Syrup of Squills. (Aect. scillæ. Oj, sacch. ʒij.* Ph. U. S.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOSITUS, *Mel Scillæ Compositum, Compound Honey of Squill, Compound Syrup of Squill, Hicc Syrup. (Scillæ cont.; Senegæ cont. ʒiij; Antim. et Potassæ Tart. gr. xlviij; Aquæ Oiv; Sacchar. ʒiiss.* Pour the water upon the squills and seneca, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potass. It may also be made by the process of displacement. Ph. U. S.)

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

SYRUPUS SENEGÆ, *Syrup of Seneka. (Senegæ cont. ʒiv; Aquæ Oj; Sacchar. ʒj.* Boil the water with the seneka to one half, and strain; then add the sugar, and form into syrup. Ph. U. S.)

It may also be formed by the process of displacement.

This is a favourite stimulant expectorant [?] with many practitioners. Dose, fʒj or fʒij.

SYRUPUS SENNÆ, *S. cassiæ sennæ, Syrup of Senna. (Sennæ ʒij, sem. ficulnæ. cont. ʒj, sacch. pur. ʒxv, aquæ bullient. Oj.* Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain; add the sugar, and make into a syrup. Ph. U. S.) Cathartic. Dose, fʒij to fʒiiss, or more.

The Parisian Codex has a Syrupus de Sennâ of a compound character, called Syrupus de pomis compos'itus, (F.) Syrup de pommes composé. It contains, also, borage, bugloss, &c. Dose, fʒss to fʒij.

SYRUPUS SIMPLEX, *Syrupus (Ph. U. S.), S. Sacchari, Saccharum clarificatum, Liqueurum, Simple Syrup, Syrup, Common syrup of capillaire. (Sacch. purif. ʒiiss, aquæ Oj.* Dissolve the sugar; set aside for 24 hours; remove the seum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

SYRUPUS DE SPINÂ CERVINÂ, Syrupus rhamni — s. de Stœchade communis, see Lavendula.

SYRUPUS TOIUTANUS, *S. Tolutani seu toluif'eræ balsami seu balsam'icæ, Balsam'ic syrup, Syrup of tolu. (Tinct. Tolnt. fʒiiss; Aquæ Oj; Sacchar. ʒiiss.* Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated; pour the water upon it; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) Use — to give flavour.

SYRUPUS VIOLÆ, *S. violæ odorat'æ, S. violæ luræ, S. e succo violarum, Syrup of Violets. (Flor. recent. viol. odorat. ʒij, aq. bull. Oviij, sacch. pur. ʒxv.* Macerate, in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. Ph. E.) Very gently laxative. Dose, fʒj to fʒij.

SYRUPUS ERUCÆ VIOLARUM, *S. violæ.*

SYRUPUS ZINGIBERIS, *S. amomi zingiberis, Syrup of Ginger, (F.) Syrup de gingembre. (Tinct. Zingib. fʒiv; Aquæ Oiv; Sacchar. ʒx.* Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contained a few other compound syrups besides those enume-

rated; amongst these is a *Syrup of calf's lungs*, *Syrupus e pulmonibus vituli'nis*, (F.) *Syrop de nou de veau*, as an expectorant.

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYS, Sym.

SYSPA'SIA, from *συσπαι*, (*συν*, and *σπαι*, 'I draw,') 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

SYSPASIA CONVULSIO, Convulsion—s. Epilepsia, Epilepsy—s. Hysteria, Hysteria.

SYSSARCO'SIS, from *συν*, 'with,' and *σαρξ*, *σαρκος*, 'flesh.' *Commissura ossium carnea*, *Symphysis ossium muscularis*, *Connexio ossium carno'sa*, *Carina'tio*, *Concarna'tio*. Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTALCIS, Systole.

SYSTAL'TIC, *Systal'ticus*, *Peristalt'ic*; from *συστέλλω*, (*συν*, and *στέλλω*), 'I contract.' A *systaltic motion* in a part is one in which there is alternate contraction and dilatation. See *Systole*.

SYSTAT'ICA, from *συνίστημι*, (*συν*, and *ίστημι*, 'I place,') 'I associate.' Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind;—the 4th order, class *Neurotica*, of Good.

SYSTEM, *Syste'ma*, from *συν*, 'together,' and *ίστημι*, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural

history, it means a methodical arrangement of objects for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means,—a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system*, *muscular system*, &c.

SYSTEMA, System—s. *Vasorum*, Vascular system.

SYSTEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

SYSTEMATIST, see *Systematist*.

SYSTEMATOL'OGY, *Systematolog'ia*, from *συστημα*, 'system,' and *λογος*, 'a discourse.' The doctrine or a treatise of systems.

SYSTÈME VASCULAIRE À SANG NOIR, see *Vascular*—s. *Vasculaire à sang rouge*, see *Vascular*.

SYSTEMIC. Belonging to the general system—as 'systemic circulation' in contradistinction to the 'pulmonic.'

SYSTOLE. Same etymon as *Systaltic*. *Systal'sis*, *Constrict'io*, *Contract'io* seu *Angusta'tio* seu *Submissio* seu *Mic'a'tio cordis*. The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

SYSTOLIC, *Systol'icus*, (F.) *Systolique*; same etymon. Relating to the systole of the heart,—as 'systolic murmur.'

SYZYGIUM NERVORUM, *Par nervorum*.

T.

T BANDAGE, *T fas'cia*, *Fas'cia T formis* seu *Heliodo'ri*, *Cru'cial Bandage*. A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

T FASCIA, T Bandage.

TABAC, *Nicotiana tabacum*—*t. des Savoyards*, *Arnica montana*—*t. des Montagnes*, *Arnica montana*—*t. des Vosges*, *Arnica montana*.

TABACUM, *Nicotiana tabacum*.

TAB'ANUS, called, by the *voyageurs*, *Bulldog*. A troublesome fly in the Hudson's Bay territory, which makes a perforation like a leechbite, from which it sucks the blood.

TABARZET, *Saccharum album*.

TAB'ASHEER, *Tabaschir*, *Tabaxir*. A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The

sweet juice of the bamboo stalks has also been called *Tabasheer*.

TABEFACTION, Emaciation.

TABEFY, Emaciate.

TABEL'LA, *Tab'ula*, *Tabula'tum*, *Lozan'ga*, *Lozan'gia*, *Mor'sulus*, *Morsell'us*, *Lozenge*, *Tessel'la*, (F.) *Tablette*, 'a small table.' A solid medicine, composed of a powder, sugar, and mucilage, *Electuarium solidum*; and generally shaped like a disk. See *Pastil*, and *Troch.* The three comprise the *Saccharolés solides*.

TABELLA, Table.

TABELLÆ ABSORBENTES, T. de Magnessiâ.

TABELLÆ AC'IDI OXAL'ICI, T. ad sitem, *Lozenges of Oxalic Acid*. (*Acid. oxalic. ℥j*, *sacch. alb. ℥ss*, *ol. limonis*, gtt. xviii seu gtt. xij. Make into lozenges with mucilage of gum tragacanth. *Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

TABELLÆ DE ALTHÆ'Â, *Lozenges of Marshmallows*. (*Rad. althææ pulv.*, ℥iiss, *sacchar. alb. pulv. ℥ivss*; f. massa. *Ph. P.*) Demulcent; expectorant.

TABELLÆ ANTIMONIA'LES KUNCKE'LII, T. de stib'i sulphure'to, *Lozenges of Sulph'uret of Antimony*, *Mor'suli antimoniæ'les seu stibi' seu stibiati*, *Trochisci stibiati*. (*Amygdal. dulc. ℥j*, *sacch. lbss*, *sem. cardam.*, *cinna'm. pulv.*, *sulph.*

antim. prepar., āā ʒj; fiant tabellæ. *Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

TABELLÆ AD ARDOREM VENTRICULI, Trochisei carbonatus calcis — t. Cardialgiæ, Trochisei carbonatus calcis.

TABELLÆ DE CAT'ECU ET MAGNÉSIA, *Lozenges of Catechu and Magnesia*, (F.) *Tablettes de catechu et de magnésie*. (*P. catech.* ʒvj, *p. magnes.* ʒiv, *p. cinnam.* ʒij, *sacch. alb.* lbss, *g. tragac.* gr. xij, *aq. cinnam.* q. s. ut f. massa. *Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

TABELLÆ CINCHO'NÆ, *T. de kinâ kind, Bark Lozenges*. (*Ext. cinchon.* sic. ʒss, *sacch.* ʒiv, *cinnam.* ʒss, *mcclilg.* g. tray. q. s. ut f. massa. *Ph. P.*) Tonic.

TABELLÆ DE CITRO ET DIACARTHAMO, T. de Scammonio et Sennâ.

TABELLÆ DE FERRO, *Steel lozenges, Tabellæ martialis seu instaurantes seu antichloroticae*. (*Ferri limat. porphyris.* ʒss, *p. cinnam.* ʒj, *p. sacch.* ʒv, *g. trag.* et *aq. cinnam.* q. s., ut fiat massa. Each lozenge to weigh 12 gr. *Ph. P.*) Tonic, stomachic. Dose, v to x.

Aromatic lozenges of steel. These consist of sulphate of iron, with a small proportion of the Tincture of *Cantharides*.

TABELLÆ DE KINÂ KINÂ, T. cinchonæ.

TABELLÆ DE MAGNÉSIA, *T. absorbentes, Magnesia lozenges*. (*Magnes.* ʒj, *sacchar. alb.* ʒiv, *mcclil. g. tragac.* q. s. *Ph. P.*) Absorbent and antacid.

TABELLÆ DE RHEO, *Rhubarb lozenges*. (*P. rhej.* ʒss, *sacch.* ʒv, *mcclilg.* gnm. *tragac.* q. s.; f. massa. Each to contain 12 grains. *Ph. P.*) Stomachic and laxative.

TABELLÆ DE SCAMMONIO ET SENNÂ COMPOSITÆ, *T. de citro et diacarthamo, Compound lozenges of scammony and senna*. (*Scammon.* ʒij, *Sennâ* ʒivss, *rhej.* ʒiss, *caryoph.* ʒj, *corticis limon. confect.* ʒj, *sacch.* ʒvj; f. massa. *Ph. P.*) Purgative. Dose, ʒij to ʒvj, or more.

TABELLÆ AD SITEM, T. acidi oxalici — t. ad Sodam, Trochisei carbonatus calcis — t. de Stibii sulphureto. T. antimonialis Kunkellii.

TABELLÆ DE SULPHURE SIMPLICIS, *Simple sulphur lozenges*. (*Sulphur lat.* ʒss, *sacch.* ʒiv, *muc. g. tragac.* eum aquâ rosâ prepar. q. s. *Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

TABELLÆ DE SULPHURÆ COMPOSITÆ, *Compound sulphur lozenges*. (*Sulph. lat.* ʒij, *acid. benzoic.* gr. xij, *rad. irid.* p. ʒss, *ol. anisi*, gtt. viij, *sacch.* ʒvss, *g. trag.* q. s. *Ph. P.*) Aperient, expectorant, and stimulant [?]. Dose, 4 a day.

TABERNA MEDICA, Pharmacopolium.

TABERNÆMONTANA U'TILIS, (after *Tabernæmontanus*, a German botanist.) A tree of British Guiana, of the family *Apocynaceæ*, called, by the natives, *Hya-Hya*, the bark and pith of which yield a milk, which is used by the savages as a refreshing drink.

TABES, *Marasmus Tabes, Tabum*, from *tabere*, 'to decay'; *Te'kedon*, *Atroph'ia*, *Tab'idness*, *Decline*, *Wast'ig*. Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

TABES, Atrophy, Phthisis — t. Coxaria, Isehiophthisis — t. Diabetica, Diabetes mellitus — t. Diuretica, Diabetes mellitus.

TABES DORSALIS, *T. Dorsalis*, *Marasmus tabes dorsalis*, *Phthisis notius seu dorsalis seu sicca*, *Myelophthisis*, *Myelatrophia*, *Myelalalosis*. *Tabes ossis sacri*. A wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head, — caused, it

has been conceived, by too early or too frequent addition to venery.

TABES GLANDULARIS, T. mesenterica, Scrofula — t. Isehiadica, Isehiophthisis — t. Lactea, Atrophia lactantium, see Galactia.

TABES MENTERICA, *T. glandularis seu scrofulosa*, *Atroph'ia mesenterica seu infantum seu glandularis seu infantilis seu dorsis*, *Pneubog'ia mesentericum*, *Ma'cies Infantum*, *Pædotroph'ia*, *Scrofula seu Rachial'gia seu Physco'ia mesenterica*, *Myelophthisis sicca*, *Febris hecticâ infantum*, *Phthisis mesar'ica*, *Mesenterophthisis*, *Mesenteric Disease*, (F.) *Carreau*, *Chartre*, *Scrofulæ* ou *Écronelles mémentériques*, *Étisie* ou *Rachialgie* ou *Atrophie* ou *Physconie mémentérique*, *Entéro-mésentérique*, *Tubercules des ganglions mémentériques*, *Phthisis mémentérique*. An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery, — as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

TABES NUTRICUM, Atrophia lactantium, see Galactia — t. Ossis sacri, *Tabes dorsalis* — t. Pectorica, *Rachitis* — t. Pulmonalis, *Phthisis pulmonalis* — t. Scrofulosa, T. mesenterica — t. Senui, *Marasmus senilis*.

TABESCERE, Emaciate.

TABID, *Tab'idus*, (F.) *Tabide*. Same etymon as *Tabes*. Relating or appertaining to *tabes*. Wasted by disease.

TABIDNESS, *Tabes*.

TABIFIC, *Tabificus*, (F.) *Tabifique*, from *tabes*, 'consumption,' and *facere*, 'to make.' That which causes consumption or phthisis.

TABLE, *Tab'ula*, *Tabell'a*, *Tabulo'tum*, *Lam'ina*, *Pav'is*, *Squama*. A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other internal, and called *Tab'ula vitrea*, on account of its brittleness.

TABLES DE MORTALITÉ, Mortality, bills of.

TABLET, Trochiscus — t. Votive, *Tabula votiva*.

TABLETTE, *Tabella*.

TABLETTES DE CACHOU ET DE MAGNÉSIE, *Tabellæ de catechu et magnesiâ*.

TABLIËK, *Ventrale cutaneum*.

TABOURET, *Thlaspis bursa*.

TABULA, *Tabella*, *Table*.

TAB'ULA VOTI'VA, *Votive tablet*. A tablet, hung up as an offering — *anathe'mu* — in the ancient temples by the sick, descriptive of their diseases, and mode of cure; or by those who had been preserved from some calamity.

TABULÆ ANTICHLOROTICÆ, *Tabellæ de ferro* —

t. *Instaurantes*, *Tabellæ de ferro*—t. *Martiales*, *Tabellæ de ferro*.

TABULATUM, *Tabella*, *Table*.

TABUM, *Ichor*, *Sanies*, *Tabes*.

TAC, *Influenza*.

TACAMAHACA, *Fagara octandra*—t. *Caragna*, *Caranna*.

TACCA OCEANICA, see *Arrowroot*, (*Tahiti*.)

TACHE, *Macula*.

TACHE CÉRÉBRALE, *Toche méningitique*.

A red mark or stain, observable in a large number of hydrocephalic children, when pressure is made on the skin.—*Trousseau*.

TACHE EMBRYONNAIRE, 'Embryonic spot;' *Cu'mulus*, *C. germinativus* seu *prolig'erus*, *A'rea germinati'va*, *Nu'cleus cicatriculæ* seu *blastoderm'atis*, *Ger'minal cu'mulus*. A name given by M. Coste to a spot seen on the blastodermata about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer, (F.) *Feuillet*—the upper one the *serous* or *animal*; the lower, the *mucous* or *vegetative*; and between these is afterwards formed the *vascular layer*.

TACHE GERMINATIVE, see *Molecule*—t. *Mélanienne*, see *Nævus*—t. *Méningitique*, *Tache cérébrale*—t. *de Naissance*, *Nævus*—t. *Sanguine*, see *Nævus*.

TACHENCAUSIS, *Combustion*, *human*.

TACHES HÉPATIQUES, *Chloasma*.

TACHES LAITEUSES, *Plaques lactenses*, 'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

TACHES DE ROUSSEUR, *Ephelides*—t. *Rouges*, *Spots*, *red*.

TACHETÉ DE ROUSSEURS, see *Ephelides*.

TACHYIATER, *Tachyia'trus*. Same etymon as the next. One who cures speedily.

TACHYIATRIA, from *ταχυς*, 'quick,' and *ιατρεία*, 'healing.' The art of curing quickly.

TACH'Y TOMY, *Tachytom'ia*, from *ταχυς*, 'quick,' and *τομή*, 'incision.' The art of cutting or operating rapidly.

TACITURNITY, *Taciturn'itas*, *Sigē*, 'silence,' from *tacere*, *tacitum*, 'to be silent.' 'State of a person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*, from *tungere*, *tactum*, 'to touch.' A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive: Touch, active.

TACTILE, *Tactilis*; same etymon. Relating or appertaining to touch.

TACTION, *Touch*.

TACTUS, *Tact*, *Touch*—t. *Dolorificus*, *Haptodyspthoria*—t. *Eruditus*, see *Palpation*.

TAE, *Digitus pedis*.

TÆDA, *Tedn*, *Dæs*, *δαις*, 'a torch.' A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆNIA, *Te'nia*, *Fas'cia*, from *ταΐνα*, 'a fillet, a riband.' See *Bandage*. Also a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suckorial oscula on the head. Of this genus, two only inhabit the human body—the *Tænia lata*, (see *Bothriocephalus latus*.) and *Tænia solium*.

TÆNIA ACEPHALA, *Bothriocephalus latus*—t. à *Anneaux courts*, *Bothriocephalus latus*—t. à *Anneaux longs*, *Tænia solium*—t. *Articulos demittens*, *Tænia solium*—t. *Cucurbitina*, *Tænia solium*—t. *Dentata*, *Bothriocephalus latus*—t. *Grisea*,

Bothriocephalus latus—t. *Hippocampi*, *Corpora fimbriata*—t. *Humana armata*, *Tænia solium*—t. *Humana incrimis*, *Bothriocephalus latus*—t. *Hydatigena*, *Hydatid*—t. *Lata*, *Bothriocephalus latus*—t. à *Longues articulations*, *Tænia solium*—t. *Membranacea*, *Bothriocephalus latus*—t. *Nervosa Halleri*, *Ganglion* of *Gasser*—t. *Non armé*, *Bothriocephalus latus*—t. *Osculis lateralibus geminis*, *Bothriocephalus latus*—t. *Osculis laterali-bus solitariis*, *Bothriocephalus latus*—t. *Osculis marginalibus solitariis*, *Tænia solium*—t. *Osculis superficialibus*, *Bothriocephalus latus*—t. *Prima*, *Bothriocephalus latus*—t. *Sans épine*, *Tænia solium*—t. *Secunda*, *Tænia solium*.

TÆNIA SEMICIRCULARIS, *T. striat'a*, *Gem'inum centrum semicircula'rè*, *Limbus poste'rior cor'poris striat'i*, *Striæ cor'næ* seu *semilunares* seu *terminales*, *Eræ'nulum novum*, *Fascia semicircula'ris*, (F.) *Bandelette des éminences pyrifomes* (Ch.), *Bandelette*, *B. demicirculaire*, *Lame coriée*. A medullary, grayish, semitransparent layer, situated in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

TÆNIA SOLIUM, *T. os'culis marginalibus soli-tariis* seu *encurbiti'na* seu *humana armata* seu *articulos demittens* seu *secunda*, *Hal'ysis solium*, *Vermis encurbiti'nus*, *Lumbri'cus latus*, *Sol'ium*, *Tænia sans épine* ou à *longues articulations* ou à *anneaux longs*, *Ver solitaire* ou *encurbitin*, *Long Tape Worm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal foramina vaguely alternated. The tænia solium is commonly a few feet long: sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TÆNIA STRIATA, *T. semicircularis*—t. *Tarini*, *Lamina cornea*—t. *Tenella*, *Bothriocephalus latus*—t. *Vulgaris*, *Bothriocephalus latus*.

TÆNIACIDE, *Tæniafuge*.

TÆNIÆ COLL, see *Colon*—t. *Valsalvæ Coli*, see *Colon*.

TÆNIAFUGE, *Tæ'ni'fuge*, *Tæ'niacide*, *Tæ'ni-cide*, *Tæni'a'ngum*, from *tænia*, and *fugo*, 'I drive off.' A remedy calculated to expel or destroy tænia.

TÆNICIDE, from *tænia*, and *cædo*, 'I kill.' A destroyer of tænia or tapeworm.

TÆNIFUGE, *Tæniafuge*.

TÆNIOLA, *Bandelette*; diminutive of *Tænia*. Used by Gerber for a simple, band-like, or flat fibre. *Filum tæniaform'e*, seen under the microscope.

TAFFETAS AGGLUTINATIF, *Sparadrapum adhæsivum*—t. *d'Angleterre*, see *Sparadrapum adhæsivum*—t. *Épispastique*, *Sparadrapum vesicatorium*—t. *Gommé*, see *Sparadrapum adhæsivum*—t. *Vésicant*, *Sparadrapum vesicatorium*.

TAFIA, *Rum*.

TAIE, see *Caligo*.

TAILLADE, *Incision*, see *Entaille*.

TAILLE, *Lithotomy*—t. *Hypogastrique*, *Hypogastric* operation of *lithotomy*, see *Lithotomy*—t. *Postérieure*, see *Lithotomy*—t. *Recto-vésicale*, see *Lithotomy*—t. *par le Rectum*, see *Lithotomy*—t. *Sus-pubi'que*, see *Lithotomy*.

TAKAMAHAKA, *Fagara octandra*.

TAKE, *Attack*.

TAKEN DOWN, see *Attack*.

TAKING, see *Contagious*.

TAL. A word formerly employed for alkali. It also meant the dung of the peacock.

TALC EARTH, Magnesia.

TALCUM NEPHRITICUM, Nephreticus lapis.

TALEN'TUM, *ταλαντον*. An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains. *Poids de Marc*. See Weights and Measures.

TALEOLUS, Malleolus.

TALIACOTIAN OPERATION, Rhinoplastic.

TALINUM UMBELLATUM, see *Mistura*.

TALIPES, Kyllosis (Clubfoot) — t. Caleaneus, see Kyllosis — t. Equinus, see Kyllosis — t. Vagus, see Kyllosis — t. Varus, see Kyllosis.

TALLAHATTA SPRINGS, see Alabama, mineral waters of.

TALON, see Calcaneum.

TALPA, 'a mole.' *Topina'ria*, *Tapina'ria*, *Talpa'ria*, *Tesin'do*, (F.) *Tampe*. A tumour situated on the head, which has been supposed to burrow like a mole.

TALPARIA, Talpa.

TALUS, Astragalus, Malleolus, see Calcaneum. *Pessary*.

TAMARA CONGA, *Averrhoa carambola*.

TAMARÆA ZECLA, Tamarindus.

TAMARIN, Tamarindus.

TAMARIN'DI PULPA, *Pulp of Tamarinda*, (*Tamarinda*, q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OF, Tamarindi pulpa.

TAMARIN'DUS, *T. Indica*, *Tamarindus*, *Oxyphœnicum*, *Sil'iqua Arab'ica*, *Balampli'li*, *Tamarac'a zecla*, *Oxyphœn'cia*, *Aca'cia Ind'ica*, *Tamarind tree*, (F.) *Tamarin*. Ord. Leguminosæ. *Sec. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous tough strings, *Tamarindus* (Ph. U. S.), is exported from the West Indies, preserved in syrup. It is refrigerant and laxative. *Tamarind whey* is made by boiling $\frac{5}{ij}$ of the pulp with bliss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, Tamarix Gallica.

TAMARIX, *T. Gallica* seu *Pentan'dra*, *Tamarisc'ens*. The *Tamarix tree*. Ord. Tamariscinæ. *Sec. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally: — the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in iterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, CAVITÉ DU, Tympanum.

TAMPA BAY, see Saint Augustine.

TAMPON, see Plugging.

TAMPONNEMENT, Plugging.

TAMUS COMMUNIS, *Am'pelos melæ'na* (Dioscorides). *Chiro'nir*, *Gynacanthê* seu *Apro'nia* (Pliny). *Bryonia nigra*, *Common Black Bryony*. The root is diuretic, and has been given as an antilithic. In the herb-shops of Europe, it is sold as a topical application for removing bruise marks, and in France is called *Herbe aux femmes battues*: 'herb for beaten or bruised women.'

TANACE'TUM, *T. vulgare*, *Tana'sia*, *Athana'sia*, *Parthe'nium mas*, *Hind-heel*, *Tansy*, (F.) *Tanaise vulgaire*, *Herbe aux vers*, *Cog des Jardiniers*. Ord. Compositæ. *Sec. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm bitter taste. They are tonic, deobstruent [?], and anthelminthic. *Dose*, \mathfrak{ss} to $\mathfrak{ʒj}$. The infusion is usually drunk as tea.

TANACE'TUM BALSAMITA, *T. hortensæ*, *Balsamita mas* seu *enlyo'ria* seu *suav'colens* seu *major*, *Costus horten'sium*, *Mentha Roma'na* seu *Saraceni'ca*, *Costmary*, *Alcoot*, *Cock-mint*, (F.) *Menthe cog. Herbe au cog*, *Grand Boume*. A fragrant-smelling herb, somewhat resembling mint, and

formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACE'TUM HORTENSE, T. balsamita.

TANACE'TUM MULTIFLORUM. A South African plant, which is used as a tonic, antispasmodic and anthelmintic. It is given in flatulency, gout, menorrhœa and dropsy: but is especially prescribed in cases of ascarides lumbricoides and other entozoa. It is administered in the form of powder or infusion; the latter acting also as a diaphoretic and diuretic. It is used likewise as a resolvent and unodyne fomentation.

TANAISIE VULGAIRE, Tanacetum.

TANASIA, Tanacetum.

TANGE, *ταγγη*, 'rancidity.' A putrescent tumour.

TANGHINIA, *Cerbera tanghin*.

TANGLES, BIG, *Pila marina* — t. Blue, *Gaylussacia dumosa*.

TANNINUM, Tanninum.

TANNIC ACID, Tannin.

TANNICUM PURUM, Tannin.

TANNIN, from (F.) *tanner*, 'to tan.' *Tannicum purum*, *Tanninum*, *Taninum*, *Principium Adstringens seu Scytodeph'sicum* seu *Byrodeph'sicum* seu *Coria'cium*, *Scytodeph'sium*, *Materia Scytodeph'ica*, *Acidum Tannicum* seu *Scytodeph'icum* seu *Quercitan'nicum*, *Tannic acid*, (F.) *Acide tannique*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of tanning. Pure tannin, obtained from galls, by the action of ether, (see Ph. U. S.) has been employed as an excellent and powerful astringent. *Dose*, two grains, repeated several times a day.

TANSY, Tanacetum — t. Wild, *Potentilla anserina*.

TAPER, HIGII, *Verbascum nigrum*.

TAPE'TUM, *Tapes*, *Tape'te*, 'tapestry, a carpet.'

Tape'tum choroidæ. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

TAPE'TUM, see Corpus Callosum.

TAPE'TUM ALVE'OLI, *Membra'na externa dentitum*. The outer membrane of the teeth. The lining membrane or peristomum of the alveoli.

TAPEWORM, BROAD, *Bothriocephalus latus* — t. Long, *Tænia solium*.

TAPIOCA, see *Jatropha manihot* — t. Pearl, see *Jatropha manihot*.

TAP'SUS BARBATUS, *Verbascum nigrum*.

TAPSARIA, *Decoctum hordei*.

TAR, see *Pinus sylvestris* — t. Barbadoes, *Pectroleum*.

TAR BEER, see *Pinus sylvestris*.

TAR, MINERAL, *Pissasphaltum*.

TAR WATER, see *Pinus sylvestris* — t. Wine, see *Pinus sylvestris*.

TAR'ACHIE, *Tarax'is*, *Tarax'ma*, *Taray'mus*, 'disorder.' A disorder of sight which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

Ταραχη της κοιλίας, 'disturbance of the belly.' *Diarrhœa*.

TARAGMA, Tarache.

TARAGMUS, Tarache.

TARAGON, *Artemisia dracunculus*.

TARAHIO, *Peltandra Virginia*.

TARANTISM'US, *Tarentis'mus*, *Tarantolis'mus*, *Dinomant'ia*, *Chorea Sancti Valentini*, *Tarentuliam*, *Tar'antium*, from *Tarentum*, or *Taranto*, where it was observed. A feigned or

imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantism, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentismus Tangit'anus, Janon-tarentisme*.

TARANTULA. Same etymon. *Taren'tula*, (F.) *Tarentule*. A species of spider—the *Ara'nea Tarantula* of Linnæus, *Lycosa Tarantula* of Latreille—whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, Leontodon taraxacum — t. *Dens leonis, Leontodon taraxacum*.

TARAXIS, Tarache, sicc Ophthalmia.

TARCHON SYLVESTRIS, Achillea ptarmica.

TARENTISMUS, Tarantismus — t. *Tangitanus, Tarantismus*.

TARENTULA, Tarantula.

TARENTULISM, Tarantismus.

TARGAR, Juniperus communis.

TARL. Palm or cocoa wine, from which sugar was obtained, called *Jagre*. It was once used as a tonic.

TARINI PONS, (F.) Pont de Tarin. A cineritious substance, between the corpora albicantia, which unites the crura and assists in forming the bottom of the third ventricle. The fossa, at the bottom of which it is placed, is called *Locus perforatus posterior, Posterior perforated space, Substantia seu Lamina perforata posterior*.

TARO, Arum esculentum.

TARSAL, Tur'seus, from tarsus, (F.) Tarsien. That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TARSEA LATA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which, he thought, they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, Tarsal.

TARSO, in composition, belonging or relating to the tarsus.

TARSO-METATAR'SAL, Tarso-metatar'seus. That which relates to tarsus and metatarsus.

TARSO-METATAR'SAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal*, and others *plantar*.

TARSO-MÉTATARSIPHALANGIEN DU POUCE, Adductor pollicis pedis—t. *Phalangien du pouce, Flexor brevis pollicis pedis*—t. *Sous-phalangien du petit orteil, Flexor brevis minimi digiti pedis*—t. *Sous-phalangien du premier orteil, Flexor brevis pollicis pedis*.

TARSOPHY'MA, from Tarsus, and φυμα, 'a tumour.' A swelling of the tarsus.

TARSORRHAPHY, Tarsorrhaph'ia, from tarsus, 'the tarsal cartilage,' and ραφή, 'suture.' An operation for diminishing the size of the opening between the eyelids, when it is enlarged by surrounding cicatrices.

TARSOT'OMY, Tarsotom'ia, from tarsus, and τομή, 'incision.' The section or removal of the tarsal cartilages.

TARSUS, τάρσος, Planta prima seu Rassecta seu Rassecta pedis, Pe'dium, Claviculæ pedis nodus. 1. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes

performed. The *first or Tibial row, (F.) Première rangée, R. jambière*, consists of the astragalus and os calcis; the *second or metatarsal, (F.) Seconde rangée, R. métatarsienne*, of the scaphoides, cuboïdes, and three ossa cuneiformia. 2. The *Tarsi, Tarsal cartilages, Tarsal fibro-cartilages, Orchoi, Crepidil'ines seu Coro'næ seu Chelæ seu Un'guæ Palpebrarum, Tharsi, Cil'ia*, are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, Antimonium tartarizatum (improperly), Potassæ supertartras impurus—t. *Calcareous, Potassæ subcarbonas*—t. *Crystals of, Potassæ supertartras*.

TARTAR EMETIC, Antimonium tartarizatum.

TARTAR, SALT OF, see Potash, and Potassæ subcarbonas—t. *Soluble, Potassæ tartras, see Potash*.

TARTAR OF THE TEETH, Odontolithos.

TARTAR'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, Potassæ supertartras.

TARTAR'IC ACID, Ac'idum tartar'icum seu tartar'osum seu tar'tari essential'e, Acor tartar'icus, Sal tartari essential'e, Tartareous acid, (F.) Acide tartrique. (Potassæ bitart. Biiss, aq. destillat. ferr., cong. iij, cretæ ppt. ℞j, acid' sulph. ℞j. Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate it to crystallize. *Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, Potassæ supertartras impurus—t. *Solubile, Potassæ tartras*—t. *Vitriolatum, Potassæ sulphas*.

TARTARUM AMMONIÆ, Ammonia tartras—t. *Chalybeatus, Ferrum tartarizatum*—t. *Crudus, Potassæ supertartras impurus*—t. *Dentium, Odontolithos*—t. *Emeticus, Antimonium tartarizatum*—t. *Kalicoferrius, Ferrum tartarizatum*—t. *Kalinus, Potassæ tartras*—t. *Lixivia, Potassæ tartras*—t. *Martialis, Ferrum tartarizatum*—t. *Potassæ ferruginosus, Ferrum tartarizatum*—t. *Stibiatus, Antimonium tartarizatum*—t. *Subpottassicus, Potassæ supertartras*—t. *Superpottassicus, Potassæ supertartras*—t. *Tartarizatus, Potassæ tartras*.

TARTRATE D'AMMONIAQUE, Ammonia tartras.

TARTRE BRUT, Potassæ supertartras impurus—t. *Cru, Potassæ supertartras impurus*—t. *des Dents, Odontolithos*—t. *Émétique, Antimonium tartarizatum*—t. *Stibié, Antimonium tartarizatum*.

TASIS, Extension, Tension.

TASTE, Gustus, Genisii, Genma, Genthmos. (F.) Goût. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

Gustation, Gustatio, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated. The nerves of taste are probably the glosso-pharyngeal, and, perhaps also, the lingual branch of the fifth pair.

TASTE, Savour.

TATZ'É. The fruit of *Myrsi'na Africa'na*, a native of Abyssinia, the Cape of Good Hope, the

Azores, and Algeria, which is used as a tæniafuge.

TATTOO'ING. A practice, with the South Sea Islanders, of puncturing the skin, and forcing coloring matters into the punctures. Sailors in all countries are in the custom of practising it by rubbing or forcing gunpowder into the punctures. The figures, thus formed, remain through life.

TAUPE, Talpa.

TAUROCOL'LA, from ταυρος, 'a bull,' and κόλλα, 'glue.' Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, Penis, Perineum.

TAXIS, 'arrangement;' from τάσσω, 'I order,' 'I arrange,' *Reposit'io, Reduc'tio, Syntax'is.* A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The usual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium*; the warm bath; warm fomentations; tobacco; emollient gylsters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXO'DIUM DIS'TICHUM, *Cupressus disticha, Schubertia disticha, Cypress, Bald Cypress*; indigenous. *Nat. Ord.* Coniferæ. A balsam, obtained from it, is applied to cuts and wounds. The resin from the cones is diuretic and carminative.

TAXONOMY, Biotaxy.

TAXUS BACCA'TA, ταξος. The *Yew tree, Smilax, Smilax, Thym'alos,* (F.) *If.* Family, Coniferæ. *See Syst. Diœcia Monadelphina.* The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

TAXUS CANADEN'SIS, *American Yew, Ground Hemlock*; indigenous. The leaves are said to be sedative. [?]

TAXWAX, see Nucha.

TAYE, Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea—t. Apple, see Apple tea—t. Bahama, Lantana camara—t. Beef, see Beef tea—t. Berried, Gaultheria.

TEA BERRY, Gaultheria.

TEAK, Paronychia.

TEAR, Sax. *teap, Lac'ryma, Lach'ryma, Lac'ryma, Lac'ryma, Dacry, Dac'ryma, Dac'ryon, Humor lacryma'lis, Eyedrop, Weeping-tear,* (F.) *Larme.* An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye, and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base; phosphates of lime and soda, and albumen, and a special organic matter called *Lacrymine* and *Thrauvine*.

TEARS, DEERS' Bezoar of the deer.

TEASEL, CULTIVATED, *Dipsacus sylvestris.*

TEASICK, Phthisis pulmonalis.

TEAT, Nipple.

TEAZEL, *Eupatorium perfoliatum.*

TECEDON, Phthisis.

TECNOCTONIA, Infanticide.

TECNOL'OGY, *Tecol'ogy, Tecnolog'ia, Tecnol'ogy,* from τεκνος and τεκος, 'a child,' and λογος, 'a description.' A treatise on children.

TECOLITHOS, Judæus (lapis.)

TECOMA RADICANS, *Bigno'nia radicans, Trumpet flower, Trumpet creeper, Virgin'ia creeper.* Indigenous; the orange and scarlet flowers appearing in July. *Order,* Bignoniaceæ. The leaves are acrid.

TECTARIA CALAHUALA, see Calagalualæ radix—t. Ferruginea, see Calagalualæ radix.

TEDA, Tæda.

TEETH, see Tooth—t. Barred, *Barrees* (Dents)

TEETHING, Dentition.

TEGIMEN, Integument.

TEGMEN, Integument.

TEGULA HIBERNICA, Hibernicus lapis.

TEGUMEN, Integument.

TÉGUMENT, Integument.

TEGUMENTARY, *Tryument'arius,* (F.) *Téguementaire.* Relating or appertaining to the integument.

TEGUMEN'TUM, Integument—t. Auris, see Tympanum—t. Ventriculorum cerebri, Centre, oval, of the brain.

TEIGNE, Pityriasis, Porrigo, Porrigo lupinosa—t. Annulaire, Porrigo scutulata—t. en Anneau, Porrigo scutulata—t. Favense, Porrigo favosa—t. Furfuracæ, Porrigo furfurans—t. Nummulaire, Porrigo scutulata.

TEINESMOS, Tencemus.

TEINODYN'IA; from τεινω, 'to extend,' and δυνα, 'pain.' Pain of the sinews or tendons.

TEINOPHLOGO'SIS; from τεινω, 'to extend,' and φλογωσις, 'inflammation.' Inflammation of the sinews or tendons.

TEINTURE, Tincture—t. *Éthérée,* see *Æthereal*—t. *Rubéfinite,* Tinctura cantharidis.

TEKEDON, Tabes.

TELA, Texture, Tissu—t. Accidentalæ Medullaris, Encephaloid—t. Caverosa, Caverosa texture—t. Cellulosa, Cellular tissue—t. Cornea, Corneous tissue—t. Choroiden, Choroiden tela—t. Emplastica, Sparadrapum—t. Erectilis, Erectile tissue—t. Fibrosa, see Fibrous—t. Galteri, Sparadrapum Galteri—t. Hippocratis cribrosa, Cellular tissue—t. Hymenochondroides, Tissue, cartilaginous—t. Hymenochondroides, Tissue, cartilaginous—t. Ichthyocollæ glutinans, see Sparadra-

pum adhesivum—t. Inodularis, Tissue, inodular—t. Organica, Histos—t. Vesicatoria, Sparadrapum-vesicatorium.

TELAMON, Habena.

TELAMON'NES, τελαμωνες, 'bandages.' Charpie, used for wounds; or linen employed for bandages.

TELANGECTASIS, Telangiectasia.

TELANGIECTA'SIA, *Telangiect'asis*, *Telangiect'osis*, *Angiotelecta'sia*, *Hæmatotelangi'osis*, *Hæmotelungio'is*, *Angiect'a'sia*, *Anastomo'sis œnerysmat'ica*; from τελος, 'far,' αγγειον, 'vessel,' and εκτασις, 'dilatation.' Dilatation of far or capillary vessels. Nævus maternus. Aneurism by anastomosis. According to some, fungus hæmatodes. See Hæmatodes fungus.

TELANGIECTASIA OCULI, Cirsophthalmus.

TELEPH'UUM, *Ulcus telephium*, *Achille'um*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, Sedum telephium.

TELLURISMUS, Magnetism, animal.

TELLUR'UUM, (F.) *Tellure*; from tellus, *telluris*, 'the earth.' A metal first met with in the gold mines of Transylvania. It is of a bluish white colour, very volatilizable: specific gravity 6.115; and oxidizable in the air and by heat.

The salts of tellurium occasion the exhalation of so disagreeable an alliaceous odour from the body, that they have not been much experimented with as therapeutical agents.

TELUM, Penis.

TEMPE, Temple.

TEMPERAMENT, *Temperamentum*, *Temperatura*, *Temperatio*, *Temperies*; from *temperare*, 'to moderate,' originally from *tempus*, *temporis*, 'time,' the great *temperer*; *Complex'io*, *Crisis*, *Energia'sia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabillis or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine*, *lymphatic*, *choleric*, or *atrabillious* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEMPERANCE, *Sophros'ynê*, *Nephal'otes*, *Sobri'etas*, *Sobri'et'y*. Same etymon. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPÉRANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Rel'gio Temporalis*, *Crot'aphus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this

part the hair first begins to turn white, and to indicate age.

TEMPORAL, *Temporalis*. That which relates to the temples.

TEMPORAL APONEURO'SIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

TEMPORAL ARTERIES, *Crot'aphite Arteries*, are several:—I. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. temporalis frontalis* seu *inter'ua* seu *antérior*; the other posterior—the *A. temporalis occipitalis* seu *exter'na* seu *postérior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheek-bones, and traverses the temporal aponeurosis, immediately beneath that bone. II. The *Deep-seated Temporals*—*A. temporales profundæ*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os tem'poris* seu *temporal'e* seu *arcua'lê* seu *arma'lê* seu *parieta'lê inferius* seu *crot'aphum* seu *memento mori* seu *mendo'sum* seu *crot'aphit'icm* seu *lapido'sum*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions:—1. The *squamous*, *Pars squamo'sa*, *Squama*, *Lepis'na*, *Os lepidoi'des* seu *squamo'sum* seu *squamifor'mê*, (F.) *Portion écailleuse* ou *squamense*. 2. The *mastoid portion*, and, 3. The *Petrous portion*, *Petrus Proc'ess*, *Pyramis trigo'na*, *Os lapido'um* seu *lapido'sum* seu *sax'eum* seu *petro'sum* seu *lithoi'des* seu *durum* seu *prærupte rupi assimila'tum* seu *nerualê*, *Pars petro'sa*, *P. pyramida'lis ossis tem'poris*, (F.) *Portion pierreuse*, *Rocher*, *Os pétrenx*, *Apophyse pyramidale*, *A. pétrée*.

It has, first, an *auricular* or *external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaser*; the *meatus auditorius externus*; the *mastoid process*; the *digestric groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylo-mastoid foramen*, &c. 2. A *cerebral* or *internal surface*, which corresponds to the cavity of the cranium, and on which is the *Pars petrosa*, the *hiatus Fallopii*, the *meatus auditorius internus*, the *fissure of the aquæductus vestibuli*, a *portion of the gutter for the lateral sinus*, &c. 3. A circumference, on which is observed the orifice of the *bony portion of the Eustachian tube*, the *aquæductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOSSA, *Fossa temporalis*, is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the

zygomatic fossa; and completed, before, by the cheek-bone.

TEMPORAL MUSCLE. *Tempora'lis, Crotophi'tes*, (F.) *Arculi-temporo maxillaire, Temporo maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa: and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw: and the *temporales profundi*, — anterior and posterior, — furnished by the same nerve at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

TEMPORAL VEINS were formerly called *Ætoi* or *Ætoi Phlebæ, Ag'nila Venæ*.

TEMPORO-AURICULAIRE, Attollens aurem.

TEMPORO-FACIAL, *Temporo-facia'lis*. Belonging to the temple and face.

TEMPORO-FACIAL NERVE, *Nervus temporo-facia'lis*. A branch of the facial nerve distributed to the face and temple.

TEMPORO-MAXILLARE, *Temporo-maxillare*, see Temporal muscle.

TEMPORO-MAXILLARY, *Temporo-maxilla'ris*, (F.) *Temporo-maxillaire*. That which belongs to the temporal bone and lower jaw.

TEMPORO-MAXILLARY ARTICULATION or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process, and the portion of the glenoid cavity anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments: — the one internal, and the other external.

TEMPORO-MAXILLARY NERVES of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, Temple — t. Interealare, Apyrexia, Intermission.

TEMULENCE, *Ebri'etas, Ebrios'itas, Methys'mus, Meth'ysis, Temulent'ia, Tem'ulency, Inebria'tion, Intarica'tion, Drunk'ennes;* — from wine, *Enophlyg'ia, Enophlyx'is, Vinolent'ia, Vi'ulence*, (F.) *Ivresse*; from *temetum, μέθυ*, 'wine, any intoxicating drink.' Plater gave this name to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplexia Temulent'ia* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methē*; and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Temulentia* is the same as *Delirium Tremens*. The French use the term *Ivresse* for drunkenness, *Ivrognerie* for habitual drunkenness.

TEMULENTIA, Temulence.

TENACULA, Bone-nippers — t. Volsella, Forceps (lithotomy).

TENACULUM, (*tenax, tenacis*, 'holding fast,') from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood-vessel to draw it out and enable it to be tied.

TENACULUM, ASSALINI'S. An ingenious instrument, invented by Assalini. It consists of a for-

ceps, or double tennaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

TENAILLE INCISIVE, Bone-nippers.

TENASMUS, Tenesmus.

TENDINES CORONARIÆ, Coronary tendons.

TEN'DINOUS, *Tendino'sana, Tendin'eus, Sin'eury*, (F.) *Tendin'eus*, from *tendo, tendinis*, 'a tendon.' Relating or appertaining to, or having the nature of tendons.

TENDO, Tendon — t. Cordis venosus, Circulus callosus Halleri.

TENDON, *Tendo, Pronerva'tio, Tenou*, from *τενω, tendo*, 'I stretch.' *Sineu, Theu, Leader*, (Prov.) *Guider*. A fibrous cord, more or less round, long, or flattened: of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends; — as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, Achillis tendo.

TENDON, CORDIFORM, OF THE DIAPHRAGM, Center, phrenic.

TENDONS, TWITCHING OF THE, Subsultus tendinum.

TENEOTOMIA, Tenotomy.

TÉNESME, Tenesmus — t. *de l'Esophage*, Œsophagismus — t. *Vésical*, Bradysuria.

TENESMUS, *Teines'mos, Tenas'mus*, from *τενω, 'I stretch.'* *Proct'ica* seu *Obstipa'tio Tenesmus, Proctospas'mus, Tiuag'mus*, (F.) *Ténesme, Épreintes*. Frequent, vain and painful desires to go to stool; — one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

TENESMUS VESICÆ, Bradysuria — t. *Vesicæ mucosæ, Cystirrhœa*.

TENETTES, Forceps (craniotomy).

TÉNIA, Tænia.

TENNESSEE', MINERAL WATERS OF. On the waters of the French Broad River, in this State, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

TENON, Tendon.

TENONT'AGRA, from *τενω, τενοντος*, 'tendon,' and *αγρα*, 'seizure.' A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

TENONTOTOMIA, Tenotomy.

TENONTOTRO'TI, from *τενω, τενοντος*, 'tendon,' and *τροπωσκω*, 'I wound.' They who are wounded in the tendons. — Galen.

TENOSYNI'TIS, *Tenosynovi'tis* [?], (F.) *Ténoisyuite*. An imperfectly formed term, from *τενω*, 'a tendon,' *συν*, and *itis*, denoting inflammation. Inflammation of the synovial sheath of a tendon.

TÉNOTOME, *Tenot'omus*; same etymon as the next. An instrument for dividing tendons, especially by the subcutaneous method.

TENOT'OMY, *Tenotom'ia, Teneotom'ia, Tenontotom'ia, Sec'tio* seu *Dissec'tio ten'dinum*, (F.) *Ténotomie*, from *τενω*, 'a tendon,' and *τομή*, 'incision.' The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints — as in club-foot.

TENSEUR DE L'APONÉVROSE FÉMO-RALE, Fascia lata muscæ.

TEN'SION, *Ten'sio*, *Tensu'ra*, *Tusis*, *Dint'asis*, *Enton'ia*, (*Entonia* is, also, used for over-tension,) *Conten'sio*, *Disten'sio*, from *tendere*, *tensum*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TENSIVE, *Tensivus*, *Tono'des*, (F.) *Tensif*. Same etymon. Accompanied by tension or by a feeling of tension — as a 'tensive pain.'

TENSOR CHOROIDEÆ, Ciliary muscle — t. Palati, Circumflexus musculus.

TENSOR TARSII. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the punctum lacrymale, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYMPANI, *Inter'nus Auris*, *Internus Mal'lei*, (F.) *Salpingo-malléen*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR VAGINÆ FEMORIS, Fascia lata muscle.

TENSURA, Tension.

TENSUS, Penis.

TENT, *Tenta*, *Turru'da*, and its diminutive, *Turru'dula*, *Penic'ulus*, *Penicil'lus*, *Penicil'lum*, *Motos*, *Lemnis'cus*, *Licin'ium*, (F.) *Tente*, *Mèche*, from *tendere*, *tensum* or *tentum*, 'to stretch.' In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULARIA, *Filaria hominis bronchialis*.

TENTACULUM CEREBELLI, Tentorium.

TENTA'MEN MED'ICUM. 'A medical trial.' From *tentare*, 'to try.' An examination in medicine, in the Prussian universities, which is conducted both in writing and *vivâ voce* before the Dean of the Medical Faculty.

TENTE, Tent — t. *du Cervelet*, Tentorium.

TENTIGO VENEREA, Nymphomania — t. Veretri. Satyriasis.

TENTIPEL'LUM, from *tendere*, *tensum* or *tentum*, 'to stretch,' and *pellis*, 'the skin.' Ancient name of a cosmetic, with which it was pretended, wrinkles could be effaced.

TENTORIUM, *T. cerebelli super-externum*, *T. cerebelli*, *Tentaculum cerebelli*, *Septum euceph'ali*, *Diaphragma cerebri*, *Intersep'ta horizont'alia Pucchio'ni*, *Processus transver'sus duræ matris*, *Lateral Processes of the Dura Mater*, *Transverse septum*, (F.) *Tente du cervelet*, *Plancher du Cervein*, *Septum transverse* (Ch.), from *tendere*, *tensum* or *tentum*, 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, Tentorium.

TENTUM, Penis.

TENTWORT, *Asplenium ruta muraria*.

TENUIS MATER, Pia mater.

TENUITAS AQUOSA, Prædominium aquæ.

TEPIHRO'SIA APOLLINE'A, *Gale'ga Apollin'e'a* of Egypt and Nubia. *Order*, Leguminosæ. The leaves are often found mixed with senna.

TEPHROSIA PURPU'REA, *Gale'ga purpur'ea* of the coast of Coromandel. The root is bitter, and a decoction of it is prescribed by the native doctors in dyspepsia, lenteria, and tympanites.

TEPHROSIA SENNA. The leaves are used for senna by the people of Popayan.

TEPHROSIA TOXICA'RIA, *Gale'ga toxica'ria* of Cayenne. The leaves are used for poisoning fish. It has been suggested as a substitute for digitalis.

TEPHROSIA VIRGINIANA, Galega Virginiana.

TEPIDARIUM, see Stove.

TEPLITZ, Tôplitz.

TERAS, Monster.

TERATOG'ENY, *Teratogen'ia*, from *teras*, *terasos*, 'a monster,' and *γενεσις*, 'generation.' The formation of monsters.

TERATOL'OGY, *Teratolog'ia*, from *teras*, *terasos*, 'a monster,' and *λογος*, 'a discourse.' A treatise on monsters.

TERATOSIS, see Monster.

TERCERON, see Mulatto — t. Black, see Mulatto.

TEREBELLA, Trepan.

TEREBELLUM. A name given by Dugès to a perforator, *Perce crâne*, of his invention.

TÉRÉBENTHINE, Terebinthina — t. *de Bordeaux*, see *Pinus sylvestris* — t. *de Chio*, see *Pistacia terebinthus* — t. *de Copahn*, *Copaiba* — t. *Commune*, see *Pinus sylvestris* — t. *d'Égypte*, see *Amyris opobalsamum* — t. *de Giléad*, see *Amyris opobalsamum* — t. *du Grand Caire*, see *Amyris opobalsamum* — t. *de Judée*, see *Amyris opobalsamum* — t. *de Mèlèze*, see *Pinus larix*.

TÉRÉBENTHINÉ, Terebinthinate.

TEREBINTHINA, from *τερινθος*, or *τεριβινθος*, 'the turpentine tree.' *Tur'pentine*, *Botin*, *Albotin*, *Altilibat*, *Brutinn*, (F.) *Térébenthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See Turpentine, *Pinus palustris* and *Pinus sylvestris*. All the turpentine are stimulant, diuretic, and cathartic.

TEREBINTHINA ARGENTORATENSIS, see *Pinus picea* — t. *Balsamea*, see *Pinus balsamea* — t. *Canadensis*, see *Pinus balsamea* — t. *Chia*, see *Pistacia terebinthus* — t. *Communis*, see *Pinus sylvestris* — t. *Cypria*, see *Pistacia terebinthus* — t. *Empyreumatica*, see *Pinus sylvestris* — t. *Laricina*, see *Pinus larix* — t. *Veneta*, see *Pinus larix* — t. *Vera*, see *Pistacia terebinthus* — t. *Vulgaris*, see *Pinus sylvestris* — t. *de Vénise*, see *Pinus larix*.

TEREBINTHINATE, *Terebinthina'tus*, (F.) *Térébenthiné*. Having the qualities of turpentine.

TEREBINTHIUS, Terminthus — t. *Gummifera*, *Bursera gummifera* — t. *Lentiscus*, *Pistacia lentiscus* — t. *Vulgaris*, *Pistacia terebinthus*.

TEREBRA, Trepan.

TEREBRATIO, Trepanning.

TEREDO OSSIUM, Caries, Spina ventosa.

TERES, *Stron'gylus*, *Cylindroi'des* 'long and round,' from *tero*, 'to rub,' *quasi* 'rubbed smooth or round.' An epithet given to many organs, the fibres of which are collected into round fasciuli.

TERES LIGAMENTUM, (F.) *Ligament rond*.

This name is given to the round ligament in the eotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the eoronoïd process of the ulna to below the bicipital tubercle of the radius.

TERES MAJOR, (F.) *Auguli-scapulo-huméral*, *Scapulo-huméral* (Ch.), *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MINOR, *Nonus humeri Placentini*, (F.) *Le plus petit sus-scapulo-trochitérien* (Ch.), *Petit rond*, *Margini-sus-scapulo-trochitérien*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, Observation.

TERETRIUM, Trepan.

TERETRON, Trepan.

TERGAL, Dorsal.

TERGEMINI, Trigemini.

TERGUM, Dorsum, Vertebral column.

TERMINALIA, see Myrobalanus.

TERMINOLOGY, Nomenclature.

TERMIN'THUS, *Terebin'thus*, from *τερινθος*, 'the turpentine tree.' *Phyma Anthrax*, *Termin'thus*, *Berry* or *Fungus carbonace*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMIN'THUS, Pistacia terebinthus.

TERMINUS SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMONOLOGY, Nomenclature.

TERMS, Menses.

TERRA ABSORBENS MINERALIS, Magnesiæ carbonas—t. Aluminis, Argilla pura—t. Amara aërata, Magnesiæ carbonas—t. Amara sulphurica, Magnesiæ sulphas—t. Argillacea hydrata, Argilla pura—t. Argillacea pura, Argilla pura—t. Bolaris, Argilla pura—t. Folianta, Sulphur—t. Foliata mineralis, Soda acetata—t. Foliata tartari, Potassæ acetas—t. Fornaceum, see Bricks—t. Fullonica, Cimolia purpureascens—t. Japonica, Catechu, Nancelea gambir.

TERRA LEM'NIA, *Lemp'nia*, *Argilla bolus flava*, *Lem'nia* Earth. A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

TERRA LIVONICA. A terra sigillata or sealed earth from Livonia, redder than that from Silesia, and very astringent.

TERRA MERITA, Curcuma longa.

TERRA NOCERA'NA. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

TERRA ORLEA'NA, *Pignem'tum urucu*, *Urucu*, (F.) *Rocou*, *Roucou*, *Bicht*. A pigmental matter obtained from the seeds of *Bixa Orleana* seu *Orella'na* seu *America'na*, *Orella'na*, *Orlea'na*.

In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag*, *Roll*, or *Egg Annatto*.

Spanish Annatto, *Bixa*, is in small, oblong cakes. It is chiefly employed as a colouring matter.

TERRA OS'SEA, *Mate'ria ossea*. Bony matter. The earthy portion of bones.

TERRA PONDEROSA, *Baryta*—t. *Ponderosa murata*, *Baryta*, muriate of—t. *Ponderosa salita*, *Baryta*, muriate of—t. *Saponaria*, *Cimolia purpureascens*.

TERRA PORTUGAL'ICA, *Barros*, *Bucavos*. A reddish, astringent, styptic earth, obtained from Portugal.

TERRA SIGILLA'TA, *Sealed Earth*. A bolus or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seigneur. To these belong the *Terra Silesiaca*, *Terra Lemnia*, *T. Turcica*. See Bolus and Bolus alba.

TERRA SILESIACA, see *Terra sigillata*—t. *Talcosa oxyanthracodes*, *Magnesiæ carbonas*—t. *Turcica*, see *Terra sigillata*.

TERRA URINÆ. The earthy deposit in the urine.

TERRA VITRIOLI DULCIS, Coleothar.

TERRÆ SIGILLATÆ, see Bolus, Bolus alba, and Terra sigillata.

TERRAPIN, *Emys palustris*.

TERRÆ BOLAI'RE, *Bolus*—t. *Magnésienne*, *Magnesiæ carbonas*—t. *Noir*, *Bunium bulbocastanum*—t. *Pesante*, *Baryta*—t. *Sigillæ*, *Bolus alba*.

TERRETTE, *Glechoma hederacea*.

TERTIAN FEVER, *Febris tertiana*, *An'etus tertianus*, *Tritæ'us*, *Tertian* or *Third Day Ague*, *Third Day Fever*, (F.) *Fièvre tierce*, from *tertius*, 'the third.' An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general rule, it is the most manageable form of ague.

A double tertian, (F.) *Double tierce* (*Fièvre*), has a paroxysm every day,—the paroxysms of alternate days being associated.

TERTIANARIA, *Scutellaria galericulata*.

TESSARA, Cuboid.

TESSELLA, Tabella.

TEST, DANIEL'S, see *Docimasia pulmonum*—t. Hydrostatic, see *Docimasia pulmonum*—t. Ploucquet's, see *Docimasia pulmonum*—t. Static, see *Docimasia pulmonum*.

TESTA, ('a shell,') see *Ostrea*—t. *Ovi*, see *Membrana putaminis*.

TESTA PRÆPARA'TA, *Prepared Oyster-shell*. Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as *Creta preparata*.

TESTA'CEOUS, *Testaceus*, (F.) *Testacé*, from *testa*, 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See *Creta*.

TESTÆ FORNACIÆ, Bricks—t. *Ostrææ*, see *Ostrea*.

TESTES. The Testicles, see *Testicle*. Vulgarly, the *Stones*. A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates*.

TESTES CEREBRI, see *Quadrigemina corpora*.

TESTICLE, *Testis*, *T. virilis*, *Testiculus*, *Orchis*, *Pouum amaris*, *Did'yimus*, *Hir'ntia*, *Gru'ini* (pl.), *Gemelli* (pl.), *Ovum*, (F.) *Testicule*, from *testis*, 'a witness;' because the testicles are evidences of virility. The name of two glandular organs, contained in the serotum, whose office is to secrete sperm. The substance of the testicle

consists of numerous conical, flattened lobules — *lobuli testis* — whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tubuli seu Canaliculi seminiferi seu seminiales, Vasa seminalia, Vascula serpentina*, folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tunica Albuginea*, or, simply, *Albuginea, Peritestis*, (F.) *Pérididyme*, of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

TESTICLE, SWELLED, *Hæmia humoralis*.

TESTICONDUS, *Crypsorchis*.

TESTICULAR, *Testicularis*, (F.) *Testiculaire*. Belonging or relating to the testicle.

TESTICULE, Testicle.

TESTICULUS, Testicle — t. Accessorius, Epididymis — t. Caninus, Orchis mascula.

TESTIMONIUM MATURITATIS. 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

TESTIS FEMINEUS, Ovary — t. Irritable, Orchidalgia — t. Minor, Prostate — t. Muliebris, Ovary — t. Virilis, Testicle.

TESTUDINATIO CRANII, *Camarosis*.

TESTUDO, *Cheloniæ*, (F.) *Tortue*. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphyema encystis ganglion*. See Talpa.

TESTUDO CEREBRI, Fornix — t. Scapulæ, see Scapula.

TET, Nipple.

TETANIC, *Tetanicum, Spasmodicum, Convulsivum, Convulsive*, (F.) *Tétanique*, from *τενω*, 'I stretch.' A remedy, which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nuc Vomica, Strychnia, Brucia, Arnica*, and *Toxicodendron*.

Also, an epithet for a tonic convulsion.

TETANINE, *Strychnia*.

TETANOMATA, *Tetanothra*.

TETANO'THRA, *Tetanomata, Erugatoria*, from *τετανος*, 'free from wrinkles.' Medicines which remove wrinkles. — *Gorræus*.

TÉTANOS, Tetanus.

TETANUS, from *τενω*, 'I stretch.' *Spasm with rigidity, Convulsio Indica, Holoton'ia, Holoton'icus, Holotet'anus, Tet'anus universalis, Rigor nervosus seu nervorum, Extensio seu Distensio, Ent'asia tetanus, Cat'ochus cervicinus seu holoton'icus*, (F.) *Tétanos, Mal de cerf*. A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthotonos*), sometimes backwards (*Opisthotonos*), and sometimes to one side (*Plenrothotonos*). When tetanus is confined to the muscles of the jaws, it is called *Trismus*. It is a most formidable affection. The means of treatment are. — copious and repeated blood-letting; in

bathing, cold and warm; powerful doses of opium, and other narcotics. In *Traumatic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, *Emprosthotonos* — t. Dolorificus, Cramp — t. Dorsalis, *Opisthotonos* — t. Lateralis, *Pleurothotonos* — t. Maxillæ inferioris, *Trismus* — t. Posterganeus, *Opisthotonos* — t. Posticus, *Opisthotonos* — t. Universalis, see Tetanus.

TETARTÆUS, *Quartan*.

TETARTOPH'IA, from *τεταρος*, 'the fourth.' and *φωω*, 'I arise.' *Quarta'nis remittens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, Caput, Head — t. de Veau, Elephantiasis of the Greeks.

TETRADRACH'MON, from *τετρας*, 'four,' and *δραχμη*, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, *Platysma myoides*.

TETRAHIT LONGIFLORUM, *Galeopsis grandiflora*.

TETRAMY'RON, from *τετρας*, 'four,' and *μυρον*, 'an ointment.' An ointment of four ingredients. — *Galen*.

TETRANGURIA, *Cucurbita citrullus*.

TETRANTHERA PICHURIM, *Pichurim beans*.

TETRA'O COTUR'NIX, *Coturnix*, the Quail, (F.) *Caille*; *Class*, Aves; *Ord*, Gallinacæ. The quail is an esteemed article of diet. The Greek name is *ορνιξ, ορνυος*; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHAR'MACUM, from *τετρας*, 'four,' and *φάρμακον*, 'a medicine.' A medicine consisting of four ingredients.

TETRAS'CELUS, from *τετρα*, 'four,' and *σκελος*, 'leg.' A monster having four legs. — *Gurlt*.

TETROB'OLON. The weight of four oboli, or two scruples. — *Gorræus*.

TETROSOS, *Astragalus*.

TETTER, Herpes — t. Crusted, *Impetigo* — t. Honeycomb, *Porrigo favosa* — t. Humid, *Eczema impetigo* — t. Milky, *Porrigo larvalis* — t. Pustular, *Impetigo* — t. Running, *Impetigo* — t. Scaly, *Psoriasis*.

TETTERWORT, *Chelidonium majus*.

TEUCRIUM ÆGYPTIACUM, *T. capitatum* — t. *Belium, T. capitatum*.

TEUCRIUM CAPITA'TUM, *T. Belium seu Ægyptiacum, Polium Capitatum, Poley Mountain of Montpellier*, *Ord*, Labiatae, is, generally, substituted for *T. chamædryes*. The common *Poley Mountain* is the *Teucrium montanum*; and the *Golden Poley Mountain*, the *Teucrium Polium, Polium*.

TEUCRIUM CHAMÆ'DRYS, *T. officinale, Chamædryes, C. minor repens seu vulgaris, Quercula minor seu Calamandri'na, Trissago, Chamædrops, Trixago, Common, Creeping or Small Germander, English Treacle*, (F.) *Petit chène, Chénette, Germandrée officinale*. This is possessed of aromatic and bitter properties. The dose of the dried powder is from \mathfrak{ss} to $\mathfrak{ʒ}$.

TEUCRIUM CHAMÆ'PITYS, *Chamapitys, Arthetica, Arthetica, Ajuga, A. seu Bulgula Chamæpitys, Abiga, Chamæmor'rus, Iva arthritica, Holoc'yon, Ion'ia, Siderit'is, Common Groundpine*, (F.) *Petite Ivette*. Properties like the last. The tops and leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRETICUM, *T. hyssopifolium seu Rosmarinifolium, Rosmarinus stæchadis facie,*

Paley-mountain of Caudy, Po'lam Cre'ticum. The tops and whole herb enter into the old compounds, *Mithridate* and *Theriacæ*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to *T. chamædrys*.

TEUCRIUM HYSSOPIFOLIUM, *T. Creticum.*

TEUCRIUM IVA, *Chamæpitys moscha'ta, Iva, I. moscha'ta* Montpellier'sium, *Chamæpitys anthyllus, French Groundpine, (F.) Ivette musquée.* It has similar virtues to *T. Chamædrys*, but is weaker.

TEUCRIUM MARITIMUM, *T. MARUM.*

TEUCRIUM MARUM, *T. maritimum, Marum Syriacum* seu *Cre'ticum* seu *verum* seu *Cortu'si, Majorana* Syriacæ, *Chamædry's* *ivca'na* *maritima* seu *marum, Orig'annu* Syriacum, *Marum* germanicum, *Syria* herb *maritich, Cat thyme, (F.) Marum* ou *Germandrée maritime, Herbe aux chats.* A very aromatic plant, of a camphorated smell: formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM OFFICINALE, *T. chamædrys*—*t. Palustre, T. scordium*—*t. Pyramidale, Ajuga*—*t. Rosmarinifolium, T. Creticum.*

TEUCRIUM SCORDIUM, *T. palustre, Scordium, Trissago palustre, Chamædry's palustre* seu *scordium, Allium red'oleus, Water Germander, (F.) Germandrée scardone, Sauge des bois, Germandrée aquatique.* The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other *Teueria*.

TEXTUM INTERLOBULARE, Interlobular tissue.

TEXTURA, Texture—*t. Organica, Histos.*

TEXTURAL, Same etymon as Texture. Relating or appertaining to a texture.

TEXTURE, *Textura, Textus*, from *texere, texum*, 'to weave.' *Tela, Hypha, Hyphæ.* The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue—*t. Cellulosus, Cellular tissue*—*t. Desmosus, Desmoid tissue*—*t. Erectilis, Erectile texture*—*t. Nervosus, Plexus nervosus*—*t. Organicus, Cellular tissue*—*t. Papillaris, Corpus papillare*—*t. Parenchymalis, Cellular tissue.*

THALERIA, Radzyge.

THALAMUS, *Θαλαμος, (F.) Conche.* 'A room or chamber; a bed.' The place at which a nerve originates, or has been considered to originate.

THALAMI NERVORUM OPTICORUM seu OPTICI, *Emiventia magna cerebri, Ganglia cerebri postica, Crura medullæ oblongatæ* (of some), *Striatæ corpora superiora posteriora, Colliculi nervorum opticorum, Opticæ thalami, Posterior cerebri ganglion, (F.) Conches des nerfs oculaires* (Ch.), *C. des nerfs optiques, C. optiques.* Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur.* They are, also, called *Posterior ganglion of the cerebrum.* From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis.*

The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici.*

THALAMUS REGALIS, Periæridium.

THALICTRON, *Θαλικτρον, Thalictrum, T. magnum* seu *flacum* seu *flaves'cens* seu *pratense* seu *nigricans* seu *rugosum* seu *virginatum, Rhubarbarum pan'perum, Meadow-rue, Poor Man's Rhubarb, (F.) Pigamon jaunâtre, Rue des prés, Fausse-Rhabarbe, Rhabarbe des pauvres.* Ord. Ranunculacææ. *Ser. Syst. Polyandria Polygynia.* The root resembles rhubarb in its properties.

THALICTRUM ANEMONOIDES, *Meadow Rue, Rue-leaved Anem'ony*; an indigenous plant, flowering in April and May.

THAMARINDUS, Tamarindus.

THAMBE, Pollex.

THANASIMUS, Mortal.

THANATODES, Mortal.

THANATOID, *Θανατοΐδες*: from *θανatos*, 'death,' and *eidos*, 'resemblance.' Resembling death. Apparently dead.

THANATOLOGY, *Θανατολογία, Thnesecology'ia*, from *θανatos*, 'death,' and *λογος*, 'a discourse.' A description, or the doctrine, of death.

THANATOS, Death.

THAPSIA, from the island Thapsus. The deadly carrot, *thapsia asclepias.* Family, Umbelliferae. *Ser. Syst. Pentandria Digynia.* The root operates violently, both upwards and downwards. It is not used.

THAPSUS BARBATUS, Verbascum nigrum.

THARSI, see TARSUS.

THASPIUM ACTÆIFOLIUM, Ligusticum actæifolium.

THASPIUM ATROPURPUREUM, *Th. cordatum, Round heart.* Order, Umbelliferae. The flowers, which appear in June, are of a dark purple.

THASPIUM BARBINOÏDE, *Meadow Parsnep.* An indigenous plant, of the Northern and Western States, which flowers in June. Flowers, yellow.

Both plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THASPIUM CORDATUM, *Th. atropurpureum.*

THE, Thigh.

THEA, *Θεα*—*t. des Apalaches, Ilex vomitoria*—*t. du Canada, Gaultheria—t. Composé, Species*—*t. d'Europe, Salvia veronica*—*t. de France, Salvia—t. de Jersey, Celastrus—t. de la Mer du Sud, Ilex vomitoria—t. du Mexique, Chenopodium ambrosioides*—*t. de Simon Pauli, Myrica gale*—*t. Suisse, Falltrane.*

THEA, *Chaa, Tea, (F.) Thé.* There are two principal species of tea-plant; the *Thea Bohea*, and *Thea viridis*; the black tea, and the green. Ord. Camellieæ. *Ser. Syst. Polyandria Monogynia.* In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists it is, except in particular idiosyncrasies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea, Mint tea, &c.*

THEA GERMANICA, Veronica.

THEBESIIUS, VEINS OF. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foramina*

Thebe'sii. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebe'sii*, *V. Guiffartiana*, *V. venæ magnæ*.

THECA, Case, Vagina, Sheath — t. Cerebri, Cranium — t. Cordis, Pericardium — t. Folliculi, see Folliculi Graafiani — t. Vertebralis, see Vertebral canal.

THECITIS, from *theca*, and *itis*, denoting inflammation. A term, of hybrid formation, signifying inflammation of the sheaths of tendons.

THEIN, see *Coffea Arabica*.

THEION, Sulphur.

THEIOPEGÆ, Waters, mineral (sulphureous.)

THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELASTRIA, Nurse.

THELE, Nipple.

THELITIS, (F.) *Thélite*; from *θηλη*, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

THELONCUS, Mastoneus.

THELORRHAG'IA, from *θηλη*, 'nipple,' and *ρῆξις*, 'a rupture.' Hemorrhage from the nipple.

THELOS, Mamma.

THELYGON'IA, from *θηλος*, 'pertaining to the female sex,' and *γεννησις*, 'generation.' The part taken by the female in the act of generation. Also, nymphomania.

THELYGONUM, Sperm (of the female.)

THELYPTERIS, Pteris aquilina.

THENAD, Thenal.

THENAL, *Thenar*; same etymon as *thenar*.

Relating or appertaining to the thenar.

THENAL ASPECT. An aspect towards the side on which the thenar is situated.—Barelay. *Thenal* is used, adverbially, by the same writer, to signify 'towards the thenal aspect.'

THENAR, *Θεναρ*, from *θενω*, 'I strike,' 'I push.' The palm of the hand, or sole of the foot.

THENAR, *Flexor brevis pollicis manus*, Palm.

THENAR or THENAL EM'INENCE is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR or THENAL MUSCLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the interior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, Cacao.

THEOMANIA, Demonomania.

THEOPLÉGIA, Apoplexy.

THEOPLÉXIA, Apoplexy.

THEORETICAL, *Theoreticus*, *Theoricus*, from *θεωρω*, 'I contemplate.' (F.) *Théorique*, *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, Theory.

THÉORIQUE, Theoretical.

THEORY, *Theoria*, (F.) *Théorie*. Same etymon. The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. *Theory* regards nature as it is, and is a rigid deduction from facts. *System* is too

often the creature of the imagination, to which nature is made to bend.

THEORY OF MEDICINE, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some they are considered to include General Pathology and General Therapeutics.

THEIOTHERMÆ, Waters, mineral, sulphureous.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIS, Therapeutics.

THERAPEUTA, Therapist.

THERAPEUTICE, Therapeutics.

THERAPEUTICS, *Thérapeuticē*, *Thérapeutisia*, *Thérapeusis*, *Iatrotechnicē*, *Thérapeia*, *Therapi'a*, *Curatoria* *Meth'odus*, *Methodus Medendi*, *Practice of Physic*, (F.) *Thérapeutique*, *Thérapie*, from *θεραπευω*, 'I wait upon, I alleviate, I attend upon the sick.' That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THÉRAPEUTIQUE, Therapeutics.

THERAPEUTIST, *Thérapeuta*. Same etymon. One who practices therapeutics. A practitioner of medicine. To be a good therapist, a man must be well versed in every department of medicine, and be capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practice well unless he is both. Hence, the comparatively small number of good therapists.

THERAPIA, Therapeutics.

THÉRAPIE, Therapeutics.

THERIA, Radzyge.

THERIAC, *Theriaca* — t. of Antipater, *Antipatri theriaca*.

THE'RIACA, *Θηριακα*, *The'riaca*, from *θηρ*, 'a ferocious or venomous animal.' *Treacle*, *Melasses*, (F.) *Thériaque*. Also, a medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *Theriac* and *Theriacal* have been used adjectively for medicinal.

THERIACA ANDROM'ACHI, *Venice Treacle*, is an ancient *alexipharmic electuary*; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, long held its place in their Codex, with even an additional number of ingredients. The *Electuarium Opiatum polypharmacum* of the Codex has contained *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fetid ingredients*, 6; *narcotics*, 1; *earthy substances*, 1; *gummy or amyloseous*, 4; *saccharine*, 3; total, 72! and one of these the *flesh of the viper*! A little more than a grain of opium is contained in each drachm of the compound.

THERIACA ARTICULORUM, *Colchicum* — t. *Celestis*, *Tinctura opii* — t. *Communis*, *Melasses* — t. *Edinensis*, *Confectio opii*.

THERIACA GERMANORUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINENSIS, *Cataplasma Cymini*. A cataplasm of cumin seed, bay berries, german-

der, makeroot, cloves, honey, and sometimes opium, or syrup of poppies.

THÉRIAQUE RUSTICORUM, Allium.

THÉRIAQUE, Theriaca.

THÉRIAKI. In Turkey, opium-eaters, or they who indulge largely in the use of opium, are so called.

THÉRIATRICA, Veterinary art.

THERIOIDES, Ferine.

THERIO'MA, *Therion*, from *θηρ*, 'a venomous animal.' Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, Therioma.

THERIOTOMY, Zootomy.

THERMA, Heat—t. Euphytum, Animal heat.

THERMÆ, *Seppat*, *Ther'muta*. Warm baths or springs. See Waters (mineral.)

THERMÆ FABARIÆ, Pfeffers, Mineral Waters of—t. Plumbariæ, Plombières, Mineral Waters of.

THERMAL, *Thermalis*; from *θερμῆ*, 'heat,' *Seppos*, 'hot.' Relating or appertaining to heat. Hot, warm. As 'a thermal mineral water.'

THERMANTICA, Calefacients.

THERMASMA, Fomentation.

THERMATA, Thermaæ.

THERMOMETER, see Heat.

THERMUM EMPHYTUM, Animal heat, Biolychnium.

THESIS, *thesis*, from *τιθημι*, 'to put.' 'A position or proposition.' *Disputatio inauguralis*, *Inaugural Dissertation*. The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Suellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement;' hence *Diathesis*.

THIEVE'TIA A'HOUI, *Ahouai*. The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THIEW, Teudon.

THIEX, Thigh.

THICK-LISTED, Popsy.

THIGH, Sax. *veoh*, *Femur*, *Femen*, *Crus*, *Merus*, *Me'rinn*, (Sc.) *The*, *They*, (F.) *Cuisse*. (Of old, *Femur* meant the thigh generally, and especially the outer part:—*Femen*, the inner). The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above*, it is bounded, *anteriorly*, by the groin; *externally*, by the hip; *behind*, by the fold of the nates; and *within*, by the perineal region. *Below*, it is bounded, *anteriorly*, by the prominence of the knee; *posteriorly*, by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, Collum femoris.

THIMBLE WEED, *Rudbeckia laciniata*.

THION, Sulphur.

THIRST, Sax. *dýrrt*, (D.) *Dorst*, *Sitis*, *Dipsa*, *Potio'nis desid'erinn*, (F.) *Soif*. A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secre-

tions. This is probably true; but, again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation*.—an *instinctive want*—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia—t. Morbid, Dipsosis.

THIRSTY, Dipsodes.

THISTLE, BLESSED, *Centaurea benedicta*—t. Cotton, *Onopordium acanthium*—t. Globe, *Echinops*—t. Holy, *Centaurea benedicta*—t. Ladies', *Carduus Marianus*—t. Milk, common, *Carduus Marianus*—t. Pine, *Atractylus gummifera*—t. Sow, *Sonchus oleraceus*—t. Star, *Centaurea calcitrapa*—t. Yellow, *Argemone Mexicana*.

THILADIAS, Eunuch.

THILASIAS, Eunuch.

THILASIS, Contusion—t. Depressio, Depression.

THILASMA, Contusion—t. Concussio, Concussion—t. Stremma, Sprain.

THILASPI, *Penny-cress*. *Ord. Cruciferae. Ser. Syst. Tetradynauia Siliculosa*. Two species of thlaspi are directed, in some pharmacopœias, for medical use:—*Thlaspi arven'se* or *Treacle mustard*, and *Thlaspi campest're* seu *hirsutium* seu *enig'tine*, *Lepid'ium campest're*, *Lep'ta* seu *Ibe'ris campest'ris*, *Milk'ridge mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

THILASPI BURSA, *Th. hirsutum*, *Thlaspi* seu *Capsell'u* seu *Ibe'ris* seu *Nasturtium* seu *Rod'schied'u bursa pastoris*, *Bursa pastoris*, *Shepherd's purse*, *Coccolort*, *St. James's wort*, *Poor man's Parsnecity*, (F.) *Fleur de St. Jacques*, *Bourse à berger* ou *à pasteur*, *Tabouret*. A common European plant, introduced into this country. It is slightly astringent, but is little used.

THILASPI BURSATUM, *Thlaspi bursa*—th. *Nasturtium*, *Lepidium sativum*—th. *Sativum*, *Lepidium sativum*.

THILIBIAS, Eunuch.

THILIPSENCEPHALIA, Derencephalia.

THILIPSENCEPHALUS, from *θλιψις*, 'compression,' and *εγκεφαλος*, 'the encephalon.' A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital regions—a distinct fontanelle not existing.

THILIP'SIS, *θλιψις*, *Compressio*. Compression, and especially constriction of vessels by an external cause. Oppression.

THINESCOLOGIA, Thanatology.

THOLUS, Aheicolium—t. Diocleus, Scapha.

THOMPSONIAN. One who practises or believes in Thompsonianism.

THOMPSONIANISM, *Thomp'sonism*. A fanciful doctrine, of which a person of the name of Thompson, of New York, is the founder. One of its leading principles is, that the human body is composed of four elements [?], earth, air, fire and water; and one of its apothegms,—that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thompsonians are Botanical Doctors. See Herb doctor.

THORACENTESIS, *Thoracocentesis*.

THORACHIQUE, *Thoracic*.

THORAC'IC, *Thorac'icus*, from *thorax*, *thoracis*, 'the chest;' (F.) *Thoracique* ou *Thorachique*. That which relates or belongs to the chest; as *Thoracic vis'cera*, &c.

THORACIC INFERIOR ARTERY, *Arteria Thorac'ica Exter'na Inf'erior* seu *Louga* seu mam-

ma'ria externa seu Thoracica inferior, (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the latter part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

THORACIC SUPERIOR ARTERY, *Arteria Thoracica Externa Superior*, (F.) *Artère thoracique supérieure*, *Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial; and descends forwards between the Pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteriæ thoracicæ externæ superiores*.

THORACIC DUCT, *Ductus thoracicus seu thoracicus posterior seu vertebralis seu chyliifer seu chyli seu lacteus seu ro'rifera seu Pecqueti seu Pecquetianus*, *Vena alba thoracis*, *Alveus ampullatus*, *Distributiva lactea thoracica*, *Galaxia*, *Duct of Pecquet*, *Alimentary Duct*, (F.) *Canal ou Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli*, which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC LIMBS are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

THORACIC, LONG or INFERIOR, Mammary inferior external artery.

THORACIC NERVES. The *short or anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch:—the former distributed to the pectoralis major muscle; the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thoracic nerve*, *Posterior thoracic*, *External respiratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

THORACIC REGIONS are the different regions of the chest. Thus we say, *anterior*, *lateral*, and *superior thoracic*, &c.

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery.

THORACIQUE, Thoracic.

THORACOCENTE'SIS, *Thoracocentesis*, *Thoracotomy*, from *θωραξ*, *θωρακος*, 'the chest,' and *κέντησις*, 'puncture.' *Paracentesis thoracis*. Perforation of the chest to evacuate contained fluid—as in emphyema.

THORACOCYSTIS, Thoracocystis.

THORACODID'YMUS, from *θωραξ*, *θωρακος*, 'the chest,' and *δίδυμος*, 'a twin.' A monstrosity in which twins are united by the thorax.—Gurlt.

THORACODYNE, Pleurodynia.

THORACO-FACIAL, *Platysma myoides*.

THORACO-GASTRODID'YMUS, *Didymus symphyo-thoracogastrius*, *Xiphodidymus*: from *θωραξ*, *θωρακος*, 'the chest,' *γαστήρ*, 'the belly,' and *δίδυμος*, 'a twin.' A monstrosity in which twins are united by the chest and abdomen.—Gurlt.

THORACO-MAXILLO-FACIAL, *Platysma myoides*.

THORACOMETER, Stethometer.

THORACOPATHIA, from *θωραξ*, *θωρακος*, 'the chest,' and *πάθος*, 'disease.' Disease or suffering in the chest.

THORACOSCOPIA, see Auscultation.

THORACOSCOPIMUM, Stethoscope.

THORACOTOMY, Thoracocentesis.

THORACYST'IS, *Thoracocystis*, from *θωραξ*, *θωρακος*, 'the chest,' and *κύστις*, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, *θωραξ*, 'a cuirass, a coat of mail.' *Citharus*, *Venter medius*, *Pectus*, *Stethus*, *Scutum pectoris*, *Bir*, *Chelys*, *Cassa*, the *Breast*, the *Chest*, (F.) *Poitrine*. One of the splanchnic cavities, *Cavum thoracis*, bounded, posteriorly by the vertebræ; laterally, by the ribs and scapula: anteriorly, by the sternum: above, by the clavicle: and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation—the lungs and the heart.

THORAX, Corset.

THORE, Sperm.

THORN APPLE, *Datura stramonium*—t. Red, *Datura Sanguinea*.

THOROUGHSTEM, *Eupatorium perfoliatum*.

THOROUGHWAX, *Eupatorium perfoliatum*.

THOROUGHWORT, *Eupatorium perfoliatum*.

THOROW-WAX, *Bupleurum rotundifolium*.

THORULUS STRAMINEUS, *Fanon*.

THRENINE, see Tears.

THREADWORM, *Dracunculus*—t. Long, *Trichocephalus*.

THREPSIS, Assimilation, Nutrition.

THREPSOL'OGY, *Threpsology*, from *θρεψις*, 'nutrition,' and *λογος*, 'a description.' The doctrine of, or a treatise on, the nutrition of organized bodies.

THREPTICE, Assimilation.

THRIDACE, *Laetucarium*.

THRIDAX, Lettuce.

THRIFT, LAVENDER, *Statice limonium*—t. American, *Statice Caroliniana*—t. Sea-side, *Statice Caroliniana*.

THRIX, Capillus, Hair.

THROAT, *θροαξ*, *θροαξ*, *Jugulum*, *Interstitium Jugularæ*, *Guttur*, *Sphagè*, (Prov.) *Chôkes*, *Droat*, *Hanse*, *Hose*, (Sc.) *Halse*, *Hawse*, *Witter*. The anterior part of the neck. (F.) *Gorge*. Also, the pharynx.

THROATROOT, *Geum Virginianum*, *Liatris*.

THROATWORT, *Campanula trachelium*.

T H R O B B I N G, *Pulsatilis*, *Sphygmicus*, *Sphygmodes*, *Pulsatory*, (F.) *Pulsatif*. *A throbbing pain*, (Prov.) *Stang*. (F.) *Douleur pulsative*, is a kind of pain which is, or seems to be caused or augmented by the pulsation of arteries.

THROE, Agony, Pains, labour.

THROMBI LACTEI, Infarctus mammae lacteus.

THROMBOCYS'TIS, from *θρομβος*, 'a clot,' and *κύστις*, 'a cyst.' The cyst occasionally surrounding a clot of blood—as in encephalic hemorrhage.

THROMBOSIS, Coagulation, Thrombus.

THROMBUS, *θρομβος*, 'a clot,' from *θροβωω*, 'to coagulate'; *Thrombosis*, *Trumbus*, *Hæmato-ma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-

letting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression, usually disperse it. See Blood.

THROMBUS NEONATORUM, Cephalæmatoma.
THROPILL, Trachea.
THROPPLE, Trachea.
THROTTLE, Trachea.
THROW, Agony, Pains, labour.
THROWORT, Leonurus cardiaca.
THRUSH, Aphthæ — t. Milk, Aphthæ — t. White, Aphthæ.

THRUSTY, Dipsodes.
THRYPSIS, Communion.
THUJA OCCIDENTALIS, *Thuja occidentalis*.

THUMB, Pollex.
THUREA, *Juniperus lycia* — t. Virga, *Juniperus lycia*.

THUS, see *Pinus abies* — t. Fœmininum, see *Pinus abies* — t. Judæorum, *Croton encasquilla*, *Styrax*, *Thymiana* — t. Libanotos, *Juniperus lycia* — t. Masculum, *Juniperus lycia* — t. Verum, *Juniperus lycia* — t. Vulgare, see *Pinus abies*.

THUYA APIHYLLA, see *Sandarae*.
THU'YA seu THUYA OCCIDENTALIS, *T. obtusa*, *Cypressans Arbor Vitæ*, *American Arbor Vitæ*, *Tree of Life*. Ord. Coniferæ. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYLACIÏTIS, *Gutta rosea*.
THYM, *Thymus*.
THYMA, *Thymion*.
THYMALOS, *Taxus baccata*.
THYMASTHMA, *Asthma thymium*.
THYMBRA, *Satureia hortensis* — t. Hispanica, *Thymus mastichina*.

THYME, CAT, *Teucrium Marum* — t. Common, *Thymus* — t. Lemon, see *Thymus serpyllum* — t. Mother of, *Thymus serpyllum* — t. Virginia, *Pycnanthemum linifolium* — t. Wild, *Thymus serpyllum*.

THYMELEA, *Daphne gnidium* — t. Laureola, *Daphne laureola* — t. Mezereum, *Daphne mezereum* — t. Monspelicia, *Daphne gnidium*.

THYMELECO'SIS, from *θυμος*, 'thymus,' and 'ελκος,' 'an ulcer.' Ulceration of the thymus gland.

THYMIAMA, *Στυαπα*, (*Stoa*, 'I burn perfumes') 'a perfume;' *Thms Judæorum*, *Muskwood*, (F.) *Narcaphite*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, Fumigation, Suffimentum.
THYMIASIOTECHNIA, *Thymiatechny*.
THYMIASIS, Fumigation.

THYMIATECH'NY, *Thymiatech'nia*, *Thymiatech'nia*, *Cura fumigato'ria*, from *θυαπα*, 'an odour,' and *τεχνη*, 'art.' The art of employing perfumes in medicine.

THYMIC, *Thymicus*, (F.) *Thymique*. Having relation to the thymus, as "thymic asthma."

THYMIION, *Thyma*, *Thymus*, *Porrus*, *Porrus*, *Verrucæ rhagoidea*, *Verrucæ minor*, from *θυμος*, 'thyme.' A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, *Frambœsia* — t. India, *Frambœsia*.

THYMIQUE, *Thymic*.

THYMITES, Wine impregnated with thyme.
THYMITIS, from *θυμος*, 'thymus,' and *itis*, denoting inflammation. Inflammation of the thymus gland.

THYMIOPATHIA, *Psychopathia*, from *θυμος*, 'the mind,' and *παθος*, 'affection.' A disease of the mind.

THYMOS, Rage.
THYMOXALMË, from *θυμος*, 'thyme,' *οξυς*, 'acid,' and *αλς*, 'salt.' A compound of thyme, vinegar and salt.

THYMUS, *θυμος*, *Glandula Thymus*, *Corpus Thymicum* seu *Thymicum*, *Glandium*, *Thymus gland*, *Corpus incomprehensibile* of Jos. Frank. *Sweetbread* of the butcher. An organ, concerned in hæmatisis, which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains in a central cavity — reservoir of the thymus — a milky fluid: but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thymic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, *T. vulgaris* seu *tennifolius* seu *hortensis*, *Common Thyme*, (F.) *Thym*, *T. ordinaire*, *Farioule*. Ord. Labiatae. *Sec. Syst. Didynamia Gymnospermia*. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, *Satureia capitata*, *Thymion* — t. Calamintus, *Melissa ealanintha* — t. Capitatum, *Satureia capitata* — t. Ciliatum, *T. mastichina* — t. Creticus, *Satureia capitata* — t. Hortensis, *Thymus* — t. Includens, *T. serpyllum*.

THYMUS MASTICHINA, *T. ciliatus*, *Marum vulgare*, *Sampsonchus*, *Clinopodia*, *Mastichina Gallorum*, *Thymra Hispanica*, *Juca Indica*, *Common herb Mastich*. A low, shrubby, Spanish plant, used as an emetic. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS MULTIFLORUS, *Melissa nepeta* — t. Nepeta, *Melissa nepeta*.

THYMUS, RESERVOIR OF THE, see *Thymus*.

THYMUS SERPYLLUM, *T. includens*, *Herpyllus*, *Herpyllus*, *Serpyllum*, *Serpyllum*, *Serpyllum*, *Gilavum*, *Serpyllum vulgare minus*, *Mother of Thyme*, *Wild Thyme*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citratum*, is merely a variety of the *Thymus Serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVATICUS, *Clinopodium vulgare* — th. *Sylvestris*, *Satureia capitata* — th. *Tenuifolius*, *Thymus* — th. *Vulgaris*, *Thymus*.

THYRA, *θυρα*, 'a gate, folding-door.' In composition, *Thyreos* and *Thyro*, *θυρος*, 'a shield resembling a folding-door,' mean the thyroid cartilage.

THYREMPHRAXIS, *Bronchocele*.
THYREO, *Thyro*, in composition, relating to the thyroid cartilage or gland.

THYREOADENITIS, *Thyreitis*.

THYREO-ARYT'ENOID, *Thyro-arytenoides* — t. *Thyro-arytenoides*. That which relates to the thyroid and arytenoid cartilages.

THYREO-ARYTENOID LIG'AMENTS, *Inferior Ligaments of the Larynx*, *Lips of the Glottis*. *Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are

contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

THYREO-ARYTENOID MUSCLES, THYREO-ARYTENOIDÆ, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreο-arytenoides obliquus* to a portion of the *arytenoides* muscle.

THYREO-EPIGLOT'TIC, Thyreo-epiglottideus, Thyreepiglotticus. Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOID, Thyro-hyoides, Thyrohyoides, Hyoleothyreo'des. That which belongs or relates to the thyroid cartilage and os hyoides.

THYREO-HYOID or HYO-THYROID MEMBRANE is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOÏDEUS or Hyo-thyreoides Muscle is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THYREO-PHARYNGEUS, Thyro-Pharyngeus.

THYREOID, Thyroid.

THYREOÏDIEN, Thyroideal.

THYREOIDEUS, Thyroideal.

THYREOÏTIS, Thyreoïden'tis, Thyreoïdi'tis, Angi'na thyreoïdea, from *θυρεος*, 'a shield,' and *itis*, denoting inflammation. Inflammation of the thyroid gland.

THYREONCUS, Bronchocele.

THYREOPHRAXIA, Bronchocele.

THYREPIGLOTTICUS, Thyreoëpiglottic.

THYRO, see Thyreo.

THYRO-ARYTENOID, Thyreo-arytenoid.

THYRO-CRICO-PHARYNGEUS, see Cricopharyngeal.

THYRO-HYOIDES, Thyreo-hyoid.

THYRO-PHARYNGEUS, Thyreo-pharyngeus. Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilages.

THYRO-PHARYNGEUS, Constrictor pharyngis, see Cricopharyngeal.

THYRO-PHARYNGO-STAPHYLINUS, Palato-pharyngeus.

THYROCELE, Bronchocele.

THYROID, Thy'reoid, Thyroï'des, from *θυρα*, 'a gate or folding-door,' or from *θυρεος*, 'a shield,' and *ειδος*, 'form.' That which has the shape of a folding-door.

THYROID CARTILAGE, Cartila'go Scutiformis seu Scuta'lis seu Clypea'lis, Coëperto'rinn, C. Pelta'lis seu pelta'tus, Scutum, Ada'mi Morsûs Os, is the largest of the cartilages of the larynx, at

the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage, cornu superius seu longum*; and, below, by a less prominent eminence, the *lesser cornu, Cornu inferius seu brevè*, which is articulated with the cricoid.

THYROID GLAND, Corpus Thyreoïdeum, Glan'dula Thyreoïdea, (F.) Gland ou Corps Thyroïde, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroïdeale*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDÆAL, Thyroïdeus, Thyroïdeus, (F.) Thyroïdien, Thyroïdien. That which concerns the thyroid gland or cartilage.

THYROIDÆAL ARTERIES are two on each side.

1. The *superior Thyroïdeale, superior laryngeal, superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid*. 2. The *inferior Thyroïdeale, inferior guttural*, much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicælis ascendens*.

THYROIDÆAL VEINS are, 1. A *superior thyroïdeale*, and several *middle thyroïdeale*, which open into the internal jugular vein. 2. An *inferior thyroïdeale*, much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroïdeale plexus*. The inferior thyroïdeale veins open, — the left into the corresponding subclavian; — the right, into the vena cava superior.

THYROÏDIEN, Thyroideal.

THYROPHRAXIA, Bronchocele.

THYRSUS, Penis.

THYSSELINUM, Peucedanum palustre.

THYSSELIUM PALUSTRE, Peucedanum palustre.

TIBI-PÉRONÉO-TARSIEN, Peronæus longus.

TIBIA. A Latin word, which signifies a flute or pipe. *Cuemè, Procne'mè, Procne'minum, Fo'cile majus, Aru'ndo seu Canna major, Canna major seu domes'tica eruris, Shimbone.* The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior or femoral extremity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities of the Tibia, or Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called

Spine of the tibia, which are articulated with the condyles of the *Os femoris*. 2. An *inferior* or *tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *crista of the tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

TIBIA MINIMA, Fibula.

TIBIÆUS, Tibial.

TIBIAL, *Tibia'lis, Tibiæ'us*, (F.) *Tibial, Jambier*. From *tibia*. That which relates to the tibia or to the leg.

TIBIAL APONEUROSIS, (F.) *Aponévrose Jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

TIBIAL ARTERIES are two in number. 1. *Arteria Tibialis Antica*, which arises from the popliteal, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished — the *Tibialis recurrens*, *A. malleolaris interna*, and *A. malleolaris externa*. 2. *A. Tibialis postica*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches — the *Plantar arteries*.

TIBIAD, see Tibial aspect.

TIBIAL ASPECT. An aspect towards the side on which the tibia is situated. — Barclay. *Tibiad* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

TIBIAL NERVES are two in number. 1. The *anterior tibial nerve*, *Pré-tibio-susplantaire*, (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve*, *Branche tibiale du nerf fémoro-poplitée* (Ch.), is the *internal popliteal*.

TIBIAL VEINS, ANTERIOR AND POSTERIOR, have the same arrangement as the arteries which they accompany.

TIBIALIS ANTI'CUS, *Cat'næ mus'culus*, (F.) *Tibialis-métatarsien, Tibio-insarsien* (Ch.), *Jambier antérieur*. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the

posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

TIBIALIS GRACILIS, Plantar muscle.

TIBIALIS POSTI'CUS, (F.) *Tibio-tarsien, Tibiosus-tarsien* (Ch.), *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

TIBIO-CALCANIEN, Soleus — *t. Phalangétien, Flexor longus digitorum pedis profundus perforans — t. Sous-tarsien, Tibialis posticus — t. Sus-métatarsien, Tibialis anticus — t. Sus-tarsien, Tibialis anticus*.

TIBIO-TARSAL, *Tibio-tar'sens*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

TIBIO-TARSAL ARTICULA'TION is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

TIBIO-TARSIEN, Tibialis posticus.

TIC, *Twitching, Vellication*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called *Tic convulsif* ou *Tic non douloureux, Histrionic Spasm of the Face*, to distinguish it from *Tic douloureux* ou *neuralgia faciei*, and has been termed a *partial chorea* or form of chronic chorea, *Spasmus facialis, Chore'a faciei*.

TIC DOULEUREUX, Neuralgia, facial — *t. non douloureux*, see Tic.

TICKLE WEED, *Veratrum viride*.

TICKLING, (Sc.) *Kittling, Kitilling*, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titilla'tio, titilla'tion*); at others, the sensation produced by this action (*pruritus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

TICKSEED SUNFLOWER, *Coreopsis trichosperma*.

TICKWEED, *Hedeoma* — *t. Sunflower, Coreopsis trichosperma*.

TICO'REA FEBRIE'UGA; a Brazilian plant. *Order, Rutacæ*, the bark of which is intensely bitter, astringent and antiperiodic.

TICOREA JASMINIFLO'RA. A decoction of the leaves is said to be drunk by the Brazilians as a cure for frambœsia.

TIDAL AIR, see Respiration.

TIERCE, see Tertian.

TIGE PITUITAIRE, Infundibulum of the brain — *t. Sus-sphénoïdale, Infundibulum of the brain*.

TIGILLUM, Crucible.

TIGLIA SEU TIGLII GRANA, see Croton Tiglum.

TIGRETIER, see Mania, dancing.

TIGULA, Saccharum.

TIKIMMA, *Cacoucia coccinea*.

TILBURY, MINERAL WATERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

TIL'IA, *T. Europæ'a seu grandiflo'ra seu cor-*

difolia seu *pauciflora* seu *plataphylla*, (akin to *πτελιά*, 'the elm tree'). *Phil'ya*. The *Lime* or *Liuden tree*, (F.) *Tilleul*. Ord. *Tiliaceæ*. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILIA AMERICANA. *T. glabra* seu *Canadensis*, *Liuden*, *Linn*, *Basswood*, *Whitewood*, *Spoonwood*. A mucilage prepared by macerating the inner bark in cold water, has been applied to burns. It may be made into a cataplasm by thickening it with bran.

TILIA GLABRA, *T. Americana* — t. *Canadensis*, *T. Americana*.

TILLEUL, *Tilia*.

TILLICHERRY CORTEX, *Nerium* antidiabeticum.

TILMA, *Lintum*.

TILMOS, *Eulsion*.

TILMUS, *Carpholium*.

TILY, OF THE INDIANS, *Viburnum dentatum*.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMBRE (F.), 'the sound of a bell.' The quality of sound by which one voice, or one instrument, can be distinguished from another when producing the same note.

TIMIDUS, *Rectus inferior oculi*.

TIN, (D.) *Ten*. *Stannum*, *Cassiteros*, *Cattiveros*, *Stangos*, *Jupiter*, *Stupia*, *Laos*, *Plumbum album* seu *caudidam*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291; giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, \mathfrak{zj} of the *Pulvis Stanni*, *Stannum granulatum* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

TIN, BUTTER OF, *Tin*, muriate of—t. *Chloruret of Tin*, muriate of—t. *Deutohydrochlorate of Tin*, muriate of.

TIN-FOIL, *Stannum foliatum*, *Stanniolum*, is used for plugging carious teeth, &c.

TIN-GLASS, *Bismuth*—t. *Granular*, see *Tin*—t. *Muriate of*, *superoxygenated*, *T. muriate of*.

TIN, MURIATE OF, *Fuming liquor of Libavicus*, *Murius Stanni* seu *Oxyd'uli Stanni*, *Butter of Chloruret* or *Deuto-hydro-chlorate* or *Superoxygenated Muriate of Tin*. This is formed of tin, one part; *concentrated muriatic acid*, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

TIN, SULPHURET OF, *Aurum musivum*.

TINAGMUS, *Concussio*.

TINASMUS, *Tencismus*.

TINCTURA, from *tingere*, *tinctam*, 'to dye.' *Tincture*. *Essentia*, (F.) *Teinture Alcoolique*, *Alcoolé*, *Alcohol*, *Alcoofature*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence*, in one of its old significations; and with the *Alcoofatum* of the *Codex* of Paris. It is not unusual, however, to speak of *aqueous tincture*, *ethereal tincture* (*Éthérolature*, *Béral*), &c. Tinctures are usually made either with pure alcohol or proof spirit. The former are precipitated by water; and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; or unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse

powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.—Ph. U. S.

TINCTURA ABSINTHII COMPOSITA, *Essentia absinthii composita seu amara*, *Compound Tincture of wormwood*. (*Absinth.*, *artem. pontic.*, *caryoph.* āā \mathfrak{zss} , *sacch.* \mathfrak{zij} , *alcohol*. Oss. Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose, \mathfrak{fzj} to \mathfrak{fzss} .

TINCTURA ACACIÆ CATECHU, *T. catechu* — t. *Acetatis ferri cum alcohole*, see *T. ferri acetatis* — t. *Acidi sulphurici*, *Sulphuricum acidum aromaticum*.

TINCTURA ACONITI, (Ph. U. S. 1842.) *Tinctura Aconiti foliorum*, (Ph. U. S. 1851.) *Tincture of Aconite*, (*Aconit. folior.* \mathfrak{ziv} , *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose, gr. xx or xxx. It is rubbed on the seat of neuralgia.

TINCTURA ACONITI RADICIS, *Tincture of Aconite root*, (*Aconit. radices contus.* ℥ij , *Alcohol.* Oij. Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

TINCTURA ÆTHEREÆ CAMPHORATA, *Solutio camphoræ æthereæ*, *Liquor nervinus Bang'ii*, *Spiritus sulphurico-æthereus camphoratus*, *Naphtha vitrioli camphorata*. (*Camphor.* p. i. *Æther sulphuric.* p. ii.) Stimulant in atonic diseases, arthritic cardialgia, and spasm. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHEREÆ FERRI, *Alcohol* (seu *Tinctura*) *sulphurico-æthereus ferri* — t. *Alcoholica Chinæ composita*, *T. cinchonæ composita* — t. *Alcoholica corticum aurantium Whyttii*, *Tinctura cinchonæ amara* — t. *Alexipharmaca Huxhami*, *Tinctura cinchonæ composita*.

TINCTURA ALOËS, *T. Aloës Socotri'nae*, *Essentia Aloës*, *Alcohol cum Aloë perfoliata*, *Tincture of Aloës*. (*Aloës*, pulv. \mathfrak{zj} , *ext. glycyrrh.* \mathfrak{zij} , *aq. Oiss.* *alcohol.* Oss. Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloës. Dose, \mathfrak{fzss} to \mathfrak{fziss} .

TINCTURA ALOËS ÆTHEREÆ, *T. Aloës vitriolata*, *Æthereal Tincture of Aloës*. (*Aloës Socotr.*, *Myrrh.* āā \mathfrak{ziss} , *croci* \mathfrak{zj} , *sp. ætheris sulph.* Oj. Digest the myrrh in the ether for 4 days; then add the aloës and saffron. *Ph. E.*) Stimulant and cathartic. Dose, \mathfrak{fzj} to \mathfrak{fzij} .

TINCTURA ALOËS COMPOSITA, *Elixir Proprietatis seu operativum seu Aloës*, *Tinctura Aloës cum Myrrhâ seu Aloës et Myrrhæ* (Ph. U. S.) seu *Aloës et Myrrhæ crocata*, *Elixir of long life*, *Compound Tincture of Aloës*. (F.) *Elixir de longue vie*, *Baume de vie de Lelièvre*, (*Aloës*, in pulv., \mathfrak{zij} , *croci*, \mathfrak{zj} , *Tinct. Myrrhæ*, Oij.) Macerate for 14 days, and filter. Purgative and stomachic. Dose, \mathfrak{fzj} to \mathfrak{fzij} .

Boerhaave's Elixir consisted of *aloes*, *myrrh*, *saffron*, and *tartrate of potassa*, digested in *alcohol* and *water*.

Radcliffe's Elixir is formed of *Aloës socotr.* \mathfrak{zvj} , *cort. cinnam.*, *rad. zedoar.* āā \mathfrak{zss} , *rad. rhei* \mathfrak{zj} , *coccinell.* \mathfrak{zss} , *symp. rhamni* \mathfrak{zij} , *sp. tenuior.* Oj. *aq. purâ* \mathfrak{fzvj} .

TINCTURA ALOËS ET MYRRHÆ, *T. aloës composita* — t. *Aloës et myrrhæ crocata*, *T. A. composita* — t. *Aloës vitriolata*, *T. A. ætherea* — t. *Amara*, *T. gentianæ composita* — t. *Ammoniæ composita*, *Spiritus ammoniæ succinatus* — t.

Amomi repentis, T. cardamomi — t. Amomi zingiberis, T. zingiberis.

TINCTURA ANGUSTURÆ, *T. Cuspariæ*, *Tincture of Angustura*. (*Cort. cuspar.* in pulv. crass. redact. \mathfrak{z} ij. *sp. vin. ten.* Oij. Digest. *Ph. D.*) Dose, f \mathfrak{z} to f \mathfrak{z} ij.

TINCTURA ANTIFEBRILIS WARBURGI, see Beeru.

TINCTURA ANTIODONTALGICA, *Toothach Tincture*. (*Tannin.* \mathfrak{z} ij, *Mastick.* gr. v, *æther.* \mathfrak{z} ij. M.) To be applied on cotton wool to the tooth previously dried.

TINCTURA ARISTOLOCHIE SERPENTARIÆ, *T. serpentariæ* — t. Aromaticæ, T. cinnamomi composita — t. Aromaticæ ammoniata, Spiritus ammoniac aromaticus.

TINCTURA ASSAFETIDÆ, *T. Ferulæ Assafetida*, *T. ferulida* seu *assafetida*, *Tincture of Assafetida*. (*Assafetid.* \mathfrak{z} iv, alcohol. Oij. Macerate for 14 days and filter. *Ph. D.*) Dose, gtt. xv to f \mathfrak{z} ij.

TINCTURA ASSAFETIDÆ AMMONIATA, Spiritus Ammoniac foetidus.

TINCTURA AURANTII, *T. Corticis Aurantii*, *Tincture of Orange Peel*. (*Aurant. cort. recent.* \mathfrak{z} ij, *sp. rect.* Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f \mathfrak{z} ss to f \mathfrak{z} ij.

TINCTURA AUREA, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA BELLADONNÆ, *Tincture of Belladonna*. (*Belladonna*, \mathfrak{z} iv, alcohol. dilut. Oij. Macerate for 14 days; express, and filter through paper.) It may, also, be prepared by displacement. *Ph. U. S.*)

TINCTURA BENZOÏNI COMPOSITA, *T. Benzoës composita*, *Balsamm Catholicum* seu *Perisicium* seu *traumatium*, *Elixir traumaticum*, *Compound Tincture of Benzoin*, *Friar's* or *Verrain's Balsam*, *Wade's* or *Jennit's drops*, *Commander's* or *Wound Balsam*, *Balsam for Cuts*. (*Benzoin.* \mathfrak{z} ij, *styrac. purif.* \mathfrak{z} ij, *Balsam. tolut.* \mathfrak{z} ij, *aloes*, in pulv. \mathfrak{z} ss, alcohol. Oij. Macerate for 14 days and filter. *Ph. U. S.*) Stimulant. Used chiefly to wounds and ulcers.

The basis of *Turlington's Balsam of Life*, *Turlington's Balsam*, is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy:—Alcohol. Oviiij, Benzoin. \mathfrak{z} xij, *Styrac. liquid.* \mathfrak{z} iv, *Aloes Socotrin.* \mathfrak{z} ij, *Balsam. Pernian.* \mathfrak{z} ij, *Myrrhæ* \mathfrak{z} ij, *Rad. Angelic.* \mathfrak{z} ss, *Balsam. Tolut.*, *Lit. Glycyrrh.* \mathfrak{a} \mathfrak{z} iv. Digest for 10 days, and strain.

The *Essence of Coltsfoot* consists of equal parts of the *Compound Tincture of Benzoin* and *Balsam of Tolu*, to which is added double the quantity of *Rectified Spirit of Wine*. It is sold as a pectoral.

TINCTURA BUCHU, *T. Buchu*, *Tincture of Buchu*. (*Buch.* \mathfrak{z} v, Alcohol. dilut. Oij (Imp. meas.). Digest for seven days and filter. It may be made, also, by percolation. *Ph. E.*) Dose, f \mathfrak{z} ij to f \mathfrak{z} iv.

TINCTURA BECKU, *Tinctura Buchu*.

TINCTURA CALUMBÆ, *T. Columbæ* seu *Colombæ* (Ph. U. S.), *Tincture of Columbo*, *Columbo Bitters*, (*Columb. rad. cant.* \mathfrak{z} iv, alcohol. dilut. Oij. Macerate for 14 days; express, and filter. *Ph. U. S.*) Dose, f \mathfrak{z} ss to f \mathfrak{z} iv. It may, also, be made by displacement.

TINCTURA CAMPHORÆ, Spiritus camphoræ.

TINCTURA CAMPHORÆ COMPOSITA, *T. Opii Camphorata* (Ph. U. S.), *Compound Tincture or Camphorated Tincture of Opium*, *Elixir Paregoricum*, *Paregoric Elixir*. (*Opii*, in pulv., *Acid Benzoic.* \mathfrak{a} \mathfrak{z} ij *ol. anisi*, f \mathfrak{z} ij, *mellis despumat.* \mathfrak{z} ij, *Camphor.* \mathfrak{z} ij, alcohol. dilut. Oij. Macerate for 14 days, and filter through paper. *Ph.*

U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f \mathfrak{z} ij to f \mathfrak{z} ij.

Squire's Elixir, an empirical carminative preparation, is thus made, according to one formula. (*Opii* \mathfrak{z} iv, *camphor.* \mathfrak{z} ij, *coccinell.* \mathfrak{z} ij, *fenicul. dulc.* \mathfrak{z} ij, *tinct. serpent.* Oj, *sp. anisi.* coag. ij, *aqua* Oij, *anri musivi.* \mathfrak{z} vj.)

TINCTURA CANTHARIDIS INDICÆ, *Tincture of Indian Hemp*. (*Ext. Cannab. purif.* \mathfrak{z} ss (avoirdupois), *sp. rectificat.* Oss (Imp. meas.)) Dissolve. *Ph. D.*) Dose, about 40 drops.

TINCTURA CANTHARIDIS, *T. C. Vesicato riæ*, *T. Lytta* seu *Meloë vesicatorii*, *Tincture of Cantharides*, *Tincture of Blistering Flies*, *T. of Spanish Flies*, (F.) *Teinture rubéfiante*. (*Cantharid. cont.* \mathfrak{z} ij, alcohol. dilut. Oij. Macerate for 14 days; express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x.

Matther's Injection, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides*.

TINCTURA CAPSICI, *Tincture of Capsicum* or *Cayenne Pepper*. (*Capsic.* \mathfrak{z} ij, alcohol. dil. Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Stimulant. Dose, f \mathfrak{z} ss to f \mathfrak{z} ij.

TINCTURA CARDAMOMI, *T. amo'mi repentis*, *Tincture of Cardamoms*. (*Cardam. cont.* \mathfrak{z} iv, alcohol. dilut. Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement. *Ph. U. S.*) Use, the same as the seeds. Dose, f \mathfrak{z} ij to f \mathfrak{z} iv.

Solomon's Bala of Gilead, an empirical preparation, seems to be an aromatic tincture, — of which *Cardamoms* form a leading ingredient, — made with brandy. Some affirm that it contains *cantharides*.

TINCTURA CARDAMOMI COMPOSITA, *Tinctura Stomachica*, *Compound Tincture of Cardamoms*, *Stomach Tincture*. (*Cardamom. cont.* \mathfrak{z} vj, *Carni. cont.* \mathfrak{z} ij, *cinnam. cont.* \mathfrak{z} v, *Uvæ passæ* deumtis acinis, \mathfrak{z} v, *cocci. cont.* \mathfrak{z} ij, alcohol. dilut. Oiss. Macerate for 14 days; express and filter. *Ph. U. S.*) Stomachic and carminative. Dose, f \mathfrak{z} ij to f \mathfrak{z} iv.

TINCTURA CARMINATIVA SYLVII, *Alcoolatum Carminativum Sylvii*, *Carminative Elixir of Sylvius*. (*Rad. angelic.* 4 p., *rad. imperator.* *galang.* \mathfrak{a} 6 p., *fol. rosamarin.* *majoran.* *rutæ, basilic.* \mathfrak{a} 48 p., *baccar. laur. nobil.* 12 p. *sem. angelic.*, *ligust. levist.*, *anis.* \mathfrak{a} 16 p., *zingib.* *inc. moschat.* \mathfrak{a} 6 p., *cinnam.* 12 p., *caryoph.*, *cort. limon.* \mathfrak{a} 4 p. Add alcohol 1500 p. Macerate and distil, 1000 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, f \mathfrak{z} ss to f \mathfrak{z} ss.

TINCTURA CASCARILLÆ, *T. Crotonis Eleutheriæ*, *Alcohol cum Crotonis Cascarillâ*, *Tincture of Cascarilla*. (*Cascarill. cort. cont.* \mathfrak{z} iv, *sp. ten.* Oij. *Ph. L.*) Dose, f \mathfrak{z} ij to f \mathfrak{z} v.

TINCTURA CASTOREI, *T. Castorei Rosæci* seu *Castorei Canadensis*, *Essentia Castorei*, *Alcohol castoria'tum*, *Tincture of Castor*. (*Castor. cont.* \mathfrak{z} ij, alcohol. Oij. Macerate for 7 days, express, and filter. *Ph. U. S.*) Tonic and antispasmodic. Dose, gtt. xx to f \mathfrak{z} ij, or more.

TINCTURA CASTOREI COMPOSITA, *T. C. ammoniata*, *Compound Tincture of Castor*. (*Cast.* \mathfrak{z} ij, *g. assafetid.* \mathfrak{z} ss, alcohol. ammoniat. Oj. *Ph. E.*) Antispasmodic. Dose, f \mathfrak{z} ij to f \mathfrak{z} iv. Called, also, *Elixir ferulidum*, *Tinctura castorei ferulida* seu *ferulida ammoniata*.

TINCTURA CATECHÆ, *Tinctura Japonicæ* seu *Mimosæ Catechu* seu *Acacia Catechu*, *Tincture of Catechu*. (*Catech.* \mathfrak{z} ij, *cinnam. contus.* \mathfrak{z} ij, alcohol. dilut. Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) Astringent. Dose, f \mathfrak{z} ij to f \mathfrak{z} ij.

The *Concentrated Solution of Charcoal*, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CHIRETTÆ, *Tincture of Chiret'ta*. (Chiret. cont. $\frac{3}{v}$, (avoid.) alcohol. dilut. Oij. (Imp. meas.) Macerate for 14 days. Ph. D.) Dose, f $\frac{3}{j}$, or f $\frac{3}{ij}$, as a tonic.

TINCTURA CICUTÆ, *T. conii maculati*.

TINCTURA CINCHONÆ, *T. Corticis Peruvia'ni Simplex* seu *Cort. Peruvia'ni, Tincture of Cinchona* or of *Bark*. (Cinchon. flav. in pulv. $\frac{3}{vj}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. Ph. U. S.) Dose, f $\frac{3}{j}$ to f $\frac{3}{iv}$, or more.

TINCTURA CINCHONÆ AMA'RA seu alcohol'ica corticum aurantiorum Whyt'tii seu Kinki'næ ama'ra, *Elizir antihypochondriacum* seu rob'orans Whyt'tii seu Whyt'tii seu stomach'icum spirituosum, *Essent'ia Corticis Peruvia'ni Composita*. (Cinch. p. viij, Gentian. Rad., Cort. Aurant. p. iij. Alcohol. ('900) 96 p. Digest. Dose, one or two teaspoonfuls.)

TINCTURA CINCHONÆ AMMONIATA, *T. Corticis Peruvia'ni volatilis*, Ammoniated or Volatile Tincture of Bark. (Cinchon. lancifol. cort. cont. $\frac{3}{iv}$, sp. ammon. aromat. Oij. Ph. L.) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHONÆ ÆTHËREA COMPOSITA, *T. Kinæ Kinæ æth'erea composita*, *Elizir'ium Antisepticum Doct'oris Chausseir, Chansier's Antiseptic Elizir*. (Cinchon. officin. $\frac{3}{ij}$, cascarill. $\frac{3}{ss}$, cinnam. $\frac{3}{ij}$, croci $\frac{3}{ss}$, sacch. alb. $\frac{3}{xxxvij}$. Put these bruised into a matrass, and add vin. alb. Hispanic. vel vin. muscat. alcohol. $\frac{aa}{Oj}$. Macerate for two days, and add sulphuric ether f $\frac{3}{ss}$. Ph. P.) Tonic, stimulant, and antiseptic. Dose, f $\frac{3}{ss}$ to f $\frac{3}{j}$.

TINCTURA CINCHONÆ COMPOSITA, *T. Corticis Peruvia'ni Composita* seu febrifuga Doct'oris Huxha'mi seu Alexiphar'maca Huxhami seu Alcohol'ica China Composita, *Essent'ia Chinae* seu *Corticis Peruvia'ni Alexiphar'maca Huxhami* seu antiseptica Huxhami, *Compound Tincture of Cinchona* or *Bark*, *Huxham's Tincture of Bark*. (Cinchon. rubr. pulv. $\frac{3}{ij}$, aurant. cort. cont. $\frac{3}{ss}$, serpent. cont. $\frac{3}{ij}$, croci, sautal. $\frac{aa}{3j}$, alcohol. dilut. f $\frac{3}{xx}$. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be made by displacement. More grateful than the simple tincture. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA CINNAMOMI, *T. Lauri Cinnamomi, Essent'ia Cinnamomi, Tincture of Cinnamon*. (Cinnam. cont. $\frac{3}{ij}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Stomachic. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA CINNAMOMI COMPOSITA, *T. seu Essent'ia Aromatica, Alcoöl cum Aromat'ibus Compositus, Compound Tincture of Cinnamon*, (F.) *Eau de Bonferme* ou d'Armagnac. (Cinnam. cont. $\frac{3}{j}$, cardam. cont. $\frac{3}{ss}$, zingib. cont. $\frac{3}{ij}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Use, same as the last. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA COCCI CACTI, *Tincture of Coch'ineal*. (Cocci pulv. $\frac{3}{ij}$ (avoid.), alcohol. dilut. Oj. (Imp. meas. Ph. D.) Chiefly a colouring ingredient. At times, given in nervous affections. Dose, gtt. xij to f $\frac{3}{j}$.

TINCTURA DE COCHLEA'RHS, *Alcoola'tum de Cochlea'riis seu antiscorb'uticum*. (Fol. cochlear. recent. 2500 p., rad. armoraciae, 230 p., alcohol. (22° to 32° Baumé) 3000 p., distil off 2000 p. Ph. P.) Antiscorbatic. Dose, f $\frac{3}{j}$ to f $\frac{3}{j}$.

TINCTURA COL'CHICI, *T. C. Sem'inis*, (Ph. U. S.), *Tincture of Colchicum Seed*. (Colchic. sem.

cont. $\frac{3}{iv}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Dose, ten to sixty drops.

TINCTURA COLCHICI COMPOSITA, *Spiritus colchici ammoniatus*—*t. Colchici seminis, T. colchici*—*t. Colombæ, T. Calumbæ*.

TINCTURA CONI'I, *T. C. Maculati, T. Cien'tæ, Tincture of Hemlock*. (Conii fol. $\frac{3}{iv}$, alcohol. dil. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be made by displacement. Use;—the same as that of the leaves.

TINCTURA CONII MACULATI, *T. conii*—*t. Convulvuli Jalapæ, T. jalapii*—*t. Corticis aurantii, T. aurantii*—*t. Corticis Peruviani composita, T. cinchonæ comp.*—*t. Corticis Peruviani simplex, T. cinchonæ*—*t. Corticis Peruviani volatilis, T. cinchonæ ammoniata*.

TINCTURA CROCI SATI'VI, *T. Croci, Tincture of Saffron*. (Crocii Angl. cont. $\frac{3}{j}$, alcohol. dilut. $\frac{3}{xv}$. Ph. E.) Slightly stomachic [?]. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA DE CROCO COMPOSITA, *Elizir'ium de Garna, Alcoola'tum de Croco Compositum, Compound Tincture of Saffron, Elizir of Gurus*. (Aloes Socotr. 320 p., myrrh. 64 p., croci. 32 p., cinnam., nuc. moschat., caryoph. $\frac{aa}{16}$, 16 p., alcohol. 1000 p. aq. flor. aurant. 5000 p. Digest for two days; distil 4000 p. and add syrup of capillaire, 5000 p. Ph. P.) Aromatic, cordial, stomachic. It is also called *Elizir cordia'le et stomach'icum*, and *E. anticolicum crocata'm*.

TINCTURA CROTONIS, *Tincture of Croton*. Under this name Mr. E. Wilson recommends 'a most valuable cutaneous stimulant,' made by adding four fluidounces of alcohol to one ounce of the bruised seeds of *Croton tiglium*.

TINCTURA CROTONIS ELEUTHERIÆ, *T. cascarillae*.

TINCTURA CUBEÆ, *Tincture of Cubebs*. (Cubeb. cont. $\frac{3}{iv}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Dose, one or two fluidrachms.

TINCTURA CUSPARIÆ, *Tinctura Augusturæ*.

TINCTURA DIGITALIS, *T. Digitalis purpu'nea, Tincture of Digitalis*. (Digital. $\frac{3}{iv}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. Use, same as that of the leaves. Dose, gtt. x.

TINCTURA ER'GOTÆ, *Tincture of Ergot*. (Ergot. in pulv. crass. $\frac{3}{viii}$ (avoid.), Sp. tenuior. Oij. (Imp. meas.) Macerate for 14 days, express, and filter. Ph. D.) Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA ER'GOTÆ ÆTHËREA, *Ethe'ral Tincture of Ergot*. (Ergot. contus. $\frac{3}{xv}$, Æther. Oij. (Imp. meas.) Macerate for 7 days, express, and filter. Ph. L.) Dose, 60 to 90 minims.

TINCTURA FEBRIFUGA DOCTORIS HUXHAMI, *T. cinchonæ composita*.

TINCTURA FERRI ACETA'TIS, *Tincture of Acetate of Iron*. (Potass. acetat. $\frac{3}{ij}$, sulph. ferri. $\frac{3}{j}$, sp. rectific. Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. Ph. D.) Tonic and astringent. Dose, gtt. xx to f $\frac{3}{j}$. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoho'le*, which differs from the other, in having half the quantity, only, of the Acetate of Potass.

TINCTURA FERRI AMMONIATA, *T. Ferri Ammoniacalis* seu *Florum martia'lium* seu *Marti's Mynsicht'i, Tincture of Ammoniated Iron*. (Ferri ammon. $\frac{3}{iv}$, sp. ten. Oj. Ph. L.) Use—same as that of the ammoniated iron. Dose, f $\frac{3}{ss}$ to f $\frac{3}{j}$.

TINCTURA FERRI AMMO'NIO-CHLO'RIDI, *Tincture of Ammonio-chloride of Iron*. (Ferri ammonio-chlorid. $\frac{3}{iv}$, alcohol. dilut., aquæ destillat.

ãã Oj. (Imp. meas.) Dissolve and filter. *Ph. L.*)
Dose, gtt. x to xx.

TINCTURA FERRI CHLORIDI, T. ferri muriatis.

TINCTURA FERRI MURIATIS, T. Ferri chlo'ridi
(*Ph. U. S.*) seu *sequi-chlo'ridi* seu *Martis in Spiritu Salis* seu *Martis cum Spiritu Salis* seu *Ferri Muriatis, Liqueor Ferri Muriatis, Tincture of Muriate of Iron, Tincture of Steel, Alcohol ferratus.* (*Ferri subcarb. liqss, acid. muriat. Oj, alcohol. Oij.*) Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. *Ph. U. S.*) Tonic and styptic. It has been given, also, with advantage in erysipelas and scarlatina in the dose of ℥ x to ℥ xx, every two or three hours. Dose, gtt. x to xx.

Bestucheff's Tincture or *Klaproth's Tincture* is an ethereal tincture of chloride of iron. It is composed of dry *perchloride of iron*, one part; *Hoffmann's anodyne liquor*, seven parts.

The *Antivenereal Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

TINCTURA FERRI SESQUICHLORIDI, T. Ferri muriatis—t. Ferulæ Assafetidæ, T. Assafetidæ—t. Florum martialium, T. ferri ammoniata—t. Fœtida, T. assafetidæ—t. Fœtida ammoniata, T. castorei composita—t. Fuliginis, see Fuligo.

TINCTURA GAL'BANI, *Tincture of Galbanum.* (*Galb. ʒij, sp. tenuior. Oij. Ph. D.*) Stimulant and antispasmodic. Dose, fʒj to fʒiij.

TINCTURA GALLA'RUM, T. Gallæ, (*Ph. U. S.*) *Tincture of Galla.* (*Gall. contus. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Astringent. Dose, fʒj to fʒiij.

TINCTURA GENTIANÆ COMPOSITA, *Tinct. Amara, Elixir Stomachicum, Compound Tincture of Gentian, Spirit Bitters.* (*Gent. concis. ʒij, aurant. cort. ʒj, cardam. cont. ʒss, alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. It may, likewise, be prepared by displacement. *Ph. U. S.*) Tonic and stomachic. Dose, fʒj to fʒiij.

Brodum's Nervous Cordial consists of the *Tinctures of Gentian, Columba, Cardamon, and Bark*, with the *Compound Spirit of Lavender, and Wine of Iron.*

Stoughton's Elixir is a compound tincture of gentian. The *Elixirium Ductoris Stoughton* seu *Tinctura Amara* of the Parisian Codex is prepared as follows:—*Absinth. summit. exsicc., Teneri chamædrys. Rad. gentian., cort. aurant., ãã ʒvj, cascariillæ ʒj, rhei ʒss, aloes socotr. ʒj, alcohol. Oij.*) Digest.

TINCTURA GUAIA'CI, T. Guaiaci officinalis, *Tincture of Guaiacum.* (*Guaiac. liqss, alcohol. Oij.*) Macerate for 14 days, and filter. *Ph. U. S.*) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock.*

TINCTURA GUAIA'CI AMMONIATA, T. Guaiaci'na Volatilis, T. Guai'aci, (*Ph. L. 1788.*) *Elixir Guai'aci Volatilis, Alcohol cum Guai'aco officinale ammoniatum, A. ammoniæ et Guai'aci, Ammoniated Tincture of Guaiacum, Volatile Tincture of Guaiacum.* (*Guaiac. pulv. ʒiv, sp. ammon. aq. Oiss.*) Macerate for 14 days, and filter. *Ph. U. S.*) Properties same as the last. Dose, fʒj to fʒiij.

Hatfield's Tincture—a nostrum—consists of *Guaiacum and Soap*, ãã ʒij, rectified spirit, Oiss.

TINCTURA HELLEBORI, T. Hellebori Nigri, T. Melampodii, *Tincture of Black Hellebore.* (*Helleb. nigr. cont. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, fʒss to fʒj.

TINCTURA HIERA, Vinum aloes.

TINCTURA HUMULI, T. Lu'puli, *Tincture of Hops.* (*Humuli, ʒv, alcohol. dilut. Oij.*) Tonic and sedative. Dose, fʒss to fʒiij.

TINCTURA HYOSCY'AMI, T. *Hyoscyami nigri, Tincture of Henbane.* (*Hyoscyam. fol. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Narcotic, anodyne. Dose, gtt. xx. to fʒj.

TINCTURA IO'DINI, (*Ph. U. S., 1842.*) T. Iodini, (*Ph. U. S., 1851.*) *Alcohol Iodii, Tincture of Iodine.* (*Iodin. ʒj, alcohol. Oj.*) Dissolve. *Ph. U. S.*) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops three times a day.

An ethereal and a chloroform tincture of iodine have been used, to affect the system with iodine by inhalation.

TINCTURA IODINI COMPOSITA, (*Ph. U. S., 1842.*) T. Iodini Composita, (*Ph. U. S., 1851.*) *Compound Tincture of Iodine.* (*Iodin. ʒss, Potassii iodid. ʒj, Alcohol. Oj.*) Dissolve. *Ph. U. S.*) Dose, 10 to 30 drops.

TINCTURA JALA'PII, T. Jala'pæ, (*Ph. U. S.*) seu *Convolvuli Jalapæ, Vali'ga, Tincture of Jalap.* (*Jalap. pulv. ʒvi, Alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Cathartic. Dose, fʒj to fʒiv.

TINCTURA JALA'PII COMPOSITA, *Elixir Jalapæ Compositum* seu *purgans* seu *anthelminthicum Succorum, Essentia catholica purgans Rothii*, (*F.*) *Eau de vie Allemande.* (*Jalap. liqss, Scannnon. ʒj, Alcohol. (22°) Ovj.*) Macerate for eight days. *Ph. P.*) Dose, 60 to 100 drops.

TINCTURA JAPONICA, Tinctura catechu—t. Kinæ kinæ ætherea composita, Tinctura eichonæ ætherea composita—t. Kinkinæ amara, Tinctura eichonæ amara.

TINCTURA KINO, *Tincture of Kino.* (*Kino, in pulv., ʒvj; Alcohol. dilut. q. s.*) Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until fʒviiij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely stopped bottles. *Ph. U. S.*) Astringent. Dose, fʒj to fʒij.

TINCTURA KRAMERIÆ, *Tincture of Rhatany.* (*Kramer. in pulv. ʒvj, alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, fʒj to fʒij.

TINCTURA LACTUCA'RIS, *Tincture of Lactucarium.* (*Lactucur. in pulv. ʒiv, Sp. tenuior. Oij.*) (Imp. meas.) Best prepared by percolation. *Ph. E.*) Dose, 30 minims to fʒj.

TINCTURA LAURI CINNAMOMI, Tinctura cinnamomi—t. Lavandulæ composita, Spiritus lavand. comp.

TINCTURA LIMO'NIS, *Tincture of Lemon peel.* (*Limon. cort. ʒiiiss, Sp. tenuior. Oij.*) (Imp. meas.) Macerate for 7 days, express and filter. *Ph. D.*) Dose, fʒj to fʒij.

TINCTURA LOBE'LIÆ, *Tincture of Lobelia.* (*Lobel. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, fʒj to fʒij.

TINCTURA LOBE'LIÆ ÆTHE'REA, *Ethereal Tincture of Lobelia.* (*Lobel. pulv. ʒv, Sp. æther. sulph. Oij.*) (Imp. meas.) *Ph. E. and L.*) Dose, same as the last.

TINCTURA HUMULI, Tinctura Humuli, T. Lupulinae.

TINCTURA LUPULINÆ, T. Lu'puli, (*Ph. E.*) *Tincture of Lupuline.* (*Lupulin. ʒiv, alcohol.*

Oij. Macerate for 14 days, and filter. *Ph. U. S.*)
Dose, fʒj to fʒij.

TINCTURA LYTÆ, Tinctura cantharidis—t. Martis Glauberi, see Ferrum tartarizatum—t. Martis in spiritu salis, Tinctura ferri muriatis—t. Martis Mynsichti, Tinctura ferri ammoniata—t. Martis vinosa, Vinum ferri.

TINCTURA MATICO, Tincture of Matico. (*Matico* in pulv. crass. ʒviij, (avoid.) *Sp. tenuior*. Oij. (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, fʒj to fʒij.

TINCTURA MELAMPODII, Tinctura hellebori nigri—t. Meles vesicatorii, Tinctura cantharidis—t. Metallorum, Liliun Paracelsi—t. Minosæ catechu, Tinctura catechu.

TINCTURA MOSCHI, Tincture or Essence of Musk. (*Mosch.* in pulv. redact. ʒij. *sp. vini rect.* Oj. Dose, fʒj to fʒiv.

TINCTURA MYRRHÆ, Tincture of Myrrh, Simple Tincture of Myrrh. (*Myrrhæ* contusæ ʒiv, alcohol Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

Hudson's Preservative for the Teeth and Gums consists of Tinct. myrrh., tinct. ciuch., aq. cinnam. āā ʒij, eau d'arquebusade ʒj, pulv. gum. Arab. ʒss. M.

TINCTURA NERVINA BESTUCHEFFII, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervina Halensis, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervino-tonica, Lamotte's, Alcohol seu Tinctura sulphurico-æthereus ferri.

TINCTURA NUCIS VOMICÆ, Tincture of Nux Vomica. (*Alcohol. s. g.* 837, fʒj; *Dry Extract of Nux Vomica*, 3 gr.) Dose, gtt. v to xxx, in cases where the nux vomica is indicated.

It is directed, in the last edition of the *Ph. U. S.* (1851), to be prepared as follows:—*Nucis vomicæ* rasur., ʒviij; alcohol, Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement. Dose, gtt. v to xx.

TINCTURA OLEI MENTHÆ PIPERITÆ, Tincture of Oil of Peppermint, Essence of Peppermint. (*Ol. menthæ piperitæ*, fʒij, alcohol. Oj. Dissolve. *Ph. U. S.*) Dose, 5 drops, as a carminative.

TINCTURA OLEI MENTHÆ VIRIDIS, Tincture of Spearmint, Essence of Spearmint, is made in the same manner. *Ph. U. S.*

TINCTURA OPII, *T. Thebæica* seu *Sedati'va*, *Theriaca cœlestis*, *Al'cohol cum Opio*, Tincture of Opium, *Liquid Laudanum*. (*Opii* pulv. ʒijss, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gtt. xx to lx and more. By macerating the dregs remaining after making the Tinctura Opii in a solution of Tartaric Acid, a solution is obtained, which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liquor Opii Sedati'vus*.

TINCTURA OPII ACETA'TA, *Ac'etated Tincture of Opium*. (*Opii* ʒij; aceti, fʒxij; alcohol. Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express and filter. *Ph. U. S.*) Twenty drops are equivalent to a grain of opium.

TINCTURA OPII AMMONIATA, *Ammoniated Tincture of Opium*, *Edinburgh Paregor'ic Eliz'ir*. (*Flor. benz.*, croci, āā ʒij, opii ʒij, ol anisi ʒss, alcohol. ammoniat. fʒxvj.) Digest. *Ph. E.*) fʒj contains one grain of opium. Used like the Tinctura Camphoræ Composita.

TINCTURA OPII CAMPHORATA, Tinctura camphoræ composita—t. Plumbosa, *Liquor Plumbi subacetatis dilutus*.

TINCTURA QUAS'SIÆ, *T. Quassia excell'æ*,

Tincture of Quassia. (*Quassia rasur.* ʒij, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, fʒj to fʒij.

TINCTURA QUAS'SIÆ COMPOSITA, *Compound Tincture of Quassia* (*Cardam. sen.* contus., *Cocci* contus. āā ʒss; *Cinnam.*, *Quassia*, āā ʒvj; *Uvar passar.* ʒvij; *Sp. tenuior*. Oij (Imp. meas.). Digest for 7 days; express and filter. May be prepared also by percolation. *Ph. E.*) Dose, as a tonic, fʒj or fʒij.

TINCTURA QUINÆ COMPOSITA, *Compound Tincture of Quina*. (*Quinæ sulph.* ʒv and ʒj; *Tinct. aurantii*, Oij, (Imp. meas.) Oij. Digest for 7 days and filter. *Ph. L.*) fʒj, contains a grain of the sulphate.

TINCTURA QUINÆ SULPHATIS, Tincture of Sulphate of Quina. (*Sulphate of Quina*, gr. vj; alcohol, (847) fʒj. M.) Dose, fʒj to fʒiv, in the day.

Tinctura Cincho'niæ Sulphatis may be made in a similar manner.

TINCTURA RHABARBARI, Tinctura rhei—t. Rhabarbari composita, Tinctura rhei composita—t. Rhabarbari vinosa, Vinum rhei palmati.

TINCTURA RHEI, *T. Rhabarbari* seu *Rhabarbari spirituosæ* seu *Rhœi* seu *Rhei palmati*, Tincture of Rhubarb. (*Rhei* contus. ʒij, cardam. cont. ʒss, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Stomachic or purgative, according to the dose employed: fʒj to ʒij, as a stomachic; fʒiv to ʒj, as a purgative.

TINCTURA RHEI COMPOSITA, *T. Rhabarbari composita*, *Compound Tincture of Rhubarb*. (*Rhei rad. concis.* ʒij, glycyrrhiz. rad. cont. ʒss, zingib. rad. concis., croci stigmat. āā ʒij, aquæ fʒxij, *sp. ten.* Oj.) *Ph. L.*) Properties same as the last.

TINCTURA RHEI ET AL'OEIS, *Eliz'ir sacrum*, Tincture of Rhubarb and Aloes. (*Rhei* concis. ʒx, aloes pulv. ʒvj, cardam. cont. ʒss, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Properties like the last.

Rymer's Cardiac Tincture consists of an infusion of Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes and Castor in Proof Spirit, with a very small quantity of Sulphuric Acid.

TINCTURA RHEI ET GENTIANÆ, Tinctura Rhei Amara, Tincture of Rhubarb with Gentian. (*Rhei* cont. ʒij, gentian. cont. ʒss, alcohol. dilut. Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) It may also be prepared by displacement. Properties same as the last.

TINCTURA RHEI ET SENNÆ, Tincture of Rhubarb and Senna, *Warner's Gout Cordial*. (*Rhei* cont. ʒj, sennæ, ʒij, coriandr. cont., fœnicul. cont. āā ʒj, santal. rasur. ʒij, croci, ext. glycyrrhiz. rad. āā ʒss, uvar. passar. acinis exemptis, lbsss, alcohol. dilut. Oij. Macerate for 14 days; express and filter. *Ph. U. S.*) Dose, fʒss to fʒij.

TINCTURA RHÆI, Tinctura rhei—t. Rhœi amara, Tinctura rhei et gentianæ—t. Sacra, Vinum aloes.

TINCTURA SANGUINARIÆ, Tincture of Blood-root. (*Sanguinar.* cont. ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, 30 to 60 drops.

TINCTURA SAPONIS CAMPHORATA, *Linimentum saponis*—t. Saponis et opii, *Linimentum saponis et opii*.

TINCTURA SCILLÆ, Tincture of Squill. (*Scillæ* ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Dose, gtt. xv to lx.

TINCTURA SEDATIVA, Tinctura opii.

TINCTURA SENNÆ, *T. Sennæ Composita, Elixir Salutaris, Daffy's Elixir, Tincture of Senna.* (Sennæ fol. \mathfrak{z} ij, carni sem. cont. \mathfrak{z} ij, cardam. sem. cont. \mathfrak{z} j, uvarum passerum demptis acinis, \mathfrak{z} iv, sp. ten. Oij. Ph. L. & D.) Stomachic, carminative and cathartic. Dose, f \mathfrak{z} ij to f \mathfrak{z} j.

TINCTURA SENNÆ ET JALAPÆ, *Tincture of Senna and Jalap.* (Sennæ \mathfrak{z} ij, jalap. pulv. \mathfrak{z} j, coriandr. cont., carni cont., aa \mathfrak{z} ss, cardam. cont. \mathfrak{z} ij, nuc. \mathfrak{z} iv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, f \mathfrak{z} ij to f \mathfrak{z} j.

TINCTURA SERPENTARIE, *T. Serpentariæ seu Virginia'æ seu Aristolochi'æ Serpentariæ, Tincture of Snake-root.* (Rad. serpent. \mathfrak{z} ij, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Toxic. Dose, f \mathfrak{z} ss to f \mathfrak{z} ij.

TINCTURA STOMACHICA, *Tinctura cardamomi composita.*

TINCTURA STRAMONII, *Tincture of Stramonium.* (Stramon. sem. cont. \mathfrak{z} iv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Dose, ten to twenty minims.

TINCTURA STRYCHNIE, *Tincture of Strychnia.* (Alcohol. s. g. \mathfrak{z} 37, Oj, Strychniæ, gr. iij.) Dose, 6 drops to 24. Properties, those of strychnia.

TINCTURA (SEN ALCOHOL) SULPHURICO-ÆTHEREUS FERRI, *Guttæ nervinæ, Liqueur Anodynus Martialis, Al'cohol æthereus ferratus, Naphtha Vitrioli Martialis, Solutio Muriatis ferrici æthereæ, Spiritus sulphurico-æthereus martialis, Tinctura nervina Haleu'sis seu Tonico-nervi'na Haleu'sis seu au'rea seu nervina Bestucheffi seu nervino-tonica (Lamotte's) seu æthereæ ferri, Æther Martialis, De La Motte's Golden Drops, Bestucheff's Nervous Tincture.* (F.) *Elixir d'Or de M. le Général de La Motte.* An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

TINCTURA SULPHURIS VOLATILIS, *Liquor fumans Boylei* — t. Thebaica, *Tinctura opii, Vinum opii.*

TINCTURA TOLUIFERÆ BAL'SAMI, *T. Bal'sami Tolutani, T. Tolutani* (Ph. U. S., 1842.), *T. Tolutana* (Ph. U. S., 1851), *Tincture of Balsam of Tolu*, (*Bals. Tolutan.* \mathfrak{z} ij, alcohol Oij.) Reputed to be expectorant and corroborant. Dose, f \mathfrak{z} ss to f \mathfrak{z} j, or more.

TINCTURA TONICA NERVINA HALENSIS, *Tinctura* (sen Alcohol) sulphurico-æthereæ ferri.

TINCTURA VALERIANÆ, *Tincture of Valerian.* (Valerian. cont. \mathfrak{z} iv, alcohol. dilut. Oij. Macerate for 14 days, express, and strain. It may also be prepared by displacement. Ph. U. S.) Stimulant and antispasmodic. Dose, f \mathfrak{z} ss to f \mathfrak{z} ij.

TINCTURA VALERIANÆ AMMONIATA, *T. Valerianæ Volatilis, Ammoniated or Volatile Tincture of Valerian.* (Valerianæ cont. \mathfrak{z} iv, sp. ammon. arom. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Like the former. Dose, f \mathfrak{z} ss to f \mathfrak{z} ij.

TINCTURA VERATRIS, *T. Veratri albi, Tincture of White Hellebore.* (Rad. veratri alb. cont. \mathfrak{z} vij, alcohol. dilut. Oijss. Ph. E.) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

TINCTURA ZINGIBERIS, *T. Amomi Zingiberis, Tincture of Ginger.* (Zingib. cont. \mathfrak{z} vij, alcohol. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Stimulant and carminative. Dose, f \mathfrak{z} ss to f \mathfrak{z} j.

TINGLING, from *tinnire*, 'to jingle.' (Sc.) *Dirling*. A sharp, purring or thrilling sensation, not always painful.

TINKER'S WEED, *Triosteum*.

TINKLING, METALLIC, *Tintement métallique*.

TINNIMENTUM METALLICUM, *Tintement métallique*.

TINNITUS AURIUM, (*tinnio*, *tinnitum*, 'to tinkle,') 'ringing of the ears.' *Fluctuatio seu Sonitus seu Susur'rus seu Sid'ulus seu Strep'itus seu Sibilismus aurium*, *Parac'usis imaginaria*, *Ote'chus*, *Syrig'mus*, *Syring'mos*, *Sibilus clang'osus*, *Echos*, *Eveche'ma*, *Bombus*, *Bombitatio*, *Murmur*, (F.) *Tintement*, *T. d'Oreille*, *Tintouin*, *Bourdonnement*, *Bruissement*. An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, *Tinnitus aurium*—t. *Bullaire*, *T. métallique*.

TINTEMENT MÉTALLIQUE (F.), *Cliquetis métallique*, *Tintement bullaire*, *Tinnimentum metallicum*, *Canor stethoscop'icus*, *Metallic Respiration*, *Metallic Voice*, *Metallic Tinkling*. A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metallic resonanc.* The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax*.

TINTEMENT D'OREILLE, *Tinnitus aurium*.

TINTINNABULUM, *Uvula*.

TINTOUIN, *Tinnitus aurium*.

TIPFOOT, see *Kylois*.

TIPSARIA, *Decoctum hordei*.

TIRE-BALLE, *Forceps* (bullet.)

TIRE-FOND (F.). A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

TIRE-PUS, *Pyuleon*.

TIRE-TÊTE (F.). A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crochet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TIRES, Milk sickness.

TISANE, *Pti'sana* or *Ptis'sana*, *Ptisane*, from *πτισανη*, 'pearl barley,' itself from *πτισσω*, 'I de-corticate.' (F.) *Hydrole*. A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, *Decoctum hordei*.

TISANE DE FELTZ. A celebrated anti-syphilitic, formed of *sarsaparilla*, *isinglass*, *sulphuret of antimony* and *water*, boiled together. According to some, bichloride of mercury; and, to others, arsenic enters into its composition. M. Rayer, supposing that it acts by the arsenic it contains, proposes to replace it by arseniate of potassa; and Guibourt, who is of the same opinion, by arsenious acid, in order to ensure certainty of action.

TISIC, *Phthisis*.

TISICAL, *Phthisicus*.

TISSICK, see *Phthisic*.

TISSU, *Tissue*—t. *Accidental*, see *Accidental*, and *Tissue*, *accidental*—t. *Caverneux*, *Cavernous texture*—t. *Celluleux des os*, *Cancelli*—t. *Conjonctif*, *Cellular tissue*—t. *Inodulaire*, *Tissue*, *inodular*—t. *Jaune*, see *Fibrous*—t. *Lardacé*, see *Lardaceous*—t. *Spongoïde*, *Spongoid tissue*.

TISSUE, *Textus*, *Tela*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see *Fibre*. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objection. The following, by Messrs. Todd and Bowman, is one of the most recent.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.

Examples.

- | | |
|---|--|
| 1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes. | } Posterior layer of the cornea.—Capsule of the lens.—Sarcoclemma of muscle. &c. |
| 2. Filamentous Tissues, the elements of which are real or apparent filaments. | |
| 3. Compound membranes, composed of simple membrane and a layer of cells of various forms, (epithelium or epidermis.) or of areolar tissue and epithelium. | } Mucous membrane—Skin.—True or secreting glands.—Serous and synovial membranes. |
| 4. Tissues which retain the primitive areolar structure as their permanent character. | |
| 5. Sclerous or hard tissue. | } 6. Compound tissues. |
| 6. Compound tissues. | |
| a. Composed of tubes of homogeneous membrane, containing a peculiar substance. | } Muscle.—Nerve. |
| b. Composed of white fibrous tissues and cartilage. | |

TISSUE, ACCIDENTAL OR ADVENTITIOUS, consists of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those

that resemble others in the animal economy, or *analogous accidental tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterologous* or *heteroclite accidental tissues*. To the first class belong, ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

TISSUE, AREOLAR, Cellular tissue.

TISSUE, CARTILAG'INOUS, *Hymenochondro'des* seu *Hymenochondroï'des* (*Textura seu Tela*.)

TISSUE, CONNECTIVE, Cellular tissue—t. Cribiform, Cellular tissue—t. Fibrous, see Fibrous—t. Filamentous, Cellular tissue.

TISSUE FORMATION, Histogeny.

TISSUE, INOD'ULAR, *Tela inodularis*, (F.) *Inodule*, *Tissu inodulaire*. A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulo-fibrous layer; but soon loses its vascularity; and its fibres, which pass in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

TISSUE, LAMINATED, Cellular tissue—t. Ligamentous, Desmoid tissue—t. Mucous, Cellular tissue—t. Porous, Cellular tissue—t. Reticulated, Cellular tissue.

TIT, Nipple.

TITHENE, Nurse.

TITHYMALUS CYPARISSIAS, Euphorbia cyparissias—t. Lathyris, Euphorbia lathyris—t. Latifolius, Euphorbia lathyris—t. Palustris, Euphorbia palustris—t. Paralias, Euphorbia paralias.

TITILLAMENTUM, Gargarism.

TITILLATION, Tickling.

TITTHE, Nipple.

TITTHION, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.

TITTY, Mamma, Nipple.

TITUBANTIA, *Bredouillement*.

TITUBATIO, Fidgets, Vacillatio—t. Lingua, Balbuties.

TJETTEK, Upas tiéuté.

TO-AND-FRO-SOUND, *Bruit de frottement*.

TOAD-FLAX, *Antirrhinum linaria*—t. f. Bastard, Comandra umbellata.

TOAST-WATER, *Aqua tostæ panis*. Toast well half a slice of a stale quartern loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread. It is a common drink in febrile affections.

TOBACCO, *Nicotiana tabacum*—t. English, *Nicotiana rustica*—t. Indian, *Lobelia inflata*—t. Poison, *Hyoscyamus niger*—t. Wild, *Lobelia inflata*, *Nicotiana rustica*.

TOCETOS, Parturition.

TOCODOMYCODORITIS MALIGNA VAGINALIS, Colpocæce puerperarum.

TOCOLOGY, Obstetrics.

TOCOS, Parturition.

TODDY. A name given, by the English, to sweet, delicious and refreshing liquors procured in India by wounding the *spathæ* of certain palms. The best is obtained from the *Cocos nucifera*.—Ainslie.

It is obtained in large quantities from *Saguërus saccharifer* seu *Rumphii*, *Palma Indica vinaria secunda*, *Saguërus* seu *Gomutus Gomuto*,

Aren'ga saccharifera, *Gomuto palm*. It is called, also, *Neva*, and, by boiling, yields a coarse kind of sugar, called *Jaggery*. The inhabitants of the Moluccas used, in their wars, a liquor obtained by macerating the fruit, which the Dutch called *Hell water*, *Aqua infernalis*.

Toddy is also the common name for a mixture of spirit and water sweetened.

TODDY TREE, Mamei.

TOE, *Digitus pedis*.

TOEPLITZ, see Töplitz.

TOFUS, Tophus.

TOILE D'ARAIGNÉE, *Aranæa tela*—t. *Choroïdienne*, see Choroid—t. *de Gautier*, *Sparadrapum Galteri*.

TOKAS, Puerpera.

TOKEN, PLAGUE, Plague token.

TOKOLOGY, Obstetrics.

TOLA, Tonsil.

TOL'ERANCE, *Tolerantia*; from *tolerare*, 'to bear.' The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See *Contra-stimulus*.

TOLES, Tonsil.

TOLIUM, Tonsil.

TOLLES, Tonsil.

TOLLUM, Tonsil.

TOLUIF'ERA BAL'SAMUM, *Myroxylon* seu *Myrospermum Toluiferum*. *Ord.* Leguminosæ. *Séz. Syst.* Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu*, *Balsamum Tolutanum* (Ph. U. S.), *Tolutanum*, *Toluifera Balsami Balsamum*, *Goac'onaz*, *Red Balsam of Peru*, (F.) *Bavme de Tolu*, *B. de Carthagène* ou *d'Amérique* ou *de Saint Thomas*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant [?], and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see Toluifera balsamum.

TOMACINUM, Iscium.

TOMACULUM, Iscium.

TOMATA, *Solanum lycopersicum*.

TOMATO, *Solanum lycopersicum*.

TOME, *Tomus*, *τομή*, *τομος*, 'incision.' A common suffix, as in *Lithotomy*, *Bronchotomy*, &c.

TOME, Cut, Incision.

TOMETON, Knife.

TOMENTUM CER'EBRI, from *tomentum*, 'a flock of wool.' The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TOM-TOE, Pollex, see *Digitus pedis*.

TONE, *Τόνος*, *τονος*, from *τενωω*, 'I brace or give vigour.' The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, see Elasticity.

TONGA, see *Datura sanguinea*.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. *tung*, (D.) *Tong*, *Lingua*, *Glossa*, *Glotta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and exspuition. It has the

shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na*; at the posterior extremity of which is the *foramen cæcum* or *Foramen of Morgagni*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the *genio-glossus*; and to the *hyoides* by the *hyoglossus*. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip*, or *point*, or *dental extremity* is rounded and free:—the *root*, *base*, or *hyoid extremity*, *Radix linguæ*, is continuous with the epiglottis and velum palati. It is very thick at the *foramen cæcum*; but thinner as it approaches the *hyoid bone*. The tongue is composed of muscles, and covered by a mucous membrane—*Periglottis*, *Involucrum linguæ*, *Membra'na seu Tu'nica vaginal'is seu Cutis seu Epider'mis seu Tu'nica seu Involucrum mucosum seu Crusta villosa linguæ*—which forms also the *frænum* beneath the tongue. On this membrane are seen the different *papillæ*. The nerves of the organ proceed from the *inferior maxillary, glosso-pharyngeal* and *hypoglossal*. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the *glosso-pharyngeal* to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis linguæ, ranina, lingualis*, and *submental'is*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the *hyoglossi* muscles.

TONGUE, BLACK. A fever which prevailed in the Western States in the winter of 1842-3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocele—t. Inflammation of the *Glossitis*—t. Red, fever, see *Typhus*.

TONGUE SCRAPER, Cure-langue—t. Tie, see *Ankyloglossum*.

TÓN'IC, Ton'icus, (F.) *Tonique*. Same etymon as *Tone*. Relating to *tone*.

Tonic, Ton'icus, Tono'nicus, Antasthen'icus, (F.) *Tonique, Fortifiant*, in Therapeutics, means a medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortan'tia, Confortati'va, Corroboran'tia, Confirman'tia, Roboran'tia*, &c.

The following are the chief Tonics:—*Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argentum Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarella, Cinchona, Cinchonina, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perforatum, Ferri Præparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quæssia, Quinia, Salix, Salicina, Serpenteria, Zinci præparata; Aquæ minerales acidulæ et ferruginæ, Mental Tonics*, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.

TONIC SPASM, Spasmus ton'icus, Convulsio tonica, Conductio, Spas'ticus, Tonos, Euto'nia, Ent'tasis, Ent'a'sia. A rigid contraction of muscles without relaxation, as in *trismus, tetanus, &c.* See *Tetanus* and *Spasm*.

TONIC'ITY, Tonic'itas. Same etymon as

Tone. The faculty that determines the general tone of the solids. Excessive tonicity causes *er'ethism* or *crispness*; deficient tonicity, *atony* or *weakness*. *Tonicity* has been used in the same sense as *irritability*.

TONIQUE, Tonic.

TONKA BEAN, Dipterix odorata.

TONODES, Tensive.

TONOS, Tonic spasm—t. *Trismus, Trismus.*

TONOTICUS, Tonic.

TONSIL, Tonsill'a, Amygdala, Paristh'mia, Paristh'mium, Amphibranchium, Glan'dula colli, Tola, Tolles, Toles, To'lum, Tollum, Spongos, An'tias, Pl. Anti'aides, Almond of the ear, Almond of the throat, (F.) *Amygdale, Tonsille*, (Prov.) *Ear-kecker*. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSIL-GUILLOTINE, Amygdalotome.

TONSILLE PESTILENTES, Cynanche maligna.

TONSILLARUM GANGRÆNA, Cynanche maligna.

TONSILLE, Tonsil.

TONSILLIT'IC, Tonsillit'icus. Belonging or relating to the tonsils; as the '*tonsillitic* branches of the glosso-pharyngeal nerve.'

TONSILLITIS, Cynanche tonsillar'is.

TONSILLOTOME, Amygdalotome.

TONSORIUS CULTER, Razor.

TOODLE, Tooth.

TOOTH, Sax. tōð, Dens, Odous, (Prov.) *Toodle*, (F.) *Dent*. The teeth, *Dentes, Mord'ices*, are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitreiform substance. This part is called the *corona* or *coro'na*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 *incisors*, 2 *canine*, 4 *bicuspidati*, and 6 *molares*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cav'itas Pulpæ, Carum Dentis, Antrum dent'alē*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el*. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See *Dentition*. Researches by Retzius, Müller and others, have led them to believe that the *ivory* of the tooth or *Dentine, Ebur, Substan'tia os'sea* of Malpighi, *proper tooth substance, bone of the tooth, osseous substance of tooth, tooth bone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called, by Professor Owen, *calcif'erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petro'sa, cemen'tum* or *cortical substance*, commences in an extremely

thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the cavitas pulpæ. They gave it the name *Substantia ostioides*. It is the *matéria tartaræ* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horny substance* of Blumenbach, the *osteodentine* of Owen, and the *secondary dentine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTH-ACH, Odontalgia—t. Bone, see Tooth—t. Bush, *Xanthoxylum fraxinum*—t. Tree, *Aralia spinosa*, *Xanthoxylum clava Herculis*.

TOOTH EDGE, *Agacement des dents*, Hæmodya—t. Paste, Dentifricium—t. Powder, Dentifrice—t. Rash, Strophulus—t. Shell, dog-like, Dentalium.

TOPHACEOUS, *Tophaceus*, (F.) *Tophacé*; from *tophus*. Relating or belonging to tophus,—as 'a *tophaceous* concretion.'

TOPHACEOUS CONCRETION, Tophus. TORPIUS, *τοπος*, *Tofus*, 'a porous or friable stone.' *Osteo'ophus*, *Tophaceus Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see *Calculi*, arthritic,) and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel, and chazala.

TOP'IC, *Top'ical*, *Top'icus*. From *τοπος*, *locus*, 'a place.' A local application; (F.) *Topique*. See Local.

TOPICUS, Local.

TOPINARIA, Talpa.

TOPIQUE, Topic.

TOPLITZ or TEPLITZ, MINERAL WATERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium; carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

TOPOGRAPHICAL ANATOMY, see Anatomy.

TOQUE, *Scutellaria galericulata*.

TOR'ULAR, *Tourniquet*. A press for wine, oil, or cider. From *torqueo*, 'I twist.'

TOR'ULAR HEROPH'ILI, *Press of Heroph'ilus*, *Lechene'on*, *Lenos*, *Lemna*, *Fourth Sinus*, (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situated before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it;—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, Tourniquet.

TORDYL'IUM, *T. Officinale*, *Sen'eli Cret'icum* seu *Montanum*, (F.) *Sénéli de Crète*. Family, Umbelliferae. Sex. Syst. Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TOR'ENIA ASIAT'ICA, *Cala-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, *Geranium maculatum*, *Tormentilla*.

TORMENTIL'LA, *T. erecta* seu *sylvestris* seu *officinalis* seu *tuberosa*, *Fragaria tormentil'la officinalis*, *Potentilla tormentilla*, *Heptaphyllum*, *Consolida rubra*, *Common Tormentil*, *Upright Septfoil*, (F.) *Tormentille*. Ord. Rosaceæ. Sex. Syst. Icosandria Polygynia. The root *Tormentilla* (Ph. U. S.) has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ʒj.

TORMENTUM, Ileus, Intussusceptio.

TOR'MINA, *Strophos*, *Calial'gia*, *Eucaliol'gia*, *Anile'ma*, *Anile'sis*, *Gripes*, *Mulligrubs*, *Fretting*, (F.) *Tranchées*. From *torqueo*, 'I twist.' Acute colicky pains. Dysentery.

TORMINA CELSI, Dysentery—t. Parturition, Pains, labour—t. Post partum, see Pains, labour.

TORNACULUM, Tourniquet.

TOROSITAS, *Corpulentia carnosæ*, *Hab'itus athlet'icus*. Muscular strength; from *torosus*, 'brawny,'—*torus*, 'brawn.'

TOROSUS, Muscular.

TORPEDO, Narcosis.

TORPEFACTIO UNIVERSALIS, Holonarcosis.

TORPID, *Tor'pidus*, (F.) *Engourdi*; from *torpeo*, 'I am benumbed.' Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, Torpor.

TORPIDUS, Narcotized, Torpid.

TORPOR, *Torpid'itas*, *Noth'otes*, *Parap'isis exers*, (F.) *Engourdissement*, from *torpeo*, 'I am benumbed.' State of a part which becomes numb, and almost incapable of motion. *Torpor*, *Torpid'ity*, *Torpid'ness*, *Tor'pitude* are also applied to a debilitated, sluggish condition of a part, or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

TORPOR, Narcosis—t. of the Colon, see Colon, torpor of the—t. Intestinorum, Constipation—t. Soporificus, Nocar.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Tor'sio*. From *torquere*, *tortum*, 'to twist.' The act of twisting. Torsion of the extremities of bleeding vessels—*Angios'trophè*—until the blood ceases to flow, is sometimes used to arrest hemorrhage.

TORSK, see *Oleum jecoris aselli*.

TORTELE, Erysimum.

TORTICOLLIS, *Caput seu Collum obstipum*, *Obst'ipa cervix*, *Obstip'itas capitis seu Colli*, *Trachel'agra*, *Entu'sia Loxia*, *Lox'ius*, *Cephalox'ia*, *Ancylode're*, *Ancylode'ris*, *Rhæbucen'nia*, *Auchenorrh'en'na*, *Rheumatismus colli seu cervic'is*, *Stiffneck*, *Wryneck*, (Prov.) *Slab*; from *torquere*, *tortum*, 'to twist,' and *collum*, 'the neck.' A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, *Hydraspis expansa*.

TORTUE, Testudo.

TORTURA ORIS, Canine laugh, Neuralgia faciei—t. Oris paralytica Linnæi, Paralysis, Bell's.

TOR'ULA CEREVISIÆ, *Saccharomyces* seu

Mycoderma cerevisia, *Cryptococcus fermentum* seu *cerevisia*, (F.) *Champignon du ferment*, *Yeast plant*. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in faeces.

TORULUS GLANDIS, Crown of the glans.

TORUS, Muscle — t. Manús, Metacarpus.

TOTA BONA, *Chenopodium bonus Henricus*.

TOTSU KASO, *Sphaeria Sinensis*.

TOTTY, Vertiginous.

TOTUM CARNOSUM, Pancreas.

TOUCH, *Tactus*, *Tactio*, *Haphē*, *Hapsis*, *Tactio*, *Palpation*, (F.) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active. See *Esaphe*, and *Palpation*.

'To touch the mouth with mercury' is to produce the constitutional effects of that agent, as evinced by the falling away of the gums, &c.

TOUCH-ME-NOT, *Impatiens fulva*.

TOUCH, ROYAL. It was at one time almost universally believed, in England, that the royal touch would remove *Scrofula* or *King's Evil* (as it was thence called). This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil.

TOUCHER, *Esaphe*, *Touch* — t. *Vaginal*, *Esaphe*.

TOUCHWOOD, *Boletus igniarius*.

TOUR DE MAÎTRE, *Coup de Maître*.

TOURBILLON VASCULAIRE, *Vasa vasorum*.

TOURNESOL, *Heliotropium Europæum*.

TOURNOLE, *Paronychia*.

TOURNIQUET, *Torcular*, *Torciculum*, *Tornaculum*, *Prælium*, *Prælium*, *Prælium* seu *Prælium arteriale*, *Verticillum*, *Fascia tortilis*, from (F.) *tourner*, 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS, *Amylum cannaecum*, *Canna Starch*. A fecula obtained from the root of *Canna edulis*. It resembles potato starch, and may be substituted for arrow-root. It is obtained from St. Kitts.

TOUT, *Nates*.

TOUTE BONNE, *Salvia sclarea*.

TOUTE ÉPICE, see *Myrtus pimenta* — t. *Saine*, *Sanicula*.

TOUX, *Tussis* — t. *Bleue*, *Pertussis* — t. *Bronchique*, *Bronchial cough*, *Cough*, *tubal* — t. *Cavernense*, see *Cavernous respiration* — t. *Convulsive*, *Pertussis* — t. *Quinteuse*, *Pertussis* — t. *Tubaire*, *Bronchial cough*, *Cough*, *tubal*.

TOXICÆMIA, *Toxicohæmia*.

TOXICAL, *Poisonous*.

TOXICATIO, *Poisoning*.

TOXICODENDRON, *Rhus toxicodendron*.

TOXICOHÆMIA, *Toxicohæmia*, from *toxicum*, 'a poison,' and *αἷμα*, 'blood.' *Poisoning of the blood*. — *Piorry*.

TOXICOL'OGY, *Toxicolog'ia*, from *toxicum*, (itself from *τοξον*, 'a bow,') 'a poison,' and *λογος*, 'a description.' A treatise on poisons.

TOXICO'SES, (G.) *Toxikosen*, from *toxi-*

cum, 'a poison.' A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, *Poison*, *Venom*.

TOXI'QUE, *Poisonous*.

TRABECULA CEREBRI, *Corpus callosum* — t. *Cordis*, *Columnæ carneæ*.

TRABECULÆ CORPORUM CAVERNOSORUM, see *Cavernous bodies*.

TRABECULÆ SPLENIS, see *Spleen* — t. *Willisii*, *Chordæ Willisii*.

TRABES CORDIS, *Columnæ carneæ*.

TRABS, *Penis* — t. *Cerebri*, *Corpus callosum* — t. *Medullaris*, *Corpus callosum*.

TRACE, *PRIMITIVE*, *Groove*, *primitive*.

TRACHE'A, (generally, however, accented *Trache'a*), *Trache'a* seu *Trache'i'a arter'ia*, *Bronchus*, *As'pera arteria*, *Fist'ula spiritalis* seu *pulmonalis*, *Canna*, *Syrin'ga*, *Syrinx*; the *Wind-pipe*, *Wosen*, *Weasel*, *Throttle*, (Sc.) *Thropill*, (Prov.) *Keckcorn*, *Kecker*, *Thropple*, (F.) *Trachée artère*; from *τραχυς*, 'rough,' and *αρτηρια*, 'artery,' composed of *αἰρ*, 'air,' and *τηρειν*, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia*, which separate to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *An'nuli cartilaginei*, *Segmenta cartilaginea*, *Orbes cartilaginei*, incomplete behind; situate one above the other, and kept in situ by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroidal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

The breathing tubes of insects are termed *Trachææ*.

TRACHEA ARTERIA, *Trachea*.

TRACHEÆ, see *Trachea*.

TRA'CHEAL, *Trachealis*. Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEAL GLANDS. Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

TRACHEALIS. The fibres of unstriated muscle, which pass from one portion of each of the tracheal cartilages to the other, at the posterior part of the trachea, have been so called by some anatomists. When they contract, they approximate the extremities of the cartilage; diminish the calibre of the trachea; and thus increase the velocity of the air forced through it, as in coughing, and facilitate the removal of any irritating substance in contact with the lining membrane.

TRACHÉE ARTÈRE, *Trachea*.

TRACHEITIS, *Cynanche trachealis*.

TRACHELAGRA, *Torticollis*. Also, *gout in the neck*.

TRACHELIAN, *Cervical*.

TRACHELISM'US, from *τραχηλον*, 'the neck.' A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

TRACHELITIS, Cynanche trachealis.

TRACHELIUM AMERICANUM, *Lobelia cardinalis*.

TRACHÉLO-ATLOÏDO-OCCIPITAL, *Obliquus superior capitis*—*t. Atloïdo-basilare*, *Rectus capitis lateralis*—*t. Basilare*, *Rectus capitis internus major*—*t. Basilare, petit*, *Rectus capitis internus minor*.

TRACHELO-DIAPHRAGMATIC, *Trachelodiaphragmaticus*. The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises.—Chaussier.

TRACHÉLO-MASTOÏDIEN, *Complexus minor*—*t. Occipital*, *Complexus*—*t. Scapulaire*, *Levator scapulae*.

TRACHELOS, Collum.

TRACHEO-BRONCHITIS. Inflammation of the trachea and bronchia.

TRACHEOCELE, Bronchocele.

TRACHEOPHONY, Laryngophony.

TRACHEOPHTHISIS, see *Pthitsis laryngea*.

TRACHEOPHYMA, Bronchocele.

TRACHEORRHAG'IA, *Hæmoptoë* seu *Hæmoptysis laryngea et trachealis*, from *τραχεια*, 'the trachea,' and *ρρῦναι*, 'to break forth.' *Hæmorrhage* from the trachea.

TRACHEOSTENOSIS, from *τραχεια*, 'the trachea,' and *στενωσις*, 'contraction.' *Contraction or narrowness of the trachea*.

TRACHEOTOME, from *trachea*, and *τομή*, 'incision.' An instrument of the trocar kind, for opening the trachea.

TRACHEOTOMY, see *Bronchotomy*.

TRACHITIS, Cynanche trachealis.

TRACHO'MA, from *τραχος*, 'rough.' *Aspre'do*, *Aspritu'do*, *Pladar'otes*, *Asperitu'do*, *Scabrit'ies*, *Gran'ular conjuncti'va*, *Gran'ular eyelid*, (F.) *Aspérite des Paupières*. A roughness of the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated:—*T. sabulo'sum*, from sand, &c., getting between the eyelids; *T. carunculo'sum*, *Pladar'otes*, *Pladar'osis*, *Morum pal'pebræ internæ*, from fleshy excrescences; and *T. herpeticum*, from hard pustules on the inner surface of the eyelids. This last is, also, called *Fico'sis*, and *Pal'pebra fico'sa*.

TRACT, OPTIC, see *Optic nerves*—*t. Respiratory*, see *Respiratory tract*.

TRACTATIO MANUARIA, *Surgery*.

TRACTORATION, *Perkinism*, see *Tractors*, *metallic*.

TRACTORS, METAL'IC. *Metallic agents*, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractor'ation*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See *Perkinism*.

TRACTUS INTESTINORUM, *Intestinal Tube*—*t. Opticus*, see *Optic nerves*—*t. Respiratorius*, *Respiratory tract*.

TRACTUS SPIRA' LIS FORAMINULENTUS. *Minute openings at the base of the modiolus*, arranged in a spiral manner, which transmits the filaments of the cochlear nerve. The central canal of the *Tractus* is longer than the rest, and is called *Tu'bulus centra'lis modi'oli*.

TRADESCANTIA VIRGINICA, *Spiderwort*; indigenous; *Order*, *Commelynacæ*; flowering from May to August. The roots are demulcent.

TRAGACAN'THA, from *τραγος*, 'a goat,' and *ακανθα*, 'a thorn,' owing to its hirsute boughs.

Gummi Tragacanthæ seu Astragalii Tragacanthæ, Gum Tragacanth, Gum Dragon. The concrete juice of the *Astragalus Tragacantha* or *Astragalus Verus*, a native of Persia. *Ord.* *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. (F.) *Gomme Adragant, Adragant, Adragante, Adraganth*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, uniform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, *Pulvis cinnamomi compositus*.

TRAG'ICUS, *Tragien* (Ch.), from *Tragus*. A small, flat, triangular muscle which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, *Tragieus*.

TRAGOMASCH'ALIA, *Tragomas'chalé*, from *τραγος*, 'a goat,' and *μαχαλή*, 'axilla.' The strong unpleasant odour of the armpits.

TRAGOPHONIA, *Egophony*.

TRAGOPO'GON, *Barba hirci*; from *τραγος*, 'a goat,' and *πωγων*, 'beard.' A genus of plants; *Ord.* *Cichoracæ*. *Sex. Syst.* *Syngenesia Polygamia Æqualis*. (F.) *Barbe de Bouc*; of which the roots of the *Tragopogon porrifolium*, *Salsifî*, *Oyster plant*, *Oyster-root*, (F.) *Salsifis ou Cerfifs*, and the young shoots of the *T. pratens'is*, *Meadow Salsifî*, *Common Goat's Beard*, (F.) *Salsifis des près*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, *Pimpinella saxifraga*—*t. Angelica*, *Ligusticum podagraria*—*t. Magnum*, *Pimpinella magna*—*t. Majus*, *Pimpinella magna*—*t. Saxifraga*, *Pimpinella magna*.

TRAGUS; *τραγος*, 'a goat,' from its being furnished, in some persons, with hair, like the beard of a goat. *Hircus*, *Hirquus*. A small, flattened, triangular nipple, situated before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goat-like smell of the axillæ.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINASSE, *Polygonum aviculare*.

TRAITEMENT, *Curatio*—*t. Palliatif*, see *Palliation*.

TRAMIS, *Perinæum*.

TRANÇE, *Catalepsy*, *Ecstasis*.

TRANCHÉES, *Tormina*—*t. Uterines*, *Pains*, *after*.

TRANS, in composition, 'through, over, or beyond.'

TRANSFIGURATIO, *Transformation*.

TRANSFORMATIO, *Transformatio*, *Transfiguratio*, *Transmutatio*, *Metabolé*, from *trans*, and *forma*, 'form.' *Change of form*.

TRANSFORMATIONS DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See *Tissue*.

TRANSFUSION, *Transfusio*, *Metach'ysis*, from *transfundere* (*trans*, and *fundere*, *fundum*, 'to pour') 'to pour from one vessel into another.'

TRANSFUSION OF BLOOD, *Transfusio Sanguinis*, *Cura Medea'na*, *Methamachym'ia*, *Hæmatometach'ysis*, *Hæmometach'ysis*, *Diach'ysis*, *Transplantatio medica nova*, *Chirus'gia transfusoria*, *Exotichæmato'sis*. The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely

on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSMISSIBILITY, see Sensibility.

TRANSMUTATIO, Transformation.

TRANSPIRATIO, Perspiration—t. Unilatera, Hemidiaphoresis.

TRANSPIRATOIRE, Perspiratory.

TRANSPLANTA'TIO, (*trans*, and *planta*), *Metaphytei'a*. A pretended method of curing diseases, devised by Paracelsus — by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTIO, Morioplastice — t. *Medicina nova*, Transfusion.

TRANSPLANTA'TIO DENTIS, *Insit'io dentis*. The act of transplanting a tooth from one person to another.

TRANSPORT, Delirium.

TRANSPOSITIO, Metathesis.

TRANSPOSIT'ION, *Transposit'io*, from *trans*, 'over,' and *ponere, positum*, 'to put.' *Metathesis*. Change of situation.

TRANSPOSITION OF THE VIS'CERA, *Polype'ria promiscua translativa*, *Intus invertis*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDATION, *Transuda'tio*, (F.) *Transudation*, from *trans*, 'through,' and *sudare, sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exosmose.

TRANSVERSAIRE ÉPINEUX, *Transversalis dorsi*—t. *Épineux du cou*, *Semispinalis colli* — t. *Grêle*, see *Sacro-lumbalis* — t. *Épineux du dos*, *Semi-spinatus dorsi*.

TRANSVERSAL DE LA CONQUE, *Transversalis auris* — t. *du Nez*, *Compressor nasi* — t. *des Orteils*, *Transversus pedis*.

TRANSVERSALIS, Transverse.

TRANSVERSA' LIS ABDOM'INIS, (F.) *Lombo-abdominal* (Ch.), *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib: and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTICUS PRIMUS, *Rectus capitis lateralis* — t. *Collateralis colli*, see *Sacro-lumbalis*.

TRANSVERSA' LIS COLLI, *Transversalis Major colli*. *Portion of the Sacro-spinal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebræ of the neck; and to those of the four or five first dorsal. It extends the vertebræ of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, *Semi-spinalis colli*.

TRANSVERSALIS DORSI, *Transverso-spinalis*, *Multifidus Spinæ*, *Lumbo-cervical portion of the*

Spinal (Ch.), (*Transverso-spinalis Lumbo'rum*, *Transverso-spinalis Dorsi*, *Transverso-spinalis Colli*), *Musculus sacer*, *Spinales et transversales lumborum*, *Semi-spinalis internus* sive *Transverso-spinalis colli pars interna* (Winslow), *Lombodorsi-spinal*, &c., (F.) *Transversaire épineux*. This muscle, usually called, by English anatomists, *Multifidus spinæ*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, *Compressor naris*.

TRANSVERSARIUS, *Transverse*.

TRANSVERSE, *Transver'sus*, *Transvers'al'is*, *Transvers'a'rius*, from *trans*, 'over,' and *verte're*, *versum*, 'to turn.' That which runs across: also, that which relates to the transverse processes of the vertebræ.

TRANSVERSE ARTERY OF THE FACE, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE FISSURE, see *Liver*—t. *Fossa*, see *Liver*—t. *Ligament of the Atlas*, *Annular ligament*.

TRANSVERSE PERINEAL ARTERY, *Urethro-bulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transverse perineal muscles, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

TRANSVERSE PROC'ESSES OF THE VER'TEBRÆ, *Diapophyses* of Owen, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebræ.

TRANSVERSE SUTURE, *Sut'ura transvers'al'is*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE DE L'ABDOMEN, *Transversalis abdominis*—t. *de l'Oricule*, *Transversus auris*—t. *du Périnée*, *Transversus perinæi*.

TRANSVERSO-SPINAL, *Semi-spinalis colli*, *Semi-spinalis dorsi*—t. *Spinalis*, *Transversalis dorsi*—t. *Spinalis colli*, *Semi-spinalis colli*—t. *Spinalis dorsi*, *Semi-spinalis dorsi*.

TRANSVER'SUS AURIS, *Transver'sus Auriculæ*, (F.) *Transverse de l'Oricule* (Ch.), *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PEDIS, *Scandula'rius*, (F.) *Transversal des Orteils*, *Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

TRANSVERSUS PERINÆI, *Levator Ani parvus*, (F.) *Ischio-périneal* (Ch.), *Transverse du Périnée*, is placed at the posterior part of the perineum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a

fasciculus of this muscle, Santorini has given the name *Ure'thræ Elec'tor* seu *Ejacula'tor*.

TRANSVERSUS PERNÆI ALTER, *Prontat'icus inferior*. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) *Macre flottante*, *Noix* ou *Châtaigne d'Eau*. Ord. Onagraceæ. Ser. Syst. Tetrandria Monogynia. The plant which affords the *Noces Aquaticæ*, *Trib'uli aquatici*, *Coltraps*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPEZA, Mensa.

TRAPÈZE, Trapezium, Trapezium.

TRAPEZIUM OS, *τραπέζιον*, 'a trapezium.' So called from its shape. *Os multan'gulum majus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPEZIUS, *Κυκλιάρης*, (F.) *Dorso-acromion* (Ch.), *Trapèze*, *Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebra; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAPÉZOID LIGAMENT. *Ligamentum trapezoides*. The anterior part of the coraco-clavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

TRAPEZOÏDES OS, *Os multan'gulum minus* seu *pyramidalis carpi*, from *τραπέζιον*, 'a trapezium,' and *είδος*, 'shape or resemblance.' The second bone of the second row of the carpus,—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRAUBENKUR, Grape cure.

TRAILISMUS, see Balbuties and Blæsitæ.

TRAIOTES, see Blæsitæ.

TRAUMA, Wound.

TRAUMAT'IC, *Tranmat'icus*, *Vulnerarius*, *Vulnerary*, (F.) *Tranmatique*, from *τραυμα*, *τραυματός*, 'a wound.' Anything relating to a wound.

TRAUMATICA, Detergents, Vulneraries.

TRAUMATICINE; same etymon as Traumatic. A name given by Eulenberg to a solution of gutta percha in chloroform, which is applied externally in various chronic cutaneous diseases.

TRAUMATICUS, Traumatic, Vulnerary.

TRAUMATISM, *Tranmatismus*. The condition of the organism occasioned by a grave wound.

TRAUMATO-COMI'UM, from *τραυμα*, *τραυματός*, 'a wound,' and *κομῶ*, 'I take care of.' An hospital for the reception of the wounded.

TRAUMATOP'YRA, *Febris tranmat'ica*; from *τραυμα*, *τραυματός*, 'a wound,' and *πυρ*, 'fire.' A wound fever, or fever consecutive to a wound.

TRAVAIL, Parturition.

TRAVAIL D'ENFANT, Parturition.

TRAVELLER'S JOY, Clematis vitalba.

TREACLE, Melasses, Theriaca—t. English, Teucrum chamædrys—t. Venice, Theriaca.

TREAD, Cientiacula—t. of the Cock, Moleculæ.

TREATMENT, Curatio.

TREATMENT, DRY. One in which the patient is almost wholly, if not wholly, restricted from the alimentary use of fluids; a valuable *modus medendi* in inflammatory and hemorrhagic conditions.

TREE, ELK, *Andromeda arborca*—t. of Life, *Thuya occidentalis*—t. Sour, *Andromeda arborca*.

TRÈFLE DE CASTOR, *Menyanthes trifoliata*—t. *D'Eau*, *Menyanthes trifoliata*—t. *des Marais*, *Menyanthes trifoliata*.

TREFOIL, *Hepatica triloba*—t. Bean, stinking, *Anagyris*—t. Marsh, *Menyanthes verna*—t. Sour, *Oxalis acetosella*—t. Shrubby, *Ptelea trifoliata*—t. Water, *Menyanthes trifoliata*.

TREMA, Foramen.

TREMBLEMENT, Tremor—t. *Métallique*, see Tremor.

TREMBLES, Milk-sickness.

TREMBLING, Tremor—t. Fevers, Intermittent fever.

TREMELLA AURICULA JUDEÆ, *Peziza auricula*.

TREMOR, *Trepidatio*, *Synclonus Tremor*, *Tromo-spasmus*, *Tromus*, *Trembling*, (F.) *Tremblement*, from *tremere*, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique*, *Tremor metallicus*. Tremor seems to resemble paralysis more than convulsion. See Paralysis agitans and Pavitatio.

TREMOR CORDIS, Hippus, Palpitation—t. Metallicus, see Tremor—t. Potatorum, see Delirium tremens—t. Purring, *Frénissement cataire*.

TREPAN, *Trep'annum*, *Tryp'anon*, *Trip'anon*, *τρύπανον*, *Terebella*, *Peret'rium*, *Peret'rium*, *Serra versatilis*, *Chœnic'is*, *Chœnic'ion*, *Ter'ebra*, *Ter'etron*, *Ter'etrium*, *Vertib'ulum*, (F.) *Trépan*, from *τρύπω*, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trep'an* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits,—as the crown, the *Trépan perforatif* or *Perit'erion*, the *T. exfoliatif* or *Desquamat'rium* *trep'annum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

TRÉPANATION, Trepanning.

TREPAN'NING, *Terebra'tio*, *Anatre'sis*, *Cephalotripe'sis*, *Trepand'tio*, *Trype'sis*, *Trenis*, *Pri'sis*, *Pri'smus*, *Forat'io*, (F.) *Trépanation*. Same etymon as Trepan. The methodical application of the trepan.

TREPANUM, Trepan.

TREPANUM, Trepan.

TREPINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed

transversely like that of a ginlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centre-pin*. The centre-pin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOUSA, Nurse.

TREPIDATIO, Tremor—t. Cordis, Cardiotro-mus.

TREPÏED VITAL, Tripod, vital.

TREPON'DO. A weight of three pounds.—Scribonius.

TRE'SIS, *τρῆσις*, from *τρεω*, 'I bore.' Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESIS, Trepanning, Wound—t. Causis, Burn—t. Punctura, Puncture—t. Vulnus, Wound—t. Vulnus laceratum, see Laceration—t. Vulnus simplex, Cut.

TRESSAILLEMENT, Shuddering.

TRESSO'RIA, low Latin *Episi'on*, *επισσιον*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, *τρι*, in composition, 'three.'

TRIACLE, Melasses.

TRIANGLE MËDULLAIRE, Fornix.

TRIANGLE, VESICAL, see Urinary Bladder.

TRIANGULAR, *Trigo'nos*, *Triangula'ris*, from *tri*, and *angulus*, 'an angle.' That which has three angles.

TRIANGULAR or INFRA-PUBIAN LIGAMENT, *Ligamentum triangula'rē* seu *infra-pubia'num*, is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens. Also, a ligament extending from the coccyoid to the acromial process of the scapula.

TRIANGULARIS, Depressor anguli oris—t. Coccygis, Coccygeus—t. Nasi, Compressor naris.

TRIANGULA'RIS STERNI, *Sterno-costal* (Ch.), *Pectora'lis inter'nus*. A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBAS, (F.) *Tribade*, from *τριβα*, 'I rub.' *Fric'trix*, *Frica'trix*, *Futu'trix*, *Mas'cula*, *Subagita'trix*, *Subigita'trix*. A female whose clitoris is so large as to cause her to be regarded as an hermaphrodite. One who acts as a male with another female.

TRIBULI AQUATICI, see *Trapa natans*.

TRIBUTUM LUNARE, Menses—t. Menstruum, Menses.

TRICÆ, Plica—t. Incuborum, Plica—t. Scroforum, Plica.

TRICAGO, Teucrium chamædrys.

TRICAUDALIS, Retrahens auris.

TRICEPH'ALUS, from *tri*, and *κεφαλη*, 'head.' A monster with three heads.

TRICEPS, from *tri*, and *caput*, 'head.' A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUC'TOR FEM'ORIS. Under this

appellation are comprehended three distinct muscles; *Adductor brevis*, *A. longus*, and *A. magnus*.

TRICEPS AURIS, Retrahens auris—t. Brachialis, Triceps extensor cubiti.

TRICEPS CRURIS, *Femora'lis*, (F.) *Trifémoro-rotulien* (Ch.), *Crural*, *Trifémoro-tibi-rotulien*, *Triceps crural* ou *de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *crura'lis* of most anatomists). 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*). It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

TRICEPS DE LA CUISSE, Triceps cruris—t. *Crural*, Triceps cruris.

TRICEPS EXTEN'SOR CU'BITI, *Triceps brachia'lis*, (F.) *Scapulo-huméro-olécranien* (Ch.), *Triceps brachial*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—long head of the *biceps externus* of Douglas, *Anconeus major* of Winslow,—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the *teres minor*. The second head, or short head of the *biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow,—the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the *latissimus dorsi*. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, Adductor magnus—t. Minor, Adductor longus femoris—t. Secundus, Adductor brevis.

TRICHÆ INCUBORUM, Plica.

TRICHANGIA, Capillary vessels

TRICHANGIECTA'SIA, *Angidiecta'sia*, *Trichocirsus*, from *τριχ*, *τριχος*, 'a hair,' *αγγειον*, 'a vessel,' and *εκτασις*, 'dilatation.' Morbid dilatation of the capillary vessels.

TRICHAUX'È, from *τριχ*, *τριχος*, 'hair,' and *αυξη*, 'increase.' Increase in the quantity and size of the hair, without change of texture.

TRICHERA ARVENSIS, Scabiosa.

TRICHIA, Entropion.

TRICHIASIS, *Trichio'sis*, *Tricho'sis*, from *τριχ*, *τριχος*, 'hair.' *Morbus pila'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimictio*. It must be regarded as a variety of *Catar'rhus vesicæ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty:—a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eye-lashes. See Entropion.

TRICHIASIS LACTEA, Infarctus mammae lacteus.

TRICHILIA, Cathartics.

TRICHIL'IA EMET'ICA, *Eleaja*. A tree, *Order*, *Meliacææ*, common on the mountains of Yemen

and in Senegal. The fruit is used, by the Arabs, as an emetic. The ripe seeds are formed with sesamum oil into an ointment for the itch.

TRICHILIA TRIFOLIATA, a bush of Curaçoa, a decoction of the roots of which is used to promote abortion.

TRICHINA SPIRALIS. Same etymon. A small species of entozoa discovered in the museus of voluntary motion. Trichinae consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, Trichiiasis.—t. Distrix, Distrix.

TRICHIS'MUS. Same etymon. *Copilla'tio*, *Fissu'ra pila'ris*. A capillary fracture, fissure, or crack.

TRICHIURIA, Trichocephalus.

TRICHOCEPHALE DE L'HOMME, Trichocephalus.

TRICHOCEPHALUS, *Trichocephalus dispar*; from *τριξ*, *τριχος*, 'a hair,' and *κεφαλη*, 'head.' *Trichu'ria*, *T. vulgaris* seu *intestinalis*, *As'caris trichu'ria*, *Trichu'ria*, *Trichocephalus* seu *Mustip'ides hominis*, *Long thread-worm*, (F.) *Trichocephale de l'homme*. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the caecum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICHOCIRSUS, Trichangiectasia.

TRICHOG'ENOUS, from *τριξ*, *τριχος*, 'a hair,' and *γενναω*, 'I generate.' Hair-forming; as a '*trichogenous* remedy,'—one that promotes the growth of hair.

TRICHOLABIS, Madisterium.

TRICHOLABIUM, Madisterium.

TRICHOLOGIA, Carphologia.

TRICHOMA, Capillamentum, Plicia.

TRICHOMANES, Asplenium trichomanoides — t. *Crenata*, Asplenium trichomanoides.

TRICHOMAPHYTE, from *trichoma*, 'plicia,' and *φυτον*, 'a vegetable.' A cryptogamous growth, found in plicia, and said, by some, to be its cause.

TRICHOMAPHYTON, Mycoderma plicæ.

TRICHOMATUM, Capillamentum.

TRICHOMATOSE HAIR, Plicia.

TRICHOM'ONAS, *Trichomonad*; from *τριξ*, *τριχος*, 'a hair,' and *μοναδ*. An animalcule found by M. Donnè in the mucus of the vagina, where cleanliness has not been attended to, and to which he has given the name *Trichomonas vaginalis*. By some it is considered to be nothing more than ciliated epithelium separated from the uterus.

TRICHOMYCES TONSURANS, Porrigo decalvans.

TRICHONOSIS, Porrigo—t. *Furfuracea*, *Porrigo decalvans*—t. *Plicia*, *Plicia*—t. *Poliosis*, *Poliosis*.

TRICHON'OSUS, from *τριξ*, *τριχος*, 'hair,' and *νοσος*, 'disease.' A disease of the hair.

TRICHOPHY'IA, *Trichophytica*, from *τριξ*, *τριχος*, 'hair,' and *φαιω*, 'to grow.' Remedies that promote the growth of the hair.

TRICHOPHYTON TONSURANS, see *Porrigo decalvans*.

TRICHOSAN'THES, AMA'RA, (*τριξ*, *τριχος*, 'hair,' and *ανθη*, 'a flower.') *Order*, *Cucurbitaceæ*; a plant of India; the seeds are bitter and astringent, sometimes emetic. In Jamaica, it is considered to be a poison, and is used for killing rats.

TRICHOSANTHES CORDATA. The root is used

by the natives of India as a substitute for Calamba root.

TRICHOSANTHES CUCUMER'INA. The fruit is considered in India to be anthelmintic.

TRICHOSANTHES INCI'SA, *Gashed Trichosanthes*, of the forests of India. The fruit is esteemed to be poisonous. Pounded and intimately blended with cocoa nut oil, it is used in India as an application to offensive sores of the ears, and to ozaena.

TRICHOSANTHES VILLO'SA, of Java. The fruit acts like colocynth.

TRICHOSCHISIS, Schizotrichia.

TRICHOS'IS, *Pila'rè malum*; from *τριξ*, *τριχος*, 'hair.' Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHOSIS, Entropion, Trichiiasis — t. *Area*, *Porrigo decalvans* — t. *Athrix*, *Alopecia* — t. *Distrix*, *Distrix*—t. *Furfuracea*, *Porrigo furfurans* — t. *Hirsuties*, *Hirsuties* — t. *Plicia*, *Plicia* — t. *Poliosis*, *Poliosis* — t. *Setosa*, *Hystriacisias*.

TRICHOTON, Scalp.

TRICHIURIS, Trichocephalus.

TRICLISPERMA GRANDIFLORA, Polygala pauciflora.

TRICUSPID, *Triens'pis*, *Trienspidella*, *Trienspidatus*, from *tri*, and *cuspis*, *cuspidis*, 'a point.' That which has three points.

TRICUSPID VALVES, *Valvulae Trienspides* seu *triglobines* seu *trian'gæ*, are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendinæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'ciæ qua'tuor*. From *tri*, 'three.' The third part of a pound. Four ounces, Troy. — Galen.

TRIFACIAL, Trigemini.

TRIFEMORO-ROTULIEN, *Triceps cruris*—t. *Tibi-rotulien*, *Triceps cruris*.

TRIFOLIUM ACETOSUM, *Oxalis acetosella* — t. *Aquatium*, *Menyanthes trifoliata* — t. *Aureum*, *Hepatica triloba*—t. *Cervinum*, *Eupatorium cannabinum*—t. *Fibrinum*, *Menyanthes trifoliata* — t. *Hepaticum*, *Hepatica triloba*.

TRIFOLIUM MELILO'TUS OFFICINA'LIS, *T. offic'inalè* seu *odoratum* seu *caballinum*; from *tri*, and *folium*, 'a leaf.' *Melilotus*, *Melilotus cit'rina*, *Lotus sylvest'ris*, *Ser'tula Compa'na*, *Coro'na re'gia*, *Common mel'ilot*, (F.) *Métilot*. *Ord.* *Leguminosæ*. *See*. *Syst.* *Diadelphia Decandria*. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, glysters, &c.

TRIFOLIUM OFFICINALE. *T. melilotus officinalis* — t. *Paludosum*, *Menyanthes trifoliata* — t. *Palustre*, *Menyanthes trifoliata*.

TRIGAS'TRIC, *Trigas'tricus*, *Triven'ter*; from *tri*, and *γαστρον*, 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

TRIGEM'INI, *Tergem'ini*, from *tri*, and *gem'inus*, 'double;' 'threefold;' 'triplets.' The *fifth pair of nerves*, *Nervi div'isi seu gustato'rii*, *Nervus quintus* seu *tremellus* seu *mictus* seu *sympathet'icus me'dius* seu *sympath'icus medius* seu *anon'ymus* seu *innominatus*, *Par'trigem'inum* seu *quintum nervorum cerebr'alium* seu *trium funicul'o'rum*, *Tri'facial*, (F.) *Nerv' gustatif' innominé*, *Nerv' à trois cordes*, *Nerv' trijumeon*. This nerve arises below the tubæ annulæ by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, pro-

ceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion—the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first*, or *ophthalmic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third—the *manducatory* or *masticatory*—is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, Fornix—*t. Vésical*, see Urinary Bladder.

TRIGONEL'LA FŒNUM, T. Fœnum Græcum, diminutive of *trigona*, three sided—from the shape of its flower; *Fœn'greek, Fœ'nngreek, Fœnum Græcum, Bu'ceras, B. Fœnum Græcum, Carphos, Ægoc'eras*, (F.) *Fœn'grec, Séuégroin*. *Ord. Leguminosæ. Sez. Syst. Diadelphia Decandria*. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONIUM OLFACTORIUM, see Mammary eminence.

TRIGONOS, Triangular.

TRIGONUS VESICÆ, see Urinary bladder—*t. Lieutaudi*, see Urinary bladder.

TRIJUNEAUX, Trigemini.

TRIL'LIUM LATIFO'LIUM, from *trilix*, 'triple,'—all the parts being in threes. *Broad-leaf Bethroot, Bethroot, Rattlesnake root, Wake-robin, Coughroot, Indian Balm, Ground Lily, Jew's Harp, Indian Shamrock, Pariswort, Tremlow*. *Ord. Trilliacæ. Sez. Syst. Hexandria Trigynia*. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of Trillium, all of which possess the same properties.

TRIOCEPHALIA, Aprosopia.

TRIOR'CHIS, from *tri*, and *ορχις*, 'a testicle.' One who has three testicles.

TRIOSTEOSPERMUM, Triosteum.

TRIOSTEUM, T. Perfoliatum seu *majus*, from *tri*, and *οστέον*, 'a bone,' in allusion to the three bony nuts; *Triosteospermum, Bastard Ipecacuan'ha, Fever Root, Feverwort, Tinker's weed, Horse ginseng or gentian, Ipecac., Wild Coffee, White ginseng, Gentian, White Gentian, Sweet Bitter*. Indigenous; *Ord. Caprifoliaceæ*. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

* **TRIOSTEUM ARGUSTIFOLIUM, T. minus**, has similar virtues.

TRIBE DE ROCHE. Different lichens of the species Gyrophora, inhabiting the Arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHAR'MACUM, τριφάρμακον. From *tri*, and *φάρμακον*, 'a medicine.' A medicine composed of three ingredients.

TRIPLET, from *triplex*, 'triple.' One of three

children born at the same accouchement or gestation. Also, relating to triplets—as a 'triplet conception.'

TRIPLET MONSTERS, Monstra trip'lica seu *trigen'ina*, are such as have parts of the body tripled. They are rare.

TRIPOD, VITAL, (F.) Tripied vital. The heart, lungs, and brain have been so called, as their united action is necessary for the maintenance of life.

TRIPSIS, Contusio, Trituration.

TRIPUDIATIO SPASTICA, Chorea.

TRIQUETRA OSSA, Wormiana ossa.

TRIQUESTRUM, (OS), Cuneiform (bone.)

TRISIS, Brygmus.

TRISMUS, from *τριζω*, 'I gnash.' *Ent'asia* seu *Tonos Trisimus, Capis'trum, Masticatory spasm of the face, Locked Jaw, Spasmus seu Rigor seu Tetanus maxill'æ inferioris, Gnathospasmus, Stomatospasmus*, (F.) *Mal de Machoire*. Spastic closure of the under jaw; a partial tetanus. Cullen makes two varieties—*T. nascentium* seu *neonatorum, Nineday fits*, (F.) *Sarrête*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

TRISMUS CAPISTRATUS, Brédissure—*t. Catarrhalis maxillaris, Neuralgia maxillaris*—*t. Clonicus, Neuralgia faciei*—*t. Cynicus*, see Canine laugh—*t. Diastrophe Sauvagesii, Paralysis, Bell's*—*t. Dolorificus, Neuralgia faciei*—*t. Maxillaris, Neuralgia faciei*—*t. Nascentium*, see Trismus—*t. Neonatorum*, see Trismus—*t. Sardonicus, Risus sardonicus*.

TRISPERM'UM, from *tri*, and *σπέρμα*, 'a grain or seed.' A cataplasm, consisting of three seeds, —*cumin, bay, and smullage*. Gorræus.

TRISPLANCHNIA, Cholera.

TRISPLANCH'NIC, Trisplanch'nicus, (F.) *Trisplanchnique*; from *tri*, and *πλαγχνον*, 'viscus.' That which relates to three orders of viscera.

TRISPLANCHNIC NERVE, Nervus trisplanch'nicus seu *sympotheticus magnus* seu *sympathicus* seu *ganglion'icus* seu *vaso-motorius*, (F.) *Nerv' sympathique* ou *grand sympathique, Great sympath'ic, Intercostal, Ganglion'ic* or *vertebral nerve, Nerve of organic life*; — named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the anatom'ic functions*. It has also been called the *ganglionic nervous system*. It is termed *Trisplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior, middle, (thyroid ganglion,)* and *inferior, (vertebral ganglion)*; 12 in the back—the *thoracic*; 5 in the loins—the *lumbor*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccyge'al, Ganglion impar, œzgygous ganglion*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which

is the *semilunar* and *solar plexuses*. 2. The *external ganglions*, *Limitrophæ* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either. Its special functions are not yet, however, well understood, and are the subject—as they have always been—of much interesting investigation.

TRISPLANCHNITIS, Cholera, (spasmodic.)

TRISSAGO, Teucrium chamaedrys—t. Palustris, Teucrium scordium.

TRISTEMANIA, Melancholy.

TRISTERNAL. Béchard has given this name to the third bony portion of the sternum:—that which corresponds to the third intercostal space.

TRISTITIA, Athymia, Mœror.

TRITÆOPHYA AMERICANA, Fever, yellow.

TRITÆOPHYÆ, *Tritæophya*, from τριταῖος, 'tertian,' and φῶς, 'I become.' A fever, whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratslavien'sis*, to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITÆUS, Tertian fever.

TRITICUM ÆSTIVUM, from *terere*, *tritum*, 'to trush.' *T. cerealē* seu *Cevallos* seu *comprietum* seu *erivæcenn* seu *Gaertnerianum* seu *Linnæanum* seu *pruno'sum*, *Summer wheat*; and *TRITICUM HYBERNUM* seu *glaucum* seu *Muticum* seu *Sic'ulum*, *Winter wheat*, (F.) *Fruent. Ord.* Gramineæ. *See Syst.* Triandria Digynia. From these plants our wheaten flour is obtained, by grinding the seeds—*Wheat*, *Pyrus*, *Fruentulum*—and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

Bread, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread*, *Micæ panis*, are a common excipient for pills and boluses.

TRITICUM ARVENSE, *T. repens*—t. *Cereale*, *T. æstivum*—t. *Cevallos*, *T. æstivum*—t. *Compactum*, *T. æstivum*—t. *Faginum*, *Polygonum fagopyrum*—t. *Gaertnerianum*, *T. æstivum*—t. *Glaucum*, *T. hybernum*, and *T. repens*—t. *Hybernum*, see *T. æstivum*—t. *Muticum*, *T. hybernum*—t. *Linnæanum*, *T. æstivum*—t. *Pruinosum*, *T. æstivum*.

TRITICUM REPENS, *T. arven'sæ* seu *glancum*, *Agropyrum lævis'simum*, *Bromus glaber*, *Gramen caninum* seu *Dioscoridis* seu *repens*, *Lolia'cenn rutil'cæ* *repentē*, *Dog-grass*, *Couch-grass*, *Quickeus*, *Witch-grass*, (Sc.) *Romachus*, (F.) *Chiendent*. The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

TRITICUM SICCLUM, *T. hybernum*.

TRITIO, Conditio, Trituration.

TRITON PALUSTRIS, see Ectozoa.

TRITORIUM, Infundibulum.

TRITURA, Conditio.

TRITURATIO, *Trituratio*, *Tritura*, *Tritus*, *Tritio*, *Tripsis*, from *terere*, *tritum*, 'to bruise.' The act of reducing a substance to powder.

TRITURATIO, Conditio.

TRITUS, Conditio, Trituration.

TRIVELIN, see Liver.

TRIVENTER, Trigastrie.

TROCAR, *Trochar*, *Acus paracentica* seu *paracentica* seu *triquetra vulg'ris*, *Paracenticum*, *Paracentet'rium*. Corrupted from the (F.) *Troisquarts* or *Trocart*, 'three quarters;' so called from the triangular shape of the point—*Triquetrum*. An instrument used for evacuating fluids

from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a canula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the canula remains in the wound and affords the fluid a ready passage outwards.

TROCARD, Trocar.

TROCHIL, Trochiscos.

TROCHAN'TER, *Trokanter*, *Rotator*, from τροχῶν, 'I turn.' Anatomists have given the names *great* and *little trochanter* to two processes at the proper extremity of the femur. The *great trochanter*, *glutæ*, is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

TROCHANTERIAN, *Trochanteria'um*, *Trochanter'um*. That which belongs or relates to the great trochanter.—Chaussier.

TROCHANTINIAN, *Trochantin'ian*, *Trochantin'um*. That which belongs or relates to the trochantin or less trochanter.

TROCHAR, Trocar.

TROCHES OF CARBONATE OF LIME, Trochisci carbonatis calcis—t. of Chalk, Trochisci carbonatis calcis—t. Escharotic. Trochisci escharotici—t. Gum, Trochisci gummosi—t. of Gum Arabic, Trochisci acacia—t. of Ipecauanha, Trochisci ipecauanhae—t. of Laetucarium, Trochisci lactuaria—t. Liquorice, Trochisci glycyrrhizæ—t. Liquorice, with opium, Trochisci glycyrrhizæ cum opio—t. of Magnesia, Trochisci magnesie—t. of Morphia, Trochisci morphiae—t. of Morphia and ipecauanha, Trochisci morphiae et ipecauanhae—t. Nitre, Trochisci nitratis potassæ—t. of Peppermint, Trochisci menthæ piperita—t. of Tartaric acid, Trochisci acidi tartarici.

TROCHIA, Orbit.

TROCHILIA, Trochlea.

TROCHIN, from τροχῶν, 'to turn.' Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subscapularis.

TROCHINIAN, *Trochin'um*. That which belongs or relates to the trochin.

TROCHIS'CUS, *Phthois*, *Artis'ens*, *Collis*, *Collis*, *Phthois'cos*, *Rot'ala*, *Cyclis'mos*, diminutive of τροχός, 'a wheel.' *A troch* or *round table*, (F.) *Trochisque*. See Pastil, and Tabella. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette*,—the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

TROCHISCI ACA'CLÆ, *Troches of Gum Arabic*, (Acac. \mathfrak{S} iv; Amyli \mathfrak{S} j; Sacchar. \mathfrak{H} j. Make into a mass with *rose water*, and form lozenges.—Ph. E.) To allay cough.

TROCHISCI AC'IDI TARTARICI, *Troches of Tartaric Acid*, (Acid. Tartar. \mathfrak{S} ij Sacchar. \mathfrak{S} viiij; Ol. Limon. \mathfrak{M} x. Form into troches with mucilage.—Ph. E.) Refrigerant and demulcent.

TROCHISCI BERNICI NIGRI, *T. glycyrrhizæ glabrae*.

TROCHISCI CARBONATIS CALCIS, *T. e Cretâ*, *T. Cretæ* (Ph. U. S.), *Troches of Carbonate of lime or chalk*, *Lozenges for the heartburn*, *Tabletæ ad*

ardo'rem ventriculi seu cardial'giæ seu ad sodam. (Cret. ppt. ℥iv; acaciæ, in pulv. ℥j; myrist. in pulv. ℥j; sacch. in pulv. ℥vj. M. Form into troches with water.) Antacid and absorbent.

TROCHISCI E CRETĀ, T. carbonatis calcis — t. Cretæ, T. carbonatis calcis.

TROCHISCI seu PASTILLI EMETI'NÆ PECTORALES, Pectoral Lozenges of Emetine. (Sugar, ℥iv; emetine, 32 grains. Form into lozenges of nine grains each.) One is a dose.

TROCHISCI ESCHAROTICI, Escharotic Troches. (Hydrarg. oxymer. p. 8; amyli, p. 16; mucilag. g. tragac. q. s. Make into troches, to which a few drops of laudanum may be added.—Ph. P.) Used in foul ulcers, to remove excrescences, &c.

TROCHISCI ESCHAROTICI DE MIN'IO. (Oxyd. plumbi. rubr. p. 16; hydrarg. oxymer. p. 32; vic. panis, p. 128; aq. rosæ, q. s.—Ph. P.) Used like the last.

TROCHISCI GLYCYRRHIZÆ, T. G. Glabræ seu Pech'ici nigri, Lic'worice troches, Black pectoral lozenges. (Ext. glyc. glabræ, gum. acac. āā p. j; sacch. purif. p. ij. Dissolve in warm water; strain; evaporate, and form into troches.—Ph. E.) Demulcent. To allay cough.

TROCHISCI GLYCYRRHIZÆ CUM OPIO, T. G. et opii (Ph. U. S.) seu Thebaici seu sedati'vo-balsamici seu pectorales regis Danorum, Lic'worice Troches with Opium, Wistar's Lozenges. (Opium, in pulv. ℥ss; ext. glycyrrhiz. in pulv., sacchar. in pulv., acaciæ, in pulv., āā ℥j; ol. anisi, f℥j. Make into troches.—Ph. U. S.) Demulcent and anodyne.

Spitta's Lozenges for coryza, hoarseness, and sore-throat, are composed as follows:—(Cnbeb. recent. in pulv. ℥ij; extract. glycyrrhiz. ℥j; myr. oxyli. ℥j; acaciæ, ℥iv; syrurp, q. s. Make into troches of ten grains each.

TROCHISCI GUMMO'SI, Gum Troches. (G. acac. p. v; amyli, p. i; sacch. pur. p. xij. Make up the troches with rose-water.—Ph. E.) Demulcent.

TROCHISCI IPECACUAN'HÆ, Troches of Ipecacuanha. (Ipecacuanh. in pulv. ℥ss; sacchar. in pulv. ℥xiv; marantæ, in pulv. ℥iv; mucilag. tragacanth. q. s. Make into troches.—Ph. U. S.)

TROCHISCI LACTUCARIÏ, Troches of Lactucarium. (Prepared with Lactucarium in the same proportion and manner as the opium lozenges.—Ph. E.) Each lozenge contains between the fifth and sixth of a grain of lactucarium.

TROCHISCI MAGNE'SIÆ, Troches of Magnesia. (Magnes. ℥iv; sacchar. ℥ij; myrist. pulv. ℥j; mucilag. tragacanth. q. s. Make into troches.—Ph. U. S.) Useful in acidity of the stomach, with constipation.

TROCHISCI MENTHÆ PIPERITÆ, Troches of Peppermint. (Ol. menth. piperit. f℥j; sacchar. in pulv. ℥ij; mucilag. tragacanthæ, q. s. Make into troches.—Ph. U. S.) Used as a carminative.

TROCHISCI MORPHIÆ, Troches of Morphia. (Morph. Muriat. ℥j; Tinct. Tolut. ℥ss; Sacchar. ℥xxv. Make into lozenges, with mucilage, weighing 15 grains each.—Ph. E.) Each lozenge contains about one-fortieth of a grain of muriate of morphia. Used to allay cough.

TROCHISCI MORPHIÆ ET IPECACUAN'HÆ, Troches of Morphia and Ipecacuanha. (Morph. mur. ℥j; Ipecac. pulv. ℥j; Tinct. Tolut. f℥j; Sacchar. ℥xxv. Make into a mass with mucilage, and form lozenges, 15 grains each.—Ph. E.) Each lozenge contains about one-fortieth of a grain of the muriate. Used to allay cough.

TROCHISCI NITRA'TIS POTAS'SÆ, Nitre Troches. (Potassæ nitrat. p. j; sacch. pur. p. iij. Make into troches with mucilage of tragacanth.—Ph. E.) In slight inflammatory sore-throat and fever.

TROCHISCI PECTORALES REGIS DANORUM, T. glycyrrhizæ cum opio — t. Sedativo-balsamica, T. glycyrrhizæ cum opio.

TROCHISCI SODÆ BICARBONATIS, Troches of Bicarbonate of Soda. (Sodæ bicarb. ℥iv; sacchar. in pulv. ℥ij; mucilag. tragacanth. q. s. To be made into a mass, and divided into troches, each weighing ten grains.—Ph. U. S.) Antacid.

The Pastilles de Vichy, Pastilles digestives d'Hauteville-Vichy, Pastilli digestivi Durcetii, composed of bicarbonate of soda, oil of peppermint, and sugar, are much used in France, like the Vichy waters, in cardialgia, gout, and lithiasis.

TROCHISCI STIBIATI, Tabellæ antimoniales Kunkelii — t. Thebaici, T. glycyrrhizæ cum opio.

TROCHISQUE, Trochiscos.

TROCHITER, from τροχαιον, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles.—Chaussier.

TROCHITERIAN, in the language of Chaussier, means any thing belonging or relating to the trochiter.

TROCH'LEA, Trochil'ia, (F.) Trochlée ou Troklée. A pulley; from τροχαιον, 'to turn,'—for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit.

TROCHLEA LABYRINTHI, Cochlea.

TROCHLEARIS, Obliquus superior oculi.

TROCHLÉATEUR, GRAND, Obliquus superior oculi — t. Petit, Obliquus superior oculi.

TROCHLÉE, Trochlea.

TROCHOID, from τροχος, 'a wheel,' and εδος, 'resemblance.' Trochoi'des, Ax'ea commissura. An articulation, in which one bone turns upon another, like a wheel upon its axle; as the Atló-ido-axoid articulation.

TROCHOIDES, Axea commissura.

TROËNE, Ligustrum vulgare.

TROISQUARTS, Trocar.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

TROKLÉE, Trochlea.

TROLLIUS LAXUS, T. America'nus, Globe flower; Order, Ranunculaceæ; indigenous: has the same medical properties as the Ranunculus.

TROMOMANIA, Delirium tremens.

TROMOPARANŒA, Delirium tremens.

TROMOS, see Paralysis agitans.

TROMOSPASMUS, Tremor.

TROMPE, Tuba — t. d'Eustache, Eustachian tube — t. de Fallope, Tuba Fallopiana — t. Utérine, Tuba Fallopiana.

TROMUS, Tremor.

TRO'NC, Trunk — t. Brachial, Brachial artery — t. Basilaire, Basilar artery.

TROPÆ'OLUM MAJUS, Nastur'tinum Indicum seu Peruvia'nium, Acrivi'ola, Flos sanguin'eus monar'di, Cordamin'dum majus, Car'dammum majus, Indian Cross. Ord. Geraniaceæ. Ser. Syst. Octandria Monogynia. (F.) Cresson des Indes, Cresson du Mexique, Capucine. An antiscorbutic.

TROPÆ'OLUM TUBERO'SUM, Ulluco. A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.

TROPICALIS, Colostrum.

TROPHE, Aliment, Cibatio, Pabulum.

TROPHI. Same etymon as Trophy. In in-

sects, the parts of the mouth that are employed in receiving and preparing the food.

TROPICAL, *Trophicus*, (F.) *Trophique*. Same etymon as Trophy. Relating to nourishment or nutrition.

TROPICAL NERVES. The organic nerves, or nerves of the sympathetic system, have been so termed, from the belief that they are concerned in nutrition.

TROPIHOS, Nutrition.

TROPHONEUROSES, from τροφή, 'nourishment,' and *neurosis*. Morbid conditions of the process of nutrition, owing to modified nervous influence. — Romberg.

TROPHONOSI, *Trophonosi*, from τροφή, 'nourishment,' and νόσος, 'a disease.' Diseases of nutrition.

TROPHY, *Trophia*, τροφή, a suffix denoting 'nourishment or nutrition;' as in *hypertrophy*, 'excess of nourishment or nutrition.'

TROPONU'SI, *Morbi tropici*, from τροπή, the solstitial or tropical point where the sun turns or alters its course, and νόσος, 'a disease.' Diseases that prevail in the tropics.

TROSTER, see Spirit.

TROU, Foramen—*t. Anonyme*, Foramen stylo-mastoideum—*t. Arengle ou Borgne*, Cæcum foramen—*t. Borgne* of the Medulla oblongata, Foramen cæcum of the medulla oblongata—*t. de Botal*, Botal foramen. *Ovale foramen*—*t. Déchiré antérieur*, Lacerum anterius foramen—*t. Déchiré postérieur*, Lacerum posterius foramen—*t. Épineux*, Spinale foramen—*t. Mentonnier*, Mental foramen—*t. Optique*, Foramen opticum—*t. Orbitaire supérieur*, Foramen supra-orbitarium—*t. Orbitaire supérieur*, Orbital foramen superior—*t. Ovale*, *Ovale foramen*—*t. Rond, petit*, Spinale foramen—*t. Sous-orbitaire*, see Suborbital canal—*t. Sous-pubien*, Obturatorium foramen—*t. Sphéno-épineux*, Spinale foramen—*t. Sus-orbitaire*, Foramen supra-orbitarium.

TROUS CAROTIDIENS, Carotica foramina—*t. Condylodien*, Condylolidea foramina—*t. de Conjugaison*, Conjugationis foramina, see Vertebra—*t. Olfactifs*, Olfactory foramina—*t. Rachidiens*, Spinal foramina.

TROUSSE. Case (pocket).

TROUSSE-GALANT, Cholera morbus.

TROUSSEAU, Fasciculus.

TROUSSEAUX ARRIÈRE-MÉSÉNTÉRIQUES (F.). A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUCK, see Medicament.

TRUCULENTUS, Homicidal.

TRUDGEBACKED, see Hump.

TRUÉLOVE, Paris, Trillium latifolium.

TRUFFE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber—*t. Hart's*, Elaphomyces granulatus.

TRULLA, Fart.

TRUMBUS, Thrombus.

TRUMPET CREEPER, *Tecoma radicans*—*t. Flower*, *Tecoma radicans*—*t. Weed*, *Eupatorium purpureum*.

TRUNCUS, Trunk.

TRUNK, *Truncus*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts:—*a superior*, the head; *a middle*, the thorax, and *a inferior*, the pelvis. These three regions contain the great splanchnic cavities. They are united by a common stalk—the vertebral column. To the middle are articulated the

superior extremities; and, to the inferior, the lower extremities.

The trunk of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, from (F.) *trousser*, 'to tie up.' *Brachærium*, *Brachærium*, *Brachilæ*, *Brachiorolum*, *Bracherolum*, *Amma*, *Hamma*, *Subligaculum*, *Subligatura*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac, and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex pad, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, Peculent.

TRYPANON, Trepan.

TRYPESIS, Trepanning.

TRYPESIS, Friction.

TSCHERBET, Sherbet.

TSHETTIK, Upas tiéuté.

TSIANA, Costus.

TSJAMPACA, *Michelia champaca*.

TUBA, Tube—*t. Aristotelica*, Eustachian tube—*t. Cæca*, *Tuba Fallopiana*—*t. Uterina*, *Tuba Fallopiana*—*t. Vocalis*, Tube, vocal.

TUBAL PREGNANCY, see Pregnancy, tubal—*t. Respiration*, see Murmur, respiratory.

TUBE, *Tuba*, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts which are hollow and have the shape of a trumpet.

TUBE ALIMENTARY, Canal, alimentary—*t. Eustachian*, Eustachian tube.

TUBE FALLOPIAN, *Tuba Fallopiana* seu *Fallopia* seu *uteri* seu *cæca*, *Metrosalpinx*, *Hysterosalpinx*, *Oviductus muliebris*, *Vas deferens muliebris*, *Ductus varicosus* seu *Processus lateralis* seu *Meatus seminalis* seu *Meatus seminalis uteri*, *Oviduct*, *Vector canal*, (F.) *Troupe de Fallope* ou *utérine*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fimbriated extremity*; called, also, *Foliaeum ornamentum*, *Morus diaboli*, *Infundibulum* seu *Digitationes* seu *Fimbriae* seu *Vexilla* seu *Lacinia tubarum Fallopia*, (F.) *Morceau fraqué*, *Pavillon de la trompe*, *Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the

uterus, the abdominal termination being termed *Ostium abdominale*; the uterine *Ostium uterinum*. When the tube embraces the ovary, a funnel-shaped cavity—*Corolla infundibuliformis*—is formed at its extremity, into which the ovule passes.

TUBE, INTESTINAL, Canal, alimentary.

TUBE, ŒSOPHAGEAL, *Stomach Tube*. A long elastic gum tube, capable of being passed into the œsophagus or stomach.

TUBE, POLLEN, see Pollen.

TUBE, RECTAL, *Defecation tube*. An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

TUBE, STOMACH, see Tube, œsophageal.

TUBE, VOCAL, *Tuba vocalis*. The part of the air passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

TUBER, Hump, *Lycoperdon tuber*, *Tubercle*—t. *Annulare*, *Pons varolii*—t. *Atloïdo-occipital*, *Rectus capitis posticus minor*—t. *Cervinum*, *Ela-phomyces granulatus*—t. *Cibarium*, *Lycoperdon tuber*.

TUBER CINE'REUM, *T. C. cum Infundibulo*. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER CORPORIS CALLOSI, see *Corpus callosum*.

TUBER FRONTALE, *Frontal protuberance*—t. *Gulosorum*, *Lycoperdon tuber*—t. *Gutturorum*, *Bronchocele*—t. *Ischio-trochantérien*, *Quadratus femoris*—t. *Ischii*, see *Ischiatic*—t. *Nigrum*, *Lycoperdon tuber*—t. *Parietale*, see *Parietal Bones*—t. *Pellagra*, *Pellagra*—t. *Tympani*, *Promontory of the tympanum*.

TUBERA TERRÆ, *Lycoperdon tuber*.

TUBERCLE, *Tuberculum*, *Tuber*, *Strangalion*, *Strangalis*, *Tuberculous deposit*, (vulg.) a *Kernel*, a *Knot*, (F.) *Tubercule*. A tumour in the substance of organs, from the production of new matter;—sensation null; growth sluggish. In *Pathological Anatomy*, the term is generally given to a species of degeneration which consists of an opaque matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophymata*, *Tubercula Pulmonum*, (F.) *Tubercules pulmonaires*, are the cause of *Tubercular Phthisis*. *Mesenteric tubercles* are often met with in the same affection, but particularly in *Tabes Mesenterica*. Laënnec classes tubercles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculation*, is termed *Tuberculo'sis*, *Morbus tuberculosus*, *Strumosis* seu *Phymato'sis pulmonum*, and *Dyscrasia tuberculo'sa*. Tubercles are seen of various forms,—to wit, in fine points, (F.) *Poussière tuberculeuse*, gray and yellow granu-

lations, miliary tubercles; and gray and yellow tubercular masses, softened, and cretaceous.

TUBERCLE, BLACK, *Melanosis*—t. *Painful subcutaneous*, see *Neuroma*.

TUBERCLES OF THE AREOLA, see *Mamma*.

TUBERCLES, PEARLY, *T. sebaceus miliary*, *Follicular elevations*. Small collections of sebaceous matter in the sebaceous glands or ducts, often seen in the thin skin of the lower eyelids, where they sometimes attain an inconvenient size.

TUBERCLES, SEBACEOUS MILIARY, T. pearly.

TUBERCULA ARAN'TII, *Corpora seu Corpuscula Arantii*, *Tubercles of Arantius or Aranzi*. Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

TUBERCULA ARTHRITICA, *Calculi*, *arthritic*—t. *Cerebri*, *Encephalophymata*—t. *Gonorrhœica*, *Gonorrhœa impura*—t. *Hepatis*, *Hépatostromosis*—t. *Intestinorum*, *Enterophymata*—t. *Nervorum nodosa*, *Ganglions, nervous*—t. *Parva duræ matris*, *Glandulæ Pæchioni*—t. *Peritonæi*. *Cœliophymata*—t. *Pulmonum*, see *Tubercles (of the lungs)*—t. *Quadrigenina*, *Quadrigenina Tubercula*.

TUBERCULAR, *Tuberculous*, *Tuberculo'sus*, *Tuberculate*, *Tuberculated*, (F.) *Tuberculeux*, *Tuberculé*. That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR or TUBERCULOUS CONSTITUTION or DIATHESIS, *Phthisio'sis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachexia*, *Tuberculo'sis*, *Morbus tuberculo'sus*, *Dyscrasia tuberculo'sa*, is the condition of one labouring under tuberculo'sis.

TUBERCULAR MATTER. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards putaceous, semi-fluid, and curdy. See *Tubercle*.

TUBERCULAR PHTHISIS is that produced by the development of tubercles in the lungs.

TUBERCULAR SORE THROAT, *Pharyngitis follicular*.

TUBERCULATE, *Tubercular*.

TUBERCULATE SARCOMA of AB'ERNETHY, *Emphy'ma Sarcoma tuberculo'sum*, *Tumor tuberculosus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED, *Tubercular*—t. *Liver*, *Cirrhosis*.

TUBERCULE, *Tubercle*.

TUBERCULÉ, *Tubercular*.

TUBERCULES BIJUMEAUX, *Quadrigenina tubercula*—t. *des Glandes lymphatiques*, *Serofula*—t. *du Foie*, *Hépatostromosis*—t. *des Ganglions Mésentériques*, *Tabes mesenterica*—t. of the *Larynx* and *Fauces*, *Pharyngitis follicular*—t. *Miliary*, see *Granulation*—t. *Pisiformes*, *Mamillary tubercles*—t. *Pulmonaires*, see *Tubercle*—t. *Quadrjumeaux*, *Quadrigenina corpora*.

TUBERCULEUX, *Tubercular*.

TUBERCULITIS. A word of hybrid formation; from *tuberculum*, 'a tubercle,' and *itis*, denoting inflammation. Inflammation of a tubercle or of tubercular masses.—Jos. Frank.

TUBERCULIZATION, see *Tubercle*.

TUBERCULOSIS, see Tubercle, and Tuberculosis. Cachexia—t. Laryngis et Tracheæ, Phthisis laryngea—t. Pulmonum, Phthisis pulmonalis—t. Vertebrarum, Vertebral disease.

TUBERCULOSUS, Tubercular.

TUBERCULOUS, Tubercular—t. Deposit, Tubercle—t. Disease of the Lungs, Phthisis pulmonalis—t. Dust, *Poussière tuberculeuse*.

TUBERCULUM, diminutive of *tuber*, Tubercle.

TUBERCULUM CINEREUM, 'Ash coloured tubercle.' *Fossicola cinerea*. A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and upon the sides with the corpus restiforme.

TUBERCULUM LACRYMALE, see Lacrymal puncta—t. Loweri, Lower, tubercle of.

TUBEROSITAS, Tuberosity—t. Tympani, Promontory of the tympanum.

TUBÉROSITÉ BICIPITALE, Bicipital tubercle—t. *Scientique*, see Ischiatic.

TUBEROSITY, *Tuberositas*, (F.) *Tubérosité*, from *tuber*, 'a bump.' Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBES OF FERREIN, see Uriniferous Tubes.

TUBI MEMBRANACEI, see Villous membranes.

TUBULAR, *Tubularis*, *Tubulosus*, (F.) *Tubulaire*, *Tubulaire*. Same etymon as the next. Relating to or having the form of a small tube. An epithet applied to glands—*Glandulæ tubularæ*, which, like those of the stomach, have the shape of small tubes.

TUBULAR BLOWING SOUND, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tubulus*; diminutive of *Tuba*, 'a tube.' A small tube.

TUBULEUX, Tubular.

TUBULI BELLINI, Uriniferous tubes—t. Contorti, see Uriniferous tubes—t. Duræ matris, Sinuses of the dura mater—t. Ferreinii, see Uriniferous tubes—t. Nervi, Nerve fibres—t. Pelvis renum, see Calix—t. Recti, see Rete testis and Uriniferous tubes—t. Seminiferi, see Testicle—t. Seminales, see Testicle—t. Uriniferi Bellini, Uriniferous tubes.

TUBULOSUS, Tubular.

TUBULUS, Cannula—t. Centralis Modioli, see Tractus spiralis foraminulatus.

TUBUS ACUSTICUS, Ear-trumpet—t. Alimentarius, Canal, alimentary—t. Intestinorum, Canal, alimentary—t. Nervorum, Nervelemma—t. Pollinicus, see Pollen—t. Vermicularis cæci, Appendix vermiformis cæci.

TUCKAHO, Lycopodium tuber.

TUE-CHIEN, Colehicum autumnale.

TULBAGHIA ALLIACEA. A South African plant. *Nat. Ord.* Asphodelææ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

Tulbaghia cepacea and *T. violacea*, serve the same purpose.

TULIP, CAPE, *Homeria collina*—t. Tree, *Liriodendron*.

TULPIER, *Liriodendron*.

TULIPIFERA LIRIODENDRON, *Liriodendron tulipifera*.

TUMEFACTIO, Swelling—t. Mollis, Puffiness. TUMESCENCIA PITUITOSA, Leucophlegmatia.

TUMEUR, Tumour—t. *Anomale*, see *Hæmatodes fungus*—t. *Blauche*, Hydrarthrus—t. *Caverneuse*, see *Hæmatodes fungus*—t. *Encephaloïde*, Encephaloid—t. *Érectile*, see *Hæmatodes*

fungus—t. *Fongoïde*, Encephaloid—t. *Fongueuse*, Encephaloid—t. *Hémorrhagiale circonscrite*, see Aneurism—t. *Lymphatique des articulations*, Hydrarthrus—t. *Ouvrore*, Encephaloid—t. *Pulpeuse*, Encephaloid—t. *Splénoïforme*, Encephaloid—t. *Spongieuse*, Encephaloid—t. *Variqueuse*, see *Hæmatodes fungus*.

TUMOR, Swelling, Tumour—t. Albus, Hydrarthrus—t. Anomalous, *Hæmatodes fungus*—t. Artuum, Obdormitio—t. Capitis Sanguineus, Cephalæmatoma—t. Carneus, Sarcinæ—t. Cysticus, Encystis—t. Cysticus serosus, Hygroma—t. Desmoïdes, Tumour, fibrous—t. Fibrosus, Tumour, fibrous—t. Ficosus, Fiens—t. Flatulentus, Emphysema—t. Fugax, see Fugacious—t. Fungosus articuli, Spina ventosa—t. Fungosus sanguineus, *Hæmatodes fungus*—t. Gangliiformis, Ganglion, nervous—t. Genarum, Meloncus—t. Genu albus, Genocæce—t. Glandulæ parotideæ, Parotidoneus—t. Lactens, Galactocœle—t. Lardens, Steatoma—t. Malarum, Meloncus—t. Ovarii, Ovarioncus—t. Parotidis, Parotidoneus—t. Prostatæ, Prostatoneus—t. Renalis, Nephroncus—t. Sanguineus, *Hæmatoma*—t. Squamiformis carnosus, Lepidosarcoma—t. Tuberculosis, Tuberculata sarcoma—t. Tunicatus, Encystis—t. Uteri, Hysteroneus.

TUMOUR, from *tumeo*, 'I swell.' *Tumour*, *Oncos*, *Oncus*, *Epar'ia*, *Epar'is*, *Emphy'na*, *Exerescen'tia* (Sauvages), *Eophy'ma*, (Sc.) *Sacule*, (F.) *Tumeur*. A rising or prominence, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *exerescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling*;—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Serofula is the most common cause of these affections.

TUMOUR, CELLULO-FIBROUS, Tumour fibro-cellular—t. Epithelial, see Epithelial.

TUMOUR, FIBRO-CELLULAR, *Cellulo-fibrous tumour*. A soft and elastic form of fibrous tumour, a variety of the *gelatinous sarcoma* of Rokitan'sky, of which the softer kind of polypus of the nose is an example.

TUMOUR, ERECTILE. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

TUMOUR, FIBRO-PLASTIC, Sarcoma.

TUMOUR, FIBROUS, *Fibrous growth*, *Fibro'ma*, *Fibroïd*, *ino'ma*, *Tumor fibrosus seu desmoïdes*, *Inohylo'ma*. A tumour or growth formed of fibrous tissue.

TUMOUR, LAMINATED NACREOUS FATTY, Cholesteatoma—t. Milk-like, Encephaloid—t. Phantom, see Fantom.

TUMOUR, VARICOSE, *Tumour varicosus*. A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

TUMOUR, VASCULAR, see *Hæmorrhoids* and *Nævus*.

TUNAS, see *Cactus opuntia*.

TUNBRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-five miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, Conjunctiva membrana.

TUNDUS CORDIS, Mucro cordis.

TUNIC, *Tunica, Chiton, a coat.* An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA ACINIALIS, Uvea — t. Aciniformis, Uvea — t. Acinosa, Uvea — t. Adnata, Conjunctiva — t. Adventitia, see Artery — t. Agnata, Conjunctiva — t. Alba oculi, Sclerotic — t. Albuginea, Albuginea, see Kidney — t. Albuginea oculi, Sclerotic — t. Allantoidea, Allantois — t. Arachnoides, Arachnoid membrane — t. Aranea, Arachnoid membrane — t. Caduca, Decidua — t. Candida oculi, Sclerotic — t. Carnosa, Panniculus carnosus — t. Cellularis, see Artery — t. Conjunctiva, Conjunctiva — t. Costalis, Pleura — t. Crassa, Decidua — t. Crystallina, Arachnoid membrane — t. Dartos, see Dartos — t. Dura oculi, Sclerotic — t. Durior et crassa, Sclerotic — t. Elastica, see Artery — t. Elytroides, Vaginalis tunica — t. Erythroides, Cremaster — t. Exterior ovi, Decidua — t. Externa, see Artery — t. Extima oculi, Sclerotic — t. Fasciminialis, Allantois — t. Fibrosa, see Folliculi Graafiani — t. Filamentosa, Decidua — t. Glabra, see Artery.

TUNICA GRANULOSA. An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

TUNICA HORTENSIS, Dianthus caryophyllus — t. Innominata oculi, Sclerotic — t. Interna oculi, Retina — t. Intima, see Artery.

TUNICA JACOBI, Membrana Jacobi, Jacob's coat or membrane. A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staff-shaped bodies, and hence called *Stratum bacillo-rum* seu *bacilla'tum, Bacillar layer of the retina*, which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum.

TUNICA MEDIA, see Artery — t. Muscularis, Dartos — t. Nervea oculi, Retina — t. Nervorum, Neurilemma — t. Perforata, Uvea — t. Prætensa abdominis, Peritonæum — t. Propria, see Kidney — t. Reticularis, Retina — t. Retiformis, Retina — t. Rhagoides, Choroidea tunica, Uvea — t. Rubicunda scroti, Dartos — t. Rubra, Dianthus caryophyllus — t. Ruyschiana, see Choroid — t. Subcostalis, Pleura — t. Thoracis, Corset — t. Uvalis, Uvea — t. Uvea, Uvea — t. Uviformis, Uvea — t. Vaginalis, see Vaginal — t. Vaginalis Linguae, see Tongue — t. Vaginalis Propria, Vaginal coat of the Testicle — t. Vaginalis reflexa, Vaginal coat of the Testicle — t. Vaginalis testis, see Testicle — t. Vasculosa oculi, Choroid, see Eye.

TUNICA VASCULOSA TESTIS, Pia mater testis. An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situated immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

TUNICA VITREA, Hyaloid membrane.

TUNCULA, Clitoris.

TUNIQUE ALBUGINÉE, Albuginea — t. *Commune de Bichat, Endangium.*

TUN'NELLING. A term, sometimes employed for the treatment of stricture of the urethra, by making pressure upon it from within so as to promote its removal by absorption.

TUNNYFISH, SALTED, Omotarichos.

TUPHLO-ENTERITIS, Typhlo-enteritis.

TUPHUS, Typhus.

TUPINARIA, Talpa.

TURBA HÆMORRHOIDALIS, see Hæmorrhoids.

TURBATIONES ANIMI, Affections of the mind.

TURBINATED BONES, Ossa turbinata. Bones shaped like a top; from *turbo, turbinis* or *turben*, 'a top'; *Ossa spongiosa, O. ter'tia maxilla superioris, Cornua, Conchæ na'rium seu ven'eris, Tur'bines nasi seu na'rium, Conchyl'ia, Buccina, Lam'ina spongiosa nasi, (F.) Cornets.* Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossa. 1. *Ossa spongiosa superioris* or *Cornet de Morgagni*; — the highest. 2. *Ossa spongiosa mediana*, the middle cornu of French anatomists, — the *ethmoid'al cornu* or *Ossa spongiosa superioris seu turbinatum*, of English anatomists, *Ossa convolutum superius, Concha, C. na'rium superior seu Morgagniana, (F.) Cornet moyen.* This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Ossa spongiosa seu turbinatum inferius, Concha inferior, Convolutum inferius ossa, Ossa sphenoid'al (Ch.)*, projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoid'al cornu.*

All the turbinated bones extend the olfactory surface.

TURBINES NASI seu NARIUM, Turbinated bones.

TURBITH BLANC, Globularia alypum — t. Mineral, Hydrargyrus vitriolatus — t. Montpellier. Globularia alypum — t. *Noir*, see Hydrargyri oxydum cinereum — t. Plant, Convolvulus turpethum.

TURBO CEREBRI, Pineal gland.

TURGENTIA, Turgescence.

TURGES'CENTE, *Turges'cence, Turgid'ity, Tur'gidness, Turgescen'tia, Turgen'tia, Orgas'mus,* from *turgescere*, 'to begin to swell, turgere, 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility — *Turgor vitalis* — has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

TURGESCENTIA, Turgescence.

TURGESCENTIA VESICULÆ FELLÆ, Ascites Hepato-cysticus, Physconia seu Cystocellè biliosa. Hepatal'gia Petiti'na, Hydrocholeyst'is, Hydrops vesicæ fellæ, (F.) Hydropisie de la Vésicule du Fiel, Distension de la Vésicule du Fiel, Cholocystictasie. Distension of the gall-bladder by bile.

TURGIDITY, Turgescence.

TURGIDNESS, Turgescence.

TURGOR VITALIS, see Turgescence.

TURMERIC, *Curcuma longa, Sanguinaria Canadensis.*

TURN OF LIFE, see Menses.

TURNING, Versio, from (F.) *tourner*, 'to turn.' (F.) *Versio.*

VERSIO FETUS. The operation of bringing

down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts.

TURNIP, *Brassica rapa*—t. Dragon, *Arum triphyllum*—t. Indian, *Arum triphyllum*—t. Pepper, *Arum triphyllum*.

TURNS, Menses.

TURPENTINE, *Terebinthina*—t. Bordenaux, see *Pinus sylvestris*—t. Briançon, see *Pinus cembra*—t. Chio, see *Pistacia terebinthus*—t. Common, see *Pinus sylvestris*—t. Common, American, see *Pinus sylvestris*—t. Cyprus, see *Pistacia terebinthus*—t. Damarra, see *Pinus damarra*—t. Dombeya, see *Dombeya excelsa*—t. Horse, see *Pinus sylvestris*—t. Strasburg, see *Pinus picea*.

TURPENTINE TREE, *Pistacia terebinthus*.

TURPENTINE, VENICE, see *Pinus larix*—t. Venice, true, see *Pistacia terebinthus*—t. White, see *Pinus sylvestris*.

TURPETIUM, *Convolvulus turpetium*—t. Minerale, *Hydrargyrum vitriolatum*—t. Nigrum, *Hydrargyri oxydum cinereum*.

TURQUETTE, *Herniaria glabra*.

TURQUOISE. This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health:—a superstitious notion.

TURTLE BLOOM, *Chelone glabra*—t. Green, *Chelonia mydas*—t. Head, *Chelone glabra*.

TURUNDA, Tent.

TURUNDE ITALICÆ. Pastes made of the finest and most glutinous wheat—known under the names of *Maccaroni*, *Vermicelli* and *Italian* or *Cagliari paste*.

TURUNDULA, Tent.

TUSCARORA ACID SPRING, see Canada, mineral waters of.

TUSSACA RETICULATA, *Goodyera pubescens*.

TUSSEDO, Tussis.

TUSSICULA, Tussis.

TUSSICULAR, *Tussicula'ris*, *Tussiculo'sus*, from diminutive of *tussis*, 'a cough.' Relating to a cough, or to a slight cough.

TUSSICULOSUS, Tussicular.

TUSSILAGO, *T. Farfara seu vulg'aris*, from *tussis*, 'a cough,' which it relieves; *Be'chium*, *Be'chion*, *Cal'ceum equi'num*, *Chamaele'cē*, *Chamae'giron*, *Fil'ius ante putem*, *Farfara'ula*, *Gallio'marchus*, *Farfara*, *F. Be'chium*, *U'ngula cuballi'na*, *Colts'foot*, *Foal'foot*, (F.) *Pas d'âne*, *Herbe de Saint-Quirin*. Ord. Compositæ. Ser. Syst. Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

TUSSILAGO FARFARA, Tussilago—t. Hybrida, T. petasites.

TUSSILAGO PETASITES, *T. hybrida seu petasites hermaphrodita*, *Petasites*, *P. major seu rubrus seu officinalis seu hybridus seu vulg'aris*, *Buttebohr*, *Pestilent-wort*. The roots of this plant have been recommended as aperient and alexipharmic. They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

TUSSILAGO PETASITES HERMAPHRODITA, T. petasites—t. *Vulgaris*, Tussilago.

TUSSIS—diminutive, *Tussic'ula*; *Begma*, *Bex*, *Tusse'do*, *Be'ris*, *Tussis nervosa*, *Catarrhus*, *Pneumia Tussis*, *Cough*, *Coughing*, (Prov.) *Couf*, (Sc.) *Hout*, *Houat*, *Houit*, (F.) *Toux*. A violent, sonorous, frequent, and short expiration, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry*, when unaccompanied by expectoration. It is symptomatic of many diseases. See Bronchitis.

TUSSIS AMPHEMERINA, Pertussis—t. *Asinina*, Pertussis—t. *Bronchica*, Cough, tubal, see Bronchitis—t. *Canina*, Pertussis—t. *Catarrhalis Simplex*, *Catarrh*—t. *Clamosa*, Pertussis—t. *Clangosa*, Pertussis—t. *Convulsiva*, Pertussis—t. *Delassans*, Pertussis—t. *Perina*, Pertussis—t. *Pucros strangulans*, Pertussis—t. *Quinta*, Pertussis—t. *Senilis*, Bronchitis (chronic)—t. *Spasmodica*, Pertussis—t. *Stomachalis*, Pertussis—t. *Suffocans*, Pertussis—t. *Suffocativa*, Pertussis—t. *Tussiculosa*, Pertussis.

TUSSIVE; *Tussiv'us*; from *tussis*, 'cough.' Belonging or relating to cough:—as *tussive* vibration; the vibration of the parietes of the chest, caused by coughing.

TUTAMINA, pl. of *Tutameu*, 'a defence,' 'a protection,' from *tutare*, 'to defend.' Parts are so called which defend or protect each other.

TUTAMINA CEREBRI are the scalp, pericranium, bones of the skull, and the meninges.

TUTAMINA OCULI are the eyebrows, eyelids, and lachrymal apparatus.

TUTENAG, Zincum.

TUTHIA, Tutia.

TUTIA, *Pom'pholyx*, *Culmi'a*, *Alfusa*, *Mesera*, *Capu'itis*, *Tuthia*, *Ox'ydum zinci impurum*. The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

TUTTERING, Stuttering.

TWIGG'S HAIR DYE, see Hair dye.

TWIN, Gemellus.

TWINGE, see Pain.

TWINKLING OF THE EYE, Nictation.

TWINLEAF, COMMON, *Jeffersonia Bartoni*.

TWINROOT, *Orchis*.

TWINS, SIAMESE. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They have lived in North Carolina, are married, and have children. See Xiphopages.

TWITCHING-GRASS, *Triticum repens*.

TWITCHING, Tic.

TYCHICA, from *τυχη*, 'accident.' Fortuitous lesions or deformities. The 7th class of Good's Nosology.

TYLE, Callosity.

TYLOMA, Callosity.

TYLOPHORA ASTHMATICA, *Asclepias asthmatica*, *Cyan'chum Ipeacuan'ha seu rostratum seu viridiflorum seu tomentosum*, *Ipeacuanha of the Isle of France*, (F.) *Ipeacuanha blanc de l'Île de France*. Order, Asclepiadacæ. A native of various parts of the East Indies, both of the continent and islands. The root is acrid, and is used on the coast of Coromandel as a substitute for ipeacuanha. In large doses, it is emetic; in smaller, often repeated, it is cathartic. It is recommended, also, as a diaphoretic, and especially in humeral asthma.

TYLOSIS, Callosity.

TYLUS, Callosity.

TYMMA, Wound.

TYMPAN, Tympanum.

TYMPANAL, Tympanic.

TYMPANAL, *Cadec du tympan*.

TYMPANIA, Tympanites.

TYMPANIAS, Tympanites.

TYMPANIC, *Tympanic'us*, *Tym'panal*, (F.) *Tympanique*; same etymon as Tympanum. Relating to the tympanum, as 'tympanic canal.'

TYMPANIC NERVE, see Petrous ganglion.

TYMPANIQUE, Tympanic.

TYMPANITA, Tympanites.

TYMPANITE, Tympanites.

TYMPANITES. *Emphyse'ma seu Pneumatosis Abdominis*, *Hydrops Tympanites*, *Affectio tympanitica*, *Ectympanosis*, *Hydrops abdominalis aërenis*, *Aëros'is*, *Aëro-enterectasia*, *Aërentectasia*, *Enterærectasia*, *Physocœlia*, *Tympanosis*, *Physe'ma*, *Physe'is*, *Hydrops siccus et flatulentus*, *Tympania*, *Tympanias*, *Tympanita*, *Tympanitis*, *Emphyse'ma Tympanitis*, *Ë. Tympaniticum*, *Meteorism'us*, *Tympanus*, *Meteorism*, *Wind dropsy*, (F.) *Tympanite*, *Pneumotose péritonéale*, *Ballonnement*, from *τυμπανον*, 'a drum'; so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympanites abdominalis*, *Aëropéritonie*, of some:—the accumulation in the intestines being called *Tympanites intestinalis*.

TYMPANITES, UTERINE, Physometra.

TYMPANITIS, *Inflammatio tympani*; from *τυμπανον*, 'a drum,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the middle ear. Also, tympanites.

TYMPANOSIS, Tympanites.

TYMPANUM, *τυμπανον*, 'a drum.' The *Drum* or *barrel of the ear*. The names *Cavity of the Tympanum* or of the *Drum*, *Cœcitas* seu *Cœcum Tympani*, *Antrum* seu *cavitas antro'sa Auris*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour* ou du *Tympan*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Membrane of the Drum*, *Membra'na tympani*, *Diaphragma seu Mediastinum* seu *Tegumentum auris*, *Myri'n'ga*, *Myri'n'x*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenes'tra ovalis*, *Prom'ontory*, and *Fora'men rotundum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior*, on which are the *Processus cochleariformis* and the inner orifice of the *Eustachian tube*. The cavity of the tympanum is covered by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the *membrana tympani* to the *fenestra ovalis*. They are called

the *Bones* or *Ossicles of the Ear*, and are the malleus, incus, os orbiculare, and stapes.

For the nervous plexus of the tympanum, see *Petrosal Ganglion*, and *Otic Ganglion*.

TYMPANUM MINUS, see *Fenestra*—t. *Secundarium*, see *Fenestra*.

TYMPANUS, Tympanites—t. of the *Womb*, *Physometra*.

TYPE, *Typus*, *Periodus morbi*, from *τυπος*, 'a stamp,' itself from *τυπω*, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA has the same properties as

TYPHA AROMATICA, *Acorus calamus*, and

TYPHA LATIFOLIA, (*τυφος*, 'a marsh,' [?]). *Cat-tail Reed mace*, *Bulls-egg*, (F.) *Massette*, *Musse* ou *Quenouille d'Écu*. A plant common in marshes and ponds, in this country and Europe. *Ord.* Typhaceæ. *Ser. Syst.* *Monœcia triandria*. Its roots have been used in dysentery and blenorhagia. The young shoots, before they reach the surface of the water, when boiled, taste like asparagus.

The down, (F.) *Aigrette*, *Poils*, which accompanies the flowers, has been applied to burns like cotton.

TYPHICUS, Typhoid.

TYPHIQUE, Typhoid, Typhus.

TYPHLITIS, Typhlo-enteritis.

TYPHLO-ENTERITIS, *Typhlo-enteritis*, *Typhlitis*, *Typhloteritis*, *Inflammatio Cœci*, *Phlegmonous Tumour of the Cœcum*, (F.) *Inflammation du Cœcum*, *Cœcite* (Piorry); from *τυφλος*, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cœcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, Cœcum.

TYPHLOPS, Cæcus.

TYPHLOSIS, Cæcitas.

TYPHLOTERITIS, Typhlo-enteritis.

TYPHLOTERON MONOCOLON, Cœcum.

TYPHLOTERUM, Cœcum.

TYPHLOTES, Cæcitas.

TYPHODES, Typhoid.

TYPHOËMIE ENTÉRIQUE, see *Typhus*.

TYPHOHÆMIA, see *Putrefaction*.

TYPHOID, *Typhoides*, *Typhodes*, (*τυφοδης*, 'stupefied,') *Typhicus*, *Typhosus*, *Lacticus*, (F.) *Typhique*, *Typhoïde*, *Typhode*. From *typhus*, and *eidos*, 'resemblance.' Appertaining to or resembling typhus: as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *Phlogoses*: of this family, *Stomacæce*, *Pharyngocæce*, and *Pneumocæce* are examples.

TYPHOID AFFECTION, see *Typhus*—t. *Fever of India*, *Cholera*.

TYPHOMANIA, from *τυφος*, 'stupor,' and *μανια*, 'delirium.' *Delirium with stupor*, *Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, *Coma vigil*, *Insomnia*.

TYPHONIA, *Coma vigil*.

TYPHOSEPSES, Typhososes.

TYPHOSEPTOSSES, *Typhosep'ses*, from *τυφος*, and *σηψις*, 'putrefaction.' Typhous affections.

TYPHOSUS, Typhoid.

TYPHOSUS, Typhoid, (F.) *Typhique*. Same etymon as *Typhus*. Belonging or relating to typhus.

TYPHOUS DEPOSIT. A peculiar substance of new formation found in the areolar membrane, between the mucous and muscular coats of the patches of Peyer in typhoid fever.

TYPHOUS FEVER, see *Typhoid*.

TYPHUS, *Semipes'tis*, *Typhus*, *Febris Typho'da* seu *asthen'ica* seu *adynam'ica*, *Asthenop'gra*, (F.) *Fèvre adynamique* ou *ataxique* ou *adynamique ataxique*, *Typhus d'Europe*; from *τυφος*, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance: its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior*. **TYPHUS MITIOR** seu *simplex* seu *nervosus* seu *comatosus*, *Febris levis nervosa* seu *putrida nervosa* seu *hectica maligna nervosa*, *Blethropy'us*, *Neurop'gra*, *Neurop'p'tus*, *Nervous Fever*, (F.) *Fèvre nerveuse*, is characterized by slight shiverings, heavy, vertiginous headach; great oppression, peculiar expression of anxiety, nausea, rigging, despondency, and coma or quiet delirium. **TYPHUS GRAVIOR** seu *car'cerum* seu *castren'sis* seu *anthropophthor'acus* seu *contagiosus exanthemat'icus* seu *nostras* seu *Europ'us* seu *communis* seu *bel'icus* seu *exanthemat'icus* seu *Hiber'nicus* seu *petechia'lis*, *Febris nervosa epidem'ica* seu *nervosa exanthemat'ica* seu *maligna cum sopor'e* seu *nervosa petechia'lis* seu *pestilential'is Euro'pæ* seu *puniculic'ris* seu *sapor'gra* seu *car'cerum et nosocomio'rum* seu *putrida* seu *continens putrida* seu *continua putrida* seu *pestilens maligna* seu *nautica pestilential'is* seu *petechia'lis*, *Septop'gra*, *Porphyrityphus*, *Pulicariis morbus*, *Pestis bel'ica*, *True* or *Exanthemat'ic* or *contagiosus typhus*, *Nervous fever* with *exanthematous eruption*, *Putrid*, *Jail*, *Hospital* or *Ship Fever*, (F.) *Fèvre des Camps*, *F. nautique*, *F. d'hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, *Typhus contagiosus* is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a 'mulberry rash,' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium succeeded by stupor, signs of incipient putrescency,—as true petechiæ, vibices, hemorrhages, &c. *Typhus*, under particular circumstances, seems to be communicable by contagion; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of *Fever*, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold abluion or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuations; the latter cannot.

Of late years, it has been maintained by many, that there is an essential difference between typhoid fever and typhus; that the former is an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence it has received the names *Fèvre mésentérique*, *F. typhoïde*, *Muladie* ou *Affection typhoïde*, *F. entéro-mésentérique*, *Entérite typho-hémique*, *Typhoémie*

entérique, *Entéro-mésentérique typhoïde*, *Exanthème intestinal*, *Duithi'entérie*, *Duithi'entérite*, &c., *Heudiclidite*, *Entérite folliculaire*, *Gastro-entérite* with nervous affection of the brain, *Follicular gastro-enteritis*, *F. enteritis*, *Enteritis folliculo'sa*, *Typhus abdominal'is*, *T. intestinal'is*, *T. Sporad'icus*, *Entevatyphus*, *T. ganglion'is abdominal'is*, *Febris intestinal'is ulcero'sa*, *F. nervosa gastrica*, *F. nervosa enterica*, *F. enterica*, *F. nervosa mésentérique*, *Enterheli'o'sis nervosa*, *Typhus enter'icus*, *Neop'gra*, *Heatyphus*, *Typhoid affection*, *Enteric fever*. Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papule, (see Spots, red,) which appear mostly on the abdomen. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliarum. The common continued fever or synochus of Great Britain, and of this country, has been presumed by some to be this variety: but farther observations are needed to establish the distinctions which have been attempted; and there is reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics of adynamic fever, and not in others. The *Red Tongue Fever* of Kentucky is considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Typhus d'Europe*, *pestilential fever*, *contagiosus typhus*, *Hungary fever*, *Hospital fever*, *camp fever*, *jail fever*, *lenticular petechial fever*, (F.) *Peste d'Europe*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent—the typhoid. Typhus, they maintain—but by no means establish the position—to be peculiar to England.

TYPHUS ABDOMINALIS, see Typhus—*t. d'Amérique*, *Fever yellow*—*t. Anthracicus*, *Plague*—*t. Anthropophthoræus*, *Typhus*—*t. Aphthoideus*, *Aphthæ*—*t. Belliæus*, *Typhus*—*t. Puerpéral*, see Peritonitis—*t. Searlatinus*, *Searlatina*—*t. Simplex*, *Typhus mitior*—*t. Sporadicus*, see Typhus—*t. Tropicus*, *Fever, yellow*—*t. True*, *Typhus*—*t. Vesicularis*, *Pemphigus*.

TYPIC, *Typical*, *Typ'icus*, (F.) *Typique*. Same etymon as *Type*. Characterized by periodicity,—as a 'typical fever;' or one which observes a particular type.

TYPOSES, see Periodicity.

TYPUS, *Type*.

TYRANNUS, see Critical days.

TYRBASIA, *Agitation*.

TYRBE, *Agitation*.

TYREM'ESIS, *Tyrotent'esis*, from *τυρος*, 'cheese,' and *επεις*, 'vomiting;' *Tyro'sis*, *Tyren'usis*. Vomiting of curdy matter, in infants especially.

TYREUSIS, *Tyremesis*, *Tyrosis*.

TYRIA, *Porrigo decalvans*.

TYRIASIS, Elephantiasis Arabica.

TYRINE, Casein.

TYRODES, Cheesy.

TYROMA, Porrigo decalvans.

TYROS, Cheese.

TYROSIS, Tyremesis. Also, the curdling of milk in the stomach; *Tyreusis*.

TYROTEMESIS, Tyremesis.

U.

UBERIS APEX, Nipple, Papilla.

ULA, Gingivæ.

ULATROPHIA, from *ουλον*, 'the gum,' and *atrophia*, atrophy. Shrinking of the gums; falling away of the gums.

ULCER, *Ulcus*, genitive *Ulcusis*, diminutive *Ulcusculum*; *Hulcus*, 'ελκος, *Helcos*, *Elco'sis*, *Elco'ma*, *Helcus*, *Helco'ma*, a *Sore*, (Sc.) *Sair*, (Prov.) *Kile*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is perverted nutrition; the formative cells losing their plastic properties. Ulcers have been variously divided, according to their nature;—into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *sphilitic*, *cancerous*, *inveterate*, *serofulous*, *phagedenic*, *virulent*, *cacoëthic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

ULCER, JACOB'S, Lupus—u. Malignant, Hospital gangrene—u. Putrid, Hospital gangrene—u. Warty of Marjolin, see Warty Tumour of Cicatrices.

ULCERA INTESTINALIA, Gastrelcosis—u. Laryngis, Phthisis laryngea—u. Serpentina oris, Aphthæ—u. Uteri, see Metrophthisis—u. Ventriculi, Gastrelcosis—u. Vesicæ, Cystophthisis.

ULCERATED, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*; from *ulcus*, *ulceris*, 'an ulcer.' In the state of an ulcer. Affected with ulcers.

ULCERATIO INTESTINALIS, Enterelcosis—u. Ventriculi, Gastrelcosis.

ULCERATION, *Ulcera'tio*, *Exulceratio*, *Pyogen'ia corrosi'va*. Same etymon. A superficial ulcer. The formation of an ulcer—*Excelco'sis*, *Elco'sis*, and *Helco'sis*.

ULCERATIVE, *Ulcera'tivus*, (F.) *Ulcératif*. Relating to ulceration,—as an 'ulcerative process.'

ULCÈRE, Ulcer—u. *du Larynx*, Phthisis laryngea.

ULCÈREUX, Ulcerous.

ULCEROUS, *Ulcero'sus*, *Helco'des*, *Helcoïdes*, (F.) *Ulcérenx*. Same etymon. Having the character of an ulcer. Affected with ulcers.

ULCERS, EGYPTIAN, Ægyptia ulcera.

ULCUS, Ulcer—u. Atonicum, Rupia—u. Cacoëthes, see Cacoëthes—u. Cancerosum, Cancer, Chancre—u. Daeryodes, see Daeryodes—u. Depascens, Phagedenic ulcer—u. Ferinum, Phage-

denic ulcer—u. Fistulosum, Hypophora—u. Hypululum, see Hypulus—u. Narium fetens, Ozæna—u. Obambulans, Phagedenic ulcer—u. Pulmonum, Phthisis pulmonalis—u. Sinuosum, Hypophora—u. Syriacum, Cynanche maligna—u. Telephium, Telephium—u. Tuberculosum, Lupus—u. Uteri, Hysterelcosis, Leucorrhœa.

ULCUSCULA PRÆPUTII, Herpes præputii. ULCUSCULUM, Ulcer—u. Cancerosum, Chancre.

ULE, Cicatrix.

ULETICUS, Gingivalis.

ULICUS, Gingivalis.

ULI'TIS, from *ουλος*, 'solid,' (*σαφ' ουλη*, 'solid flesh?') hence, *ουλον*, 'the gum,' and *itis*; denoting inflammation. *Ouli'tis*, *Inflamma'tio gingi'væ*, *Periodonti'tis gingi'væ*, (F.) *Gingivite*, *Inflammation des gencives*, from *ουλον*, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.

ULITIS SEPTICA, Cancer aquaticus.

ULLUCO, Tropæolum tuberosum.

ULMAIRE, Spiræa ulmaria.

ULMARIA, Spiræa ulmaria—u. Palustris, Spiræa ulmaria.

ULMUS, *U. campestris* seu *glabra* seu *montana* seu *nuda* seu *sativa* seu *scabra*, *Ptelea*, *Common Elm*, (F.) *Orme*, *Ormeau*, *Orme pyramidale* ou *champêtre*. *Ord.* Ulmaceæ. *Sex. Syst.* Pentandria Digynia. The inner, rough bark—*Ulmus*, (Ph. L.)—of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALA'TA, *Lynn Wahoo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

ULMUS AMERICA'NA, *U. fulva* seu *rubra*, *Rough-leaved*, *Red*, or *Slippery Elm*. The inner bark—*Ulmus*, (Ph. U. S.)—is highly mucilaginous, and is used in coughs, diarrhœas, and dysenteries; also, as a poultice for tumours, lacerated and contused wounds, &c.

ULMUS CAMPESTRIS, Ulmus—u. *Fulva*, *U. Americana*, *U. rubræ*—u. *Glabra*, *Ulmus*—u. *Montana*, *Ulmus*—u. *Nuda*, *Ulmus*—u. *Sativa*, *Ulmus*—u. *Scabra*, *Ulmus*.

ULNA, *O'lenê*, *Foc'ilê inferius* seu *majus*, *Canna Bra'chii*, *Os cubiti inferius*, *Os procubitalê*, *Cubitus*, *A'm'dro bra'chii major*, *Cubit*. Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sigmoid* or *semilunar fossa* or *olecranonid cavity*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the

insertion of the *Brachialis interius*. On the outside of this extremity of the bone is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification.

Also, the elbow.

ULNAD, see Ulnar aspect.

ULNAR, Cubital.

ULNAR ASPECT. An aspect towards the side on which the ulna is situated.—Barclay. Ulnad is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, Cubital—u. Externus, see Cubital muscles—u. Gracilis, Palmaris Longus—u. Inter-nus, see Cubital muscles.

ULOCACE, Cancer aquaticus, Stomacace.

ULON'CUS, from *ουλον*, 'the gum,' and *ογκος*, 'tumour.' Swelling of the gums; epulis.

ULORRHAG'IA, *Onorrhag'ia*, *Stomatorrhag'ia*, *Hæmorrhag'ia gingivarum*, *Ulorrhœ'a*, from *ουλον*, 'the gum,' and *ρρηγνμι*, 'I break forth.' Bleeding from the gums.

ULORRHŒA, Ulorrhagia.

ULOTICA, Cicatrissantia.

UL'TIMI-STERNAL. Professor Bécлар gave this appellation to the sixth or last bony portion of the sternum. He calls it also *Eusi-sternal*.

UL'TIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, *Fucus crispus*.

ULVA LATIS'SIMA, *Broad Green Laver*, *Green Stoke*, *Oyster green*; Order, Algæ; is used at table cooked in the same way as the next, to which it is greatly inferior.

ULVA UMBILICA'LIS, *Por'phyra laciniata* seu *umbilicalis*, *Laciniated Purple Laver*, abundant on the shores of Great Britain, is pickled with salt and sold in London as *Laver*. It is eaten at table, stewed with pepper, butter or oil and lemon-juice or vinegar. It has been suggested, also, as an antiscorbutic.

UMBIL, YELLOW, *Cypripedium luteum*.

UMBILIC, Umbilical, Umbilicus.

UMBILICAL, *Um'bilic*, *Umbilical'is*, *Umbilica'tus*, (F.) *Ombilical*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamentum rotundum* of the liver.

UMBILICAL CORD, *Funiculus umbilicalis*.

UMBILICAL REGION, *Re'gio umbilicalis* seu *gast'rica* seu *Mesogastrica*, *Mesogast'rium*, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'ulus umbilical'is*, (F.) *Annean ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESICLE, *Vesicula umbilicalis*.

UMBILICAL VESSELS, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATUS, Umbilical.

UMBILICUS, *Umbil'icum*, *Umbo*, *Om'phalos*, *Radix* seu *Me'dium ventris*, *Mesom'phallium*, *Mesom'phalum*, *Protome'sis* (*navel of a new-born child*); the *umbilic*, *navel*, (Prov.) *Spoon*; from *umbo*, 'the button or prominence in the midst of a buckler,' or from *υμφαλος*, or rather *ομφαλος*, (which signifies the same, as well as the navel; (F.) *Ombilic*, *Nombri*. A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

UMBILICUS MARI'NUS, *Cotyledon marina*, *Andro'sacæ*, *Acetabulum marium*, *Andro'sacæ Matth'oli*, *Enyagus petræus marinus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, *Magnolia tripetala*.

UMS'CHLAG, see Compress.

UNBOWELING, Exenterismus.

UNCARIA GAMBIR, *Nauclea Gambir*.

UNCAS, INDIAN, *Veratrum viride*.

UNCIA, Ounce.

UNCIFORM, *Uncifor'mis*, *Unciya'tus*, from *uncus*, 'a hook,' and *forma*, 'shape.' That which has the shape of a hook.

UNCIFORM BONE, *Os unciform'e* seu *hamatum* seu *uncina'tum*, (F.) *Os croch*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

UNCIFORM EMINENCE, *Hippocampus minor*.

UNCIFORM PROCESS, *Processus uncina'tus* seu *Blumenbueh'ii*, *Great Process of the Ethmoid*. The most considerable of the thin irregularly twisted laminae on the inferior surface of the ethmoid bone, which narrow the opening of the maxillary sinuses.

UNCINATUS, Unciform.

UNCINUS, Hook.

UNCTION, Inunction, Unguentum, Unguentum hydrargyri.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENGLAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of an egg.

UNDOSUS, *Cynatodes*.

UNDULATIO, Fluctuation.

UNEDO, *Arbutus unedo* — u. Papyracea, *Arbutus unedo*.

UN'GEAL, *Ungeal's*, from *unguis*, 'a nail.' Belonging, or relating, to the nails of the hands or feet.

UNGUEAL MATRIX, see Nail.

UNGUEN, Unguentum — u. Articulare, *Synovia*.

UNGUENT, ARMATORY, *Hoplochrysa*.

UNGUENTARIA, see *Myristica moschata*.

UNGUENTA'RIOUS, *Myropæus*, *Myrep'sus*, *Myropæ'les*, *Myropæ'lus*, *Pigmenta'rius*; from *unguentum*, 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUENTUM, *Unguen*, *Myron*, *Uction*, (F.) *Onguent*, from *ungere*, *unctum*, 'to anoint.' Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUENTUM AC'IDI NITRO'SI, *Ointment of Nitrous Acid*, *Pomatum seu Unguentum Nitrienum seu Oxygenatum*, (F.) *Pommade oxygénée*, *Graisse oxygénée*, *Pommade d'Alyon*. (*Adip. snilli*, ℥j; *acid. nitros.* ℥vj. Melt the fat, and rub in the acid gradually, till cold. *Ph. E.*) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ADIPOCERÆ CETORUM, *Ceratum cetacei* — u. *Ægyptiacum*, *Linimentum ærginis* — u. *Ægyptium album*, *Crinomyron* — u. *Æruinis*, *U. subacetatis cupri* — u. *Album*, *Unguentum cetacei* — u. *Album Resolvens*, *Linimentum ammoniæ fortius*.

UNGUENTUM DE ALTHÆÂ, *U. de Terebinthinâ et cerâ seu citrinum seu resinâ pini sylvestris compositum seu resumptivum seu lenitivum*, *Ceratum de Althæâ*, *Emplastum mucilaginosum seu emolliens seu citrinum seu flavum seu de Althæâ*, *Unguentum flavum*, *Marsh mall'ow Ointment*, (F.) *Onguent de guimauve*, *O. d'althéa*. (*Olei de mucilaginis*, 1000 p., *cerâ florâ*, 250 p., *resinâ*, *terebinthinâ*, āā 125 p. Liquefy; strain and stir till cold. *Ph. P.*) *Common Olive Oil* might be substituted for the *Oil of Mucilages*.

UNGUENTUM AMYGDALINUM, *Ceratum Galeni*.

UNGUENTUM ANTIMONIÏ, *U. Antimoniale*, *U. A. Tartarizati*, *U. A. Potassio-tartratis*, *U. tartari emetici*, *Ointment of tartarized antimony*, *Antimonial Ointment*, *Tartar emetic ointment*. (*Antimon. et potass. tartrat. in pulv. subtiliss.* ℥ij, *adipis.* ℥j. *Ph. U. S.*) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tartari stibiati seu emetici*, *Ung. e Tartaro stibiato*, *Adeps Tartari stibii medicatus*, *Ung. Tartaratis Potassæ stibiati*, (F.) *Pommade d'Antimonieth*, *Pommade stibicé*. This method of employing the tartrate of antimony and potassa, as a revellent, is, at times, called *stibio-dermic*, (F.) *La méthode stibio-dermique*.

UNGUENTUM ANTIMONIÏ POTASSIO-TARTRATIS, *Unguentum antimonii* — u. *Antimonii tartarizati*, *U. antimonii* — u. *Antipernium*, see *Antipernium*.

UNGUENTUM AQUE ROSÆ, *Ointment of Rose water*, *Cold Cream*. (*Aq. Rosæ*, f℥j; *ol. amygdal.* f℥ij; *cetacei*, ℥ss; *cerâ albâ*, ℥j.) Melt together, in a water-bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. *Ph. U. S.*) Cooling to irritated surfaces.

UNGUENTUM ARMARIUM, *Hoplochrysa* — u. *Arthanita*, see *Arthanita* — u. *Articulare*, *Synovia* — u. *Basilicon flavum*, *Ceratum resinæ* — u. *Basilicon nigrum*, *Unguentum resinæ nigre* — u. *Basilicon viride*, *Unguentum subacetatis cupri*.

UNGUENTUM BELLADONNÆ, *Ointment of Belladonna*. (*Ext. belladonnæ* ℥j; *adipis* ℥j; *M. Ph. U. S.*) An anodyne application to irritable ulcers, &c.

UNGUENTUM CANTHARIDIS, *Unguentum lyttæ*.

UNGUENTUM CERÆ (*albæ seu floræ*), *Unguentum simplex* (*Ph. U. S.*), *Linimentum simplex*, *Wax Ointment*, *Oil and Bees' Wax*, (F.) *Onguent de cire*. (*Cerâ* ℥ij, *adipis* ℥iiv (*Ph. U. S.*), or—*cerâ* ℥ij, *ol. oliv.* ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratum Galeni* — u. *Cerussæ*, *Unguentum oxidi plumbi albi*, *Unguentum plumbi subcarbonatis* — u. *Cerussæ acetatæ*, *Ceratum plumbi superacetatis*, *U. plumbi superacetatis* — u. *Citrinum*, *U. de althæâ*, *U. hydrargyri nitratis*.

UNGUENTUM CETA'CEI, *U. Sper'matis Ceti sen album*, *Linimentum album*, *Spermaceti ointment*, (F.) *Onguent de blanc de baleine*. (*Cetacei* ℥vj, *cerâ albâ* ℥iv, *ol. oliv.* f℥ij. *Ph. L.*) The ordinary dressing for blisters and excoriations. See *Ceratum cetacei*.

UNGUENTUM COC'CVLI, *Ointment of Cocculus Indicus*. (Take any quantity of *Cocculus Indicus*; separate and preserve the kernels; beat them well in a mortar, first alone, and then with a little lard; then add lard till it amounts altogether to five times the weight of the kernels. *Ph. E.*) Used to destroy vermin, and to cure scabies and ringworm of the scalp.

UNGUENTUM CON'II, *Ointment of Hemlock*. (*Conii fol. recent.*; *adipis* āā ℥j.) Boil the hemlock in the lard till it becomes crisp, and express through linen. *Ph. L.*) Used to irritable tumours and ulcers.

UNGUENTUM CREASO'TI, *Ointment of Creasote*. (*Creasot.* f℥ss; *adipis*, ℥j.) Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

UNGUENTUM CUPRI SUBACETATIS, *Unguentum subacetatis cupri* — u. *Diapompholygos*, *Unguentum oxidi zinci impuri*.

UNGUENTUM DIGESTIVUM SIMPLEX, *U. Terebinthinæ et œorum vitelli*, *Simple digestive ointment*, (F.) *Onguent digestif simple*. (*Terebinthin. pur.* 64 p. *Vitell. oror.* No. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add, gradually, enough of the *Oil of Hypericum* (*Millepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by adding a little of the *Acetate of copper*.

UNGUENTUM ELEMI, *Balsam of Arcæus*, *Unguentum elemi compositum*.

UNGUENTUM EL'EMI COMPOSITUM, *Unguentum e gummi elemi seu de terebinthinâ et adipibus seu elemi*, *Linimentum Arcæi*, *Ointment of Elemi*, (F.) *Baume d'Arcéus*. (*Elemi* ℥ij, *terebinthinæ vulgaris* ℥x, *seri præparati* ℥ij, *olivæ olei* f℥ij.) Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.*) Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPASTICUM DE DAPHNÆ GMLDIO, *Adeps Corticis daphnes quidi medicinalis*, (F.) *Pommade de Garon*. (*Adip. præpar.* 320 p., *cerâ*, 32 p., *cort. daphn. quid.* 128 p.) Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c. See *Unguentum Mezerei*.

UNGUENTUM EPISPASTICUM FORTIUS, Cerate of cantharides—u. Epispasticum nitidus, Unguentum lyttæ—u. Epispasticum viride, Unguentum lyttæ medicatum—u. Flavium, Unguentum de althæa—n. e Gummi elemi, Unguentum compositum—u. Helleboli albi, Unguentum veratri.

UNGUENTUM GALLÆ, Ointment of Galls, (Gallæ in pulv. $\mathfrak{z}\text{ij}$; adipis, $\mathfrak{z}\text{viij}$. M. Ph. U. S.) As an astringent in piles, indolent ulcers, &c.

UNGUENTUM GALLÆ COMPOSITUM, U. Gallæ et Opii, Compound Ointment of Galls, (Gall. in pulv. subtili. $\mathfrak{z}\text{vj}$, adipis, $\mathfrak{z}\text{vj}$, opii pulv. $\mathfrak{z}\text{ss}$. M. Ph. L.) Used in painful hemorrhoids. $\mathfrak{z}\text{ss}$ or $\mathfrak{z}\text{i}$. of camphor is sometimes added.

UNGUENTUM HYDRARGYRI, U. cæruleum seu Neapolitanum, Cæruleum mercuriale, Adeps Hydrargyri medicatus, Mercurial Ointment, Blue ointment, Uction, (F.) Ointment mercuriel ou Napolitain.

The Strong Mercurial Ointment, Unguentum Hydrargyri fortius of the London Pharmacopœia, U. Hydrargyri (Ph. U. S.), is thus made—Hydrarg. $\mathfrak{z}\text{ij}$, adipis $\mathfrak{z}\text{xxij}$, seri $\mathfrak{z}\text{j}$. Rub till the globules entirely disappear.

The Milder Mercurial Ointment,—U. Hydrargyri Mitius,—is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The stronger ointment is used for this purpose. The weaker is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI AMMONIATI, Unguentum hydrargyri præcipitati albi—u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi—u. Hydrargyri compositum, Unguentum hydrargyri nitratis—u. Hydrargyri deutoxydi nitratis, Unguentum hydrargyri nitrico-oxidi.

UNGUENTUM HYDRARGYRI IODIDI, Ointment of Iodide of Mercury, (Hydrarg. Iodid. $\mathfrak{z}\text{j}$, ceræ alb. $\mathfrak{z}\text{ij}$, adipis $\mathfrak{z}\text{vj}$. Ph. L.)

UNGUENTUM HYDRARGYRI IODIDI RUBRI, Ointment of Red Iodide of Mercury, (Hydrarg. Iodid. Rubr. $\mathfrak{z}\text{j}$, Ung. ceræ albæ $\mathfrak{z}\text{viij}$. Ph. D.) Both these ointments may be applied to scrofulous and indolent ulcers.

UNGUENTUM EX HYDRARGYRO MITIUS DICITUR CINEREUM, Unguentum oxydi hydrargyri cinereum.

UNGUENTUM HYDRARGYRI NITRATIS, U. hydrargyri nitratis seu supernitratis hydrargyri seu hydrargyri compositum seu mercuriale citrinum seu citrinum ad scabiem, Balsamum mercuriale. Adeps nitratis hydrargyri medicatus, Ointment of Nitrate of Mercury, Citrine Ointment, (F.) Ointment de nitrate de mercure, O. citrin contre la gale. (Hydrarg. $\mathfrak{z}\text{j}$, acid. nitric. f $\mathfrak{z}\text{xiv}$, olei bubuli f $\mathfrak{z}\text{x}$, adipis $\mathfrak{z}\text{ij}$. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard. Ph. U. S.

A milder ointment,—Ung. nitratis Hydrargyri mitius,—is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

UNGUENTUM HYDRARGYRI NITRICO-OXYDI, U. subnitratibus hydrargyri seu Oxydi Hydrargyri rubri, U. H. acidi rubri (Ph. U. S.), U. deutoxydi hydrargyri nitratis seu Hydrargyri rubri seu ex Hydrargyro oxydato rubro seu mercuriale rubrum seu ophthalmicum rubrum seu subnitratibus hydrargyri, Balsamum ophthalmicum rubrum, Ointment of Nitric Oxyd of Mercury, Red Precipitate Ointment, Golden Ointment, Singleton's Eye Salve. (Hydrarg. oxyd. rubr. in pulv. subtili. $\mathfrak{z}\text{j}$; Ung. simpl. $\mathfrak{z}\text{j}$. Add the oxyd, re-

duced to a fine powder, to the melted ointment. Ph. U. S.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

Bellville's Cerate, which has been long used in cases of scalded head, and of chronic cutaneous diseases in general, is made as follows—Pumbi acet. $\mathfrak{z}\text{ij}$; hydrarg. oxyd. rubr. $\mathfrak{z}\text{ss}$; hyd. chlorid. nit. $\mathfrak{z}\text{ij}$; ceræ albæ $\mathfrak{z}\text{iv}$; ul. oliv. $\mathfrak{z}\text{vj}$. Melt the last two, and add the others in fine powder.

UNGUENTUM HYDRARGYRI OXYDI RUBRI, Unguentum hydrargyri nitrico-oxidi—u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitrico-oxidi—u. Hydrargyri oxydi rubri, Unguentum hydrargyri nitrico-oxidi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, U. Hydrargyri ammoniati, (Ph. U. S.) seu subnitratis hydrargyri ammoniati seu ad scabiem Zelleri seu mercuriale album seu mundificans Zelleri seu e mercurio præcipitato seu calcis hydrargyri albæ, Ointment of white precipitate. (Hyd. ammon. $\mathfrak{z}\text{j}$, ung. simpl. $\mathfrak{z}\text{ss}$. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

UNGUENTUM HYDRARGYRI RUBRI, U. Hydrargyri nitrico-oxidi—u. Hydrargyri subnitratis ammoniati, U. hydrargyri præcipitati albi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxidi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxidi—u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Infusi meloes vesicatorii, U. lyttæ—u. Irritans, U. lyttæ.

UNGUENTUM IODINI, U. Iodini, Ointment of Iodine. (Iodin. $\mathfrak{z}\text{j}$; Potass. iodid. gr. iv; Aquæ Mvi; Adipis, $\mathfrak{z}\text{j}$. Rub the iodine and iodide first with the water until liquefied, and then with the lard until mixed. Ph. U. S.) Used as a local application to gonorrhœa and other swellings.

UNGUENTUM IODINI COMPOSITUM, U. Iodini compositum, Compound Ointment of Iodine. (Iodin. $\mathfrak{z}\text{ss}$; Potassii iodid. $\mathfrak{z}\text{j}$; Alcohol, f $\mathfrak{z}\text{j}$; adipis $\mathfrak{z}\text{ij}$ Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. Ph. U. S.)

UNGUENTUM LANTRINUM, O'leum lantrinum, Adeps lauro-medica'tus, Bay Ointment, (F.) Ointment on Huile de laurier. (Fol. lauri, 500 p., adip. suillæ, 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add Bay berries, in powder, 500 p. Digest and pass through linen. Ph. P.) Reputed to be corroborant and nervine. It is simply emollient.

UNGUENTUM LENTIVUM, U. de althæa—u. Liliaceum, Crinomyron.

UNGUENTUM LYTTÆ, Ung. cantharidis seu vesicatorium seu irritans seu ad vesicula'tionem seu infusi meloes vesicatorii seu epispasticum mitius, Blistering Salve, Ointment of Spanish Flies, Ointment of Infusion of Spanish Flies, Milder blistering Ointment. (Cantharid. in pulv. $\mathfrak{z}\text{ij}$; aquæ destillat. Oss; cerat. resin. $\mathfrak{z}\text{viij}$. Boil down the water with the Spanish flies to one-half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. Ph. U. S.) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

UNGUENTUM LYTTÆ MEDICATUM, Adeps cantharidibus medicatus, Pomatum seu Unguentum epispasticum viride stimulant acerbis, Green blistering Ointment, (F.) Pomade epispastique verte. (Pomati seu unguenti cantharid. 64 p., unguent. populæ 168 p., ceræ albæ 256 p., cupri acetat., ext. opii, \mathfrak{ss} 24 p. Melt the unguentum populæum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. Ph. P.) Use, same as the last.

UNGUENTUM LYTTÆ MEDICATUM ALIUD, Adeps cantharidibus medicatus citius, Pomatum epispasticum flavum et mitius, Yellow Blister-

ing Ointment, (F.) Pommade épispastique jaune. (Pulv. cantharid. 120 p., adip. præp. 1680 p., aquæ 250 p. Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered turmeric, 8 p. Let it cool till the superfluous liquor separates; pour off and add yellow wax, 250 p., Oil of Lemon, 8 p. Ph. P.) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce of powdered cantharides in two ounces of rose-water, and evaporating until one-half of the fluid is driven off, having previously added 15 grains of tartar emetic. The decoction is to be strained, and three ounces of olive oil, an ounce and a half of white wax, and one ounce of spermaceti added to it, and the mixture then boiled till all the water is evaporated.

UNGUENTUM MELANICUM CAUSTICUM, Causticum Æthiopicum.

UNGUENTUM MERCURIALE ALBUM, Unguentum hydrargyri præcipitati albi—u. Mercuriale citrinum, Unguentum hydrargyri nitratis—u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi—u. Mercurii rubrum, Unguentum hydrargyri nitrico-oxydi—u. Mandificans Zelleri, Unguentum hydrargyri præcipitati albi.

UNGUENTUM MEZE'REI, Ointment of Mezerion. (*Mezer. incis. transversim, ʒiv; adipis, ʒxiv; cera alba, ʒij*; moisten the mezerion with a little alcohol, and beat in an iron mortar, until reduced to a fibrous mass; then digest it with the lard, in a salt-water bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold. Ph. U. S.) To keep open blisters, issues, &c.

UNGUENTUM MURIA'TIS HYDRARGYRI OXYGENATO MEDICATUM, Adeps muriatæ hydrargyri oxygenata medicatus, Cyrillo's Ointment, (F.) Pommade de Cyrillo. (*Hydrar. oxyg. 4 p.; adipis suilli præp. 32 p.*—Ph. P.) Antivenereal and alterative. Used in friction, ʒss at a time.

UNGUENTUM NARDINUM, see Nardus Indica—u. Neapolitanum, Unguentum hydrargyri—u. Nervinum, Unguentum Sambuci—u. Nitricum seu oxygenatum, Unguentum acidi nitrosi.

UNGUENTUM OPHTHALMICUM, Adeps oxi'do hydrargyri rubro et plumbi acetat'e medicat'us, Regent's Pommade ophthalmique, (F.) Pommade ophthalmique. (*Butyr. recent., ag. rosar. lavat. añ 4½ p.; camphor. oxyd. hydrarg. rubr., acetatis plumbi, añ 0.25 p.* Mix intimately.—Ph. P.) In chronic inflammation of the conjunctiva or tarsi.

UNGUENTUM OPHTHALMICUM, Unguentum oxidi zinci impuri—u. Ophthalmicum rubrum, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM OPII, Ointment of Opium. (*Opii pulv. ʒj; adipis ʒj*; M.—Ph. L.) To be used where the local application of opium by inunction is needed.

UNGUENTUM OX'IDI HYDRARGYRI CINE'REI, Adeps seu Unguentum ex hydrargyro mit'us dictum cinerem, Ointment of gray oxide of mercury, (F.) Oungent gris. (*Oxyd. hydrarg. ciner. p. j; adipis suilli, p. iij.*—Ph. E.) Properties like the mercurial ointment. It is not much used.

UNGUENTUM OX'IDI PLUMBI ALBI, U. cerus'sæ seu album seu subacetat'is plumbi, Ointment of white oxide of lead, White ointment. (*Ung. simplicis, p. v; oxyd. plumb. alb. p. j.*—Ph. E. and

P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

UNGUENTUM OXIDI PLUMBI CARBONATI, U. Plumbi subcarbonatis—u. Oxidi zinci, Unguentum zinci.

UNGUENTUM OX'IDI ZINCI IMPURI, U. turtiæ seu ophthalmicum seu diapomphol'ygos, Adeps ox'idi zinci medicat'us, Eye-salve, Tutty ointment, Ointment of impure oxide of zinc. (*Linim. simpl. p. v; oxyd. zinc. imp. præp. p. j.*—Ph. E.) Generally used in ophthalmia tarsi and atonic ophthalmia.

UNGUENTUM PICIS LIQ'UIDÆ, U. Picis seu e Picæ, Tar Ointment. (*Picis liquid., sevi, sing. ʒij.* Melt, and stir till cold.—Ph. U. S.) Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

UNGUENTUM PICIS NIGRÆ, Unguentum resinæ nigrae—u. Plumbi acetatis, Ceratum plumbi superacetatis—u. Plumbi carbonatis, Unguentum plumbi subcarbonatis.

UNGUENTUM PLUMBI COMPOSITUM, Compound Ointment of Lead. (*Emp. Plumbi, ʒiij; ol. oliv. fʒxviij; cret. præpar. ʒvj; acid. acet. dil. fʒvj.* Dissolve the plaster in the oil with a slow fire; then add the chalk, and afterwards the acid, constantly stirring until they become cold.—Ph. L.) Used as a dressing to flabby, indulent ulcers.

UNGUENTUM PLUMBI IODIDI, Ointment of Iodide of Lead. (*Plumb. iodid. ʒj; adipis, ʒviij; M.*—Ph. L.) Used as a eutrophic in chronic, glandular, and other swellings.

UNGUENTUM PLUMBI OXYDI CARBONATI, Unguentum plumbi subcarbonatis—u. Plumbi subacetatis, Unguentum oxidi plumbi albi—u. Plumbi carbonatis, Unguentum plumbi subcarbonatis.

UNGUENTUM PLUMBI SUBCARBONA'TIS, U. plumbi carbonat'is (Ph. U. S.) seu album seu album simplex seu carbonat'is plumbici seu cerus'sæ seu oxidi plumbi carbonat'i, Cera'tum de cerus'sâ, (F.) Oungent blanc de Rhazes, O. de cêruse, O. de Tornamira. (*Plumbi carbonat. in pulv. subtiliss. ʒij; Unguent. simpl. ʒij.* Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—Ph. U. S.) Chiefly used as a dressing for burns.

UNGUENTUM PLUMBI SUPERACETA'TIS, U. acetat'is plumbi seu saturn'ium seu cerus'sæ acetat'æ, Balsamum universa'le, Ointment of sugar of lead. (*Olive oil, ʒss; white wax, ʒiss; superacetate of lead, ʒij.*) Cooling, desiccative. Called, also, Balsamum saturn'ium, Butyrum saturni, Linimentum plumbatum, Poma'tum saturni, Ung. triphar'macem.

UNGUENTUM POPULEUM, Adeps papav'erê, hyoscy'amo, et belladon'nâ medicat'us. Fresh buds of the populus nigra, 500 p., macerated in adeps suillus præp. melted, 1500 p., for 24 hours. Preserve this. Take black poppy leaves, belladonna, hyoscyamus, black nightshade, añ 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain.—Ph. P.) Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

UNGUENTUM POPULEUM, see Populus.

UNGUENTUM POTASSÆ HYDRIODAT'IS, U. potass'ii iod'idi (Ph. U. S.), Ointment of hydr'iodate of potass. (*Potass. iodid. in pulv. subtil. ʒj; ag. bullient. fʒj; adipis, ʒj.* Dissolve the iodide in the water, and mix the solution with the lard.—Ph. U. S.) Half a drachm of this ointment is rubbed on scrofulous glands, goitre, &c.

UNGUENTUM POTASSII IODIDI, Unguentum Potassæ Hydriodatis—u. Pulveris melosæ vesicatorii, Cerate of cantharides—u. Resinæ flavæ, Ceratum resinæ flavæ.

UNGUENTUM RESINÆ NIGRÆ, U. resinæ nigrum seu basil'icon nigrum seu Picis nigrae seu Picis

tetrapharmaceutum, Black basilicon, Black resin ointment, Ointment of pitch, Ointment of black pitch. (Resin nigr., cera flavæ, resinæ flav. aā ʒiij; olei olivæ, Oj.—Ph. L.) Uses, the same as the *Ceratum resinæ* or *Yellow basilicon*.

UNGUENTUM RESINÆ PINI SYLVESTRIS COMPOSITUM, Unguentum de Althæâ—u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, Unguentum de althæâ.

UNGUENTUM SABINÆ. Ceratum Sabinæ.

UNGUENTUM SAMBU'CI, *U. sambu'cinum* seu *neriv'num, Green ointment, Elder ointment, (F.) Ongnet de sureau.* (*Sambuci flor. lbij; adipis præp. lbij.* Boil.—Ph. L.) Emullient.

UNGUENTUM SATURNINUM, Unguentum plumbi superacetatis—u. ad Senbiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum cereæ—u. Solidum de eicutâ, Emplastrum eicutæ—u. Spermatis ceti, Unguentum cetacei.

UNGUENTUM STRAMO'NI, *Ointment of Stramonium.* (Ext. stramon. fol. ʒj; adipis. ʒj. Rub the extract with a little water until uniformly soft, and then with the lard.—Ph. U. S.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.

UNGUENTUM SUBACETATIS CUPRI, *U. cupri subacetatis* (Ph. U. S.) seu *deter'gens* seu *basil'icum vir'ide* seu *æri'ginis, Bol'samm viridè, Ointment of subacetate of copper, Verd'gris ointment.* (*Cupri subacet. in pulv. subtiliss. ʒj; nvg. simpl. ʒxv.* Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.—Ph. U. S.) Detergent and escharotic.

UNGUENTUM SULPHURATUM AD SCA'BIE, *Adeps sulphurè et ammoniæ muriatè medicat'us.* (*Adipis, 120 p.; sulph. lot. 60 p.; ammoniæ muriat. aluminæ sulphat. aā 4 p.; fiat unguentum.*—Ph. P.) Antipsoric.

Bailey's Itch Ointment is composed of *olive oil, lard, nitre, alum, sulphate of zinc, and cinabar*; scented with *oil of aniseed, oil of origanum, and oil of spike*, and coloured with *alkaunt-root*.

UNGUENTUM SULPHURATUM ALCALI'NUM AD SCA'BIE, *Adeps sulphurè et carbonatè potassæ medicat'us, Hel'merick's Alcaline Sulphuratèd Itch Ointment.* (*Adip. præp. 800 p.; sulphur. lot. 200 p.; carbonat. potass. pur. 100 p.; fiat ung.*—Ph. P.) Use, same as the last.

Bateman's Itch Ointment resembles this. It is coloured with *cinabar*, and scented with *essence of bergamot*.

UNGUENTUM SULPHURIS, *U. e sulphurè, Sulphur ointment.* (*Sulph. lbij; adip. lbij.*—Ph. U. S.) Used chiefly in *itch*, and some herpetic affections.

UNGUENTUM SULPHURIS COMPOSITUM, *U. Antipsor'icum, Compound Sulphur Ointment, Itch Ointment, Jackson's Itch Ointment, Pomwade Antipsorique de Jussier.* (*Sulph. sublim. lbss; veratri rad. contus. ʒij; potassæ nitrat. ʒj; saponis mollis. lbss; adipis, lbss; ol. bergamot. Mxxx.*—Ph. L.) THE UNGUENTUM SULPHURIS COMPOSITUM of the Pharm. U. S. is made as follows:—*Sulphur, ʒj; hydrargyri ammoniat., acid. benzoic. aā ʒj; ol. bergamot., acid. sulphuric. aā fʒj; potassæ nitrat. ʒij; adipis, lbss.* To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.

UNGUENTUM SULPHURIS IOD'IDI, *Ointment of Iodide of Sulphur.* (*Sulphur. iodid. ʒss; adipis, ʒj.* Rub the iodide with a little of the lard; add the remainder, and mix.—Ph. U. S.) An excellent application in chronic cutaneous affections.

UNGUENTUM SUSINUM, Crinomyron.

UNGUENTUM TAB'ACI, *Tobacco Ointment.* (*Tabc. recent. concis. ʒj; adipis, lbj.* Boil the to-

bacco in the lard, over a gentle fire, till it becomes friable; then strain through linen.—Ph. U. S.) Applied to irritable ulcers, tinea capitis, &c.

UNGUENTUM TARTARI EMETICI, *U. antimonii tartarizati*—u. *Tartari stibiati, U. antimonii tartarizati*—u. e *Tartaro potassæ stibiati, U. antimonii tartarizati*—u. *Tartratis potassæ stibiati, U. antimonii tartarizati*—u. de *Terebinthinâ et adipibus, U. elemi compositum*—u. de *Terebinthinâ et cerâ, U. de althæâ*—u. *Terebinthinæ et ovorum vitelli, U. digestivum simplex*—u. *Tetrapharmaceutum, Basilicon, U. resinæ nigre*—u. *Tripharmaceutum, U. plumbi superacetatis*—u. *Tutiæ, U. oxidi zinei impuri.*

UNGUENTUM VERA'TRI, *U. Veratri albi* (Ph. U. S.) seu *hellebori albi, White hellebore ointment.* (*Veratr. pulv. ʒij; adipis, ʒviiij; olei limon. Mxx.*) Used in cases of *itch*, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the EDINBURGH OINTMENT are *white hellebore* and *muriate of ammonia*.

UNGUENTUM AD VESICATA, *U. lyttæ*—u. ad *Vesicatoria, Cerate of cantharides*—u. *Vesicatorium, Unguentum lyttæ.*

UNGUENTUM ZINCI, *U. ox'idi zinci* seu *zinci oxidi* (Ph. U. S.), *Zinc ointment.* (*Zinci oxid. ʒj; adipis, ʒvj.*) Use, the same as that of the *Unguentum tutiæ*.

UNGUENTUM ZINCI OXIDI, *U. zinci.*

UNGUIS, *Hippocampus minor, Nail, Onyx, Pterygion*—u. *Avis, Hippocampus minor*—u. *Halleri, Hippocampus minor*—u. *Odoratus, Blatta Byzantia.*

UNGUIOS, *Os lacryma'le.* A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human *nail*, and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single *punctum ossificationis*.

UNGULA CABALLINA, *Tussilago.*

UNGULÆ PALPEBRARUM, see *Tarsus*.

UNHEALTHY, *Sickly.*

UNICORN ROOT, *Chamælerium luteum.*

UNILOC'ULAR, *Unilocularis*, from *unus*, 'one,' and *loculus*, (diminutive of *locus*), 'a cell.' Having one cell or cavity, as *biloc'ular* means having two cells or cavities; *multiloc'ular*, having many.

UNIO, *Pearl.*

UNILOCULUS, *Cyclops, Monoculus.*

UNION BY THE FIRST AND SECOND INTENTIONS, see *Intention*.

UNIPARIENS, *Uniparous.*

UNIPARIENT, *Uniparous.*

UNIP'AROUS, *Unipari'ent, Unipariens*, from *unus*, 'one,' and *pario*, 'I bring forth.' Producing one at a birth.

UNISE'MA DELTIFO'LIA, *Pontede'ria cordat'a, Shoel Pickerebeed, Pond Shovel, Shoreleaf, Water Plantain.* An indigenous plant, *Ord. Pontederiaceæ, Sex. Syst. Hexandria Monogynia*, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNITAIRES (MONSTRES) (F.), from *unitas*, 'oneness.' A class of monsters in which are found only the complete or incomplete elements of a single individual. In contradistinction to *Compound monsters*, (F.) *Monstres composés*, in which there are the complete or incomplete elements of more than one.

UNITING BANDAGE, (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement

of such a bandage differs according as the wound is transverse or longitudinal.

UNIVOCAL GENERATION, see Generation.

UNOCULUS, *Borgne*, Cyclops, Monoculus.

UNORGANIZED, Inorganic.

UNSTRIPE MUSCULAR FIBRE, see Muscular fibre.

UNWELL, see Menstruation.

UPAS. A word used in the Archipelagos of Molucca and Sunda, and signifying *Vegetable Poison*, *Ipa*, *Bohou*, *Pohou*, or *Boa* or *Boon Upas*, *Uyas*, *Pohou Antiar*, *Antejar*. A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antiaris Toxicaria*. Another species of upas, *U. Tienté*, *Tshettik* or *Tjettek*, is the produce of a *Strychnos*, *S. Tienté*. Many idle stories are told regarding the upas, most of which are fabulous.

URACHUS, *Uracus*, *Urinae'alkon*, from *ουρον*, 'urine,' and *εχω*, 'I contain.' (F.) *Ouroaque*. The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allontis*. According to Sabatier, this is the arrangement of the urachus in the human foetus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

URACRATIA, Enuresis.

URACUS, Urachus.

URÆMIA, *Urha'mia*, (F.) *Urémie*, from *ουρον*, 'urine,' and *αιμα*, 'blood.' A condition of the blood in which it contains urine or urea.

URALI, Curare.

URANA, Ureter.

URANE, Urinal.

URANISCONITIS, from *ουρανισκος*, 'the palate,' and *itis*, denoting inflammation. *Palat'itis*. Inflammation of the palate.

URANISCOPLAS'TY, *Uraniscoplas'tirē*, from *ουρανισκος*, 'the palate,' and *πλαστικός*, 'forming.' The operation of engrafting in case of deficiency of the soft palate.

URANISCORRHAPHIA, Staphylorrhaphy.

URANISCOS, Palate.

URANORRHAPHIA, Staphylorrhaphy.

URAPOSTEMA, *Abcessus urino'sus*, *Uræde'ma*, from *ουρον*, 'urine,' and *αποστημα*, 'an abscess.' A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

URATE, *Uras*, *Lithate*, *Lithas*; from *ουρον*, 'urine.' A generic name for salts, formed by the combination of uric or lithic acid with different bases. *Urate* or *Lithate of Soda*, for example, is found in arthritic and certain urinary concretions:—*Urate* or *Lithate of Ammonia* in certain urinary deposits.

UREA, *Ureu*, *Ureu'ium*, *U'ricum*, *Mate'ria urino'sa*, *Princip'ium* seu *Sal urino'sum*, *Neph'ricæ*, (F.) *Urée*. Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ℥j.

UREC'CHYSIS, *Urech'ysis*, from *ουρον*, 'urine,' and *εκχysis*, 'effusion.' Effusion of urine into the cellular membrane.

UREDIO, Urticaria.

URÉE, Urea.

UREMA, Urine.

URÉMIE, *Uræmia*.

UREN, Urea.

URENIUM, Urea.

URENS, Caustic.

UREORRHŒA, Diabetes.

URESISTHESIS, Diuresiæsthesis.

URESIS, Micturition.

URE'TER, *ουρητρον*. Same etymon as Urate. *U'raua*, *Vena alba renum*, *Cava'lis ves'icæ fistulo'sus renum*, *Ductus seu Ductor Uri'næ*, *Vas urino'rium*, (F.) *Uretère*. A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone réscical*. The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, from *ουρητρον*, 'the ureter,' and *αλγος*, 'pain.' Pain in the course of the ureter,—as from calculus, *Ureteral'gia calculo'sa*.

URETERALGIA CALCULOSA, see Ureteralgia—u. Inflammatoria, Ureteritis.

URETÈRE, Ureter.

URETER'ICUS. An epithet for ischury, &c., arising from an affection of the ureter.

URETERITIS, *Ureteral'gia inflammato'ria*, *Ureterophlegma'sia*, from *ureter*, and *itis*, denoting inflammation. Inflammation of the ureter; generally caused by calculus.

URETERO-LITH'ICUS, from *ureter*, and *λιθος*, 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROLITHIUS. Same etymon. Calculus in the ureter.

URETEROPHLEGMASIA, Ureteritis.

URETERO-PHLEGMAT'ICUS, from *ureter*, and *πλεγμα*, 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ureter*, and *πυον*, 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG'IA, from *ureter*, and *ραγη*, 'rupture.' Hemorrhage from the ureter.

URETERO-STOMAT'ICUS, from *ureter*, and *στομα*, 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBOÏDES, from *ureter*, *θρομβος*, 'grumous blood,' and *αιδος*, 'resemblance.' Ischury from grumous blood in the ureter.

URE'THRA, *ουρηθρα*, *Cava'lis seu Meatus seu Ductus urina'rius*, *Urinis*, *Ure'tra*, *Fistula urina'ria*, *Iter urina'rium seu Uri'næ*; (F.) *Urèthre*, *Urètre*, from *ουρον*, 'urine.' The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1. A *Prostatic portion*, near the bladder, about an inch and a quarter in length, which traverses the prostate gland:—2. A *membranous portion*, *Isthmus ure'thræ*, *Partis ure'thræ membrana'cea*, from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only:—3. A *spongy portion*, which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra*. Before opening externally, the canal has a dilatation, called the *Fossa* or *Fossic'ula urivicula'ris*. On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum*; and

at the surface of this, the *ejaculatory ducts*, and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacunæ* or *Sinuses of Morgagni*. At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacuna Magna*. The arteries of the urethra are numerous, and proceed from the internal pudic,—the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *meatus urinarius*. In its course, it is slightly curved, the convexity being forwards.

URETHRA, BLIND DUCTS OF THE, see Cæcus—u. Mucous lacunæ of the, see Cæcus.

URETHRAL, *Urethralis*, *Urethricus*. Relating to the urethra.

URETHRAL'GIA, from *urethra*, and *αλγος*, 'pain.' Pain in the urethra. Gonorrhœa.

URÊTHRE, Urethra.

URETHREMPHRAXIS, Urethrophraxis.

URETHRITIS, Gonorrhœa.

URETHROBLENNORRHŒA, from *urethra*, *βλεννα*, 'mucus,' and *ρῶα*, 'I flow.' Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, see Lithotomy.

URETHROCYSTEOANEURYSMATOTOMIA, see Lithotomy.

URETHROCYSTOTRACHELOTOMIA, see Lithotomy.

URETHROHÆMORRHAGIA, Urethrorrhagia.

URETHROPIHRAXIS, *Urethremphrax'is*, from *urethra*, and *φρασσαω*, 'I obstruct.' Obstruction of the urethra.

URETHROPLAS'TIC, *Urethroplasticus*; from *urethra*, and *πλασσαω*. 'I form.' An epithet given to the operation, *Urethroplasty*, which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORRHA'GIA, *Urethrohæmorrhagia*, *Catarrh'gia* seu *Hæmaturia stillatitia*, from *urethra*, and *ρηγνυμι*, 'I break out.' Hemorrhage from the urethra.—Frank.

URETHRORRHŒA, from *urethra*, and *ρῶα*, 'I flow.' A discharge of any kind from the urethra.

URETHROSTENO'SIS, *Strictura urethrae*, *Urostenosis*, *Urethrosten'ia*, (F.) *Rétrécissement de l'Urethre*, from *urethra*, and *στενωσις*, 'narrowness.' Stricture of the urethra.

URETHROTOME, *Urethrotomus*, (F.) *Uréthrotome*, from *urethra*, and *τεμνω*, 'I cut.' An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROTOMY, *Urethrotomia*; same etymon. An operation, which consists in opening the urethra with the *Urethrotome*, for the removal of stricture. See *Anatomie*.

URETHRYMENO'DES, from *urethra*, and *ἄρμη*, 'a membrane.' That which is caused by a membrane formed in the urethra.

URETICUS, Diuretic, Urinary.

URETRA, Urethra.

URÊTRE, Urethra.

URETRIS, Urinal.

URGINEA SCILLA, Scilla.

URILEMIA, Uræmia.

URIAS, Fistula (urinary), Uretbra.

URIASIS, Lithia, Uresis.

URIC ACID, *Ac'idium uricum* seu *urolithicum* seu *lithicum*, *Lithic*, *Urylic*, *Cal'culous*, *Bezoâr'dic*, *Lithia'cic* or *Lithen'ic Acid*, (F.) *Acide urique*. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is often deposited from the urine in health. See Calculi, urinary.

URIC OXIDE, *Ox'idium uricum*, *Xanthic oxide*, *Xanthiae*, *Uricæ acid*. A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URICUS, Urinary.

URIDRO'SIS, from *ουρον*, 'urine,' and *ἰδρωσις*, 'sweat.' Urinous sweating. (F.) *Sueur urineuse*.

URINA CEREBELLA, see Cerebella—u. Chyli, see Urine—u. Cibi, see Urine—u. Diabetica, Urine, diabetica—u. Febrilis, Urine, febrile—u. Furfuracea, see Furfuraceous—u. Galactodes, see Galactodes—u. URINACULUM, Urachus, Urinal.

URINÆ PROFLUVIUM, Diabetes—u. Suppression, Ischuria—u. Stillitium, Strangury—u. Substillum, Strangury.

URINAIRE, Urinary.

URINAL, *Urinatorium*, *Chernil'ium*, *U'ranê*, *Ure'tris*, *Urinac'ulan*, *Urodoch'ium*, *Urod'achê*, *Urodach'um*, *Urat'icium*, *Matra'cium*, *Mat'ula*, *Mat'ella*; from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINALIS, Diuretic, Urinary.

URINARIA, Antichinum linuria, Leontodon taraxacum.

URINARY, *Urinarius*, *Urinalis*, *Urinarius*, *Uricus*, *Ureticus*, (F.) *Urinaire*. Same etymon. That which relates to the urine.

URINARY BLADDER, *Bladder*, *Vesi'ca Urinaria*, *Cystis*, *Ureocyst'is*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vulva in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesicule seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bax-fund*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The *posterior ligaments* or *recto-vesical folds—plicæ semilunares*—are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peri-

toneum;—of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface by a mucous membrane, which is sometimes raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term—*vessie à colonnes*. In the *bas-fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Trigone vésical* or *Vesical Triangle*, *Trigo'nus* seu *Trigo'nium vesicæ* seu *Lientan'di*, *Corpus trigo'nium*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Vesical uvula*, *U'vula vesicæ*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

URINARY CALCULI. The calculi which form in the urinary passages. See Calculi, urinary.

URINARY PASSAGES, (F.) *Voies urinaires*. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

URINATION, Micturition. M. Béraud elaborately defines it—a function, the result of which is the expulsion of matters principally solid, but held in solution, which have become improper for nutrition.

URINATORIUM, Urinal.

URINE, U'rina, οὐρον, U'ron, Ure'ma, Lot'ium, Lot, Lapis an'reus, Omich'ma, Recrementa seu Retriuentia vesicæ, Aqua pedum, Aqua, (Old Eng.) Stale, Lee, (Prov.) Herrin, Netting, Saag. An excrementitious fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *U'rina potas*, (F.) *Urine de la Boisson, Urine of drink*:—the latter *U'rina san'guinis*, (F.) *Urine de la digestion, Urine de la coction, Urine cuite, Cocted urine, Urine of digestion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*. That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1.003 to 1.009—*U'rina potas*. *Secondly*. That secreted after the digestion of a full meal; s. g. 1.020 to 1.028, or even 1.030—*U'rina chyli seu cibi*. *Thirdly*. That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine—*U'rina sanguinis*.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin; red colouring matter of the urine, (uroerythrin; carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 20 to 70. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers:

	Berzelius.	Lehmann.	Simon.	Marchand.
Urea,	45.10	49.68	33.80	48.91
Uric Acid,	1.50	1.61	1.40	1.59
Extractive matter.				
Ammonia, Salts,	36.20	28.95	42.60	32.49
and Chloride of Sodium.				
Alkaline Sulphates,	10.30	11.58	8.14	10.18
Alkaline Phosphates,	6.88	5.96	6.50	4.57
Phosphates of lime and magnesia,	1.50	1.97	1.59	1.81

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half. Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydra'ria*, ('υδωρ, 'water;') by a deficiency of urea, *Anazoti'ria*, (αζωτ, privative, and azote;) by a superabundance of urea, *Azoti'ria*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithu'ria*; and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Phosphu'ria Cerau'u'ria*, (κεραυος, 'potters' earth,') &c. &c. At times, a *pellicle* forms on the surface (*Crenor urinae*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubec'ula, nubes*,) towards its upper part, which is called *Enæore'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypostasis, Sedineu'tum*, &c., have been given. (See these various words.) The urine is often deserving of attention in disease; but it has been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of disease by simply inspecting it. See Uroscopy.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cows' urine, *U'rina Vaccæ, Allflower water*, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c., for example:—

URINE, ANÆMIC, U'rina anæ'mica. A term used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.—Becquerel.

URINE ARDENTE. Ardent urine—*n. Bloody, Hæmaturia*—*n. de la Boisson, Urine, hysterical*, see Urine—*n. Briqueté*, see Lateritious—*n. de la Coction*, see Urine.

URINE, CRUDE, (F.) Urine crue. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

URINE CRUE, Urine, crude—*n. Cuite*, see Urine.

URINE, CYSTIN'IC, Cystinu'ria. Urine containing cystine or cystic oxide in solution, or as a deposit.

URINE, DIABET'IC, *Uri'ua diabética*. Urine passed in *Diabetes mellitus*, *Melito'ria*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

URINE DE LA DIGESTION, see Urine.

URINE, DROPSICAL, is an ammoniacal urine, often containing much albumen and scarcely any urea.

URINE, DYSPEPTIC, has been found to precipitate tannin abundantly, and to soon putrefy.

URINE ÉPAISSE, Urine, mucilaginous.

URINE, FEBRILE, *Uri'ua febrilis*. Urine discharged in inflammation and inflammatory fever.

URINE, FILAMENTOUS, see Filamentous.

URINE, FLOCCULENT, (F.) *Urine floconnense*, is when the fluid is troubled by flocculi, suspended in it.

URINE, FERFRA'CEOUS, see Furfuraceous—*n. Floconnense*, Urine, flocculent—*n. des Gonttenz*, Urine, gouty.

URINE, GOUTY, (F.) *Urine des gonttenz*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

URINE HUILEUSE, Urine, oily.

URINE, HYSTERICAL, is clear, colourless, and similar to the *Urine de la Boisson*.

URINE, ICTERICAL, contains bile.

URINE, INCONTINENCE OF, Enuresis.

URINE OF INFLAMMATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE, INVOLUNTARY DISCHARGE OF, Enuresis.

URINE, JUMENTOUS, *Uri'ua jumento'sa* seu *jumento'ria*, (F.) *Urine Jumentense*. A term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

URINE LACTESCENTE, U. milky—*n. Laitense*. Urine, milky.

URINE, MILKY, (F.) *Urine lactescente ou laitense*. White and troubled urine.

URINE, MUCILAGINOUS, (F.) *Urine épaisse*. Urine containing much mucus.

URINE, NERVOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

URINE, OILY, (F.) *Urine huilense*, is that which pours like oil, or which has an oily pellicle at its surface.

URINE, OXAL'IC, *Oxali'ria*. Urine containing a salt of the oxalic acid.

URINE, PHOSPHORES'CENT, *Phosphori'ria*, *Phosphu'ria*. Urine which is luminous or phosphorescent.

URINE, PURPURIC, see Porphyria.

URINE, RICK'ETY, contains much phosphate of lime.

URINE, SANDY, *Arenosa urina*—*n. Stoppago* of, *Ischuria*—*n. Ténne*, Urine, thin.

URINE, THIN, (F.) *Urine ténne*. Urine that is transparent, slightly coloured, and but little dense.

URINEUX, Urinous.

URINIFEROUS, *Urinifer*, (F.) *Urinifère*, from *ovov*, 'urine,' and *fero*, 'I carry.' That which carries urine.

URINIFEROUS SUBSTANCE OF THE KIDNEY, see Kidney.

URINIFEROUS TUBES or DUCTS OF BELLINI, *Tubuli seu ductus uriniferi Bellini*, *Tubuli Bellini seu recti*, *Bellinia'ni Ductus*, *Bellinia'na*

Fistulae. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillae. The tortuous uriferous ducts are called *Tubes of Ferrein*, *Tubuli contortii* seu *Ferrei'ni*.

URINIP'AROUS, (F.) *Urinipare*, from *urina*, 'urine,' and *parere*, 'to produce.' An epithet for tubes in the cortical portion of the kidney, which prepare the urine.

URINODES, Urinous.

URINOM'ETER, from *ovov*, 'urine,' and *μετρον*, 'measure.' A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

URINOUS, *Urino'sus*, *Urino'des*, (F.) *Urineux*. Having the character of urine. Similar to urine.

UROCE'LE, *Œde'ma scroti urino'sum*, *Urochece'le*, *O'schece'le urina'lis*, from *ovov*, and *κληη*, 'a rupture.' A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Urochez'ia*, from *ovov*, and *χεζεν*, 'to go to stool.' A discharge of urine by the bowels.

UROCRASIA, Enuresis.

UROCRIS'IA, from *ovov*, and *κρινω*, 'I judge.' *Urocrite'ria*. A judgment formed either of the urine, or of disease after inspecting the urine.

UROCRITERION, Uroerisia.

UROCYSTIS, Urinary bladder.

UROCYSTITIS, Cystitis.

UROCYSTOCATARRHUS, Cystirrhœa.

URODIALYSIS, from *ovov*, and *δλυσις*, 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodialysis Neonatorum*; in the aged, *Urodialysis Senam*.—Schönlein.

URODOCHIUM, Urinal.

URODYN'IA, from *ovov*, and *δουνη*, 'pain.' Pain during the excretion of the urine.

UROEDEMA, Urapostema.

UROERYTHRIN, see Porphyria.

UROGENITAL, *Urogenita'lis*, *Gen'ito-u'ri'ary*, *Gen'ito-urina'ria*. Relating or appertaining to the urinary and genital apparatus—as the 'urogenital organs'—*Organa urogenita'lia*.

UROGENITAL SINUS, *Sinus uro-genita'lis*. A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urina'ria* and a *pars genita'lia*. The former, extending towards the urachus, is converted into the urinary bladder;

Urinometer.

whilst from the latter are formed the *vesiculae seminales* in the male, and the middle portion of the uterus in the female.—J. Müller.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG'IA, from *ουρον*, *λιθος*, 'a stone,' and *λογος*, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROLOGY, Urology.

UROMANT'IA, from *ουρον*, and *μαντεια*, 'divination.' The art of divining diseases by simple inspection of the urine; *Uroscopia*. One professing to be able to do this is called *Uromantetes*. Vulgarly, a *water-doctor*, *water-caster*.

UROM'IBLES, (F.) *Uromèle*, from *ουρα*, 'a tail,' and *μελος*, 'a limb.' A genus of monsters in which the two lower limbs are united, very incomplete, and terminated by a single foot, which is almost always imperfect, and the sole of which is turned forwards.—I. G. St. Hilaire.

UROMPH'ALUS, *Her'nia U'rachi*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, Urine.

URON'CUS, from *ουρον*, and *ογκο*, 'a swelling.' A urinary swelling.

URONOL'OGY, *Uronolog'ia*, *Urol'ogy*, *Urolog'ia*, from *ουρον*, and *λογος*, 'a description.' The part of medicine which treats of the urine.

UROPH'THISIS, Diabetes mellitus.

UROPLA'NIA, from *ουρον*, and *πλανη*, 'wandering.' The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropoie'sis*, from *ουρον*, and *ποιω*, 'I make.' *Secretio urinae* seu *lotii*. The secretion of urine by the kidney.

UROPOESIS, Uropoesis.

UROPYGION, Coccyx.

UROPYGIUM, *Cropton*.

URORRHODINE, see *Porphyria*.

URORRHAGIA, Diabetes.

URORRHŒA, Enuresis, Diabetes.

UROSCHEOCELE, Urocele.

UROSCOPIA, see *Uromantia*.

URO'SES, from *ουρον*, 'urine.' Diseases of the urinary organs.—Alibert.

UROSTEALITH, *Urosteal'ithos*, from *ουρον*, *στεαρ*, 'suet,' and *λιθος*, 'stone.' A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

UROUS ACID, Uric oxide.

UROZEMIA, Diabetes — u. Albuminosa, Kidney. Bright's disease of the — u. Mellita, Diabetes mellitus.

URRHODINE, see *Porphyria*.

URROSACINE, see *Porphyria*.

URTICA, *U. Dioica* seu *major* seu *hispidia*, *Pyrr'ethrum*, *Ad'icē*, *Common stinging nettle*, (Prov.) *Ettle*, (F.) *Ortie*. *Ord.* *Urticacæ*. *Ser. Syst.* *Monœcia Tetrandria*. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbutic properties. The pain produced by its sting is well known, but it is not to be compared to the torture occasioned by *Urtica stim'ulans*, and *U. crenulata* of India; and, still less, to *Urtica nrentiss'ima* of Timor, which is called by the natives *Daonn Setan*, 'Devil's leaf,' on account of the persistence and severity of the pain.

URTICA BALEARICA, *U. pilulifera* — u. *Crenulata*, see *Urtica* — u. *Dioica*, *Urtica* — u. *Hispidia*, *Urtica* — u. *Iners magna foetidissima*, *Galeopsis* — u. *Major*, *U. dioica* — u. *Minor*, *U. urens* — u. *Mortua*, *Lamium album*.

URTICA PILULIF'ERA, *U. Pilulo'sa* seu *Roma'na* seu *Balea'rica*, *Pill-bearing Nettle*, (F.) *Ortie*

Romaine. The seed was formerly given in diseases of the chest.

URTICA PILULOSA, *U. pilulifera* — u. *Romana*, *U. pilulifera* — u. *Stimulans*, see *Urtica*.

URTICA URENS, *U. minor*, *Dwarf nettle*, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

URTICA URENTISSIMA, see *Urtica*.

Nettles have been used as stimulants to paralytic limbs.

URTICAIRE, *Urticaria*.

URTICA'RIA, from *urtica*, 'a nettle,' (*uro*, 'I burn;') *Enanthesis urtica'ria*, *Ure'do*, *Scorlatina* seu *Febri's* seu *Pur'pura urtica'ta*, *Cnid'o'sis*, *Urtica'ria porcel'lana*, *Eranthe'ma urtica'tum*, *Epiny'ctis prurigin'o'sa*, *Febri's rubra prurigin'o'sa*, *Saltans rosa*, (F.) *Urticaire*, *Pièvre Ortie*, *Porcelaine*, *Nettle-rash*, *Nettle-springs*; vulgarly *Hives*, *Bald Hives*; from *urtica*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint: — *Urtica'ria febrilis*, *U. erant'ida*, *U. perstans*, *U. confer'ta*, *U. subcuta'nea*, and *U. tubero'sa*.

URTICARIA PORCELLANA, *Essera*, *Urticaria*.

URTICA'TIO, *Cnid'o'sis*, *Urtica'tion*, from *urtica*, 'a nettle.' A sort of flagellation, with nettles; — used with the intention of exciting the skin.

URUCU, *Terra Orleana*.

URYLIC ACID, Uric acid.

USNEA, *Lichen saxatilis* — u. *Florida hirta*, *Lichen plicatus* — u. *Hirta*, *Lichen plicatus* — u. *Plicata*, *Lichen plicatus*.

USSACU, *Hura Brasiliensis*.

USTILAGO, *Ergot*.

USTIO, *Burn*, *Ustion*.

USTION, *Ust'io*, *Causis*, from *urere*, *ustum*, 'to burn.' The act of burning or of applying the actual cautery. Also, the effect of cauterization; a burn.

USTULA'TIO, *Ustulo'tion*. Same etymon. A pharmaceutical operation by which a substance is dried by heat. It is often restricted to the roasting of ores to drive off the volatile matters, as in the case of arsenic.

USUALIA, *Officialis*.

USUS, *Habit*.

UTER, *Uterus*.

UTERI ADSCENSUS, *Hysteria* — u. *Anteversio*, *Hysteroloxia anterior* — u. *Carcinoma*, *Metrocarcinoma* — u. *Convulsivus morbus*, *Lorind matricis* — u. *Coryza*, *Leucorrhœa* — u. *Exulceratio*, *Hysterelocosis* — u. *Flexio*, *Hysteroloxia* — u. *Inclinatio*, *Hysteroloxia* — u. *Obliquitas*, *Hysteroloxia* — u. *Pronatio*, *Hysteroloxia anterior* — u. *Pruritus*, *Nymphomania* — u. *Reflexio completa*, *Hysteroloxia posterior* — u. *Retroversio*, *Hysteroloxia posterior* — u. *Rheuma*, *Leucorrhœa* — u. *Ulcus*, *Hysterelocosis* — u. *Versio incompleta*, *Hysteroloxia*.

UTERINE, *Uteri'mis*, from *uterns*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Arte'ria uteri'na hypoga's'trica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately

or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE BOUGIE, Sound, uterine.

UTERINE BROTHER. One born of the same mother, but of a different father.

UTERINE GLANDS, Utricular glands.

UTERINE MUSCLE OF RUYSCHE consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERINE SOUND, Sound, uterine.

UTERINUS FRATER. In law, a brother by the mother's side.

UTERO-ABDOMINAL SUPPORTER, see Belt, Russian.

UTERO-GESTATION, Pregnancy.

UTEROMANIA, Nymphomania.

UTERUS, *ουτῆρ, Uter, Utriculus, Vulva, Loci, L. muliebres, Vulva, Venter, Conceptaculum, Matrice, Aram seu Ager nativæ, Hyp'teru, Metra, Steru, Antigus, Delphys, Alveus, Epomphulium, tinster, Mutter, Nedyn, Postrema, the Womb, (Sc.) Weam, (Prov.) Wem, (F.) Matrice, Sein.* The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid; it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*, to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os Uteri, Os Tinæ, Os uteri externum, Orificium vaginæ*. At the point where the body of the uterus is continuous, below, with the neck, the cavity is slightly constricted, forming what is sometimes named the *internal orifice, Os uteri internum, Os internum, Isthmus seu ostium uteri, Orificium uterinum*. Between these is the *Canallicus cervicis*.

The cavity of the uterus is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. These folds of the peritoneum are sometimes called, respectively, the *anterior* and the *posterior* ligaments. The former are also named the *vesico-uterine* and the latter the *recto-uterine* folds or *plicæ semilunares*. It forms, also, the broad *ligaments of the uterus, Ligamenta lata, Ala respertiliuniv, Retia Uteri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed

from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *Uterine Sinuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen—u. Anteversion of the, Hysteroloxia anterior.

UTERUS BIFIDUS. A double uterus. One separated into two cavities.

UTERUS DUPLEX, Dihysteria—u. Hour-glass contraction of the, *Chaton*—u. *Inclinatus, Hysteroloxia*.

UTERUS, IN'RITABLE, *Neuralgia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure, *Metryperæthesia*; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See Hysteralgia.

UTERUS, INVERSION OF THE, *Inversio Uteri, Metronastrophæ, Edoptosis Uteri inversa, (F.) Inversion on Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

UTERUS MASCULINUS, see Ejaculatory ducts—u. Obliquus, Hysteroloxia—u. Retroversion of the, Hysteroloxia posterior.

UTERUS, RUPTURE OF THE, *Metrorrhæxis, Hysterorrhæxis, Ruptura seu Perforatio Uteri, Laceration of the Womb, (F.) Rupture on Déchirure de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, see Semicircular canals.

UTRICLE, PRIMORDIAL, *Utriculus primordialis*. A delicate membrane, of protein composition, which lines the cell wall of vegetable structures, and from the exterior of which the layer of cellulose is secreted.

UTRICULAR, *Utricularis*; from *utriculus*, (diminutive of *uter, utris*.) 'a small bag or bottle.' Relating to or resembling a small bag or bottle.

UTRICULAR GLANDS, *Glandulæ utricularæ* seu *uterinæ*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, see Ejaculatory ducts, Uterus—u. Communis, see Semicircular canals—u. Læteus, Receptaculum chyli—u. Primordialis, Utri-

cle, primordial—u. Prostaticus, see Ejaculatory ducts.

UVA, Uvula, see *Vitis vinifera*—u. Inversa, Paris—u. Lupina, Paris—u. Passa, see *Vitis vinifera*—u. Ursi, see *Arbutus uva ursi*—u. Vulpina, Paris.

UVE CORINTHIACÆ, see *Vitis Corinthiaca*.

UVE PASSÆ, *Rhuges, Dried Grapes, Raisins*, see *Vitis vinifera*.

UVE PASSÆ MAJORES, see *Vitis vinifera*—u. Passæ minores, see *Vitis Corinthiaca*—u. Passæ sole siccata, see *Vitis vinifera*.

UVARIA TRILOBA, see *Carica papaya*.

UVATIO, Ceratocele, Staphyloma.

UVEA, from *uva*, 'an unripe grape.' *Tu'nica acino'sa* seu *acini'for'mis* seu *uva'lis* seu *acini'lis* seu *uvifor'mis* seu *rhagoïdes* seu *urea* seu *perforata*, *Membrana urea, Rhagoïdes, Rhox*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it. See Iris.

UVEA, COMMISSURE OF THE, Ciliary ligament.

UVÉE, Uvea.

UVEITIS; a word of hybrid formation; from *urea*, 'the uvea,' and *itis*, denoting inflammation; properly, *Rhagoïditis*. Inflammation of the uvea. See Iritis.

UVIGENA, Uvula.

UVIGERA, Uvula.

UVULA, diminutive of *uva*, 'a grape.' *Pinnaculum fornicis gutturalis, Ura, Staphylé, Tintinnaculum, Columella, Cion, Ci'onis, Gargareon, Colum'na oris, Gurgulio, Interseptum, Processus* seu *Cartilago Uvifer, Uvig'ena, Uvig'era, Pap of the Throat, Himas, Plectrum, Sublingua, Sublinguim*, (Sc.) *Pap of the Hass*, (F.)

Luette. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the *azygos uvulæ* muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle, *Uvula cerebelli*. It is on the median line, and behind the nodulus.

UVULA, see Vermiform process inferior—u. Cerebelli, see Uvula—u. Decidua, Staphylœdema—u. Relaxata, Staphylœdema—u. Vesica, see Urinary bladder—u. Vesical, see Urinary bladder.

UVULAR, *Uvula'ris*, from *uvula*. That which belongs to the uvula.

UVULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, so called from the flowers hanging like the uvula [?], *Ruscus hypoglossum*.

UVULARIA PERFOLIATA, *Smaller Bellwort*; indigenous; Order, Melanthaceæ; flowering in May and June. The root, when fresh, is subacrid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

UVULARIA GRANDIFLORA and *U. Sessilifolia* have similar properties.

UVULITIS, a word of hybrid formation, from *uvula*, and *itis*, denoting inflammation. *Angina uvula'ris, Staphylitis, Cionitis, Inflammatio uvulæ*, (F.) *Inflammation de la Luette, Falling dencu of the Palate*. Inflammation of the uvula. When to a slight degree, *Hypostaphylitis*.

V.

VACCIN, see Vaccina.

VACCINA, *V. primig'ena* seu *vaccinato'ria* seu *antivariolo'sa, Vaccin'ia, Vari'ola vaccina, V. vaccin'ia* seu *tuto'ria* seu *tutrix, Exanthe'ma vaccina* seu *antivariolo'sum, Syn'ocha vaccina, Em'phlysis vaccina inser'ta, Vacci'ola, V. sentella'ta, V. vera, Vari'olæ tuto'riæ, Cow-pox, Kine Pock, Inoc'ulated Cow-pox*, from *vacca*, 'a cow,' (F.) *Vaccine*. The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken by milking the animal; and which eruption they called *Cow-pox*. This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus, Virus Vaccin'um*, (F.) *Vaccin* or the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated that it is nearly as efficacious when obtained from the human vesicle. The characteristic of cow-pox eruption is:—a semi-transparent, pearl-coloured vesicle,

with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cow-pox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular or spurious cow-pox*. If the erup-

tion runs speedily to a height, has an areola too early, is irregular at its edges, and contains pus instead of a limpid fluid,—it cannot at all be depended upon.

Small-pox occurs, occasionally, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they gave it the name Varioloid. It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation*. Vaccination is now practised everywhere, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection *revaccination* may be occasionally necessary.

VACCINA ANTIVARIOLOSA, Vaccina—v. Primi-gena, Vaccina—v. Tutoria, Vaccina—v. Tutrix. Vaccina—v. Vaccinatoria, Vaccina.

VACCINAL, Vaccine.

VACCINATION, *Vaccinatio*, from *vacca*, 'a cow'; *Cow-pox inoculation*, *Jenne'rian inoculation*. An operation which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cow-pox vesicle*, for vaccination, is about the 7th or 8th day, before the appearance of the areola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VACCINATOR, *Vaccinist*. One who inoculates for the cow-pox.

VACCINE, Vaccina.

VACCINE, *Vaccinus*, *Vaccinellus*, (F.) *Vaccinal*; same etymon. Relating or appertaining to vaccination, as the 'vaccine vesicle,' 'a vaccine physician.'

VACCINELLA. A term employed by some to designate spurious cow-pox. *Vaccinellus*, *Vaccinella spuria* seu *leprosa*, (F.) *Vaccinelle*, *Vaccinöde*.

VACCINIA, Vaccina—v. *Palustris*, *Vaccinium oxycoccos*.

VACCINIST, Vaccinator.

VACCINIUM MACROCARPON, see *V. oxycoccos*.

VACCINIUM MYRTILLUS, either corrupted from *hyacinthus*, or, and more probably, *baccinium*; from *bacca*, 'berries,' in allusion to its fruit. *Vitis idæa myrtillus*, *Vaccinia myrtillus*, *Vaccinium nigrum*, *Myrtle Berry*, *Bilberry*, *Blueberry*, *Whortle-berry*, *Black Whortle*, (Sc.) *Blueberry*, (Prov.) *Hurtleberry*, *Whimberry*, (F.) *Airelle Anglaise*, *Raisin de Bois*. *Ord.* Vacciniæ. *See*, *Syst. Ortandria Monogynia*. The berries—*Bacca Myrtillorum*—are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and sub-astringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, *V. myrtillus*.

VACCINIUM OXYCOCOS, *Oxycoccos*, *O. palus-*

tris, *Schollera oxycoccos*, *Vaccinia palustris*, *Vitis idæa palustris*, *Moorberry*, *Cranberry*, *Mossberry*, *Swamp Redberry*, *Sourberry*, (F.) *Connebergy*. The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American Cranberry is from *Vaccinium macrocarpon*.

VACCINIUM PENNSYLVANICUM, *Low Blueberry*. The leaves and bark of the root are astringent.

VACCINIUM PUNCTATUM, *V. vitis idæa*—v. *Resinosum*, *Gnylussacia resinosa*.

VACCINIUM STAMINEUM, *Buckberry*, *Squaw Huckleberry*, *Deerberry*. The leaves of these plants are astringent.

VACCINIUM VITIS IDÆA, *V. punctatum*, *Vitis idæa punctata*, *Am'pelos idæa*, *Red Bilberry*, (Sc.) *Brawling*, *Alpine Cranberry*, *Whortleberry*, *Cocherry*, (F.) *Airelle ou Conneberge punctée*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of *Vaccinium*.

VACCINOÏDE, Vaccinella.

VACCINOIS, Vaccinella.

VACCINUS, Vaccine.

VACCIOLO, Vaccina—v. *Leprosa*, *Vaccinella*—v. *Scutellata*, Vaccina—v. *Spuria*, *Vaccifella*—v. *Vera*, Vaccina.

VACILLATIO, *Titubatio*, from *vacillare*, 'to waver.' Staggering; waddling—*claudicatio am'lica*.

VACILLATIO DENTIUM, *Odontoseisis*.

VAGIN, Vagina.

VAGINA, 'a sheath,' *V. mulie'bris* seu *uteri-na* seu *U'teri* seu *Penis*, *Sinus mulie'bris* seu *Pud'oris* seu *Puden'di*, *Col'ens*, *Peris*, *Perin*, *Colpos*, *Vulvo-uterine canal*, (F.) *Vagin*, *Conduit de la pud'ev*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Anus*, with the vulva; by the other, *Fornix* seu *Fundus*, with the womb, *Pars* seu *Portio vagin'lis u'teri*, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and earuncula myrtiliformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulo-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term *Vagina* or sheath, *Theca*, is extended to many parts, which serve as envelopes to others.

Sheath, (F.) *Gaine*, is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA CORDIS, Pericardium—v. *Femoris*, *Fascia lata aponeuosis*—v. *Funiculi Umbilicalis*, see *Funiculus umbilicalis*—v. *Glissonii*, *Capsule of Glisson*—v. *Malleolaris externa*, *Retinaculum tendinum perime'orum*—v. *Muliebris*, *Vagina*—v. *Muscularis*, *Perimysium*—v. *Nervorum*, *Neurilemma*—v. *Penis*, *Vagina*—v. *Pili*, see *Hair*—v. *Portæ*, *Capsule of Glisson*—v. *Uterina*, *Vagina*.

VAGINA OF THE VENA PORTA, *Sheath of the Vena Porta*, (F.) *Gaine de la Veine porte*, is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, *Bursæ mœneæ*.

VAG'INAL, *Vaginn'lis*, from *vagina*, 'a sheath.' Relating or pertaining to a sheath.

VAGINAL ARTERY. This exists, as a matter of

course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

VAGINAL BILIARY PLEXUS. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

VAGINAL BRANCHES OF THE VENA PORTA are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form the *vaginal plexus*. There are, also, *vaginal branches*, and a *vaginal plexus* formed by the hepatic artery.

-VAGINAL COAT OF THE EYE, see Eye.

VAGINAL COAT OF THE TESTICLE, *Tunica Vaginalis* seu *Elytroïdes* seu *Elytraïdes*, is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tunica vaginalis propria* and *Tunica vaginalis reflexa*. Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

VAGINAL GANGLIA, see Spermatic ganglion.

VAGINAL PLEXUS, see Vaginal branches of the vena porta.

VAGINAL PROCESS OF THE TEMPORAL BONE, (F.) *Apophyse vaginale* ou *engainante*. *Gaine de l'apophyse styloïde*, Chaton, is a bony crista, which embraces the base of the styloid process.

VAGINAL PULSE, Pulse, vaginal.

VAGINITIS, Leucorrhœa (vaginal.)

VAGINO-VESICAL, Vesico-vaginal.

VAGISSEMENT, Cry, Vagitus.

VAGITUS, (F.) *Vagissement*. The cry of the new-born child. *Squalling*.

VAGITUS UTERINUS. The cry of the child in utero.

VAGUS NERVUS, Pneumogastric.

VAIRON (F.), *Dispar oculis*. One who has eyes of different colours. It also means a *wall-eyed* animal, or one whose iris is surrounded by a whitish circle.

VAISSEAU, Vessel — *v. Sanguin*, Blood-vessel.

VAISSEAUX CAPILLAIRES, Capillary vessels — *v. Chylifères*, Chyliferous vessels — *v. Lactés*, Chyliferous vessels — *v. Lactifères*, Lactiferous vessels — *v. Umbilicaires*, Umbilical vessels — *v. Tourbillonnés*, Vasa vorticosa.

VALANIDA, Fagus sylvatica.

VALANTIA APARINE, Galium aparine.

VALERIAN, AMERICAN, Cypripedium luteum, Valeriana pauciflora — *v. Garden*, Valeriana ph — *v. Greek*, Polemonium reptans — *v. Official*, Valeriana — *v. Wild*, Senecio aureus, Valeriana, *V. pauciflora*.

VALERIANA, *V. officinalis* seu *minor*, *Leucolachnum*, Wild or *Officinal Valerian*. *Ord. Valerianaceæ*. *Ser. Syst. Triandria Monogynia*. The root, *Valeriana* (Ph. U. S.), has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol. The distilled oil is official in the Pharmacopœia of the United States.

VALERIANA CAPENSIS, a South African species, has similar virtues.

VALERIANA CELTICA, *V. Saxatilis*, *Spica Celtica* seu *Celtica Dioscoridis* seu *Alpina*, *Nardus Celtica*, *Salmunca*, *Nardum Gallicum*, *Celtic Nard*, (F.) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative and diuretic. It has a moderately strong smell, and a warm, bitterish, subacid taste.

VALERIANA DENTATA, *V. locusta*, *Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA MAJOR, *V. ph — v. Locusta*, *V. dentata* — *v. Minor*, *Valeriana* — *v. Officialis*, *Valeriana*.

VALERIANA PAUCIFLORA, *Americana* or *Wild Valerian*, and *V. sylvatica*, have the properties of the other Valerians.

VALERIANA PHU, *V. major*, *Garden Valerian*, (F.) *Grande Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

VALERIANA SAXATILIS, *V. celtica* — *v. Spica*, *Nardus Indica* — *v. Sylvatica*, see *V. pauciflora*.

VALÉRIANE, GRANDE, *Valeriana ph.*

VALET À PATIN (F.), *Valletta Patini*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALÉTUDINAIRE, Valetudinary.

VALETUDINARIUM, Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETU'DINARY, *Valitudinarian*, *Valitudinarius*, *Inval'idus*, (F.) *Valétudinaire*, from *valetudo*, 'health,' *valeo*, 'to be well.' One of delicate health. One subject to frequent diseases. An *Inval'id*.

VALETUDO, Sanitas — *v. Adversa*, Disease — *v. Bona*, Sanitas — *v. Commoda*, Sanitas — *v. Secunda*, Sanitas.

VALGUS, see Cnemosciosis and Kyllosis.

VALIGA, Tinctura jalapii.

VALITUDO, Sanitas.

VALLECUA, Valley — *v. Unguis*, see Nail.

VALLEY, *Vallecula*, *V. Reilii*, (diminutive of *vallis*, 'a valley.') (F.) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLUM. The eyebrow or supercilium. Also, a species of bandage. — Galen.

VALS, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Valvula*, *Dielis*, (F.) *Valvule*, from *valvæ*, 'folding-doors,' itself from *volvo*, 'I fold up.' A small door. Any membrane or duplication of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be, — to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ileo-cæcal valve*, &c.

VALVE OF FALLOPIUS, Bauhin, valve of — *v. Ileo-cæcal*, Bauhin, valve of — *v. Ileo-colic*, Bauhin, valve of — *v. of Tulpius*, Bauhin, valve of — *v. of Varolius*, Bauhin, valve of.

VALVES, KERKINGIAN, *Valvula conniventes* — *v. Semilunar*, *Sigmoid valves*.

VALVULA, Valve — *v. Cæci*, Bauhin, valve of — *v. Cerebelli*, *Valvula Vicusonii* — *v. Coli*, Bau-

hin, valve of—v. Foraminis ovalis, Ovalis fossa—v. Guiffartiana, see Thebesius, veins of—v. Plei, Bauhin, valve of—v. Magna Cerebri, V. Viussenii.

VALVULA SEMILUNARIS, *Plica Semilunaris* seu *lunata*, *Membrana semilunaris conjunctiva*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membrana nictitans* seu *Palpebra terttia*.

VALVULA TARINI, Velum medullare posterius—v. Thebesii, see Thebesius, veins of—v. Vaginae, Hymen—v. Venæ magnæ, see Thebesius, valve of.

VALVULA VIENSIENSIS, *V. cerebelli* seu *Wittisiana* seu *magna cerebelli*, *Velum Vienseisii* seu *interjectum cerebelli*, *V. apophysii vermiformi oblongum*, *V. medullarè* seu *medullarè anticum* seu *anterius*, *Locular ventriculi quarti superior*, (F.) *Valvula de Vienseis*, *Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the Aqueductus Sylvii and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Processus ad Testes*, *Columnæ Valvulæ Vienseisii* or *Oblique inter-cerebrali Commissure*.

VALVULA WILLISIANA, Valvula Vienseisii.

VALVULÆ BICUSPIDALES, Mitral valves.

VALVULÆ CONNIVENTES, *V. C. Kerkringii*, *Plicæ conniventes*, *Kerkringian valvæ*. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be, to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyliferous vessels.

VALVULÆ CORDIS, Ostiola cordis—v. Cordis mitrales, Mitral valves—v. Trigloehines, Tricuspid valves—v. Trisulcæ, Tricuspid valves.

VALVULÆ, Valve—*v. d'Estache*, Eustachian valve—*v. de Pyloro*, see Pylorus—*v. de Vienseis*, Valvula Vienseisii.

VALVULES, *V. Épiscopales*, Mitral valves—*v. Sigmoides* ou *Semilunaires*, Sigmoid valves.

VANDELLIA DIFFUSA. A native of Brazil, Guiana and Isle of France; *Order*, Scrophulariaceæ; is used there as an antibilious emetic and antiperiodic; and is regarded as an efficacious remedy in malignant fever and dysentery, especially in cases connected with a disordered state of the liver.

VANELLOE, Vanilla.

VANILLA, *Banilla*, *Banilas*, *Banilloës*, *Banilla*, *Benzilvil*, *Arvens aromatics*, (F.) *Vanille*, *Baume de Vanille*. The *Vanilloe*—*Siliqua vanillæ* seu *Banillæ* seu *Vaniglia* seu *vanillæ* seu *Arvens aromatics*—is a long, flatish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epiphytum Vanilla*, *Vanilla aromatica* seu *Mexicana*, and other species. *Family*, Orchidaceæ. *Sec. Syst.* Gynandria Monandria. Vanilloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VANILLA AROMATICA, see Vanilla.

VAPEURS, Hypochondriasis, Hysteria.

VAPOR SANGUINIS, Gaz sanguinis.

VAPORARIUM, *Atmistèrion*, *Locusticium*, *Pyria*, *Pyriatèrium*, *Vapour bath*, from *vapor*, 'steam.' A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath*, the vapour is produced by

throwing water over hot stones. Its temperature is from 122° to 145°.

VAPORARIUM, Hypocaustum, see Stove.

VAPORATIO, Evaporation.

VAPORES UTERINI, Hysteria.

VAPOUR, Flatulence—v. Bath, Vaporarium.

VAPOURISH, Hypochondriac, Hysterical.

VAPOROUS, Windy.

VAPOURS, Hypochondriasis, Hysteria.

VAPOURY, Hypochondriacal, Hysterical.

VARA, *Barre*.

VAREC, Kelp—*v. Vésicieux*, *Fucus vesiculosus*.

VARENI, Ambulo-flatulentus, Gout (wandering.)

VARICE, Varix.

VARICELLA, (diminutive of *Variola*, Small-pox,) *Emplyphysis* seu *Ecanthema* seu *Synochus varicella*, *Variola lymphatica* seu *spuria* seu *sylyvestris*, *Variolæ nothæ* seu *illegitimæ* seu *colaticæ* seu *puellæ*, *Pseudo-variolæ*, *Æollion*, *Æollium*, *Chicken pox*, (F.) *Varicelle*, *Pétite vérole volante*, *Vérolette*, *Fausse varole*. A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and congregate into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated.

1. The *V. lentiformes*, or *lenticular chicken pox*, which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the *common chicken pox*. 2. The *Varicella coniformis*, *Pemphigus varioloides*, *Variola lymphatica*, *Hydrachnia*, *Conoid'ul Chicken Pox*, *Seine Pox*, *Water Pox*, *Water Jags*, in which the vesicles are generally acuminate, and the fluid pellucid throughout; and, 3dly, the *Varicella globularis* or *Hices*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Hornpox is a popular variety of variella.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Variella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required. See Varioloid.

VARICELLA VARIOLOIDEA, Varioloid.

VARICELLAR FEVER, see Varioloid.

VARICIFORMES PARASITATÆ. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

VARICOBLEPHARON, from *varix*, *varicis*, and *βλεφαρον*, 'eyelid.' A varicose tumour of the eyelid.

VARICOCELÆ, from *varix*, *varicis*, and *κελη*, 'a tumour;' *Oscheneclæ varicosæ*, *Her'nia varico'sa*, *Ramez varico'sus*, *Spermatocele*, *Circocèle*. A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to

tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the serotum, so as to render the remainder of the serotum a natural bandage. This plan has been found effectual.

VARICOMPHALUS, from *varix*, *varicis*, and *ομφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; cirsiomphalus.

VAR'ICOSE, *Varicosus*, (F.) *Variqueux*. From *varix*, *varicis*. Affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*, a *varicose ulcer*, that is, one kept up by *varices*.

VARICOSTAS, see *Varix*—v. *Conjunctivæ*, *Cirsophthalmia*.

VARICOSITY, see *Varix*.

VARIC'ULA, *Varix parva*. Diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

VARIOLA, *Variolæ*, *V. veræ*, *Varioli*, *Emphyseis Variola*, *Euphlog'gia*, *Chaspiæ*, *Pestis seu Febris variolosa*, *Æolec'thyma*, *Small-Pox*, *Pox* (N. of England); from *varius*, 'spotted,' or from *vari*, 'pimples,' (F.) *Variolæ*, *Petit Vérole*, *Picote*. A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this *inoculated small-pox*—*Variola inserta*—communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In **VARIOLA DISCRETA**, *Emphyseis variola discreta*, *Variola discreta benigna*, *Variolæ regulares seu discretæ*, *Distinct Small-pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In **VARIOLA CONFLUENS**, *Emphyseis variola confluens*, *Variolæ regulares confluentes*, *Vesiculæ Divæ Bar'baræ*, *Vésicules de Sainte-Barbe*, *Confluent Small-pox*, the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear, towards the period of the *secondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches, being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent, or corymbose variety—*Variola corymbosa*.

VARIOLA ANBOINENSIS, *Frambœsia*—v. *Corymbosa*, see *Variola*—v. *Inserta*, *Variola* (by inoculation)—v. *Lymphatica*, *Varicella*—v. *Mitigata*, *Varioloid*.

VARIOLA sine VARIOLIS, *Variolous Fever*. These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

VARIOLA SPURIA, *Varicella*—v. *Vaccina*, *Vaccina*—v. *Vaccinatorum*, *Varioloid*.

VARIOLÆ, *Variola*—v. *Equina*, see *Grease*—v. *Illegitima*, *Varicella*—v. *Modificatæ*, *Varioloid*—v. *Nothæ*, *Varicella*—v. *Pucellæ*, *Varicella*—v. *Sylvestris*, *Varicella*—v. *Tutoriæ*, *Vaccina*—v. *Veræ*, *Variola*—v. *Volatile*, *Varicella*.

VARIOLATION, *Inoculation* (*Small-pox*.)

VARIOLE, *Variola*.

VARIOLI, *Variola*.

VARIOLIQUÆ, *Variolous*.

VARIOLOID, *Variolous*, *Varioloides*, *Varioloida modificata* seu *mitigata* seu *vaccinatorum*, *Varicella* (of some), *Varicella Varioloidæa*, from *variola*, *small-pox*, and *eidōs*, 'form,'—resembling *small-pox*. This is, really, *small-pox*, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is *small-pox* is proved by the fact, that matter, taken from a varioloid pustule, will communicate *small-pox* to one who has never been vaccinated. It is, almost always, a milder disease than *small-pox*; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

Occasionally, when varioloid is epidemic, *varioloid* or *varicellar fever* occurs without the eruption. This is the *varicellæ siue varicellia* of Mr. Erasmus Wilson, who calls varioloid, *varicella*.

VARIOLOID FEVER, see *Varioloid*.

VARIOLOIS, *Varioloid*.

VARIOLOUS, *Variolous*, (F.) *Variolique*. Relating or belonging to variola.

VARIQUEUX, *Varicose*.

VARIX, genitive *varicis*, *Phlebeury'sma*, *Phlebec'tasis*, *Hernia seu Ectasia venarum*, *Angiectasia venosa*, *L'ia*, *Cirsus*, *Cedma*, *Varicose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist,'—on account of the sinuosities of varicose veins. Dilatation of a vein; *Varicositas*, *Varicosity*. Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

VARIOLI, *BRIDGE OF*, *Pons Variolii*.

VARUS, *Acne*, *Ionthus*, see *Entogonyancon* and *Kyllosis*—v. *Mentagra*, *Sycosis*.

VAS, *Vessel*, *Penis*—v. *Deferens mulieris*, *Tuba Fallopiana*—v. *Urinarium*, *Ureter*.

VASA ABERRANTIA. Peculiar ramifications of the biliary duct in the liver are so called by E. H. Weber.—Kölliker.

VASA ABSORBENTIA, Absorbent vessels—*v.* Afferentia, see Afferent and Efferent—*v.* Capillaria, Capillary vessels—*v.* Chylifera seu Chylofera, Chyliferous vessels.

VASA CHYLOPOËTICA URINIFERA. Blood-vessels, which, according to Lippi, convey drinks from the chyliferous vessels to the renal veins.

VASA EFFERENTIA, see Efferent—*v.* Exhalantia, Exhalant vessels—*v.* Hydragoga, Lymphatic vessels—*v.* Inferentia, see Afferent and Efferent—*v.* Lactea, Chyliferous vessels, Lactiferous vessels—*v.* Meningea, Meningeal vessels—*v.* Sedalia, Hæmorrhoidal vessels—*v.* Lymphatica, Lymphatic vessels—*v.* Nutrientia, Vasa vasorum—*v.* Nutritiva, Vasa vasorum—*v.* Recta, see Rete testis—*v.* Resorbentia, Absorbent vessels, Lymphatic vessels—*v.* Serosa, see Capillary vessels.

VASA VASORUM, *V nutritiva seu nutritiva*. Small vessels that supply larger. However minutely a vessel is traced, its parietes will be found supplied with blood for its nutrition by a smaller vessel.

VASA VORTICOSA, (F.) *Vaisseaux tourbillonnés, Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

VASCOA AMPLEXICAULIS. A South African shrub, *Nat. Ord. Leguminosæ*, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phthisis, and are a good substitute for liquorice.

VASCULA SERPENTINA, see Testicle.

VASCULAR, *Vascularis, Vasculosus, Angi'al*, (F.) *Vasculaire*, from *vas, vasis*, 'a vessel,' *vasculum*, 'a little vessel.' That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Full of vessels. Bichat gave the name *Vascular system, Systeme vasorum, Hæmatologica*, to the blood-vessels, and of this he made two divisions. 1. The *Arterial system, or System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart, and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system or Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR LAYER, see *Tache embryonnaire*—*v.* Radicals, Radical vessels—*v.* Substance of the Kidney, see Kidney—*v.* System, see Vascular—*v.* System, intermediate, Capillary system—*v.* System, peripheral, Capillary system—*v.* Tumour, see Hamorrhoids.

VASCULARITY, *Vascularitas*, (F.) *Vascularité*. The state of being vascular, or largely supplied with vessels.

VASCULUM, Penis, Vessel.

VASCULUM ABERRANS, *Appendix to the Epididymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, Cup.

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and **VASTUS INTERNUS** are

two considerable, fleshy masses, which form part of the Triceps cruris.

VASUM, Vessel.

VATER, AMPULLA OF, (F.) *Ampoule de Vater*. An ampulla formed by the orifice of the pancreatic duct in the duodenum.

VATER, CORPUSCLES OF, Corpuscles, Pacinian.

VATERIA INDICA, see Copal.

VATICINIUM CHIROMANTICUM, Chiromancy.

VAULT, (old F. *Vaulte*), 'a round or turn;' from *volvere, volutum*, 'to turn;' *Fornix, Cim'era*, (F.) *Voute*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium* or the upper part of the skull,—the *Palatine vault or roof of the mouth*, &c., &c.

VAUQUELINE, Strychnium.

VEAL TEA. This may be made in the same manner as beef tea, by using a pound of fillet of *veal*, free from fat and sliced, and a pint and a half of *boiling water*; and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

VECORDIA, Idiotism.

VECTIS, Lever—*v.* Elevatorius, Elevator—*v.* Triploides, Elevator, triploid.

VECTOR CANAL, Tube, Fallopiian.

VEGETALITY, *Vegetalitas*, (F.) *Végétalité*. The aggregate of physiological phenomena, which exist alone in the vegetable, but are common to both plants and animals. See Animality.

VEGETARIAN, see Vegetarianism.

VEGETARIANISM. Same etymon as Vegetation. A modern term, employed to designate the view, that man, for his full mental and corporeal development, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian*.

VÉGÉTATIVE, Vegetative.

VEGETATION, *Vegetatio*, 'growing like a plant,' from *vego* or *vigo*, 'I flourish.' A morbid production, which rises as an excrescence on the valves of the heart, in syphilis, &c.—as the *Corniflower excrescence*, &c. The term is also applied to the fleshy granulations or *Hypertrocoses*, which sometimes arise at the surfaces of wounds or ulcers.

VEGETATIVE, *Vegetativus*, (F.) *Végétatif*, same etymon as the last. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVE LAYER, see *Tache embryonnaire*.

VEGETIVUS, Vegetative.

VEHICLE, *Vehiculum, Oche'ma, Constit'vum*, (F.) *Véhicule*, from *vehere*, 'to carry.' Anything which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VÉHICULE, Vehicle.

VEILED PUFF, see Cavernous respiration.

VEIN, *Vena*, diminutive *ven'ula*, *Phlebs, Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of black blood from every part of the body to the heart. They are found wherever there are arteries, and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the cava and the coronary vein. 2. The *Abdominal*

venous system, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta* or the *Portal System*. See *Porta*. The veins form two sets, one *deep-seated*, *Venæ satel'ites*, *V. concom'ites*, which accompany the arteries; the other *superficial* or *subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres—the *proper membrane*; the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

I. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

- | | | | | | | | | | |
|----------------------|--|--------------------------|--------------|---|---------------------------|----------------------|--------------|-----------------------|---------------------|
| 1. Subclavians. | Receive the | 1. Axillary which | Receives the | 1. Posterior ulnar. | | | | | |

VEINES ARTÉRIELLES, Arterial veins—*v. Ciliaires*, Ciliary veins—*v. Sous-clarières*, Subclavian veins—*v. Sus-hépatiques*, Hepatic veins.

VEINEUX, Venous.

VEINS, CORONARY, Cardiac veins—*v. Intralobular, Hepatic veins*—*v. Supra-hepatic, Hepatic veins*.

VEINSTONE, Phlebotite.

VEINULE, Venula.

VEJUCO DE MAVACURE, see *Curare*.

VELAMEN NATIVUM, Integument.

VELAMENTA BOMBYCINA, Villous membranes—*v. Cerebralia, Meninges*—*v. Infantis, Membranes of the fœtus*.

VELAMENTUM ABDOMINALE, Peritoneum—*v. Corporis commune, Integument*—*v. Lingue, Glosso-epiglottic ligament*—*v. Nativum, Integument*.

VÉLAR, *Erysimum*.

VELLICATION, Tic.

VELOSYNTHESIS, Staphylography.

VELUM, 'a veil, a cover.' *Velum pendulum palati* — v. Apophysi vermiformi obtentum, Valvula Viuessenii — v. Interjectum cerebelli, Valvula Viuessenii — v. Medullare anticum, Valvula Viuessenii.

VELUM MEDULLARÉ INFERIUS, (F.) *Voile médullaire inférieur*. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM MEDULLARÉ POSTERIORIS SEN POSTICUS SEN SEMILINARÉ, *Voile la Tariéni*. The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.

VELUM PALATI, *Velum pendulum palati* — v. Palatinum, *Velum pendulum palati*.

VELUM PENDULUM PALATI, 'Pendulous veil of the palate.' *Velum, V. Palatinum* seu *Palati* seu *Pendulum* seu *Staphylinum*, *Palatum pendulum* seu *mollé* seu *mobile*, *Pendulum* seu *Claustrum Palati*, *Palatum Mollé*, *Soft Palate*, (F.) *Septum Staphylin* (Ch.), *Voile du Palais*. A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its anterior surface corresponds to the mouth; the posterior to the pharynx. Its superior edge is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle — the *uvula*. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars*; the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glosso-staphylini, the pharyngo-staphylini and the palato-staphylini. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.

VELUM STAPHYLINUM, *Velum pendulum palati* — v. Viuessenii, Valvula Viuessenii.

VELVET LEAF, Abutilon Avicennæ, Pareira.

VENA, Vein, Penis—v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct—v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena, Pulmonary artery—v. Capitis, Cephalic vein—v. Cava, Cava vena—v. Cubiti interior, Basilic vein—v. Demiazgus, see Azygos—v. Falcis cerebri, Sinus longitudinalis inferior—v. Hemiazgus, see Azygos—v. Lactea, Porta vena—v. Lienalis, Splenic vein—v. Magna, Porta vena—v. Medina Arabum, Draucunculus—v. Medinensis, Draucunculus—v. Ostiaria, Porta vena—v. Pari carens, Azygos, (vena)—v. Portalis, Porta vena—v. Portarum, Porta vena—v. ad Portas, Porta vena—v. que ad Portas est, Porta vena—v. Ramalis, Porta vena—v. sine Pari, Azygos, (vena)—v. Splenica, Splenic vein—v. Stelechthene, Porta vena—v. Subularis, Vena axillaris—v. Terminalis, Circulus venosus.

VENÆ APOPLECTICÆ, Jugular veins — v. Cavæ hepatis, Hepatic veins—v. Centrales, Intralobular veins — v. Concomites, see Vein — v. Galei, Choroid, (veins)—v. Intominatæ, see Innomatum — v. Intralobulares, Intralobular veins — v. Lactea, Chyliferous vessels — v. Lymphaticæ, Lymphatic vessels — v. Micantes, (arteries,) see Artery—v. Pulsatiles, (arteries,) see Artery—

v. Satellites, see Vein — v. Soporales, Jugular veins—v. Sphagtitides, Jugular veins.

VENESECTIO, see Blood-letting—v. Revulsoria, see Blood-letting.

VENÆ VORTICOSÆ. The veins which principally form the external or venous layer of the choroid coat of the eye; so called from their peculiar arrangement; from *vertex* seu *vortex*, 'a whirlpool.'

VENAL, Venous.

VENEFICIUM, Poisoning.

VENEFICIUM, Poison, Poisoning, Venom.

VENENATUS, Venomous.

VÉNÉNEUX, Poisonous.

VENÉNOSE, Venomous.

VENENUM, Poison, Venom.

VENEREAL, *Vene'reus*, *Aphrodisiacus*, *Veneræan*, (F.) *Vénérien*, from *Venus*, *venëris*, 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense, the word *veneræal*—as well as *aphroditic*—is synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases should be called *veneræal* which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion. It is, also, used in the same sense as *aphrodisiac*,—adapted to excite veneræal desire.

VENEREAL DESIRE, Libido — v. Disease, Syphilis.

VÉNÉRIEN, Venereal. This term, also, means one labouring under syphilis; as *Hôpital des vénériens*.

VENERIVAGUS, Libidinous.

VENERY, Same etymon. The pleasures of love. Sexual communication. Coition.

VENESECTION, see Blood-letting.

VENIMEUX, Venomous.

VENIA, Venom.

VENOM, *Vene'num*, *Toxicum*, *Venenation*, (F.) *Venin*. A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus*, as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

VENOM, QUICKENING, Sperm—v. Vital, Sperm.

VENOMOUS, *Venenatus*, *Venënosus*, (F.) *Venimeux*. An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., as well as to the venom itself; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. *Virus* is more commonly used in this case.

VENOSITAS, Venosity — v. Sanguinis, Prædominium sanguinis venosi.

VENOSITY, *Venositas*, *Venënosness*, *Venous state* or *cachexia*, *Melan'emia*, *Melan'osis universalis*, from *vena*, 'a vein.' A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c.—Pichelt.

VENOUS, *Venal*, *Veno'sus*, (F.) *Venëux*. Same etymon. Appertaining to a vein, or to the blood of the veins; as *venous* cachexia, *venous* pulse.

VENOUS CACHEXIA, Venosity — v. Hum, *Bruit de Diable* — v. State, Venosity — v. System, see Vascular—v. System, abdominal, Porta vena.

VENOUS SYSTEM OF JACOBSON. A system of vessels in the three classes of vertebrated animals other than the mammalia, which forms a

communication between the vena porta and the vena cava.

VENOUSNESS, Venosity.

VENT. Wind.

VENTER, Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as "by the first venter." "A died seized, leaving two infant daughters by different venters."

VENTER IUS, Abdomen, Hypogastrium, Neiræa — v. Inferius, Abdomen — v. Infimus, Abdomen — v. Magnus, Inguvies — v. Medius, Thorax — v. Parvus, Hypogastrium — v. Propendens, Hysteroloxia anterior — v. Renum, Pelvis of the kidney — v. Supremus, Cavum cranii.

VENTEUX, Windy.

VENTILATION, *Ventilat'io*, from *ventus*, 'wind,' *ventulus*, 'a little wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOSITY, Flatulence.

VENTOUSES SCARIFIÉES, Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping, dry.

VENTRAL, from *venter*, 'the belly.' Abdominal.

VENTRAL HERNIA, *Her'nia ventral'is*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, 'an apron,' Belt (Russian.)

VENTRALE CUTANEUM, 'Cutaneous apron.' (F.) *Tublier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, Abdomen — v. *Inférieur*, Abdomen — v. *Ressevré*, Constipation.

VENTRE INSPICIENDO DE, see *De ventre inspiciendo*.

VENTRICLE, *Ventric'ulus*, diminutive of *venter*, 'belly.' (F.) *Ventricale*. Literally, a little belly. A name given, in anatomy, to various parts.

VENTRICLE OF ARANTIIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventric'uli* seu *Cavitates* seu *Sinus Cer'ebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles*, *middle ventricle*, *fourth ventricle* or *ventricle of the cerebellum*, and *fifth ventricle*. The *middle ventricle* or *third ventricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the

lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lateral ventricles*, *Ventric'uli laterales* seu *magni* seu *majores* seu *priores* seu *superiores* seu *tricornes*, (F.) *Ventricules latéraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tavia semicircularis*: — their inferior portion contains the *corpus fimbriatum*, *cornu Ammonis*, &c. Each of the ventricles has a *body* or *centre* — *cella media* — and *horns*, *cornua*. The *Fourth ventricle*, *Ventriculus cerebelli* seu *quartus* seu *Arautii*, *Sinus rhomboïdens*, (F.) *Quatrième ventricle*, is situate beneath the aqueduct of *Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ventricle*, *Ventriculus septi pellucidi*, *Lucisura septi*, (F.) *Cinquième ventricle*, is the small serous cavity between the laminae of the septum lucidum; called, also, *Sinus of the septum lucidum*, *S. of the median septum* (Ch.).

VENTRICLES OF THE HEART, *Ventric'uli cordis*, *Specus cordis*, (F.) *Ventricules du cœur*, are two in number. The *Right ventricle*, *Pulmonary ventricle*, *Ventric'ulus anterior* seu *primus* seu *pulmonalis*, (F.) *Ventricle droit* ou *pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carneæ* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ventricle*, *Ventric'ulus aorticus* seu *posterior* seu *secundus*, (F.) *Ventricle gauche* ou *aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body — the aorta.

VENTRICLES OF THE LARYNX, *Ventric'uli* seu *Sacculi laryng'e'i*, *Ventric'uli Morgagni*, *Sinuses of the larynx*, (F.) *Ventricules ou Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

VENTRICULAR, *Ventricul'aris*, (F.) *Ventriculaire*. Same etymon as *Ventricle*. Relating to a ventricle.

VENTRICULE, Ventricle.

VENTRICULE AORTIQUE, Ventricle, left — v. *Cinquième*, Ventricle, fifth — v. *Droit*, Ventricle, right — v. *Gauche*, Ventricle, left — v. *Moyen du Cerveau*, Ventricle, middle, of the brain — v. *Pulmonaire*, Ventricle, right — v. *Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain — v. *du Cœur*, Ventricles of the heart — v. *Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart—*v. Dilatatio, Gastroectasis—v. Dissolutio, Gastro-malacia—v. Duræ matris, Sinuses of the dura mater—v. Emolliatio, Gastro-malacia—v. Exulceratio, Gastroecosis—v. Fluxus, Gastrorrhœa—v. Inflammatio, Gastritis—v. Laryngei, Ventricles of the larynx—v. Laterales, see Ventricles, lateral, of the brain—v. Magni, Ventricles, lateral, of the brain—v. Majores, Ventricles, lateral—v. Metamorphosis gelatiniformis, Gastro-malacia—v. Morgagnii, Ventricles of the larynx—*v. Perforatio, Gastro-brosis—v. Priores, Ventricles, lateral—v. Pseudophlogosis resolutiva et colliquativa, Gastro-malacia—v. Superiores, Ventricles, lateral—v. Triornes, Ventricles, lateral—v. Uleeratio, Gastroecosis.**

VENTRICULUS, Stomach, Ventricle—*v. Anterior, Ventricle, right—v. Aorticus, Ventricle, left—v. Arantii, see Ventricles of the brain.*

VENTRICULUS CALLOSUS, 'Callous stomach.' The gizzard or third stomach of the gallinaecous bird. (F.) *Gésier*. It consists of a double-bellied or *digestive* muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS CEREBELLI, see Ventricles of the brain—*v. Intestinalis, Abomachus—v. Posterior, Ventricle, left—v. Primus, Ventricle, right—v. Pulmonalis, Ventricle, right—v. Quartus, see Ventricles of the brain—v. Secundus, Ventricle, left—v. Septi Pellucidi, see Ventricles of the brain—v. Succenturiatus, Duodenum.*

VENTRILOQUE, Engastrimythos.

VENTRILOQUISM, see Engastrimythos.

VENTRILOQUIST, Engastrimythos.

VENTRILOQUY, see Engastrimythos.

VENTRIOSUS, Abdominous.

VENTRIPOTENT, Abdominous.

VENTROSITAS, Physeonia.

VENTROSUS, Abdominous.

VENTS, Flatulence.

VENTUS, Wind.

VENULA, *Phlebion*, diminutive of *Vena*. See *Vein*. (F.) *Veinule*. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENULE CENTRALES, Intralobular veins—*v. Intralobulares, Intralobular veins.*

VENUS, Clitoris, Coition, Cuprum—*v. Crystals of, Cupri subacetat—v. Crystaux de, Cupri subacetat.*

VER CUCURBITIN, *Tœnia solium—v. Cutané, Draconeulus—v. Filaire, Draconeulus—v. de Grainé, Draconeulus—v. Luisant, Cicindela—v. de Médecine, Draconeulus—v. Solitaire, Bothrioccephalus latus, Tœnia solium.*

VERATRIA, *Veratrina*.

VERATRINA, *Verat'ria, Veratrine*; from *veratrum*. A vegetable alkali, found in the seeds of *Veratrum sabadilla*, *V. officinale*, *Helleborus officinalis*, and *Asagraea officinalis*, which are known in commerce under the names *Cebadilla*, *Cevadilla*, and *Sabadilla*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shrivelled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances,—*Sabadillin, Veratrin*, gum resin of the *sabadilla*, and black greasy matter.

It is extremely poisonous, and but little used internally in medicine. Magendie gave it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endermically, (from gr. v to xx to ʒj of lard or cerate.) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States:—Take of *cevadilla*, ℥ij; alcohol, 2 gallons; sulphuric acid, solution of ammonia, purified animal charcoal, and magnesia, each a sufficient quantity. Boil the *cevadilla* in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the *cevadilla*, mix and strain the liquors, and, by means of a water-bath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for fifteen minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the *veratrin*. Lastly, separate and dry the precipitate. See *Colechicum autumnale*.

VERATRINE, *Veratrina*.

VERATRINE, SULPHATE OF, *Verat'ria sulphas*, (F.) *Sulfate de Veratrine*, possesses the same virtues as *veratrine*. A solution of one grain in two ounces of distilled water has been suggested as a substitute for the *Eau médicinale d'Inneson*—a celebrated gout remedy—in the dose of ʒj to ʒij.

VERATRUM ALBUM, (*verè atrum*, 'truly black,' from the colour of the roots [?]). *Helleborus albus, Elleborum album, Elleborus albus, Cherbachem, White hellebore, Langwort*, (F.) *Hellebore blanc. Sex. Syst. Polygamia Monœcia. Nat. Ord. Melanthaceæ* (Lindley). The root or rhizoma of this common European plant is indebted to the *veratrine* for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an iteh ointment. See *Ung. Veratri*.

VERATRUM LUTEUM, *Chamaelirium luteum*.

VERATRUM SABADILLA, *Sabadilla, Sabatilla, Canis Interfect'or, Cons'ticum Americanum, Cevadilla Hispanorum, Sevadilla, Hor'denn cons'ticum*, (F.) *Cevadille*. The seeds of this plant, *Sabadilla, Cevadilla* (Ph. U. S.), have been used, mostly as anthelmintics. Dose, gr. ij to a child four years old. It possesses the same general properties as the *veratrum album*.

VERATRUM VIRIDE, *American Hellebore, Swamp hellebore, Indian poke, Indian Uncas, Poke weed, Bear weed, Itch weed, Tickle weed, Earth gall, Devilbit, Wolfbane, Puppet root*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of

the genus. It has been brought forward, however, in recent times, in the Southern States, as a powerful sedative in inflammatory diseases. Dose, eight drops of a saturated tincture.

VERBASCULUM, *Primula veris*.

VERBASCUM ALBUM, *V. thapsus*—*v. Alatum*, *V. thapsus*—*v. Collinum*, *V. thapsus*—*v. Crassifolium*, *V. thapsus*—*v. Elongatum*, *V. thapsus*—*v. Lychnitis*, *V. thapsus*—*v. Montanum*, *V. thapsus*.

VERBASCUM NIGRUM, (supposed to be a corruption from *Barbascum*, owing to its hairy coat: *barba*, 'a beard.') *Candelaria regia*, *Thapsus barbatus*, *Thapsus barbatus*, *Candelaria*, *Lanaria*, *Black Mullein*; and VERBASCUM THAPSUS, *V. thapsoides seu alatum seu collinum seu album seu crassifolium seu elongatum seu lychnitis seu montanum seu simplex*, *Phlogmus*, *Phlomis*, *Phlox*, great broad-leaved or yellow Mullein, *High Taper*, *Cow's Lungwort*, (F.) *Molène*, *Bouillon blanc*, *Bouhonme*, *Cierge de notre dame*, *Herbe Saint-Fiacre*. *Ord.* Scrophulariaceae, *Sec. Syst.* Pentandria Monogynia,—especially the latter,—have been used as emollients, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM SIMPLEX, *V. thapsus*—*v. Thapsoides*, *V. thapsus*—*v. Thapsus*, see *V. nigrum*.

VERBENA HASTATA, *V. paniculata*, *Blue vervain*, *Stimuler's Joy*, an American species, is more bitter than the European, and said to be emetic.

VERBENA OFFICINALIS, *Verbena*, *Dichromos*, *Verbena*, *Peristeryium*, *Hierobotan*, *Herba sacra*, *Vervain*, *Parvain*, (Prov.) *Berbine*, *Jano's Tears*, (F.) *Verveine*, *Herbe à tous les maux*; *Ord.* Verbenaceae. *Sec. Syst.* Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of use in scrofula. It is not used.

VERBENA PANICULATA, *V. hastata*.

VERBENA URTICIFOLIA, an indigenous species, has been used in poisoning from *Rhus Toxicodendron*.

VERBENACA, *Verbena officinalis*.

VERBESINA ACMELLA, *Spilanthes Acemella*.

VERBESINA VIRGINICA, *Crown Beard*. Indigenous. *Order*, Compositae. A decoction of the roots is used by the Indians as diaphoretic and depurative.

VERBUS, *Penis*.

VERCOQUIN, *Phrenitis vermino'sa*. A form of phrenitis, attributed to the presence of a worm in the brain!

VERDET, *Cupri subacetat*.

VERDIGRIS, *Cupri subacetat*.

VERENDA, Genital organs.

VERETRUM, *Penis*.

VERGE, *Penis*—*v. d'Or*, *Solidago virgaurea*.

VERGERETTE DE PHILADELPHIE, *Erigeron Philadelphicus*.

VERGETURES, *Vibices*.

VERJUICE, *Omphacium*, (F.) *Verjus*, *Verjus*, (*verli*, 'green,' and *jus*, 'juice.') "The juice of green fruits." A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis vinifera*.

VERJUS, *Verjuice*.

VERMES, Worms—*v. Cerebri*, *Choroid plexus*.

VERMICELLI, see *Turundae Italice*.

VERMICULAIRE BRÛLANTE, *Sedum*.

VERMICULAR, *Vermiform*.

VERMICULARIS, *Lumbricalis*, *Sedum*.

VERMICULI SPERMATICI, *Spermatozoa*.

VERMICULUM, *Vermig'illum*. An elixir; a tincture.—*Ruland* and *Johnson*.

VERMICULUS CAPILLARIS, *Dracunculus*.

VERMIFORM, *Vermicular*, *Vermicularis*, *Vermiformis*, (F.) *Vermiculaire*, *Vermiforme*, from *vermis*, 'a worm,' and *forma*, 'form.' That which resembles a worm.

VERMIFORM PROC'ESSES, *Processus seu Protuberantia* *seu appendices vermiformes*, *Vermes*, *Monticuli cerebelli*, *Worms*, (F.) *Éminences vermiformes du cervelet*, are two medullary projections, at the surface of the cerebellum. The superior vermiform process, *Vermis superior cerebelli*, is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum;—and the inferior vermiform process, *Vermis inferior cerebelli*, *Pyramid of Malacarne*, is a somewhat larger projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions—the pyramid, the *neula*, and the *nodulus*. The anterior portion of the superior vermiform process is elevated, and termed *Monticulus*.

VERMIFUGE, *Anthelmintic*.

VERMIFUGE, MATHIEU'S. This consisted of two distinct eluctuaries; the one for killing, the other for expelling tape-worm. The former is made of an ounce of tin filings, and six drachms of *ferri roto*.

VERMIFUGUS, *Anthelmintic*.

VERMILION, *Hydrargyri sulphuretum rubrum*.

VERMILLO DE PROVENCE, *Antimonii sulphuretum rubrum*.

VERMINATIO, *Helminthiasis*.

VERMINATION, *CUTANEOUS*, *Malis*.

VERMINEUX, *Vermineous*.

VERMINOUS, *Vermineous*, (F.) *Vermineux*. From *vermis*, 'a worm.' That which is caused by worms; as 'a verminous affection.'

VERMIS, see *Vermiform processes*—*v. Bombycinus*, *Cornu ammonis*—*v. Cerebelli*, *Vermiform process*—*v. Cerebri*, *Fever*, *Hungary*—*v. Cucurbitinus*, *Tania solium*—*v. Digniti*, *Paronychia*.

VERMITO, *Helminthiasis*.

VERNIX CASEOSA, 'cheesy varnish.' The fatty varnish, or deposit, often found on the foetus, which is secreted by the sebaceous follicles of the skin.

VERNIX SICCA, *Sandarac*.

VERNO'NIA ANTHELMINTICA, *Ascaricida anthelmintica*, *Calngirah*, *Calageri*. A plant which is indigenous in India. *Ord.* Compositae. *Sec. Syst.* Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascarides and lumbri in children.

VERNO'NIA NOVEBORACENSIS, *Iron weed*, *Flat top*; an indigenous plant; whose purple flowers appear in August and September, is reported to possess enanthartic properties.

VÉROLE, *Syphilis*—*v. Petite*, *Variola*—*v. Petite volante*, *Varicella*.

VÉROLÉ, *Syphilitic*.

VÉROLETTE, *Varicella*.

VÉROLIQUE, *Syphilitic*.

VERONICA, *V. officinalis seu Tournefortii seu mas*, *Thea Germanica*, *Betonica Pauli*, *Chama'drys*, *Male Veronica*, *Fluellin*, *Officinal Speedwell*, *Eyebright*, *Paul's Betony*, (F.) *Véronique*, *Thé d'Europe*, *Herbe aux lueurs*. *Ord.* Siro-

phulariaceæ. *Ser. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

VERONICA AQUATICA, V. beccabunga.

VERONICA BECCABUNGA, *Beccabunga*, *Anagallis* seu *veronica aquatica*, *Laver Germanicum*, *Срѣпа*, *Water Pimpernel*, *Brooklime*, *Brooklime Speedwell*, *Water Speedwell*, *Neckweed*, *Water Purslain*, (Sc.) *Water-purpie*, (F.) *Véronique creusonnée*. This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

VERONICA MAS, Veronica — v. *Officinalis*, *Veronica*.

VERONICA PEREGRINA, *Neckweed*, *Purslain*, *Speedwell*; indigenous; flowering from April to June, is given internally in scrofulosis, and is applied as a wash to serofulous tumours.

VERONICA PURPUREA, *Betonica officinalis* — v. *Tournefortii*, *Veronica* — v. *Virginica*, *Leptandra Virginica*.

VÉRONIQUE, Veronica — v. *Creusonnée*, *Veronica beccabunga*.

VERRA, Penis.

VERRE, Vitrum — v. *d'Antimoine*, *Antimonii vitrum*.

VERRUCA, diminutive *Verrucula*, *Ecphyoma verruca*, *Phymatosis verrucosa*, a *Wart*, (Prov.) *Wret*, (F.) *Verrne*, *Poirean*. A small, hard, mammillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA CARNSA, *Condyloma* — v. *Fornicaria*, *Formica* — v. *Minor*, *Thymion* — v. *Palpebrarum*, see *Hydatid* — v. *Pensilis*, *Acrochordum* — v. *Rhagoidea*, *Thymion*.

VERRUCARIA, *Calendula officinalis*, *Heliotropium Europæum*.

VERRUCOSE, Warty.

VERRUCOUS, Warty.

VERRUCULA, *Verruca*.

VERRUE, *Verruca*.

VER'S, Worms.

VERSE-CHARMS, see *Charm*.

VERSIO, Turning — v. *Fœtus*, *Turning* — v. *Spontanea*, *Evolution*, *spontaneous* — v. *Uteri*, *Hysteroloxia*.

VERSION, Turning.

VERT-DE-GRIS, *Cupri subacetat*.

VERTEBRA DENTATA, *Axis* — v. *Dorsi Prima*, *Lophia* — v. *Lumborum Prima*, *Asphalites* — v. *Magna*, *Sacrum*.

VERTEBRÆ, *Spondyli*, *Spondiles*, *Whetlebones*, (F.) *Vertèbres*; from *vertere*, 'to turn.' This name has been given to the bones, which by their union form the vertebral or spinal column. The vertebræ are short, thick, very angular bones; twenty-four in number, and situate one above another. The *body* — *centrum*, of Owen — of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibro-cartilage, with the contiguous vertebræ. The *Processes*, (F.) *Массы проphyгивы*, of each vertebra are:—1. The *spinous processes*, situate behind, and in the median line. 2. The two *transverse processes*, standing off from each side. 3. The *four articular*, or *oblique processes* — *zygapophysyæ*, of Owen — two *superior*, and two *inferior* — which serve to unite the vertebra with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on

each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this, — that is, between the body and processes, *foramen vertebrale, rachidinum*, — concurs in forming the vertebral canal. The *arch* or *lamina* of a vertebra, *neurapophysis*, is the part from which the several processes project. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cervical*, twelve *dorsal*, and five *lumbor*. The first cervical is called *atlas*; the second, *axis* or *vertebra dentata*; and the seventh, *vertebra præmienaens*. The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs by their articulating surfaces — *zygapophysyæ*. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

VERTEBRAL, *Vertebraalis*. That which relates or belongs to the vertebræ.

VERTEBRAL ARTERY, *Posterior cerebral artery*, (Ch.), is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertèbral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basiliary artery*. Besides the branches sent to the neck, the vertebral artery gives off the *anterior* and *posterior spinal arteries*, and the *inferior cerebellous*, in the cavity of the cranium.

VERTEBRAL COLUMN, *Rachis*, *Rhachis*, *Notos*, *Acnestis*, *Corina*, *C. hominis*, *Spino*, *S. dorsi* seu *vertebraalis*, *Columna spinalis* seu *vertebraalis* seu *dorsum*, *Dorsum*, *Tergum*, *Complices* *Vertebrarum*, *Acantha*, *Soera fistula*, *H'era Syrinx*, *Spine*, *Back bone*, (Sc.) *Backsprent*, (F.) *Colonne vertèbrale*, *Épine du dos*, *Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid and hollowed by a canal called *vertebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; and concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *anterior* or *prespinal* surface; a *posterior* or *spinal*; two *lateral*; a *base*; and an *apex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian*; in the back, *predorsal*; and in the loins, *prelumbor*. The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters*, (F.) *Gouttières vertèbrales*, formed by the succession of the *vertebral plates*, (F.) *Lames vertèbrales*, which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral notches*, (F.) *Échancures vertèbrales*. These are called *vertebral foramina*, (F.) *Trous de conjugaison*, and give passage to the *vertebral nerves*. The base

of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The apex or top of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Spinal* or *Rachid'ian Canal*, *Solen*, *Canalis medullæ Spinalis*, *Specus pro medullâ Spinali* seu *vertebralis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebralis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, *Rachial'gia* (of some,) *Caries of the Vertebrae*, *Spondylarthrocacè*, *Spondyl'acè*, *Kyphosis inflammator'ia* seu *paralytica*, *Gibbositus cariosa*, *Caries vertebrarum*, *Spondylal'gia*, *Spondyl'opos'is*, *Tuberculo'sis Vertebrarum*. The spinal column is liable to distortion. (see Hump.) at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott*, *Malum seu Gibbus Pottii*, *Pott's disease* or *curvature*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

VERTEBRAL LIGAMENTS, (F.) *Ligaments vertebraux*, *Surtouts ligamentaux de la colonne vertebrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

VERTEBRAL NERVE, *Trisplanchnic*.

VERTEBRAL NERVES, *Spinal Nerves*, (F.) *Nerfs rachidiens*, spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, from the *anterior* or *antero-lateral column* of the spinal marrow, and the other *posterior*, from the *posterior* or *postero-lateral column*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See *Nerves*.

VERTEBRATED, *Vertebra'tus*, (F.) *Vertèbré*. Provided with vertebræ.

VERTÈBRES, *Vertebre*.

VERTEBRODYMIA, see *Somatodymia*.

VERTEBRO-ILIAC LIGAMENT, *Ileo-lumbar ligament*.

VERTEX, *Cor'yp'hè*, *Acrori'a*, *Spondylus*. The top or highest part or crown of the head. (Sc.) *Canel*, *Now*, *Pallat*, *Palad*. See *Sinciput*.

VERTEX CORDIS, *Mucro Cordis*—v. *Cubiti*, *Olecranon*—v. *Palpitans*, *Fontanella*.

VERTIBULUM, *Prepan*.

VERTICULA, *Articulation*.

VERTICULUM, *Articulation*.

VERTICULUS, *Articulation*.

VERTIGE, *Vertigo*.

VERTIG'INOUS, *Vertigino'sus*, (Old Eng. and Prov.) *Totty*, (F.) *Vertiginèx*. Relating or pertaining to vertigo; *Giddy*, *Dizzy*.

VERTI'GO, from *vertere*, 'to turn;' *Dinos*, *Ilin'gos*, *Dinus* seu *Hallucina'tio* seu *Antal'gia vertigo*, *Circumgyra'tio*, *Gid'diness*, *Diz'ziness*, *Swimming of the head*, (Prov.) *Swee*, *Swinnying*, (F.) *Vertige*, *Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated;—*simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOsa, *Scotodynia*.

VERUGAS (S.), from *verruca*. A peculiar disease affecting certain localities of Peru, which manifests itself by sore-throat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of *Surea*: called *Agua de Veruga*.—Tschudi.

VERU MONTANUM, *Gallinaginis caput*.

VERVAIN, *Verbena officinalis*—v. *Blue*, *Verbena hastata*.

VERVEINE, *Verbena officinalis*.

VERSA'NIA, *Vesania*, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and even hydrophobia. See *Nosology*.

VESANIA MANIA, *Mania*.

VESANLE, *Insanity*.

VESICA BILIARIA, *Gall-bladder*—v. *Cordis*, see *Pericardium*—v. *Fellea*, *Gall-bladder*—v. *Intestinalis*, *Vesicula umbilicalis*—v. *Prostatica*, see *Ejaculatory ducts*—v. *Saccata*, *Cystostenocho'ria*—v. *Urinaria*, *Urinary bladder*.

VESICÆ IRRITABILITAS, *Cystersthismus*—v. *Unguinosæ tendinum*, *Bursæ mucosæ*.

VES'ICAL, *Vesica'lis*, from *vesica*, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as the surrounding parts.

VESICAL GANGLIA, see *Spermatic Ganglion*—

v. Ligaments, see Urinary bladder—v. Oxyd, Oxyd, cystic—v. Triangle, see Urinary bladder.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, Blister, Epispastic.

VESICARIUM, Ovarium.

VESICATION, *Vesicatio*; from *vesica*, 'a bladder.' The action of a vesicant. The formation of blisters.

VÉSICATOIRE, Blister—v. *Magistral*, Magistral.

VESICATORIUM, Blister.

VESICLE, *Vesicula*—v. Allantoid, Allantois—v. Blastodermic, see *Molecule*—v. Cowpox, see *Vaccination*.

VESICLE OF DEVELOPMENT, *V. of Evolution*. A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, *V. of Development*—v. Germinal, see *Molecule*—v. Purkinjean, see *Molecule*—v. Umbilical, *Vesicula umbilicalis*.

VESICLES, ASCHERSONIAN. When fluid fat and fluid albumen are shaken together, the resulting fat globules become surrounded by an albuminous layer. The vesicles, thus formed, are called after Ascherson, their discoverer.

VESICLES OF DE GRAAF, *Folliculi Graafiani*—v. Seminal, *Vesiculae seminales*.

VESICOCE/LE. Badly compounded for *Cystocele*.

VESICO-UTERINE, *Vesico-uterinae*, from *vesica*, 'the bladder,' and 'uterus.' Appertaining, or relating to, the bladder and uterus.

VESICO-UTERINE FOLDS, see *Uterus*.

VESICO-VAGINAL, *Vesico-vaginalis*. *Vagino-vesical*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESICULA, *Cystina*, *Vesicle*, *Blister*, (F.) *Vésicule*; diminutive of *vesica*, 'a bladder.' A small bladder or cyst.

VESICULA, *Vesicle*, *Echthyma*, *Cystina*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearl-coloured. It is succeeded, either by a seurf, or by a laminated scab.

VESICULA ÆNIGMATOSA, *Vesicula umbilicalis*—v. *Alba*, *Vesicula umbilicalis*—v. *Bilis*, Gall-bladder—v. *Blastodermatica*, see *Molecule*—v. *Blastodermica*, see *Molecule*—v. *Chyli*, *Receptaculum chyli*—v. *Erythroidea*, *Erythroid vesicle*—v. *Fellis*, Gall-bladder—v. *Gangrenosens*, see *Anthrax*—v. *Germinativa*, see *Molecule*—v. *Omphalo-mesenterica*, *Vesicula umbilicalis*—v. *Ovalis*, *Vesicula umbilicalis*—v. *Prolifera*, see *Molecule*—v. *Prostatia*, see *Ejaculatory ducts*.

VESICULA UMBILICALIS, *V. alba* seu *omphalo-mesenterica* seu *ænigmatosa* seu *ovalis*, *Vesica intestinalis*, *Vitellivulus*, *Umbilical* or *Intestinal Vesicle*, *Vitelline Pouch*, *Vitellicle*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vitelline pedicle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow.—*Ductus omphalo-mesentericus* seu *vitello-intestinalis* seu *vitellarius*, *vitelline Duct*. Its arteries are the omphalo-mesenteric. The *vitelline fluid*, contained in the vesicle—in the *Vitelline* or *Yolk membrane*—has been compared, from analogy, to the *vitellus* or

yolk of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

VESICULÆ constitute the 6th order of Bate-man's classification of *Cutaneous Diseases*.

VESICULÆ, see *Villous membranes*—v. *Divæ Barbaræ*, *Variola confluens*—v. *Gingivarum*. *Aphthæ*—v. *Pulmonales*, see *Cellule*—v. *Rotundæ cervicis uteri*, *Nabothi glandulæ*—v. *Sanguinis*, *Globules of the blood*—v. *Seminales mulierum*, *Nabothi glandulæ*—v. *Spermaticæ*, *Vesiculae seminales*.

VESICULÆ SEMINALES, *V. Seminalia* seu *spermaticæ*, *Cupulæ seminalis*, *Conceptaculo seminaria*, *Gonocystides*, *Seminal vesicles*, (F.) *Vesiculae seminales*, *Gardouches*, *Greniers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their posterior extremity or fundus terminates by a round cul-de-sac. Their anterior extremity or neck is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vasa deferens, and forms with it the ejaculatory duct. The interior of the vesiculae exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESICULAR, *Vesicularis*, (F.) *Vésiculaire*. Of or belonging to a vesicle:—full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular*. See *Cortex cerebri* and *Neurine*.

VESICULE, *Vesicula*—v. *Biliaire*, Gall-bladder—v. *du Fiel*, Gall-bladder—v. *Germinative*, see *Molecule*—v. *Ovulifère*, see *Folliculi Graafiani*.

VESICULES DE GRAAF, *Folliculi Graafiani*—v. *de Sainte Barbe*, *Variola confluens*—v. *Seminales*, *Vesiculae seminales*.

VESICULO-TYMPANITIC, *Vesiculo-tympaniticus*. An epithet for a sound or resonance heard on percussion, which consists of the vesicular and tympanitic sounds combined. It occurs when the parenchyma of the lungs is incompletely solidified.—*Flint*.

VESPA, Wasp.

VESSEL, *Vas*, *Vasum*, diminutive *Vasculum*, *Angéon*, *Angos*, *Conceptaculum*, from (L.) *vas*, *vasculum*, (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery*, *Vein*, and *Lymphatic*. See, also, *Vascular*.

VESSELOUP, *Lycoperdon*.

VESSIE, Urinary bladder—v. à *Colonnes*, see *Urinary bladder*—v. *Col de la*, *Collum vesicæ*.

VÉSSIE NATATOIRE, Air-bladder.

VESTIBULAR NERVE, see *Auditory nerve*.

VESTIBULE, *Vestibulum*, from *vestio*, 'to cover.' The porch or entrance to a house.

VESTIBULE, *Vestibulum*, *V. Vaginalis*, *Prona*, *Atrium Vaginalis*, *Ambitus genitalis mulieris*, is a smooth cavity between the perineum and nymphae in the female, which leads to two passages—to the urethra above, and to the vagina below.

VESTIBULE OF THE EAR, *Vestibulum*, *V. labyrinthi*, (F.) *Vestibule*. A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined

by a particular membrane, and contains the liquor of Cotunnus and branches of the auditory nerve. There is also another membrane, constituting the *membraneous vestibule*, but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other—the *sacculus vestibuli*, and the *sacculus*. There are three contiguous cavities in the vestibule; one of which, the *semi-oval*, is situate above; another, the *hemispherical*, below; and the third, or *sulci-form*, which is the orifice of the aquæductus vestibuli, behind.

VESTIBULUM LABYRINTHI, Vestibule of the ear—v. Vagina, Vestibule.

VESTIGE (F.) *Vestigium*, ‘a vestige,’ ‘a trace.’ A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestigies* of what they are in certain animals.

VESTIGIUM, Sole, *Vestige*—v. Foraminis ovalis, Ovalis fossa—v. Pedis, Metatarsus.

VESTITUS, *Esthe'ma, Esthe'sis, Res vestitaria*, Clothing, Dress, Vesture, (F.) *Vêtement*, from *vestire, vestitum*, ‘to clothe.’ Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded—the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours—the darker colours retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bed-clothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

VESTURE, Vestitus.

VETA, Puna.

VÉTEMENT, Vestitus.

VETERANA, Rubeola.

VETERINARIUS, see Hippiafer and Veterinary.

VETERINARY, *Veterinarius*, (F.) *Vétérinaire*, from *veterinus*, ‘that which bears burdens;’ itself, perhaps, from *vehiterinus*, from *vehere*, ‘to carry.’ That which appertains to beasts of burden: hence, *veterinary surgeon*, (see Farrier,) *veterinary college*, and *veterinary medicine*.

VETERINARY ANATOMY, see Anatomy.

VETERINARY ART, *Ars seu Medicinã veterinarã*, *Zoô'iasis, Zoiat'ria, Theriat'rica, Mulomedicina, Zoôtherapi'a, Zoôtherapeut'icë, Ars zoiat'rica, Farriery*. The art of treating the diseases, &c., of cattle.

VETERNOSITAS, Coma vigil.

VETERNUS, Coma vigil.

VETIVERIA ODORATA, *Andropogon muricatus*.

VETTONICA, *Betonica officinalis*.

VETULA, Sacrum.

VEXILLA TUBARUM FALLOPII, see Tube, Fallopian.

VEXILLUM, *Drapeau*.

VIA, Way—v. Curandi, Ratio medendi—v. Stomachi et ventris, Œsophagus.

VIABILITY, see Viable.

VIABLE, *Viables*, from *via*, ‘way;’ or from (F.) *vie*, ‘life,’ (Orfila.) A word, which may be introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so

developed as to permit its continued existence. Every fœtus is not *viable*. Anencephali have lived ten or twelve days, yet they are not viable. The older the fœtus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

VIAE CHYLIFERÆ, Chyliferous vessels.

VIAE CLAUDESTINE, *Claudestine Passages*. Supposititious secret ways or passages or ‘royal roads,’ to account for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VIAE EXTRAORDINARIE LACTIS, Galactoplasia—v. Lacrymales, Lacrymal passages—v. Primæ, Ways, digestive—v. Secundæ, Ways, second.

VIAL, Phiala.

VIANDES FAISANDÉES, see Hyposaprus.

VIBICES, *Mol'opes, Striæ*, (F.) *Vergetures*, ‘Stripes.’ Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRAMEN, Oscillation.

VIBRANS, Vibratory.

VIBRATILE, Vibratory.

VIBRATILITY, *Vibratilitas*, (F.) *Vibratilité*, from *vibrare, vibratum*, ‘to quiver.’ Capability of being thrown into vibration.

VIBRATIO, Oscillation—v. Cardiacæ, Palpitation—v. Cordis, Palpitation.

VIBRATION, PECTORAL, see Fremitus—v. Tactile, see Fremitus—v. Tussive, see Tussive.

VIBRATIONS OF SOUND, see Sound.

VIBRATOR, Deferens vas.

VIBRATORY, *Vibrans, V'ibrative*, (F.) *Vibratile, Vibratoire*. An epithet applied to the pain that accompanies some neuralgiæ, which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see Cilia.

VIBRATUS, Oscillation.

VIBRIO: from *vibrare*, ‘to quiver.’ A genus of infusory animalcules, of which different species are met with,—for example, *Vibrio prolifer* in almost all putrescent fluids containing protein, and in the pus of chancres; in which last the *V. lineola* has likewise been found.

VIBRIS'SÆ. Same etymon. The hairs which grow at the entrance of the nostrils and of other outlets. In the feline tribe, the whiskers.

VIBURNUM CASSINOIDES, *Ilex Paraguensis*.

VIBURNUM DENTA'TUM, *Arrow Wood, Mealy Tree, Tily* of the Indians. *Ord. Caprifoliaceæ*. A high indigenous shrub, of the same family as *V. lentago*; the bark of which has been used by the Indians as a diuretic.

VIBURNUM EDU'LE flourishes in the Hudson's Bay territory. The fruit has an orange colour, and is less acid, more fleshy, and more agreeable to the taste than the cranberry.

VIBURNUM LEVIGATUM, *Ilex Paraguensis*.

VIBURNUM LENTA'GO, *Sweet Viburnum, Nanny-berry*. A handsome indigenous tree, of the honeysuckle family—*Caprifoliaceæ*—which flowers in May and June. It has been used as an antiperiodic.

VIBURNUM PRUNIFOLIUM, *Black Haw, Stoe-leaved Viburnum, Sloe*. Indigenous: flowering in May. The leaves have been used as tea.

VIBURNUM SLOW-LEAVED, *V. prunifolium*—v. Sweet, *V. lentago*.

VIC-LE-COMPTE, MINERAL WATERS OF. Vic-le-Compte is a small village in the de-

partment of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICARIOUS, *Vica'rius*, from *vicia*, 'change, place.' Taking the place of another:—as 'vicarious secretion,' *Secretio vica'ria*; a secretion which takes place in one part instead of another.

VICAR'S BRAY, MINERAL WATERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone. The water is one of the strongest chalybeates known.

VICE, Cachosis.

VICE DE CONFORMATION. Faulty formation of a part of the body.

VICHY, MINERAL WATERS OF. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphurous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

VICHY WATER, FACTITIOUS, Aqua Vicien'sis, (F.) *Eau de Vichy*, is made of simple acidulous water, impregnated with twice its bulk of carbonic acid, ℞xxx; subcarbonate of soda, gr. xxxij; sulphate of soda, gr. xvj; chloride of sodium, gr. iv; subcarbonate of magnesia, gr. ss; chloride of iron, gr. ʒ. Mix. Ph. P.)

VICIA ERVILIA, Ervum.

VICIA FABA, Faba, F. major seu vulgaris, Or'ubus faba, Common Garden Bean, (F.) Fève ou Fève des marais. Ord. Leguminosæ. Ser. Syst. Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINTRACTUS, Erysipelas.

VICINTRAHA, Erysipelas.

VICTORIALIS FEMINEA, Gladiolus vulgaris—v. Longa, Allium victoriale—v. Rotunda, Gladiolus vulgaris.

VICTÛS RATIO, Diet.

VIDANGES, Lochia.

VIDIAN CANAL, Pterygoid canal—v. Nerve, Pterygoid nerve.

VIE, Life—v. Durée de la, see Longevity—v. Moyenne, see Longevity.

VIEILLESSE, Senectus.

VIELLOTTE, Colchicum autumnale.

VIERGE, Virgin.

VIF ARGENT, Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILIE, Egregorsis—v. Nimie, Coma vigil.

VIGILIUM, Egregorsis.

VIGNE, Vitis vinifera—v. Blanche, Bryonia alba—v. de Judée, Solanum dulcanara—v. du Nord, Humulus lupulus—v. Vierge, Bryonia alba.

VIGNETTE, Spiræa ulmaria.

VIGNOLE, Mercurialis.

VIGOR, Acme.

VILLA FRANCA, (CLIMATE OF.) This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains;

and is more effectually sheltered from the north and north-west winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, see Villous membranes.

VILLOUS, Villo'sus, (F.) Villoux, from villus, 'a hair.'

VILLOUS MEMBRANES OR COATS, Velamenta Bombyc'ina, (F.) Membranes villenses, Membranes velutæ, are such as are covered with soft papillæ or Villi, Flocci, Flocculi, Vesiculæ, Cylindri, Tubi Membrana'cei, constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chussier gives the name *simple villous membranes* to the serous membranes; and that of *complicated or follicular villous membranes* to the mucous membranes.

VIN, Wine—v. de Bordeaux, Claret—v. de Pontet, see Pontet—v. de Quinquium composé, Vinum de kinâ kinâ compositum—v. Rouge d'Oporto, Vinum Portugallicum—v. Sec, Sack.

VINAIGRE, Acetum, see Aceticum acidum—v. Scillitique, Acetum scillæ—v. de Bois, Pyrolicnicum acid.

VINAIGRES MÉDICINAUX, Acetia.

VINCA MINOR, V. pervin'ca, from vincio, 'I bind,' because of its usefulness in making bands. *Clematis daphnoï'des major, Lesser periwinkle, (F.) Pervenche, Violette des Sorciers.* It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, Asclepius vincetoxicum.

VINCTURA, Fascia.

VINCULA, Fascia.

VINCULUM, Bandage, Lien—v. Caninum, Frænum penis—v. Linguae, Frænum lingue—v. Præputii, Frænum penis—v. Umbilicale, Funiculus umbilicalis.

VINE, Vitis vinifera—v. Grape, Vitis vinifera.

VINE POISON, Rhus radicans.

VINE, WILD, Pareira.

VINEGAR, AROMATIC SPIRIT OF, see Aceticum acidum.

VINEGAR OF CANTHARIDES, Acetum cantharidis.

VINEGAR, COMMON, Acetum—v. Distilled, see Aceticum acidum—v. Estragon, Artemisia dracuncululus—v. Marseilles, Acetum aromaticum.

VINEGAR OF MEADOW SAFFRON, Acetum colchici—v. of Opium, Gutta nigra.

VINEGAR, RADICAL, Aceticum acidum.

VINEGAR OF SQUILLS, Acetum scillæ—v. of the Four Thieves, Acetum aromaticum.

VINEGAR, THIEVES', Acetum aromaticum—v. Whey, see Acetum.

VINEGAR OF WOOD, see Aceticum acidum.

VINETTE, Rumex acetosa.

VINETTIER, Oxyacantha Galeni.

VINEUX, Vinous.

VINOLENTA, see Temulenta.

VINOLENTIA, Temulenta.

VINOSUS, Vinous.

VINOUS, Vino'sus, Veno'sdes, Venoï'des, (F.) Vieux, from vinum, 'wine.' Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, Wine, Sherry wine (Ph. U. S. 1842). See Wine. A medicinal wine, (F.) Vin médicinal, Onolê, Onolatnre.

VINUM ABSINTHITES, Wine of Wormwood, (Fol. absinth. exsic., absinth. Pontic., āā ʒvj, vini all'i Oiv. Macerate for 24 hours, and strain. Ph. P.) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADUSTUM, Brandy—v. Album, Sherry wine (Ph. U. S. 1851), see Wine—v. Album Hispanicum, see Wine—v. Album Montanum, see Wine.

VINUM AL'OEËS, V. aloë's Sacotori'næ seu aloët-icum seu oro'mo-aloëticum, Tinctu'ra hi'era, Tinct-

u'tra sacra, Wine of Aloes. (Aloës in pulv. ℥j, cardam. cont., Zingib. cont., āā ℥j; vini alb. Oj.) Macerate for 14 days, and filter. *Ph. U. S.*) Purgative and stomachic, according to the dose. Dose, f℥j to f℥ij.

VINUM AMARUM, V. Gentianæ comp.—v. Amarum scillicetum, &c., V. diureticum amarum—v. Amarum cum spiritu vini, V. gentianæ compositum—v. Antimoniale, V. antimonii tartarizati—v. Antimoniatum Huxhami, V. antimonii tartarizati—v. Antimonii potassio-tartratis, V. antimonii tartarizati.

VINUM ANTIMONII, V. antimo'ni tartariza'ti seu tartra'tis antimonii seu antimo'ni potas'sio-tartratis seu benedic'tum seu antimoniatum Huxha'mi seu antimoniale seu emet'icum, Lignor tar'tari emet'ici, Essen'tia antimonii seu stib'ii, Aqua benedic'ta Rulan'di, Solution of tartarized antimony, Antimonial wine. (Ant. et Potass. tart. ℥j, vini albi f℥x. Dissolve the tartarized antimony in the wine. *Ph. U. S.*) Each fluidounce contains two grains of the tartrate.

The ordinary Antimonial wine is made with glass of antimony ℥j, sherry Oiss.

Word's Red Drop consists of a strong vinous solution of tartarized antimony.

VINUM ANTISCORBUTICUM, Antiscorbutic wine. (Rad. armoraciz recent. ℥j, fol. cochleariz recent., nasturtii aquaticæ, trifol. aquaticæ, semin. sinap., āā ℥ss, ammoniac muriat. ℥ij, vin. albi Oij.) Macerate for 36 hours; filter, and add tincturæ cochlear. ℥ss. *Ph. P.*) Stimulant and tonic. Dose, f℥ss to f℥ij.

VINUM AROMATICUM, Aromatic wine. (Species aromatic. ℥iv, vin. rubr. Oij.) Macerate for 6 days and filter. *Ph. P.*) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMO-ALOETICUM, V. aloes—v. Benedictum, V. antimonii tartarizati.

VINUM CAMPANUM, V. Campanæcem. Champagne wine. A well-known sparkling wine of France. See Wine.

VINUM CANARINUM, see Wine—v. Chalybeatum, V. ferri—v. Cinchonæ compositum, V. de kinâ kinâ comp.

VINUM COLCHICI, V. Colchici Radicis, Wine of Colchicum, Want's Eau d'Husson. (Colchic. rad. bene contus. lbj, vini alb. Oij.) Macerate for 14 days, with occasional agitation, and then express strongly, and filter. *Ph. U. S.*) It may also be prepared by displacement. Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gtt. 40 to f℥j.

Reynolds's Specific for gout and rheumatism consisted of the fresh bulb of Colchicum ℥vij, Sherry wine, f℥xvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with syrup of poppies and flavoured with rum. Reynolds is said to have killed himself by taking an over-dose of it.

VINUM COLCHICI RADICIS, V. colchici.

VINUM COLCHICI SEMINIS, Wine of Colchicum seed. (Colchic. sem. cont. ℥iv; vini alb. Oij.) Macerate for 14 days, with occasional agitation, then express and filter. *Ph. U. S.*) Dose, f℥j to f℥ij.

VINUM CREMATUM, Brandy.

VINUM DIURETICUM AMARUM, V. amarum scillicetum compositum in Charita'tis Nosocomio usurpatum, Bitter diuretic wine. (Cort. cinchon., Winteran., limon., āā ℥ij, rhus toxicodendr., scilicet, cacumin. angelicæ, āā ℥ss, fol. absinth., melissa. āā ℥j, baccar. junip., macis, āā ℥ss, vin. alb. Ovij.) Macerate and filter. *Ph. P.*) Stimulant, tonic, and diuretic. Dose, f℥ss to f℥ijss.

VINUM EMETICUM, V. antimonii tartarizati.

VINUM ERGOTÆ, Wine of Ergot. (Ergotæ, cont., ℥ij; vini alb. Oj.) Macerate for 14 days,

with occasional agitation; then express and filter. *Ph. U. S.*) Dose, ℞xx to f℥j to produce the peculiar effects of ergot.

VINUM FERRATUM, V. Ferri.

VINUM FERRI, V. Chalybeatum seu ferratum seu Martiatum seu Martis, Tinctura Martis vino'sa seu Martis cum vino, Steel wine, Wine of Iron. (Iron wire, ℥j; Sherry wine, Oij (Imp. meas.). Digest for thirty days and filter. *Ph. L.*) Tonic. Dose, f℥j to f℥iv.

It is sometimes made by adding two pints of wine to two ounces of iron filings; macerating and filtering.

VINUM GENTIANÆ, V. G. Compositum seu Amarum seu Amarum cum spiritu Vini, Infusum amarum vino'sum, Compound wine of gentian, Wine bitters. (Rad. gentian. Intæā ℥ss, cort. cinchon. offic. ℥j, cort. aurant. ℥ij, canellæ alb. ℥j, alcohol. dilut. f℥iv, vini alb. Hispanic. Oijss. *Ph. E.*) Dose, f℥j to f℥vj.

VINUM HIPPOCRATICUM, Claret—v. Hispanicum, Vinum, see Wine—v. Hordeaceum, Cerevisia—v. Hydrotodes, see Hydrotid.

VINUM IPECACUANÆ, Ipecacuanha wine. (Ipecacuan. cont. ℥ij, vini alb. Oij.) Macerate for 14 days, express, and filter. Emetic and diaphoretic. Dose, as an emetic, f℥iv to f℥x.

VINUM DE KINÂ KINÂ COMPOSITUM, V. cincho'næ compositum, Compound bark wine, (F.) Vin de quinquina composé. (Cort. cinchon. pulv. lss, quassia, cort. Winteran., cort. aurant. sicc., āā ℥ss, alcohol. (12° to 22° Beaumé) Oj.) Macerate for 24 hours; and add vini albi Ovj. Macerate for four days, and filter. *Ph. P.*) Tonic, febrifuge, and stomachic. Dose, f℥ss to f℥ij.

VINUM MARTIATUM, V. ferri—v. Martis, V. ferri—v. Medicatum, see Claret.

VINUM MEDICINALE, Medicated Wine. Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines.

VINUM MERUM, Aeratum—v. Nicotianæ tabaci, V. tabaci—v. Opiatum fermentatione paratum, Laudanum abbatiss Rousseau.

VINUM OPII, V. de opio compositum, Laudanum liquidum Sydenhami seu Hoffmani, Tinctura Thebæica, Wine of Opium, Sydenham's Laudanum, Ford's laudanum. (Opii in pulv. ℥ij; cinnam. cont., caryophyll. cont. āā ℥j, vini albi Oj.) Macerate for 14 days; express and filter.—*Ph. U. S.*) Narcotic. Dose, gtt. xv to f℥j.

VINUM DE OPIO COMPOSITUM, V. opii—v. Picanum, Pissites.

VINUM PORTUGALICUM, V. rubrum, (*Ph. U. S.* 1851.) (F.) Vin rouge d'Oporto. Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States; but greatly used in England.

VINUM QUINÆ, Wine of Quinina. (Wine lbj, sulphate of quinia gr. x. Mix.) Dose, f℥ijss or more; according as it is used as a stomachic, or to arrest ague. A Vinum Cincho'næ may be made in the same way.

VINUM RHEI, V. R. palma'ti. V. Rhabarbari, Tinctura Rhabarbari Vino'sa, Elixir Rheii dulcè, E. R. Compositum, Rhabarb Wine. (Rhei cont. ℥ij, canellæ cont. ℥j, alcohol. dilut. f℥ij, vini albi, Oj.) Macerate for 14 days; express and filter.—*Ph. U. S.*) Laxative and stimulant. Dose, f℥iv to f℥ijss.

VINUM RHEI PALMATI, V. Rhei—v. Rhenanum,

see Wine — v. Rhabarbari, *V. rhei palmati* — v. Rubrum, *V. Portugallicum* — *ϕ. Rubrum Portugallicum*, see Wine.

VINUM TAB'ACI, *Vinum Nicotianæ Tabaci, Tobacco Wine.* (*Tabac. incis.* ζ ij, *vini albi*, Oj. Macerate for 14 days; express and strain. *Ph. U. S.*) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not used. Dose, gtt. xx to xxxvj.

VINUM VERA'TRI, *V. V. albi, Wine of White Hell-bore.* (*Veratri cont.* ζ iv; *Vini albi*, Oj. Macerate for 14 days, express and filter. — *Ph. U. S.*) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALBI, *V. Veratri* — v. Xericum, see Vinum.

VIOL, Stuprum.

V'OLA, *Viola odorata seu mar'tia, Ion, Matrona'lis, Viola'ria, Sweet Violet, (F.) Violette à bouquets, V. odorante. Ord. Violacæ.* The flowers of the sweet violet, have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANINA, *V. sylvest'ris, Dog Violet.* The root of this plant is emetic and cathartic. Dose, \mathcal{J} i.

VIOLA IPECACUANHA, see Ipecacuanha — v. Lutea, *Cheiranthus cheiri* — v. Martia, *Viola* — v. Odorata, *Viola* — v. Palustris, *Pinguicula vulgaris.*

VIOLA PEDA'TA, *Viola, (Ph. U. S.)* This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA SYLVESTRIS, *V. Canina.*

VIOLA TRI'COLOR, *Jace'a tricolor, Herba seu Flos Trinitatis, Heart's ease, Pansy, Pensy, Pansies, (Prov.) Beedy's eyes, Biddy's eyes, (F.) Pensée, P. sauvage.* The decoction of this beautiful little plant has been recommended in diseses of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, Viola.

VIOLET, DOG, *Viola canina* — v. Dog's Tooth, *Erythronium Amuricanum.*

VIOLET BLOOM, *Solanum dulcamara.*

VIOLET, SWEET, *Viola.*

VIOLETTE À BOUQUETS, *Viola* — v. *Odorante Viola* — v. *des Sarciers, Vincen minor.*

VIOLIER JAUNE, *Cheiranthus cheiri.*

VIORNA, *Clematis vitalba.*

VIPER, EGYPTIAN, *Aspis* — v. Ten-inch long, *Echidna ocellata.*

VIPER GRASS, *Scorzonera.*

VIPERA, *Coluber berus.*

VIPERARIA, *Aristolochia serpentaria, Scorzonera.*

VIPERINA VIRGINIANA, *Aristolochia serpentaria.*

VIPÉRINE DE VIRGINIE, *Aristolochia serpentaria.*

VIPER'S DANCE, *Chorea.*

VIR, Aner, *Penis* — v. *Effeminatus, Gynæeaner.*

VIRAGO, see Pogoniasis.

VIREUX, *Virulent.*

VIRGA, *Penis* — v. *Cereæ, Bongie* — v. *Cerebri, Pineal gland.*

VIRGILLA, *Cladrastis tinctoria.*

VIRGIN, *Virgo, genitive virginis, Par'thenus, Erpes nuptiarum, (F.) Vierge, Puella.* A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

VIRGIN MARY THISTLE, *Centaurea benedicta.*

VIRGINAL, *Virginalis*, from *virgo, virginis*, 'a virgin.' The external genital organs of the virgin.

VIRGINAL MEMBRANE, *Hymen.*

VIRGINIA, MINERAL WATERS OF. There are several celebrated mineral springs in Virginia,

on the western side of the Blue Ridge. Two Thermal springs exist in Bath county. The Warm Spring, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The Hot Spring is a few miles from the warm. Its temperature is 107°. They are both slightly sulphurous. The Sweet Springs are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The White Sulphur, as well as the Red Sulphur, and Salt Sulphur Springs, are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. Prof. W. B. Rogers analyzed the water of the White Sulphur, and found it to be composed as follows: — Gaseous contents in a wine gallon. Sulphuretted hydrogen, 2.5 cubic inches, carbonic acid, 2; oxygen, 1.448; nitrogen, 3.552. — Total, 9.5. Solid contents in a pint; sulphate of magnesia, 5.588 grains; sulphate of lime, 7.744; carbonate of lime, 1.150; chloride of calcium, 0.204; chloride of sodium, 0.180; oxide of iron, a trace; loss, 0.410. Total, 15.276 grains.

The Rockbridge Alum Springs are situated 17 miles west of Lexington, and are in much favour. Their solid constituents are said to be, — sulphate of potassa, 1.765 gr.; sulphate of lime, 3.263; sulphate of magnesia, 1.763; protoxide of iron, 4.863; alumina, 17.905; erenate of ammonia, 0.700; chloride of sodium, 1.008; silicic acid, 2.840; free sulphuric acid, 15.224; free carbonic acid, 7.536 — water 58315.133. They are used in dyspepsia, serofula, chronic diarrhœa, and cutaneous affections. The Bath Alum Springs are about 17 miles west of the Rockbridge Springs, in Bath county. They consist of free sulphuric acid, 7.878 grs; carbonic acid, 3.846; sulphate of potassa, 0.258; ungesia, 1.282; lime, 2.539; protoxide of iron, 21.776; alumina, 12.293; erenate of ammonia, 1.776; silicic acid of soda, 3.150; water, 58317.202. They are more chalybeate than the last.

About 15 miles from Staunton are Stribling's Springs — a sulphuretted water; and near Warrenton, in Fauquier county, there is a sulphurous water, called Lee's Springs, which is much frequented. Berkeley or Bath, and Copon Springs are likewise celebrated.

VIRGINIA, *Hymen.*

VIRGINIS VITIATIO, *Defloration.*

VIRGIN'ITY, *Virgin'itas, Parthenei'a, Integritas, Maid'enhood, Maid'ehend, (F.) Virginité, Pucelage, from virgo, virginis, 'a virgin.'* The state of one who has never had carnal commerce.

VIRGIN'S BOWER, COMMON, *Clematis vitalba, Clematis Virginica* — v. Bower, upright, *Clematis recta* — v. Sweet-scented, *Clematis flammula.*

VIRGIN'S MILK, *Lac Vir'ginis seu Virginalis, (F.) Lait virginal.* A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, sub-acetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS DEFLORATA, *Defloration.*

VIRGO, *Virgin* — v. Aurea, *Solidago virgaurea.*

VIRGULA, *Penis.*

VIRIDE ÆRIS, *Cupri subacetis* — v. *Montanum, Cuprum.*

VIRILE, *Penis.*

VIRILES' CENCE: from *virilis, (vir, 'a man,')* 'manly.' The state of the aged female in which she assumes certain of the characteristics of the male. — Melliss.

VIRILIA, *Pudibilia.*

VIRILITY, *Adult age.*

VIROSUS, *Virulent.*

VIRTUE, Faculty.

VIRTUS FORMATRIX, Plastic force — v. Plastica, Plastic force.

VIRULENT, *Virulentus*, *Viro'sus*, (F.) *Vireux*, from *virus*. That which is of the nature of a virus or which is caused by a virus. Highly noxious.

VIRUS, from *vis*, 'force,' plural *vires* [?]. A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic*, *vaccine*, and *syphilitic viruses*. *Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process, — a *morbid poison*.

VIRUS, Ichor, Poison, Sanies — v. Vaccine, see Vaccina — v. Vitale, Sperm.

VIS, Force — v. Adhæsionis, Cohesion (force of) — v. Attractionis, Cohesion (force of) — v. Aucta, Sthenia — v. Cohæsionis, Cohesion (force of) — v. Conservatrix, V. medicatrix naturæ — v. Elastica, Elasticity — v. Essentialis, Plastic force.

VIS EXPULTRIX. The organic force by which, it was supposed, the useless was removed from the body.

VIS FORMATIVA, Plastic force — v. Generatrix, Potentia generandi — v. Imminuta, Asthenia — v. Insita, Irritability — v. Irritabilitatis, Irritability.

VIS MEDICATRIX NATURÆ, V. conservatrix, *Antocrati'a*, *Autonom'ia*, *Autocrat'oria*, *Anthy-gian'sis*, *Antotherape'i'a*, *Physiat'ricæ*, *Physio-antocrati'a*, *Physiantocrati'a*. (F.) *Force médicatrice*. A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS METABOLICA, Metabolic force.

VIS MOR'TUA, Under this name Haller included the mechanical properties of membrane. — flexibility, extensibility, elasticity, &c. — which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS MUSCULARIS, Myodynamia — v. Nervorum, Nervous power — v. Nervosa, Nervous power — v. Plastica, Plastic force — v. Reproductiva, Plastic force — v. Vitæ, Irritability.

VIS VITALIS, *Vis seu Fac'ultas Zo'tica*. (F.) *Force vitale*. The *vital force* — *Biod* of Baron Von Reichenbach — which distinguishes living matter from the dead. Also, Irritability.

Vis ZOTICA, Vis vitalis.

VISAGE, Countenance.

VISCAGO BEHEN, Cucubalus behen.

VISCERA, Entrails.

VISCERAL, Splanchnic.

VISCERALIS, Stomachal.

VISCERATION, Exenterismus.

VISCÈRES, Entrails.

VISCONIA, Physconia.

VISCUM ALBUM, *Ixos*, *Ix'ia*, *Dabach*, *Mis'tetoe*, (F.) *Gui*, *Gui de Chêne*, *Gillon*. A parasitic plant, which grows on a number of trees. *Order*, Loranthaceæ. *Sex. Syst.* Diœcia Tetrandria. That of the oak — *Viscum querc'inum* — has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves

being given in powder, in the dose of ʒss or ʒi. The berries, also called *Pommes hémorrhoidales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

VISCUM CAPE'N'SÈ. A South African parasitic shrub, which grows on the stems of several species of *Rhus* and *Euclea*.

VISCUM FLAVES'CENS, V. *verticilla'tum*, *Yellow* or *Yellowish Mistletoe*, indigenous, has been given in similar cases as the *Viscum album*.

VISCUM VERTICILLATUM, V. *flavescens*.

VISIO, Pupil, Vision.

VISION, *Sight*, *Vis'io*, *Visus*, from *videre*, *visum*, 'to see;' *Opsis*, *Omnia*, (F.) *Vue*. The action of seeing. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections that might otherwise occur, the anterior of the eye is lined by a membrane — the choroid — which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, BINOCULAR, see Binocular — v. Coloured, Chromopsia — v. Double, Diplopia — v. Iridescent, Chromopsia — v. Manifold, Polyopsia — v. Multiple, Polyopsia — v. Phantasmatum, Metamorphopsia — v. Single, see Binocular.

VISNOMY, Physiognomy.

VISORIUM ORGANUM, Eye.

VISORIUS, Visual.

VIS'UAL, *Visua'lis*, *Viso'r'ius*. (F.) *Visuel*. Same etymon as Vision. That which concerns the sight or belongs to vision.

VISUAL ANGLE is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

VISUEL, Visual.

VISUS, Vision — v. Aeris, Oxydercia — v. Aerior, Nyctalopia — v. Coloratus, Chromopsia — v. Debilitas, Asthenopia — v. Decolor, Achromatopsia — v. Defiguratus, Metamorphopsia — v. Dimidiatus, Hemiopia — v. Diurnus, Hemeralopia — v. Duplicatus, Diplopia — v. Hebetudo, Amblyopia — v. Juvenum, Myopia — v. Lucidus, Photopsia — v. Muscarum, see Metamorphopsia — v. Nebulosus, Nebula — v. Nocturnus, Nyctalopia — v. Senilis, Presbytia.

VITA, Life — v. Propria, Irritability.

VITAL, *Vita'lis*, *Bio't'ic*, *Bio't'icus*. (F.) *Vital*, from *vita*, 'life.' Relating or appertaining to life.

VITAL CAPAC'ITY, *Pulmon'ic* or *Lung capacity*. A term employed by Dr. Hutchinson to designate the number of cubic inches of air, which a person can forcibly expire after a full inspiration.

VITAL DYNAMICS, see Dynamic—v. Force, Vis vitalis.

VITAL PRINCIPLE, *Flam'mala seu Anra vitalis, Microcosm'ator*, (F.) *Flamme vitale, Vital Flame*. The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

VITAL PROPERTIES, see Properties, vital—v. Statistics, Statistics, medical.

VITALBA, Clematis vitalba.

VITALISM, *Vitalion'us*. The doctrine of the *vitalist*—*vitalista*—who ascribes every function of the organism to the direct agency of the vital principle.

VITALIST, see Vitalism.

VITALITY, *Vital'itas*, (F.) *Vitalité*, from *vita*, 'life.' The vital principle: also, used in the sense of vital action or movement.

VITALIZE. To endow with life.

VITALS, *Vital'ia*. Parts that are necessary for life—the heart, lungs, and nervous centres more especially.

VITARO'BORANT, PALMER'S. A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to Revalenta.

VITELLARY, Vitelline—v. Membrane, Zona pellucida.

VITELLINE, Zona pellucida.

VITELLINE, *Vitellinus, Vit'ellary, Lecitho-Ion*, from *vitellus*, 'the yolk of an egg.' Appertaining to or resembling the vitellus or yolk. Also, the yolk membrane. See Vesicula umbilicalis.

VITELLINE DISC, Proliferous Disc—v. Fluid, see Vesicula umbilicalis.

VITELLINE PEDICLE or APOPHYSIS is the pedicle which attaches the umbilical vesicle to the embryo. See Vesicula umbilicalis.

VITELLINE POUCH, Vesicula umbilicalis—v. Vessels, Omphalo-mesenteric.

VITELLO-MESENTERIC, Omphalo-mesenteric.

VITELLUM OVI, see Ovum.

VITELLUS OVI, see Ovum.

VITEX, from *vico*, 'I bind' [?]; *V. Agnus Castus* *sex verticillata*, (F.) *Gatillier, Petit Poivre, Poivre de moine ou sauvage*. Ord. Verbenaceæ. *Sex. Syst.* Didynamia Angiosperma. The *Chaste Tree*. The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiaes.

VITI SALTUS, Chorea.

VITIA PRIMÆ CONFORMATIONIS, see Monster.

VITIATIO, Stuprum.

VITILIGINES, Ephclides.

VITILIGO, Lepra—v. Alphas, Lepra alphasides—v. Melas, Lepra nigricans—v. Nigra, Lepra nigricans.

VITILIGO'DEA, from *vitiligo*, and *adōs*, 'resemblance.' A disease of the skin, so called from its resembling the vitiligo of Willan. It appears under two forms; either as tubercles—*V. tuberosa*—varying from the size of a pin's head to that of a large pea, isolated or confluent; or as yellow patches of irregular outline, slightly elevated, and with but little hardness—*V. plana*.

VITIS ALBA SYLVESTRIS, Bryonia alba—v. Apyrena, see *V. Coriinthiaca*.

VITIS CORINTHIACA. Ord. Vitaceæ. *Sex. Syst.* Pentandria Monogynia. This plant affords the *Uva Coriinthiaca passæ minoris, Passæ Coriinthiaca, Pass'ula minoris, Coriinthiaca, Currants*,

(F.) *Raisins de Coriathe*; which are the dried fruit of the *Vitis Coriinthiaca* or *Vitis apyrena*; and are similar, in their properties, to the raisin.

VITIS IDÆA MYRTILLUS, Vaccinium myrtillus—v. Idæa Palustris, Vaccinium oxycoccos—v. Idæa punctata, Vaccinium vitis idæa—v. Sativa, *V. vinifera*.

VITIS VINIFERA, *V. sativa, Am'pelos, A. Cœnopharos, Grape vine, Vine*, (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lacryma*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice*. The *Grape, Uva, Botrys, Staph'ylē, Rhaz*, (F.) *Raisin*, when ripe, is a wholesome delicious fruit; and, when dried, forms the *Uva passæ majoris, Pass'ula majoris, Uva passæ solè sicca'ia, Uva passæ* (Ph. U. S.), *Zibebæ, Raisins*. These are inodorous; and to the taste, sub-acidulous, sweet, and mucilaginous. They are demulcent and nutritive.

VITIUM, Disease—v. Cadueum, Epilepsy.

VITIUM CONFORMATIONIS. A disease or fault of conformation.

VITIUM DIVINUM, Epilepsy—v. Herculeum, Epilepsy—v. Scrophulosum, Serofula.

VITRARIA, Parietaria.

VITRÉ, Hyaline.

VITREO-CAPSULITIS, Hyalitis.

VITREOUS, Hyaline—v. Humour, Corpus vitreum—v. Humour of the ear, *Vitriue auditivæ*.

VITREUS, Hyaline.

VITREUX, Hyaline.

VITRINA OCULARIS, Corpus vitreum.

VITRINE AUDITIVE (F.), from *vitrum*, 'glass'; *A'quila vit'rea auditiv'a, Eud'olymph, Liquor or Fluid of Scarpa, Vitreous Humour of the Ear*. The fluid contained in the membranous labyrinth of the ear, so called from its resemblance to the vitreous humour of the eye.

VITRIOL, Ferri sulphas—v. Blue, Cupri sulphas—v. Green, Ferri sulphas—v. Roman, Cupri sulphas—v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas—v. Ammoniacale, Ammonia sulphas—v. Caruleum, Cupri sulphas—v. Cupri, Cupri sulphas—v. Cyprinum, Cupri sulphas—v. Ferri, Ferri sulphas—v. Goslaricene, Zinci sulphas—v. Martis, Ferri sulphas—v. Romanum, Cupri sulphas—v. Veneris, Cupri sulphas—v. Viride, Ferri sulphas—v. Zinci, Zinci sulphas.

VITRUM, *Hy'alos, Glass, Beancia*, (F.) *Verre*. Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically. The saline scum, which swims on glass when first made, has been used in tooth-powders. It is called *Soudure, Sel de verre, Glass Gull, Fel vitri*, &c.

VITRUM ANTIMONII, see Antimonii vitrum—v. Hypoclepticum, Separatorium—v. Oculare, see Spectacles—v. Sublimatorium, Aludel.

VITTA, *Bandelette, Caul*.

VITTARIA CETERACH, Asplenium ceterach.

VITTE VAYR, Andropogon muricatus.

VIVACE, from *viva*, *vivacis*, (*vivere*, 'to live,') 'living long, tenacious of life.' An epithet given by Levret to uterine polypi, which he considers to be, commonly, vegetations of some ulcer in the interior of the uterus, and incurable.

VIVÆSECTIO, Vivisection.

VIVERRA CIVETTA, see Civetta.

VIVIPARE, Viviparous.

VIVIPARITÉ, see Viviparous.

VIVIP'AROUS, (F.) *Vivipare*, from *vivus*, 'alive,' and *pario*, 'I bring forth.' An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*. The condition may be termed *Viviparousness*. (F.) *Viviparité*. See Generation.

VIVIPAROUSNESS, see *Viviparous*.

VIVISECTION, *Vivisectio*. *Vivæsectio*, *Biotom'ia*, from *vivus*, 'alive,' and *secare*, *sectum*, 'to cut.' The act of opening or dissecting living animals. One who performs vivisections is a *vivisector*.

VOCAL, Oral — v. Cords, see Cords, vocal — v. Ligaments, see Cords, Vocal — v. Tube, see Tube, vocal.

VOCALIS, Vowel.

VOCE DI PETTO, see Voice — v. *di Testa*, see Voice.

VOICE, *Vox*, *Audē*, *Phonē*, (F.) *Voix*, from *vocare*, 'to name, to call.' An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phonation*. It is a function of animal life; and, in animals, is limited to the production of the *simple* or *instinctive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated, — an evidence of his intellectual superiority.

VOICE, ARTICULATED, *Speech*, *Loque'la*, *Glossa*, *Glotta*, *La'lia*, *Phrasis*, (F.) *Parole*, *Voix articulée*, is the voice as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*, or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarinet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supra-laryngeal*, or *notes of the second register*. They constitute the *pharyngeal voice*, *falsetto* or *fauvette voice* or *voce di testa* (I.), *Voix de tête*, *Voix de fausset* (F.). The *laryngeal voice* or *voice of the first register*, *Chest voice*, is the *Voce di Petto* (I.), *Voix de Poitrine* (F.). The laryngeal voice, which is always more elevated, by an octave, in the female than in the male, furnishes the types called *Soprano*, *Alto* or *Contralto*, *Tenor* and *Bass*. The first two belong to the female voice; the last two to the male. The *Baritone* is between the bass and tenor.

VOICE, BLEATING, *Egophony* — v. *Cavernous*, *Pectoriloquy* — v. *Chest*, see Voice, articulated.

VOICE, CHOL'ERIC, *Vox Choleric'a*. The peculiar husky voice of those affected with cholera.

VOICE, CONVULSIVE, *Vox convulsiv'a*, (F.) *Voix convulsive*. A neurosis of the voice, consisting in the production of discordant sounds — acute and grave — which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, FALSETTO, see Voice — v. *Goat's*, *Egophony* — v. *Laryngeal*, *Laryngophony*, see Voice

— v. *Pharyngeal*, see Voice — v. *Tracheal*, *Laryngophony*.

VOIE, Way.

VOIES DIGESTIVES, Ways, digestive — v. *Lacrymales*, *Lachrymal passages* — v. *Premières*, Ways, digestive — v. *Secondes*, Ways, second — v. *Urinaires*, *Urinary passages*.

VOILE DU PALAIS, *Velum pendulum palati* — v. *Médullaire inférieure*, *Velum medullare inferius* — v. *Médullaire supérieure*, *Valvula Viussenii*.

VOIX, Voice — v. *Aigre*, see Acid — v. *Articulée*, Voice, articulated, *Pectoriloquy* — v. *Bourdouante*, see Resonance — v. *Bronchique*, Resonance — v. *Caverneuse*, *Pectoriloquy* — v. *Chérotante*, *Egophony* — v. *Égophonique*, *Egophony* — v. *de Fausset*, see Voice, articulated — v. *de Poitrine*, see Voice, articulated — v. *de Polichinelle*, *Egophony* — v. *Séuile*, *Egophony* — v. *de Tête*, see Voice, articulated — v. *Tubaire*, see Resonance.

VOLA, Palm — v. *Manūs*, Palm — v. *Pedis*, Sole.

VOLANT D'EAU, *Nymphæa alba*.

VOLATICA, Lichen.

VOLATILIZATION, *Volatilisa'tio*, *Volatisa'tio*, from *volare*, 'to fly.' The operation of reducing volatilizable substances into gas or vapour.

VOLATISATIO, *Volatilization*.

VOLIT'ION, *Volit'io*, from *volo*, 'to will.' The act of willing. Hence:

VOLIT'IONAL, relating to volition. Thus the muscles may be moved by a *volitional* or by an *emotional* impulse.

VOLNUS, Wound.

VOLONTAIRE, *Voluntary*.

VOLONTÉ, *Voluntas*.

VOLSELLA, *Acanthobolos*, Forceps, *Madisterium* — v. *Patini*, *Valet à Patin*.

VOLTAISM, *Galvanism*.

VOLTUS, *Countenance*, *Face*.

VOLUNTARY, *Heu'sius*, *Volunta'rius*, (F.) *Voloutaire*, from *voluntas*, 'will.' Relating to the will; as '*voluntary muscles*;' muscles which act in obedience to the will.

VOLUNTAS, *Volent'ia*, *Arbit'rium*, *Cupid'itas*, *Boule'sis*, *Bule'sis*, *Thele'ma*, (F.) *Volonté*, from *volo*, 'I will.' Will or desire.

VOLUNTAS seu CUPIDITAS DESEDEND'I, *Lubi'do intest'ni*. The desire to go to stool.

VOLVA, *Valva*.

VOLYULUS, *Ileus* — v. *Intestorum*, *Intus-susceptio*.

VOMENDI CONAMEN INANE, *Vomiturition*.

VOMER, 'a ploughshare;' *Os vomeris*, *Os maxillæ superioris undec'imum*, *Ara'trium*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

VOMICA, *Pyocyst'is*, from *vomere*, 'to vomit,' 'to cast up.' (F.) *Vomique*, *Crachement de pus*. A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptance is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomiceæ are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

VOMICINE, Brucia.

VOMIQUE, Vomica.

VOMIQUEUR, *Strychnos nux vomica*.

VOMISSEMENT, Vomiting — v. de Sang, Hæmatemesis.

VOMIT, Emetic — v. Black, Fever, yellow, Melena.

VOMIT, DRY, of MARRIOTT. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

VOMITIF, Emetic.

VOMITINE, Emetinc.

VOMITING, *Vomit'us, Vomit'io, Vomit'ium, Vom'itum, Vomit'io, Anatropê, Em'esis, Palmus vom'itus, Egrit'io ventriculi, Spœsing, Puking, Sickness of the Stomach*, (Old Eng.) Parbreacking, (Sc.) *Bokking, Bocking, Braking, Proecht*, (Prov.) *Hull'uping*, (vulg.) *Casca'ding, Casting*, (F.) *Vomissement*, from *vomere, vomitum*, 'to throw up.' The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, snapisms, or blisters to the epigastric region, &c.

VOMITING AT PLEASURE, Regurgitation — v. of Blood, Hæmatemesis — v. Stercoraceous, Copremesis.

VOMITIO, Vomiting — v. Sanguinis, Hæmatemesis.

VOMITIUM, Vomiting.

VOMITO NEGRO, Fever, yellow — v. Prieto, Fever, yellow.

VOMITORIUM, Emetic.

VOMITORY, Emetic.

VOMITUM, Vomiting.

VOMITURIT'ION, *Vomiturit'io, Emes'ia, Dysemes'ia, Subeer'sio stom'achi*. Same etymon as Vomiting. Ineffectual efforts to vomit; *Vomen'di cona'men ina'nê, Retching, Reaching, Heav'ing*, (Old Eng.) *Bolke*, (Sc.) *Bok, Bock, Braking*. Some authors mean, by this term, a vomiting of but little matter, or that which is ejected almost without effort. The first acceptation is the most general.

VOMITUS, Vomiting — v. Cruentus, Hæmatemesis — v. Fæculentus, Copremesis — v. Marinus, Nausea marina — v. Navigtantium, Nausea marina — v. Niger, Fever, yellow — v. Pituitosus, Blennemesis — v. Profusus, Hyperemesis — v. Purulentus, Pyemesis — v. Sanguinis, Hæmatemesis — v. Stercoris, Copremesis.

VOORARA, Curare.

VOTIVE TABLET, Tabula votiva.

VOUACAPUA AMERICANA, Geoffræa inermis.

VOUSURE PRÉCORDIALE, "Præcordial arching or prominence." The elevation or arching of the parietes of the thorax, witnessed in certain thoracic affections, as in hypertrophy of the heart.

VOÛTE, Vault — v. *Médullaire, Corpus callosum* — v. à *Trois Piliers, Fornix*.

VOWEL, *Voca'lis*, from Latin *vox, vocis*, 'the

voice,' and *voco*, 'to call.' (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a, e, i, o, u, æ*, and *y*, are vowels.

VOX, Voice — v. Cholericus, Voice, choleric — v. Clangosa, Oxyphonia — v. Convulsiva, *Vox Convulsiva* — v. Nasalis, Rhinophonia — v. Ramen, Raucedo, Raucous voice — v. Raucisona, Raucous voice.

VOYELLE, Vowel.

VUE, Vision — v. Basse, Myopia — v. Courte, Myopia — v. Diurne, Hemeralopia — v. Facile, Amblyopia — v. Longue, Presbytia — v. Louche, Strabismus — v. Nocturne, Nyctalopia.

VULGA, Vulva.

VULNERA SCLOPETARIA, see Wound — v. à Sclopetis, see Wound.

VULNÉRAIRE, Vulnery — v. Suisse, see Falltrauck.

VULNERARIUS, Traumatic.

VULNERARY, *Vulnerarius, Traumaticus, Traumat'ic*, from *vulnus, vulneris*, 'a wound.' (F.) *Vulnéraire*. A name applied by the ancients to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNERATIO NERVI, Neurotrosis.

VULNERUM VINCTURA, Deligation.

VULNUS, Wound — v. Laceratum, see Laceration — v. Sclopetarium, Wound, gun-shot — v. Simplex, Cut.

VULNUSCULUM, Wound.

VULPIS MORBUS, Alopecia.

VULTUEUX (F.), *Vultuosus*. Corvisart has used the expression, *Face vultueuse, Face vultuosa*, for the face when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

VULTUS, Countenance, Face — v. Tetricus et Mœstus, Scythropasmus.

VULVA, Uterus, see Vulva.

VULVA, *vulva* (formerly, the uterus, especially of animals). *Hortus, Cunnus, Pudend'um mulie'bre, Sinus pud'ic'is, Ictar, Choirus, Arum, Bucca, Bulga, Caduc'ens, Custos, Femen, An'ndus, Femur smmmum, Follic'ulus, Fundus, Grémium, Hortus, Lant'eum, Naris, Oppid'ulum, Sprens, Vulva, Cyma, Cystus, Saltus, Clitor'ium, Ostium, Sals'ens, Amphicant'ia, Concha, Porcus, Porta, Interfemin'eum, Mulie'bria, Fossa magna mulie'bria, Epise'ion, Es'chara, Hort'ulus cupid'inis, Bombalios, Buxus, Cura, Caver'na, Delphys, Delta, For'ea, Gynac'eum, Loci mulie'bres, Female pudend'um, Female organs of generation, Female parts*, (F.) *Vulve*. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female: — mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncula myrtiformes, fossa navicularis and fourchette.

VULVA, *Fora'men commu'nè ant'erius, Iter seu Ad'itus ad infundib'ulum, I. seu Ad'itus ad tertium ventric'ulum, Rima ad infundib'ulum, Aper'tura ant'erior ventriculi tertii cer'ebri. An*

opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

VULVAIRE. *Chenopodium vulvaria*.

VULVAR, *Vulvaris*, from *vulva*. That which relates to the vulva. Chaussier gives this name

to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, *Chenopodium vulvaria*.

VULVE, Vulva.

VULVITIS, a hybrid word, from *vulva*, and *itis*, denoting inflammation. Inflammation of the vulva.

VULVO-UTERINE CANAL, Vagina.

W.

WABRAN LEAVES, *Plantago*.

WAD, Graphites.

WAHOO, see *Euonymus*.

WAIR, see *Pila marina*.

WAISTCOAT, STRAIT, *Indu'enda*, (F.) *Camisole*, *Gilet de force*. A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKE-ROBIN, *Arum maculatum*, *Trillium latifolium*.

WALE, *Wheat*.

WALKING, *Gressus*, *Inces'sus*, *Deambula'tio*, *Ambula'tio*, *Bad'isis*, (F.) *La Marche*, *Progression*. Sax. *pealcan*, 'to walk.' The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh-bones, the extent of which is regulated by volition, under the guidance of vision.

WALLA'CHIA, MINERAL WATERS OF. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Fineschti, Sibitschiudi Suz, Brüssa, Otschin, Serbo-neschte, Kimpalungi, Kosia, and Oloneschti, Chalybeate and saline springs have, also, been found at Sibitschiudi Suz.—Siller.

WALLEFLOWER, *Cheiranthus cheiri*.

WALLRUE, *Asplenium ruta muraria*.

WALL-TEETH, Molar teeth.

WALNUT, *Juglans regia* — w. Black, *Juglans regia* — w. White, *Juglans cinerea*.

WALTHERIA DOURADINHA. A plant of Brazil, *Order*, *Sterculiaceæ*, which is used there in diseases of the chest, and in venereal affections. It is a demulcent.

WALTON, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WAMPEE, *Peltandra Virginica*.

WANGTEETH, Molar teeth.

WANT, from past participle of Sax. *panian*, 'to wane,' 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin*. This word is sometimes used to express the imperious necessity which impels us to take food, drink, &c. (See *Hunger* and *Thirst*.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinctive desires* and *internal sensations* or *stimuli*. Such are the desires or wants to eat, drink, void the urine, breathe (*besoin de respirer*). &c.

WANT, in the sense of indigence, (L.) *Egestas*, *Indigentia*, is the cause of a number of diseases.

WARBURG'S FEVER-DROPS, see *Bebeeru*.

WARD'S ESSENCE FOR THE HEADACII, *Liuimentum camphoræ compositum* — w. White Drops, see *Hydrargyri nitras*.

WARE, see *Pila marina*.

WARISON, Stomach.

WARK, Pain.

WARMBRUNN, MINERAL WATERS OF.

Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

WARM SPRINGS, see *Georgia*, *Mineral waters of*, and *Virginia*, *Mineral waters of*.

WARNER CANADENSIS, *Hydrastis Canadensis*.

WARRENTON SPRINGS, see *Virginia*, *mineral waters of*.

WART, *Verruca* — w. *Corneous*, *Cornu* — w. *Moist*, *Aerothymion*.

WARTY, *Verrucose*, *Verrucous*, *Verrucosus*, from Sax. *pearc*. Full of warts. Resembling, relating, or belonging to warts.

WARTY TUMOUR OF CICATRICES. A name given by Mr. Howship to the tumour, which sometimes appears on an old scar, many years, perhaps, after the injury that caused it. The ulcer, formed under such circumstances, has been called the *warty ulcer of Marjolin* — having been well described by that surgeon.

WASH, BLACK, see *Hydrargyri submurias* — w. *Phagedenic*, see *Hydrargyri submurias* — w. *Preventive*, *Lotion*, *Hannay's* — w. *Red*, *Lotio rubra*, and *Lotion*, *camphorated*, of *Bates* — w. *White*, *Liquor plumbi subacetatis dilutus* — w. *Yellow*, see *Hydrargyri oxymurias*.

WASHER WOMAN'S SCALL, *Psoriasis diffusa*.

WASHITAW SPRINGS, see *Arkansas*, *mineral waters of*.

WASP, *Vespa*, *Sphex*, (F.) *Gûêpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See *Poisons*, *Table of*.) The best application is the sp. *ammoniac aromaticus*, or some preparation of ammonia.

WASSERBURG, MINERAL WATERS OF. *Wasserburg* is a town of Bavaria, seated on the Inn, 23 miles east of Munich. The water, called, also, *Aqua Aga'tii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

WASSERKUR, *Hydrosudotherapeia*.

WASTING, *Consumption*, *Tabes*.

WATER, Sax. *wæter*, (G.) *Wasser*, *Aqua*, *Hydor*, *ὑδωρ*, *Alma*, (F.) *Eau*, *Protoxide of hydrogen*. Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212° of Fahrenheit; and is taken as the unit in all tables of specific gravity of solid and liquid sub-

stances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea-water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, "*Aqua levisima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hæc ex nive, aut glacie; gravior his ex lacu; gravissima ex palude.*" Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

WATER OF AIX-LA-CHAPELLE, see Aix-la-Chapelle — w. Allflower, Urine, cows' — w. Alum, Bates's, Liquor aluminis compositus — w. of carbonate of Ammonia, Liquor ammoniæ subcarbonatis — w. Anise, see *Pimpinella anisum* — w. Apple, Apple-tree — w. Barley, Decoctum hordei.

WATER BED, *Hydrostatic bed*. A bed, contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

WATER, BINELLI, Aqua Binelli.

WATER OF BITTER ALMONDS, Aqua Amygdalarum concentrata.

WATER BLEBS, Pemphigus — w. Brash, Pyrosis.

WATER, BROCCHERI, Aqua Brocchieri — w. Camphor, Mistura Camphoræ.

WATER CANKER, Cancer aquaticus.

WATER, CARAWAY, see *Carum carui* — w. Caraway, strong, Spiritus carui — w. of Cassia, see *Laurus Cassia*.

WATER CASTER, see Uromantia.

WATER, CHERRY LAUREL, see *Prunus lauro-cerasus* — w. Chicken, Chicken-tea — w. Chlorine, see Chlorine — w. Cinnamon, Aqua cinnamomi — w. Cinnamon, strong, Spiritus cinnamomi — w. Cologne, *Eau de Cologne*.

WATER CURE, Hydrosudotherapia.

WATER, DILL, see *Anethum graveolens*.

WATER, DISTILLED, *Aqua destillata*, (F.) *Eau distillée*, *Hydrolat*, *Holy Water*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; — the water, containing any saline impregnation — hard water, for example — decomposes certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States, it is directed to be made as follows: — Take of water, ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

Distilled waters, (F.) *Hydrolats*, consist of common water, charged by distillation with the volatile principles of medicinal agents. See *Aqua destillatæ*.

WATER-DOCTOR, see Uromantia.

WATER-DRESSING. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part: — the whole being covered with oiled silk, elastic gum, or spongiopiline. *Water strapping* or *wet strapping* means the treatment of ulcers, and certain cutaneous affections of the extremities, &c., with strips of linen or cotton saturated with water.

WATER, ELDER, see *Sambucus* — w. Epileptic, of Langius, Langii aqua epileptica — w. Fennel, Aqua fœniculi.

WATER FLAG, YELLOW, *Iris pseudacorus*.

WATER, FLORIDA, — a celebrated perfume, — may be made of *Ol. Bergami* f̄ij; *Tinct. benzoini*. c. f̄ij; *Alcohol*. cong.

WATERFRIGHT, Hydrophobia.

WATER, GOULARD, Liquor plumbi subacetatis dilutus.

WATER, HARD. Common water, which decomposes and curdles soap; in contradistinction to *soft water*, which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

WATER, HELL, see Toddy.

WATER, HOLY, Water, distilled — w. Honey, see Mel.

WATER IN THE HEAD, Hydrocephalus.

WATER, HUNGARY, Spiritus rosamarini.

WATER JAGS, see Variella.

WATER, LAKE, *Aqua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

WATER, LAUREL, see *Prunus lauro-cerasus* — w. Lavender, Spiritus lavandulæ — w. Lead, Liquor plumbi subacetatis dilutus — w. Lemonpeel, see Lemonpeel Tea — w. Lime, Liquor calcis — w. Lime, compound, Liquor calcis compositus — w. Magnesia, aerated, Magnesia, fluid — w. Magnesia, carbonated, Magnesia, fluid.

WATER, MARSH, *Aqua paludosa*, (F.) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decouposing animal and vegetable matters.

WATER, MEDICATED, see *Aquæ medicatæ*.

WATER, MINERAL, *Aqua mineralis* seu *salubris* seu *medicata* seu *Sotéria*, *Fons salutaris* seu *medicatus* seu *sotërius*, (F.) *Eau minérale* ou *médicinale naturelle*. Water, holding in solution different saline and gaseous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

The following Table by Dr. Percira exhibits the composition of some of the principal mineral waters.

FIXED CONSTITUENTS

ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED

MINERAL SPRINGS.

PROPORTIONS IN 10,000 PARTS OF WATER.

NOTE.—In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grams; the wine pint = 7305 grams; the imperial gallon = 70,000 grams; and the German 16-ounce measure = 7368 grams.

The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

THERMAL.

Mineral waters may be divided into four classes:—1. *Gaseous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal*, or *cold*,—*natural*, or *artificial*. Many of these divisions, however, run into each other: some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Gaseous, Acidulous or Carbonated Mineral Waters, Soda or Beer Springs, Aquæ mineralæ acidulæ*. (F.) *Eaux minérales gazeuses ou acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become rapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Sellangenbad, Sultzmatt, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybeate or Ferruginous Mineral Waters, Aquæ mineralæ ferruginosæ seu Chalybeatæ seu Martiales seu Ferro-sæ, Chalybeo-gæ, Chalybokræ-næ, Sidero-gæ, Siderokræ-næ*. (F.) *Eaux minérales ferrugineuses*, contain iron—sulphate, chloride or carbonate, generally the latter—held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are about one hundred; more than sixty of these being saline, and forty sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters, Aquæ mineralæ salinæ, Anna alcalizata* (Paracelsus.) *Hydralmæ*. (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balarac, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphureous Mineral Waters, Aquæ mineralæ sulphuræ*; when warm, termed *Theiothermæ, Theio-gæ, Theothermæ, Fontes sulphurei calidi*, (F.) *Eaux minérales sulfureuses ou sulfurées ou sulfureuses ou hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognised by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their

powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Baréges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Eughien, Harrogate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

WATER, MINERAL, Acidulous water, simple.

WATERS, MINERAL, ARTIFICIAL. (F.) *Eaux minérales artificielles ou factices*. These are imitations of the natural; and some of them—as the factitious Cheltenham water, and Sedlitz water—answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

WATER, NUTMEG, Spiritus myristicæ.

WATER PANG, Pyrosis—w. Parsnep, creeping, Sium—w. Pennyroyal, spirituous, Spiritus pulegii—w. Peppermint, Aqua menthæ piperitæ—w. Pimento, see Myrtus pimenta.

WATER POX, see Varicella.

WATER, PROTOXIDE OF NITROGEN, Aqua nitrogenii protoxydi.

WATER PURPUE, Veronica beccabunga—w. Qualm, Pyrosis.

WATER, RAIN, *Aqua pluvialis seu pluvia seu imbrium*. (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

WATER, RICE, see Oryza.

WATER, RIVER, *Aqua fluvialis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

WATER, ROSE, Aqua rosæ.

WATER, SEA, *Aqua Mari-na, Humor Dor'idis*, (F.) *Eau de Mer, Eau salée*. This contains chlorides of sodium, magnesium, and calcium, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an excellent tonic bath: superior in most cases—especially in scrofula—to the fresh-water bath.

WATER, SEARLE'S PATENT OXYGENOUS AERATED, Aqua Nitrogenii protoxydi—w. Seydschütz, Sedlitz water.

WATER SHIELD, Brasenia hypoleptis.

WATER, SNOW, *Aqua nivata*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

WATER, SODA, Acidulous water, simple—w. Soft, see Water, hard—w. Spearmint, Aqua menthæ viridis.

WATER, SPRING, *Aqua fontana, Hydrope-gæ*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

WATER STRAPPING, see Water dressing.

WATER, STYPTIC, SYDENHAM'S, Solutio sul-

phatis cupri composita—w. Tar, see *Pinus sylvestris*—w. Toast, see *Toast-water*.

WATER TARGET, *Brasenia hypopeltis*.

WATER, WELL, *Aqua putealis* seu *puteana* seu *ex puteo*, (F.) *Eau de puit* ou *de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

WATERS, THE, *Liquor Amnii*—w. *Bag* of, see *Liquor Amnii*—w. *Discharged* or *broken*, *Profusio aque*—w. *Distilled*, *Aque destillata*—w. *First*, *Primitiæ*—w. *Green*, see *Lochia*.

WATTWEILER, MINERAL WATERS OF. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda, chloride of sodium, and free carbonic acid.

WAX, Cera—w. *Ear*, *Cerumen*.

WAX, MYRTLE. A wax obtained from the fruit of *Myrica cerifera*. It has been prescribed in dysentery.

WAX, YELLOW AND WHITE, *Cera flava et alba*.

WAXING KERNELS, *Waxen-kernels*, *Crescentiæ*, (F.) *Croissances*, *Croissants*, *Glandes de croissance*. A popular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children particularly. They have been looked upon as connected with the growth of the body,—hence their name.

WAY, Saxon *pæz*, *Via*, *Passage*, *Odos*, (F.) *Voie*. A name given to different canals.

WAYBREAD, *Plantago major*.

WAYS, DIGESTIVE, *Digestive Passages*, *Primæ Viæ*, (F.) *Voies digestives*, *Premières voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

WAYS, SECOND, Second Passages, Secundæ viæ, (F.) *Secundæ voies*, comprise the chyloiferous, lymphatic and blood vessels.

WEAKSIGHTEDNESS, *Asthenopia*.

WEAL, *Wheal*.

WEAM, *Abdomen*, *Uterus*.

WEAM-ILL, *Colic*.

WEANING, from *Saxon wanan*, 'to wean'; *Ablactatio*, *Apogalactismus*, (Prov.) *Spaning*, (F.) *Sterage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

WEANING BRASH, see *Brash*, *weaning*.

WEARING, *Consumption*.

WEATHERCOCKS, *Impatiens*.

WEB, *Caligo*, *Pterygium*—w. *Muscular*, *Panniculus carnosus*.

WEB-EYE, *Caligo*.

WEBBED FINGERS, *Dactylion*.

WEBERIAN CORPUSCLE, see *Ejaculatory Ducts*—w. *Organ*, see *Ejaculatory Ducts*.

WEDGED, (D.) *weggh e*, *Inclausa*, *Inhaerens*, (F.) *Enclavé*. The head of the fœtus is said to be *wedged*, *locked* or *impacted* in the pelvis, when it remains fixed, notwithstanding the uterine efforts.

The condition is called *Inclausio* seu *Inclavatio fœtus*, *Sphenosis*, (F.) *Enclavement*. See *Paragomphosis*.

WEEBO, *Senecio Jacobææ*.

WEED, see *Mastitis*—w. *Arrow*, *Sagittaria variabilis*—w. *Beetle*, *Galax aphylla*—w. *Brenst*, *Saururus cernuus*—w. in the *Breast*, see *Mastitis*—w. *Butter*, *Erigeron Canadense*—w. *Cancer*, *Goodyera pubescens*—w. *Dyer's*, *Reseda luteola*—w. *Field*, *Anthemis cotula*—w. *Horse*,

Erigeron Canadense—w. *Horsefly*, *Sophora tinctoria*—w. *Milk*, *Apocynum androsæmifolium*—w. *Phthisis*, *Ludwigia palustris*—w. *Pride*, *Erigeron Canadense*—w. *Silver*, *Potentilla anserina*—w. *Soldiers'*, *Matico*—w. *Thimble*, *Rudbeckia laciniata*—w. *Wind*, *Asclepias tuberosa*.

WEEPING, *Fletus*—w. *Tear*, *Tear*.

WEESEL, *Trachen*.

WEID, see *Mastitis*.

WEIGHT, from *Saxon*, *wægan*, 'to weigh'; (F.) *Pesanteur*. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.

WEIGHTS AND MEASURES, *Pondera et Mensuræ*, (F.) *Poids et Mesures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

WEIGHTS.

Troy Weight, as used by the British Apothecaries.
—*Pondus pharmaceuticum seu medicinale.*

The pound lb	} contains	{	12 ounces.
The ounce ℥			8 drachms.
The drachm ʒ			3 scruples.
The scruple ʒ			20 grains.
The grain gr.			

These, and the signs by which they are denoted, are the same in all the British Pharmacopœias, as well as in the American.

lb.	Oz.	Drachms.	Scrup.	Gr.
1 =	12 =	96 =	288 =	5760 =
	1 =	8 =	24 =	480 =
		1 =	3 =	60 =
			1 =	20 =

Poids de Marc.

The pound	} contains	{	16 ounces.
The ounce			8 drachms.
The drachm			3 scruples.
The scruple			24 grains.
The grain			

Avoirdupois.

Pound.	Ounces.	Drachms.	Troy grains.
lb. 1. =	16 =	256 =	7000 =
	1 =	16 =	437.5 =
		1 =	27.34375 =

The *avoirdupois* drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains *avoirdupois* = 7000 grains *troy*, and hence 1 grain *troy* = .97 grain *avoirdupois*.

The *Poids de Marc* is that employed by the French Pharmacians, when the new weights are not. The *Avoirdupois* is now used by the Dublin College.

The following tables exhibit the relative value of the old French and English weights:

<i>Poids de Marc.</i>	<i>Troy Wt.</i>	<i>Avoird.</i>	<i>Troy grs.</i>
1 pd. (<i>livre</i>) =	1.31228 lb =	1.080143 lb =	7561

Uncia.....			1	= 7	= 21	= 42	= 420	= 438
Cochleare.....				2 1/2	= 7 1/2	= 15	= 150	= 156
Drachma.....				1	= 3	= 6	= 60	= 62 4/7
Denarius.....				1	= 3	= 6	= 60	= 62 4/7
Scrupulus.....					1	= 2	= 20	= 20 2/3
Scrupulus dimidiatus.....					1/2	= 1	= 10	= 10 1/3
Obolus.....						= 1	= 10	= 10 2/3
Sextans.....						= 1	= 10	= 10 1/3
Chalcus.....							1	= 11 30

He gives also the following 'Carmen Mnemonicum,' which exhibits the analogies of the Roman and British imperial weights.

To the congius and gallon, each, ten pounds allow,

On the bushel and amphora eighty bestow;
Rome's pound, as in Troy weight, twelve ounces obtains,

But her ounce is Abecedupofs, strictly, in grains:

Denarii drams, scruples scrupli define,
Sextarius answers to our bottle of wine,
And the mina's a short pint—fourteen ounces in fine.

3. *Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.*

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii. p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

A *glassful* or *cupful*, (F.) *Verre*, is reckoned to contain 4 or 5 fluidounces.

A *wine-glassful*, $1\frac{1}{2}$ ounce or two ounces.

A *table-spoonful*, (F.) *Cuiller à bouche*, about half an ounce.

A *coffee* or *dessert-spoonful*, about 3 drachms.

A *tea-spoonful*, a fluidrachm.

A *handful*, *manipulus*, (F.) *Poignée*, as much as can be held in the hand.

The *Pugillus* (F.) *Pinçée* is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

	French.	
	oz.	dr.
A <i>Manipulus</i> of barley weighs.....	3	$2\frac{1}{2}$
“ linseed.....	1	4
“ linseed meal.....	3	3
“ dried mallow leaves.....	1	3
“ dried cichory leaves.....	1	0
“ flowers of the tilia.....	1	$2\frac{1}{2}$
		dr. scr. gr.
A <i>Pugillus</i> of chamomile flowers weighs	2	
“ arnica.....	1	2
“ marsh-mallow.....	1	1
“ mallow.....		60
“ fennel seeds.....	1	60
“ aniseed.....	1	$\frac{1}{2}$ 60

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WEILBACH, MINERAL WATERS OF. The village of Weilbach is in the plain between the Maine and the southern extremity of the Tannus hills. It has in its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

WEINTRAUBENKUR, Grape cure.

WELCOME TO OUR HOUSE, *Euphorbia cyparissias*.

WELD, *Reseda luteola*.

WELK, *Whelk*. An inequality; a protuberance; a cutaneous eruption of this character. *Acne*.

WELTER'S BITTER, Acid, carbazotic.

WEM, Abdomen, Uterus.

WEMDING, MINERAL WATERS OF. These waters are situate about four leagues from Donauwörth in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. *pen*, *Lu'pia*, *Tumour*, (F.) *Loup*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

WESTERN ISLANDS, Azores.

WEST INDIES, (CLIMATE OF.) The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WEST'S SPRING, see South Carolina, mineral waters of.

WET STRAPPING, see Water dressing.

WHIAHOO, see *Euonymus*.

WHEAL, *Weal*, *Wale*, *Pomphus*. A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

WHEAT, *Triticum*—w. Indian, *Zea mays*—w. Turkey, *Zea mays*.

WHEEZE, (Prov.) *Rezzle*, Sax. *hæorjon*, formed probably, like *whiz* and *whisper*, from the sound it expresses. To breathe with difficulty and noise, as in asthma.

WHELK, *Acne*, *Welk*—w. Chin, *Sycosis*—w. Rosy, *Gutta rosea*.

WHETLEBONES, *Vertebrae*.

WHEY, *Serum lactis*.

WHEY-CURE, (G.) *Molkenkur*. In the Kur-saal of many of the German watering places, a space is set apart for whey drinkers. The whey is a pleasant diluent, and the saccharine matter it contains may act as a eutrophic; but the main effect on the valetudinarian is probably produced by the new impressions made upon him by his visit to the watering place.

WHEY, MUSTARD, see *Sinapis*—w. Rennet, see *Serum lactis*—w. Sack, *Wine-whey*—w. Tamarind, see *Tamarindus*—w. Vinegar, see *Acetum*—w. Wine, *Wine-whey*.

WHIFFING MURMUR, see *Murmur*, respiratory.

WHIG, *Buttermilk*, *Serum lactis*.

WHIMBERRY, *Vaccinium myrtillus*.

WHISKY, see *Spirit*. A spirituous liquor obtained from oats, potatoes, &c., by distillation.

WHISKY LIVER, *Liver*, nutmeg.

WHISPER, *CAVERNOUS*, see *Cavernous*.

WHIS'PERING; evidently an example of onomatopœia (*hoois'pering*), *Susurratio*, *Susurratio*. Articulation of the air sent through the vocal tube without any action of the glottis.

WHISPERING SOUFFLE, see *Souffle*.

WHISTLING, *Sifflement*, see *Râle sibilant*.

WHITE BALL, *Cephalanthus occidentalis*—w. Blisters, *Rupia escharotica*.

WHITE, FLAKE, *Plumbi subcarbonas*.

WHITE LEAF, *Pyrola maculata*, *Spiræa tomentosa*—w. Leg, *Phlegmatia dolens*—w. Matter of the brain, see *Cerebrum*—w. Root, *Angelica lucida*, *Asclepias tuberosa*, *Ligusticum actæifolium*.

WHITE, SPANISH, Bismuth, subnitrate of.

WHITE SUBSTANCE OF SCHWANN, see *Nerve fibre*—w. Swelling, *Hydrarthrus*—w. Swelling of lying-in women, *Phlegmatia dolens*—w. Weed, *Chrysanthemum leucanthemum*—w. Wood, *Liriodendron*, *Tilia Americana*.

WHITENESS OF COMPLEXION, *Paleness*.

WHITES, *TIE*, *Leucorrhœa*.

WHITLEYA STRAMONIFOLIA, *Anisodus luridus*.

WHITLOW, *Paronychia*.

WHOOPIING-COUGH, Pertussis.

WHORLYWORT, *Leptandria purpurea*.

WHORTLEBERRY, *Vaccinium myrtillus*, *Vaccinium vitis idæa*—w. Bears', *Arbutus uva ursi*.

WHORTS, BLACK, *Vaccinium myrtillus*.

WHYTT'S DISEASE, *Hydrocephalus internus*.

WIDOW-WAIL, *Cneorum tricoeum*, *Daphne Alpina*.

WIESBADEN, MINERAL WATERS OF, see Wiesbaden.

WIESSAU, MINERAL WATERS OF. These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain carbonic acid; carbonates of lime and magnesia; chlorides of calcium, magnesium, and aluminium; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, Sax. *pilb*, (D.) Wild. An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion;—a *wild look*, (F.) *Physiognomie égaree*.

WILDBAD, MINERAL WATERS OF. Wildbad is a small town of Wurtemberg, three German miles from Baden-Baden. It is much frequented as a watering-place. The water is thermal, from 95° to 100° of Fahr., and is much employed in cases in which thermal waters are indicated. It is used internally, a pint not containing more than a grain of solid ingredients, which consists of salts of soda and lime. The proportion of carbonic acid gas is very small.

WILDFIRE, Erysipelas.

WILDFIRE RASH, *Ignis sylvaticus*.

WILDUNGEN, MINERAL WATERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stueke, contain a bituminous matter; chloride of sodium and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILL, Voluntas.

WILLAN, *Salix*.

WILLOW, *Salix*—w. Herb, Common, *Lythrum salicaria*—w. Herb, great, *Epilobium angustifolium*—w. Herb, purple, *Lythrum salicaria*—w. Herb, purple veined, *Epilobium coloratum*.

WILLOW, LOW-BUSH, *Salix humilis*—w. Speckled, *Salix humilis*—w. Red, *Cornus sericea*—w. Rose, *Cornus sericea*—w. Sweet, *Myrica gale*.

WIND, Sax. *pinb*, (an example of onomatopoeia—*ooiud*) *Ventus*, *Av'emos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds, which they transport to greater or less distances. The winds which blow over a considerable extent of country, are dry and serene: those which come from the ocean are moist and chilly.

WIND, see Flatulence.

WIND OF A BALL. A term applied to the compression of air, supposed to be produced by the passage of a ball near a part of the body, so as to occasion what has been called a *wind cutusion*.

WIND CONTUSION, see Wind of a Ball—w. Dropsy, Emphysema, Tympanites—w. Flower, Anemone—w. Pipe, Trachea—w. Root, Asclepias tuberosa—w. Weed, Asclepias tuberosa.

WINDINESS, Flatulence.

WINDY, *Flatulentus*, *Flatulent*, *Vaporosus*, (F.) *Venteux*, *Flatueux*. That which causes wind

or flatulence; also, that which is caused by wind or flatulence; as *windy food*, *windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, Sax. *pin*, (G.) *Wein*, originally, perhaps, from *ovos*, *Ænos*, *Vinum*, *μζω*, *Methu*, (F.) *Vin*. A name given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol; saccharine matter; malic acid; tartaric acid; bitartrate of potassa; acetic acid; an extractive colouring matter, more or less bitter, and partly resinous; and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied, or "reinforced," than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

The only wine recommended in some pharmacopœias is *Sherry*, *Vinum, V. album Hispanicum, V. Xer'icum, Leuce'nus*. It is a *dry wine*; the least variable in its properties, and agrees best with the dyspeptic. Other wines used officinally are—*Canary* or *Sack wine, Vinum Canari'num; Mountain wine, Vinum album montanum; Tent wine; Rhenish wine, Vinum Rhena'num; and Port wine, Vinum rubrum Portugall'icum*.

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

Mulled Wine is made as follows:—Take of bruised *cinnamon* $\frac{3}{4}$; half a *nutmeg* grated; and ten bruised *cloves*. Infuse in boiling *water* Oss for an hour; strain and add *sugar* $\frac{3}{4}$. Pour the whole into a pint of hot *Port* or *Sherry*. Useful in adynamic conditions.

WINE, AMINÆAN, Aminæum vinum.

WINE OF ALOES, Vinum aloes.

WINE, ANTIMONIAL, Vinum antimonii—w. Antiscorbatic, Vinum antiscorbaticum—w. Aromatic, Vinum aromaticum—w. Bark, compound, Vinum de kinâ kinâ compositum—w. Barley, Cerevisia—w. Bitter, diuretic, Vinum diureticum amarum.

WINE BITTERS, *Vinum gentianæ compositum*. The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentian.* ℞j, *cort. aurant.* $\frac{3}{4}$ ℞, *sem. cardam.* cont. $\frac{3}{4}$ iv, *cinnam. cort.* $\frac{3}{4}$ iv, *wine*, foreign or domestic, three galls and a half.) Tonic and stomachic.

WINE, CEDAR, Cedrinum vinum—w. Champagne, Vinum campanum—w. Chian, Chium vinum.

WINE OF COLCHICUM, Vinum colchici—w. of Colechicum seed, Vinum colchici seminis—w. of Ergot, Vinum ergotæ—w. of Gentian, compound, Vinum gentianæ compositum—w. of Hellebore, white, Vinum veratri.

WINE, IPECACUANHA, Vinum Ipecacuanhæ.

WINE OF IRON, Vinum ferri.

WINE, MEDICATED, Vinum medicinale—w. Mulled, see Wine.

WINE OF OPIUM, Vinum opii.

WINE, PORT, Vinum Portugallicum—w. Pullet, *Poulet, vin de*.

WINE OF QUINIA, Vinum quiniæ.

WINE, RHUBARB, Vinum rhei—w. Sherry, Vinum—w. Steel, Vinum ferri—w. Tobacco, Vinum tabaci—w. Tar, see Pinus sylvestris.

WINE WHEY, *White Wine Whey*, (Prov.) *Sack-whey*. Take of good *milk* two-thirds of a pint, and add *water* to make a pint. Take of *sherry*, or any other good white *wine*, two glasses, and of *sugar* a dessert-spoonful. Place the milk and water in a deep pan on the fire; and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

WINE, WHITE, see Wine.

WINE OF WORMWOOD, Vinum absinthites.

WING-SEED, *Ptelea trifoliata*.

WINKERS, *Cilia*.

WINKING, *Scardamygmus*.

WINTER'S BARK TREE, *Wintera aromatica*.

WINTER BERRY, SMOOTH, *Prinos lævigatus*—w. Berry, Virginia, *Prinos*—w. Berry, whorled, *Prinos*.

WINTER BLOOM, *Hamamelis Virginiana*—w. Cough, Bronchitis, chronic—w. Green, *Gaultheria*—w. Green, round-leaved, *Pyrola*—w. Green, spotted, *Pyrola maculata*.

WINTERA, see *Wintera aromatica*.

WINTERA AROMATICA, *Drimys Win'teri, Wintera'na aromatica, Winter's bark Tree; Ord. Magnoliaceæ*. The bark, *Wintera* (Ph. U. S.), *Cortex Wintera'nus* seu *Wintera'nus Magellan'icus, C. Magellan'icus, Cinnamomum Magellan'icum*, (F.) *Écorce de Winter, Cannelle pivoirée*, is very much allied in its properties to *Canella alba*.

WINTERANA AROMATICA, *Wintera aromatica*.

WIRTSPRINGS, Hangnails.

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles

north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphuric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, Bismuth.

WITCHEN, Sorbus acuparia.

WITCHHAZEL, Hamamelis Virginiana, Sorbus acuparia.

WITCHMEAL, Lycopodium.

WITCHWOOD, Sorbus acuparia.

WIT TEETH, see Dentition.

WITTER, Throat.

WIZEN, Oesophagus.

WOAD, Isatis tinctoria.

WOD, Insane.

WODNES, Insanity, Mania.

WOLFBANE, Veratrum viride.

WOLFSBANE, Aconitum — w. Wholesome, Aconitum anthora.

WOLFSCLAW, Lycopodium.

WOLFSJAW, see Harelip.

WOMAN, pl. *women*, *Gynē*, (F.) *Femme*, Sax. *pyrman*, 'wifeman,' 'roofman.' The adult female of the human race.

WOMANHOOD, Mulieritas.

WOMB, Uterus—w. Falling down of the, Prolapsus uteri.

WOMB GRAIN, Ergot.

WOMB, LACERATION OF THE, Uterus, rupture of the—w. Tympany of the, Physometra.

WONGE, Cheek.

WOOD, BRAZIL, *Cæsalpinia echinata* — w. Elk, *Andromeda arborea* — w. Pernambuco, *Cæsalpinia echinata*.

WOOD-LICE, Onisci aselli.

WOOD-MARCH, Sanicle.

WOOD, NICARAGUA, see *Cæsalpinia*—w. Peach, see *Cæsalpinia* — w. Pernambuco, *Cæsalpinia echinata* — w. Sappan, *Cæsalpinia sappan* — w. Sappan, *Cæsalpinia sappan*.

WOOD SORREL, *Oxalis acetosella*.

WOOD, SOUR, *Andromeda arborea*—w. Waxen, *Genista tinctoria*.

WOODWEX, *Genista tinctoria*.

WOODBINE, COMMON, *Lonicera perelymenum*.

WOODROOF, SWEET-SCENTED, *Asperula odorata*.

WOODS, SUDORIFIC, (F.) *Bois sudorifiques*. This term is applied, collectively, to guaiacum, sassafras, china, and sarsaparilla, which are often used together to form the sudorific decoction.

WOORALL, Curare.

WOORARA, Curare.

WORM, see Alembic, Vermiform process — w. Bark tree, *Geoffraea inermis*—w. Cakes, Story's, see Cakes, worm, Story's — w. Disease, Helminthiasis — w. Goosefoot, *Chenopodium anthelminticum* — w. Grass, perennial, *Spigelia Marilandica*.

WORM, GUINEA, *Draunculus*.

WORM LOZENGES, CHINA'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges*. (*Saffron*, ζ ss, *water*, Oj; boil, and strain; and add of *white pumaceo of mercury*, (calomel washed in spirit of wine,) ℥j, *white sugar*, 2S lbs, *mucilage of gum tragacanth* q. s. to make a mass. Divide, so that each lo-

zenges may contain a grain of the panacea.) The *Brown Lozenges*. (*Panacea* ζ vij, *resin of jalap* ℥ijss, *white sugar* ℥ij, *mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

WORM LOZENGES, SHERMAN'S, are said to be composed of *calomel*, *gamboge*, and *sugar*.

Peters's Worm Lozenges are said to be composed in a similar manner.

WORM ROOT, *Spigelia Marilandica* — w. Seed, *Artemisia santonica*, *Chenopodium anthelminticum* — w. Seed, goosefoot, *Chenopodium anthelminticum* — w. Weed, Corsican, *Corallina Corsicana*, *Polanisia graveolens*—w. Weed, white, *Corallina* — w. Wood, biennial, *Artemisia biennis* — w. Wood, Canada, *Artemisia canadensis* — w. Wood, common, *Artemisia absinthium*—w. Wood, creeping, *Artemisia rupestris* — w. Wood, lesser, *Artemisia Pontica*—w. Wood, Roman, *Artemisia Pontica*—w. Wood, sea, *Artemisia maritima*—w. Wood, silky, *Artemisia glacialis*.

WORMI'NA OSSA seu OSSIC'ULA, *O. epactalia* seu *raphogenianitia* seu *triq'etra* seu *triangularia* *Bla'sii* seu *sutura'r'um*, *Claves calvaria*, *Wormian bones*, (F.) *Oss Wormians* ou *épaques* ou *surmuraîres* (Ch.), ou *intercalés* ou *triangulaires* ou *Clefs du crâne*. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The *Ossa Wormiana* exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMIT, *Artemisia absinthium*.

WORMS, originally from (L.) *Vermes*; (F.) *Vers*; *Entozo'a*, *Entozoa'ria*, *Enterozo'o'a*, *Endozo'o'a*, *Entelminth'a*, *Entelminthes*, *Helminthi*, *Entoparasites*, (F.) *Entozoaires*. Animals whose common character is that of existing only in other animals; hence their name *entozoa*, from *εντος*, 'within,' and *ζωον*, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs, but chiefly in the intestines — *Vermes intestini*, *Helminthia alvi* seu *pod'icis*, *Splanchnelminth'ia*, *Intes'tinal worms*, (F.) *Vers intestinaux*, *Angibromelminthie*. Piorry, Cuvier, Rudolphi, Brera, Bremsler, Laënnec, and others, have endeavoured to classify them, — some according to their shape; others, according to their anatomical characters.

The following table exhibits most of the entozoa which have been met with in the human body, and their usual habitats:—

<i>Entozoa.</i>	<i>Where found.</i>
<i>Trichoceph'alus dispar</i> ,	} Intestines. } " and Liver. } Intestines and Venæ porta. } Intestines. } Urinary bladder.
<i>Oxyu'ris vermicula'ris</i> ,	
<i>As'caris ala'ta</i> ,	
<i>As'caris lumbricoi'des</i> ,	
<i>Ancylos'toma duodenale</i> ,	
<i>Bothrioceph'alus latus</i> ,	
<i>Tæ'nia so'lium</i> ,	
<i>Pentast'oma coustrie'tum</i> ,	
<i>Tæ'nia nana</i> ,	
<i>Distoma hæmato'biium</i> ,	
<i>Ditrachye'eras rudis</i> , (?)	
<i>Diplos'oma crena'ta</i> ,	
<i>Spirop'tera hom'inis</i> ,	
<i>Dactyl'ium aculea'tus</i> ,	

Dis'toma hepat'icum,	Gall bladder.
Dis'toma lanceola'tum,	Hepatic duct.
Stro'n'gylus gigas,	} Kidney.
Tetras'toma rena'l'e,	
Fila'ria oc'uli,	Eye.
Monos'toma lentis,	Crystalline.
Distoma oc'uli huma'ni,	} Capsule of crystal- line.
Acephalocyst'is endog'ena,	Liver, Spleen, and
Echinococ'cus hom'inis,	} Omentum.
Polys'toma pinguic'ola,	} Ovary.
Hexathyrid'ium pinguic'ola	
Polys'toma vena'rum seu sanguic'ola,	} Veins.
Hexathyrid'ium vena'rum,	
Fila'ria bronchia'lis,	Bronchial glands.
Trichi'na spira'lis,	} Muscles.
Cysticer'cus cellulosa'e,	
Acephalocyst'is multifa'ida,	Brain.
Fila'ria medinen'sis,	Areolar texture.

The most common of these are:—the *Oxyuris vermicularis*, *Ascaris lumbricoïdes*, and *Tænia*, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptoms, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes.

Anthelmintics or *vermifuges*, employed, as the name imports, for their removal, may be of two kinds—*mechanical* and *true*. To the first class—the *mechanical*—belong *Emetics*, *Purgatives*, *Mucuna*, powdered *Tin*, &c. To the latter—the *true anthelmintics*.—*Turpentine*, *Chenopodium anthelminticum*, *Pink-root*, *Semina Santonici*, &c. Of these, the best is turpentine. See *Oleum terebinthinæ*. The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics, where necessary.

Worms, *Aene punctata*.

WORSUM, Pus.

WORT, Sax. *wýrt*, *Mustum*, *Infusum Bynes* seu *Brasii* seu *Multi*, (F.) *Moût de la Bière*. An infusion of salt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition

appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WORTWALE, Hangnail.

WOSEN, Trachea.

WOUND, Sax. *wund*, *Vulnus*, *Vulnus*, (diminutive *Vulnusculum*), *Plaga*, *Trauma*, *Troma*, *Tresis*, *Tresis Vulnus*, *Blabê*, *Tymma*, (F.) *Plaie*, *Blessure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure*, *Incision*, when made by a cutting instrument;—*punctured*, *Nygma*, (F.) *Piqure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned*, *Cellulitis venenata*, *Necrosis*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunshot wounds*, *Sclopetoplagæ*, *Vulnèra sclopetaria* seu *à sclopetis*, (F.) *Plaies d'armes à feu* ou *d'arquebûsade* ou *d'arquebuse*, *Coup de feu*, belong to the last division.

WOURALI, Curare.

WOURARI, Curare.

WOURARU, Curare.

WOURSUM, Pus.

WRACK, SEA, *Fucus vesiculosus*—w. Bladder, yellow, *Fucus vesiculosus*.

WRAMP, Sprain.

WRAPPING UP, (of the hydropathists,) *Emailottage*.

WRACK, Nanus.

WRENCH, Sprain.

WRET, Verruca.

WRETWEED, *Euphorbia palustris*.

WRIGHTIA ANTIDYSENTERICA, *Nerium antidyentericum*.

WRINKLE, Sax. *wrinckle*, *Ruga*, *Rytis*, *Rhacus*, *Rhachus*, *Rhagus*, *Rhysséma*, *Corrugatio cutis*, *Ruelles*, (Sc.) *Runkle*, *Runkill*, (Prov.) *Crinkle-crankle*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See *Corrugation*.

WRINKLED, *Rugo'sus*, *Rugous*, *Rugose*, (F.) *Ridê*. Full of wrinkles.

WRIST, Carpus.

WRIST-DROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITERS' SPASM, see *Spasm*, writers'.

WURALI, Curare.

WURSTGIFT, *Allantotoxium*.

WRONG HEIR, *Canellus*.

WRYNECK, *Torticollis*.

X.

X LEG, Entogonyancon.

XALAPPA, *Convolvulus jalapa*.

XANTHIC OXIDE, Uric oxide.

XANTHINE, Uric oxide.

XANTHIUM, *X. Strumarium* seu *Orientalis* seu *Vulgare*, *Bardana minor*, *Lappa minor*, *Lesser Burdock*, *Barweed*, *Burthistle*, *Clotbur*, *Cocklebur*, (F.) *Lamproide*, *Petit Glouteron*, *Petite Bardane*, from ξανθός, 'yellow,' because of the colour the plant is said to yield. This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHIURIA, Xanthuria.

XANTHOP'SIA, from ξανθός, 'yellow,' and οψίς, 'vision.' Yellow vision,—as sometimes occurs in jaundice.

XANTHORRHIZA, (ξανθός, 'yellow,' and ριζα, 'root.') *Xanthorrhiza apiifolia*.

XANTHORRHIZA APIIFOLIA, *Xanthorrhiza*, *X. simplicissima* seu *Marboica*, *Zanthorrhiza tinctoria*, *Yellow Root*, *Paruley-leaved Yellow Root*, *Yellow wort*, *Shrub yellow root*. The root of this American plant—*Xanthorrhiza*, (Ph. U. S.)—is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHORRHIZA, *Grass Tree*. A genus of trees in Australia, *Nat. Order*, Liliaceæ, of which there are several species. Two resins are obtained from them;—one the *yellow resin* of *Xanthorrhiza* or of *New Holland*, *Resina lutea Novi Belgii*, *Botany Bay resin*, *Acaraoid resin* or *gum*, *resina vel gummi acaroïdes*, which probably resembles tolu and storax in medicinal properties;—the other the *red resin* of *Xanthorrhiza*, *black-bog gum*.

XANTHOS, Yellow.

XANTHOSIS. A term applied to the yellow discolouration often observed in cancerous tumours—especially in encephaloid of the testicle.—Lebert.

XANTHOXYLUM FRAXIN'EUM, (ξανθός, 'yellow,' and ξυλον, 'wood.') *X. americana*, *X. fraxinifolium*, *X. ramiflorum*, *X. tricarpum*, *Prickly ash*, *Shrubby prickly ash*, *Toothache bush*, *Toothache tree*, *Pellitory*, *Yellow wood*, *Saterberry*. *Ord.* Xanthoxylaceæ. A spirituous infusion of the bark—*Xanthoxylum*—Ph. U. S.—has been highly recommended in cases of violent colic. The fresh juice, expressed from the root of xanthoxylum, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHOXYLUM CAROLINUM has similar properties; but is more acrid.

XANTHOXYLUM CLAVA HERCULIS of the West Indies, (F.) *Cavalier à fenilles de frêne*, *Frêne épineux* is a very strong stimulant, and powerful sialogogue; and has been given internally in rheumatism.

XANTHOXYLUM OCTANDRA, *Fagara octandra*.

XANTHURIA, *Xanthuria*, from ξανθός, 'yellow,' and ουρον, 'urine.' A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTICA, Carminatives.

XANTOLINA, *Artemisia santonica*.

XENODOCEUM, Hospital.

XENODOCHEUM, Hospital.

XERANSIS, Arefaction, Drying.

XERANTIA, Siccantia.

XERA'SIA. Same etymon; from ξηρός, 'dry.' A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.—Galen.

XERION, Catapasma.

XEROCOLLYRIUM, from ξηρός, 'dry,' and κολυριον, 'a collyrium;' *Collyrium siccum*. A dry collyrium.

XERODERMA, from ξηρός, 'dry,' and δερμα, 'skin.' Diminution of secretion of the sebaceous glands.

XEROMA, Xerophthalmia—x. Conjunctival, Xerophthalmia—x. Lachrymal, Xerophthalmia.

XEROMA, LACHRYMAL. Suppression of the lachrymal secretion. See Xerophthalmia.

XEROMYCTER, Xeromycteria.

XEROMYCTERIA, *Xeromycter*, from ξηρός, 'dry,' and μκτηρ, 'the nose.' Dryness of the nose.

XEROMYRON, *Unguentum siccum*; from ξηρός, 'dry,' and μρον, 'an ointment.' A dry ointment.—Gorræus.

XEROPHAGIA, from ξηρός, 'dry,' and φαγω, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athlete subjected themselves, with the view of increasing their strength.

XEROPHTHALMIA, *Ophthalmia sicca*, *Ophthalmoxerosis*, *Xeroma*, from ξηρός, 'dry,' and οφθαλμα, 'inflammation of the eye.' An inflammation of the eye, without discharge. The term—as well as *Conjunctival* and *Lachrymal Xeroma*, and *Conjunctival Xeroma*—has been given to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lippitudo.

XEROTRIBIA, see Friction.

XEROTRIPSIS, Friction, dry.

XIPHISTERNUM, Xiphoid.

XIPHODES, Xiphoid.

XIPHODYMUS, Thoraco-gastrodidymus.

XIPHOID, *Xiphoides*, *Xiphodes Ensiformis*, from ξιφος, 'a sword,' and εδος, 'shape;' *Cartilago Xiphoides* seu *Xiphoides* seu *Scutella* seu *Ensiformis* seu *Pelta* seu *Pelta*, *Furcella inferior*, *Mucronatum os*, *Mucronata Cartilago*, *Chondros*, *Processus xiphosternalis* seu *xiphoides* seu *sterni xiphoides*, *Xiphisternum*, *Ensiform cartilage*, (F.) *Appendix ou cartilage xiphoides*, *C. Mucroné*, *Appendix sous-sternale*, *Palette*. The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOID LIGAMENT, *Costo-xiphoid L.* (F.) *Ligament xiphoidien* ou *costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOPAGES, *Didymus Symphygo-epigas-trius*; from ξιφος, 'a sword,' and πηγνυμι, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLO-ALOES, Agallochum — x. Balsamum, see Xyris opobalsamum — x. Cassia, Laurus cassia — x. Cinnamomum, Laurus cinnamomum.
 XYLUM, Gossipium.
 XYMPATHIA, Sympathy.
 XYRIS, Iris foetidissima.
 XYRIS BULBO'SA, X. *Indica* seu *Caroliniana*, *Yellow-eyed Grass*; indigenous; *Order*, Xyridaceæ; flowering from July to September. The roots and leaves are said to be used by the Hin-

doos in lepra, and chronic cutaneous diseases in general.

XYRUM, Novacula.
 XYRUS, Novacula.
 XYSMA, Linteum, Rasura, Scobs.
 XYSMOS, Rasura.
 XYSTER, Raspatorium.
 XYSTOS, Linteum.
 XYSTRUM, Raspatorium—x. Ophthalmicum, Ophthalmoxyster.

Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea*, — *alata bulbifera*, and *sativa*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like that of the potato.

YAM ROOT, WILD, *Dioscorea villosa*.

YARD, Penis.

YARROW, COMMON, *Achillea millefolium*.

YAUPON, *Ilex vomitoria*.

YAVA SKIN, *Elephantiasis Arabum*.

YAWNING, from Sax. *zeonan*, *Chasmē*, *Chasmus*, *Hiatus*, *Oscēdo*, *Oscitatio*, *Clonus paniculatio maxillarum*, *Gaping*, (F.) *Baillement*. Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *enuni*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAW ROOT, *Stillingia*.

YAWS, *Framboesia*.

YEAST, Yest — y. Plant, *Torula cerevisiæ*.

YÈBLE, *Sambucus ebulus*.

YELK, see Ovum.

YELLOW, *Flavus*, *Luteus*, *Xanthus*, from past participle of Sax. *zælan*, 'to burn.' One of the seven primitive colours.

YELLOW ASH, *Cladrastis tinctoria* — y. Berry, *Podophyllum montanum* — y. Fever, see Fever, yellow — y. Fever, mild, see Relapse — y. Jack, Fever, yellow.

YELLOW LIG'AMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the *vertebral plates*, from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAINT, *Hydrastis Canadensis* — y. Root, *Jeffersonia Bartoni* — y. Root, parsley-leaved, *Xanthorrhiza apiifolia* — y. Root, shrub, *Xanthorrhiza apiifolia*.

YELLOW SPRING, see Ohio, Mineral waters of.
 YELLOW SPRINGS. These are in Chester county, Pennsylvania. The temperature of the chief spring is 53° Fahr. The water contains no impregnation.

YELLOW STAR, *Helenium autumnale* — y. Weed, *Ranunculus acris* — y. Wood, *Xanthoxylum fraxineum* — y. Wort, Parsley-leaved, *Xanthorrhiza apiifolia*.

YELLOW S, *Cypripedium luteum*, *Icterus*, *Ranunculus acris*.

YERBA DEL SOLDADA, *Matico* — y. de *Huaca*, *Datura sanguinea*.

YEST, *Yeast*, Sax. *zert*, from *γρη*, 'a storm,' *γρησις*, 'stormy;' *Cerevisiæ Fermentum*, *Spuma*, *Cerevisiæ Barm*, (F.) *Leure*, *Levure de la Bière*. The scum which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers, — a table-spoonful being given as a dose, in porter, wine, &c. It is, also, applied in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes — y. *d'Écrevisse*, *Cancerorum chelæ*.

YEW TREE, *Taxus baccata* — y. American, *Taxus Canadensis*.

YLECH, *Ilech*.

YLIATER, *Ilech*.

YOKE, *Singultus*.

YOLK, see Ovum, and *Vesicula umbilicalis* — y. Membrane, see *Vesicula umbilicalis*.

YORK SPRINGS. These are in Adams county, Pennsylvania. One of them is a saline, containing sulphates of magnesia and lime, and chloride of sodium, and is a mild cathartic and diuretic; — the other is a strong chalybeate.

YOUK, Itching, *Psora*.

YOUTH, Adolescence.

YOPON, *Ilex vomitoria*.

YPSELOGLOSSUS, *Basioglossus*.

YRIDES, *Orpiment*.

YSAM'BRA, *Pedigam'bra*. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, *Jatropha manihot*.

YUCCA FILAMENTO'SA, *Bear's grass*, *Silk grass*; indigenous. A tincture of the root has been used in gonorrhœa.

YUKE, Itching, *Psora*.

Y-WER-A, see Spirit.

Z.

ZACCHARUM, Saccharum.
 ZAEL, Borosail.
 ZAFFRAN, Crocus.
 ZAFFRE, Swalt.
 ZAMBO, see Mulatto.
 ZAMIA INTEGRIFOLIA, see Arrowroot—z. Pumila, see Arrowroot.

ZANNA. A kind of Armenian bole, used by the ancients as a desiccative. It was also called *Zarnacha*.

ZANTHORRHIZA APIIFOLIA, *Xanthorrhiza apiifolia*.

ZANTHOXYLUM, *Xanthoxylum*.

ZAPANIA NODIFLORA, *Anacoluppa*.

ZARNACHA, *Zanna*.

ZARSA, *Smilax sarsaparilla*.

ZARZAPARILLA, *Smilax sarsaparilla*.

ZEA MAYS, *Z. vulgare*, *Mays*, *M. zea* seu *Americana*, *Ador*, *Indian Corn*, *Corn*, *Turkey* or *Indian Wheat*, *Maize*, *Mayz*, (F.) *Mais*, *Graine de Turquie*, *Blé d'Inde* ou *d'Espagne* ou *d'Italie* ou *de Turquie*. Ord. Gramineæ. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

ζέα or *ζεα*, was the ancient name of a sort of corn.

ZÉDOAIRE ROND, *Kæmpferia rotunda*.

ZEDOARIA, *Kæmpferia rotunda* — z. Longa, see *Kæmpferia* — z. Rotunda, see *Kæmpferia*.

ZEDARY, *Kæmpferia rotunda*.

ZELOSIS, *Zelotypia*.

ZELOTYP'IA, from *ζηλος*, 'love,' and *τυπος*, 'form,' 'model,' *Zelo'sis*. It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection; — melancholy, mania, &c.

ZEMA, Decoction.

ZEN'ICON, *ζενικον*. Ancient name of a Celtic poison, used for poisoning arrows.

ZEOCRITON DISTICHUM, *Hordeum distichon*.

ZEPHACH, *Peritonæum*.

ZERMA, *Zerna*.

ZERNA, *Zerna*. Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impetigo ulcera'ta*.

ZERUMBET, *Cassumuniar*.

ZESIS, Effervescence, Decoction.

ZEST, see *Citrus medica*.

ZESTOLUSIA, Bath, hot.

ZIBEBÆ, see *Vitis vinifera*.

ZIBETHUM, *Civetta*.

ZIGNITES, *Zingrites*.

ZINC, *Zincum*, *Zinkum*, *Speltrum*, *Speauter*, *Tutenag*, *Zinchum*, *Zint*, *Stannum Indicum*. Perhaps formed etymologically from (G.) *Zin*, 'Tin.' A metal obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7.190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is vo-

latilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

ZINC, ACÉTATE DE, *Zinci acetat*—z. Butter of, *Zinci chloridum*—z. Chloride of, *Zinci chloridum*—z. *Chlorure de*, *Zinci chloridum*—z. *Cyanure de*, *Zinci cyanuretum*—z. Ferrohdrocyanate of, *Zinci cyanuretum*—z. Flowers of, *Zinci oxydum*—z. Hydrocyanate of, *Zinci cyanuretum*—z. Iodide of, *Zinci Iodidum*—z. Ioduret of, *Zinci Iodidum*.

ZINC AND MORPH'IA, DOUBLE I'ODIDE OF, (F.) *Iodure double de Zinc et de Morphine*. This salt is prepared by boiling *iodide of iodhydrate of morphia with water and zinc*, after they have acted on each other for some days; filtering and crystallizing. It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.

ZINC, OXIDE DE, *Zinci oxydum*—z. Oxyd of, *Zinci oxydum*.

ZINC AND STRYCH'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, *iodide of iodhydrate of strychnia and zinc*; filtering and crystallizing. It has been proposed in the same cases as strychnia.

ZINC, SULFATE DE, *Zinci sulphas*—z. Sulphate of, *Zinci sulphas*—z. Valerianate of, *Zinci Valerianus*.

ZINCHUM, *Zincum*.

ZINCI ACÉTAS, *Ac'etate of Zinc*, (F.) *Acétate de Zinc*. (*Plumbi acet. ℥ij*, *zinc. granul. ℥iij*, *aquæ destillat. Oij*). Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquor yields no precipitate with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron; filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, *Calamina*.

ZINCI CAR'BNONAS PRÆCIPITA'TUS, *Precipitated carbonate of Zinc*. (*Zinci sulphat. sodæ carbonat. āā ℥ij*; *aq. bullient. cong.*). Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat.—*Ph. U. S.*) Used to prepare the *Zinci oxidum*.

ZINCI CARBONAS PRÆPARATUS, *Calamina præparata*—z. Chloridi liquor, see *Burnett's Disinfecting Liquid*.

ZINCI CHLO'RIDUM, *Z. chlorure'tum*, *Zincum chlora'tum* seu *muriat'icum (oxydatum)*, *Chloride*

or *Chloruret of Zinc*, (F.) *Chlorure de Zinc*. (*Zinc*, in frustulis, ℥ijss; *acid. nitric.*, cretæ præparat. āā ℥j; *acid. muriat.* q. s. To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc*, *Butyrum Zinci*.

Chloride of Zinc is a powerful escharotic, and has been lately employed as an effective antiseptic.

ZINCI CHLORURETUM, *Z. chloridum*.

ZINCI CYANURETUM, *Z. cyan'idum seu Hydrocyanas seu Prussias, Zincum Cyanogenatum seu Borns'sicum seu Zodi'icum, Hydrocy'onate of Zinc*, (F.) *Cyanure de Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCYANAS, *Zinci ferrocyanuretum, Cyanuretum Ferrozincicum, Zincum Ferrohydrocyan'icum, Ferrohydrocyanate of Zinc*. Made by the mutual decomposition of boiling-hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, *Zinci cyanuretum*.

ZINCI IODIDUM, *Z. Iodure'tum, Zincum Iodatum, Iode'tum Zinci seu Zin'cium, Protoiodure'tum Zinci, Iodide or Iod'uret of Zinc*, (F.) *Iodure de Zinc*. This salt is made by boiling together iodine and zinc to dryness, and subliming. An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

ZINCI IODURETUM, *Z. iodidum — z. Nix, Zinci oxydum*.

ZINCI OXYDUM, *Zincum calcinat'um, Nihil Album, Lana Philosophorum seu Philosoph'ica, Nix Zinci, Nihil Gris'enum, Pom'pholyx, Oxyd of Zinc, Flowers of Zinc*, (F.) *Oxide ou Blanc de Zinc*. (Procured by burning zinc in a long, deep crucible, placed so as to collect the sublimate. Also, by exposing the precipitate thrown down from a solution of sulphate of zinc by carbonate of ammonia to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.*) It is tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see Ung. Zinci.

ZINCI OXYDUM IMPURUM, *Tutia — z. Prussias, Zinci cyanuretum*.

ZINCI SULPHAS, *Sulphate of Zinc, Zincum Vitriolatum, Vitriolum Album seu Goslaric'ensē seu Zinci, Sulphas Zin'cium, Gilla Vitrioli seu Theophrasti, Sal Vitrioli seu Vomitorium Vitrioli, Chalcant'um Album, White Vitriol, White Cop'eros*, (F.) *Sulfate de Zinc*. (*Zinc*, in frustul. ℥iv; *acid. sulphuric.* ℥vj; *aquæ destillat.* Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) The sulphate of zinc is inodorous; taste, styptic. It is in white, semi-

transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertussis*, and, as its title imports, given in whooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ℥ss: as a tonic, gr. j to ij. Used externally as a collyrium, gr. j. to water f ℥j.

ZINCI VALERIANAS, *Zincum valerian'icum, Valer'ianate of Zinc*. A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc. It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day. It is officinal in the Dublin Pharmacopœia.

ZINCUM, *Zinc — z. Borussicum, Zinci cyanuretum — z. Calcinitum, Zinci oxydum — z. Chloratum, Zinci chloridum — z. Cyanogenatum, Zinci cyanuretum — z. Ferrohydrocyanicum, Zinci ferrohydrocyanas — z. Iodatum, Zinci iodidum — z. Muriaticum, Zinci chloridum — z. Valerianicum, Zinci valerianas — z. Vitriolatum, Zinci sulphas — z. Zooticum, Zinci cyanuretum*.

ZINGIBER, *Amomum zingiber — z. Cassumuniar, see Cassumuniar — z. Cliffordia, see Cassumuniar — z. Germanicum, Arum maculatum — z. Officinale, Amomum zingiber — z. Purpureum, see Cassumuniar — z. Spurius, see Cassumuniar — z. Zerumbet, see Cassumuniar*.

ZINGIBERIN, *Piperoid*.

ZINGRITES, *Zigni'tes*. A stone, resembling glass; to which the ancients attributed marvellous properties.

ZINKUM, *Zincum*.

ZINT, *Zincum*.

ZINZIBER, *Amomum zingiber*.

ZIPHAC, *Peritonæum*.

ZIRBUS, *Epiploon — z. Adipinus, Epiploon, gastro-colic*.

ZIZANIA AQUATICA, *Wild Rice; Ord. Graminæ*; called by the Indians, *Ménonene*, grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages and the Canadian traders and hunters with their annual supplies of grain. Ζιζανιον was the ancient name of some wild grain.

ZIZYPHUS, *Jujube*.

ZIZYPHUS JUJUBA, see *Jujube — z. Nitida, see Jujube*.

ZIZYPHUS ÆNOP'IA, *Z. Napeca; Ord. Rhamnaceæ*; common all over India. The fruit is eaten by the natives. It is of a pleasant acid taste. A decoction of the bark of the fresh root is used to promote the healing of fresh wounds.

ZIZYPHUS SATIVA, see *Jujube — z. Sylvestris, see Jujube*.

ZOA'GRIA, from ζωη, 'life,' and ἀγρω, 'I catch up.' The saving and preservation of life. Ζωΐσις. A reward for preserving life; *Sostrum*. A votive offering hung up in the temples for a life saved.

ZOANTHRO'PIA, *Melanchol'ia zoanthro'pia*, from ζωον, 'an animal,' and ανθρωπος, 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and Cyananthropia belong to this species of monomania.

ZOARA, *Insomnia*.

ZOE, *Life*.

ZOGRAPHIA, *Zoographia*.

ZOIATRIA, *Veterinary art*.

ZOIATRUS, Hippiastr.
 ZOMIDIUM, Jus.
 ZOMOS, *Concomité*, Jus.
 ZONA, Herpes zoster — z. Castitatis, Hymen — z. Ciliaris, Ciliary zone — z. Ignea, Herpes zoster.
 ZONA PELLUCIDA, *Oolem'ma pellucidum*, Vitelline membrane, Chorion (of some), (F.) Vitelline. Membrane vitelline. The membrane that surrounds the yolk in the mammalia is so called on account of its thickness and peculiar transparency.
 ZONA SERPIGINOSA, Herpes zoster.
 ZONA TENDINOSA. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.
 ZONA VIRGINITATIS, Hymen.
 ZONE, Cingulum.
 ZONULA CILIARIS, see Ciliary, and Ciliary zone — z. Cochleæ, see Lamina spiralis — z. Hildani, Cingulum Hildani — z. Zinnii, see Ciliary zone.
 ZOOBIOLOGIA, see Physiology.
 ZOOCHEMIA, Chymistry, animal.
 ZOOCHEMICAL, *Zoöchym'ical*, *Zoöchem'icus*, *Zoöchym'icus*. Appertaining or having relation to animal chymistry.
 ZOOCHEMY, Chymistry, animal.
 ZOÖCHYMY, Chymistry, animal.
 ZOÖGENIUM, Azote.
 ZOÖG'ENY, *Zoögen'ia*, *Zoögen'esis*, from ζων, 'animal,' and γενεσις, 'generation.' The doctrine of animal formation.
 ZOOG'RAPHY, *Zoögra'phia*, *Zogra'phia*, from ζων, and γραφή, 'a description.' A description of animals. The natural history of animals.
 ZOOHEMATINE, Hæmatine.
 ZOÖHY'LAS, from ζων, and ὑλη, 'matter.' Animal matter.
 ZOÖHY'LICA CONCREM'ITA. Concrections formed of animal matter.
 ZOÖIASIS, Veterinary art.
 ZO'OID, *Zoöides*, *Zoöides*; from ζων, 'animal,' and οἶδος, 'resemblance.' Resembling or belonging to an animal. Every living cell may be regarded as a Zooid.
 ZOÖLOGIST, *Zoölogis'ta*, *Zoölogus*, from ζων, and λογος, 'description.' One skilled in the natural history of animals.
 ZOÖLOGY, *Zoölog'ia*. Same etymon. The natural history of animals.
 ZOOMAGNETISMUS, Magnetism, animal.
 ZOÖMYCUS, Mucus.
 ZOÖMYXA, Mucus.
 ZOÖN, Animal.
 ZOONOM'IA, *Organozoönom'ia*, *Zoönom'ia*, from ζων, and νόμος, 'law.' The laws which govern the organic actions of animals in general:—*Animal Physiology*, *Zoöphysiolog'ia*.
 ZOONOSOLOG'IA, from ζων, νοσος, 'a disease,' and λογος, 'a description.' The nosology of animals.
 ZOÖPATHOLOG'IA, from ζων, παθος, 'a disease,' and λογος, 'a description.' The pathology of animals.
 ZOOPHAGOUS, *Zoöph'agus*. (F.) *Zoöphage*, from ζων, and φάγω, 'I eat.' Feeding on animals. Carnivorous.
 ZOÖPHTHALMUS, Hydrophthalmia.
 ZOÖPHYSIOLOGIA, Physiology, animal, Zoonomia.
 ZO'ÖPHYTE, *Zoöph'ytum*, *Phytozoön*, *Animal plant*, from ζων, and φυτόν, 'a plant.' A naue

given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.
 ZOÖSIS, Animation, Zongria.
 ZOÖSPERMATA, Spermatozoa.
 ZOÖSPERMES, Spermatozoa.
 ZOOTHAP'SIS, from ζωη, 'life,' and θάπτω, 'I inter.' Burial alive. Premature interment.
 ZOOTOMIST, *Zootom'icus*. Same etymon as the next. One who dissects animals.
 ZOOT'OMY, *Zoötom'ia*, from ζων, and τέμνω, 'I cut.' *Anatom'ia animal'is* seu *comparati'va* seu *compar'ia*, *Theriot'omy*, *Compar'ative Anatomy*. The anatomy of animals. Animal anatomy.
 ZOISSA, see Pinus sylvestris.
 ZOPYRON, Fomites.
 ZOSTER, Herpes zoster.
 ZOSTERA MARINA, Pila marina — z. Marina, Pila marina.
 ZOSTÈRE, Pila marina.
 ZOZINETTE, Narcissus pseudonarcissus.
 ZOZAR, Saccharum.
 ZUCARO, Saccharum.
 ZUCCARUM, Saccharum.
 ZUCHAR, Saccharum.
 ZUCHARUM, Saccharum.
 ZUCHRA, Saccharum.
 ZULAPIUM, Julep.
 ZYGAPOPHYSES, see Vertebræ.
 ZYGOMA, Malar os.
 ZYGOMATIC, *Zygomat'icus*, *Jugal'is*, *Jugal*, (F.) *Zygomatique*. That which relates to the zygoma or cheek-bone.
 ZYGOMATIC ARCH, see Zygomatic process — z. Bone, Malar os.
 ZYGOMATIC FOSSA is the space included between the posterior margin of the outer ala of the pterygoid process, and the crista which descends from the malar tuberosity to the superior alveolar margin.
 ZYGOMATIC MUSCLES are two in number. 1. *Zygomat'icus major*, *Distort'or Oris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malar, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus minor*, (F.) *Petit Zygomato-labial*, (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malar, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.
 ZYGOMATIC PROCESS, *Processus zygomat'icus*, *Aroph'ysis Zygomat'ica*, *Malar* or *Jugal process*, (F.) *Arophyse Zygomatique*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, Ch.) and the other longitudinal; between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malar, with which it forms a bony bridge, called the *Zygomat'ic arch*, *Arcus* seu *Pons zygomat'icus*, (F.) *Arcade Zygomatique*. The cavity, beneath this bridge, is sometimes called *Zygom'ia*.
 ZYGOMATIC SUTURE is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.
 ZYGOMATIQUE, Zygomatic — z. *Grand*, *Zygomat'icus major* — z. *Petit*, *Zygomat'icus minor*.

ZYGOMATO-LABIAL, *Zygomatius major*
—z. *Labial, petit*, *Zygomatius major*—z. *Maxil-
laire*, *Masseter*—z. *Oriculaire*, *Anterior auris*.

ZYGOPHYLLUM FABAGO, (F.) *Fabagelle*.
Ord. Zygophyllaceæ. A Syrian and Mauritanic
plant, possessed of an acrid and bitter taste. It
has vermifuge properties. The Arabs believe
that the recently expressed juice of *Zygophyllum*
simplex, is capable of removing specks from the
cornea.

ZYMA, Ferment.

ZYMOMA, Ferment.

ZYMOSIS, Fermentation, see *Zymotic*.

ZYMOT'IC, *Zymot'icus*, (F.) *Zymotique*, from
ζυμω, 'to ferment.' Relating or appertaining to
fermentation. A *zymotic disease* is any epidemic,
endemic, contagious or sporadic affection, which
is produced by some morbid principle acting on
the organism similar to a ferment—as the major
exanthemata, pyohæmia, &c. *Zymoses* has been
used by some to signify such affections.

ZYTHOGALA, Posset.

ZYTHUM, Cerevisia.

ZYTHUS, Cerevisia.

THE END.

BLANCHARD & LEA'S MEDICAL AND SURGICAL PUBLICATIONS.

TO THE MEDICAL PROFESSION.

In the present catalogue we have affixed prices to our publications, in obedience to the repeated requests of numerous members of the profession. While books, like all other articles, must necessarily vary somewhat in cost throughout the extended territories of this country, yet our publications will generally be furnished at these rates by booksellers throughout the Union, who can readily and speedily procure any which they may not have on hand.

To accommodate those physicians who have not convenient access to bookstores, or who cannot order through merchants visiting the larger cities, we will forward our works by mail, *free of postage*, on receipt of the printed prices in current funds or postage stamps. As our business is wholesale, and we open accounts with booksellers only, the amount must in every case, without exception, accompany the order, and we can assume no risks of the mail, either on the money or the books; and as we only sell our own publications, we can supply no others. Physicians will, therefore, see the convenience and advantage of making their purchases, whenever practicable, from the nearest bookseller.

We can only add that no exertions are spared to merit a continuance of the gratifying confidence hitherto manifested by the profession in all works bearing our imprint.

BLANCHARD & LEA.

PHILADELPHIA, April, 1858.

* * We have now ready a new ILLUSTRATED CATALOGUE of our Medical and Scientific Publications, forming an octavo pamphlet of 80 large pages, containing specimens of illustrations, notices of the medical press, &c. &c. It has been prepared without regard to expense, and will be found one of the handsomest specimens of typographical execution as yet presented in this country. Copies will be sent to any address, by mail, free of postage, on receipt of nine cents in stamps.

Catalogues of our numerous publications in miscellaneous and educational literature forwarded on application.

TWO MEDICAL PERIODICALS, FREE OF POSTAGE, FOR FIVE DOLLARS PER ANNUM.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, subject to postage, when not paid for in advance, - - - - - \$5 00
THE MEDICAL NEWS AND LIBRARY, invariably in advance, - - - - - 1 00
OR, BOTH PERIODICALS furnished, FREE OF POSTAGE, for Five Dollars remitted in advance.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, EDITED BY ISAAC HAYS, M. D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains at least two hundred and eighty large octavo pages, handsomely and appropriately illustrated, wherever necessary. It has now been issued regularly for more than THIRTY-FIVE years, and it has been under the control of the present editor for more than a quarter of a century. Throughout this long period, it has maintained its position in the highest rank of medical periodicals both at home and abroad, and has received the cordial support of the entire profession in this country. Its list of Collaborators will be found to contain a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

ORIGINAL COMMUNICATIONS

full of varied and important matter, of great interest to all practitioners.

As the aim of the Journal, however, is to combine the advantages presented by all the different varieties of periodicals, in its

REVIEW DEPARTMENT

will be found extended and impartial reviews of all important new works, presenting subjects of novelty and interest, together with very numerous

BIBLIOGRAPHICAL NOTICES,

including nearly all the medical publications of the day, both in this country and Great Britain, with a choice selection of the more important continental works. This is followed by the

QUARTERLY SUMMARY,

being a very full and complete abstract, methodically arranged, of the

IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES.

This department of the Journal, so important to the practising physician, is the object of especial care on the part of the editor. It is classified and arranged under different heads, thus facilitating the researches of the reader in pursuit of particular subjects, and will be found to present a very full and accurate digest of all observations, discoveries, and inventions recorded in every branch of medical science. The very extensive arrangements of the publishers are such as to afford to the editor complete materials for this purpose, as he not only regularly receives

ALL THE AMERICAN MEDICAL AND SCIENTIFIC PERIODICALS,

but also twenty or thirty of the more important Journals issued in Great Britain and on the Continent, thus enabling him to present in a convenient compass a thorough and complete abstract of everything interesting or important to the physician occurring in any part of the civilized world.

To their old subscribers, many of whom have been on their list for twenty or thirty years, the publishers feel that no promises for the future are necessary; but those who may desire for the first time to subscribe, can rest assured that no exertion will be spared to maintain the Journal in the high position which it has occupied for so long a period.

By reference to the terms it will be seen that, in addition to this large amount of valuable and practical information on every branch of medical science, the subscriber, by paying in advance, becomes entitled, without further charge, to

THE MEDICAL NEWS AND LIBRARY,

a monthly periodical of thirty-two large octavo pages. Its "NEWS DEPARTMENT" presents the current information of the day, while the "LIBRARY DEPARTMENT" is devoted to presenting standard works on various branches of medicine. Within a few years, subscribers have thus received, without expense, the following works which have passed through its columns:—

WATSON'S LECTURES ON THE PRACTICE OF PHYSIC.

BRODIE'S CLINICAL LECTURES ON SURGERY.

TODD AND BOWMAN'S PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.

WEST'S LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

MALGAIGNE'S OPERATIVE SURGERY, with wood-cuts.

SIMON'S LECTURES ON GENERAL PATHOLOGY.

BENNETT ON PULMONARY TUBERCULOSIS, with wood-cuts,

WEST ON ULCERATION OF THE OS UTERI, and

BROWN ON THE SURGICAL DISEASES OF FEMALES, with wood-cuts.

WEST ON DISEASES OF WOMEN, Part I.

While in the number for January, 1858, is commenced a new and highly important work,

HABERSHON ON DISEASES OF THE ALIMENTARY CANAL.

It will be seen that this treatise covers the whole ground of affections of the Digestive Organs, which furnish so very large a portion of the daily practice of the physician. The author's position in Guy's Hospital, and the fact that the work has only just appeared in London, are sufficient guarantees that it is up to the hour, and presents the most advanced condition of this department of medical science, while its thorough practical character is manifested by the great number of cases on which it is founded, no less than one hundred and sixty-three being carefully analyzed in all their details, throughout its pages. It is therefore hoped that it will be found to fully maintain the valuable practical character of the works heretofore presented to subscribers through this medium.

It will thus be seen that for the small sum of FIVE DOLLARS, paid in advance, the subscriber will obtain a Quarterly and a Monthly periodical,

EMBRACING NEARLY SIXTEEN HUNDRED LARGE OCTAVO PAGES,

mailed to any part of the United States, free of postage.

These very favorable terms are now presented by the publishers with the view of removing all difficulties and objections to a full and extended circulation of the Medical Journal to the office of every member of the profession throughout the United States. The rapid extension of mail facilities will now place the numbers before subscribers with a certainty and dispatch not heretofore attainable; while by the system now proposed, every subscriber throughout the Union is placed upon an equal footing, at the very reasonable price of Five Dollars for two periodicals, without further expense.

Those subscribers who do not pay in advance will bear in mind that their subscription of Five Dollars will entitle them to the Journal only, without the News, and that they will be at the expense of their own postage on the receipt of each number. The advantage of a remittance when ordering the Journal will thus be apparent.

As the Medical News and Library is in no case sent without advance payment, its subscribers will always receive it free of postage.

Remittances of subscriptions can be mailed at our risk, when a certificate is taken from the Postmaster that the money is duly inclosed and forwarded.

Address

BLANCHARD & LEA, PHILADELPHIA.

ALLEN (J. M.), M. D.,

Professor of Anatomy in the Pennsylvania Medical College, &c.

THE PRACTICAL ANATOMIST; or, The Student's Guide in the Dissecting-room. With 266 illustrations. In one handsome royal 12mo. volume, of over 600 pages, leather. \$2 25. (*Just Issued.*)

In the arrangement of this work, the author has endeavored to present a complete and thorough course of dissections in a clearer and more available form for practical use, than has as yet been accomplished. The chapters follow each other in the order in which dissections are usually conducted in this country, and as each region is taken up, every detail regarding it is fully described and illustrated, so that the student is not interrupted in his labors, by the necessity of referring from one portion of the volume to another.

However valuable may be the "Dissector's Guides" which we, of late, have had occasion to notice, we feel confident that the work of Dr. Allen is superior to any of them. We believe with the author, that none is so fully illustrated as this, and the arrangement of the work is such as to facilitate the labors of the student in acquiring a thorough practical knowledge of Anatomy. We most cordially recommend it to their attention.—*Western Lancet*, Dec. 1856.

We believe it to be one of the most useful works upon the subject ever written. It is handsomely illustrated, well printed, and will be found of convenient size for use in the dissecting-room.—*Medical Examiner*, Dec. 1856.

From Prof. J. S. Davis, University of Va.

I am not acquainted with any work that attains so fully the object which it proposes.

From C. P. Fanner, M. D., Demonstrator, University of Michigan.

I have examined the work briefly, but even this examination has convinced me that it is an excellent guide for the Dissector. Its illustrations are beautiful, and more than I have seen in a work of this kind. I shall take great pleasure in recommending it to my classes as the *text-book of the dissecting-room.*

ANALYTICAL COMPENDIUM

OF MEDICAL SCIENCE, containing Anatomy, Physiology, Surgery, Midwifery, Chemistry, Materia Medica, Therapeutics, and Practice of Medicine. By JOHN NEILL, M. D., and F. G. SMITH, M. D. New and enlarged edition, one thick volume royal 12mo. of over 1000 pages, with 374 illustrations. See NEILL, p. 24.

ABEL (F. A.), F. C. S. AND C. L. BLOXAM.

HANDBOOK OF CHEMISTRY, Theoretical, Practical, and Technical; with a Recommendatory Preface by Dr. HOFMANN. In one large octavo volume, extra cloth, of 662 pages, with illustrations. \$3 25.

ASHWELL (SAMUEL), M. D.,

Obstetric Physician and Lecturer to Guy's Hospital, London.

A PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN.

Illustrated by Cases derived from Hospital and Private Practice. Third American, from the Third and revised London edition. In one octavo volume, extra cloth, of 528 pages. \$3 00.

The most useful practical work on the subject in the English language.—*Boston Med. and Surg. Journal*.

The most able, and certainly the most standard and practical, work on female diseases that we have yet seen.—*Medico-Chirurgical Review*.

ARNOTT (NEILL), M. D.

ELEMENTS OF PHYSICS; or Natural Philosophy, General and Medical.

Written for universal use, in plain or non-technical language. A new edition, by ISAAC HAYS, M. D. Complete in one octavo volume, leather, of 484 pages, with about two hundred illustrations. \$2 50.

BUDD (GEORGE), M. D., F. R. S.,

Professor of Medicine in King's College, London.

ON DISEASES OF THE LIVER. Third American, from the third and enlarged London edition. In one very handsome octavo volume, extra cloth, with four beautifully colored plates, and numerous wood-cuts. pp. 500. \$3 00. (*Now Ready.*)

Has fairly established for itself a place among the classical medical literature of England.—*British and Foreign Medico-Chir. Review*, July, 1857.

Dr. Budd's Treatise on Diseases of the Liver is now a standard work in Medical literature, and during the intervals which have elapsed between the successive editions, the author has incorporated into the text the most striking novelties which have characterized the recent progress of hepatic physiology and pathology; so that although the size of the book

is not perceptibly changed, the history of liver diseases is made more complete, and is kept upon a level with the progress of modern science. It is the best work on Diseases of the Liver in any language.—*London Med. Times and Gazette*, June 27, 1857.

This work, now the standard book of reference on the diseases of which it treats, has been carefully revised, and many new illustrations of the views of the learned author added in the present edition.—*Dublin Quarterly Journal*, Aug. 1857.

BY THE SAME AUTHOR.

ON THE ORGANIC DISEASES AND FUNCTIONAL DISORDERS OF THE STOMACH. In one neat octavo volume, extra cloth. \$1 50.

From the high position occupied by Dr. Budd as a teacher, a writer, and a practitioner, it is almost needless to state that the present book may be consulted with great advantage. It is written in an easy

style, the subjects are well arranged, and the practical precepts, both of diagnosis and treatment, denote the character of a thoughtful and experienced physician.—*London Med. Times and Gazette*.

BROWN (ISAAC BAKER),
 Surgeon-Accoucheur to St. Mary's Hospital, &c.

ON SOME DISEASES OF WOMEN ADMITTING OF SURGICAL TREATMENT. With handsome illustrations. One vol. 8vo., extra cloth, pp 276. \$1 60.

Mr. Brown has earned for himself a high reputation in the operative treatment of sundry diseases and injuries to which females are peculiarly subject. We can truly say of his work that it is an important addition to obstetrical literature. The operative suggestions and contrivances which Mr. Brown describes, exhibit much practical sagacity and skill,

and merit the careful attention of every surgeon-accoucheur.—*Association Journal*.

We have no hesitation in recommending this book to the careful attention of all surgeons who make female complaints a part of their study and practice.—*Dublin Quarterly Journal*.

BENNETT (J. HUGHES), M. D., F. R. S. E.,
 Professor of Clinical Medicine in the University of Edinburgh, &c.

THE PATHOLOGY AND TREATMENT OF PULMONARY TUBERCULOSIS, and on the Local Medication of Pharyngeal and Laryngeal Diseases frequently mistaken for or associated with, Phthisis. One vol. 8vo., extra cloth, with wood-cuts. pp. 130. \$1 25.

BENNETT (HENRY), M. D.

A PRACTICAL TREATISE ON INFLAMMATION OF THE UTERUS, ITS CERVIX AND APPENDAGES, and on its connection with Uterine Disease. Fourth American, from the third and revised London edition. To which is added (*July, 1856*), a REVIEW OF THE PRESENT STATE OF UTERINE PATHOLOGY. In one neat octavo volume, extra cloth, of 500 pages, with wood-cuts. \$2 00 Also, the "Review," for sale separate. Price 50 cents.

The addition of the "REVIEW" presents the recent aspects of the questions discussed in this well-known work.

This edition has been carefully revised and altered, and various additions have been made, which render it more complete, and, if possible, more worthy of the high appreciation in which it is held by the medical profession throughout the world. A copy should be in the possession of every physician.—*Charleston Med. Journal and Review*.

We are firmly of opinion that in proportion as a knowledge of uterine diseases becomes more appreciated, this work will be proportionably established as a text-book in the profession.—*The Lancet*.

When, a few years back, the first edition of the present work was published, the subject was one almost entirely unknown to the obstetrical celebrities of the day; and even now we have reason to know that the bulk of the profession are not fully alive to the importance and frequency of the disease of which it takes cognizance. The present edition is so much enlarged, altered, and improved, that it can scarcely be considered the same work.—*Dr. Ranking's Abstract*.

BIRD (GOLDING), A. M., M. D., &c.

URINARY DEPOSITS: THEIR DIAGNOSIS, PATHOLOGY, AND THERAPEUTICAL INDICATIONS. A new and enlarged American, from a late improved London edition. With over sixty illustrations. In one royal 12mo. vol, extra cloth. pp. 372. \$1 30.

It can scarcely be necessary for us to say anything of the merits of this well-known Treatise, which so admirably brings into practical application the results of those microscopical and chemical researches regarding the physiology and pathology of the urinary secretion, which have contributed so much to the increase of our diagnostic powers, and to the

extension and satisfactory employment of our therapeutic resources. In the preparation of this new edition of his work, it is obvious that Dr. Golding Bird has spared no pains to render it a faithful representation of the present state of scientific knowledge on the subject it embraces.—*The British and Foreign Medico-Chirurgical Review*.

BY THE SAME AUTHOR.

ELEMENTS OF NATURAL PHILOSOPHY; being an Experimental Introduction to the Physical Sciences. Illustrated with nearly four hundred wood-cuts. From the third London edition. In one neat volume, royal 12mo., extra cloth. pp. 402. \$1 25.

BOWMAN (JOHN E.), M. D.

PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY. Second American, from the third and revised English Edition. In one neat volume, royal 12mo., extra cloth, with numerous illustrations. pp. 258. \$1 25.

BY THE SAME AUTHOR.

INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS. Second American, from the second and revised London edition. With numerous illustrations. In one neat vol., royal 12mo., extra cloth. pp. 350. \$1 25.

BEALE ON THE LAWS OF HEALTH IN RELATION TO MIND AND BODY. A Series of Letters from an old Practitioner to a Patient. In one volume, royal 12mo., extra cloth. pp. 296. 80 cents.

BUSHMAN'S PHYSIOLOGY OF ANIMAL AND VEGETABLE LIFE; a Popular Treatise on the Functions and Phenomena of Organic Life. In one handsome royal 12mo. volume, extra cloth, with over 100 illustrations. pp. 234. 80 cents.

BUCKLER ON THE ETIOLOGY, PATHOLOGY, AND TREATMENT OF FIBRO-BRONCHITIS AND RHEUMATIC PNEUMONIA. In one 8vo. volume, extra cloth. pp. 150. \$1 25.

BLOOD AND URINE (MANUALS ON). BY JOHN WILLIAM GRIFFITH, G. OWEN REESE, AND ALFRED MARKWICK. One thick volume, royal 12mo., extra cloth, with plates. pp. 460. \$1 25.

BRODIE'S CLINICAL LECTURES ON SURGERY. 1 vol. 8vo., cloth. 350 pp. \$1 25.

BARCLAY (A. W.) M. D.,

Assistant Physician to St. George's Hospital, &c.

A MANUAL OF MEDICAL DIAGNOSIS; being an Analysis of the Signs and Symptoms of Disease. In one neat octavo volume, extra cloth, of 424 pages. (*Now Ready*.) \$2 00.

Of works exclusively devoted to this important branch our profession has at command, comparatively, but few, and, therefore, in the publication of the present work, Messrs. Blanchard & Lea have conferred a great favor upon us. Dr. Barclay, from having occupied, for a long period, the position of Medical Registrar at St. George's Hospital, possessed advantages for correct observation and reliable conclusions, as to the significance of symptoms, which have fallen to the lot of but few, either in his own or any other country. He has carefully systematized the results of his observation of over twelve thousand patients, and by his diligence and judicious classification, the profession has been presented with the most convenient and reliable work on the subject of Diagnosis that it has been our good fortune ever to examine; we can, therefore, say of Dr. Barclay's work, that, from his systematic manner of arrangement, his work is one of the best works "for reference" in the daily emergencies of the practitioner, with which we are acquainted; but, at the same time, we would recommend our readers, especially the younger ones, to read thoroughly and study diligently the *whole* work, and the "emergencies" will not occur so often.—*Southern Med. and Surg. Journ.*, March, 1858.

To give this information, to supply this admitted deficiency, is the object of Dr. Barclay's Manual. The task of composing such a work is neither an easy nor a light one; but Dr. Barclay has performed it in a manner which meets our most unqualified approbation. He is no mere theorist; he knows his work thoroughly, and in attempting to perform it,

has not exceeded his powers. We have thus given a specimen of Barclay's generalizing spirit in one direction; but the same pervades his whole work, and will, we are sure, induce teachers to recommend it strongly to their pupils. It is impossible for us here to follow the book into its particulars; and, indeed, we think it enough to indicate, as we have done, the importance of the teaching which it offers to the rising generation of medicine, to insure for it a hearty reception at the hands of the profession. It is the work of a physician and a gentleman.—*British Med. Journal*, Dec. 5, 1857.

We hope the volume will have an extensive circulation, not among students of medicine only, but practitioners also. They will never regret a faithful study of its pages.—*Cincinnati Lancet*, Mar. '58.

This *Manual of Medical Diagnosis* is one of the most scientific, useful, and instructive works of its kind that we have ever read, and Dr. Barclay has done good service to medical science in collecting, arranging, and analyzing the signs and symptoms of so many diseases. It must have cost him great labor, and the profession should show their appreciation of it by their desire to procure and apply its valuable hints and suggestions to the thousand obscure cases which perplex and baffle the unaided efforts of any one man, be he ever so wise, and his opportunities ever so good. Another most valuable feature in the work is that it has been furnished with a copious index, which increases its utility very much as a volume of reference.—*N. J. Med. and Surg. Reporter*, March, 1858.

BARLOW (GEORGE H.), M. D.

Physician to Guy's Hospital, London, &c.

A MANUAL OF THE PRACTICE OF MEDICINE. With Additions by D. F. CONDIE, M. D., author of "A Practical Treatise on Diseases of Children," &c. In one handsome octavo volume, leather, of over 600 pages. (*A new work, just issued, 1856.*) \$2 75.

We recommend Dr. Barlow's Manual in the warmest manner as a most valuable *vade-mecum*. We have had frequent occasion to consult it, and have found it clear, concise, practical, and sound. It is eminently a practical work, containing all that is essential, and avoiding useless theoretical discussion. The work supplies what has been for some time wanting, a manual of practice based upon modern discoveries in pathology and rational views of treatment of disease. It is especially intended for the use of students and junior practitioners, but it

will be found hardly less useful to the experienced physician. The American editor has added to the work three chapters—on Cholera Infantum, Yellow Fever, and Cerebro-spinal Meningitis. These additions, the two first of which are indispensable to a work on practice destined for the profession in this country, are executed with great judgment and fidelity, by Dr. Condie, who has also succeeded happily in imitating the conciseness and clearness of style which are such agreeable characteristics of the original book.—*Boston Med. and Surg. Journal*.

BARTLETT (ELISHA), M. D.

THE HISTORY, DIAGNOSIS, AND TREATMENT OF THE FEVERS OF THE UNITED STATES. A new and revised edition. By ALONZO CLARK, M. D., Prof. of Pathology and Practical Medicine in the N. Y. College of Physicians and Surgeons, &c. In one octavo volume, of six hundred pages, extra cloth. (*Now Ready.*) Price \$3 00.

It is the best work on fevers which has emanated from the American press, and the present editor has carefully availed himself of all information existing upon the subject in the Old and New World, so that the doctrines advanced are brought down to the latest date in the progress of this department of Medical Science.—*London Med. Times and Gazette*, May 2, 1857.

This excellent monograph on febrile disease, has stood deservedly high since its first publication. It will be seen that it has now reached its fourth edition under the supervision of Prof. A. Clark, a gentleman who, from the nature of his studies and pursuits, is well calculated to appreciate and discuss the many intricate and difficult questions in patho-

logy. His annotations add much to the interest of the work, and have brought it well up to the condition of the science as it exists at the present day in regard to this class of diseases.—*Southern Med. and Surg. Journal*, Mar. 1857.

It is a work of great practical value and interest, containing much that is new relative to the several diseases of which it treats, and, with the additions of the editor, is fully up to the times. The distinctive features of the different forms of fever are plainly and forcibly portrayed, and the lines of demarcation carefully and accurately drawn, and to the American practitioner is a more valuable and safe guide than any work on fever extant.—*Ohio Med. and Surg. Journal*, May, 1857.

CURLING (T. B.), F. R. S.,

Surgeon to the London Hospital, President of the Hunterian Society, &c.

A PRACTICAL TREATISE ON DISEASES OF THE TESTIS, SPERMATIC CORD, AND SCROTUM. Second American, from the second and enlarged English edition. In one handsome octavo volume, extra cloth, with numerous illustrations. pp. 420. (*Just Issued, 1856.*) \$2 00.

CARPENTER (WILLIAM B.), M. D., F. R. S., &c.,
 Examiner in Physiology and Comparative Anatomy in the University of London.

PRINCIPLES OF HUMAN PHYSIOLOGY; with their chief applications to Psychology, Pathology, Therapeutics, Hygiene, and Forensic Medicine. A new American, from the last and revised London edition. With nearly three hundred illustrations. Edited, with additions, by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the Pennsylvania Medical College, &c. In one very large and beautiful octavo volume, of about nine hundred large pages, handsomely printed and strongly bound in leather, with raised bands. (*Just Issued*, 1856.) \$4 25.

In the preparation of this new edition, the author has spared no labor to render it, as heretofore, a complete and lucid exposition of the most advanced condition of its important subject. The amount of the additions required to effect this object thoroughly, joined to the former large size of the volume, presenting objections arising from the unwieldy bulk of the work, he has omitted all those portions not bearing directly upon HUMAN PHYSIOLOGY, designing to incorporate them in his forthcoming Treatise on GENERAL PHYSIOLOGY. As a full and accurate text-book on the Physiology of Man, the work in its present condition therefore presents even greater claims upon the student and physician than those which have heretofore won for it the very wide and distinguished favor which it has so long enjoyed. The additions of Prof. Smith will be found to supply whatever may have been wanting to the American student, while the introduction of many new illustrations, and the most careful mechanical execution, render the volume one of the most attractive as yet issued.

For upwards of thirteen years Dr. Carpenter's work has been considered by the profession generally, both in this country and England, as the most valuable compendium on the subject of physiology in our language. This distinction it owes to the high attainments and unwearied industry of its accomplished author. The present edition (which, like the last American one, was prepared by the author himself), is the result of such extensive revision, that it may almost be considered a new work. We need hardly say, in concluding this brief notice, that while the work is indispensable to every student of medicine in this country, it will amply repay the practitioner for its perusal by the interest and value of its contents.—*Boston Med. and Surg. Journal*.

This is a standard work—the text-book used by all medical students who read the English language. It has passed through several editions in order to keep pace with the rapidly growing science of Physiology. Nothing need be said in its praise, for its merits are universally known; we have nothing to say of its defects, for they only appear where the science of which it treats is incomplete.—*Western Lancet*.

The most complete exposition of physiology which any language can at present give.—*Brit. and For. Med.-Chirurg. Review*.

The greatest, the most reliable, and the best book on the subject which we know of in the English language.—*Stethoscope*.

To eulogize this great work would be superfluous. We should observe, however, that in this edition the author has remodelled a large portion of the former, and the editor has added much matter of interest, especially in the form of illustrations. We may confidently recommend it as the most complete work on Human Physiology in our language.—*Southern Med. and Surg. Journal*, December, 1855.

The most complete work on the science in our language.—*Am. Med. Journal*.

The most complete work now extant in our language.—*N. O. Med. Register*.

The best text-book in the language on this extensive subject.—*London Med. Times*.

A complete cyclopædia of this branch of science.—*N. Y. Med. Times*.

The profession of this country, and perhaps also of Europe, have anxiously and for some time awaited the announcement of this new edition of Carpenter's Human Physiology. His former editions have for many years been almost the only text-book on Physiology in all our medical schools, and its circulation among the profession has been unsurpassed by any work in any department of medical science.

It is quite unnecessary for us to speak of this work as its merits would justify. The mere announcement of its appearance will afford the highest pleasure to every student of Physiology, while its perusal will be of infinite service in advancing physiological science.—*Ohio Med. and Surg. Journ.*

BY THE SAME AUTHOR. (*Lately Issued*.)

PRINCIPLES OF COMPARATIVE PHYSIOLOGY. New American, from the Fourth and Revised London edition. In one large and handsome octavo volume, with over three hundred beautiful illustrations. pp. 752. Extra cloth, \$4 80; leather, raised bands, \$5 25.

The delay which has existed in the appearance of this work has been caused by the very thorough revision and remodelling which it has undergone at the hands of the author, and the large number of new illustrations which have been prepared for it. It will, therefore, be found almost a new work, and fully up to the day in every department of the subject, rendering it a reliable text-book for all students engaged in this branch of science. Every effort has been made to render its typographical finish and mechanical execution worthy of its exalted reputation, and creditable to the mechanical arts of this country.

This book should not only be read but thoroughly studied by every member of the profession. None are too wise or old, to be benefited thereby. But especially to the younger class would we cordially commend it as best fitted of any work in the English language to qualify them for the reception and comprehension of those truths which are daily being developed in physiology.—*Medical Councillor*.

Without pretending to it, it is an encyclopedia of the subject, accurate and complete in all respects—a truthful reflection of the advanced state at which the science has now arrived.—*Dublin Quarterly Journal of Medical Science*.

A truly magnificent work—in itself a perfect physiological study.—*Ranking's Abstract*.

This work stands without its fellow. It is one few men in Europe could have undertaken; it is one

no man, we believe, could have brought to so successful an issue as Dr. Carpenter. It required for its production a physiologist at once deeply read in the labors of others, capable of taking a general, critical, and unprejudiced view of those labors, and of combining the varied, heterogeneous materials at his disposal, so as to form an harmonious whole. We feel that this abstract can give the reader a very imperfect idea of the fulness of this work, and no idea of its unity, of the admirable manner in which material has been brought, from the most various sources, to conduce to its completeness, of the lucidity of the reasoning it contains, or of the clearness of language in which the whole is clothed. Not the profession only, but the scientific world at large, must feel deeply indebted to Dr. Carpenter for this great work. It must, indeed, add largely even to his high reputation.—*Medical Times*.

CARPENTER (WILLIAM B.), M. D., F. R. S.,

Examiner in Physiology and Comparative Anatomy in the University of London.

(Just Issued, 1856.)

THE MICROSCOPE AND ITS REVELATIONS. With an Appendix containing the Applications of the Microscope to Clinical Medicine, &c. By F. G. SMITH, M. D. Illustrated by four hundred and thirty-four beautiful engravings on wood. In one large and very handsome octavo volume, of 724 pages, extra cloth, \$4 00; leather, \$4 50.

Dr. Carpenter's position as a microscopist and physiologist, and his great experience as a teacher eminently qualify him to produce what has long been wanted—a good text-book on the practical use of the microscope. In the present volume his object has been, as stated in his Preface, “to combine, within a moderate compass, that information with regard to the use of his ‘tools,’ which is most essential to the working microscopist, with such an account of the objects best fitted for his study, as might qualify him to comprehend what he observes, and might thus prepare him to benefit science, whilst expanding and refreshing his own mind.” That he has succeeded in accomplishing this, no one acquainted with his previous labors can doubt.

The great importance of the microscope as a means of diagnosis, and the number of microscopists who are also physicians, have induced the American publishers, with the author's approval, to add an Appendix, carefully prepared by Professor Smith, on the applications of the instrument to clinical medicine, together with an account of American Microscopes, their modifications and accessories. This portion of the work is illustrated with nearly one hundred wood-cuts, and, it is hoped, will adapt the volume more particularly to the use of the American student.

Every care has been taken in the mechanical execution of the work, which is confidently presented as in no respect inferior to the choicest productions of the London press.

The mode in which the author has executed his intentions may be gathered from the following condensed synopsis of the

CONTENTS.

INTRODUCTION—History of the Microscope. CHAP. I. Optical Principles of the Microscope. CHAP. II. Construction of the Microscope. CHAP. III. Accessory Apparatus. CHAP. IV. Management of the Microscope. CHAP. V. Preparation, Mounting, and Collection of Objects. CHAP. VI. Microscopic Forms of Vegetable Life—Protophytes. CHAP. VII. Higher Cryptogamia. CHAP. VIII. Phanerogamic Plants. CHAP. IX. Microscopic Forms of Animal Life—Protozoa—Animalcules. CHAP. X. Foraminifera, Polycystina, and Sponges. CHAP. XI. Zoophytes. CHAP. XII. Echinodermata. CHAP. XIII. Polyzoa and Compound Tunicata. CHAP. XIV. Molluscous Animals Generally. CHAP. XV. Annulosa. CHAP. XVI. Crustacea. CHAP. XVII. Insects and Arachnida. CHAP. XVIII. Vertebrated Animals. CHAP. XIX. Applications of the Microscope to Geology. CHAP. XX. Inorganic or Mineral Kingdom—Polarization. APPENDIX. Microscope as a means of Diagnosis—Injections—Microscopes of American Manufacture.

Those who are acquainted with Dr. Carpenter's previous writings on Animal and Vegetable Physiology, will fully understand how vast a store of knowledge he is able to bring to bear upon so comprehensive a subject as the revelations of the microscope; and even those who have no previous acquaintance with the construction or uses of this instrument, will find abundance of information conveyed in clear and simple language.—*Med. Times and Gazette.*

Although originally not intended as a strictly

medical work, the additions by Prof. Smith give it a positive claim upon the profession, for which we doubt not he will receive their sincere thanks. Indeed, we know not where the student of medicine will find such a complete and satisfactory collection of microscopic facts bearing upon physiology and practical medicine as is contained in Prof. Smith's appendix; and this of itself, it seems to us, is fully worth the cost of the volume.—*Louisville Medical Review*, Nov. 1856.

BY THE SAME AUTHOR.

ELEMENTS (OR MANUAL) OF PHYSIOLOGY, INCLUDING PHYSIOLOGICAL ANATOMY. Second American, from a new and revised London edition. With one hundred and ninety illustrations. In one very handsome octavo volume, leather. pp. 566. \$3 00.

In publishing the first edition of this work, its title was altered from that of the London volume, by the substitution of the word “Elements” for that of “Manual,” and with the author's sanction the title of “Elements” is still retained as being more expressive of the scope of the treatise.

To say that it is the best manual of Physiology now before the public, would not do sufficient justice to the author.—*Buffalo Medical Journal.*

In his former works it would seem that he had exhausted the subject of Physiology. In the present, he gives the essence, as it were, of the whole.—*N. Y. Journal of Medicine.*

Those who have occasion for an elementary treatise on Physiology, cannot do better than to possess themselves of the manual of Dr. Carpenter.—*Medical Examiner.*

The best and most complete exposé of modern Physiology, in one volume, extant in the English language.—*St. Louis Medical Journal.*

BY THE SAME AUTHOR. (Preparing.)

PRINCIPLES OF GENERAL PHYSIOLOGY, INCLUDING ORGANIC CHEMISTRY AND HISTOLOGY. With a General Sketch of the Vegetable and Animal Kingdom. In one large and very handsome octavo volume, with several hundred illustrations.

The subject of general physiology having been omitted in the last editions of the author's “Comparative Physiology” and “Human Physiology,” he has undertaken to prepare a volume which shall present it more thoroughly and fully than has yet been attempted, and which may be regarded as an introduction to his other works.

BY THE SAME AUTHOR.

A PRIZE ESSAY ON THE USE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE. New edition, with a Preface by D. F. CONDIE, M. D., and explanations of scientific words. In one neat 12mo. volume, extra cloth. pp. 178. 50 cents.

CONDIE (D. F.), M. D., &c.

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN. Fourth edition, revised and augmented. In one large volume, 8vo., leather, of nearly 750 pages. \$3 00.

FROM THE AUTHOR'S PREFACE.

The demand for another edition has afforded the author an opportunity of again subjecting the entire treatise to a careful revision, and of incorporating in it every important observation recorded since the appearance of the last edition, in reference to the pathology and therapeutics of the several diseases of which it treats.

In the preparation of the present edition, as in those which have preceded, while the author has appropriated to his use every important fact that he has found recorded in the works of others, having a direct bearing upon either of the subjects of which he treats, and the numerous valuable observations—pathological as well as practical—dispersed throughout the pages of the medical journals of Europe and America, he has, nevertheless, relied chiefly upon his own observations and experience, acquired during a long and somewhat extensive practice, and under circumstances peculiarly well adapted for the clinical study of the diseases of early life.

Every species of hypothetical reasoning has, as much as possible, been avoided. The author has endeavored throughout the work to confine himself to a simple statement of well-ascertained pathological facts, and plain therapeutical directions—his chief desire being to render it what its title imports it to be, a PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.

Dr. Condie's scholarship, acumen, industry, and practical sense are manifested in this, as in all his numerous contributions to science.—*Dr. Holmes's Report to the American Medical Association.*

Taken as a whole, in our judgment, Dr. Condie's Treatise is the one from the perusal of which the practitioner in this country will rise with the greatest satisfaction.—*Western Journal of Medicine and Surgery.*

One of the best works upon the Diseases of Children in the English language.—*Western Lancet.*

Perhaps the most full and complete work now before the profession of the United States; indeed, we may say in the English language. It is vastly superior to most of its predecessors.—*Transylvania Med. Journal.*

We feel assured from actual experience that no physician's library can be complete without a copy of this work.—*N. Y. Journal of Medicine.*

A veritable pædiatric encyclopædia, and an honor to American medical literature.—*Ohio Medical and Surgical Journal.*

We feel persuaded that the American medical profession will soon regard it not only as a very good, but as the VERY BEST "Practical Treatise on the Diseases of Children."—*American Medical Journal.*

We pronounced the first edition to be the best work on the diseases of children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner.*

CHRISTISON (ROBERT), M. D., V. P. R. S. E., &c.

A DISPENSATORY; or, Commentary on the Pharmacopœias of Great Britain and the United States; comprising the Natural History, Description, Chemistry, Pharmacy, Actions, Uses, and Doses of the Articles of the Materia Medica. Second edition, revised and improved, with a Supplement containing the most important New Remedies. With copious Additions, and two hundred and thirteen large wood-engravings. By R. EGLESFELD GRIFFITH, M. D. In one very large and handsome octavo volume, leather, raised bands, of over 1000 pages. \$3 50.

It is not needful that we should compare it with the other pharmacopœias extant, which enjoy and merit the confidence of the profession: it is enough to say that it appears to us as perfect as a Dispensatory, in the present state of pharmaceutical science, could be made. If it omits any details pertaining to

this branch of knowledge which the student has a right to expect in such a work, we confess the omission has escaped our scrutiny. We cordially recommend this work to such of our readers as are in need of a Dispensatory. They cannot make choice of a better.—*Western Journ. of Medicine and Surgery.*

COOPER (BRANSBY B.), F. R. S.

LECTURES ON THE PRINCIPLES AND PRACTICE OF SURGERY. In one very large octavo volume, extra cloth, of 750 pages. \$3 00.

COOPER ON DISLOCATIONS AND FRACTURES OF THE JOINTS.—Edited by BRANSBY B. COOPER, F. R. S., &c. With additional Observations by Prof. J. C. WARREN. A new American edition. In one handsome octavo volume, extra cloth, of about 500 pages, with numerous illustrations on wood. \$3 25.

COOPER ON THE ANATOMY AND DISEASES OF THE BREAST, with twenty-five Miscellaneous and Surgical Papers. One large volume, imperial 8vo., extra cloth, with 252 figures, on 36 plates. \$2 50.

COOPER ON THE STRUCTURE AND DISEASES OF THE TESTIS, AND ON THE THYMUS GLAND. One vol. imperial 8vo., extra cloth, with 177 figures on 29 plates. \$2 00.

COPLAND ON THE CAUSES, NATURE, AND TREATMENT OF Palsy AND APOPLEXY. In one volume, royal 12mo., extra cloth. pp. 326. 80 cents.

CLYMER ON FEVERS; THEIR DIAGNOSIS, PATHOLOGY, AND TREATMENT In one octavo volume, leather, of 600 pages. \$1 50.

COLOMBAT DE L'ISERE ON THE DISEASES OF FEMALES, and on the special Hygiene of their Sex. Translated, with many Notes and Additions, by C. D. MEIGS, M. D. Second edition, revised and improved. In one large volume, octavo, leather, with numerous wood-cuts. pp. 720. \$3 50.

CARSON (JOSEPH), M. D.,

Professor of Materia Medica and Pharmacy in the University of Pennsylvania.

SYNOPSIS OF THE COURSE OF LECTURES ON MATERIA MEDICA AND PHARMACY, delivered in the University of Pennsylvania. Second and revised edition. In one very neat octavo volume, extra cloth, of 208 pages. \$1 50.

CHURCHILL (FLEETWOOD), M. D., M. R. I. A.

ON THE THEORY AND PRACTICE OF MIDWIFERY. Edited, with Notes and Additions, by D. FRANCIS CONDIE, M. D., author of a "Practical Treatise on the Diseases of Children," &c. With 139 illustrations. In one very handsome octavo volume, leather. pp.510. \$3 00.

To bestow praise on a book that has received such marked approbation would be superfluous. We need only say, therefore, that if the first edition was thought worthy of a favorable reception by the medical public, we can confidently affirm that this will be found much more so. The lecturer, the practitioner, and the student, may all have recourse to its pages, and derive from their perusal much interest and instruction in everything relating to theoretical and practical midwifery.—*Dublin Quarterly Journal of Medical Science.*

A work of very great merit, and such as we can confidently recommend to the study of every obstetric practitioner.—*London Medical Gazette.*

This is certainly the most perfect system extant. It is the best adapted for the purposes of a text-book, and that which he whose necessities confine him to one book, should select in preference to all others.—*Southern Medical and Surgical Journal.*

The most popular work on midwifery ever issued from the American press.—*Charleston Med. Journal.*

Were we reduced to the necessity of having but one work on midwifery, and permitted to choose, we would unhesitatingly take Churchill.—*Western Med. and Surg. Journal.*

It is impossible to conceive a more useful and elegant manual than Dr. Churchill's Practice of Midwifery.—*Provincial Medical Journal.*

Certainly, in our opinion, the very best work on the subject which exists.—*N. Y. Annalist.*

No work holds a higher position, or is more deserving of being placed in the hands of the tyro, the advanced student, or the practitioner.—*Medical Examiner.*

Previous editions, under the editorial supervision of Prof. R. M. Huston, have been received with marked favor, and they deserved it; but this, reprinted from a very late Dublin edition, carefully revised and brought up by the author to the present time, does present an unusually accurate and able exposition of every important particular embraced in the department of midwifery. * * The clearness, directness, and precision of its teachings, together with the great amount of statistical research which its text exhibits, have served to place it already in the foremost rank of works in this department of remedial science.—*N. O. Med. and Surg. Journal.*

In our opinion, it forms one of the best if not the very best text-book and epitome of obstetric science which we at present possess in the English language.—*Monthly Journal of Medical Science.*

The clearness and precision of style in which it is written, and the great amount of statistical research which it contains, have served to place it in the first rank of works in this department of medical science.—*N. Y. Journal of Medicine.*

Few treatises will be found better adapted as a text-book for the student, or as a manual for the frequent consultation of the young practitioner.—*American Medical Journal.*

BY THE SAME AUTHOR. (Just Issued.)

ON THE DISEASES OF INFANTS AND CHILDREN. Second American Edition, revised and enlarged by the author. Edited, with Notes, by W. V. KEATING, M. D. In one large and handsome volume, extra cloth, of over 700 pages. \$3 00, or in leather, \$3 25.

In preparing this work a second time for the American profession, the author has spared no labor in giving it a very thorough revision, introducing several new chapters, and rewriting others, while every portion of the volume has been subjected to a severe scrutiny. The efforts of the American editor have been directed to supplying such information relative to matters peculiar to this country as might have escaped the attention of the author, and the whole may, therefore, be safely pronounced one of the most complete works on the subject accessible to the American Profession. By an alteration in the size of the page, these very extensive additions have been accommodated without unduly increasing the size of the work.

A few notices of the former edition are subjoined:—

We regard this volume as possessing more claims to completeness than any other of the kind with which we are acquainted. Most cordially and earnestly, therefore, do we commend it to our professional brethren, and we feel assured that the stamp of their approbation will in due time be impressed upon it. After an attentive perusal of its contents, we hesitate not to say, that it is one of the most comprehensive ever written upon the diseases of children, and that, for copiousness of reference, extent of research, and perspicuity of detail, it is scarcely to be equalled, and not to be excelled, in any language.—*Dublin Quarterly Journal.*

After this meagre, and we know, very imperfect notice of Dr. Churchill's work, we shall conclude by saying, that it is one that cannot fail from its copiousness, extensive research, and general accuracy, to exalt still higher the reputation of the author in this country. The American reader will be particularly pleased to find that Dr. Churchill has done full justice throughout his work to the various American authors on this subject. The names of Devees, Eberle, Condie, and Stewart, occur on nearly every page, and these authors are constantly referred to by the author in terms of the highest praise, and with the most liberal courtesy.—*The Medical Examiner.*

The present volume will sustain the reputation acquired by the author from his previous works. The reader will find in it full and judicious directions for the management of infants at birth, and a compendious, but clear account of the diseases to which children are liable, and the most successful mode of treating them. We must not close this notice without calling attention to the author's style, which is perspicuous and polished to a degree, we regret to say, not generally characteristic of medical works. We recommend the work of Dr. Churchill most cordially, both to students and practitioners, as a valuable and reliable guide in the treatment of the diseases of children.—*Am. Journ. of the Med. Sciences.*

We know of no work on this department of Practical Medicine which presents so candid and unprejudiced a statement or posting up of our actual knowledge as this.—*N. Y. Journal of Medicine.*

Its claims to merit both as a scientific and practical work, are of the highest order. Whilst we would not elevate it above every other treatise on the same subject, we certainly believe that very few are equal to it, and none superior.—*Southern Med. and Surgical Journal.*

BY THE SAME AUTHOR.

ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN. Selected from the writings of British Authors previous to the close of the Eighteenth Century. In one neat octavo volume, extra cloth, of about 450 pages. \$2 50.

CHURCHILL (FLEETWOOD), M. D., M. R. I. A., &c.

ON THE DISEASES OF WOMEN; including those of Pregnancy and Child-bed. A new American edition, revised by the author. With Notes and Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children." With numerous illustrations. In one large and handsome octavo volume, leather, of 768 pages. (*Now Ready, May 1857.*) \$3 00.

This edition of Dr. Churchill's very popular treatise may almost be termed a new work, so thoroughly has he revised it in every portion. It will be found greatly enlarged, and thoroughly brought up to the most recent condition of the subject, while the very handsome series of illustrations introduced, representing such pathological conditions as can be accurately portrayed, present a novel feature, and afford valuable assistance to the young practitioner. Such additions as appeared desirable for the American student have been made by the editor, Dr. Condie, while a marked improvement in the mechanical execution keeps pace with the advance in all other respects which the volume has undergone, while the price has been kept at the former very moderate rate. A few notices of the former edition are subjoined:—

It comprises, unquestionably, one of the most exact and comprehensive expositions of the present state of medical knowledge in respect to the diseases of women that has yet been published.—*Am. Journ. Med. Sciences*, July, 1857.

We hail with much pleasure the volume before us, thoroughly revised, corrected, and brought up to the latest date, by Dr. Churchill himself, and rendered still more valuable by notes, from the experienced and able pen of Dr. F. Condie, of Philadelphia.—*Southern Med. and Surg. Journal*, Oct. 1857.

This work is the most reliable which we possess on this subject; and is deservedly popular with the profession.—*Charleston Med. Journal*, July, 1857.

Dr. Churchill's treatise on the *Diseases of Women* is, perhaps, the most popular of his works with the profession in this country. It has been very generally received both as a text-book and manual of practice. The present edition has undergone the most elaborate revision, and additions of an important character have been made, to render it a complete exponent of the present state of our knowledge of these diseases.—*N. Y. Journ. of Med.*, Sept. 1857.

We now regretfully take leave of Dr. Churchill's book. Had our typographical limits permitted, we should gladly have borrowed more from its richly stored pages. In conclusion, we heartily recommend it to the profession, and would at the same time express our firm conviction that it will not only add to the reputation of its author, but will prove a work of great and extensive utility to obstetric practitioners.—*Dublin Medical Press*.

We know of no author who deserves that approbation, on "the diseases of females," to the same

extent that Dr. Churchill does. His, indeed, is the only thorough treatise we know of on the subject; and it may be commended to practitioners and students as a masterpiece in its particular department. The former editions of this work have been commended strongly in this journal, and they have won their way to an extended, and a well-deserved popularity. This fifth edition, before us, is well calculated to maintain Dr. Churchill's high reputation. It was revised and enlarged by the author, for his American publishers, and it seems to us that there is scarcely any species of desirable information on its subjects that may not be found in this work.—*The Western Journal of Medicine and Surgery*.

We are gratified to announce a new and revised edition of Dr. Churchill's valuable work on the diseases of females. We have ever regarded it as one of the very best works on the subjects embraced within its scope, in the English language; and the present edition, enlarged and revised by the author, renders it still more entitled to the confidence of the profession. The valuable notes of Prof. Huston have been retained, and contribute, in no small degree, to enhance the value of the work. It is a source of congratulation that the publishers have permitted the author to be, in this instance, his own editor, thus securing all the revision which an author alone is capable of making.—*The Western Lancet*.

As a comprehensive manual for students, or a work of reference for practitioners, we only speak with common justice when we say that it surpasses any other that has ever issued on the same subject from the British press.—*The Dublin Quarterly Journal*.

DICKSON (S. H.), M. D.,

Professor of Institutes and Practice of Medicine in the Medical College of South Carolina.

ELEMENTS OF MEDICINE; a Compendious View of Pathology and Therapeutics, or the History and Treatment of Diseases. In one large and handsome octavo volume, of 750 pages, leather (*Lately Issued.*) \$3 75.

As an American text-book on the Practice of Medicine for the student, and as a condensed work of reference for the practitioner, this volume will have strong claims on the attention of the profession. Few physicians have had wider opportunities than the author for observation and experience, and few perhaps have used them better. As the result of a life of study and practice, therefore, the present volume will doubtless be received with the welcome it deserves.

This book is eminently what it professes to be; a distinguished merit in these days. Designed for "Teachers and Students of Medicine," and admirably suited to their wants, we think it will be received, on its own merits, with a hearty welcome.—*Boston Med. and Surg. Journal*.

Indited by one of the most accomplished writers of our country, as well as by one who has long held a high position among teachers and practitioners of medicine, this work is entitled to patronage and careful study. The learned author has endeavored to condense in this volume most of the practical matter contained in his former productions, so as to adapt it to the use of those who have not time to devote to more extensive works.—*Southern Med. and Surg. Journal*.

Prof. Dickson's work supplies, to a great extent, a desideratum long felt in American medicine.—*N. O. Med. and Surg. Journal*.

Estimating this work according to the purpose for which it is designed, we must think highly of its

merits, and we have no hesitation in predicting for it a favorable reception by both students and teachers.

Not professing to be a complete and comprehensive treatise, it will not be found full in detail, nor filled with discussions of theories and opinions, but embracing all that is essential in theory and practice, it is admirably adapted to the wants of the American student. Avoiding all that is uncertain, it presents more clearly to the mind of the reader that which is established and verified by experience. The varied and extensive reading of the author is conspicuously apparent, and all the recent improvements and discoveries in therapeutics and pathology are chronicled in its pages.—*Charleston Med. Journal*.

In the first part of the work the subject of general pathology is presented in outline, giving a beautiful picture of its distinguishing features, and throughout the succeeding chapters we find that he has kept scrupulously within the bounds of sound reasoning and legitimate deduction. Upon the whole, we do not hesitate to pronounce it a superior work in its class, and that Dr. Dickson merits a place in the first rank of American writers.—*Western Lancet*.

DRUITT (ROBERT), M. R. C. S., &c.

THE PRINCIPLES AND PRACTICE OF MODERN SURGERY. Edited by F. W. SARGENT, M. D., author of "Minor Surgery," &c. Illustrated with one hundred and ninety-three wood-engravings. In one very handsomely printed octavo volume, leather, of 576 large pages. \$3 00.

Dr. Drutt's researches into the literature of his subject have been not only extensive, but well directed; the most discordant authors are fairly and impartially quoted, and, while due credit is given to each, their respective merits are weighed with an unprejudiced hand. The grain of wheat is preserved, and the chaff is unmercifully stripped off. The arrangement is simple and philosophical, and the style, though clear and interesting, is so precise, that the book contains more information condensed into a few words than any other surgical work with which we are acquainted.—*London Medical Times and Gazette.*

No work, in our opinion, equals it in presenting so much valuable surgical matter in so small a compass.—*St. Louis Med. and Surgical Journal.*

Drutt's Surgery is too well known to the American medical profession to require its announcement anywhere. Probably no work of the kind has ever been more cordially received and extensively circulated than this. The fact that it comprehends in a comparatively small compass, all the essential elements of theoretical and practical Surgery—that it is found to contain reliable and authentic information on the nature and treatment of nearly all surgical affections—is a sufficient reason for the liberal patronage it has obtained. The editor, Dr. F. W. Sargent, has contributed much to enhance the value of the work, by such American improvements as are calculated more perfectly to adapt it to our own views and practice in this country. It abounds everywhere with spirited and life-like illustrations, which to the young surgeon, especially, are of no minor consideration. Every medical man frequently needs just such a work as this, for immediate reference in moments of sudden emergency, when he has not time to consult more elaborate treatises.—*The Ohio Medical and Surgical Journal.*

The author has evidently ransacked every standard treatise of ancient and modern times, and all that

is really practically useful at the bedside will be found in a form at once clear, distinct, and interesting.—*Edinburgh Monthly Medical Journal.*

Drutt's work, condensed, systematic, lucid, and practical as it is, beyond most works on Surgery accessible to the American student, has had much currency in this country, and under its present auspices promises to rise to yet higher favor.—*The Western Journal of Medicine and Surgery.*

The most accurate and ample resumé of the present state of Surgery that we are acquainted with.—*Dublin Medical Journal.*

A better book on the principles and practice of Surgery as now understood in England and America, has not been given to the profession.—*Boston Medical and Surgical Journal.*

An unsurpassable compendium, not only of Surgical, but of Medical Practice.—*London Medical Gazette.*

This work merits our warmest commendations, and we strongly recommend it to young surgeons as an admirable digest of the principles and practice of modern Surgery.—*Medical Gazette.*

It may be said with truth that the work of Mr. Drutt affords a complete, though brief and condensed view, of the entire field of modern surgery. We know of no work on the same subject having the appearance of a manual, which includes so many topics of interest to the surgeon; and the terse manner in which each has been treated evinces a most enviable quality of mind on the part of the author, who seems to have an innate power of searching out and grasping the leading facts and features of the most elaborate productions of the pen. It is a useful handbook for the practitioner, and we should deem a teacher of surgery unpardonable who did not recommend it to his pupils. In our own opinion, it is admirably adapted to the wants of the student.—*Provincial Medical and Surgical Journal.*

DUNGLISON, FORBES, TWEEDIE, AND CONOLLY.

THE CYCLOPÆDIA OF PRACTICAL MEDICINE: comprising Treatises on the Nature and Treatment of Diseases, Materia Medica, and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c. In four large super-royal octavo volumes, of 3254 double-columned pages, strongly and handsomely bound, with raised bands. \$12 00.

. This work contains no less than four hundred and eighteen distinct treatises, contributed by sixty-eight distinguished physicians, rendering it a complete library of reference for the country practitioner.

The most complete work on Practical Medicine extant; or, at least, in our language.—*Buffalo Medical and Surgical Journal.*

For reference, it is above all price to every practitioner.—*Western Lancet.*

One of the most valuable medical publications of the day—as a work of reference it is invaluable.—*Western Journal of Medicine and Surgery.*

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner.*

We rejoice that this work is to be placed within the reach of the profession in this country, it being unquestionably one of very great value to the prac-

titioner. This estimate of it has not been formed from a hasty examination, but after an intimate acquaintance derived from frequent consultation of it during the past nine or ten years. The editors are practitioners of established reputation, and the list of contributors embraces many of the most eminent professors and teachers of London, Edinburgh, Dublin, and Glasgow. It is, indeed, the great merit of this work that the principal articles have been furnished by practitioners who have not only devoted especial attention to the diseases about which they have written, but have also enjoyed opportunities for an extensive practical acquaintance with them, and whose reputation carries the assurance of their competency justly to appreciate the opinions of others, while it stamps their own doctrines with high and just authority.—*American Medical Journ.*

DEWEES'S COMPREHENSIVE SYSTEM OF MIDWIFERY. Illustrated by occasional cases and many engravings. Twelfth edition, with the author's last improvements and corrections. In one octavo volume, extra cloth, of 600 pages. \$3 20.

DEWEES'S TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN. Tenth edition. In one volume, octavo, extra cloth, 518 pages. \$2 80.

DEWEES'S TREATISE ON THE DISEASES OF FEMALES. Tenth edition. In one volume, octavo, extra cloth, 532 pages, with plates. \$3 00.

DANA ON ZOOPHYTES AND CORALS. In one volume, imperial quarto, extra cloth, with woodcuts. \$15 00. Also, **AN ATLAS**, in one volume, imperial folio, with sixty-one magnificent colored plates. Bound in half morocco. \$30 00.

DE LA BECHE'S GEOLOGICAL OBSERVER. In one very large and handsome octavo volume, extra cloth, of 700 pages, with 300 woodcuts. \$4 00.

FRICK ON RENAL AFFECTIONS; their Diagnosis and Pathology. With illustrations. One volume, royal 12mo., extra cloth. 75 cents.

DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

NEW AND ENLARGED EDITION, Now Ready.

MEDICAL LEXICON; a Dictionary of Medical Science, containing a concise Explanation of the various Subjects and Terms of Anatomy, Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Pharmacy, Surgery, Obstetrics, Medical Jurisprudence, Dentistry, &c. Notices of Climate and of Mineral Waters; Formulæ for Official, Empirical, and Dietetic Preparations, &c. With French and other Synonyms. FIFTEENTH EDITION, revised and very greatly enlarged. In one very large and handsome octavo volume, of 992 double-columned pages, in small type; strongly bound in leather, with raised bands. Price \$4 00.

No care, labor, or expense has been spared in the preparation of this edition to render it in every respect worthy a continuance of the very remarkable favor which it has hitherto enjoyed. The rapid sale of FIFTEEN large editions, and the constantly increasing demand, show that it is regarded by the profession as the standard authority. Stimulated by this fact, the author has endeavored in the present revision to introduce whatever might be necessary to make it a satisfactory and desirable—if not indispensable—lexicon, in which the student may search without disappointment for every term that has been legitimated in the nomenclature of the science. To accomplish this, large additions have been found requisite, and the extent of the author's labors may be estimated from the fact that about SIX THOUSAND subjects and terms have been introduced throughout, rendering the whole number of definitions about SIXTY THOUSAND, to accommodate which, the number of pages has been increased by nearly a hundred, notwithstanding an enlargement in the size of the page. The medical press, both in this country and in England, has pronounced the work indispensable to all medical students and practitioners, and the present improved edition will not lose that enviable reputation.

The publishers have endeavored to render the mechanical execution worthy of a volume of such universal use in daily reference. The greatest care has been exercised to obtain the typographical accuracy so necessary in a work of the kind. By the small but exceedingly clear type employed, an immense amount of matter is condensed in its thousand ample pages, while the binding will be found strong and durable. With all these improvements and enlargements, the price has been kept at the former very moderate rate, placing it within the reach of all.

This work, the appearance of the fifteenth edition of which, it has become our duty and pleasure to announce, is perhaps the most stupendous monument of labor and erudition in medical literature. One would hardly suppose after constant use of the preceding editions, where we have never failed to find a sufficiently full explanation of every medical term, that in this edition "about six thousand subjects and terms have been added," with a careful revision and correction of the entire work. It is only necessary to announce the advent of this edition to make it occupy the place of the preceding one on the table of every medical man, as it is without doubt the best and most comprehensive work of the kind which has ever appeared.—*Buffalo Med. Journ.*, Jan. 1858.

The work is a monument of patient research, skilful judgment, and vast physical labor, that will perpetuate the name of the author more effectually than any possible device of stone or metal. Dr. Dunglison deserves the thanks not only of the American profession, but of the whole medical world.—*North Am. Medico-Chir. Review*, Jan. 1858.

A Medical Dictionary better adapted for the wants of the profession than any other with which we are acquainted, and of a character which places it far above comparison and competition.—*Am. Journ. Med. Sciences*, Jan. 1858.

We need only say, that the addition of 6,000 new terms, with their accompanying definitions, may be said to constitute a new work, by itself. We have examined the Dictionary attentively, and are most happy to pronounce it unrivalled of its kind. The erudition displayed, and the extraordinary industry which must have been demanded, in its preparation and perfection, redound to the lasting credit of its author, and have furnished us with a volume *indispensable* at the present day, to all who would find themselves *au niveau* with the highest standards of medical information.—*Boston Medical and Surgical Journal*, Dec. 31, 1857.

Good lexicons and encyclopedic works generally, are the most labor-saving contrivances which literary men enjoy; and the labor which is required to produce them in the perfect manner of this example is something appalling to contemplate. The author

tells us in his preface that he has added about six thousand terms and subjects to this edition, which, before, was considered universally as the best work of the kind in any language.—*Silliman's Journal*, March, 1858.

He has razed his gigantic structure to the foundations, and remodelled and reconstructed the entire pile. No less than six thousand additional subjects and terms are illustrated and analyzed in this new edition, swelling the grand aggregate to beyond sixty thousand! Thus is placed before the profession a complete and thorough exponent of medical terminology, without rival or possibility of rivalry.—*Nashville Journ. of Med. and Surg.*, Jan. 1858.

It is universally acknowledged, we believe, that this work is incomparably the best and most complete Medical Lexicon in the English language. The amount of labor which the distinguished author has bestowed upon it is truly wonderful, and the learning and research displayed in its preparation are equally remarkable. Comment and commendation are unnecessary, as no one at the present day thinks of purchasing any other Medical Dictionary than this.—*St. Louis Med. and Surg. Journ.*, Jan. 1858.

It is the foundation stone of a good medical library, and should always be included in the first list of books purchased by the medical student.—*Am. Med. Monthly*, Jan. 1858.

A very perfect work of the kind, undoubtedly the most perfect in the English language.—*Med. and Surg. Reporter*, Jan. 1858.

It is now emphatically the Medical Dictionary of the English language, and for it there is no substitute.—*N. H. Med. Journ.*, Jan. 1858.

It is scarcely necessary to remark that any medical library wanting a copy of Dunglison's Lexicon must be imperfect.—*Cin. Lancet*, Jan. 1858.

We have ever considered it the best authority published, and the present edition we may safely say has no equal in the world.—*Peninsular Med. Journal*, Jan. 1858.

The most complete authority on the subject to be found in any language.—*Va. Med. Journal*, Feb. '58.

BY THE SAME AUTHOR.

THE PRACTICE OF MEDICINE. A Treatise on Special Pathology and Therapeutics. Third Edition. In two large octavo volumes, leather, of 1,500 pages. \$6 25.

DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

HUMAN PHYSIOLOGY. Eighth edition. Thoroughly revised and extensively modified and enlarged, with five hundred and thirty-two illustrations. In two large and handsomely printed octavo volumes, leather, of about 1500 pages. (*Just Issued*, 1856.) \$7 00.

In revising this work for its eighth appearance, the author has spared no labor to render it worthy a continuance of the very great favor which has been extended to it by the profession. The whole contents have been rearranged, and to a great extent remodelled; the investigations which of late years have been so numerous and so important, have been carefully examined and incorporated, and the work in every respect has been brought up to a level with the present state of the subject. The object of the author has been to render it a concise but comprehensive treatise, containing the whole body of physiological science, to which the student and man of science can at all times refer with the certainty of finding whatever they are in search of, fully presented in all its aspects; and on no former edition has the author bestowed more labor to secure this result.

We believe that it can truly be said, no more complete repertory of facts upon the subject treated, can anywhere be found. The author has, moreover, that enviable tact at description and that facility and ease of expression which render him peculiarly acceptable to the casual, or the studious reader. This facility, so requisite in setting forth many graver and less attractive subjects, lends additional charms to one always fascinating.—*Boston Med. and Surg. Journal*, Sept. 1856.

The most complete and satisfactory system of Physiology in the English language.—*Amer. Med. Journal*.

The best work of the kind in the English language.—*Silliman's Journal*.

The present edition the author has made a perfect mirror of the science as it is at the present hour. As a work upon physiology proper, the science of the functions performed by the body, the student will find it all he wishes.—*Nashville Journ. of Med.* Sept. 1856.

That he has succeeded, most admirably succeeded in his purpose, is apparent from the appearance of an eighth edition. It is now the great encyclopedia on the subject, and worthy of a place in every physician's library.—*Western Lancet*, Sept. 1856.

BY THE SAME AUTHOR. (*Now Ready*.)

GENERAL THERAPEUTICS AND MATERIA MEDICA; adapted for a Medical Text-book. With Indexes of Remedies and of Diseases and their Remedies. SIXTH EDITION, revised and improved. With one hundred and ninety-three illustrations. In two large and handsomely printed octavo vols., leather, of about 1100 pages. \$6 00.

From the Author's Preface.

"Another edition of this work being called for, the author has subjected it to a thorough and careful revision. It has been gratifying to him that it has been found so extensively useful by those for whom it was especially intended, as to require that a sixth edition should be issued in so short a time after the publication of a fifth. Grateful for the favorable reception of the work by the profession, he has bestowed on the preparation of the present edition all those cares which were demanded by the former editions, and has spared no pains to render it a faithful epitome of General Therapeutics and Materia Medica. The copious Indexes of Remedies and of Diseases and their Remedies cannot fail, the author conceives, to add materially to the value of the work."

This work is too widely and too favorably known to require more than the assurance that the author has revised it with his customary industry, introducing whatever has been found necessary to bring it on a level with the most advanced condition of the subject. The number of illustrations has been somewhat enlarged, and the mechanical execution of the volumes will be found to have undergone a decided improvement.

BY THE SAME AUTHOR. (*A new Edition*.)

NEW REMEDIES, WITH FORMULÆ FOR THEIR PREPARATION AND ADMINISTRATION. Seventh edition, with extensive Additions. In one very large octavo volume, leather, of 770 pages. (*Just Issued*.) \$3 75.

Another edition of the "New Remedies" having been called for, the author has endeavored to add everything of moment that has appeared since the publication of the last edition.

The chief remedial means which have obtained a place, for the first time, in this volume, either owing to their having been recently introduced into pharmacology, or to their having received novel applications—and which, consequently, belong to the category of "New Remedies"—are the following:—

Apiol, Caffein, Carbazotic acid, Cauterization and catheterism of the larynx and trachea, Cedron, Cerium, Chloride of bromine, Chloride of iron, Chloride of sodium, Cinchonine, Cod-liver oil, Congelation, Eau de Pagliari, Galvanic cautery, Hydriodic ether, Hyposulphite of soda and silver, Inunction, Iodide of sodium, Nickel, Permanganate of potassa, Phosphate of lime, Pumpkin, Quinia, Rennet, Saccharine carbonate of iron and manganese, Santonin, Tellurium, and Traumaticine.

The articles treated of in the former editions will be found to have undergone considerable expansion in this, in order that the author might be enabled to introduce, as far as practicable, the results of the subsequent experience of others, as well as of his own observation and reflection; and to make the work still more deserving of the extended circulation with which the preceding editions have been favored by the profession. By an enlargement of the page, the numerous additions have been incorporated without greatly increasing the bulk of the volume.—*Preface*.

One of the most useful of the author's works.—*Southern Medical and Surgical Journal*.

This elaborate and useful volume should be found in every medical library, for as a book of reference, for physicians, it is unsurpassed by any other work in existence, and the double index for diseases and for remedies, will be found greatly to enhance its value.—*New York Med. Gazette*.

The great learning of the author, and his remarkable industry in pushing his researches into every source whence information is derivable, have enabled him to throw together an extensive mass of facts and statements, accompanied by full reference to authorities; which last feature renders the work practically valuable to investigators who desire to examine the original papers.—*The American Journal of Pharmacy*.

ERICHSEN (JOHN),

Professor of Surgery in University College, London, &c.

THE SCIENCE AND ART OF SURGERY; BEING A TREATISE ON SURGICAL INJURIES, DISEASES, AND OPERATIONS. Edited by JOHN H. BRINTON, M. D. Illustrated with three hundred and eleven engravings on wood. In one large and handsome octavo volume, of over nine hundred closely printed pages, leather, raised bands. \$4 25.

It is, in our humble judgment, decidedly the best book of the kind in the English language. Strange that just such books are not often produced by public teachers of surgery in this country and Great Britain. Indeed, it is a matter of great astonishment. But no less true than astonishing, that of the many works on surgery republished in this country within the last fifteen or twenty years as text-books for medical students, this is the only one that even approximates to the fulfilment of the peculiar wants of young men just entering upon the study of this branch of the profession.—*Western Jour. of Med. and Surgery.*

Its value is greatly enhanced by a very copious well-arranged index. We regard this as one of the most valuable contributions to modern surgery. To one entering his novitiate of practice, we regard it the most serviceable guide which he can consult. He will find a fulness of detail leading him through every step of the operation, and not deserting him until the final issue of the case is decided. For the same reason we recommend it to those whose routine of practice lies in such parts of the country that they must

rarely encounter cases requiring surgical management.—*Stethoscope.*

Embracing, as will be perceived, the whole surgical domain, and each division of itself almost complete and perfect, each chapter full and explicit, each subject faithfully exhibited, we can only express our estimate of it in the aggregate. We consider it an excellent contribution to surgery, as probably the best single volume now extant on the subject, and with great pleasure we add it to our text-books.—*Nashville Journal of Medicine and Surgery.*

Prof. Erichsen's work, for its size, has not been surpassed; his nine hundred and eight pages, profusely illustrated, are rich in physiological, pathological, and operative suggestions, doctrines, details, and processes; and will prove a reliable resource for information, both to physician and surgeon, in the hour of peril.—*N. O. Med. and Surg. Journal.*

We are acquainted with no other work wherein so much good sense, sound principle, and practical inferences, stamp every page.—*American Lancet.*

ELLIS (BENJAMIN), M. D.

THE MEDICAL FORMULARY: being a Collection of Prescriptions, derived from the writings and practice of many of the most eminent physicians of America and Europe. Together with the usual Dietetic Preparations and Antidotes for Poisons. To which is added an Appendix, on the Endermic use of Medicines, and on the use of Ether and Chloroform. The whole accompanied with a few brief Pharmaceutical and Medical Observations. Tenth edition, revised and much extended by ROBERT P. THOMAS, M. D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one neat octavo volume, extra cloth, of 296 pages. (*Lately Issued.*) \$1 75.

After an examination of the new matter and the alterations, we believe the reputation of the work built up by the author, and the late distinguished editor, will continue to flourish under the auspices of the present editor, who has the industry and accuracy, and, we would say, conscientiousness requisite for the responsible task.—*Am. Jour. of Pharm.*

It will prove particularly useful to students and young practitioners, as the most important prescriptions employed in modern practice, which lie scattered through our medical literature, are here collected and conveniently arranged for reference.—*Charleston Med. Journal and Review.*

FOWNES (GEORGE), PH. D., &c.

ELEMENTARY CHEMISTRY; Theoretical and Practical. With numerous illustrations. Edited, with Additions, by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of over 550 pages, with 181 wood-cuts. In leather, \$1 50; extra cloth, \$1 35.

We know of no better text-book, especially in the difficult department of organic chemistry, upon which it is particularly full and satisfactory. We would recommend it to preceptors as a capital "office book" for their students who are beginners in Chemistry. It is copiously illustrated with excellent wood-cuts, and altogether admirably "got up."—*N. J. Medical Reporter.*

A standard manual, which has long enjoyed the reputation of embodying much knowledge in a small space. The author has achieved the difficult task of condensation with mastery tact. His book is concise without being dry, and brief without being too dogmatical or general.—*Virginia Med. and Surgical Journal.*

The work of Dr. Fownes has long been before the public, and its merits have been fully appreciated as the best text-book on chemistry now in existence. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Gmelin, but we say that, as a work for students, it is preferable to any of them.—*London Journal of Medicine.*

A work well adapted to the wants of the student. It is an excellent exposition of the chief doctrines and facts of modern chemistry. The size of the work, and still more the condensed yet perspicuous style in which it is written, absolve it from the charges very properly urged against most manuals termed popular.—*Edinburgh Journal of Medical Science.*

FISKE FUND PRIZE ESSAYS.

THE EFFECTS OF CLIMATE ON TUBERCULOUS DISEASE. By EDWIN LEE, M. R. C. S., London, and **THE INFLUENCE OF PREGNANCY ON THE DEVELOPMENT OF TUBERCLES.** By EDWARD WARREN, M. D., of Edenton, N. C. Together in one neat octavo volume, extra cloth. \$1 00. (*Just Ready.*)

FERGUSON (WILLIAM), F. R. S.,
Professor of Surgery in King's College, London, &c.

A SYSTEM OF PRACTICAL SURGERY. Fourth American, from the third and enlarged London edition. In one large and beautifully printed octavo volume, of about 700 pages, with 393 handsome illustrations, leather. \$3 00.

No work was ever written which more nearly comprehended the necessities of the student and practitioner, and was more carefully arranged to that single purpose than this.—*N. Y. Med. Journal.*

The addition of many new pages makes this work more than ever indispensable to the student and practitioner.—*Ranking's Abstract.*

FLINT (AUSTIN), M. D.,

Professor of the Theory and Practice of Medicine in the University of Louisville, &c.

(An Important New Work.)

PHYSICAL EXPLORATION AND DIAGNOSIS OF DISEASES AFFECTING THE RESPIRATORY ORGANS. In one large and handsome octavo volume, extra cloth, 636 pages. \$3 00.

We can only state our general impression of the high value of this work, and cordially recommend it to all. We regard it, in point both of arrangement and of the marked ability of its treatment of the subjects, as destined to take the first rank in works of this class. So far as our information extends, it has at present no equal. To the practitioner, as well as the student, it will be invaluable in clearing up the diagnosis of doubtful cases, and in shedding light upon difficult phenomena.—*Buffalo Med. Journal.*

This is the most elaborate work devoted exclusively to the physical exploration of diseases of the lungs, with which we are acquainted in the English language. From the high standing of the author as a clinical teacher, and his known devotion, during many years, to the study of thoracic diseases, much was to be expected from the announcement of his determination to embody in the form of a treatise,

the results of his study and experience. These expectations we are confident will not be disappointed. For our own part, we have been favorably impressed by a perusal of the book, and heartily recommend it to all who are desirous of acquiring a thorough acquaintance with the means of exploring the conditions of the respiratory organs by means of auscultation and percussion.—*Boston Med. and Surg. Journal.*

A work of original observation of the highest merit. We recommend the treatise to every one who wishes to become a correct auscultator. Based to a very large extent upon cases numerically examined, it carries the evidence of careful study and discrimination upon every page. It does credit to the author, and, through him, to the profession in this country. It is, what we cannot call every book upon auscultation, a readable book.—*Am. Jour. Med. Sciences.*

NOW COMPLETE,

GRAHAM (THOMAS), F. R. S.,

THE ELEMENTS OF INORGANIC CHEMISTRY, including the Applications of the Science in the Arts. New and much enlarged edition, by HENRY WATTS and ROBERT BRIDGES, M. D. Complete in one large and handsome octavo volume, of over 800 very large pages, with two hundred and thirty-two wood-cuts, extra cloth. \$4 00.

** Part II., completing the work from p. 431 to end, with Index, Title Matter, &c., may be had separate, cloth backs and paper sides. Price \$2 50.

The long delay which has intervened since the appearance of the first portion of this work, has rendered necessary an Appendix, embodying the numerous and important investigations and discoveries of the last few years in the subjects contained in Part I. This occupies a large portion of Part II., and will be found to present a complete abstract of the most recent researches in the general principles of the science, as well as all details necessary to bring the whole work thoroughly up to the present time in all departments of Inorganic Chemistry.

The great reputation which this work has enjoyed since its first appearance, and its recognized position in the front rank of scientific treatises, render eulogy unnecessary to secure for it immediate attention on the part of those desiring to procure a complete exposition of chemical facts and principles, either as an introduction to the subject for the student, or as a work for daily reference by the practical chemist.

Gentlemen desirous of completing their copies of the work are requested to apply for Part II. without delay. It will be sent by mail, prepaid, on receipt of the amount, \$2 50.

It is a very acceptable addition to the library of standard books of every chemical student. Mr. Watts, well known as the translator of the Cavendish Society edition of Gmelin's Chemistry, has made in the supplement an able resumé of the progress of the science since the publication of the first volume. It is plain from the number and importance of the

topics there discussed, that great progress has been made in the interval, both in chemical physics and in general inorganic chemistry. No reader of English works on this science can afford to be without this edition of Prof. Graham's Elements.—*Silliman's Journal*, March, 1858.

GRIFFITH (ROBERT E.), M. D., &c.

A UNIVERSAL FORMULARY, containing the methods of Preparing and Administering Official and other Medicines. The whole adapted to Physicians and Pharmacologists. SECOND EDITION, thoroughly revised, with numerous additions, by ROBERT P. THOMAS, M. D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one large and handsome octavo volume, extra cloth, of 650 pages, double columns. (Just Issued.) \$3 00; or bound in sheep, \$3 25.

It was a work requiring much perseverance, and when published was looked upon as by far the best work of its kind that had issued from the American press. Prof. Thomas has certainly "improved," as well as added to this Formulary, and has rendered it additionally deserving of the confidence of pharmacologists and physicians.—*Am. Journal of Pharmacy.*

We are happy to announce a new and improved edition of this, one of the most valuable and useful works that have emanated from an American pen. It would do credit to any country, and will be found of daily usefulness to practitioners of medicine; it is better adapted to their purposes than the dispensatories.—*Southern Med. and Surg. Journal.*

It is one of the most useful books a country practitioner can possibly have in his possession.—*Medical Chronicle.*

This is a work of six hundred and fifty one pages, embracing all on the subject of preparing and admin-

istering medicines that can be desired by the physician and pharmacist.—*Western Lancet.*

The amount of useful, every-day matter, for a practicing physician, is really immense.—*Boston Med. and Surg. Journal.*

We predict a great sale for this work, and we especially recommend it to all medical teachers.—*Richmond Stethoscope.*

This edition of Dr. Griffith's work has been greatly improved by the revision and ample additions of Dr. Thomas, and is now, we believe, one of the most complete works of its kind in any language. The additions amount to about seventy pages, and no effort has been spared to include in them all the recent improvements which have been published in medical journals, and systematic treatises. A work of this kind appears to us indispensable to the physician, and there is none we can more cordially recommend.—*N. Y. Journal of Medicine.*

BY THE SAME AUTHOR.

MEDICAL BOTANY; or, a Description of all the more important Plants used in Medicine, and of their Properties, Uses, and Modes of Administration. In one large octavo volume, extra cloth, of 704 pages, handsomely printed, with nearly 350 illustrations on wood. \$3 00.

GROSS (SAMUEL D.), M. D.,

Professor of Surgery in the Jefferson Medical College of Philadelphia, &c.

New Edition (Now Ready.)

ELEMENTS OF PATHOLOGICAL ANATOMY. Third edition, thoroughly revised and greatly improved. In one large and very handsome octavo volume, with about three hundred and fifty beautiful illustrations, of which a large number are from original drawings. Price in extra cloth, \$4 75; leather, raised bands, \$5 25.

The very rapid advances in the Science of Pathological Anatomy during the last few years have rendered essential a thorough modification of this work, with a view of making it a correct exponent of the present state of the subject. The very careful manner in which this task has been executed, and the amount of alteration which it has undergone, have enabled the author to say that "with the many changes and improvements now introduced, the work may be regarded almost as a new treatise," while the efforts of the author have been seconded as regards the mechanical execution of the volume, rendering it one of the handsomest productions of the American press. A very large number of new and beautiful original illustrations have been introduced, and the work, it is hoped, will fully maintain the reputation hitherto enjoyed by it of a complete and practical exposition of its difficult and important subject.

We most sincerely congratulate the author on the successful manner in which he has accomplished his proposed object. His book is most admirably calculated to fill up a blank which has long been felt to exist in this department of medical literature, and as such must become very widely circulated amongst all classes of the profession.—*Dublin Quarterly Journ. of Med. Science*, Nov. 1857.

We have been favorably impressed with the general manner in which Dr. Gross has executed his task of affording a comprehensive digest of the present state of the literature of Pathological Anatomy, and have much pleasure in recommending his work to our readers, as we believe one well deserving of diligent perusal and careful study.—*Montreal Med. Chron.*, Sept. 1857.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE URINARY BLADDER, THE PROSTATE GLAND, AND THE URETHRA. Second Edition, revised and much enlarged, with one hundred and eighty-four illustrations. In one large and very handsome octavo volume, of over nine hundred pages. In leather, raised bands, \$5 25; extra cloth, \$4 75.

A volume replete with truths and principles of the utmost value in the investigation of these diseases.—*American Medical Journal*.

On the appearance of the first edition of this work, the leading English medical review predicted that it would have a "permanent place in the literature of surgery worthy to rank with the best works of the present age." This prediction has been amply fulfilled. Dr. Gross's treatise has been found to supply completely the want which has been felt ever since the elevation of surgery to the rank of a science, of a good practical treatise on the diseases of the bladder and its necessary organs. Philosophical in its design, methodical in its arrangement, ample and

sound in its practical details, it may in truth be said to leave scarcely anything to be desired on so important a subject, and with the additions and modifications resulting from future discoveries and improvements, it will probably remain one of the most valuable works on this subject so long as the science of medicine shall exist.—*Boston Med. and Surg. Journal*.

Whoever will peruse the vast amount of valuable practical information it contains, and which we have been unable even to notice, will, we think, agree with us, that there is no work in the English language which can make any just pretensions to be its equal.—*N. Y. Journal of Medicine*.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON FOREIGN BODIES IN THE AIR-PASSAGES. In one handsome octavo volume, extra cloth, with illustrations. pp. 468. \$2 75.

A very elaborate work. It is a complete summary of the whole subject, and will be a useful book of reference.—*British and Foreign Medico-Chirurg. Review*.

A highly valuable book of reference on a most important subject in the practice of medicine. We

conclude by recommending it to our readers, fully persuaded that its perusal will afford them much practical information well conveyed, evidently derived from considerable experience and deduced from an ample collection of facts.—*Dublin Quarterly Journal*, May, 1855.

BY THE SAME AUTHOR. (Preparing.)

A SYSTEM OF SURGERY; Diagnostic, Pathological, Therapeutic, and Operative. With very numerous engravings on wood.

GLUGE (GOTTLIEB), M. D.,

Professor of Physiology and Pathological Anatomy in the University of Brussels, &c.

AN ATLAS OF PATHOLOGICAL HISTOLOGY. Translated, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. In one volume, very large imperial quarto, extra cloth, with 320 figures, plain and colored, on twelve copperplates. \$5 00.

GARDNER'S MEDICAL CHEMISTRY, for the use of Students and the Profession. In one royal 12mo. vol., ex. cloth, pp. 396, with illustrations. \$1 00.

HARRISON'S ESSAY TOWARDS A CORRECT THEORY OF THE NERVOUS SYSTEM. In one octavo volume, leather, 292 pages. \$1 50.

HUGHES' CLINICAL INTRODUCTION TO THE PRACTICE OF AUSCULTATION AND OTHER MODES OF PHYSICAL DIAGNOSIS, IN DISEASES OF THE LUNGS AND HEART. Second American, from the second London edition. 1 vol. royal 12mo., ex. cloth, pp. 304. \$1 00.

HUNTER'S COMPLETE WORKS, in 4 vols. 8vo., leather, with plates. \$10.

HOBLYN (RICHARD D.), M. D.

A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES. By RICHARD D. HOBLYN, A. M., &c. A new American edition. Revised, with numerous Additions, by ISAAC HAYS, M. D., editor of the "American Journal of the Medical Sciences." In one large royal 12mo. volume, leather, of over 500 double columned pages. (*Just Issued, 1856.*) \$1 50.

If the frequency with which we have referred to this volume since its reception from the publisher, two or three weeks ago, be any criterion for the future, the binding will soon have to be renewed, even with careful handling. We find that Dr. Hays has done the profession great service by his careful and industrious labors. The Dictionary has thus become eminently suited to our medical brethren in this country. The additions by Dr. Hays are in brackets, and we believe there is not a single page but bears these insignia; in every instance which we have thus far noticed, the additions are really needed and exceedingly valuable. We heartily commend the work to all who wish to be *au courant* in medical terminology.—*Boston Med. and Surg. Journal.*

To both practitioner and student, we recommend this dictionary as being convenient in size, accurate in definition, and sufficiently full and complete for ordinary consultation.—*Charleston Med. Journ. and Review.*

Admirably calculated to meet the wants of the practitioner or student, who has neither the means

nor desire to procure a larger work.—*American Lancet.*

Hoblyn has always been a favorite dictionary, and in its present enlarged and improved form will give greater satisfaction than ever. The American editor, Dr. Hays, has made many very valuable additions.—*N. J. Med. Reporter.*

To supply the want of the medical reader arising from this cause, we know of no dictionary better arranged and adapted than the one bearing the above title. It is not encumbered with the obsolete terms of a bygone age, but it contains all that are now in use; embracing every department of medical science down to the very latest date. The volume is of a convenient size to be used by the medical student, and yet large enough to make a respectable appearance in the library of a physician.—*Western Lancet.*

Hoblyn's Dictionary has long been a favorite with us. It is the best book of definitions we have, and ought always to be upon the student's table.—*Southern Med. and Surg. Journal.*

HOLLAND (SIR HENRY), BART., M. D., F. R. S.,

Physician in Ordinary to the Queen of England, &c.

MEDICAL NOTES AND REFLECTIONS. From the third London edition.

In one handsome octavo volume, extra cloth. (*Now Ready.*) \$3 00.

As the work of a thoughtful and observant physician, embodying the results of forty years' active professional experience, on topics of the highest interest, this volume is commended to the American practitioner as well worthy his attention. Few will rise from its perusal without feeling their convictions strengthened, and armed with new weapons for the daily struggle with disease.

HABERSHON (S. O.), M. D.,

Assistant Physician to and Lecturer on Materia Medica and Therapeutics at Guy's Hospital, &c.

PATHOLOGICAL AND PRACTICAL OBSERVATIONS ON DISEASES OF THE ALIMENTARY CANAL, OESOPHAGUS, STOMACH, CÆCUM, AND INTES-TINES. With illustrations on wood. In one handsome octavo volume. (*Republishing in the Medical News and Library for 1858.*)

HORNER (WILLIAM E.), M. D.,

Professor of Anatomy in the University of Pennsylvania.

SPECIAL ANATOMY AND HISTOLOGY. Eighth edition. Extensively revised and modified. In two large octavo volumes, extra cloth, of more than one thousand pages, handsomely printed, with over three hundred illustrations. \$6 00.

HAMILTON (FRANK H.), M. D.,

Professor of Surgery, in Buffalo Medical College, &c.

A TREATISE ON FRACTURES AND DISLOCATIONS. In one handsome octavo volume, with numerous illustrations. (*Preparing.*)

JONES (T. WHARTON), F. R. S.,

Professor of Ophthalmic Medicine and Surgery in University College, London, &c.

THE PRINCIPLES AND PRACTICE OF OPHTHALMIC MEDICINE AND SURGERY. With one hundred and ten illustrations. Second American from the second and revised London edition, with additions by EDWARD HARTSHORNE, M. D., Surgeon to Wills' Hospital, &c. In one large, handsome royal 12mo. volume, extra cloth, of 500 pages. \$1 50.

We are confident that the reader will find, on perusal, that the execution of the work amply fulfills the promise of the preface, and sustains, in every point, the already high reputation of the author as an ophthalmic surgeon as well as a physiologist and pathologist. The book is evidently the result of much labor and research, and has been written with the greatest care and attention; it possesses that best quality which a general work, like a system or manual can show, viz: the quality of having all the materials whencesoever derived, so thorough-

ly wrought up, and digested in the author's mind, as to come forth with the freshness and impressiveness of an original production. We entertain little doubt that this book will become what its author hoped it might become, a manual for daily reference and consultation by the student and the general practitioner. The work is marked by that correctness, clearness, and precision of style which distinguish all the productions of the learned author.—*British and For. Med. Review.*

JONES (C. HANDFIELD), F. R. S., & EDWARD H. SIEVEKING, M. D.,
Assistant Physicians and Lecturers in St. Mary's Hospital, London.

A MANUAL OF PATHOLOGICAL ANATOMY. First American Edition, Revised. With three hundred and ninety-seven handsome wood engravings. In one large and beautiful octavo volume of nearly 750 pages, leather. \$3 75.

As a concise text-book, containing, in a condensed form, a complete outline of what is known in the domain of Pathological Anatomy, it is perhaps the best work in the English language. Its great merit consists in its completeness and brevity, and in this respect it supplies a great desideratum in our literature. Heretofore the student of pathology was obliged to glean from a great number of monographs, and the field was so extensive that but few cultivated it with any degree of success. As a simple work of reference, therefore, it is of great value to the student of pathological anatomy, and should be in every physician's library.—*Western Lancet*.

In offering the above titled work to the public, the authors have not attempted to intrude new views on their professional brethren, but simply to lay before them, what has long been wanted, an outline of the

present condition of pathological anatomy. In this they have been completely successful. The work is one of the best compilations which we have ever perused.—*Charleston Medical Journal and Review*.

We urge upon our readers and the profession generally the importance of informing themselves in regard to modern views of pathology, and recommend to them to procure the work before us as the best means of obtaining this information.—*Stethoscope*.

From the casual examination we have given we are inclined to regard it as a text-book, plain, rational, and intelligible, such a book as the practical man needs for daily reference. For this reason it will be likely to be largely useful, as it suits itself to those busy men who have little time for minute investigation, and prefer a summary to an elaborate treatise.—*Buffalo Medical Journal*.

KIRKES (WILLIAM SENHOUSE), M. D.,

Demonstrator of Morbid Anatomy at St. Bartholomew's Hospital, &c.

A MANUAL OF PHYSIOLOGY. A new American, from the third and improved London edition. With two hundred illustrations. In one large and handsome royal 12mo. volume, leather. pp. 586. \$2 00. (*Now Ready, 1857.*)

In again passing this work through his hands, the author has endeavored to render it a correct exposition of the present condition of the science, making such alterations and additions as have been dictated by further experience, or as the progress of investigation has rendered desirable. In every point of mechanical execution the publishers have sought to make it superior to former editions, and at the very low price at which it is offered, it will be found one of the handsomest and cheapest volumes before the profession.

In making these improvements, care has been exercised not unduly to increase its size, thus maintaining its distinctive characteristic of presenting within a moderate compass a clear and connected view of its subjects, sufficient for the wants of the student.

This is a new and very much improved edition of Dr. Kirkes' well-known Handbook of Physiology. Originally constructed on the basis of the admirable treatise of Miller, it has in successive editions developed itself into an almost original work, though no change has been made in the plan or arrangement. It combines conciseness with completeness, and is, therefore, admirably adapted for consultation by the busy practitioner.—*Dublin Quarterly Journal*, Feb. 1857.

Its excellence is in its compactness, its clearness, and its carefully cited authorities. It is the most convenient of text-books. These gentlemen, Messrs. Kirkes and Paget, have really an immense talent for silence, which is not so common or so cheap as prating people fancy. They have the gift of telling us what we want to know, without thinking it necessary to tell us all they know.—*Boston Med. and Surg. Journal*, May 14, 1857.

One of the very best handbooks of Physiology we possess—presenting just such an outline of the science, comprising an account of its leading facts and generally admitted principles, as the student requires during his attendance upon a course of lectures, or for reference whilst preparing for examination.—*Am. Medical Journal*.

We need only say, that, without entering into discussions of unsettled questions, it contains all the recent improvements in this department of medical science. For the student beginning this study, and the practitioner who has but leisure to refresh his memory, this book is invaluable, as it contains all that it is important to know, without special details, which are read with interest only by those who would make a specialty, or desire to possess a critical knowledge of the subject.—*Charleston Medical Journal*.

KNAPP'S TECHNOLOGY; or, Chemistry applied to the Arts and to Manufactures. Edited, with numerous Notes and Additions, by Dr. EDMUND RONALDS and Dr. THOMAS RICHARDSON. First American edition, with Notes and Additions, by Prof. WALTER R. JOHNSON. In two handsome

octavo volumes, extra cloth, with about 500 wood- engravings. \$6 00.

LALLEMAND ON SPERMATORRHOEA. Translated and edited by HENRY J. McDOUGAL. In one volume, octavo, extra cloth, 320 pages. Second American edition. \$1 75.

LUDLOW (J. L.), M. D.

A MANUAL OF EXAMINATIONS upon Anatomy, Physiology, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Chemistry, Pharmacy, and Therapeutics. To which is added a Medical Formulary. Designed for Students of Medicine throughout the United States. Third edition, thoroughly revised and greatly extended and enlarged. With three hundred and seventy illustrations. In one large and handsome royal 12mo. volume, leather, of over 800 closely printed pages. (*Now Ready.*) \$2 50.

The great popularity of this volume, and the numerous demands for it during the two years in which it has been out of print, have induced the author in its revision to spare no pains to render it a correct and accurate digest of the most recent condition of all the branches of medical science. In many respects it may, therefore, be regarded rather as a new book than a new edition, an entire section on Physiology having been added, as also one on Organic Chemistry, and many portions having been rewritten. A very complete series of illustrations has been introduced, and every care has been taken in the mechanical execution to render it a convenient and satisfactory book for study or reference.

The arrangement of the volume in the form of question and answer renders it especially suited for the office examination of students and for those preparing for graduation.

We know of no better companion for the student during the hours spent in the lecture room, or to refresh, at a glance, his memory of the various topics

crammed into his head by the various professors to whom he is compelled to listen.—*Western Lancet*, May, 1857.

LEHMANN (C. G.)

PHYSIOLOGICAL CHEMISTRY. Translated from the second edition by GEORGE E. DAY, M. D., F. R. S., &c., edited by R. E. ROGERS, M. D., Professor of Chemistry in the Medical Department of the University of Pennsylvania, with illustrations selected from Funke's Atlas of Physiological Chemistry, and an Appendix of plates. Complete in two large and handsome octavo volumes, extra cloth, containing 1200 pages, with nearly two hundred illustrations. (*Just Issued.*) \$5 00.

This great work, universally acknowledged as the most complete and authoritative exposition of the principles and details of Zoochemistry, in its passage through the press, has received from Professor Rogers such care as was necessary to present it in a correct and reliable form. To such a work additions were deemed superfluous, but several years having elapsed between the appearance in Germany of the first and last volume, the latter contained a supplement, embodying numerous corrections and additions resulting from the advance of the science. These have all been incorporated in the text in their appropriate places, while the subjects have been still further elucidated by the insertion of illustrations from the Atlas of Dr. Otto Funke. With the view of supplying the student with the means of convenient comparison, a large number of wood-cuts, from works on kindred subjects, have also been added in the form of an Appendix of Plates. The work is, therefore, presented as in every way worthy the attention of all who desire to be familiar with the modern facts and doctrines of Physiological Science.

The most important contribution as yet made to Physiological Chemistry.—*Am. Journal Med. Sciences*, Jan. 1856.

The present volumes belong to the small class of medical literature which comprises elaborate works of the highest order of merit.—*Montreal Med. Chronicle*, Jan. 1856.

The work of Lehmann stands unrivalled as the most comprehensive book of reference and information extant on every branch of the subject on which

it treats.—*Edinburgh Monthly Journal of Medical Science*.

Already well known and appreciated by the scientific world, Professor Lehmann's great work requires no laudatory sentences, as, under a new garb, it is now presented to us. The little space at our command would ill suffice to set forth even a small portion of its excellences.—*Boston Med. and Surg. Journal*, Dec. 1855.

BY THE SAME AUTHOR. (*Just Issued, 1856.*)

MANUAL OF CHEMICAL PHYSIOLOGY. Translated from the German, with Notes and Additions, by J. CHESTON MORRIS, M. D., with an Introductory Essay on Vital Force, by SAMUEL JACKSON, M. D., Professor of the Institutes of Medicine in the University of Pennsylvania. With illustrations on wood. In one very handsome octavo volume, extra cloth, of 336 pages. \$2 25.

From Prof. Jackson's Introductory Essay.

In adopting the handbook of Dr. Lehmann as a manual of Organic Chemistry for the use of the students of the University, and in recommending his original work of PHYSIOLOGICAL CHEMISTRY for their more mature studies, the high value of his researches, and the great weight of his authority in that important department of medical science are fully recognized.

The present volume will be a very convenient one for students, as offering a brief epitome of the more elaborate work, and as containing, in a very con-

densed form, the positive facts of Physiological Chemistry.—*Am. Journal Med. Sciences*, April, 1856.

LAWRENCE (W.), F. R. S., &c.

A TREATISE ON DISEASES OF THE EYE. A new edition, edited, with numerous additions, and 243 illustrations, by ISAAC HAYS, M. D., Surgeon to Will's Hospital, &c. In one very large and handsome octavo volume, of 950 pages, strongly bound in leather with raised bands. \$5 00.

This admirable treatise—the safest guide and most comprehensive work of reference, which is within the reach of the profession.—*Stethoscope*.

This standard text-book on the department of which it treats, has not been superseded, by any or all of the numerous publications on the subject heretofore issued. Nor with the multiplied improvements of Dr. Hays, the American editor, is it at all likely that this great work will cease to merit the confidence and preference of students or practitioners. Its ample extent—nearly one thousand large

octavo pages—has enabled both author and editor to do justice to all the details of this subject, and condense in this single volume the present state of our knowledge of the whole science in this department, whereby its practical value cannot be excelled. We heartily commend it, especially as a book of reference, indispensable in every medical library. The additions of the American editor very greatly enhance the value of the work, exhibiting the learning and experience of Dr. Hays, in the light in which he ought to be held, as a standard authority on all subjects appertaining to this specialty.—*N. Y. Med. Gaz.*

LARDNER (DIONYSIUS), D. C. L., &c.

HANDBOOKS OF NATURAL PHILOSOPHY AND ASTRONOMY.

Revised, with numerous Additions, by the American editor. **FIRST COURSE**, containing Mechanics, Hydrostatics, Hydraulics, Pneumatics, Sound, and Optics. In one large royal 12mo. volume, of 750 pages, with 424 wood-cuts. \$1 75. **SECOND COURSE**, containing Heat, Electricity, Magnetism, and Galvanism, one volume, large royal 12mo., of 450 pages, with 250 illustrations. \$1 25. **THIRD COURSE** (*now ready*), containing Meteorology and Astronomy, in one large volume, royal 12mo. of nearly 500 pages, with 37 plates and 200 wood-cuts. \$2 00.

LAYCOCK (THOMAS), M. D., F. R. S. E.,

Professor of Practical and Clinical Medicine in the University of Edinburgh, &c.

LECTURES ON THE PRINCIPLES AND METHODS OF MEDICAL OBSERVATION AND RESEARCH. For the Use of Advanced Students and Junior Practitioners. In one very neat royal 12mo. volume, extra cloth. Price \$1 00. (*Just Published, 1857.*)

LA ROCHE (R.), M. D., &c.

YELLOW FEVER, considered in its Historical, Pathological, Etiological, and Therapeutical Relations. Including a Sketch of the Disease as it has occurred in Philadelphia from 1699 to 1854, with an examination of the connections between it and the fevers known under the same name in other parts of temperate as well as in tropical regions. In two large and handsome octavo volumes of nearly 1500 pages, extra cloth. \$7 00.

From Professor S. H. Dickson, Charleston, S. C., September 18, 1855.

A monument of intelligent and well applied research, almost without example. It is, indeed, in itself, a large library, and is destined to constitute the special resort as a book of reference, in the subject of which it treats, to all future time.

We have not time at present, engaged as we are, by day and by night, in the work of combating this very disease, now prevailing in our city, to do more than give this cursory notice of what we consider as undoubtedly the most able and erudite medical publication our country has yet produced. But in view of the startling fact, that this, the most malignant and unmanageable disease of modern times, has for several years been prevailing in our country to a greater extent than ever before; that it is no longer confined to either large or small cities, but penetrates country villages, plantations, and farm-houses; that it is treated with scarcely better success now than thirty or forty years ago; that there is vast mischief done by ignorant pretenders to knowledge in regard to the disease, and in view of the probability that a majority of southern physicians will be called upon to treat the disease, we trust that this able and comprehensive treatise will be very generally read in the south.—*Memphis Med. Recorder*.

This is decidedly the great American medical work of the day—a full, complete, and systematic treatise, unequalled by any other upon the all-important subject of Yellow Fever. The laborious, indefatigable, and learned author has devoted to it many years of

arduous research and careful study, and the result is such as will reflect the highest honor upon the author and our country.—*Southern Med. and Surg. Journal*.

The genius and scholarship of this great physician could not have been better employed than in the erection of this towering monument to his own fame, and to the glory of the medical literature of his own country. It is destined to remain the great authority upon the subject of Yellow Fever. The student and physician will find in these volumes a *résumé* of the sum total of the knowledge of the world upon the awful scourge which they so elaborately discuss. The style is so soft and so pure as to refresh and invigorate the mind while absorbing the thoughts of the gifted author, while the publishers have succeeded in bringing the externals into a most felicitous harmony with the inspiration that dwells within. Take it all in all, it is a book we have often dreamed of, but dreamed not that it would ever meet our waking eye as a tangible reality.—*Nashville Journal of Medicine*.

We deem it fortunate that the splendid work of Dr. La Roche should have been issued from the press at this particular time. The want of a reliable digest of all that is known in relation to this frightful malady has long been felt—a want very satisfactorily met in the work before us. We deem it but faint praise to say that Dr. La Roche has succeeded in presenting the profession with an able and complete monograph, one which will find its way into every well ordered library.—*Va. Stethoscope*.

BY THE SAME AUTHOR.

PNEUMONIA; its Supposed Connection, Pathological and Etiological, with Autumnal Fevers, including an Inquiry into the Existence and Morbid Agency of Malaria. In one handsome octavo volume, extra cloth, of 500 pages. \$3 00.

MILLER (HENRY), M. D.,

Professor of Obstetrics and Diseases of Women and Children in the University of Louisville.

PRINCIPLES AND PRACTICE OF OBSTETRICS, &c.; including the Treatment of Chronic Inflammation of the Cervix and Body of the Uterus considered as a frequent cause of Abortion. With about one hundred illustrations on wood. In one very handsome octavo volume, of over 600 pages. (*Now Ready*.) \$3 75.

The reputation of Dr. Miller as an obstetrician is too widely spread to require the attention of the profession to be specially called to a volume containing the experience of his long and extensive practice. The very favorable reception accorded to his "Treatise on Human Parturition," issued some years since, is an earnest that the present work will fulfil the author's intention of providing within a moderate compass a complete and trustworthy text-book for the student, and book of reference for the practitioner. Based to a certain extent upon the former work, but enlarged to more than double its size, and almost wholly rewritten, it presents, besides the matured experience of the author, the most recent views and investigations of modern obstetric writers, such as Dubois, Cazeaux, Simpson, Tyler Smith, &c., thus embodying the results not only of the American, but also of the Paris, the London, and the Edinburgh obstetric schools. The author's position for so many years as a teacher of his favorite branch, has given him a familiarity with the wants of students and a facility of conveying instruction, which cannot fail to render the volume eminently adapted to its purposes.

We congratulate the author that the task is done. We congratulate him that he has given to the medical public a work which will secure for him a high and permanent position among the standard authorities on the principles and practice of obstetrics. Congratulations are not less due to the medical profession of this country, on the acquisition of a treatise embodying the results of the studies, reflections, and experience of Prof. Miller. Few men, if any, in this country, are more competent than he to write on this department of medicine. Engaged for thirty-five years in an extended practice of obstetrics, for many years a teacher of this branch of instruction in one of the largest of our institutions, a diligent student as well as a careful observer, an original and independent thinker, wedded to no hobbies, ever ready to consider without prejudice new views, and to adopt innovations if they are really improvements, and withal a clear, agreeable writer, a practical treatise from his pen could not fail to possess great value. Returning to Prof. Miller's work we have only to add that we hope most sincerely it will be in the hands of every reading and thinking practitioner of this country.—*Buffalo Med Journal*, Mar. 1853.

In fact, this volume must take its place among the standard systematic treatises on obstetrics; a position to which its merits justly entitle it. The style is such that the descriptions are clear, and each subject is discussed and elucidated with due regard to its practical bearings, which cannot fail to make it acceptable and valuable to both students and practitioners. We cannot, however, close this brief notice without congratulating the author and the profession on the production of such an excellent treatise. The author is a western man of whom we feel proud, and we cannot but think that his book will find many readers and warm admirers wherever obstetrics is taught and studied as a science and an art.—*The Cincinnati Lancet and Observer*, Feb. 1853.

A most respectable and valuable addition to our home medical literature, and one reflecting credit alike on the author and the institution to which he is attached. The student will find in this work a most useful guide to his studies; the country practitioner, rusty in his reading, can obtain from its pages a fair résumé of the modern literature of the science; and we hope to see this American production generally consulted by the profession.—*Va. Med. Journal*, Feb. 1853.

MEIGS (CHARLES D.), M. D.,

Professor of Obstetrics, &c. in the Jefferson Medical College, Philadelphia.

OBSTETRICS: THE SCIENCE AND THE ART. Third edition, revised and improved. With one hundred and twenty-nine illustrations. In one beautifully printed octavo volume, leather, of seven hundred and fifty-two large pages. \$3 75.

The rapid demand for another edition of this work is a sufficient expression of the favorable verdict of the profession. In thus preparing it a third time for the press, the author has endeavored to render it in every respect worthy of the favor which it has received. To accomplish this he has thoroughly revised it in every part. Some portions have been rewritten, others added, new illustrations have been in many instances substituted for such as were not deemed satisfactory, while, by an alteration in the typographical arrangement, the size of the work has not been increased, and the price remains unaltered. In its present improved form, it is, therefore, hoped that the work will continue to meet the wants of the American profession as a sound, practical, and extended SYSTEM OF MIDWIFERY.

Though the work has received only five pages of enlargement, its chapters throughout wear the impress of careful revision. Expunging and rewriting, remodelling its sentences, with occasional new material, all evince a lively desire that it shall deserve to be regarded as improved in manner as well as matter. In the matter, every stroke of the pen has increased the value of the book, both in expungings and additions.—*Western Lancet*, Jan. 1857.

The best American work on Midwifery that is accessible to the student and practitioner—*N. W. Med. and Surg. Journal*, Jan. 1857.

This is a standard work by a great American Obstetrician. It is the third and last edition, and, in the language of the preface, the author has "brought the subject up to the latest dates of real improvement in our art and Science."—*Nashville Journ. of Med. and Surg.*, May, 1857.

BY THE SAME AUTHOR. (*Lately Issued.*)

WOMAN: HER DISEASES AND THEIR REMEDIES. A Series of Lectures to his Class. Third and Improved edition. In one large and beautifully printed octavo volume, leather. pp. 672. \$3 60.

The gratifying appreciation of his labors, as evinced by the exhaustion of two large impressions of this work within a few years, has not been lost upon the author, who has endeavored in every way to render it worthy of the favor with which it has been received. The opportunity thus afforded for a second revision has been improved, and the work is now presented as in every way superior to its predecessors, additions and alterations having been made whenever the advance of science has rendered them desirable. The typographical execution of the work will also be found to have undergone a similar improvement, and the work is now confidently presented as in every way worthy the position it has acquired as the standard American text-book on the Diseases of Females.

It contains a vast amount of practical knowledge, by one who has accurately observed and retained the experience of many years, and who tells the result in a free, familiar, and pleasant manner.—*Dublin Quarterly Journal*.

There is an off-hand fervor, a glow, and a warm-heartedness infecting the effort of Dr. Meigs, which is entirely captivating, and which absolutely hurries the reader through from beginning to end. Besides, the book teems with solid instruction, and it shows the very highest evidence of ability, viz., the clearness with which the information is presented. We know of no better test of one's understanding a subject than the evidence of the power of lucidly explaining it. The most elementary, as well as the obscurest subjects, under the pencil of Prof. Meigs, are isolated and made to stand out in

such bold relief, as to produce distinct impressions upon the mind and memory of the reader.—*The Charleston Med. Journal*.

Professor Meigs has enlarged and amended this great work, for such it unquestionably is, having passed the ordeal of criticism at home and abroad, but been improved thereby; for in this new edition the author has introduced real improvements, and increased the value and utility of the book immeasurably. It presents so many novel, bright, and sparkling thoughts; such an exuberance of new ideas on almost every page, that we confess ourselves to have become enamored with the book and its author; and cannot withhold our congratulations from our Philadelphia conferees, that such a teacher is in their service.—*N. Y. Med. Gazette*.

BY THE SAME AUTHOR. (*Lately Published.*)

ON THE NATURE, SIGNS, AND TREATMENT OF CHILD-BED FEVER. In a Series of Letters addressed to the Students of his Class. In one handsome octavo volume, extra cloth, of 365 pages. \$2 50.

The instructive and interesting author of this work, whose previous labors in the department of medicine which he so sedulously cultivates, have placed his countrymen under deep and abiding obligations, again challenges their admiration in the fresh and vigorous, attractive and racy pages before us. It is a delectable book. * * * This treatise upon child-bed fevers will have an extensive sale, being destined, as it deserves, to find a place in the library of every practitioner who seems to lag in the rear.—*Nashville Journal of Medicine and Surgery*.

This book will add more to his fame than either of those which bear his name. Indeed we doubt whether any material improvement will be made on the teachings of this volume for a century to come, since it is so eminently practical, and based on profound knowledge of the science and consummate skill in the art of healing, and ratified by an ample and extensive experience, such as few men have the industry or good fortune to acquire.—*N. Y. Med. Gazette*.

BY THE SAME AUTHOR; WITH COLORED PLATES.

A TREATISE ON ACUTE AND CHRONIC DISEASES OF THE NECK OF THE UTERUS. With numerous plates, drawn and colored from nature in the highest style of art. In one handsome octavo volume, extra cloth. \$4 50.

MAYNE'S DISPENSATORY AND THERAPEUTICAL REMEMBRANCER. Comprising the entire lists of *Materia Medica*, with every Practical Formula contained in the three British Pharmacopœias. Edited, with the addition of the Formulæ of the U. S. Pharmacopœia, by R. E. GRIFFITH, M. D. 112mo. vol. ex. cl., 300 pp. 75 c.

MALGAIGNE'S OPERATIVE SURGERY, based on Normal and Pathological Anatomy. Translated from the French by FREDERICK BRITTON, A. B., M. D. With numerous illustrations on wood. In one handsome octavo volume, extra cloth, of nearly six hundred pages. \$2 25.

NEILL (JOHN), M. D.,

Surgeon to the Pennsylvania Hospital, &c.; and

FRANCIS GURNEY SMITH, M. D.,

Professor of Institutes of Medicine in the Pennsylvania Medical College.

AN ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE; for the Use and Examination of Students. A new edition, revised and improved. In one very large and handsomely printed royal 12mo. volume, of about one thousand pages, with 374 wood-cuts. Strongly bound in leather, with raised bands. \$3 00.

The very flattering reception which has been accorded to this work, and the high estimate placed upon it by the profession, as evinced by the constant and increasing demand which has rapidly exhausted two large editions, have stimulated the authors to render the volume in its present revision more worthy of the success which has attended it. It has accordingly been thoroughly examined, and such errors as had on former occasions escaped observation have been corrected, and whatever additions were necessary to maintain it on a level with the advance of science have been introduced. The extended series of illustrations has been still further increased and much improved, while, by a slight enlargement of the page, these various additions have been incorporated without increasing the bulk of the volume.

The work is, therefore, again presented as eminently worthy of the favor with which it has hitherto been received. As a book for daily reference by the student requiring a guide to his more elaborate text-books, as a manual for preceptors desiring to stimulate their students by frequent and accurate examination, or as a source from which the practitioners of older date may easily and cheaply acquire a knowledge of the changes and improvement in professional science, its reputation is permanently established.

The best work of the kind with which we are acquainted.—*Med. Examiner.*

Having made free use of this volume in our examinations of pupils, we can speak from experience in recommending it as an admirable compend for students, and as especially useful to preceptors who examine their pupils. It will save the teacher much labor by enabling him readily to recall all of the points upon which his pupils should be examined. A work of this sort should be in the hands of every one who takes pupils into his office with a view of examining them; and this is unquestionably the best of its class.—*Transylvania Med. Journal.*

the students is heavy, and review necessary for an examination, a compend is not only valuable, but it is almost a *sine qua non*. The one before us is, in most of the divisions, the most unexceptionable of all books of the kind that we know of. The newest and soundest doctrines and the latest improvements and discoveries are explicitly, though concisely, laid before the student. There is a class to whom we very sincerely commend this cheap book as worth its weight in silver—that class is the graduates in medicine of more than ten years' standing, who have not studied medicine since. They will perhaps find out from it that the science is not exactly now what it was when they left it off.—*The Stethoscope*

In the rapid course of lectures, where work for

NEILL (JOHN), M. D.,

OUTLINES OF THE VEINS AND LYMPHATICS. With handsome colored plates. 1 vol., cloth. \$1 25.

OUTLINES OF THE NERVES. With handsome plates. 1 vol., cloth. \$1 25.

NELIGAN (J. MOORE), M. D., M. R. I. A., &c.

(A splendid work. Just Issued.)

ATLAS OF CUTANEOUS DISEASES. In one beautiful quarto volume, extra cloth, with splendid colored plates, presenting nearly one hundred elaborate representations of disease. \$4 50.

This beautiful volume is intended as a complete and accurate representation of all the varieties of Diseases of the Skin. While it can be consulted in conjunction with any work on Practice, it has especial reference to the author's "Treatise on Diseases of the Skin," so favorably received by the profession some years since. The publishers feel justified in saying that few more beautifully executed plates have ever been presented to the profession of this country.

A compend which will very much aid the practitioner in this difficult branch of diagnosis. Taken with the beautiful plates of the Atlas, which are remarkable for their accuracy and beauty of coloring, it constitutes a very valuable addition to the library of a practical man.—*Buffalo Med. Journal,* Sept. 1856.

Nothing is often more difficult than the diagnosis of disease of the skin; and hitherto, the only works containing illustrations have been at rather inconvenient prices—prices, indeed, that prevented general use. The work before us will supply a want long felt, and minister to a more perfect acquaintance with the nature and treatment of a very frequent and troublesome form of disease.—*Ohio Med. and Surg. Journal,* July, 1856.

Neligan's Atlas of Cutaneous Diseases supplies a

long existent desideratum much felt by the largest class of our profession. It presents, in quarto size, 16 plates, each containing from 3 to 6 figures, and forming in all a total of 90 distinct representations of the different species of skin affections, grouped together in genera or families. The illustrations have been taken from nature, and have been copied with such fidelity that they present a striking picture of life; in which the reduced scale aptly serves to give, at a coup d'œil, the remarkable peculiarities of each individual variety. And while thus the disease is rendered more definable, there is yet no loss of proportion incurred by the necessary concentration. Each figure is highly colored, and so truthful has the artist been that the most fastidious observer could not justly take exception to the correctness of the execution of the pictures under his scrutiny.—*Montreal Med. Chronicle.*

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON DISEASES OF THE SKIN. Second American edition. In one neat royal 12mo. volume, extra cloth, of 334 pages. \$1 00.

PEREIRA (JONATHAN), M. D., F. R. S., AND L. S.

THE ELEMENTS OF MATERIA MEDICA AND THERAPEUTICS.

Third American edition, enlarged and improved by the author; including Notices of most of the Medicinal Substances in use in the civilized world, and forming an Encyclopædia of Materia Medica. Edited, with Additions, by JOSEPH CARSON, M. D., Professor of Materia Medica and Pharmacy in the University of Pennsylvania. In two very large octavo volumes of 2100 pages, on small type, with about 500 illustrations on stone and wood, strongly bound in leather, with raised bands. \$9 00.

Gentlemen who have the first volume are recommended to complete their copies without delay. The first volume will no longer be sold separate. Price of Vol. II. \$5 00.

The third edition of his "Elements of Materia Medica, although completed under the supervision of others, is by far the most elaborate treatise in the English language, and will, while medical literature is cherished, continue a monument alike honorable to his genius, as to his learning and industry.—*American Journal of Pharmacy.*

Our own opinion of its merits is that of its editors, and also that of the whole profession, both of this and foreign countries—namely, "that in copiousness of details, in extent, variety, and accuracy of information, and in lucid explanation of difficult and recalcitrant subjects, it surpasses all other works on Materia Medica hitherto published." We cannot close this notice without alluding to the special additions of the American editor, which pertain to the prominent vegetable productions of this country,

and to the directions of the United States Pharmacopœia, in connection with all the articles contained in the volume which are referred to by it. The illustrations have been increased, and this edition by Dr. Carson cannot well be regarded in any other light than that of a treasure which should be found in the library of every physician.—*New York Journal of Medical and Collateral Science.*

The work, in its present shape, forms the most comprehensive and complete treatise on materia medica extant in the English language. The accounts of the physiological and therapeutic effects of remedies are given with great clearness and accuracy, and in a manner calculated to interest as well as to instruct the reader.—*Edinburgh Medical and Surgical Journal.*

PEASLEE (E. R.), M. D.,

Professor of Physiology and General Pathology in the New York Medical College.

HUMAN HISTOLOGY, in its relations to Anatomy, Physiology, and Pathology;

for the use of Medical Students. With four hundred and thirty-four illustrations. In one handsome octavo volume, of over 600 pages. (Now Ready.) \$3 75.

The rapid advances made of late years in our knowledge of the structure and functions of the elements which constitute the human body, have rendered the subject of Histology of the highest importance to all who regard medicine as a science. At the same time, the vast body of facts covered by Physiology has caused our text-books on that subject to be necessarily restricted in their treatment of the portions devoted to Histology. A want has, therefore, arisen of a work devoted especially to the minute anatomy of the body, giving a complete and detailed account of the structure of the various tissues, as well as the solids and fluids, in all the different organs—their functions in health, and their changes in disease. In undertaking this task, the author has endeavored to present his extensive subject in the manner most likely to interest and benefit the physician, confident that in these details will be found the basis of true medical science. The very large number of illustrations introduced throughout, serves amply to elucidate the text, while the typography of the volume will in every respect be found of the handsomest description.

It embraces a library upon the topics discussed within itself, and is just what the teacher and learner need. Another advantage, by no means to be overlooked, everything of real value in the wide range which it embraces, is with great skill compressed into an octavo volume of but little more than six hundred pages. We have not only the whole subject of Histology, interesting in itself, ably and fully discussed, but what is of infinitely greater interest to the student, because of greater practical value, are its relations to Anatomy, Physiology, and Pathology, which are here fully and satisfactorily set forth. These great supporting branches of practical medicine are thus linked together, and while establishing and illustrating each other, are interwoven

into a harmonious whole. We commend the work to students and physicians generally.—*Nashville Journ. of Med. and Surgery*, Dec. 1857.

It far surpasses our expectation. We never conceived the possibility of compressing so much valuable information into so compact a form. We will not consume space with commendations. We receive this contribution to physiological science, "Not with vain thanks, but with acceptance bounteous." We have already paid it the practical compliment of making abundant use of it in the preparation of our lectures, and also of recommending its further perusal most cordially to our alumni; a recommendation which we now extend to our readers.—*Memphis Med. Recorder*, Jan. 1858.

PIRRIE (WILLIAM), F. R. S. E.,

Professor of Surgery in the University of Aberdeen.

THE PRINCIPLES AND PRACTICE OF SURGERY. Edited by JOHN

NEILL, M. D., Professor of Surgery in the Penna. Medical College, Surgeon to the Pennsylvania Hospital, &c. In one very handsome octavo volume, leather, of 780 pages, with 316 illustrations. \$3 75.

We know of no other surgical work of a reasonable size, wherein there is so much theory and practice, or where subjects are more soundly or clearly taught.—*The Stethoscope.*

There is scarcely a disease of the bones or soft parts, fracture, or dislocation, that is not illustrated by accurate wood-engravings. Then, again, every instrument employed by the surgeon is thus represented. These engravings are not only correct, but really beautiful, showing the astonishing degree of perfection to which the art of wood-engraving has

arrived. Prof. Pirrie, in the work before us, has elaborately discussed the principles of surgery, and a safe and effectual practice predicated upon them. Perhaps no work upon this subject heretofore issued is so full upon the science of the art of surgery.—*Nashville Journal of Medicine and Surgery.*

One of the best treatises on surgery in the English language.—*Canada Med. Journal.*

Our impression is, that, as a manual for students, Pirrie's is the best work extant.—*Western Med. and Surg. Journal.*

PARKER (LANGSTON),

Surgeon to the Queen's Hospital, Birmingham.

THE MODERN TREATMENT OF SYPHILITIC DISEASES, BOTH PRIMARY AND SECONDARY; comprising the Treatment of Constitutional and Confirmed Syphilis, by a safe and successful method. With numerous Cases, Formulæ, and Clinical Observations. From the Third and entirely rewritten London edition. In one neat octavo volume,

extra cloth, of 316 pages. \$1 75.

PARRISH (EDWARD),

Lecturer on Practical Pharmacy and Materia Medica in the Pennsylvania Academy of Medicine, &c.

AN INTRODUCTION TO PRACTICAL PHARMACY. Designed as a Text-Book for the Student, and as a Guide for the Physician and Pharmacist. With many Formulæ and Prescriptions. In one handsome octavo volume, extra cloth, of 550 pages, with 243 Illustrations. \$2 75.

A careful examination of this work enables us to speak of it in the highest terms, as being the best treatise on practical pharmacy with which we are acquainted, and an invaluable *vade-mecum*, not only to the apothecary and to those practitioners who are accustomed to prepare their own medicines, but to every medical man and medical student. Throughout the work are interspersed valuable tables, useful formulæ, and practical hints, and the whole is illustrated by a large number of excellent wood-engravings.—*Boston Med. and Surg. Journal*.

This is altogether one of the most useful books we have seen. It is just what we have long felt to be needed by apothecaries, students, and practitioners of medicine, most of whom in this country have to put up their own prescriptions. It bears, upon every page, the impress of practical knowledge, conveyed in a plain common sense manner, and adapted to the comprehension of all who may read it. No detail has been omitted, however trivial it may seem, although really important to the dispenser of medicine.—*Southern Med. and Surg. Journal*.

To both the country practitioner and the city apothecary this work of Mr. Parrish is a godsend. A careful study of its contents will give the young graduate a familiarity with the value and mode of administering his prescriptions, which will be of as much use to his patient as to himself.—*Va. Med. Journal*.

Mr. Parrish has rendered a very acceptable service to the practitioner and student, by furnishing this book, which contains the leading facts and principles of the science of Pharmacy, conveniently arranged for study, and with special reference to those features of the subject which possess an especial practical interest to the physician. It furnishes the student, at the commencement of his studies, with that information which is of the greatest importance in initiating him into the domain of Chemistry and Materia

Medica; it familiarizes him with the compounding of drugs, and supplies those minutia which but few practitioners can impart. The junior practitioner will, also, find this volume replete with instruction.—*Charleston Med. Journal and Review*, Mar. 1856.

There is no useful information in the details of the apothecary's or country physician's office conducted according to science that is omitted. The young physician will find it an encyclopedia of indispensable medical knowledge, from the purchase of a spatula to the compounding of the most learned prescriptions. The work is by the ablest pharmacist in the United States, and must meet with an immense sale.—*Nashville Journal of Medicine*, April, 1856.

We are glad to receive this excellent work. It will supply a want long felt by the profession, and especially by the student of Pharmacy. A large majority of physicians are obliged to compound their own medicines, and to them a work of this kind is indispensable.—*N. O. Medical and Surgical Journal*.

We cannot say but that this volume is one of the most welcome and appropriate which has for a long time been issued from the press. It is a work which we doubt not will at once secure an extensive circulation, as it is designed not only for the druggist and pharmacist, but also for the great body of practitioners throughout the country, who not only have to prescribe medicines, but in the majority of instances have to rely upon their own resources—whatever these may be—not only to compound, but also to manufacture the remedies they are called upon to administer. The author has not mistaken the idea in writing this volume, as it is alike useful and invaluable to those engaged in the active pursuits of the profession, and to those preparing to enter upon the field of professional labors.—*American Lancet*, March 24, 1856.

RICORD (P.), M. D.,

A TREATISE ON THE VENEREAL DISEASE. By JOHN HUNTER, F. R. S.

With copious Additions, by PH. RICORD, M. D. M. D. In one handsome octavo volume, extra

Edited, with Notes, by FREEMAN J. BUMSTEAD, cloth, of 520 pages, with plates. \$3 25.

Every one will recognize the attractiveness and value which this work derives from thus presenting the opinions of these two masters side by side. But, it must be admitted, what has made the fortune of the book, is the fact that it contains the "most complete embodiment of the veritable doctrines of the Hôpital du Midi," which has ever been made public. The doctrinal ideas of M. Ricord, ideas which, if not universally adopted, are incontestably dominant, have heretofore only been interpreted by more or less skilful

secretaries, sometimes accredited and sometimes not.

In the notes to Hunter, the master substitutes himself for his interpreters, and gives his original thoughts to the world in a lucid and perfectly intelligible manner. In conclusion we can say that this is incontestably the best treatise on syphilis with which we are acquainted, and, as we do not often employ the phrase, we may be excused for expressing the hope that it may find a place in the library of every physician.—*Virginia Med. and Surg. Journal*.

RIGBY (EDWARD), M. D.,

Senior Physician to the General Lying-in Hospital, &c.

A SYSTEM OF MIDWIFERY. With Notes and Additional Illustrations. Second American Edition. One volume octavo, extra cloth, 422 pages. \$2 50.

BY THE SAME AUTHOR. (Now Ready, 1857.)

ON THE CONSTITUTIONAL TREATMENT OF FEMALE DISEASES.

In one neat royal 12mo. volume, extra cloth, of about 250 pages. \$1 00.

The aim of the author has been throughout to present sound practical views of the important subjects under consideration; and without entering into theoretical disputations and disquisitions to embody the results of his long and extended experience in such a condensed form as would be easily accessible to the practitioner.

ROYLE'S MATERIA MEDICA AND THERAPEUTICS; including the Preparations of the Pharmacopœias of London, Edinburgh, Dublin, and of the United States. With many new medicines. Edited by JOSEPH CARSON, M. D. With ninety-eight illustrations. In one large octavo volume, extra cloth, of about 700 pages. \$3 00.

RAMSBOTHAM (FRANCIS H.), M. D.

THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY, in reference to the Process of Parturition. A new and enlarged edition, thoroughly revised by the Author. With Additions by W. V. KEATING, M. D. In one large and handsome imperial octavo volume, of 650 pages, strongly bound in leather, with raised bands; with sixty-four beautiful Plates, and numerous Wood-cuts in the text, containing in all nearly two hundred large and beautiful figures. (*Lately Issued*, 1856.) \$5 00.

In calling the attention of the profession to the new edition of this standard work, the publishers would remark that no efforts have been spared to secure for it a continuance and extension of the remarkable favor with which it has been received. The last London issue, which was considerably enlarged, has received a further revision from the author, especially for this country. Its passage through the press here has been supervised by Dr. Keating, who has made numerous additions with a view of presenting more fully whatever was necessary to adapt it thoroughly to American modes of practice. In its mechanical execution, a like superiority over former editions will be found.

From Prof. Hodge, of the University of Pa.

To the American public, it is most valuable, from its intrinsic undoubted excellence, and as being the best authorized exponent of British Midwifery. Its circulation will, I trust, be extensive throughout our country.

The publishers have shown their appreciation of the merits of this work and secured its success by the truly elegant style in which they have brought it out, excelling themselves in its production, especially in its plates. It is dedicated to Prof. Meigs, and has the emphatic endorsement of Prof. Hodge, as the best exponent of British Midwifery. We know of no text-book which deserves in all respects to be more highly recommended to students, and we could wish to see it in the hands of every practitioner, for they will find it invaluable for reference.—*Med. Gazette*.

But once in a long time some brilliant genius rears his head above the horizon of science, and illuminates and purifies every department that he investigates; and his works become types, by which innumerable imitators model their feeble productions. Such a genius we find in the younger Ramsbotham, and such a type we find in the work now before us. The binding, paper, type, the engravings and woodcuts are all so excellent as to make this book one of the finest specimens of the art of printing that have given such a world-wide reputation to its enterprising and liberal publishers. We welcome Ramsbotham's Principles and Practice of Obstetric Medi-

cine and Surgery to our library, and confidently recommend it to our readers, with the assurance that it will not disappoint their most sanguine expectations.—*Western Lancet*.

It is unnecessary to say anything in regard to the utility of this work. It is already appreciated in our country for the value of the matter, the clearness of its style, and the fulness of its illustrations. To the physician's library it is indispensable, while to the student as a text-book, from which to extract the material for laying the foundation of an education on obstetrical science, it has no superior.—*Ohio Med. and Surg. Journal*.

We will only add that the student will learn from it all he need to know, and the practitioner will find it, as a book of reference, surpassed by none other.—*Stethoscope*.

The character and merits of Dr. Ramsbotham's work are so well known and thoroughly established, that comment is unnecessary and praise superfluous. The illustrations, which are numerous and accurate, are executed in the highest style of art. We cannot too highly recommend the work to our readers.—*St. Louis Med. and Surg. Journal*.

ROKITANSKY (CARL), M. D.,

Curator of the Imperial Pathological Museum, and Professor at the University of Vienna, &c.

A MANUAL OF PATHOLOGICAL ANATOMY. Four volumes, octavo, bound in two, extra cloth, of about 1200 pages. Translated by W. E. SWAINE, EDWARD SIEVEKING, C. H. MOORE, and G. E. DAY. (*Just Issued*.) \$5 50

To render this large and important work more easy of reference, and at the same time less cumbersome and costly, the four volumes have been arranged in two, retaining, however, the separate paging, &c.

The publishers feel much pleasure in presenting to the profession of the United States the great work of Prof. Rokitansky, which is universally referred to as the standard of authority by the pathologists of all nations. Under the auspices of the Sydenham Society of London, the combined labor of four translators has at length overcome the almost insuperable difficulties which have so long prevented the appearance of the work in an English dress. To a work so widely known, eulogy is unnecessary, and the publishers would merely state that it is said to contain the results of not less than THIRTY THOUSAND *post-mortem* examinations made by the author, diligently compared, generalized, and wrought into one complete and harmonious system.

The profession is too well acquainted with the reputation of Rokitansky's work to need our assurance that this is one of the most profound, thorough, and valuable books ever issued from the medical press. It is *sui generis*, and has no standard of comparison. It is only necessary to announce that it is issued in a form as cheap as is compatible with its size and preservation, and its sale follows as a matter of course. No library can be called complete without it.—*Buffalo Med. Journal*.

An attempt to give our readers any adequate idea of the vast amount of instruction accumulated in these volumes, would be feeble and hopeless. The effort of the distinguished author to concentrate in a small space his great fund of knowledge, has

so charged his text with valuable truths, that any attempt of a reviewer to epitomize is at once paralyzed, and must end in a failure.—*Western Lancet*.

As this is the highest source of knowledge upon the important subject of which it treats, no real student can afford to be without it. The American publishers have entitled themselves to the thanks of the profession of their country, for this timely and beautiful edition.—*Nashville Journal of Medicine*.

As a book of reference, therefore, this work must prove of inestimable value, and we cannot too highly recommend it to the profession.—*Charleston Med. Journal and Review*, Jan. 1856.

This book is a necessity to every practitioner.—*Am. Med. Monthly*.

SCHOEDLER (FRIEDRICH), PH. D.,

Professor of the Natural Sciences at Worms, &c.

THE BOOK OF NATURE; an Elementary Introduction to the Sciences of Physics, Astronomy, Chemistry, Mineralogy, Geology, Botany, Zoology, and Physiology. First American edition, with a Glossary and other Additions and Improvements; from the second English edition. Translated from the sixth German edition, by HENRY MEDLOCK, F. C. S., &c. In one volume, small octavo, extra cloth, pp. 692, with 679 illustrations. \$1 80.

SMITH (HENRY H.), M. D.,

Professor of Surgery in the University of Pennsylvania, &c.

MINOR SURGERY; or, Hints on the Every-day Duties of the Surgeon. Illustrated by two hundred and forty-seven illustrations. Third and enlarged edition. In one handsome royal 12mo. volume. pp. 456. In leather, \$2 25; extra cloth, \$2 00.

And a capital little book it is. . . Minor Surgery, we repeat, is really Major Surgery, and anything which teaches it is worth having. So we cordially recommend this little book of Dr. Smith's.—*Med.-Chir. Review*.

This beautiful little work has been compiled with a view to the wants of the profession in the matter of bandaging, &c., and well and ably has the author performed his labors. Well adapted to give the requisite information on the subjects of which it treats.—*Medical Examiner*.

The directions are plain, and illustrated throughout with clear engravings.—*London Lancet*.

One of the best works they can consult on the subject of which it treats.—*Southern Journal of Medicine and Pharmacy*.

A work such as the present is therefore highly useful to the student, and we commend this one to their attention.—*American Journal of Medical Sciences*.

No operator, however eminent, need hesitate to consult this unpretending yet excellent book. Those who are young in the business would find Dr. Smith's treatise a necessary companion, after once understanding its true character.—*Boston Med. and Surg. Journal*.

No young practitioner should be without this little volume; and we venture to assert, that it may be consulted by the senior members of the profession with more real benefit, than the more voluminous works.—*Western Lancet*.

BY THE SAME AUTHOR, AND

HORNER (WILLIAM E.), M. D.,

Late Professor of Anatomy in the University of Pennsylvania.

AN ANATOMICAL ATLAS, illustrative of the Structure of the Human Body.

In one volume, large imperial octavo, extra cloth, with about six hundred and fifty beautiful figures. \$3 00.

These figures are well selected, and present a complete and accurate representation of that wonderful fabric, the human body. The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistic execution, have been already pointed out. We must congratulate

the student upon the completion of this Atlas, as it is the most convenient work of the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up" is so creditable to the country as to be flattering to our national pride.—*American Medical Journal*.

SARGENT (F. W.), M. D.

ON BANDAGING AND OTHER OPERATIONS OF MINOR SURGERY.

Second edition, enlarged. One handsome royal 12mo. vol., of nearly 400 pages, with 182 wood-cuts. Extra cloth, \$1 40; leather, \$1 50.

This very useful little work has long been a favorite with practitioners and students. The recent call for a new edition has induced its author to make numerous important additions. A slight alteration in the size of the page has enabled him to introduce the new matter, to the extent of some fifty pages of the former edition, at the same time that his volume is rendered still more compact than its less comprehensive predecessor. A double gain in this effected, which, in a *vide-mecum* of this kind, is a material improvement.—*Am. Medical Journal*.

Sargent's Minor Surgery has always been popular, and deservedly so. It furnishes that knowledge of the most frequently requisite performances of surgical art which cannot be entirely understood by attending clinical lectures. The art of bandaging, which is regularly taught in Europe, is very frequently overlooked by teachers in this country; the student and junior practitioner, therefore, may often require that knowledge which this little volume so tersely and happily supplies. It is neatly printed and copi-

ously illustrated by the enterprising publishers, and should be possessed by all who desire to be thoroughly conversant with the details of this branch of our art.—*Charleston Med. Journ. and Review*, March, 1856.

A work that has been so long and favorably known to the profession as Dr. Sargent's Minor Surgery, needs no commendation from us. We would remark, however, in this connection, that minor surgery seldom gets that attention in our schools that its importance deserves. Our larger works are also very defective in their teaching on these small practical points. This little book will supply the void which all must feel who have not studied its pages.—*Western Lancet*, March, 1856.

We confess our indebtedness to this little volume on many occasions, and can warmly recommend it to our readers, as it is not above the consideration of the oldest and most experienced.—*American Lancet*, March, 1856.

KEY'S OPERATIVE SURGERY. In one very handsome octavo volume, extra cloth, of over 650 pages, with about one hundred wood-cuts. \$3 25.

STANLEY'S TREATISE ON DISEASES OF THE BONES. In one volume, octavo, extra cloth, 258 pages. \$1 50.

SOLOMON ON THE HUMAN BRAIN; its Structure, Physiology, and Diseases. From the Second and

much enlarged London edition. In one octavo volume, extra cloth, of 500 pages, with 120 wood-cuts. \$2 00.

SIMON'S GENERAL PATHOLOGY, as conducive to the Establishment of Rational Principles for the prevention and Cure of Disease. In one neat octavo volume, extra cloth, of 212 pages. \$1 25.

STILLÉ (ALFRED), M. D.

PRINCIPLES OF GENERAL AND SPECIAL THERAPEUTICS In handsome octavo. (*Preparing*.)

SIBSON (FRANCIS), M. D.,

Physician to St. Mary's Hospital.

MEDICAL ANATOMY. Illustrating the Form, Structure, and Position of the Internal Organs in Health and Disease. In large imperial quarto, with splendid colored plates. To match "Maclise's Surgical Anatomy." Part I. (*Preparing*.)

SHARPEY (WILLIAM), M. D., JONES QUAIN, M. D., AND
RICHARD QUAIN, F. R. S., &c.

HUMAN ANATOMY. Revised, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. Complete in two large octavo volumes, leather, of about thirteen hundred pages. Beautifully illustrated with over five hundred engravings on wood. \$6 00.

It is indeed a work calculated to make an era in anatomical study, by placing before the student every department of his science, with a view to the relative importance of each; and so skilfully have the different parts been interwoven, that no one who makes this work the basis of his studies, will hereafter have any excuse for neglecting or undervaluing any important particulars connected with the structure of the human frame; and whether the bias of his mind lead him in a more especial manner to surgery, physic, or physiology,

he will find here a work at once so comprehensive and practical as to defend him from exclusiveness on the one hand, and pedantry on the other.—*Journal and Retrospect of the Medical Sciences.*

We have no hesitation in recommending this treatise on anatomy as the most complete on that subject in the English language; and the only one, perhaps, in any language, which brings the state of knowledge forward to the most recent discoveries.—*The Edinburgh Med. and Surg. Journal.*

SMITH (W. TYLER), M. D.,

Physician Accoucheur to St. Mary's Hospital, &c.

ON PARTURITION, AND THE PRINCIPLES AND PRACTICE OF OBSTETRICS. In one royal 12mo. volume, extra cloth, of 400 pages. \$1 25.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE PATHOLOGY AND TREATMENT OF LEUCORRHOEA. With numerous illustrations. In one very handsome octavo volume, extra cloth, of about 250 pages. \$1 50.

We hail the appearance of this practical and invaluable work, therefore, as a real acquisition to our medical literature.—*Medical Gazette.*

TAYLOR (ALFRED S.), M. D., F. R. S.,

Lecturer on Medical Jurisprudence and Chemistry in Guy's Hospital.

MEDICAL JURISPRUDENCE. Fourth American, from the fifth improved and enlarged English Edition. With Notes and References to American Decisions, by EDWARD HARTSHORNE, M. D. In one large octavo volume, leather, of over seven hundred pages. (*Just Issued, 1856.*) \$3 00.

This standard work has lately received a very thorough revision at the hands of the author, who has introduced whatever was necessary to render it complete and satisfactory in carrying out the objects in view. The editor has likewise used every exertion to make it equally thorough with regard to all matters relating to the practice of this country. In doing this, he has carefully examined all that has appeared on the subject since the publication of the last edition, and has incorporated all the new information thus presented. The work has thus been considerably increased in size, notwithstanding which, it has been kept at its former very moderate price, and in every respect it will be found worthy of a continuance of the remarkable favor which has carried it through so many editions on both sides of the Atlantic. A few notices of the former editions are appended.

We know of no work on Medical Jurisprudence which contains in the same space anything like the same amount of valuable matter.—*N. Y. Journal of Medicine.*

No work upon the subject can be put into the hands of students either of law or medicine which will engage them more closely or profitably; and none could be offered to the busy practitioner of either calling, for the purpose of casual or hasty reference, that would be more likely to afford the aid desired. We therefore recommend it as the best and surest manual for daily use.—*American Journal of Medical Sciences.*

This work of Dr. Taylor's is generally acknowledged to be one of the ablest extant on the subject of medical jurisprudence. It is certainly one of the most attractive books that we have met with; supplying so much both to interest and instruct, that

we do not hesitate to affirm that after having once commenced its perusal, few could be prevailed upon to desist before completing it. In the last London edition, all the newly observed and accurately recorded facts have been inserted, including much that is recent of Chemical, Microscopical, and Pathological research, besides papers on numerous subjects never before published.—*Charleston Medical Journal and Review.*

It is not excess of praise to say that the volume before us is the very best treatise extant on Medical Jurisprudence. In saying this, we do not wish to be understood as detracting from the merits of the excellent works of Beck, Ryan, Traill, Guy, and others; but in interest and value we think it must be conceded that Taylor is superior to anything that has preceded it.—*N. W. Medical and Surg. Journal.*

BY THE SAME AUTHOR.

ON POISONS, IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE. Edited, with Notes and Additions, by R. E. GRIFFITH, M. D. In one large octavo volume, leather, of 688 pages. \$3 00

TANNER (T. H.), M. D.,

Physician to the Hospital for Women, &c.

A MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS.

To which is added The Code of Ethics of the American Medical Association. Second American Edition. In one neat volume, small 12mo. Price in extra cloth, 87½ cents; flexible style, for the pocket, 80 cents.

The work is an honor to its writer, and must obtain a wide circulation by its intrinsic merit alone. Suited alike to the wants of students and practitioners, it has only to be seen, to win for itself a place upon the shelves of every medical library. Nor will it be "shelved" long at a time; if we mistake not, it will be found, in the best sense of the

word, "handy." The style is admirably clear, while it is so sententious as not to burden the memory. The arrangement is, to our mind, unexceptionable. The work, in short, deserves the heartiest commendation.—*Boston Med. and Surg. Journal.*

Now Complete (April, 1857.)

TODD (ROBERT BENTLEY), M. D., F. R. S.,

Professor of Physiology in King's College, London; and

WILLIAM BOWMAN, F. R. S.,

Demonstrator of Anatomy in King's College, London.

THE PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN. With about three hundred large and beautiful illustrations on wood. Complete in one large octavo volume, of 950 pages, leather. Price \$4 50.

The very great delay which has occurred in the completion of this work has arisen from the desire of the authors to verify by their own examination the various questions and statements presented, thus rendering the work one of peculiar value and authority. By the wideness of its scope and the accuracy of its facts it thus occupies a position of its own, and becomes necessary to all physiological students.

♣ Gentlemen who have received portions of this work, as published in the "MEDICAL NEWS AND LIBRARY," can now complete their copies, if immediate application be made. It will be furnished as follows, free by mail, in paper covers, with cloth backs.

PARTS I., II., III. (pp. 25 to 552), \$2 50.

PART IV. (pp. 553 to end, with Title, Preface, Contents, &c.), \$2 00.

Or, PART IV., SECTION II. (pp. 725 to end, with Title, Preface, Contents, &c.), \$1 25.

A magnificent contribution to British medicine, and the American physician who shall fail to peruse it, will have failed to read one of the most instructive books of the nineteenth century.—*N. O. Med. and Surg. Journal*, Sept. 1857.

It is more concise than Carpenter's Principles, and more modern than the accessible edition of Müller's Elements; its details are brief, but sufficient; its descriptions vivid; its illustrations exact and copious; and its language terse and perspicuous.—*Charleston Med. Journal*, July, 1857.

We recommend this work not only for its many original investigations especially into the minute anatomy and physiology of man, but we admire the constant association of anatomy with physiology. The motive power is studied in its connections and adaptations to the machine it is destined to guide, and the student feels constantly impressed with the necessity for an accurate knowledge of the structure of the human body before he can make himself master of its functions.—*Va. Med. Journal*, June, 1857.

We know of no work on the subject of physiology so well adapted to the wants of the medical student. Its completion has been thus long delayed, that the authors might secure accuracy by personal observation.—*St. Louis Med. and Surg. Journal*, Sept. '57.

One of the very best books ever issued from any medical press. We think it indispensable to every reading medical man, and it may, with all propriety, and with the utmost advantage be made a text-book by any student who would thoroughly comprehend the groundwork of medicine.—*N. O. Med. News*, June, 1857.

Our notice, though it conveys but a very feeble and imperfect idea of the magnitude and importance of the work now under consideration, already transcends our limits; and, with the indulgence of our readers, and the hope that they will peruse the book for themselves, as we feel we can with confidence recommend it, we leave it in their hands for them to judge of its merits.—*The Northwestern Med. and Surg. Journal*, Oct. 1857.

It has been a far more pleasant task to us to point out its features of remarkable excellence, and to show in how many particulars the results which it embodies of skilful and zealous research do the highest credit to its able and accomplished authors. It would be a serious omission were we not to take special notice of the admirable and copious illustrations, the execution of which (by Mr. Vasey) is in the very finest style of wood-engraving.—*Brit. and For. Medico-Chir. Review*, Jan. 1858.

TODD (R. B.), M. D., F. R. S., &c.

CLINICAL LECTURES ON CERTAIN DISEASES OF THE URINARY ORGANS AND ON DROPSIES. In one octavo volume. (*Now Ready*, 1857.) \$1 50

The valuable practical nature of Dr. Todd's writings have deservedly rendered them favorites with the profession, and the present volume, embodying the medical aspects of a class of diseases not elsewhere to be found similarly treated, can hardly fail to supply a want long felt by the practitioner

WATSON (THOMAS), M. D., &c.

LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC.

Third American edition, revised, with Additions, by D. FRANCIS CONDIE, M. D., author of a "Treatise on the Diseases of Children," &c. In one octavo volume, of nearly eleven hundred large pages, strongly bound with raised bands. \$3 25.

To say that it is the very best work on the subject now extant, is but to echo the sentiment of the medical press throughout the country.—*N. O. Medical Journal*.

Of the text-books recently republished Watson is very justly the principal favorite.—*Holmes's Rep. to Nat. Med. Assoc.*

By universal consent the work ranks among the very best text-books in our language.—*Illinois and Indiana Med. Journal*.

Regarded on all hands as one of the very best, if not the very best, systematic treatise on practical medicine extant.—*St. Louis Med. Journal*.

Confessedly one of the very best works on the principles and practice of physic in the English or any other language.—*Med. Examiner*.

As a text-book it has no equal; as a compendium of pathology and practice no superior.—*New York Annalist*.

We know of no work better calculated for being placed in the hands of the student, and for a text-book; on every important point the author seems to have posted up his knowledge to the day.—*Amer. Med. Journal*.

One of the most practically useful books that ever was presented to the student.—*N. Y. Med. Journal*.

WHAT TO OBSERVE

AT THE BEDSIDE AND AFTER DEATH, IN MEDICAL CASES.

Published under the authority of the London Society for Medical Observation. A new American, from the second and revised London edition. In one very handsome volume, royal 12mo., extra cloth. \$1 00.

To the observer who prefers accuracy to blunders and precision to carelessness, this little book is invaluable.—*N. H. Journal of Medicine*.

One of the finest aids to a young practitioner we have ever seen.—*Peninsular Journal of Medicine*.

WILSON (ERASMUS), M. D., F. R. S.,
Lecturer on Anatomy, London.

A SYSTEM OF HUMAN ANATOMY, General and Special. Fourth American, from the last English edition. Edited by PAUL B. GODDARD, A. M., M. D. With two hundred and fifty illustrations. Beautifully printed, in one large octavo volume, leather, of nearly six hundred pages. \$3 00.

In many, if not all the Colleges of the Union, it has become a standard text-book. This, of itself, is sufficiently expressive of its value. A work very desirable to the student; one, the possession of which will greatly facilitate his progress in the study of Practical Anatomy.—*New York Journal of Medicine.*

Its author ranks with the highest on Anatomy.—*Southern Medical and Surgical Journal.*

It offers to the student all the assistance that can be expected from such a work.—*Medical Examiner.*

The most complete and convenient manual for the student we possess.—*American Journal of Medical Science.*

In every respect, this work as an anatomical guide for the student and practitioner, merits our warmest and most decided praise.—*London Medical Gazette.*

BY THE SAME AUTHOR. (*Just Issued.*)

THE DISSECTOR'S MANUAL; or, Practical and Surgical Anatomy. Third American, from the last revised and enlarged English edition. Modified and rearranged, by WILLIAM HUNT, M. D., Demonstrator of Anatomy in the University of Pennsylvania. In one large and handsome royal 12mo. volume, leather, of 582 pages, with 154 illustrations. \$2 00.

The modifications and additions which this work has received in passing recently through the author's hands, is sufficiently indicated by the fact that it is enlarged by more than one hundred pages, notwithstanding that it is printed in smaller type, and with a greatly enlarged page.

It remains only to add, that after a careful examination, we have no hesitation in recommending this work to the notice of those for whom it has been expressly written—the students—as a guide possess-

ing very superior claims, well calculated to facilitate their studies, and render their labor less irksome, by constantly keeping before them definite objects of interest.—*The Lancet.*

BY THE SAME AUTHOR. (*Now Ready, May, 1857.*)

ON DISEASES OF THE SKIN. Fourth and enlarged American, from the last and improved London edition. In one large octavo volume, of 650 pages, extra cloth, \$2 75.

This volume in passing for the fourth time through the hands of the author, has received a careful revision, and has been greatly enlarged and improved. About one hundred and fifty pages have been added, including new chapters on Classification, on General Pathology, on General Therapeutics, on Furuncular Eruptions, and on Diseases of the Nails, besides extensive additions throughout the text, wherever they have seemed desirable, either from former omissions or from the progress of science and the increased experience of the author. Appended to the volume will also now be found a collection of SELECTED FORMULÆ, consisting for the most part of prescriptions of which the author has tested the value.

The writings of Wilson, upon diseases of the skin, are by far the most scientific and practical that have ever been presented to the medical world on this subject. The present edition is a great improvement on all its predecessors. To dwell upon all the great merits and high claims of the work before us, *seriatim*, would indeed be an agreeable service; it would be a mental homage which we could freely offer, but we should thus occupy an undue amount of space in this *Journal*. We will, however look at some of the more salient points with which it abounds, and which make it incomparably superior in excellence to all other treatises on the subject of dermatology. No mere speculative views are allowed

a place in this volume, which, without a doubt, will, for a very long period, be acknowledged as the chief standard work on dermatology. The principles of an enlightened and rational therapeia are introduced on every appropriate occasion. The general practitioner and surgeon who, peradventure, may have for years regarded cutaneous maladies as scarcely worthy their attention, because, forsooth, they are not fatal in their tendency; or who, if they have attempted their cure, have followed the blind guidance of empiricism, will almost assuredly be roused to a new and becoming interest in this department of practice, through the inspiring agency of this book.—*Am. Jour. Med. Science*, Oct. 1857.

ALSO, JUST READY,

A SERIES OF PLATES ILLUSTRATING WILSON ON DISEASES OF THE SKIN; consisting of nineteen beautifully executed plates, of which twelve are exquisitely colored, presenting the Normal Anatomy and Pathology of the Skin, and containing accurate representations of about one hundred varieties of disease, most of them the size of nature. Price in cloth \$4 25.

In beauty of drawing and accuracy and finish of coloring these plates will be found superior to anything of the kind as yet issued in this country.

The plates by which this edition is accompanied leave nothing to be desired, so far as excellence of delineation and perfect accuracy of illustration are concerned.—*Meico-Chirurgical Review.*

Of these plates it is impossible to speak too highly.

The representations of the various forms of cutaneous disease are singularly accurate, and the coloring exceeds almost anything we have met with in point of delicacy and finish.—*British and Foreign Medical Review.*

BY THE SAME AUTHOR.

ON CONSTITUTIONAL AND HEREDITARY SYPHILIS, AND ON SYPHILITIC ERUPTIONS. In one small octavo volume, extra cloth, beautifully printed, with four exquisite colored plates, presenting more than thirty varieties of syphilitic eruptions. \$2 25.

BY THE SAME AUTHOR. (*Just Issued.*)

HEALTHY SKIN; A Popular Treatise on the Skin and Hair, their Preservation and Management. Second American, from the fourth London edition. One neat volume, royal 12mo., extra cloth, of about 300 pages, with numerous illustrations. \$1 00; paper cover, 75 cents.

WILDE (W. R.),

Surgeon to St. Mark's Ophthalmic and Aural Hospital, Dublin.

AURAL SURGERY, AND THE NATURE AND TREATMENT OF DISEASES OF THE EAR. In one handsome octavo volume, extra cloth, of 476 pages, with illustrations. \$2 80.

WEST (CHARLES), M. D.,

Accoucheur to and Lecturer on Midwifery at St. Bartholomew's Hospital, Physician to the Hospital for Sick Children, &c.

LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

Second American, from the Second and Enlarged London edition. In one volume, octavo, extra cloth, of nearly five hundred pages. \$2 00.

We take leave of Dr. West with great respect for his attainments, a due appreciation of his acute powers of observation, and a deep sense of obligation for this valuable contribution to our professional literature. His book is undoubtedly in many respects the best we possess on diseases of children. *Dublin Quarterly Journal of Medical Science.*

Dr. West has placed the profession under deep ob-

ligation by this able, thorough, and finished work upon a subject which almost daily taxes to the utmost the skill of the general practitioner. He has with singular felicity threaded his way through all the tortuous labyrinths of the difficult subject he has undertaken to elucidate, and has in many of the darkest corners left a light, which will never be extinguished.—*Nashville Medical Journal.*

BY THE SAME AUTHOR. (Just Issued.)

LECTURES ON THE DISEASES OF WOMEN. In two parts.

PART I. 8vo. cloth, of about 300 pages, comprising the DISEASES OF THE UTERUS. \$1 60.

PART II. (*Preparing*), will contain DISEASES OF THE OVARIES, and of all the parts connected with the UTERUS; of the BLADDER, VAGINA, and EXTERNAL ORGANS.

The object of the author in this work is to present a complete but succinct treatise on Female Diseases, embodying the results of his experience during the last ten years at St. Bartholomew's and the Midwifery Hospitals, as well as in private practice. The characteristics which have secured to his former works so favorable a reception, cannot fail to render the present volume a standard authority on its important subject. To show the general scope of the work, an outline of the Contents of Part I. is subjoined.

Lectures I., II.—INTRODUCTORY—Symptoms—Examination of Symptoms—Modes of Examinations. *Lectures III., IV., V.*—DISORDERS OF MENSTRUATION, Amenorrhœa, Menorrhagia, Dysmenorrhœa. *Lectures VI., VII., VIII.*—INFLAMMATION OF THE UTERUS, Hypertrophy, Acute Inflammation, Chronic Inflammation, Ulceration of the Os Uteri, Cervical Leucorrhœa. *Lectures IX., X., XI., XII., XIII.*—MISPLACEMENT OF THE UTERUS, Prolapsus, Anteversion, Retroversion, Inversion. *Lectures XIV., XV., XVI., XVII.*—UTERINE TUMORS and OUTGROWTHS, Mucous, Fibro-cellular, and Glandular Polypi, Mucous Cysts, Fibrinous Polypi, Fibrous Tumors, Fibrous Polypi, Fatty Tumors, Tubercular Diseases. *Lectures XVIII., XIX., XX.*—CANCER OF THE UTERUS.

PART II. will receive an equally extended treatment, rendering the whole an admirable text-book for the student, and a reliable work for reference by the practitioner.

BY THE SAME AUTHOR. (Just Issued)

AN ENQUIRY INTO THE PATHOLOGICAL IMPORTANCE OF ULCERATION OF THE OS UTERI. In one neat octavo volume, extra cloth. \$1 00.

WILLIAMS (C. J. B.), M. D., F. R. S.,

Professor of Clinical Medicine in University College, London, &c.

PRINCIPLES OF MEDICINE. An Elementary View of the Causes, Nature,

Treatment, Diagnosis, and Prognosis of Disease; with brief remarks on Hygienics, or the preservation of health. A new American, from the third and revised London edition. In one octavo volume, leather, of about 500 pages. \$2 50. (*Now Ready*, May, 1857.)

The very recent and thorough revision which this work has enjoyed at the hands of the author has brought it so completely up to the present state of the subject that in reproducing it no additions have been found necessary. The success which the work has heretofore met shows that its importance has been appreciated, and in its present form it will be found eminently worthy a continuance of the same favor, possessing as it does the strongest claims to the attention of the medical student and practitioner, from the admirable manner in which the various inquiries in the different branches of pathology are investigated, combined and generalized by an experienced practical physician, and directly applied to the investigation and treatment of disease.

We find that the deeply-interesting matter and style of this book have so far fascinated us, that we have unconsciously hung upon its pages, not too long, indeed, for our own profit, but longer than reviewers can be permitted to indulge. We leave the further analysis to the student and practitioner. Our judgment of the work has already been sufficiently expressed. It is a judgment of almost unqualified praise. The work is not of a controversial, but of a didactic character; and as such we hail it, and

recommend it for a text-book, guide, and constant companion to every practitioner and every student who wishes to extricate himself from the well-worn ruts of empiricism, and to base his practice of medicine upon principles.—*London Lancet*, Dec. 27, 1856.

A text-book to which no other in our language is comparable.—*Charleston Medical Journal.*

No work has ever achieved or maintained a more deserved reputation.—*Va. Med. and Surg. Journal.*

WHITEHEAD ON THE CAUSES AND TREATMENT OF ABORTION AND STERILITY.

Second American Edition. In one volume, octavo, extra cloth, pp. 308. \$1 75.

YOUATT (WILLIAM), V. S.
